dangers. While our Government has given a vacillating support to the Greeks, the French have been displaying a form of sympathy for the Kemalists, and last year concluded with them a separate agreement. The Turks have been driven into an alliance with the Bolshevists, of whose aggressive action against Western Europe they have now, willy-nilly, become the instruments. British support of the Greeks has been interpreted in the Mahomedan world as a movement against Islam and, for that reason, has undermined the prestige of our rule in India. The wretched war could never have been maintained if it had not been for this growing conflict of narrow and short-sighted purpose. Greeks and Turks are suffering, and to the arguments of their moderate representations so admirably stated by our Constantinople Correspondent in an article that we published on Tuesday there is simply no reply. Not Greeks and Turks, but Great Britain and France are primarily responsible for the continuation of the war in the Near East. It is intolerable that Great Britain should be believed to be supporting Greece, whose troops are now massed within striking distance of Constantinople, while France is assumed to be sympathising with the Kemalists, who appear to be preparing to oppose the occupation of Constantinople by the Greeks. There is an ideal of impartial justice both to Turkey and to Greece which the Great Allied Powers should resolutely support. In Paris last March a very reasonable peace programme was agreed upon by the Allied Foreign Ministers in conference. That peace programme was not carried out because the Allies failed to give in their relations with the belligerents a complete and emphatic impression of their unity. A fresh opportunity for repairing grave errors will be given in a new Near Eastern Conference that is to meet in Venice in the autumn. It is earnestly to be hoped that at that Conference the Allies will firmly agree upon the principle that Turkey, whatever Government she may finally choose, must not, and cannot, be destroyed, and that Greece must be delivered from an intolerable burden of expansion. Having agreed upon just terms of peace the Allies must carry them out unflinchingly and unitedly with all the means at their joint disposal.

The Position of the Greeks.

The *Birmingham Post* of August 19 writes thus upon the deadlock in the Near East:—

> Politically, there is evidence that both the Greeks and the Turkish Nationalists are growing weary of a struggle at once costly and inconclusive. At the end of last month the Greek Government took two steps which seemed to show a plain determination to end or mend their Anatolian adventure. On the one hand they proclaimed Anatolia an "autonomous State"; on the other, they concentrated four divisions in Thrace and informed the Allies that they proposed to occupy Constantinople. Both moves have failed. The Allies promptly and properly vetoed the Greek plan to seize Constantinople. King Constantine was given to understand that, if his four divisions marched, they would march with the certainty of military and naval opposition from the Allied garrison in the Straits. He promptly repudiated the design. Against the Ionian proclamation Turkey protested—and that protest the Allies have now upheld. But this, when all is said and done, is negative progress. Can nothing be done to end this little war, with its disastrous reaction on European economics and Eastern politics? There is talk now of another Conference, to be held in Venice in the autumn. Yet such a Conference cannot, we think, do much except reiterate the proposals for a settlement which were published in Paris last March—with the unanimous endorsement of the Allies. It is true Mr. Lloyd George—in a speech in the House of Commons on August 4, just at the end of the session—laid the blame of evading the March proposals upon the Turkish Nationalists, and deduced therefrom that, when negotiations were at last reopened, Angora might expect less favourable terms. But is there, in fact, any reason to blame Turk rather than Greek? Is there, in fact, any new gain it is politically feasible to offer Greece?

It proceeds to state that the retention of Smyrna and of Constantinople by the Greeks is impossible—either because of their own weakness or because of Allied unwillingness:—

> Every way, then, the Greek path is closed. It would be the part of wisdom for King Constantine to recognise the fact. His army is weary of war; and at home his people are feeling the reaction from their long-continued efforts. The sooner the Greek rulers admit their relative failure, the less disastrous to themselves will be the consequences of such an admission. Nor is the failure anything but relative. Greece has made immense territorial gains. She needs peace—and especially peace with Turkey—in order to reap the harvest. But all this, it will be said, is a matter for Greece alone. How can the Allies assist? They can do it, we believe, in two ways. By the plainest of plain speaking, they can rid the Greeks of the mischievous delusion that they are the chosen representatives of the "West" against the "East." They can also make practical proposals for the protection of Greek minorities in Anatolia, and Turkish minorities, hardly less numerous, in Western Thrace. If the question of minorities were really tackled we believe most of the objections to a reasonable settlement would disappear. As to the other point, the supposed Greek "mandate" from the Allies, it is high time that mandate—if ever it was granted—was revoked. Greece has gone far beyond anything the Allies ever intended, and has made a mess of her undertaking. That is good enough reason for any real or fancied change in Allied policy. The whole question of the Allied attitude to the Greek adventure in Anatolia is difficult and complex. But if it is necessary for the Allies—or any of the Allies—to admit a mistake two years old, then by all means let them admit it. The present position is hopeless and, worse still, it is dangerous.

In a general article upon "Greece and Turkey" in the *Contemporary Review* of July, M. Andréades (Professor at the University of Athens) attempts to prove that any revision of the Treaty of Sèvres would be extremely distasteful to all Greeks, of whatever shade of opinion:—

> The solution of the Greco-Turkish conflict proposed by England, France, and Italy in March last has produced legitimate surprise in all circles in Greece. It has appeared as extremely unjust and totally inapplicable.
>
> Unjust, in the first place, because one could not see on what basis the revision of the Sèvres Treaty was proposed at a moment when the Allies refused to touch even the financial clauses of the Treaty of Versailles, of which Sèvres is a simple corollary. The results of the Greek elections of November, 1920, whatever other judgment may be passed on them, cannot serve to annul a treaty based on the principle of nationalities, and not on any particular political party. The more so, indeed, as the elections in Greece were fought on internal questions. The Opposition took good care, during the electoral campaign, to declare that it would continue the foreign policy of M. Venizelos, and has offered, since its accession to power, all possible guarantees to this effect. On the other hand, M. Venizelos and his principal collaborators, such as his ex-Minister of Foreign Affairs, M. Politis, and his ex-Minister at Paris, M. Romanos, with the patriotism which characterises them, have by statements, lectures, and articles demonstrated to the Allies how badly they would serve both the cause of justice and their own interests by adopting an anti-Hellenic policy. The notion of the revision of the Sèvres Treaty has been received with indignation by all Greeks, independent of party, as this Treaty had been justly considered by them as the minimum to which they were entitled.

Near East Bookshelf.

TURKS AND GREEKS.

"THE WESTERN QUESTION IN TURKEY AND GREECE." By Arnold J. Toynbee. (London: Constable. 18/- net.)

In my opinion, three qualifications are requisite by the would-be author of a book upon the Near East. He must have the opportunity to study the questions involved at first hand; he must have the faculty of observing and describing what he sees, and he must have the desire and the capacity to form a fair judgment of events and facts which come under his notice. As will be discovered at once, Mr. Toynbee possesses all these qualifications to a very marked degree.

In addition to earlier journeys to the countries under discussion, last year alone the author spent eight months in the lands which border upon the Eastern Mediterranean. Here he visited Athens, Smyrna, Constantinople, and Salonika, and often accompanied by Mrs. Toynbee, he travelled in the interior of Anatolia to an extent which has probably not been equalled by any other British writer since the war. This alone would make his volume of the utmost importance, but, in addition, Mr. Toynbee was the compiler of the "Blue Book" dealing with the treatment of the Armenians and issued in 1916—a position which must have given him a great insight into the affairs of the Near East. And then those who read his 364 carefully considered pages must recognise that the author is not only a shrewd discerner of people and things, but that he has left no stone unturned to check information derived from one authority by reference to another. Lastly, too, whilst it may be said that Mr. Toynbee is now more or less on the side of the Turks and somewhat against the Greeks, I do not believe that anybody who studies the volume carefully can complain that he is guilty of partiality or unfairness, for, generally speaking, the system adopted is either to leave the public to judge facts for itself or only to express an opinion upon the basis of facts which are given in connection with that opinion.

The book makes no attempt to discuss the nature of the peace settlement in the Near East, for, as is rightly explained in the Preface, whatever might once have been the possibility of imposing a cut-and-dried scheme, that possibility has been destroyed by events which have taken place since the world armistice. The author's task is, therefore, rather to place certain recent incidents in their historical setting and to show that events, and particularly the developments that have taken place as between Turkey and Greece during the last four years, depend on and are due largely to Western influence or to the policy of the Allied Powers. Thus, for example, we are told that:—"On the 15th of May, 1919, a destructive force was let loose in Western Anatolia, as sudden and apparently incomprehensible in its action as the eruption of a volcano. One morning, six months after the close of the European War, civilians and disarmed soldiers were massacred in the streets of Smyrna . . . . and a military port came into existence. . . . . Within eight months the destruction that had started on the Smyrna quays was at work in Cilicia at the other end of Anatolia. Within eighteen months it had overwhelmed the Armenian Republic of Erivan, beyond the north-eastern boundaries of Turkey-in-Asia."

In order to prepare the reader for what are the two most important sections of the book—namely, those which deal with the actual military developments of the last three years and with the atrocity question—the author provides his readers with five in some ways preliminary chapters, which fill rather more than half the volume. Here he devotes many highly informative pages to such question as "Western Diplomacy," Greece and Turkey in the Vicious Circle," "The Background of Anatolia," and "Greek and Turkish Government." In the first-mentioned of these chapters there is a searching and, I think, entirely justified indictment of the Powers' diplomacy, and we are shown clearly that the recent and present situations in the East have arisen very largely from the international rivalries which exist.

Mr. Toynbee has a good deal to say about the controversy between King Constantine and M. Venizelos during the earlier part of the war. Greatly to his credit, he does much here to elucidate a question which has never been properly understood in this country, and he states:—"Neutrality, during the whole period during which we respected the King's legitimate claim to insist upon it, was more prudent for Greece and more dignified than the purchase of territory by intervention. . . . Indeed, King Constantine was not alone in his views. Possibly a majority among the politically educated people agreed with him"; and further on the author says, in reference to the same subject:—"The point of historical interest is not to pass judgments on these mischievous parties and their unprofitable vicissitudes, but to trace how a war between the Western Powers has played havoc with the internal development of a Near Eastern country, and then to observe how this internal disharmony has reacted prejudicially upon that country's foreign policy under a succession of foreign governments."

There were three alternative ways of dealing with the Greco-Turkish nationality problem—thorough-going segregation, the restoration of the *status quo*, and the carving out of a sort of territorial reservation for the Anatolian Greeks. The author thinks, and I agree with him, that the adoption of the third of these policies by the Supreme Council combined the disadvantages of the other two, and he goes on to suggest that:—"It involved both a complicated redrawing of frontiers and also a reshuffling of populations (not less undesirable from being only local). It was in contradiction with the geographical structure of Anatolia and with the economic relations between the Greeks and Turks in the country."

Whilst Mr. Toynbee says that the situation became distinctly worse in Asia Minor during last year, and whilst, therefore, I am unable to join issue with him on this point, for my opportunities of personal observation were in the late autumn of 1920, I feel that the author is somewhat severe in his criticism of M. Sterghiádhis, the Greek High Commissioner in Anatolia. Anybody who knows him must recognise that that dominating personality is possessed of many and far-reaching faults. But his task, as the original nominee of M. Venizelos, and now as the lieutenant of King Constantine, is a most difficult one, and I feel disposed to think, in spite of certain unfavourable examples cited by the author, that there is no other Greek, except M. Venizelos himself, who would have performed his work with less discredit, and that on the whole, so far as his personal attitude be concerned, the "Harmost of Ionia" has endeavoured to show as much fairness to the Turks as he has thought compatible with Hellenic policy.

Space forbids my entering into the details of the chapters which deal with "The Military Stalemate," "The War of Extermination," and "New Facts and Old Views." Sufficient, therefore, be it to say that if the diplomatist or member of the general public wishes to understand the various phases into which the Anatolian campaign has been divided, he cannot do better than peruse Mr. Toynbee's careful account of these events. With regard to the question of atrocities, which are dealt with very fully, it may be that the author has been inclined to minimise the horror of the Turkish treatment of the Greeks, and this because, as he says himself, he has seen little of this treatment at first hand. This once pointed out, one cannot deny that Mr. Toynbee has done a real service in endeavouring to counteract the prejudices which exist and to minimise the ignorance of the English-speaking people, many of whom do not know that, given the opportunity, all the nations of the Near East are cruel according to our standards. However unpleasant it may be to those who have considered that the Greeks are more righteous than the Turks, he is therefore entirely absolved from any criticism for having reproduced evidence as to the conduct of the former race—evidence so well-sifted that its importance cannot possibly be denied.

Although I think that the book is rendered a little heavy by too numerous parentheses, and perhaps by too frequent references to other parts of the text, no review

such as this would be complete without saying that the value of the book is greatly enhanced by the provision of an excellent index, of a long list of books, from which further information on the subject can be secured, and of a very comprehensive and careful table of dates from November, 1914, until March, 1922. These merits, coupled with the obvious sincerity of the author, with his sympathy for all the nationalities concerned, and with his clear desire to explain the truth, make Mr. Toynbee's book a work of far-reaching significance—a book which must be read and re-read by every student of Near Eastern affairs. H. C. W.

MUSICAL NOTES.

MODERN COMPOSERS.

"MUSICAL PORTRAITS: Interpretations of Twenty Modern Composers." By Paul Rosenfeld. (London: Kegan Paul. 10s. 6d. net.)

It is in America more than in any older country that men, both first-rate and mediocre, attempt to the higher synthesis of thought. There the thirst for knowledge is assuaged only when the various "facts" of life are labelled and docketed, when their inter-relation is established, and when their classification and consequent ordering are accomplished. On him who has achieved this task content flaps its peaceful wings; criticism of affairs, whether general or particular, is no effort, and the writing of a book becomes a necessity.

Now the writer of this book, Mr. Paul Rosenfeld, evidently thinks that music can be part of a larger philosophy, for he constantly endeavours to explain it by means of bigger and more concrete things. But he is far from making out his case. I have never yet seen a satisfactory placing of music in the larger aspect of human thought, and though this author tries with creditable and unflagging zeal to explain modern compositions mainly by painting in a modern quasi-material background, the unique position of music remains. For music is not, as he suggests, the outcome of a transient morality, nor is it merely a mirror of that morality; it is not the result of race, neither is it explicable by environment. In fact, the more completely a musical work can be analysed and appreciated by reference to period or place, the lower as a work of art it must be judged. Yet it is in terms either of period or place that Mr. Rosenfeld issues nearly all his judgments, implying the zealous dogma that an historical and local understanding is essential to a true love for music. This is a false though specious ruling, and is on a par with those who think that a journeying to Dorset is necessary to comprehend Mr. Thomas Hardy.

But let Mr. Rosenfeld speak for himself, and it will be seen how misleading at times his method may be, and at others how illuminating. In an extremely good chapter on Wagner he writes:—"Wagner's music is the (nineteenth) century's pæan of material triumph. It is its cry of pride in its possessions, its aspiration toward greater and even greater objective power. Wagner's style is stiff and diapered and emblazoned with the sense of material increase. It is brave, superb, haughty with consciousness of the gigantic new body acquired by man." That is, I think, correct and excellent. But what of this on Moussorgsky, whose work he dangerously calls "a manifestation of the Russian Christ":—'To Europe in its late hour he came as emissary of the one religious modern folk, and called on men to recognise the truth and reform their lives in accordance with it." That, I think, is bosh. No musician ever did anything of the kind, and, apart from the rousing of elemental passions, such as joy, grief, pride, and so on, conversion by means of a musician's "message" is of the doubtfullest worth. Again, in his essay on César Franck, he supplies a non-musical explanation to the great Belgian:—"The music of César Franck is the music of the people driven into themselves by the conditions of modern life. It is the music of the fine ones who stand hesitant on the threshold of the world, and have incessantly to struggle for the power to act, for faith and hope." Thus the finding of a religious or moral key to music is almost an obsession with Mr. Rosenfeld; yet it is the most useless of searches. One of the greatest admirers of Franck I know is an atheist, just as the most fervent and unwavering admirer of Mozart I know is an anarchist; they would be enormously disappointed if they were to learn that their respective composers did not, after all, write specially for them.

Yet Mr. Rosenfeld is a much better musician than his written word always shows him. With such zeal and such terrible facility in the writing of the American language he was, perhaps, bound to involve himself in a certain amount of contradiction, but I think little the less of him for that. His tendency to categorise and exclude does not conceal his wide and sincere love for the art on which he pours out his torrents of words; and if only he would occasionally stop, not perhaps to reflect (for the speed of the U.S.A. must be maintained), but merely to consider, he would, I believe, become a very good critic. Why, for instance, should he, in one place, write of Debussy that "of all musicians he is the one amongst us most fully. He is here, in our midst, in the world of the city. There is about him none of the unworldliness, the aloofness, the superhumanity that distances so many of the other composers from us"; and then, in another place, say that he "seems to be of the sort of men in whom the center of conscience is, figuratively, sunken; one of those who have within themselves some immobility that makes the people and the things about them appear fleeting and unreal. For such, the world is a far distant thing, lying out on the ruins of consciousness"? There is much sense in this, but how carelessly expressed! The conception of an unreal City-man!

In the essays upon the really modern people—Stravinsky, Schoenberg, Bloch, and the rest—Mr. Rosenfeld is at his intensest and best. Here the runner has really found his true distance—the sprint. These essays rush along with terrific and most realistic speed. When talking about all those other worlds, the world of Wagner, of Berlioz, of Rimsky-Korsakoff, and so on, he manifestly had to supplement his knowledge with his imagination; but in describing the present world by the present man he is stating more or less actual, at any rate probable, facts. Who will gainsay this, for example, on Stravinsky (unless he declare it to be mere "words, words"):—"He is one of those beings who seem to have been called into existence solely by the modern way of life, by express trains and ocean greyhounds, by the shrinking of continents and the vibration of the twentieth-century world." It is easy to discover beneath such flatulent *clichés* a fundamental truth. Incidentally, that Mr. Rosenfeld is not a crass adulator of Stravinsky is proved by his remark: "It may be that Stravinsky has already written his masterpiece ('Le Sacre du Printemps')." Take, for another example, what he lets fall upon Ornstein. This young man, of whom no one now stands in fear, he says, "is a mirror held up to the world of the modern city. The first of his real compositions are like fragments of some cosmopolis of caves and towers of steel, of furious motion and shafts of nitrogen glare become music." I wish I could continue this quotation, for it is a most delightful extravaganza. But for sheer wisdom (and what may be of most interest to readers of this journal) I choose this, from the essay upon Bloch: Mr. Rosenfeld has been chanting the fusion of East and West in art:—"For no composer was better fitted by nature to receive the stimulus of the onrushing East. As a Jew, Bloch carried within himself a fragment of the Orient; was in himself an outpost of the mother of continents. And he is one of the few Jewish composers really fundamentally self-expressive. He is one of the few that have fully accepted themselves, fully accepted the fate that made them Jewish, and stigmatised them.

After all, it was not the fact that they were "homeless," as Wagner pretended, that prevented the company of Meyerbeers and Mendelssohns from creating. It was rather more the fact that, inwardly, they refused to accept themselves for what they were. The weakness of their art is to be understood only as the result of the spiritual warfare that threatens to divide every Jew against himself. There was operative in them, whether they were aware of it or no, a secret desire to escape their stigmata. They were deliberately deaf to the promptings of the beings that were so firmly planted in the racial soil. They were fugitive from the national consciousness. The bourne of impulse was half stopped. It was not that they did not write "Jewish" music, utilise solely racial scales and melodies. The artist of Jewish extraction need not do so to be saved. The whole world is open before him. He can express his day as he will. One thing, however, is necessary. He must not seek to inhibit any portion of his impulse." A long quotation, but one embodying a profound and very important truth. It is such things that make this book worth reading.

I have not mentioned the fact that among twenty essays upon different composers there is not one upon an Englishman, because one rather takes that sort of thing for granted. But we might suggest that if Mr. Rosenfeld's eager and almost ubiquitous eye keeps a-roaming, he might some day alight upon Delius and Elgar, whom one would be even proud to put beside any two composers (though certainly sometimes it would be to their disadvantage) that he discourses upon so fulsomely.

ANDANTE.

PERSONAL AND GENERAL.

TO-DAY.

August 31 (New Style).
August 18 (Old Style).
Moharram 8, 1341, A.H. of the Moslem Calendar.
Elul 7, 5682 of the Jewish Calendar.

The Raja and Rani of Pudukota are staying at Aix-les-Bains.

Dr. Pavlasek, the Czecho-Slovak Consul-General in London, has left for the Continent.

Mr. Edwyn Bevan has undergone a very serious operation at a nursing home at Oxford.

Mme. Mastny, wife of the Czecho-Slovakian Minister, left London last week for Rio de Janeiro.

Seyed Ruasim Khan, Counsellor at the Afghan Legation, has gone to the Continent, on leave.

The Hon. Gideon Murray, M.P., has joined the Hon. Mrs. Gideon Murray at Elibank, Selkirkshire.

Princess Andrew of Greece is visiting the Marquess and Marchioness of Milford Haven at Southsea.

M. Stambolisky will represent the Bulgarian Government at the meeting of the League of Nations Assembly.

The Yugoslav Minister, M. Michel Gavrilovitch, is due to leave London for Switzerland to-morrow (September 1).

Colonel Douglas Capitaneano, Military Attaché at the Roumanian Legation, has taken his departure for Salzburg.

We much regret to learn that Colonel the Hon. Aubrey Herbert, M.P., is confined to his room through eye trouble.

Mme. Stancioff, the wife of the Bulgarian Minister, recently spent a few days at Westwood Manor, Bradford-on-Avon.

The engagement is announced of Henry Etienne Pellereau, late P.W.D., India, and Mabel Jessie Jukes, of Tonbridge.

The Minister for the Kingdom of the Serbs, Croats, and Slovenes will leave London to-morrow (Friday) for Geneva on leave.

The marriage arranged between Mr. R. F. Garnons Williams and Miss Eileen Sandys Thomas will take place in Bombay early in November.

A BIT OF NEW BAGHDAD.

Our illustration shows the site of the new Maude Memorial, Baghdad, which will be erected in front of the Residency. It is from one of a collection of pictures painted by Miss Edith Cheesman during a recent visit to Iraq, and, of course, cannot convey the charm of the original, which depends so largely on colour. The collection covers a field extending from Hit in the north to Basrah in the south, and includes some of the more

The Site of the new Maude Memorial, Baghdad.

out-of-the-way towns, and villages of Iraq, as well as many of the better-known places on the Tigris and the Euphrates, and the shrines at Nejef, Kerbellah, Kufa, and Kazimain. There are also portraits of distinguished men and national types, which are in some cases unique. The pictures will be exhibited this autumn at the Royal Geographical Society's rooms, and at Walker's Galleries, New Bond Street.

Mme. Elmina Nazoni has arrived in town from Athens to stay with the Greek Chargé d'Affaires and Mme. Rizo-Rangabe, who is her daughter.

M. Petrow Tchomakoff, First Secretary at the Bulgarian Legation, has been transferred to the Foreign Office, and leaves shortly for Sofia.

The marriage arranged between Major Alfred Lethbridge, 54th Sikhs (F.F.), and Marjorie May Cockerton will take place at Musbury, Devon, on September 14.

A marriage has been arranged, and will shortly take place, between Captain Reginald Arthur Savory, M.C., 14th King George's Own Sikhs, and Myrtle Estelle Richardson, widow of James Richardson, late of Heswall, Cheshire, and of Liverpool.

General Sir Joseph Byrne, Governor of the Seychelles, and Lady Byrne, with their two children, have embarked

THE PERSIA SOCIETY.

for Bombay in the Peninsula and Oriental steamship Kaisar-i-Hind, by which vessel the Princess Pretiva is also travelling to Bombay.

Our Sofia Correspondent writes (August 21):—
Lord Newton will visit Bulgaria in September.
Mgr. Stephan, Archbishop of Sofia, has been elected Vice-President of the International Church Congress, which is at present sitting at Copenhagen.

The engagement is announced of William Jackson Perkins, the son of Col. W. J. Perkins and Mrs. Perkins, of Guildford, Surrey, to Milicent Edith Whitehouse, the elder daughter of Canon F. C. Whitehouse and Mrs. Whitehouse, of the British Embassy, Constantinople.

A marriage has been arranged, and will shortly take place, between Mr. George F. Killwick, of 2, Brunswick Square, Hove, and Peggie Sinclair, only child of the late John Sinclair, of Messrs. Sinclair and Eck, freight brokers, Calcutta, and of Mrs. Sinclair, Royston, Walsingham Road, Hove.

A marriage has been arranged, and will take place early in September, between Mr. James Gardiner, M.P. for Kinross and West Perthshire, and Miss Elizabeth Christie, youngest daughter of the late Mr. Daniel Christie, of Mokameh, Bengal, and Drummondearnoch, Comrie, Perthshire.

A marriage has been arranged, and will take place shortly at Colombo, between Dacre F. C. Dyson, of Andigama, Giriulla, Ceylon, only son of the late A. F. H. Dyson, of Lynton, N. Devon, and Bellesmere, Lincolnshire, and Lilias M. Grant, youngest daughter of the late Lieut.-Colonel Grant, late 43rd L.I., and Mrs. Grant, of Reay House, Inverness.

The marriage arranged between Captain Edward Horace Whitford-Hawkey, 16th Cavalry, Indian Army, only surviving son of Mr. and Mrs. Whitford-Hawkey, of Bospolvans, St. Columb, Cornwall, and Marion Florence Harvey, only daughter of Lieut.-Colonel and Mrs. W. L. Harvey, of Tredarvah, Penzance, will take place at Bombay on or about October 20.

A Cambridge correspondent states that Sir Dorabji Jamsetji Tata has informed the Master of Gonville and Caius College that he accepts with much pride and gratification the Honorary Fellowship which was offered to him in June. Sir Dorabji Tata, who is well known both for his business interests and his educational work in India, is an old member of Caius College.

A marriage has been arranged, and will take place in October at Simla, India, between Major Alastair I. Macdougall, D.S.O., M.C., Inniskilling Dragoons, youngest son of the late Colonel J. W. Macdougall, R.A., Deputy Commissioner, C.P., India, and of Mrs. Macdougall, Edinburgh, and Constance, daughter of Mr. and Mrs. S. St. Barbe Emmott, Havant, Hampshire.

A marriage has been arranged, and will take place in October at Bombay, between Brevet Lieutenant-Colonel C. B. Dashwood Strettell, P.A.V.O. Cavalry, elder son of Lieutenant-Colonel A. D. Strettell, of Hythe, Kent, and M. Gillian de Hane, elder daughter of Mr. H. H. Brown, O.B.E., M.D., F.R.C.S., of Ipswich.

The engagement is announced of Gordon Lindsay, son of the late Charles Shurey and of Mrs. Shurey, residing at the Hotel Bentinck, Margaret Street, Cavendish Square, and Mary Edith, daughter of Colonel Ross Hayter, C.B., C.M.G., D.S.O., Headquarters, Western Command, and Mrs. Hayter, 50, Hough Green, Chester, and granddaughter of the late Lieutenant-Colonel Edward Lawrie, I.M.S.

The King of Roumania, who is at present staying at Sinaia, on August 24 celebrated the fifty-seventh anniversary of his birth. King George sent a cordial message of congratulation, and cards were left at the Legation in London on behalf of the Prime Minister, the Lord Chancellor, the Lord Privy Seal, the Secretary for Foreign Affairs, and the Lord Chamberlain. The Roumanian Chargé d'Affaires also sent a congratulatory message to the King of Roumania on behalf of the members of the Colony.

Colonel El Lewa Cyril E. Wilson Pasha, C.M.G., C.B.E., D.S.O., Governor of the Red Sea Province, whose leave expired on August 1, is, says the *Su an Times*, retiring on pension. In the early days of the Government Colonel Wilson was appointed to Sennar Province, where he served as Junior and Senior Inspector from 1902 to 1904, when he was promoted to the Governorship, which post he held up to the time he was transferred to Khartoum at the beginning of 1909. After holding the appointment of Governor of this Province he was transferred to Red Sea in May, 1913, where he has been to date.

OBITUARY.

The death has occurred of Paymaster-Rear-Admiral F. W. I. Airey. Frederick William Iago Airey entered the service in July, 1877, and was Assistant Paymaster on the Phalia during the Egyptian War of 1882, receiving the medal and Khedive's bronze star. From his next ship, the Alexandra, he was landed for naval transport duty at Suakin, and he received the approbation of the Admiralty for sketches made of the defences of Suakin.

THURSDAY, AUGUST 31, 1922.

GROPING FOR A SETTLEMENT.

In the course of the next four or five weeks, if a certain difference of opinion between the British and French Governments can be adjusted, it seems likely that effect will be given to the proposal of the Allied High Commissioners in Constantinople that a preliminary exchange of views regarding a Near Eastern settlement should take place under Allied auspices with representatives of the Greek, Constantinople, and Angora Governments. This meeting is already dignified in the public Press with the title of a Near East Conference. It is devoutly to be hoped that the gathering will lead to peace in the Near and Middle East; but this end can only be achieved if all the countries concerned combine to clear away a variety of misunderstandings and face the facts of the situation. As things are, there is at the outset uncertainty as to the conditions, implied or specifically laid down, on which the meeting is being held. The last overtures for a settlement were made by the Allied Governments in March, when, after a meeting of the British, French and Italian Foreign Ministers in Paris, a Memorandum was drawn up embodying the principles on which the Entente Powers approached the question of a settlement, together with an outline of the terms that they were now prepared to offer to Turkey. Greece and the Constantinople and Angora Governments were invited to signify their general agreement with the provisions and to meet the Allies to elaborate a treaty of peace on the lines laid down, which included an immediate armistice between the belligerents, while the Greek Army withdrew from Asia Minor. As the conditions upon which the Angora Government expressed its willingness to accept the Allies' invitation amounted to a rejection of the proffered terms, the proposed peace conference has not been held. After three months' further marking time a compromise on the lines indicated has been evolved in Constantinople. For the "preliminary exchange of views" no antecedent stipulations have been made as far as the Greeks and Kemalists are concerned, and the acceptance by both of the invitation has been secured. There is a tendency, however, on the part of the British and French Governments to disagree over their attitude towards the Paris terms of March 26 last. Do these still represent the Allies' peace conditions? Mr. Lloyd George is credited with having suggested that there must be some modification of the insistence upon an immediate evacuation of Asia Minor by the Greek Army, and with having accompanied this suggestion with the threat that if the rest of the March Memorandum is not accepted as it stands, by friend and foe, Great Britain may find herself compelled to adopt a line of her own. Such a threat, if made, would be entirely in keeping with the ineptitude that has characterised the Prime Minister's policy in the Near East. If the Turks are required, without more ado, to accept the March terms as they stand, there is no need to summon a conference to hear them say that they will accept them. There is still less purpose in a "preliminary exchange of views." The French Government has retorted that the immediate evacuation of Asia Minor must be carried out, if general peace conditions are agreed upon. It remains to be seen whether this point can be settled between the two Governments without wrecking the meeting, which is expected to be held at Venice. A perusal of the March Memorandum shows clearly that it was intended that on the acceptance by the Kemalists of the Allies' peace terms the Greeks should begin to evacuate Asia Minor, the Allies relying on special commissioners appointed by the League of Nations to safeguard minorities.

In all discussions, official or unofficial, on the Near Eastern settlement there would appear to be an inadequate appreciation of the fact that the Allies' obligations are not restricted to bringing about peace between Greece and the Kemalists and to securing safeguards, on paper or otherwise, for minorities. There is a further duty both to Greece and to Turkey. The Allied Memorandum of March was drafted with one eye on Angora and the other on Athens. Reference, it is true, was made to a desire to maintain the secular and religious authority of the Sultan of Turkey; but there has been no indication that the Allies have regarded it as any concern of theirs that there is a serious breach between the Sultan and the Angora Government. Again, the Memorandum spoke of the Allies' desire "to compensate the Greek nation for the great sacrifices which they accepted during the war in the cause of the Allies"; but it would surely simplify the course of the settlement, at least on the Greek side, if a definite statement were made as to the amount of the monetary compensation that the Allies are prepared to give to Greece. The recent request made by the Greek Government to be allowed to advance on Constantinople may be regarded as a policy of desperation adopted in order to bring home to the Allies the critical situation in Greece and to compel them to put an end to the delay in arranging a settlement. Even if Greek acquiescence in all and any terms can be counted upon, there is no justification in prolonging the country's agony. Greece has a bitter pill to swallow; she deserves to have the ordeal mitigated as far as possible. As things are to-day, the certainty of economic recuperation is of greater importance to the Greek people than any accession of territory. The Greek Government, therefore, should be in a position to send delegates to the Venice meeting with the knowledge that an adequate monetary grant will offer some compensation for the injury done to Greek national pride.

It may be less easy to leave Turkey in a satisfactory condition. If the settlement is to entail civil war among the Turks, or to place the more moderate section of Turkish officialdom, represented by Constantinople, at the mercy of Kemalist intransigence, then it will be better to postpone the settlement until an alternative solution can be evolved. The real value of a "preliminary exchange of views," if properly conducted by the Allies, lies in the opportunity afforded of gauging the attitude of Angora towards Constantinople and the Sultan. If the Sultan and his Government are satisfied as to the future, there is no need for action on the part of the Allies; if they have the least misgiving on the subject, the Allies are under a moral obligation to see that Constantinople is not placed at a disadvantage owing to its loyal acceptance of the peace terms and its more or less correct attitude. It would be supposed that by now the Allies, or at least Greece, would have discovered the only practical solution of their difficulties. One and all affect anxiety for the safety of the minorities in Asia Minor after the withdrawal of the

Digitized by Google

Greek troops. On the one hand they have Angora, which has shown quite clearly that it can rival Abdul Hamid at his worst, and would seem to have settled down to permanent intransigence; on the other hand they have the Sultan and the Constantinople Government, both anxious to rehabilitate Turkey in the eyes of the world, and ready to meet the Allies in regard to minorities or any other subject. But Constantinople is ignored, and Angora is to be encouraged to its heart's content by being made arbiter of Turkey's future. If the Greeks, under agreement with the Sultan's Government, will withdraw from Turkish territory in such a way that they afford opportunity for the restoration of the Khalif's authority as against Bolshevist-ridden, free-thinking Angora, they will not only safeguard the non-Moslem communities of Asia Minor, but they will also have a friendly Turkey, without which Greece cannot hope to recover economic prosperity.

JEWISH CHARMS AND CURSES.

By ESTELLE BLYTH.

It is written in the Law of Israel that the people shall not seek to a wizard or a witch, nor to anyone that hath a familiar spirit. The Old Testament, however, is full of instances in which the Jews fell away from the straight path, and, whether secretly or openly, defied the law and consulted those who had knowledge of the dark arts. Superstition, which is as much a result of fear as of ignorance, dies hard in human hearts—so hard, indeed, that we are tempted to wonder whether it ever really dies. War, famine, pestilence, vast manifestations of the power of Nature, any great upheaval of life, in fact, seems to bring all the darker forces of the mind into horrible prominence, and for a while they rule weak, unstable, and timorous souls with appalling cruelty.

In Palestine we were often aware of undercurrents of this kind. Old women waxed rich through the sale of love philtres and potions for childless wives; sometimes, it was hinted, through charms and draughts required for purposes of revenge. Witches such as these, potent chiefly through the amazing credulity of those who sought their aid, figure in Crusading chronicles; but possibly the art had lost its power with the passing of centuries, for in our day the old creatures never seemed to achieve anything at all remarkable. They earned their living and waxed fat through the credulity of others, and really one cannot blame them very much; for demand invariably creates some sort of a supply.

Belief in the Evil Eye varies according to the amount of education in the believer, but it is no less a factor in life in Palestine than it is in Italy, though here, as in many other things, the Christians stand a little higher than the Moslems and Jews. When the German Empress, in 1898, visited a school for Moslem girls in Jerusalem she noticed a very bright and charming little child, the only daughter of a prominent Moslem official. This little girl recited very well, and also presented the Empress with a bouquet; and the Empress, whose love of children was intense, gave her an enamel brooch of her royal monogram and crown. Two nights later the little creature was helping to light up the Japanese lanterns with which her father's house was decorated in honour of the Imperial visit; her dress caught fire, and she was so badly burned that she died within forty-eight hours. At once it was said that the Evil Eye had been put upon her by her schoolmates, who were envious of the favour shown her by the Empress.

Here is a Jewish charm against the Evil Eye translated out of the original Hebrew by a Jewish friend in Jerusalem.

"I adjure you, all kinds of Evil Eyes, black eye, blue eye, hazel eye, yellow eye, short eye, long eye, round eye, broad eye, narrow eye, straight eye, hollow eye, deep eye, projecting eye, male eye, female eye, eye of wife and husband, eye of a woman and her daughter, eye of her relatives, eye of a bachelor, eye of an old man, eye of an old woman, eye of a virgin, eye of a married woman, eye of a divorced woman, all sorts of Evil Eyes in the world, which looked and spake with an evil concerning it.

"I command and adjure you by the Most Holy, Mighty, and High Eye, the only Eye, the white Eye, the right Eye, the open Eye, the most careful and compassionate Eye, the Eye that never slumbers nor sleeps, the Eye to which all eyes are subjected, the wakeful that preserveth Israel, as it is written in Psalm cxxi., 4, 'Behold, he that keepeth Israel shall neither slumber nor sleep'; and also as is written, 'The Eye of the Lord is upon them that fear Him, and toward those that trust in His goodness.' With that Most High Eye, I command and adjure you, all kinds of evil eyes to depart, and to be rooted out, and flee away to a distance from N—— and from all his household, and that you shall have no power whatever over N——, neither by day nor by night, neither when awake nor in dreams, nor over any member of his two hundred and forty-eight limbs, nor over any of his four hundred and five veins, from this time forth. Amen.

"The Charm."

"Nezah Selah. Thou are my Hiding-place. Thou shalt preserve me from trouble. Thou shalt compass me about with songs of deliverance. Selah.

"He that dwelleth in the secret place of the Most High shall abide under the shadow of the Almighty.

"Adam, Abraham, Isaac, and Jacob,
"Thou shalt not suffer a witch to live.
"Thou shalt not suffer a witch to live.
"Thou shalt not suffer a witch to live."

Who could doubt for a moment the efficacy of a charm so comprehensive?

The following is a Jewish prayer for revenge, from Hebron. Visitors to the great Mosque at Hebron will remember the large holes in the outer walls beside the steps leading up to the gateway. Into these holes the Jews were wont to thrust their prayer for any greatly-desired benefit, or, very often, for revenge, in the belief that thus it came immediately to the knowledge of Abraham, who would intercede with the Almighty on their behalf. When these holes were full, the Turkish authorities would clear them out and burn the scraps of untidy paper. This particular prayer was pulled out of a hole in my presence and given to me, and, later, an old Jewish friend translated it for me.

"The Prayer."

"This is the decree of the Law. O Lord God, to Whom vengeance belongeth, O God to Whom vengeance belongeth, shew Thyself-

"O Lord, avenge the cause of my affliction, distress, captivity, and poverty upon him who caused it and interfered with the means of my livelihood, and prevented me from keeping the commandment of holy matrimony, and upon those who could and might have helped me, and refused to do so.

"'Thy brother's blood crieth unto me from the ground.' Let my blood and the blood of my posterity be upon him.

"Pity and compassionate the Shechina, which is suffering on account of Israel's transgressions. Give honour to the God of Israel, for your sins have caused the Congregation of Israel to remain in the unclean captivity.

"Know that the Gates of Tears are not closed.

"'Hold not Thy peace at my tears. Put Thou my tears into Thy Bottle,' and have pity on me.—(Signed) Jacob ———, grandson of rabbis."

The translator told me that he had several of these prayers in his possession, including a wild cry for revenge by one who, being determined that the misfortune he desired for his cousin should not fall upon himself by mistake, added careful directions to the effect that the curse was intended for Moses the Crooked and not for Moses the One-eyed, who was the writer of the prayer. As he had evidently given much thought to the matter, making the curse as complete as possible, one can understand his natural anxiety that there should be no awkward mistake made.

The same friendly hand translated and gave us the following notes, which are transcribed here, word for word, as they were written:—

"The Cure called Indulco, or Indulca.

"The word Indulca is most probably from the Latin word 'dulca,' sweet. The cure of Indulca is used by the Spanish Jews for special diseases, such as madness, sudden blindness, sudden fright, epilepsy, barrenness, hard labour, or loss of young children, etc., and is divided into two classes—viz., the Great and the Small Indulca.

"All the household of the patient, as well as all the neighbours who live in the same enclosure (or adjoining rooms) are obliged to leave their dwelling for a few days; and the patient is left alone in his chamber (it must have been previously whitewashed), washed, cleaned, and decently arranged, and all Holy Books removed.

"On the night when the Indulca is to be administered the patient is forbidden to pray, to recite the usual daily portion of Scripture, to mention the word 'heaven' or anything concerning Holy Writ; and the witch prepares a little wheat, barley, salt, water, milk, honey, four or six eggs, and sweetmeats or sugar. At midnight the witch mixes all these ingredients together and scatters a little round the sick-bed, on the threshold, and in the four corners of the room, reciting the following in a whisper:—

"'My Lord, I beseech you to pity, compassionate, and have mercy upon the soul (or life) of your servant (or slave), the patient (giving the name), the son (or daughter) of your handmaid (giving the mother's name), and overlook his (her) trespass; and if he (she) have sinned and done any evil to you, forgive his (her) sins, and restore his (her) life, health, and strength. (If for barrenness, "Open her womb and loosen her bonds." If for loss of young children, "Give life to her sons and daughters.") Let this honey be to sweeten your mouths and palates, the wheat and barley to feed your cattle and sheep, and the water and salt to establish peace, friendships, love, and brotherhood, an everlasting covenant of salt between us and you.' (Here she breaks the eggs and pours them out in the aforementioned places, kneels and prostrates herself, kisses the ground several times, and continues in these words): 'Here I offer to you life for life, in order that you may restore the life of this patient (or "his reason, or whatever the case may be).'

"This is continued or repeated for two more nights in succession, and if the patient is not benefited it is repeated seven or nine times altogether. If the patient be poor, and cannot afford the necessary expense, or if the neighbours decline to leave the adjoining rooms, then the witch thinks it sufficient, in such cases, to go to a cistern, bath, or tannery, and therein pour a little salt and water, and prays as before, saying, 'Behold, water and salt to be a covenant of peace between us.'

"The Great Indulca differs from the former only in being prolonged for forty-five nights; the patient is required to dress in rich white garments, and the room, in addition to the aforesaid cleaning, well decorated and well lit with many wax candles; and beside the aforesaid ingredients there must be various savoury dishes, fruits, and spices."

(To be continued.)

THE "ELVES."

BY MRS. G. R. COLBORN.

In learning to count with those figures we call Arabic numerals, I used to wonder why 11 and 12 were not called one-teen and two-teen like thirteen and fourteen and the rest of the teens. But now I think I know.

I think these names are old Phœnician deposits inherent in the language, left over from the time when those island-dwellers off the coast of Syria sailed out past Gibraltar to the "Tin Islands," whose whereabouts they kept secret from the rest of the world, working the mines themselves with their own colonists, many of whom must have lived and married and died there, leaving behind them an inheritance of dark hair and dark eyes and those throaty *gh's* and *ch's* so like the Arabic *ghr's* and *kh's;* for Arabic is the nearest living relation to the Ancient Phœnician.

Before the Arabs had the figures which we call "Arabic numerals," but which they call "Addad Hindi," because they got them from India, they counted by the letters of their alphabet in its numerical order, which they say they got from *Suriya*. And that means, of course, that they got them from those same "Phœnicians," as we call them (though they had another name for themselves), who, in their wonderful commercial and colonising enterprises, sailed to the ends of the earth with their merchandise and their method of keeping accounts by the letters of the Alphabet.

The first letter was one, its shape a single upright stroke and its name *alif*. Unlike the Roman numerals, two such strokes did not mean two, for the second letter of the Alphabet—B—was two. Then, as now, twin *alifs* meant ten and one. The word *tenwin* in Arabic means double, and *ain* or *en* is the Arabic suffix of duality. From *tenwin*, comes the word ten, the first number to occupy a second place. From *tenwin*, also, we get our words twain, and twin, and two. So Alif-twain (11) became alif-ain. And because in transliterating *alif* is either *a* or *e*, and because the plural of *f* in English is *v* we get eleven (11), and two and *alif* equals twelve (12).

What do you think of it? Fanciful? Yes, of course, it is only a fairy-tale, but, indeed, I saw those little elves myself. Nowadays we would say little ones instead of little elves, but the meaning is the same, isn't it? And from elf we get self, and selfish—but I'll tell you about that next time— if there is any next time—and about how we got our word father from that same first letter of the Alphabet.

NOTES AND NEWS.

The European Crisis.

The events of the past week have shown very clearly that the present policy, or, rather, lack of policy, of the Allied statesmen can only result in the development of impossible economic conditions in Europe. The crash of the mark has been the red light for the world. It was inevitable that the failure of the London Conference should have a considerable effect on the mark, but no one imagined that it would depreciate until at one time last week it stood at about 11,000 for sterling. When an exchange gets to that level a thousand more or less matters little. For business purposes 9,000 is no better than 11,000, for both make commerce impossible. In the last few days the depreciation has come to an end, and we have seen the mark go back to 6,900, at which it stands at the time of writing. The reasons for this improvement are rather obscure. Possibly the main cause is to be found in the belief that, in view of the situation, other and more sane measures will be taken over the Reparations question.

An End to Drifting.

It cannot be too strongly emphasised that some way out of the impasse must be found by the Allies. To allow matters to drift as they have been doing will simply be to court disaster. It is nothing more or less than the destiny of Europe that is at stake. Provided the Allies allow reason to guide their councils it should not be difficult to find a solution at once equitable and satisfactory to all parties. No one could suggest for a moment that Germany should be released from paying her just debt for the terrible damage she has caused, but it is now clear that France's demand that Germany should maintain her Reparation payments as they fall due is impossible without bringing about chaotic conditions. If the mark has been driven to its present level as a result of the prospect of Germany being forced to pay the present instalment of the Reparations payment, it is perfectly obvious that the hope of the instalments being continued can be only of the scantiest nature. Before the next occasion the mark would definitely have "gone west." That Germany is in a position to meet her obligations, given time in which to do so, admits of no doubt, and it would seem, therefore, that the position would best be met by the agreement of the Allies to accord Germany a brief moratorium. I imagine that this will be the outcome, for feeling in France has very evidently changed since the breakdown of the Conference.

The Roumanian Debt Scheme.

The terms of the Roumanian Government's conversion scheme are now available and, it will be seen, follow the anticipated lines. A Consolidation Loan of a nominal amount of £35,000,000, or 175,000,000 dollars, in sterling or dollar bearer bonds bearing 4 per cent. interest, and dating from October 1 next, has been created, and the bonds are now offered to holders of Roumanian Treasury Bills. The exchange rates for conversion into the sterling bonds are as follows: French francs at 50, Belgian francs at 53, Italian lire at 88, pesetas at 25.50, Swedish crowns at 16.50, and Portuguese escudos at 60. The dollar bonds are offered to holders of Treasury Bills in the United States or Canada at par. The bonds of both categories and the coupons attached will be payable in London by the British Overseas Bank, and amortisation will be effected by purchases in the market below par, and by half-yearly drawings at par commencing on April 1, 1928, the amortisation fund being calculated to redeem the whole of the bonds not later than April 1, 1968. The loan is a direct obligation of the Roumanian Government, and, subject to a prior charge given to the Roumanian 4 per cent. External Loan of 1922, the issue of which is pending, is a special charge, *pari passu*, with present and future Roumanian funded external loans, against the proceeds of the export taxes, which are payable in foreign currencies or gold, and are estimated to produce not less than £4,000,000 per annum.

London Committee's Views.

A committee has been formed in London representing various classes of holders of the Treasury Bills. The members are Mr. D. O. Evans (Mond-Nickel Company); Lieut.-Col. C. H. Gurney, D.S.O. (Matthews, Wrightson, and Co., Ltd.); Sir Ernest Maes Harvey, K.B.E. (Allen, Harvey, and Ross); Mr. G. M. Mavrogordato (P. P. Rodocanachi and Co.); and Mr. C. S. Clifton (H.B.M. Vice-Consul in Roumania, who is at present in England), while the secretary is Mr. F. Crane, 9, George Yard, Lombard Street. In another column will be found a statement issued by the chairman of the committee, Sir E. Maes Harvey, in which the committee explain their reasons for cordially recommending the acceptance of the offer. The statement begins with a reference to the disastrous collapse of the Roumanian exchange as a result of post-war difficulties and in part of the bad harvest of 1921, and it is pointed out that on the first signs of returning prosperity the Roumanian Government has faced the problem of repayment. It is further emphasised that it should be remembered that the conditions under which the bills and bonds were issued were exceptional, and the view is expressed that in making this offer the Roumanian Government have gone quite as far as could reasonably be expected. The scheme is welcomed as the first step taken since the war in Eastern Europe towards the restoration of pre-war trading conditions.

Lack of Enterprise.

I was asked the other day for the names of the hotels in one of the best-known Near Eastern resorts, and the question set me wondering at the lack of enterprise on the part of hotel companies in the Near East. Only a very few of them deign to announce their existence in the British Press, and one can only assume that this attitude is due to the belief that all intending travellers go to the tourist agencies. It is true that the majority of them do, but there are also quite a large number who prefer to follow their own caprice in the matter. This class the hotel companies as a whole seem inclined to leave to its own devices, while they seem to overlook the fact that, as regards those who consult the agencies, the choice of hotels could be considerably influenced by advertisement.

The Furness Withy Report.

In view of the adverse conditions experienced by shipping companies, it is only to be expected that the returns for 1921 should make an unfavourable showing. The report of Messrs. Furness, Withy and Co. show profits which are down by almost £100,000, but these figures do not show the actual effects of the shipping depression, for the directors state that only a small part of the profits are derived from the earnings of the steamers. "They mainly arise from other branches of the company's business, and from dividends on investments," which, it may be added, amount to £8,617,000. As the proposed bonus of 5 per cent. free of tax on the ordinary shares will make the distribution 10 per cent. as before, shareholders have little reason to be dissatisfied.

African and Eastern Trade.

The commercial depression has been particularly felt in regard to West African trade, and this is reflected in the report of the African and Eastern Trade Corporation for the year ended December 31 last, which shows the very heavy loss of £1,794,796, as compared with a profit for 1920 of £854,499. The loss has been met by adding to the amount brought forward £1,750,000 from the general reserve, leaving £41,000 to be carried forward. Allowing for this reduction, the general reserve stands at £3,729,500. The final adjustment in respect of the excess profits duty has not yet been made, but a very large sum, it is expected, will accrue to the company from this source, and this will come into the accounts of the current year. Shareholders will doubtless find cause for satisfaction in the directors' statement that the trade position appears to be gradually improving, and that the corporation is in a position to take advantage of any improvements. ROUMANIAN DEBT CONVERSION.

The Bondholders and the Scheme.

Sir E. Maes Harvey, chairman of the Committee of Roumanian Government Bondholders, has issued the following statement in regard to the Roumanian debt consolidation scheme:—

"Having considered with great care the offer made by his Excellency the Roumanian Finance Minister to the holders of Roumanian Treasury bills and bonds, the undersigned begs to submit the following comments:—

"In view of the disastrous collapse of the Roumanian exchange since the period at which these bills and bonds were issued, due in part to the general difficulties of after-war finance and reconstruction, from which Roumania has suffered even more than most countries in Eastern Europe, and in part to the unfortunate harvest of 1921, it has been clear to holders for some time that such securities would not and could not be met at their due date. On the first signs of returning prosperity, however, the Government of Roumania has faced the problem of repayment, and in order to rehabilitate its position on the world market has made an offer, which at a time when the exchange stands at a rate of between 400 and 500 to the £, instead of at a parity of 25.22, must be considered fair and satisfactory having regard to all the circumstances.

"It should be remembered that the conditions under which these bills and bonds were issued were exceptional. At that time Roumania was suffering from the effects of a systematic and complete devastation, when the requirements of the bare necessities of life were so urgent that no Government could possibly ignore them. Supplies had to be obtained at whatever price was asked, and unfortunately in many cases the fullest advantage of this difficulty was taken by foreign merchants. In making their present offer the Government of Roumania has gone quite as far as could reasonably be expected from them, and by this step has shown its most urgent desire to renew economic relations with Western Europe by giving evidence both of good will and good faith.

"As you will have observed, it is proposed that the bonds issued in exchange for Treasury bills should be redeemed before 1968 by means of a sinking fund, and should bear interest at the rate of 4 per cent. per annum. The security allocated to the interest and sinking fund as estimated in the notice to bill holders appears ample, and it will be observed that if at any time the export taxes fail to provide the necessary foreign currency, the service of the external debt becomes a charge on the revenues of the State, the 4 per cent. External Loan of 1922 authorised for an amount of £2,500,000 alone having priority. The sinking fund, when this comes into operation, will certainly prove an important feature in maintaining the market value of the issue.

"The proposal is to be welcomed as the first step taken, since the war, in Eastern Europe towards the restoration of pre-war trading conditions, but apart from this the Committee urge bill holders in their own interests to accept the terms of conversion now offered.

"It will be observed that the security allocated to the external debt is inscribed in the project of law, and therefore becomes the strictest obligation which any constitutional State can place upon itself, as the stipulations now agreed upon must of necessity form an integral part of every future Budget.

"Under these circumstances we cordially recommend the acceptance by bill holders of the present proposal which is open until November 24, 1922."

The traffic receipts of the Suez Canal from August 5 to 11 amounted to 3,090,000 francs, against 2,240,000 francs for the corresponding period of last year.

Merchants and other trade classes in Ispahan recently agreed to wear clothes made only of Persian cloth, says an American Consular report, because of the large excess that Persian imports show over exports.

In 1921 the first place in Bulgarian import and export trade was taken by Italy. Her exports to Bulgaria were valued at 625 million Bulgarian leva, and her imports from that country at 284 million Bulgarian leva. Textiles formed about 50 per cent. of the Bulgarian imports.

Digitized by Google

British Consular Reports.

X.—CZECHO-SLOVAKIA.

(Concluded.)

Textiles.

Linen.—In many respects the linen industry was in a far more unfavourable position this year than a year ago owing to the enormous difference between the prices of cotton and linen goods, purchasers showing a preference for the relatively much cheaper cotton goods. Flax and flax yarns, which hitherto had been under State control, were de-controlled in autumn, 1921. The result was an immediate rise of 200 per cent. to 300 per cent. in the price of flax, which naturally did not lead to an improvement of the market. Owing to the excessive heat of last summer the present flax harvest is not only bad as far as quantity is concerned, but the quality also is very inferior. In order, therefore, to keep their mills going spinners have been obliged to cover their wants of raw material from abroad.

Wool.—The year 1921 showed a marked improvement in the Czecho-Slovak wool industry. Not only did home consumption increase, but manufacturers were able to regain markets which had temporarily been captured by Italy, Germany, and the United Kingdom. It is, however, feared that the recent rise of the Czech crown will cause a set-back in business as far as the Succession States are concerned. The spinning mills were working at full capacity, whilst the weaving mills at the beginning of the year were only working at 40 per cent. to 50 per cent. of their capacity. Business, however, gradually expanded as the year proceeded, but a marked falling off was again apparent towards the close of the year.

Silk.—During the period under review, work in some of the mills increased from 60 per cent. to 70 per cent. of their pre-war capacity, but, on the whole, the mills were working at only 30 per cent. of their pre-war output.

Coal.

The coal industry of Czecho-Slovakia is now passing through one of the most serious phases that it has had to face since the foundation of the republic. High costs of production, the difficulty of disposing of its stocks profitably, the fall of the German mark and the Austrian crown are all having a disastrous effect on the coal industry. Up to the beginning of 1921 the situation in the coal industry was more or less normal, but at the end of the first half-year a change for the worse set in. The mines to feel this change first were the so-called "war mines," *i.e.*, small mines, producing low-grade coal, which were opened up during the war owing to the coal shortage. Immediately the coal shortage had been overcome, and consumers were able to obtain good coal in sufficient quantities, these smaller mines found themselves unable to dispose of their stocks and were forced to close down. The mines in the Ostrau-Karvin district, too, have suffered from the crisis in the iron and steel industry, as may be seen from the following figures:—The production of coke in this district for 1921 amounted to 1,555,698 quintals and stocks in hand to 64,248 quintals, giving a total of 1,619,946 quintals for the year. On December 31, 1921, the stocks of coke on hand amounted to no less than 1,663,944 quintals. When it is remembered that in 1913 the Ostrau-Karvin district produced 2,089,183 quintals, all of which found ready buyers, the seriousness of the present position becomes obvious.

The situation in the lignite districts is very little better. For some time past the lignite mines have sold their coal at home at a loss, as the price fixed by the Government bore no relation to the cost of production. The losses, however, sustained from sales at home were more than covered by the profits made on deliveries to Germany, but the recent collapse of the German mark has now turned these gains into losses. The total production of coal in Czecho-Slovakia in 1921 amounted to 11,650,000 tons of hard coal and 21,050,000 tons of lignite, an increase over 1920 of, roughly, 500,000 tons and 1,350,000 tons respectively.

Transport.

Considerable work was done during the past year in the conversion of single tracks into double tracks. A second track, 65 km. long, was built between Lundenberg and Bratislava, considerably improving the railway traffic between Prague and the capital of Slovakia. Work has also been started on the construction of a second track on the following lines:—Zdice-Pilsen (50km.), Prerov-Olomouc (20km.), Kralupy-Lovosice (50 km.), and Litomerice-Strekov (50 km.). In spite of the high prices of rails, the Railway Administration has, during 1921, relaid 194 km. of defective rails, or 2.5 per cent. of the total length of State railway lines. The expenditure on the construction of new railway lines in 1921 amounted to 28,000,000 kronen, and a sum of 290,000,000 kronen was set aside for the reconstruction of existing lines and railway buildings. According to a provisional statement of the Ministry of Railways, the total expenditure involved by the maintenance of all railway lines and buildings under State management in 1921 amounted to K.784,100,000, of which K.170,000,000 was expended on private railways.

The shortage of rolling stock has now been considerably lessened by the acquisition of new locomotives and trucks, the majority of which were supplied by the Czech engineering industry. But the present industrial stagnation has had the effect of considerably reducing railway transport and the amount of freight carried.

XI.—GREECE.

The following extracts are taken from the report of Mr. E. C. D. Rawlins, Commercial Secretary to H.M. Legation, Athens, on the industrial and economic situation in Greece for the year ended April, 1922:—

Foreign Competition.

To-day it is evident that countries with depreciated exchanges are able to do better trade with Greece, and for this reason Italy is going ahead while Czecho-Slovakia has appeared as a serious exporter to Greece, and Germany is making remarkable efforts to recover her pre-war position. It is a most interesting fact that, whereas German trade with Greece in 1920 was insignificant, it has in 1921 surpassed the pre-war 1914 total, i.e., some twenty-seven million drachmas. The actual figures for 1921 are not yet available, but as far as can be ascertained the imports from Germany (which are monthly on the increase) will represent close on Drs.55,000,000.

The percentages of imports from foreign countries during the first eight months of 1921 are as follows: United Kingdom, 15.3; Egypt, 3.5; United States, 24.1; Italy, 9.4; France, 8.3; Germany, 5.1; Belgium, 3.1. To-day Greece imports large quantities of grain and flour from Canada, because the Roumanian and Russian markets are closed.

Owing to the disadvantageous rate of exchange on London, British goods are at present meeting with very severe competition, especially in the undermentioned lines:—

Hardware.—Steel plates, angles, joists, etc., are arriving principally from Antwerp and Germany, these countries being in a position to deliver at prices with which British houses cannot compete. Small hardware, such as tools, locks, enamelled goods, etc., are arriving in great quantities from Germany and Czecho-Slovakia.

Glassware.—Czecho-Slovakia is again to the fore in this market, and is exporting considerable quantities of low-class fancy glass goods to Greece, at very low prices.

Herrings.—Dutch exporters have made a determined effort to get into this market, and some 6,000 barrels have arrived in Greece during the past season. This article was formerly a British monopoly, and although the British exports of about 55,000 barrels still compare very favourably, the fact remains that the British monopoly of this article is being seriously challenged. Lack of experience in the curing of the fish for the Greek markets has prevented the Dutch fish from meeting with any degree of success, although this fish has been invoiced at prices considerably cheaper than the British fish.

Motor Cars.—New cars which have arrived during the past year have been for the most part of German manufacture, and there are very few British cars to be seen. The popular car at present is the Mercedes which, by virtue of the low German exchange, can be supplied at prices with which British firms cannot compete.

Pharmaceutical Products.—The Germans have practically re-established their pre-war ascendancy in these articles, and German specialities are again to be found in all the shops. The Germans are also doing considerable trade in heavy chemicals, and considerable quantities of copper sulphate, etc., have been imported from Germany.

Sodas.—Sodas were formerly practically a British monopoly, but to-day large quantities are imported from Antwerp. The quality supplied is said to be good, and the price much cheaper than that of the British article.

Crude Oil and Gas Engines.—A great many engines have been imported from Germany during 1921. A 20-b.h.p. engine which from Great Britain costs about Drs.40,000 can be supplied from Germany at Drs.17,000 or 18,000. Recognised British makes of engines are, however, preferred owing to their reliability, but in view of the disproportionate price, Greek factory owners are strongly tempted to equip their works with German engines, and to risk results.

Textiles.—There has been a decided slump in the textile trade owing to the causes already referred to. Consumption has been considerably reduced because of the present high prices which are due to the high value of sterling exchange. There are said to be considerable stocks still in the country, sufficient for several months' requirements.

The textile trade is still practically a British market: some American goods were shipped early in the year, but

were unable to compete successfully owing to the appreciation of the dollar. Czecho-Slovakia is offering worsteds, notably trouserings, vicunas and face-cloths, at prices which are somewhat cheaper than the British, and the Brünn manufacturers have made considerable efforts to enter this market. They are, however, at a disadvantage owing to the fact that Czecho-Slovakian imports are assessed under the "General" Customs tariff, and consequently pay about 50 per cent. higher duty than British goods, which are assessed under the Conventional tariff. Undoubtedly, later on, Czecho-Slovakian goods will be brought under the same conventional classification, in which case British goods will meet with considerable competition, particularly from Brünn manufacturers.

As regards Manchester goods, the market is still particularly slack at the present time, but stocks are becoming depleted and a revival may be looked for as soon as the exchange becomes more stable.

German firms are offering and supplying hosiery and gloves at prices with which British and French firms cannot compete, British and French hose being quite out of the market owing to the high prices. Italians and Austrians are doing all the business that is being done in the hat trade, high prices putting British goods out of the market in this case also.

Cereals.

The crops in Thessaly, the most important wheat producing district in Old Greece, were scanty and of poor quality in 1921, wheat producing a crop estimated at 44 million okes as compared with 80 million okes in 1920; the barley crop amounting to 12½ million okes in 1921 compared with 20 million okes in 1920, and oats 7 million okes in 1921 as compared with 12 million okes in 1920. The quality of the oats was good, but that of the wheat and barley very inferior.

The experiment was made of sowing Manitoba wheat late in 1920 after the great losses occasioned by the floods in Thessaly, and this proved so successful that the Ministry of Agriculture undertook the supply of 1,250 tons of this wheat for sowing purposes, and it is hoped that the results obtained from the later sowing in March, 1922, will largely counterbalance the losses owing to winter floods in December of 1921. The outlook for 1922 is not encouraging because of the heavy rains during the last month of 1921 and in the early part of 1922, which were bad for crops and vines generally, and the early sowings are said to be suffering from "rot."

Olive Oil.

The average yearly production of olive oil in Old Greece is about 73,000,000 okes. Taking into consideration that about 50 million okes a year are required for home consumption it will be readily seen that about 20 million okes a year are available for export, provided that export permit has been granted by the Government. America and Italy are the chief consumers of Greek olive oil, the best quality of which is equal, if not superior, to the "superfine" oils of Nice and Lucca. Low quality is used only for industrial purposes, such as soap-making, etc.

The Ministries of Agriculture and National Economy are making efforts to place the Greek olive oil industry on a higher level by the substitution of modern appliances, equipped with crushers (mills) and presses of larger mechanical output, for the old-fashioned oil presses now generally in use, and by taking measures to destroy the olive pest—the "dacus" fly. A vigorous campaign has been pursued against this pest since last year, and it is stated that a saving of nearly 40 million drachmas has been achieved during that period by this means. The "Mediterranean fly" is being fought by the spraying of trees with sulphate of copper and lime.

Tobacco.

Egypt now yields place to Germany as the principal importer of Thessalian tobacco, which in the former country can no longer successfully compete with the cheaper Far Eastern varieties, equally suited to the native taste. In spite of this general tendency, the unsold stocks in the Alexandria Customs have lately been reduced, it is said, by three-fourths (owners preferring to clear even at a loss), and prospects for further trade are distinctly better than in the earlier part of the year under review.

Exports amount, roughly, to five million okes, valued at Drs.26 million (an average of Drs.5.20 per oke), as compared with seven million okes valued at Drs.78 million (an average of Drs.11.15 per oke) for 1920.

The 1921 crop produced something over three milion okes, the smallness of which amount (half that of last year) is really a blessing in disguise and will obviate a further glut on the market. The quality was good, and the value, reckoning the average price as Drs.6.00 per oke, amounts to about Drs.18 millions. By far the greater part (about 2¼ million okes) has already been sold for export to cigarette manufacturers in Germany. A large proportion of the remainder has been bought up by manufacturers in Athens and in Salonika, while it is estimated that less than ten per cent. of the whole now remains in the hands of the growers.

Of the 1920 and 1919 crops, there remains in the hands of Thessalian merchants nearly three million okes, most of which has been sold to German cigarette makers, to whom it will be exported during 1922. The growers in the interior still retain about 100,000 okes.

Industry.

Greek industrial enterprise is small compared with that of Western Europe, but her industries are none the less important. Greek products are spread beyond her frontiers and her ploughs, soaps, chemical manures, hats, wines, cement and other articles are to be found in other countries of the Levant.

There is an assured consumption of Greek agricultural products in Greece itself, where there are some six million consumers. As will be seen from the figures of imports, over half, and in some cases three-quarters, of the goods exported from Greece are raw materials, of which Greece possesses considerable wealth. Rich beds of lignite exist in the country, the proper development of which would help to solve the problem of the fuel supply of the country and infuse life into her industries.

Hydraulic power is a latent source of energy for development of new industries, and new types of water-wheels have recently been installed for industrial purposes. According to estimates made by the Office for Study of Hydraulic Enterprises for their 1920 report, 365,000 h.p. could be relied upon in Central Macedonia and the mainland of Greece, but so far no definite steps have been taken in this direction.

With regard to the supply of raw materials required for each industry, Greece has a good reserve of these, such as iron, manganese, chrome, nickel, lead, zinc, silver, antimony, copper, emery beds, magnesite, chalk, talc, barytis, sulphur, marble, granite, pozzolana, pumice stone, and asbestos. Silk, wool, and hides are also produced, as well as cereals, figs, grapes, tobacco, tanning materials, olives, and many types of vegetables. Capital for the maintenance of factories and construction of new ones could, no doubt, easily be found, as is evident from the balance-sheets published by the Greek banks, were the possessors of such capital willing to put it to such uses.

Piræus is the most important district of the textile industry, and there are 13 cotton spinning mills, one wool spinning, one silk spinning, and one hemp spinning mill. The island of Syra is also an important industrial centre, and contains 13 weaving and spinning factories, 12 tanneries, ten Turkish delight factories, and various others amounting in all to 64. The dockyard at Syra undertakes all repairs to engines, boilers and hulls; also the construction of small tugs, including engines, boilers and other accessories. The marine dockway is 250 ft. in length and can accommodate ships up to 2,000 tons; during 1921 twenty ships were dry-docked, two of this number being British.

In spite of her rich mineral resources Greece has, as yet, made very little progress in the mining industry. The two mining concerns at Laurium consist of the smelting of lead and zinc ores, and the mining of manganese. Their output has of late been restricted owing to conditions arising from the war. The value of lead and arsenic acid produced annually averages Drs.4,000,000.

According to official information the number of engineering works and workshops is 132, and there are nine foundries and three shipbuilding yards. They are principally engaged in repairing machinery and spare parts, and in the manufacture of machinery on a smaller scale. They have, however, during the last few years turned out pumps, presses, agricultural machinery and other articles. The annual value of the products of the engineering industry in Greece, together with repair shops, is said to amount to about Drs.28,000,000.

These industries are well supplied with raw materials, which are produced in the country. There are two cement factories and some 80 lime kilns, sun-dried brick works, tile works, slate factories and manufactories of asbestos compound for flooring. The development of the cement industry during the last few years has been steadily increasing and Greek cement is now well known in the interior of the country, and is also exported, the figures for export for the five months January to May, 1921, being 1,300,381 kilos.

The cigarette-making industry has increased considerably of late years—to-day there are over 100 cigarette-making machines in the country which produce from 100,000 to 150,000 cigarettes annually. The yearly production of tobacco is from 25 to 30 million kilos, of which about five million kilos are used locally and the remainder is exported.

According to the *Moniteur du Petrole Roumain*, Roumania's oil output in the first half of 1922 was 663,385 tons, against 550,463 tons in the first half of 1921.

It is reported that certain American companies selling oil products in Greece may cease shipments to that country unless the Greek Government will free the drachma proceeds of sales so that these proceeds can be converted into dollars.

Shipping Intelligence.

DEVELOPMENT OF GREEK PORTS.

Mr. E. C. D. Rawlins, Commercial Secretary to H.M. Legation, Athens, dealing with public works in his report on Greece, says that 1921 was spent mostly in project work, and several large schemes have been thoroughly studied and discussed, and are now ready for construction, but definite steps are delayed owing to the financial difficulties of the Government. He continues:—

The question of the reconstruction of the port of Piræus, which is of vital importance to the country at large, has of late been forcing itself on the attention of the Government. It is evident that one of the three British firms, which had participated in the Piræus adjudication, would have already been entrusted with its construction had it not been for the financial difficulties of the Greek exchequer arising out of the war that is still going on in Asia Minor. The question, however, is ripe, and it is thought that the Government may decide shortly on the construction of a portion of these works.

Patras.

The Harbour Commission is anxious to undertake improvements, and negotiations have taken place for deepening the harbour, lengthening the N.E. breakwater, building quays and storage depots, etc. In July, 1921, a tender was received from a British firm for such construction, the cost of which was estimated at some 18 million drs., comprising ten million for the building of breakwaters and quays, canalisation for pipes and electric wires, macadamisation and asphalting of the harbour area, erection of stores, cranage and laying of railway and crane lines, and an additional eight million drs. for the building of a new main sewer for the town, to discharge outside the harbour. The Commission, however, are reluctant to undertake the scheme, considering the expenditure proposed too great for the works outlined, and fearing that the revenue would not be sufficiently increased to justify the outlay; they desire a standardisation of harbour dues in Greece, claiming that other harbours with no heavy sum to redeem may in the future prove a serious competitor to Patras. The plans for the draining of the river Glafkos and the production therefrom of electric power are ready, and a Bill has been presented to the Greek Chamber permitting the municipality of Patras to exploit this river for the benefit of the town.

Crete.

The most important event of the year in the Department of Public Works was the signing of the contract between a British firm and the Port Commission of Candia for the construction of the Candia Harbour Works. The cost of these works is estimated at 28,500,000 drs., and negotiations for a loan for this amount are still going on between the Candia Port Commission and the National Bank of Greece. As guarantee for this loan the Port Commission propose to allocate the port revenues, which now amount to approximately two million drs. annually—a sum which should be more than ample to meet the interest and sinking fund on the loan. This being the first important contract that has been given for many years for the construction of a harbour in Greece, it is only natural that much interest was exhibited. It is generally believed that the successful execution of these works will give a great impetus to the construction by British firms of harbour and other public works in Greece.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis:—

Anchor Line.—S.s. Massilia for Bombay (Liverpool, September 4); s.s. Elysia for Bombay (Liverpool, September 18).

Anchor Brocklebank Line.—S.s. Media for Calcutta (Birkenhead, August 31); s.s. Mandasor for Calcutta (Birkenhead, September 16); s.s. Mahsud for Port Said, Colombo, Madras, and Calcutta (London, September 16); s.s. Mathura for Calcutta (Birkenhead, September 27); s.s. Macharda for Calcutta (Birkenhead, October 7); s.s. Makalla for Port Said, Colombo, Madras, and Calcutta (London, October 10); s.s. Holywell for Port Said, Colombo, Madras, and Calcutta (London, October 21).

British India Line.—S.s. Margha for Bombay and Karachi (London, September 8); s.s. Madura for Colombo, Madras, and Calcutta (London, September 15); s.s. Malda for Bombay and Karachi (London, September 22); s.s. Mashobra for Colombo, Madras, and Calcutta (London, September 29); s.s. Nevasa for Bombay and Karachi (London, October 6).

Cunard Line.—S.s. Phrygia for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Swansea, September 5); s.s. Cypria for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, Novorossisk, Poti, and Batoum (Swansea, September 21).

Ellerman Line.—S.s. Gerano for Gibraltar, Patras, Piræus, Syro, Volo, Salonika, Constantinople, Bourgas, and Varna (Liverpool, September 2); s.s. Malatian for Gibraltar, Malta, and Alexandria (Liverpool, September 2); s.s. Gulf of Suez for Genoa, Leghorn, Naples, Palermo, Messina, etc. (Liverpool, September 14).

Ellerman "City" Line.—S.s. City of Poona for Calcutta (Birkenhead, September 5); s.s. City of Brisbane for Calcutta (Birkenhead, September 16); s.s. City of Genoa for Bombay and Karachi (Birkenhead, September 22); s.s. City of Nagpur for Calcutta (Birkenhead, October 6).

Ellerman's Westcott and Laurance Line.—S.s. City of Alexandria for Gibraltar, Malta, and Alexandria (London, September 9); s.s. Borodino for Malta, Piræus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz, and Braila (London, September 9); s.s. Tasso (new steamer) for Gibraltar, Malta, and Alexandria (London, September 20); s.s. Eden Hall for Malta, Piræus, Salonika, Smyrna, Constantinople, Galatz, and Braila (London, September 23); s.s. Mardinian for Gibraltar, Malta, and Alexandria (London, October 11).

Holt Line.—S.s. Philoctetes for Port Said, Port Swettenham, Singapore, etc. (Glasgow, September 7); s.s. Demodocus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, September 7); s.s. Teucer for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, September 7); s.s. Achilles for Port Said, Port Swettenham, Singapore, etc. (Swansea, September 14); s.s. Agapenor for Port Said, Port Swettenham, Singapore, etc. (Swansea, September 28).

Johnston Line.—S.s. Willowmore for Galatz and Braila only (Liverpool, September 7).

Moss Line.—S.s. Siptah for Gibraltar, Malta, Syra, Piræus, Smyrna, Salonika, Constantinople, Bourgas, Varna, and Constantza (Liverpool, September 9).

Papayanni Line.—S.s. Assyrian for Algiers, Malta, Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, September 16).

P. and O. Line.—S.s. Caledonia for Bombay (London, September 1); s.s. Perim for Colombo, Madras, and Calcutta (London, September 9); s.s. Delta for Bombay (London, September 9); s.s. Kashmir for Bombay (London, September 22); s.s. China for Bombay (London, September 29); s.s. Magoya for Colombo, Madras, and Calcutta (London, October 6).

Prince Line.—S.s. Soldier Prince for Tunis, Malta, Alexandria, and Syria (Manchester, September 5); s.s. Scottish Prince for Tunis, Malta, Alexandria, and Syria (Manchester, September 16); s.s. Black Prince for Tunis, Malta, and Alexandria (Manchester, September 30); s.s. Stuart Prince for Malta, Alexandria, and Syrian Coast (London, September 30).

Engineering Topics.

Roller Bearings.

The proposed introduction of large roller bearings for railway wagons and coaches is not so simple or so novel a proposal as many seem to think. The lay Press in particular have expressed great surprise that engineers have not thought of adopting such a device earlier, but as a matter of fact the suggestion of Sir Henry Thornton was anticipated many years ago, and a number of more or less exhaustive experiments were carried out, the results of which were hardly encouraging. In Sweden an actual experiment under working conditions is being carried out, a railway there having decided to fit 170 passenger coaches with axle-boxes carrying roller bearings. This is by no means to say that the railway in question has become convinced as a result of practical tests that roller bearings will prove satisfactory; it merely means that the experimental department of one of the Swedish bearing manufacturing concerns has succeeded in persuading the railway company to give its latest introduction a working trial.

Some Early Experiments.

The first experiments in connection with roller bearings for railway work date back about seventy years, when some attempt was made to line ordinary axle boxes with short lengths of round rod iron or mild steel. There was no attempt at machining or grinding the rods; they were left black, and it is not to be wondered at that the results obtained were not as good as those obtained with the ordinary solid bearing.

Later, the Eastern Counties Railway experimented with a train fitted with bearings lined with brass rollers, allowing it to run free from the top of the rise at Brentwood in order to see how far it would be carried by gravity. It was anticipated by the more sanguine that it might run as far as Romford, but as a matter of fact it ran some miles further, as far as the old terminus at Shoreditch. Examination of the bearings after the run showed that the brass rollers had been unable to stand the strain; they were worn to flat surfaces, and ground into a practically solid mass. At that date no suitable alternative metal to brass was available, and the experiments were discontinued.

Experiments carried out later with steel rollers showed that the hammer action of the rail-joints, which sink as a train comes upon them and cause the wheel to hit the upstanding edge of the next rail, had a marked effect on the bearings, and it became evident that a good deal of research work in connection with materials and design would be necessary. An American University then carried out a series of tests with various anti-friction bearings of the roller and other types, fitted on goods wagons, and the results were such as showed the possibility of fitting bearings of the kind to passenger coaches. Ball bearings gave better results on the whole than rollers, so far as the elimination of friction is concerned, but they are not so resistant to wear and tear. It must be remembered when comparing different types of bearings for train use that with rollers the strain at any given fraction of a second is very great on whichever roller happens to be in the lowest position, and that practically it carries, though momentarily, the whole of the weight which, in a plain bearing, is carried by the entire bearing surface. Further, this weight comes on what is practically a hair line extending the length of the top and also of the bottom of the bearing. From this it will be evident that the problems still to be solved before the general adoption of roller bearings are many and difficult. At the same time, given high-grade hard carbon steel, with a percentage of chromium, the steel being made from the highest grade of Swedish iron for the rollers, with an equally high grade of steel for the housings, good results should certainly be obtained after research into design has gone further.

Important Hydro Electric Orders.

It is satisfactory to learn that the enterprise displayed by one of the leading British engineering companies in undertaking a new industry is receiving its reward. The demand for large-sized water turbines of purely British manufacture induced Messrs. Vickers to turn their attention to this branch of engineering production, which, as is well known, owes its development largely to Switzerland, where the Alpine snows form a high level storage giving an almost unfailing supply of water throughout the year. Arrangements were accordingly made by Messrs. Vickers with one of the leading Swiss hydraulic companies to ensure that their designs should embody the accumulated experience, extending over many years, of the best practice in water power installations. The actual manufacture is carried on at the company's well-known works at Barrow-in-Furness, the workmanship being of the high class which is associated with Admiralty standard.

Recently the New Zealand Government placed with Messrs. Vickers orders for two Pelton turbines, which are now being erected, and followed this up by entrusting them with the manufacture of the two Francis turbines, each of 3,100 h.p., destined to be placed at the Hora Hora Power Station on the Waikato River. These machines, operating under a 27 ft. head, are of considerable size, and will give immediate employment to British labour at a time when it is badly needed. The highly efficient technical organisation which Messrs. Vickers have instituted to deal with all hydro-electric matters includes experienced hydraulic engineers, working in close collaboration with the electrical engineering staff of the Metropolitan-Vickers Electrical Co., Ltd., which firm recently obtained all the orders for the 6,000 k.v.a. generators and the 100,000 volt switchgear for the Mangahao hydro-electric power station in New Zealand.

A Valveless Pump.

A new type of valveless pump in which the inlet and exhaust ports are closed and opened as required by the partial revolution of the plunger has recently been perfected, and should be of great commercial value as well as of engineering interest. Within the body of the pump are two fixed pistons placed one at either end and facing each other. The space between these constitutes the working chamber for the reception of the plunger, which is reciprocated by means of a connecting rod and crank, working on to a rod running through a tubular passage, in which it is a working fit, in the upper piston. As this plunger works up and down its ends enter annular recesses and a series of ports are uncovered and covered alternately. The pump gives a constant discharge at its forward end and a constant suction at its suction end. It is rather too technical to describe in detail, but it certainly marks a further step in pump development.

In 1921 the production of steel in Czecho-Slovakia amounted to 917,662 metric tons, a decrease of 55,000 tons on the figures for the previous year.

The Palestine market has been overstocked by second-hand motor trucks sold at military auctions, says an American Consular Report. The prices are so low that purchasers are able to buy three old trucks and construct a new one from their parts for the price of a new truck.

Steaua Romana (British), Ltd., have received cable advice from the Steaua Romana Co., of Bucharest, that the production of their well No. 261, at Runcu, which has recently been deepened, increased about August 16 to forty tons a day, and on August 24 this well was producing 300 tons a day.

OAKEY'S WELLINGTON KNIFE POLISH

The Original Preparation for polishing Cutlery. Canisters, 1d., 2d., 3d., 6d., 1s., 2s. 6d. and 4s. each.

SILVERSMITH'S SOAP, for Cleaning and Polishing Silver, Electro Plate, etc. Tablets, 6d.

"WELLINGTON BLACK LEAD" in Solid Blocks, 1d., 2d. and 4d. 1s. Boxes.

Polishing Paste, Furniture Polish, Plate Powder.

Glass Paper, Emery Cloth, Black Lead Packers,

WELLINGTON MILLS, WESTMINSTER BRIDGE ROAD, LONDON, S.E.1.

Near East Markets.

LONDON PRODUCE REPORT.

Decline in Oils.

(*From Our Own Correspondent.*)

London, Monday Evening.

Sugar.—Home refined has been in good request at lower rates. Tate's cubes and mineral water sugar have both shed 1s. at 59s. and 51s. 9d. respectively. London granulated is 1s. down at 51s. 3d., while Lyle's granulated is 1s. 6d. lower at 51s. Foreign descriptions have been weak. West Indian crystallised shows a decline of 9d. at 44s. 6d., and White Mauritius is 1s. 4½d. down at 47s. 6d. Cane sugar quotations are: August 19s., and September 18s. 6d. White sugar quotations are: August, 23s.; September, 22s. 1½d.; October 21s. 10½d.; November, 21s. 7½d.; December, 21s. 9d.; and October-December, 21s. 9d.

Coffee.—The position remains the same. East Indian has been a steady feature at 112s., as also Costa Rica at 110s. Nairobi remains at 100s. The futures market is closed.

Desiccated Coconut.—The market has remained firm with little more business passing.

Rice.—The tone continues to be quiet, a steady demand being maintained.

Green Fruit.—The demand has declined during the week, probably owing to the increase in prices, which has been caused through the light arrivals during the past two weeks. The condition of the fruit continues to give entire satisfaction. The market for lemons is still improving, while prices have increased. Naples fruit have advanced in price. There is practically no demand for Valencia onions,

Oilseeds.—An uneven tone has been in evidence. Indian linseed has shed 1s. 3d. at 18s. 3d., while La Plata is 1s. 4½d. lower at 17s. 3d. Rapeseed is lower with Toria 3d. down at 18s. 3d. Cottonseed has been steady with the exception of Egyptian black, which has dropped 1s. at 10s. Sakellarides and Indian both remain unchanged at 9s. 10½d. and 8s. 9d. respectively.

Oils.—Prices are generally lower. Linseed oil at 36s., is 4s. 6d. down. Rape oil shows no change at 42s., and refined at 43s. Cotton oil has been unsteady with Egyptian crude 2s. 6d. down at 38s., and technical unaltered at 41s. The refined variety is 2s. 6d. weaker at 45s., and deodorised has shed 2s. at 51s.

Oil Cakes.—Quotations have remained firm in all cases. Cottonseed cake remains at 190s. ton, as also coconut cake at 210s. ton. Cotton meal cake and linseed cake are firm features at 300s. and 280s. ton respectively.

ROUMANIA'S WHEAT HARVEST.

The Estimated Surplus.

(*From Our Own Correspondent.*)

Bucharest, August 17.

Although the Government ensured wheat growers the minimum price of 25,000 lei per wagon (10 tons) plus a premium of 5,000 lei for wheat delivered for home consumption, some of them refused to submit, and are exacting from millers the price of 40,000 lei per wagon and even more. As such a procedure would in due course have brought about a rise in the price of bread, the authorities have now decided to commandeer the wheat of those farmers who refuse to submit to the established selling price and conditions, besides cancelling the 5,000 lei premium.

In order to prove that there is an ample stock of wheat of the new crop, the Ministry of Agriculture, having completed the statistics of this year's wheat crop, has circulated to all Prefects throughout the country the results, which show that the total yield of the wheat crop amounts to 2,404,616 tons, of which 1,770,000 tons are needed for home consumption for the year, taking as a basis of calculation 500 grammes per head per day, and 500,000 tons will be required for seed, leaving an available surplus of about 180,000 tons, which the State will use in the first place for the fulfilment of its old wheat contracts with France and Switzerland.

In view of the above, the Prefects have strict orders to take the necessary steps to see that the population should have no cause to complain of shortage of bread or of the price of wheat and bread having been increased.

YUGOSLAV SUGAR-BEET.

The Commercial Secretary to H.M. Legation at Belgrade reports that according to the local press the sugar-beet is in excellent condition and a good harvest is anticipated, estimated at 22,000 wagons (220,000 metric tons); and if more rain falls the yield will probably amount to 25,000 wagons (250,000 metric tons). The area of land under beet throughout the Serb-Croat-Slovene Kingdom this year is 30 per cent. greater than that of last year, and the roots, owing to the favourable weather conditions, are estimated to be 10 per cent. better in quality.

GOOD HARVEST IN THRACE.

A report received by the Imperial Ottoman Bank from Salonika states: The harvest in Thrace has been very abundant this year. It is estimated at about 250,000 tons of cereals, of which 130,000 tons will be required for local consumption and seed. The remainder will be available for the other parts of Greece. The results of the crops elsewhere are not known at present.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated August 21:—

Season. During the week ending August 20 conditions were unsettled in North Bay. In earlier part of the week, Bombay monsoon slightly revived, and in the latter part of the week it strengthened in Gangetic Plain and central parts of India. August 20: Monsoon active in greater part of the country.

Condition of Crops. August 18: In Bengal, weather conditions are favourable to crops except for some damage caused by floods. In West Punjab crops are expected to be good but rain is wanted to maintain these conditions. In other provinces prospects are unchanged.

Markets.—Cotton—August 17: Bombay cotton market firm. Fine M.G. Oomras Rs.437 September, Rs.415 December-January. Bombay cotton arrivals from September 1, 1921, to August 11, 1922, were 3,428,000 bales as compared with 2,804,000 bales during the same period of the last year. Piece-goods: Bombay imported piece-goods market continues quiet and wholesale demands are hardly visible, but retail enquiries are helpful. Advices from other Indian markets are weaker, particularly from Karachi, where large arrivals tend towards easier prices. In local goods, demand is not much improved, but there is more activity for fresh contracts. Jute—August 19: Calcutta jute and gunny markets are quiet. Hessians are firm but no business is done. Tea: At tea sale on August 15 market was firm and there was strong demand for all grades at increased prices. Leaf grades and medium brokens with tips were strongest and advanced half an anna. Orders were general from all markets, especially from Persian Gulf. 176,142 packages sold to date at an average price of 10 annas 9 pies per lb. Increase in July outturn 3¾ million pounds more than last year. Outturn to end of July 107½ million pounds against 90¾ million pounds to same date last year. Rice: Rangoon rice market was rather firmer. Quotations on August 17: Large mills Rs.440 August, Rs.431 September, Rs.422.8 two months. Small mills Rs.505. Boat Paddy Rs.203. Shellac: August 18: Market steady. T.N. Rs.155.

Bank Rate.—No change.

The traffic receipts of the Egyptian Delta Light Railways for the eleven days ended July 31 amounted to £E8,455, making the total for the year £E95,198. For the corresponding periods of 1921 the totals were £E10,157 and £E108,677.

The production of salt at the Yugoslavian State mines, near Tuzla, Bosnia, is estimated at 44,000 metric tons, a total which, it is believed, could be doubled with additional equipment.

According to a semi-official Greek telegram received in London, the Greek Finance Minister denies the rumour that the Government is contemplating a fresh issue of paper money.

CURRENT PRICES.

General Produce.—Bacon (Continental), 136s. per cwt.; (Canadian), 130s. cwt.; (American), 121s. 6d. cwt.; butter (Danish), 215s. cwt.; (Australian), 192s. cwt.; (New Zealand), 200s. cwt.; cheese (Canadian), 88s. cwt.; (New Zealand), 88s. cwt.; lard, 73s. cwt.; eggs (Danish), 16s. 6d. per 120; (Styrian), 11s. 9d. per 120; chillies, 130s. cwt.; cloves (Zanzibar), 1s. 3d. lb.; cocoa (Ceylon good to fine), 85s. cwt.; coffee (Costa Rica), 117s. 6d. cwt.; (East Indian), 115s. cwt.; (Central American), 96s. 6d. cwt.; (Jamaica), 72s. 6d. cwt.; (Mocha Longberry), 100s. cwt.; (Santos superior), 69s. cwt.; (Nairobi), 101s. cwt.; ginger (washed Cochin), 52s. 6d. cwt.; nutmegs (110's to 80's), 1s. lb.; pepper (Singapore black), 4d. lb.; (Muntok white), 7¼d. lb.; pimento, 2d. lb.; raisins (Cape), 45s. cwt.; currants (Vostizza), 57s. cwt.; currants (Amalias), 52s. cwt.; sultanas (Smyrna), 85s. cwt.; sugar (Tate's cubes), 60s. cwt.; (Lyle's granulated), 52s. 7½d. cwt.; (Mauritius crystals), 49s. 3d. cwt.; (West Indian crystallised), 46s. cwt.; (centrifugal), 19s. 4½d. cwt.; tapioca (fair Singapore), 2½d. lb.; rice (Rangoon No. 2), 15s. 4½d. cwt.; (bran Rangoon), £6 17s. 6d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 2s. lb.; tea (Indian, common to good common), 11d. lb.; (medium to good), 1s. 4d. lb.; (fine to finest), 2s. 6½d. lb.; Ceylon (common to good common), 11½d. lb.; (medium to good), 1s. 3½d. lb.; (fine to finest), 2s. 5d. lb.; Java (common to good common), 9d. lb.; wheat (English white), 53s. 9d. qr.; wheat (Australian), 54s. 9d. qr.; oats (English), 38s. qr.; oats (La Plata, ex-ship), 26s. 10½d. qr.; maize (La Plata), 41s. 9d. qr.; flour, 41s. 6d. sack.

Chemicals.—Acids: Boric, 61s. cwt.; oxalic, 7½d. lb.; citric, 2s. 3¼d. lb.; tartaric, 1s. 4½d. lb.; ammonia (sulphate), £15 11s. 6d. ton; arsenic (white powdered), £43 ton; benzole (standard), 2s. 5½d. gallon; bleaching powder (35 per cent.), £12 5s. ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 111s. cwt. Potassium: Bichromate, 6¼d. lb.; chlorate, 4½d. lb.; caustic, £31 ton; nitrate, £37 10s. ton; permanganate, 8½d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £14 15s. ton; Sodium: Crystals, 115s. ton; bi-carbonate, £10 15s. ton; bichromate, 5¼d. lb.; alkali (58 per cent.), £8 1s. 3d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £20 2s. 6d. ton; hyposulphite, £16 10s. ton; prussiate 11d. lb.; nitrate, £13 2s. 6d. ton; glycerine (crude, 80 per cent.), £60 ton; (industrial, 1,260 per cent.), £87 10s. ton; lemon oil, 2s. 10½d. lb.; quinine, 2s. 2d. oz.; red lead, £39 5s. ton; white lead, £41 15s. ton; white ground lead, £51 ton; sulphate of copper, £26 5s. ton; sulphate of iron, 60s. ton.

Metals.—Aluminium, £100 ton; antimony (English Regulus), £27 12s. 6d ton; bismuth, 9s. lb.; copper (standard), £63 18s. 9d. ton; copper (electro), £70 10s. ton; gold bars, 92s. oz.; iron (No. 3 Cleveland), 88s. ton; hematite (mixed number), 89s. 6d. ton; galvanised sheets (25 G), £16 ton; lead (soft foreign), £24 17s. 6d. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 32s. 6d. unit; nickel, £155 ton; platinum, 375s. oz.; graphite (80-90), £13 10s. ton; quicksilver, £11 13s. 9d. bottle; spelter (G.O.B.), £31 7s. 6d. ton; tin (standard), £161 13s. 9d. ton; wolfram, 14s. unit; zinc sheets, £37 15s. ton; tin plates (20 by 14), 19s. 1½d. box; silver bars, 34¾d. oz.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 9½d. lb.; 80 to 89 lb., 9½d. lb.; 70 to 79 lb., 9d. lb.; 60 to 69 lb., 8d. lb.; 59 lb. and under, 6¾d. lb.; (second), 90 lb. and up, 8¾d. lb.; 80 to 89 lb., 8⅛d. lb.; 70 to 79 lb., 7⅝ lb.; 60 to 69 lb., 6¾d. lb.; 59 lb. and under, 5d. lb.; cows (first), 60 lb. and up, 7½d. lb.; 59 lb. and under, 6⅝d. lb.; (second), 60 lb. and up, 5¼d. lb.; 59 lb. and under, 5d. lb.; bulls (first), 5d. lb.; (second), 3d. lb.; kips (first), 5d. lb.; (second), 5⅛d. lb.; (third), 3½d. lb. Calcutta Market (prices in rupees per 20 lb.):—Arsenic hides (cows): Agras, 7 to 12; Durbhangas, 6 to 7.8; Patnas, 5 to 6. Salted cows: 6.8 to 8.8. Arsenic hides (buffalo): 3.8 to 6.8. Skins: Calf, 8 to 10; goat, 200 to 260 per 100 pieces.

Miscellaneous.—Cotton (American), 13.32d. lb.; Egyptian (Sakel), 17.30d. lb.; jute (first grade c.i.f.), £31 2s. 6d. ton; jute (lightnings), £27 15s. ton. Oilseeds: Linseed (La Plata), £18 7s. 6d. ton; palm kernels, £17 5s. ton; castor seed (Bombay), £18 12s. 6d. ton; sesame seed (China), £25 2s. 6d. ton; soya beans, £12 17s. 6d. ton. Oils: Linseed, £40 15s. ton; olive (Spanish), £75 10s. ton; rape (crude), £44 ton; soya, £37 7s. 6d. ton; petroleum, 1s. 4½d. gallon; petrol, 2s. 1d. gallon; fuel oil (ex-tank), 65s. ton; coconut (Ceylon), £37 17s. 6d. ton; cotton (crude) £41 15s. ton; ground nut, £47 15s. ton. Rubber: Plantation (No. 1 crepe), 7d. lb.; smoked sheet, 7d. lb.; fine hard Para, 10½d. lb.

'BALKAN' NATIONAL INSURANCE COMPANY

FOUNDED 1895.

Capital paid up	5,000,000
Total reserves as per December 31st, 1920	53,200,000
Premium Income during 1920	28,300,000
Amounts insured of Life Branch exceed	150,000,000

Branches maintained: Fire, Life, Marine, Casualty and Re-insurance of all branches.

HEAD OFFICE: SOFIA, BULGARIA.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.)

India.

Rails, etc. The High Commissioner for India invites tenders for the supply of: 1. Rails, 41¼ lb. per yard, and fishplates. 2. Lathes, sliding, surfacing, and screw-cutting, and brass finishing. 3. Cranes, coaling, steam. 4. Machines, weighing platform. 5. Jacks, screw, lifting and traversing. 6. Engines and boiler for stern-wheel steamer. Forms of tender may be obtained from the Director-General India Store Department, Branch No. 11, Belvedere Road, Lambeth, S.E.1, and tenders are to be delivered at that office not later than 2 o'clock p.m. on Friday September 8, for No. 1, and on Friday, September 15, for Nos. 2 to 6.

Locomotives. The South Indian Railway Company invite tenders for the supply of: 1. 46 metre gauge locomotives and six locomotive boilers. 2. 108 metre gauge wagons. 3. Bridgework. October 8.

Spring Steel.—The Burma Railways Company invite tenders for the supply of 100 tons spring steel for laminated springs. September 4.

Egypt.

Switchboard, etc.—Tenders are invited by the Chief Electrical Engineer, Electrical Service, Ministry of Public Works, Cairo, for the supply and installation of a switchboard and a system of feeders in armoured cable for works of the Palais de Ras el Tine at Alexandria. September 11.

Irak.

Clothing, etc. The Ministry of Defence is inviting tenders for the supply of: (1) Clothing requirements—including clothing, tailors' tools, grindery, shoemakers' tools, etc. (2) Leather and web accoutrements. (3) Camp equipment: including repair materials, and general camping accessories.

Tenders on the proper form, with all quotations in rupees, must reach the Ministry of Defence, Baghdad, not later than mid-day September 30. The Minister of Defence suggests that tenders be despatched by Air Mail followed by duplicates by post. Wherever possible samples should accompany tenders. (D.O.T.)

The proposal for a mail service by air between Brindisi, Athens, and Alexandria is being considered by the Governments concerned.

Cotton and Cotton Goods.

EGYPTIAN CROP PROSPECTS.

Good Yield Anticipated.

(FROM A CORRESPONDENT.)

Alexandria, August 17.

The cotton crop is from fifteen to twenty days ahead of time. The Upper Egypt crop is largely harvested, and the present position of Lower Egypt is that of the first week of September. This all points to a good crop, as the boll weevil will largely be defeated of his prey. There is still the chance that the cultivator will forget past lessons and experiences and over-water his crops now the new water is coming down. As far as I can gather, the crop has not suffered from want of water, at the same time it has not had any too much, and if the cultivator is lenient with his water from now onwards it should probably prove to be a good, hard, stapled crop. The earliness of the crop is probably due to the abnormally hot summer we are experiencing; 84 degrees Fahrenheit is generally about a maximum summer temperature. Here in Alexandria, however, this summer, which is said to be exceptional, the temperatures have ranged from 85 to 95 degrees, which, with a humidity of 80 per cent., is terrific. Cairo may be reckoned at 10 degrees hotter, but is also much drier. The ordinary summer temperature for the Delta is about 92 degrees.

MANCHESTER MARKET.

Tone More Cheerful.

(*From Our Own Correspondent.*)

Manchester, Friday.

The market continues to present a rather more cheerful appearance. There is a lot of grumbling from sellers with regard to the prices offering, but, despite the difficulties met with in arranging transactions, the turnover tends to broaden. Unfavourable advices have been received relating to the American crop, but a further rise in prices has been checked by the unsatisfactory labour situation in the States and the wretched financial position in Europe. Improved advices have come through with regard to the Egyptian growth. The prospects are described as excellent, but owing to the crop being early there is less danger of the plants being damaged by pests. Demand in Egyptian yarns has been on rather broader lines. Some producers of fine counts have sold fairly freely, and the trade situation in Bolton and district is better. Piece goods for the Near Eastern outlets have moved off slowly. According to some cables, the financial situation in Egypt is not all that could be desired. For India there has been plenty of inquiry, and substantial lines have been booked in grey shirtings and light bleaching cloths, chiefly for Calcutta. Comparatively little has been done for China. Printing and finishing styles have been sold for Brazil. The home trade has not given much support.

It is announced that fifty German firms are sharing the Yugoslav reparations order for railway cars to a total value of 51,000,000 gold marks.

LIVERPOOL REPORT.

Enquiry Disappointing.

Messrs. Reynolds and Gibson report as follows for the week ended August 23:—

All markets during the past week have been dancing to the tune called by the scaremongers in America, and ours has been no exception. The enquiry met with has been most disappointing, and proved once more how very slow are Lancashire spinners to be stampeded into buying after the lessons learned in 1920. Any advance seems to be regarded with the gravest suspicion, and the opinion seems to be well rooted that all requirements for the ensuing season will be met without the slightest difficulty. With regard to Sakellaridis cotton, we consider this attitude is a fairly sound one, but uppers are a different proposition altogether. Quite a number of mills in the States have adopted Upper Egyptian cotton as their staple raw material, and it seems certain that, following on their policy as displayed in the last two or three seasons, they will purchase heavily, even in the ordinary course of events. Should the American crop prove to be a partial failure, as many experts are now busily proving it is going to be, these purchases will be increased proportionately. The upper basis in Alexandria is cheap at the moment, cheaper than is likely to be the case for some time to come, and purchases for future delivery may well be worth considering by those who are interested.

Business transacted here, which shows some improvement on the previous week's total, has been chiefly of the bargain description, and the tendency for "low grade with staple" is still very marked. Good Sakel remains a drug in the market, and little has been done this week in Sudan cotton. The usual small enquiry for uppers and white cotton still persists, the selection available in both qualities being of a somewhat meagre description, except for the finer qualities of uppers, of which a fair quantity is on offer. Brown cotton is entirely neglected, except for an occasional enquiry for extra fine, a quality which seems to be non-existent. C.i.f. business is very sluggish in character. Official reports from Manchester have been rather good and speak of a broadening cloth enquiry coming from India, and of fair lines going through where prices have been cut low enough. One gathers, however, that the Eastern buyers are in no way disposed to follow the recent advance, their attitude corresponding with that already adopted by the spinners themselves, as mentioned above. There seems, however, a slight tendency towards a hardening in rates, particularly in yarns, which latterly have been moving off more freely. Reliable crop reports from Egypt indicate that, so far, the plants are doing very well. Total sales estimated at 2,800 bales (including 350 Sudan). Quotations of Sakellaridis are raised 75 points, with the exception of extra fine, which is only 25 points higher. Upper cotton is 50 points dearer, and brown 25 points dearer on the week. Fully good fair Sakellaridis 18.25d.

MANCHESTER COTTON REVIEW.

Considerable Increase in Indian Business.

The cotton trade review of the Imperial Ottoman Bank for the week ended August 26 states:—

General.—There is little change to report regarding business during the past week. Enquiry remains persistent, but not often are buyers and sellers found in agreement on the question of price, particularly as the former are inclined to stiffen their attitude, backed up by a growing belief that the firmer price for raw cotton will be maintained.

Yarn.—Consumers are reported to have shown more disposition to buy than for some little time past. This, together with the rise in raw cotton, has caused an advance of approximately 1d. per lb. compared with the quotations a week ago, but holders of stocks who have been obliged to realise for reasons of finance are reported to have disposed of some fairly big lines below current quotations. Considerable curtailment of production is said to have been decided on in various quarters, and, no doubt, this, coupled with the closing down of the mills in Oldham during the coming week owing to the annual holiday, has had a stiffening effect.

Cloth.—The business for India reported last week has again been in evidence, and the turnover for that market is said to have shown considerable increase. More confidence is expressed in the general Indian position, and trade reports of a distinctly healthy nature are being received. As in the yarn section, manufacturers are adopting a somewhat more independent attitude, and it is said that many of the Indian buyers are coming to the conclusion that they have waited as long as is prudent before placing their

Digitized by Google

orders. China is reported to have done a little actual business here and there, but inquiry is on an increased scale, and this is regarded as a hopeful sign. On the other hand, the Levant and Egypt are doing little or nothing. As regards home trade, the bad weather experienced during the past two months resulted in many of the wholesale houses being left with rather large stocks of light summer goods on their hands, a condition which certainly does not encourage new business for the time being.

Raw Cotton.—A further increase is shown on last week's quotations, though this can hardly be said to be due to larger purchases of "spot" cotton, as, owing to the annual holidays in many of the producing districts, actual purchases have been small. The explanation is rather to be looked for in the further unfavourable reports from America, where a continuance of dry weather in some districts is said to have caused "shedding," whilst in others excessive rains are said both to have increased the activity of the boll-weevil and to have caused many of the plants to rot. Closing prices are as follows:—American fully middling, 13.70; Egyptian fully good fair, 18.00.

COMPANY NOTES AND REPORTS.

African and Eastern.

The delayed report of the African and Eastern Trade Corporation for the year ended December 31, 1921, shows a trade loss, including commitments and depreciation of stock, of £1,794,798. To meet this the directors are transferring £1,750,000 from the general reserve. They draw the attention of the shareholders to the unprecedented world-wide depression in trade during the year. Consequent upon this depression and its accompanying serious fall in values, the business of the corporation has been for the time being adversely affected to an abnormal extent. The trading loss on the year is after allowing for the usual depreciation on the property and writing down of all stocks to current market values. It was anticipated that the excess profits duty adjustment would have been completed before the submission of the accounts to the shareholders, but as it is now evident that considerable time must elapse before the final adjustment is made, the directors consider it advisable to avoid further delay in presenting the accounts. The directors point out that a very substantial sum is expected from this source, which will go into the accounts of the current year. Investments in allied and subsidiary companies have been written down by the sum of £1,500,000, which has been taken from the investment reserve account. The amount remaining to the reserve fund, including depreciation and insurance funds, now stands at £3,729,508. There is no dividend on the ordinary shares. The directors are glad to report that the trade position appears to be gradually improving, and as soon as the world conditions become more normal the corporation, being fully equipped, will be able to take every advantage of any improvement which may take place.

Agricultural Bank of Egypt.

The following was the position of the bank's encashments on July 31:—Existing Loans: Short Term Loans £E8,838, Category B £E3,338,654—total £E3,347,492; Matured Loan Instalments due £E24,990, falling due £E560,795—total £E585,785. Perceptions: Outstanding on January 31 £E223,988, balance £E152,923, encashed £E71,065; Matured Loan Instalments £E8,759—total encashment of instalments due, £E79,824.

Applications for Terms invited.

CONSTANTINOPLE MARKET FOR TOILET PREPARATIONS.

Since there are no manufacturers of perfumes and toilet preparations in Turkey, the import trade in this line is very important, says the American Trade Commissioner, Mr. Julian E. Gillespie, in a recent report. Under normal conditions Constantinople is the distributing centre for these products. Trade with Anatolia at the present time, however, is greatly handicapped by reason of the unsettled conditions and the law prohibiting luxuries, so that present business is practically limited to local requirements.

Perfumes, face powder, toilet soap, shaving cream, dental preparations, face cream, brilliantine, and rouge are imported into Constantinople in large quantities. These articles come chiefly from Europe. France controls the larger share of this trade, and Germany holds second place. It is reported that German firms practically controlled the market in cheap perfumery before the war, and during the war some of the more expensive German preparations were introduced and became well known. The principal trade of English firms in this market is toilet soaps.

Eau de Cologne and Perfumes.

Prior to the war importations of eau de Cologne into Constantinople were very large. During the war a local industry sprang up, and at the present time almost every large drug store has its own brand. Although the manufacture of this product is not carried on with modern equipment or on a large scale, a very good quality is produced here and sold in the local market. France controls the market for high-class grades, while a limited business is done by English and German firms. The market for high and medium grade perfumes is controlled by France, while Germany furnishes a large part of the cheaper quality and England supplies a limited amount of high-grade perfumes. The perfume trade of Constantinople is both wholesale and retail. The retail trade is carried on principally in Galata and Pera and caters for the European population, while the wholesale trade is centred in Stamboul and is principally concerned with the Turkish requirements.

Imports of perfumes, brilliantines, powder, cream, etc., in 1921 included 35,214 kilos, valued at £T68,645, from France; 11,050 kilos, worth £T13,893, from Italy; 4,768 kilos, worth £T18,126, from England; and 3,675 kilos, valued at £T5,100, from the United States.

Toilet Soaps, etc.

England holds the chief place in the importation of toilet soaps, while French soap is sold in large quantities. Certain American soaps are also favourably known, and there is some shaving soap from the United States on the Constantinople market. Of the toilet soap imported in 1921, 34,720 kilos, worth £T34,393, came from England; 15,321 kilos, valued at £T13,736, from France; 12,259 kilos, worth £T12,063, from Italy; and 7,728 kilos, valued at £T3,023, from the United States. The trade in face powder is almost entirely divided between France and Germany. France furnishes the better grades and Germany the average and cheaper grades. Brilliantine, face cream, and rouge are obtained chiefly from France, although some rouge from Germany finds a steady market in Constantinople. There is a large and regular demand for lip sticks, which are to be found in the principal drug stores and perfumery shops. The market for tooth paste, powder and liquid is shared by France, Germany, England, and the United States.

The Royal Exchange Assurance announces that the Hon. Rupert Evelyn Beckett has been elected to a seat on the Court of Directors at the head office of the corporation.

The Southern Punjab Railway Company has declared an interim dividend of £5 per cent. on ordinary stock, subject to English tax (after allowing for relief in respect of Indian income-tax and Indian super-tax), payable September 13.

H.M. Consul at Zagreb reports that an Exhibition and Fair, to be held from September 17 to 24, is being organised by the Croat-Slovenian Association of Agricultural Societies. In addition to the purely agricultural side of the Fair, a special feature will be a wine fair from September 17 to 23, in which it is understood a number of wine-growers and merchants of the province will participate.

NATIONAL BANK OF EGYPT.

An INTERIM DIVIDEND of 8s. per share has been DECLARED PAYABLE on the 4th September on account of the profits for 1922. Coupon No. 32 will therefore be payable on that date. Forms for listing Coupons may be obtained at the National Bank of Egypt, 6/7, King William Street, E.C.4.

SPECIAL MARKET REPORTS.

Some further extracts from the monthly circular of the Imperial Ottoman Bank for the period July-August are given below:—

Persia.

Russian Commercial Activity. — A Russian company has opened branches in Resht, Teheran, Meshed, and Hamadan for the sale of miscellaneous goods, mostly of pre-war manufacture.

Baku petrol is selling in Teheran, Kasvin, and other towns in Northern Persia. The quality is inferior to the petrol imported from this region before the war and also to the Anglo-Persian Oil Company's product at present on the market.

Barley, 120 to 125 krans per khalwar of 400 kilos.

Gum Tragacanth.—This crop is collected by the nomad tribes. Collection commences at the beginning of May and continues until the end of August. The gum collected during the period May to early July is of superior quality, and sells at 7 to 8 krans more than the later deliveries. The early crop is clean and contains 85 to 90 per cent. of first-grade gum. Later, during the warm weather, the gum becomes thick and yellowish, and the quality deteriorates to 50 to 60 per cent. first grade. Hamadan merchants purchase from the early crop and hold, then double their purchases in July and August, mix the two qualities and sell in September. Present bazaar prices: Krans 64 per batman of 4 kilos. There is a large demand but small deliveries

Almonds.—There is a steady demand for account of America, India, and London. Present price, 14¼ krans per batman of 4 kilos.

Tunis.

The market, deeply affected by the general crisis consequent on the war, is slowly resuming its activity on a saner basis, rid of the hindrance caused by speculation. The year began with a period of complete calm, and the few transactions which took place were effected against cash or on very short terms. The market became more alert in the second quarter and showed signs of again becoming attractive.

Cloths.—The fluctuations in the £ value have interfered with the development of this branch of trade; merchants are uncertain of the actual cost of their purchases. Cotton goods excepted, the supply of which comes exclusively from Manchester, there is a very distinct tendency for ordering linen cloths, silks, and moirés from France, where these goods are cheaper than in England, and the means of transport more convenient. Spinners in the North of France are now in a position to cope with the demand, and are producing a good many articles which were previously supplied by England.

Cereals.—This year's crop may be estimated as small. The North of the Regency, where estates are better cultivated and where the rains are fairly regular supplies our market with important quantities of wheat, the specific weight of which varies from 80 to 85 kilogrammes to the "hectolitre." On the other hand, the South of the Regency, which, during good years, sent big consignments of white barley to England for malting purposes, will be unable to do so this year, owing to the poorness of the crop. A consortium, formed recently, is now studying the possibility of supplying the Regency with maize from La Plata. Owing to the crop deficiency, our flour mills have passed large orders to North America, and consignments of wheat have already been sent to our market; the mills are thus in a position to carry on crushing operations.

Stock and Share Markets.

GILT-EDGED WEAK.

Oils Strong.

(From Our Own Correspondent.)

London, Tuesday Morning.

It was inevitable that the slump in the mark should have some effect on the markets, particularly on those which are specially amenable to foreign influences, and for a large part of the week a distinctly dull tone was in evidence. If the depreciation of the mark had not come to a sudden termination I think that in certain descriptions we should have seen much lower levels. As it was, its effect was not nearly so pronounced as it would otherwise have been, as a result of a number of favourable factors. The week-end saw the appreciation of the mark, and the removal of this cause of anxiety, for the moment at any rate, allowed these factors to have full play, and so the markets are now in a comparatively cheerful state.

Of the favourable factors to which I have referred mention must be made of the belief that we are on the verge of a trade revival, which has had a distinctly stimulating influence. How far the belief may be well founded is another matter; still, there is no getting away from the fact that in many directions indications point to improving commerce. It needs no emphasis that the restriction of buying for many months has left most centres short of supplies, and this alone is bound to give a fillip to trade enterprise. Another factor that has not been without effect is the Roumanian conversion scheme, which has created the best possible impression. It is, as the committee of bondholders have pointed out, the first step taken by an Eastern country to bring conditions back to a pre-war level. We can only hope that Roumania's praiseworthy example will be emulated by the other Near Eastern States.

Gilt-Edged Lower.

Gilt-edged have exceptionally not shared in the week-end recovery. It is possible that this is due to the increased demand for money for trade requirements. Consols at 57⅝ are ¾ down, the Conversion Loan at 73¼ xd. has shed 3, while War Loan Fives at 99 13-16 are ½ lower. Indian stocks have eased off somewhat. The 7 per Cent. stock has shed a point at 117½, the 3½ per Cent. stock at 68¼ is the same as before, but the 3 per Cent. stock at 57½ is ¾ lower.

The Foreign group has been governed by the prevailing political uncertainty, but while last week saw prices depressed, this market is closing on what is for it a comparatively firm note, though in most cases prices are well below last week's level. French stocks have naturally been dull, War Loan Fives being 3¼ down at 34, while the 4 per Cents. are 26½. German 3 per Cents. close at 1 7-16, at which they are ⅛ down, but they have been as low as 1. Turkish Unified have been a strong spot, and are up to 35. Italian Rentes are unchanged at 21. Russians are dull and neglected, the 4 per Cents. being 6, the 4½ per Cents. 6, and the 5 per Cents. 10½. Czecho-Slovak Bonds are unchanged at 91. Chilian Bonds have been strong, while Mexicans have been in some request.

Industrials Quiet.

Business has, as usual, been on a restricted scale in the Industrial group, but the undertone has been good, and it is evident that it would take little to bring about a general revival of activity. There have been a number of good spots.

Tobaccos have been fairly firm. Bats are 3d. down at 88s. 6d., while Imperial Tobaccos at 69s. 6d. xd. are 9d. lower. Textiles have been in request, with Coats 3s. 3d. up at 68s. 6d., while Courtaulds at 52s. show a gain of 1s. 3d. In Iron and Steel securities Armstrongs are unchanged at 16s. 3d., Guest Keens are 1s. down at 35s., while Vickers are the same at 12s. In Indian Railways Bengal and North-Western have gained ¼ at 139½, Burmas are 101, and East Indian Ann. A are 11⅜.

In Shipping securities P. and O. Deferred are unchanged at 305. Cunards are the same at 20s., while Furness Withys are 3d. up at 33s. 3d.

Oils Firm.

A firm tone characterised the Oil market at closing. Burmahs at 5 9-16 are 3-16 up, while Anglo-Persian Ord. at 5½ show a gain of 3-16. Mexican Eagles are 1-16 down at 3. In Trinidad issues Apex are 2 3-32, a gain of 1-32, Centrals are ⅛ up at 2 1-16, while Leaseholds at 1¼ have gained 3-16.

Among Egyptians, Anglo-Egyptian B are 1 7-16, a gain of 1-16, while Oilfields of Egypt are 1s. 3d. down at 3s. In the Roumanian group Phœnix are 3d. up at 28s., Steaua Romanas are unchanged at 10s. 3d., Dacia Romanas are the same at ⅞, while Roumanian Consolidated are 3d. up at 16s. 9d.

Banks Firm.

Banking descriptions have been firm. Chartereds are 18 3-16, National of Indias are 43¾, P. and O. Banks are 14¼, while Bank of British West Africas are 4¾.

In Egyptian securities Abonkirs are unchanged at 20s. 6d., Beheras are the same at 8, Egyptian Markets remain at 21s. 6d., Gharbieh Lands at 1 5-32 are unchanged, while New Egyptians are 23s. 3d.

Rubbers.

Dull conditions have continued to rule in the Rubber market, and prices have tended to ease somewhat. Business has, however, been on a very restricted scale.

NOTICE TO HOLDERS OF
TREASURY BILLS OF THE ROUMANIAN GOVERNMENT

Following on the notice of the Ministry of Finance of the Kingdom of Roumania, dated November 25, 1921, and with a view to proceeding with the consolidation of the Treasury Bills issued by the Roumanian Government in Pounds Sterling, United States Dollars, Canadian Dollars, French Francs, Belgian Francs, Italian Lire, Spanish Pesetas, Swedish Crowns, Czecho-Slovak Crowns, Portuguese Escudos and German Marks, the Roumanian Government has created a Consolidation Loan of a nominal amount of £35,000,000, or 175,000,000 dols. (United States Gold), bearing interest at the rate of 4 per cent. per annum and dating from October 1, 1922.

The Consolidation Bonds will be to bearer, and will bear interest at the rate of 4 per cent. per annum, payable the first day of October and the first day of April in each year, the first coupon for a full period of six months being due on the first day of April, 1923.

Amortization will be effected by purchases in the market below par, plus accrued interest, and, when Bonds cannot be purchased, by half-yearly drawings by lot at par by means of a semi-annual payment commencing on the first day of April, 1928, including interest and amortization, of 2.503405 per cent. The amortization fund is calculated to redeem the whole of the Bonds not later than the first day of April, 1968.

Bonds will be issued in denominations of £1,000, £500, £100, £50, and £20, and 1,000 dols. and 500 dols.

Sterling Bonds and coupons attached thereto will be payable in London at the office in London of the British Overseas Bank, Ltd., and in New York in dollars at their correspondents at the exchange of the day on which the same are presented for payment, and Dollar Bonds and coupons attached thereto will be payable in dollars in New York at a Bank or Banks in New York appointed by the British Overseas Bank, Ltd., and also in London in sterling at the Office of the British Overseas Bank, Ltd., at the exchange of the day on which the same are presented for payment.

Under the provisions of the General Bond, the Consolidation Loan is a direct obligation of the Roumanian Government, and is specially charged (subject to a prior charge given to the Roumanian 4 per Cent. External Loan of 1922, limited to £2,500,000, or 12,500,000 dols. U.S.A. Gold), pari passu with the present and future Roumanian Funded External Loans (but in priority to all other External or Internal loans or indebtedness), against the proceeds of the Export Taxes which are payable in foreign currencies or gold, and which are estimated to produce not less than the sum of £4,000,000 per annum.

Provision is made by the General Bond for the payment to the National Bank of Roumania out of the proceeds of the Export Taxes of an amount sufficient to meet the service of the External Loan of 1922 (which is to have priority), and of the other Funded External Loans, including the Consolidation Loan.

If the Export Taxes should be abolished or reduced so as no longer to be sufficient to cover entirely the service of the Coupons and amortization, the Roumanian Government undertakes to pay monthly and in equal instalments into the National Bank of Roumania the amount of any deficiency, so as to make up the sums required for the service of its funded external debt, present and future, including the External Loan of 1922 and the Consolidation Loan. These sums are made a first charge against the whole of the State Revenues, but the External Loan of 1922 will have priority over the Bonds of the Consolidation and other Funded External Loans.

If the National Bank of Roumania should be unable to procure the exchange required to make the necessary remittances abroad, the Roumanian Government undertakes by organisation of its exports to provide the necessary exchange facilities.

The Roumanian Government hereby offers to the Holders of Treasury Bills payable in any of the following currencies, Bonds of the Consolidation Loan of an equal amount in Pounds Sterling calculated at the following rates of exchange: —

Sterling converted into Sterling...	At par.
French Frs. converted into Sterling	50 French Frs. to the £.
Belgian Frs. converted into Sterling	53 Belgian Frs. to the £
Italian Lire converted into Sterling	88 Italian Lire to the £
Pesetas converted into Sterling..	25.50 Pesetas to the £
Swedish Crowns converted into Sterling	16.50 Swedish Cr. to the £
Portuguese Escudos	60 Escudos to the £

The Roumanian Government hereby offers to the Holders of Treasury Bills, payable in United States or Canadian Dollars, Bonds of the Consolidation Loan of an equal amount in United States Dollars at par.

Overdue interest will be added at the rate of 6 per cent. per annum up to the first day of October, 1922, payable in Consolidation Bonds. Interest at the rate of 4 per cent. per annum from the first day of October, 1922, to date of maturity will be deducted in respect of Treasury Bills maturing after the first day of October, 1922.

Fractions of £20 or 500 dols. will be represented by fractional Certificates entitling the Holders to Bonds against presentation of sufficient Certificates to make up one or more Bonds, but fractions of £1 or 5 dols. will be disregarded altogether.

Holders are invited by the Roumanian Government to exchange their Treasury Bills on the terms of this offer, and to forward their Treasury Bills for this purpose to the Central Office of the Public Treasury, Bucharest, Roumania.

The present offer of Conversion to Holders will remain open for acceptance until November 24, 1922, after which date Holders who have not deposited their Treasury Bills for conversion will be considered as having waived their rights to such conversion.

The Bonds when issued will be subject to the appropriate Stamp Duty in the United Kingdom if assigned, transferred, or negotiated there.

As soon as the Definitive Bonds are ready, Holders of receipts will be informed by advertisements in the public Press.

Holders of Treasury Bills resident in France will be entitled to exchange such Treasury Bills for Consolidation Bonds in Paris, as soon as the necessary authorisations have been obtained and all legal formalities complied with. These Bonds will be identical with the other Bonds of the Consolidation Loan, except that the first coupon will be detached. These Bonds will bear the French Revenue stamp, and a quotation on the Paris Bourse will be applied for by my Government.

As regards certain of the other countries mentioned above, necessary formalities have to be complied with before the official announcement of the consolidation can be made, and holders in these countries will be notified as soon as arrangements are completed.

Application will be made in due course for an official quotation of the sterling Bonds on the London Stock Exchange and of the dollar Bonds on the New York Stock Exchange.

(Signed) VINTILA BRATIANU,
Minister of Finance of the Roumanian Government.

ROUMANIAN GOVERNMENT TREASURY BILLS.

For the convenience of holders of the Treasury Bills the following Banks have agreed to act as the Agents of the holders of such Bills to carry through the exchange on their behalf: —

IN ENGLAND.

NOTES OF THE WEEK.

The Turkish Offensive.

The renewal of hostilities on the Greco-Turkish front, briefly referred to in our issue last week, proved to be the prelude to a Turkish offensive on grand scale. After preliminary operations in the neighbourhood of Denizili, in the Meander Valley, and on the northern sector at Bilejik, the main attack was delivered against Afium Karahissar, which was immediately captured. By the end of the first week the Greeks were falling back on Ushak, the first town of importance west of Afium Karahissar, on the railway line to Smyrna, and had evacuated Eskishehir. Turkish strategy was directed at a break-through at Altyntash, between Afium Karahissar and Eskishehir, and again at Bilejik, north of the latter town, in the hope, no doubt, of being able to deal piecemeal with the Greek army. The plan was a bold one; and in the face of any determined resistance on the part of the Greeks, ought to have required for its complete realisation a greater superiority of fighting strength than the Turks are credited with having. But the latest news suggests that the Greeks are only offering the resistance required to avert complete disaster, while retreating as best they can and preparing for a complete withdrawal from Asia Minor.

The Political Significance.

However the Turkish attack may ultimately fare—even if it is successfully held by the Greeks or is brought to a full stop by the weather—its significance is unmistakable. The last attempt on the part of any of the Allied Powers to give an official interpretation of the position in Asia Minor was made by the British Prime Minister in the House of Commons on August 4, when he drew a picture flattering and wholly favourable to the Greeks, while crediting the Turks with nothing more than an ability to maintain military and political inactivity in their mountain fastnesses of Anatolia. Mr. Lloyd George was at pains to show that only the unfair action of the Allies in keeping the Hellenic Army out of Constantinople—which he described as "the capital" and credited with some bearing on Mustapha Kemal's activities—prevented the Greeks from establishing a permanent mastery over Asia Minor. The present fighting shows that the Turks have retained, or regained, the initiative, and the whole argument of Mr. Lloyd George's ill-informed outburst falls to the ground. As an attack on the present scale must have been in preparation for more than three weeks, we need not imagine that its sole purpose was to read the British Prime Minister a lesson. At the same time, Mustapha Kemal must have had in view a political rather than a military object, even if he regarded an offensive as an antidote to weariness or lukewarmness among his sorely tried followers. He has already achieved a definite result in making a certainty of the Venice meeting, which was in danger of being abandoned owing to the inability of the British and French Governments to agree as to their joint attitude towards certain irrelevant questions.

The Venice Meeting.

The essence of the meeting that it was proposed to call to enable representatives of the Entente Powers and of the Athens, Constantinople, and Angora Governments to exchange views was that there should be no antecedent conditions. Great Britain, France, and Italy, after great difficulty, came to an agreement last March regarding the terms on which they could jointly press for a settlement of the Greco-Turkish question; but the step proved ineffective, because the Angora Government would not accept the proposed settlement, or at least rejected one of the preliminary conditions. When, therefore, it was proposed to hold a meeting at which Allies, Turks, and Greeks could discuss the whole question together, it seemed somewhat irrelevant for the British and French Governments to enter upon a heated argument as to their own attitude towards two conditions of the March agreement, one of which the Kemalists rejected, while insisting upon the other. As there has been no indication of any change of attitude on the part of the Angora Government, the only hope of a meeting was to make it free of all antecedent conditions. In the face of the Turkish offensive, the Allied Governments, fortunately retaining their sense of humour, have decided not to insist upon

Digitized by Google

an armistice in Asia Minor as a preliminary to an early meeting, although an armistice may be requested for other reasons.

The Obstacle to a Settlement.

As far as the three Allied Powers are concerned, the only obstacle to a Turkish settlement is the attitude of Great Britain, for France and Italy have shown themselves in agreement with the conditions of peace that the Angora Government professes itself willing to accept. The British attitude may reflect the greatest credit on the humanitarianism of the Cabinet, which is insisting upon safeguards for minorities in Asia Minor; but the fact remains that its attitude, which has already resulted in the inevitable atrocities on both sides, is now responsible for the further loss of life caused by the resumption of hostilities. To decide, therefore, whether the British attitude is sensible as well as humane, it would seem necessary to strike a balance between the number of casualties, Greek and Turkish, resulting from a state of war during, say, the last two years in Asia Minor and the possible loss of life that there might be, if the sole incentive that the Turks have for committing excesses were removed by the withdrawal of Greek troops from Turkish territory. Most sane people, we imagine, would risk the latter course. Moreover, in March last the British Government was satisfied, for the purpose of providing for the "full and adequate security" of the minorities, with the proposal of "a series of provisions . . . based upon the stipulations contained in existing treaties or draft treaties, and in the secular or religious law of the countries concerned," subject to the appointment of "special Commissioners to superintend the execution of these provisions in the areas and for the communities who are principally concerned." The official attitude of the Angora Government towards the stipulation has not been stated, as far as we are aware: but its spokesmen have from time to time appeared to promise acceptance. If it should be ready to agree, there can be no justification for the British Government's continuing to block a settlement of the Near Eastern question on humanitarian grounds. There are, of course, other points in the settlement: but it was solely on humane grounds that Mr. Lloyd George sought to justify Great Britain's refusal to agree to a Turkish settlement.

Angora and Great Britain.

A further anomaly of the Near Eastern *impasse*, for which the British Government now accepts sole responsibility, is that, apart from Greeks and Turks, who are being, or have been, done to death in hundreds and thousands or have passed through terrible experiences, the only sufferer is the British Empire. France and Italy may have to postpone the advantages to be derived from concessions, but Great Britain alone is called upon to face the direct results of the Greco-Turkish struggle in the troubles that she is experiencing in India, Egypt, and Iraq. In these circumstances, it might be thought that the British Government would consider that it had the strongest possible reasons for settling the Turkish question; but, apart from the Paris Agreement of last March, which has since been practically torn up by Mr. Lloyd George in his speech on August 4, no practical step towards a settlement has been taken during the last four years. Whether the Turkish offensive is going to make a settlement easier or more difficult remains to be seen. It ought certainly to clear away some of the British Prime Minister's misconceptions, and to this extent Mustapha Kemal Pasha is doing a good turn to the British Empire. Whether he is also serving Turkey well is another matter. The answer would seem to depend upon his attitude towards the Sultan. If his personal ends are subordinated to his patriotism, and he does nothing to render the existence of a unified Turkey under a Sultan and Constantinople Government impossible, all may yet be well.

The Greek Aspect.

For the Greeks, the Turkish offensive may have wider results than a military retirement on the Anatolian front. Greece will certainly have merited still greater sympathy for her sufferings as a pawn of the Allied Powers. Even if she is not altogether free from responsibility, her equivocal position during the last year is due to vacillation on the part of Great Britain and France and to the tension between them. Certainly since the beginning of this year the Athens Government has been ready to acquiesce in the evacuation of Asia Minor, and if there had been agreement between the British and French Governments, based on an appreciation of the facts of the Near Eastern question, the Greek Army might have withdrawn long ago with honour from Turkish territory and so prepared the way for a satisfactory settlement. But the petty-mindedness and vindictiveness of the Allied Powers towards King Constantine have prevented any real understanding or useful co-operation with Athens, and the Greeks have suffered. If the hour is particularly dark for them now, it is not because any disaster is foreshadowed in Anatolia—all the bulletins point to the Army's ability to hold the Turks—but because the whole nation must now face a situation that the politicians, in accordance with the exigencies of party politics, have endeavoured to persuade them would never arise. Happily the first shock has had the effect of increasing the solidarity of the Greek people, and it is to be hoped that they will now decide to have done with the mischievous impossible policy to which they were committed in Paris in 1919-20, and will realise that their future salvation, with prosperity to follow, lies in peace and a frank understanding with their neighbours, not in imperialistic designs.

The Proposed "Atrocities Inquiry."

For purposes of historical record it is permissible here to "bury" the proposal to hold an inquiry into the atrocities committed in Asia Minor during the present war between Greece and Angora. The subject is one in regard to which a matter-of-fact attitude and outspokenness need not be mistaken for cynicism. Atrocities have been the order of the day in the Near East for the last century or so, and, like the game of cricket, have as their basis that one side should have its innings, while the other is in the field or wilderness. Sooner or later the position changes. As the pastime is not popular with the outside world, the "fielders" have only to point to those who are having their innings to raise "barracking" on the part of the onlookers (from the West). There is a war on between Greece and the Asia Minor portion of Turkey. During the Great War Turkey had a long "innings." Greece began hers in May, 1919; Turkey replied in 1921-22. An Allied inquiry, which Greece could not well refuse, was instituted into the Greek "innings," but as the findings were not allowed to be published, the inquiry does not count. Now it is proposed by or on behalf of the Allies, who are technically at war with Angora, through their agent Greece, to institute an inquiry into Kemalist atrocities on Kemalist territory, and preparations are solemnly made to this end.

To Prevent Atrocities.

We share to the full the Western detestation of "atrocities," and, if we differ in any way from others whose voices are raised against them, it is that a fuller knowledge of Near Eastern affairs makes us keener to introduce practical methods for putting an end to the practice rather than to try to stop atrocities, as most people do, with their mouths or pens. The idea of sending a court of inquiry into an enemy country in war time to investigate atrocities and the expectation that the enemy would accept the proposal were typical of the muddleheadedness that prevails in regard to the position in the Near East. As a matter of fact, the scheme was killed by a tardy realisation of its preposterousness and the refusal of the International Red Cross to lend itself to the farce. Atrocities unfortunately are hideous blots that have sullied Near Eastern history for the last two or three generations. In the Balkans they have been associated with the staking out of national claims in debatable territory, and they can only be brought to an end by a just and permanent demarcation of frontiers, which the Allied Powers have so far failed to make. In Turkey atrocities occur when the Turks or their rulers find themselves with their backs to the wall against a national enemy whom they cannot defeat or individual oppressors whom they cannot outwit. We are hopeful that atrocities on any scale will be no longer known in Turkey when Europe guarantees the Turks territorial integrity and recognises restrictions on the extent to which the Turks may be individually and collectively exploited by their more sophisticated neighbours. These are the real safeguards for which the Allies so pathetically claim to be searching, while they allow the sacrifice of life in Asia Minor to mount up interminably.

A Diplomatic Solecism.

Our Sofia correspondent gives the text of a remarkable letter addressed by Senor José de Romero Dusmet, Spanish Minister and *doyen* of the Diplomatic Corps in Sofia, to the Bulgarian Prime Minister, in which a protest is entered against the prolonged absence from the capital of M. Stambolisky, who is also Foreign Minister. Senor Dusmet complains that he and his colleagues are unable to carry out their ordinary diplomatic business at the Foreign Office owing to there being no competent official in the Minister's place, and asks whether M. Stambolisky's lack of courtesy signifies a desire to suspend the normal relations of the Powers represented at Sofia, or whether he is unable to return to the capital for other reasons. The dispatch of such a letter implies a very "rattled" Diplomatic Corps, but it would be of interest to know whether any justification could be urged, from the records of diplomacy, for the actual wording employed by the Spanish Minister. The reference to "other reasons" is interpreted as an insinuation that M. Stambolisky absents himself from Sofia owing to his fear of political assassination, and is particularly resented by the Bulgarian Government. We are not concerned to defend any lack of courtesy on M. Stambolisky's part, but the insinuation of personal cowardice implies that either he must be a changed man or the diplomatists can know nothing of his past record and of recent Bulgarian history.

The Policy of Buffers.

The incident suggests, what is confirmed by the course of affairs in Bulgaria, that the foreign representatives as a whole are out of touch or out of sympathy with their surroundings. If some of them could have appreciated the fact that they were not accredited to a Western capital, but rather to one of Europe's Eastern schoolrooms, as it were, they might have helped to prevent things coming to their present pass in Bulgaria. No doubt Bulgarian methods, as exemplified by the Agrarian or Peasants' Party, can be exasperating, and quite possibly members of the Government, having had experience of the embarrassing directness of speech to which they are apt to be subjected, not only by the Diplomatic Corps, but also by the Reparations Commission, are resorting too much to the policy of the diplomatic mattress with a view to softening the oft-recurring blow. But in the Balkans, if anywhere, to know more is to forgive more. It savours of a descent into the local arena of party politics when a public reprimand, employing an Opposition gibe, is administered to the Government in connection with a personal grievance rather than on a State matter. We can only hope that M. Stambolisky will mend his ways, while deriving what satisfaction he can from the individual explanations of the foreign representatives in their anxiety each to dissociate himself from the particular wording of the Spanish Minister's letter.

The Air Force in India.

We wish it were possible to treat the denunciations which have appeared of the equipment of the Air Force in India as a mere holiday "stunt," but the evidence drawn from various sources seems to establish the proposition that the youngest Service in India has been required, as the older Services have so often been required in the past, to carry on its work with altogether faulty and inadequate material. The critics have not as yet agreed in apportioning the blame for defects which in themselves are inexcusable, and that question must not be prejudged; but Lord Rawlinson's speeches in the Budget debates of last March made it sufficiently clear that the Indian Government was taking very grave risks in order to secure a temporary reduction in the grants for military expenditure, and we cannot shut our eyes to the possibility that the lives of British officers may have been unnecessarily risked, and in some cases sacrificed, in the interests of momentary financial equilibrium. If that should unhappily prove to be the case, the public in this country will undoubtedly make it clear to the Viceroy and his colleagues that such sacrifices are too great a price to pay for the smooth working of an experimental constitution.

The Unrest Among the Sikhs.

The renewal of disorder among the Sikhs brings up one of the most painful topics in the India of to-day. The religious feeling underlying the movement is genuine and deep; scarcely anyone in this country will dissent from the contention that the sacred endowments, in the aggregate of very great value, should be administered in the interests of the community rather than their custodians of the moment, and the failure of the local Legislature to deal with the situation undoubtedly places the earnest reformers in a position of great difficulty. On the other hand, the sympathy of Englishmen is necessarily alienated by attempts to seize the endowments by force; the character of some at least of the leaders does not command our respect; and the association with the movement of disreputable agitators belonging to other communities at once robs it of its claim to be valued on purely religious grounds. In the circumstances the only reasonable course for the Government is to take adequate precautions against the use of violence, and in this respect the latest news is reassuring. The first step towards a settlement is to make it perfectly clear that no settlement can be achieved by force: it is only when this menace has been removed that

Digitized by Google

the influences making for a stable peace can come into effective operation.

Sir William Marris.

The selection of Sir William Marris to succeed Sir Harcourt Butler as Governor of the United Provinces will be a blow to the active local politicians who have been agitating for the appointment of some "eminent public man," but whose course of action has frequently been such as to discourage the appearance of candidates answering to that description. On the other hand, the choice will be welcomed by a majority—perhaps a large majority—of the people most immediately concerned, who distrust strangers, and have known their new Governor for a quarter of a century as an able and sympathetic officer. As most people are aware, Sir William Marris had a very important share in framing the new constitution, and we may be confident that he will administer it in the spirit in which it was granted. His charge is notoriously the most arduous in all India, and at the moment the economic and financial difficulties are unusually great, while there is an unfortunate lack of leadership or constructive talent among the people; but, given reasonably good seasons and some improvement in the quality of the Legislative Council after the next elections, we may anticipate that his term of office will be marked by orderly, and perhaps rapid, progress towards the goal assigned by Parliament.

THE WEEK AT HOME.

LONDON, Monday Evening.

The European Situation.

The crisis in the Near East is a matter for my colleagues on this journal, and it is hardly tactful for me to suggest that the exchanges between Paris and Berlin have been of more importance even than the war between Greece and Turkey. At any rate, the war appears to yield quicker results than the conferences; for the net effect of the agreement at Paris to give Germany further time seems merely to postpone the issue a few weeks or months, when we shall probably have another crisis and another conference. Stability may conceivably be restored by these tactics, but one becomes increasingly doubtful of the wisdom of this procedure.

The German mark has stopped its headlong descent for the time being, but the printing presses are still active in the Reich, where there is a famine in paper money, and so far as one can judge from the rather contradictory telegrams of the correspondents at Berlin, it would take very little to precipitate a wholesale economic disaster.

Meanwhile, France stands firm; and her courteous reply to the Balfour Note, which was published on Saturday, is a cogent and closely-reasoned argument. The more it is read, the more considerable is its effect likely to be, and it should do something to moderate the outcries of those in this country who are always denouncing France as essentially militaristic, aggressive, and reactionary.

Ireland.

No good news has come from Ireland. Mr. de Valera, the sole survivor of the triumvirate, has not said a word of even formal regret for the death of his old colleague—perhaps he could not, as he had denounced him as a traitor. General Mulcahy, rather an unknown quantity, at least on this side, reigns in the stead of Michael Collins; and the number of ambushes and outrages seems rather to have increased. In a great part of the South of Ireland trains have ceased to run, and communications have become altogether uncertain; life and property are less safe than a year ago; and conditions have generally depreciated since the departure of the British.

It is a melancholy record, and one still looks in vain for constructive statesmanship. The only political news of the week is that the Labour Party are still contemplating withdrawal from the Dublin Parliament (which has not yet met), and disputes between capital and labour threaten an economic crisis.

The Sale of Honours.

For some time past there have been rumours that Honours conferred by the British Government were more or less directly bought and sold, and there was a rather feeble debate on the subject in Parliament some weeks ago, during which the Government proposed the usual remedy—a Royal Commission. But the Duke of Northumberland now alleges that a certain gentleman, a Mr. Shaw, on whom fame had not hitherto smiled, has been acting as an agent in this matter, and all the newspapers have been in hot pursuit of a possible scandal. Mr. Shaw appears to be the gentleman who bought Stowe House a year ago, but the property is now up for sale again; other particulars have been published as to his business and social activities, but they are jejune and unenlightening, and Mr. Shaw himself cultivates an almost excessive modesty and reticence.

Downing Street has, of course, issued a démenti which makes it clear that the Government, or at least the chief members of the Government, have never seen or heard before of Mr. Shaw; and it remains to be seen whether the Duke of Northumberland and the *Morning Post*, which shows no inclination to drop the matter, will be able to throw more light on the subject.

The Northcliffe Estate.

A sensational legal case is threatened over the settlement of Lord Northcliffe's estate. He left two wills, the first of which devised his great interest to various hands, including Sir George Sutton, who had long been associated with him, and leaving a large annuity to Lady Northcliffe. The second will, made a few weeks before his lamented death, appears to give all his property to Lady Northcliffe. The first will is being propounded, and an attempt is to be made to set aside the second one on the ground that he was of unsound mind at the time. An effort has, of course, been made to avoid this conflict, with its inevitable consequence of a long and costly trial, but that appears to be impossible. The matter has been mentioned in a preliminary form in the Court already, but reports are now current that a settlement may at the last moment be arranged, which would come up for the sanction of the Court. It is said that an attempt will be made to purchase Lord Northcliffe's interest in *The Times*—which gives the control of that paper—

Digitized by Google

and of other journals of less importance and interest. Several competitors are mentioned, including Lord Beaverbrook, of the *Express*, Sir W. E. Berry, of the *Sunday Times*, the Rhodes Trustees, and two or three others. The price is supposed to be in the neighbourhood of a million, but it may be said quite emphatically that not anybody who walks into Printing House Square with a cheque will be accepted.

Meanwhile, the interregnum is causing some excitement and a good deal of heart-burning, and even trembling in the shoes, in Fleet Street. It is to be hoped that a definite settlement will be arrived at before long, as experience shows that it is not good for the morale of a newspaper to be, as it were, between earth and heaven, as it makes it more difficult to pursue a decisive and consistent policy. The ideal world, from the newspaper point of view, is one in which all the exciting things occur out of Fleet Street, and nothing takes place except the steady receipt of custom inside Fleet Street. Needless to say, this ideal world is one which is not realised in practice.

The Pirate Omnibus.

For several years the General Omnibus Company have had an unchallenged monopoly of London passenger transport, with the single exception of tramway competition; the old pirate omnibus had almost died out of memory. But lo! it has come back again, run by ex-Service men, very smart and civil, out of employment. The public has given it a sporting welcome, as a kind of David against the combine Goliath of the Underground Trust, and if one omnibus can pay, then this will pay. (In fact, another has been placed on another route, so the pioneer must have had some success.) The General Omnibus Company at first made some attempt to shadow this new competitor by putting on omnibuses to run immediately in front and behind, and so secure all the passengers; but people saw through the scheme and rather resented it, and now the pirate has a free run.

The attitude of the combine is that they run vehicles on both paying and non-paying routes for the convenience of the public, and the paying routes help them to maintain an efficient service in outlying suburbs; and, therefore, they argue, a monopoly is, on the whole, good for London traffic, so long as they do not abuse it. There is no suggestion that they do abuse it, for fares are reasonable enough—in glaring contrast to the extortionate railway charges—but the old public belief in free competition and the love of a plucky fight puts sentiment on the side of the small aggressor.

The End of Cricket.

Yorkshire are cricket champions, as I anticipated last week, the bad weather of the past few days having left us with a number of drawn games. Notts are next, and Surrey third; the order of merit appears to give a fair enough indication of public form. Yorkshire are unquestionably the best team of the year; Surrey have reached their place solely by batting strength, as Mr. Fender, I fancy, is the only bowler who figures in the 35 best bowling averages.

It has been a disappointing season on the whole, but for that the weather must be blamed, not the players. However, what the county games have lacked the cricketers in the parks on Sunday have attained—excitement and novelty. The innovation has proved a success, and London is not noticeably more pagan than it always was.

Serving God and Mammon.

The cause of religious revivalism received a shock last week, the *Daily News* having published some startling facts concerning Gipsy Smith, a well-known revivalist, and the money he receives from his missionary efforts. The evangelist, who is now in America, naturally resents this particular form of publicity, but the reply which he sent to the *Daily News* was gratuitously offensive, and will only damage his own interests.

Gipsy Smith is not a very important person, but the exposure will undoubtedly reduce still further the declining vogue of these emotional appeals, on which most of the clergy and the Nonconformist ministry have long since looked with suspicion, as doing little permanent good.

The Week's Books.

"Labour Policy, False and True" (Thornton Butterworth), by Sir Lynden Macassey, is a very sound and thorough examination of current problems and disputes between capital and labour. A quotation will show its scope better than any short analysis. "Against the unwarranted accusation that the British working-man in his opinions, feelings, and sentiments is at all a different person from the ordinary British citizen, I have never ceased to protest. That he often suffers from a limited outlook, reacts to prejudice, and cherishes at times a grudge against society, I am not going to deny; but I say emphatically that I have generally found the worker a human being who is open to reason, and to acceptance of a view substantially fair and just, once his ignorance is dissipated, his prejudices removed, and his humanity recognised. He has, however, no patience for humbug, rhetoric, or cant. The trouble is that he has not been treated in the past as a sentient and rational person by politicians, or even by his own trade union leaders—the main cause of our present industrial difficulties. . . . Domination speedily kills any latent spirit of co-operation; it is the poison of all industrial harmony."

"New Testament History" (Methuen), by G. W. Wade, D.D., is a scholarly and interesting exposition of the sources, the meaning, the historical authority, and the doctrine of the New Testament as seen to-day by a competent student of the Higher and Lower Criticism. To pretend that I had read it all through would be to say the thing that is not; but I have read a great deal more of it than I anticipated when I sat down for a brief glance at it. It is a book to which one returns again and again. If the doctrinal expositions are as sound as the historical learning—and the former I am wholly incompetent to judge—then it is a book that every parson, and not a few laymen, should buy.

OCELLUS.

NEWS IN BRIEF.

The estates belonging to the Archduke Joseph, situated at Kisjenoe, which are some 20,000 hectares in extent, have been confiscated by the Roumanian Treasury.

At a public meeting held at Karachi last week, resolutions were passed urging that an immediate beginning should be made on the Sukkar Barrage irrigation scheme.

The Khedivial mail steamer Borulos last week ran aground in the Red Sea near the Island of Seif el Tawil. The Mahmoudieh, of the same line, took off the passengers and cargo.

The Paris newspapers announce that 35,000 men of the Levant Army have left the Levant in accordance with the promises of General Gouraud, the French High Commissioner in Syria.

Speaking at Calcutta recently, the Pundit Motilal Nehru, of the Indian Congress Civil Disobedience Inquiry Committee, declared that non-co-operation was very much alive, and appealed to the Moderates, in view of Mr. Lloyd George's recent speech, to join the movement. He hinted at a change of tactics.

The Near and Middle East.

From Our Own Correspondents.

EGYPT.

Cairo, August 24.

The Cutting of the Khalig.

The picturesque ceremony of the cutting of the Khalig took place, as usual, last Saturday evening out at Old Cairo, where the customary Hodja putting on record that the Nile flood is complete—*i.e.*, has reached the sixteenth cubit at the Roda Nilometer—was signed in the presence of the Governor of Cairo. Although late, this year's flood is a normal one, and, thanks to the efforts of the irrigation authorities, the cotton crop has suffered very little from lack of water.

The Constitution Commission.

Considerable progress has been made during the past fortnight by the Constitution Commission, and it is confidently expected that it will have completed its report by the middle of September. Unfortunately, His Excellency Hussein Rushdi Pasha, who had to leave for Europe last May on account of his health, is still forbidden by his doctors from taking any active part in the discussions in committee, but all decisions are being communicated to him as President, and, although not present at the meetings, he is still exercising his influence over the deliberations.

The reason the work is being speeded up is that all parties now realise that it is imperative that the constitutional reforms should be introduced at the earliest possible date. It is now hoped to have the elections in December, and that the new Parliament will assemble in January.

In anticipation of the extra work which the preparation for, and supervision of, the elections will put on the shoulders of the Ministry of the Interior, an extra Under-Secretary has been appointed to relieve the present Under-Secretary, who is already overburdened with work. Incidentally, this appointment has meant the reshuffling of the provincial Mudirships, which is all to the good, for the unsatisfactory state of public security in the Provinces is entirely due to the lax manner in which certain Mudirs have been carrying out their duties. Their disappearance and the introduction of fresh blood may be expected to bring about the desired change in the state of affairs in the Provinces.

The Diocese of Egypt and the Sudan.

Mention last week of the Bishopric of Egypt reminds me that the diocese, which includes the Sudan and the Red Sea, is in reality far too big an area. Bishop Gwynne, to whose conscientiousness and indefatigability everyone pays a warm tribute, has already had to absent himself for very long periods from Cairo in order to give some attention to the southern portion of his diocese, and I find the opinion growing that some other arrangement should be made so as to render unnecessary such frequent and long absences from Egypt. It is pointed out that when Egypt and the Sudan formed part of the diocese of the Bishop in Jerusalem Khartoum had a suffragan bishop, who devoted all his attention to the Sudan, and it is suggested that the same expedient might be adopted now, so as to enable the Bishop to devote more time to his flock in Egypt than it is possible for him to do under existing conditions.

The Suspended Papers.

During the past few days *La Liberté*, the Zaghlulist organ, which was suppressed on July 30, and *Al Ahram*, the Ministerial organ, which was suspended on August 15, have reappeared. In the circumstances one cannot help the reflection that an unnecessary amount of fuss was made about what these two papers published. Certainly it is surprising that the articles in question should have been allowed to become the cause of a grave Ministerial crisis at this important juncture in the history of the country, and it is sincerely to be hoped that all parties concerned will have learnt their lesson from the narrow escape which they have had from what would have been nothing short of a national disaster.

The Recent Outrages.

The inquiries into the recent murders continue, and the new Department has already found two men—students—who attempted the life of Mohamed Bedr Ed-Dine Bey, Director-General of Public Security, on two occasions last winter. Bedr Ed-Dine Bey has definitely identified them, and they will be brought before a Military Court very shortly. It is believed that one of the men implicated in the attempt on Colonel Pigott has also been found. He is a chauffeur in Alexandria, whom the eyewitnesses identified from a photograph from among a group of chauffeurs. He has, however, put in an alibi, and the authorities are now busy to disprove it.

As regards the seven other Egyptians who were arrested last week after the promulgation of the sentence of the Wafd, the large number of documents found in their houses is being examined in order to establish the exact charges which are to be preferred against them.

Mr. Brown, the victim of the last attempt, is making steady progress, as also are his children and his maid; but although numerous arrests have been made, the authorities have not yet succeeded in definitely bringing the deed home to anyone.

When Mr. Brown entered hospital and reported the attempt to the police, he complained very bitterly of the manner in which he had been treated at the Giza Caracol, where, he stated, much time had been lost in drawing up the procès-verbal, and he was prevented from going to hospital.

The Department of Public Security has issued a *communiqué* stating that the inquiry which it has opened does not confirm the remarks attributed to Mr. Brown. According to this statement, the Giza Caracol, immediately it was advised of the attack, took all the usual steps, including telephonic advice to the A.I.P.A. to send out an ambulance. The details given in the *communiqué* show that the ambulance left the A.I.P.A. headquarters within ten minutes, and Mr. Brown and his family left Giza Mudiria in a car within fifteen minutes of the receipt by the Mudiria of the news of the outrage, and that no procès-verbal was drawn up before Mr. Brown reached hospital.

I understand that Mr. Brown maintains his accusations, and controverts the statement made in the official *communiqué*, but as so far he has not made any written statement it is not possible to say exactly in what respect there is any discrepancy between the official account and his own. One point, however, requires looking into. The official *communiqué* states that no commissioned officer was on duty at the Caracol. This is obviously a very serious omission, and should be immediately remedied. At no time should a Caracol, particularly in a quarter where, as at Giza, there is a large European and Christian population, be left in charge of an ordinary policeman or soldier.

Digitized by Google

and this admission on the part of the authorities certainly weakens the contradiction which they make of Mr. Brown's statement.

Port Said, August 22.

Italian ships have been well represented here the last week. Yesterday the Italian ship Amerigo Vespucci, used for training cadets for the Italian Navy, left port after a few days' stay. She is rigged as a three-masted barque, but had auxiliary engines as well, and ought to make a good training instrument for young seamen, as proper square-rigged sailing vessels are getting rarer and rarer. Another Italian ship, the Re d' Italia, passed through on her way to Massawa. On board her was the Duke of Abruzzi, who landed here for a short time, and bestowed a decoration on a much wounded veteran of the war.

The Emperor of Annam came through on the Messageries Maritimes s.s. Anjers. He landed for a short time, and had lunch at the Casino Palace Hotel before re-embarking. H.M.S. Tribune is the only British man-of-war at present in port, H.M.S. Concord having left. The Glengyle, a motor ship, has just been towed through the Canal from the south, having damaged her steering gear in the Red Sea.

ROUMANIA.

Bucharest, August 23.

Parliament.

At the Ministers' Council, to be held at Sinaia to-morrow, the main discussion will be the question of opening Parliament for another short session before the usual autumn one of November 15, in order to pass a few very urgent Bills that cannot be postponed any longer. Among these is—besides the ratification of certain changes effected in the Treasury Bonds Consolidation Bill—a Project of Law to improve the State Employees' pecuniary status, which of late, owing to the continuous increase in the cost of living, has become intolerable. Large numbers of State officials, mostly the efficient ones, have already resigned to take up more remunerative posts in private undertakings, and during the last few months the various State Employees' Unions have held several meetings (hitherto a very unusual occurrence in this country) for the purpose of demanding an immediate increase of pay in keeping with the present high cost of living; lately they have even threatened a general strike should their claims remain unheeded. To quieten the turbulent spirits the Minister of Finance has now issued a circular to the various administrative departments announcing that additional allowances will be granted from next month onwards, pending the passing by Parliament of a Bill to introduce in the next Budget an increase of State officials' wages. As, however, it is generally known that the present Cabinet, in conformity with its programme, is determined to keep down as much as possible the expenditure side of the Budget, rumours are abroad that the Government will have to reduce the number of officials, in order to be able to increase the salaries of those who will be retained.

The Marienbad Conference.

In connection with the object aimed at by the Little Entente in convening a conference at Marienbad, to be held on August 26, the Government Press gives the following explanation: "The main object is to tighten as much as possible the bonds which unite the four allied States and to give their foreign policy a stronger form of unity, and, further, to assist the great Allied Powers in maintaining a unanimity of views on all the important problems of the day."

The official Press does not think it likely that the representatives of the four States will examine at Marienbad the question of enlarging the Little Entente, inasmuch as the political situation in the Near East has not undergone any change since the last meeting at Belgrade. Roumania will most probably be represented at the Marienbad Conference by M. Duca, the Minister for Foreign Affairs.

Fire at the Railway Workshops.

A terrible fire broke out last Friday towards midnight at the main railway repair shops near the Gare du Nord of Bucharest. Owing to the prevailing wind, coupled with an inadequate supply of water, the flames, which started at the timber depôt, spread very quickly to the neighbouring depôts of inflammable materials, and then to the workshops. The whole area became a mass of flames. The heat produced by the conflagration was so great that the fire brigades, which rushed from all quarters of the town, had to keep at a certain distance, and, therefore, were unable to grapple successfully with the flames. A large number of trucks, machinery, tools, and all sorts of materials fell an easy prey to the flames, so that the damage is estimated at several hundred million lei. The railway administration, however, will not sustain any pecuniary loss, as the premises, as well as the entire material, were sufficiently covered by insurance.

These workshops, which gave work to about 3,000 workmen, were fitted up for building and repairing passenger coaches and goods trucks. The reconstruction of these workshops will take at least four months. The authorities are now making enquiries to find out whether the fire was due to neglect or incendiarism.

The general manager of the railways, who has just returned from a general inspection of all railway repair shops throughout the country, on being interviewed soon after the fire, stated that, although this fire has done considerable damage, he still hopes within four or five months to bring the railway traffic to a normal condition. He bases his hopes on the fact that within this time the total number of defective trucks, numbering about 30,000, will be completely repaired, and that in about two months' time 1,750 locomotives will be available.

BULGARIA.

Sofia, August 30.

A Diplomatic Note.

A great sensation has been caused by the Note which the Diplomatic Corps sent to the Prime Minister last week. The Note, which is signed by Señor José de Romero Dusmet, Spanish

Minister and *doyen* of the corps, reads as follows:—

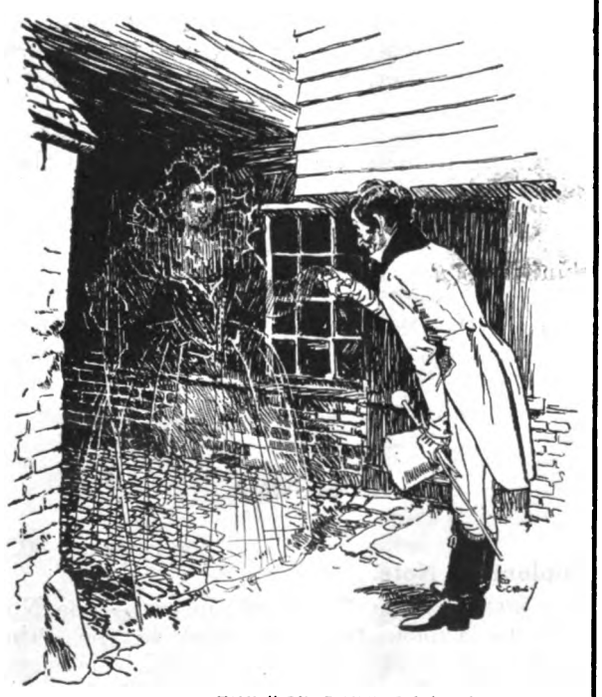
"Your Excellency,—For several months the members of the Diplomatic Corps at Sofia have noted with regret that relations between the Bulgarian Government and the representatives of the foreign Governments at Sofia have entered on a new phase. They have been often received by a new Minister, who was naturally ignorant of current affairs, and who, therefore, could not give a satisfactory answer to the questions put to him. Since six weeks the situation has, however, become worse. Although your Excellency has not gone far away from Sofia, he has not even once thought it his duty to make the short journey between Tchamkoria and the capital to meet the Diplomatic Corps. And this in spite of the fact that important matters closely connected with Bulgaria were taking place.

"One is thus forced to ask if a lack of courtesy, contrary to all diplomatic habits and harmful to the daily work of the legations, is the result of a premeditated desire to suspend normal relations with the representatives of the Powers, or is simply the result of a situation which does not make it desirable for the President of the Cabinet to return to Sofia.

"The continuance of the present situation being seriously injurious to the interests with which the Diplomatic Corps in Bulgaria are charged, I have been asked by the Diplomatic Corps to express to your Excellency the surprise that they feel at such a new attitude, and to ask you on what date you expect to resume the normal relations to which they have been always and everywhere accustomed.—I have the honour, etc."

The above Note was handed to the Bulgarian Government four days ago, but as M. Stambolisky was at that time on a motor-car trip in Northern Bulgaria, the answer is not yet forthcoming.

Born 1820———Still going Strong!



HISTORICA SPIRIT SERIES NO 10.

THE "GEORGE," Colnbrook. Another famous coaching Inn of the Bath Road, famous as the resting place of Queen Elizabeth on her way from Woodstock to Hampton Court.

Johnnie Walker: "I bow to the Good Queen Bess, Queen of the Golden Age."

Shade of Queen Elizabeth: "Your age is also golden, JOHNNIE WALKER. Like me, you are an historical spirit."

JOHN WALKER & SONS, LTD., Scotch Whisky Distillers, Kilmarnock, Scotland.

The remarks that can be made at this period are, therefore, few. It is understood that the diplomatists have for long complained that the Secretary-General of the Foreign Office, M. Dobreff, was invested with insufficient powers. He could not come to a decision without referring to the Minister of Foreign Affairs, M. Stambolisky. The latter has been absent from Sofia a great deal, and his successor has never remained in office for more than a few days. This situation naturally rendered the daily transaction of business almost impossible.

As regards M. Stambolisky's absence, the Prime Minister is known to suffer from lung trouble, and it is on the advice of his doctor that he has spent the last six weeks at Tchamkoria. In addition, it is well to remark that this is the first holiday the Prime Minister has taken since assuming power nearly three years ago.

Extreme resentment, and even anger, is felt in Bulgarian circles at the tone of the Diplomatic Note, special exception being taken to the suggestion that the absence is "the result of a situation which does not render it desirable for the President of the Cabinet to return to Sofia." In Bulgarian eyes this is tantamount to accusing the Prime Minister of fearing to return to Sofia on account of political assassination. If Bulgarian eyes have read this passage of the Note aright, then the Diplomatic Corps would surely seem to have made an error.

The accusation that M. Stambolisky is afraid to return to Sofia is not new, the Opposition parties having often taunted the Prime Minister with the same. But if the Diplomatic Corps regard his absence in the same light, then the Prime Minister will surely be right if he replies that the foreigners are once more making common ground with the bourgeois.

Bulgarian Emigrants.

There existed before the war groups of Bulgarians, called *Bachtshcrandji*, who each year went to Russia, Hungary, and Roumania. These groups were organised, with their own leaders, cashier, and other officials. Their purpose was not to kill and rob, like the *Komitadji*, but to sell their wares. The latter consisted of vegetables, meat, and other produce. In Hungary and Russia they often settled and founded their own market gardens, but in Roumania they returned after they had sold what they had brought.

Since the war Russia has been shut to these *Bachtshcrandji*, whilst, owing to the peace treaties, Hungary is difficult to reach. With Roumania, however, the trade has begun once more. Well over a thousand Bulgarians have crossed into Roumania this summer, and will not return until next spring. Apart from the persons who sell vegetables, many gardeners have also gone. Bulgaria is, of course, renowned for her gardeners, who may be found scattered all over Europe and even America.

There is probably no better gardener than the Bulgarian, because, besides possessing a great knowledge of flowers and fruit, he is an indefatigable worker.

These peaceful incursions of *Bachtshcrandji* into the surrounding countries are to be encouraged, as they do not provoke ill-feeling: on the contrary, they enable better relations to be established between Balkan countries.

Imaginary Interviews.

Since M. Stambolisky has been at Tchamkoria he is supposed to have accorded interviews to several foreign politicians and journalists. Accounts of these interviews have appeared in the Press.

Digitized by Google

One and all are fictitious, and the official Press Bureau issued yesterday a statement on the matter. The Bureau declared that the publication of these imaginary interviews, besides doing harm in Bulgaria, could not fail to have a bad influence abroad.

TURKEY.

Constantinople, August 27.

Kemalist Policy.

Generally speaking, the comments of the Anatolian Press in regard to the forthcoming conference have been pessimistic, and there is, as usual, a tendency to assume that the Allies have lost what was known during the war as the "initiative." There is talk of "leaning on our bayonets as calm spectators" whilst the perturbed and discomfited Allies endeavour to find an alternative to surrendering to the victorious and valiant Kemalist army. The *Hakimet-i-Millie*, which is the official organ of Mustafa Kemal's party, recently stated, for instance, that "It must not be supposed that conferences will lead to a solution. The solution is at the point of our bayonets!" In short, there is a great deal too much talk about "bayonets" and "valiant soldiers" to permit a belief in the possibility of a moderately reasonable attitude on the part of the Angora Government when it comes to the discussion of "particular points." In a subsequent article, the same paper, after expressing satisfaction at Italy's renunciation of the "zone of influence" in Anatolia, added :—

> "At the same time, in spite of these favourable conditions, we should not forget that at the side of the representatives of these two States (France and Italy) there will be those of the British Government, of Mr. Lloyd George, who is more powerful than they are as regards the settlement of the Near Eastern question."

The Capitulations.

Both the Kemalist Press and Kemalist politicians in their public utterances continue to avoid the subject of the Capitulations, which, in comparison with other points, is of supreme importance for all foreigners in Turkey. Like the Committee of Union and Progress, the Young Turks of Angora have staked their all upon the achievement of "independence," which, as has been pointed out on more than one occasion in these columns, means, above all, the abolition of the Capitulations both in the letter and in principle. From their reticence on the subject, the Angora Government, it is to be feared, will attempt to force the Allies to acquiesce in the unilateral abolition of those treaties proclaimed by the Unionist Government of Constantinople in August, 1914. This is in reality the most important point at issue, so far as Allied interests are concerned, and the sooner this issue is unequivocally declared the better for a clear comprehension of the question.

Anatolia and Russia.

According to an official announcement from Angora, dated August 23, Suad Bey, Under-Secretary of the Foreign Affairs Department, who has been in Tiflis for nine months, has just returned after having successfully concluded the negotiations with the signatory States of the Treaty of Kars for a series of agreements concerning railways, posts, and consular affairs.

Another message, dated August 22, states that negotiations for the conclusion of commercial and consular treaties between the Moscow and Angora Governments will shortly be begun at Angora, and that Comrade Araloff has been given the necessary authority to preside over the Russian delegation appointed for these negotiations. The First Secretary of the Russian delegation has arrived from Moscow, and rejoices in the romantic name of Rosenberg. Everything should, therefore, be *couleur de rose*, but the fire which destroyed the Bolshevik Embassy in Angora seems to have clouded the atmosphere to a certain extent, for the Bolshevik Ambassador considered it his duty to contradict the reports published by the Angora Press to the effect that the fire was caused (a) by the upsetting of a lamp, and (b) by the ignition of a tin of benzine through a lighted cigarette-end having been carelessly thrown into it. To this Comrade Araloff replied in clear print that (a) there were no lamps alight in the building when the fire broke out, and (b) no one was smoking cigarettes, and, even so, there were no tins of benzine in the building. Comrade Araloff, however, gave further proof of his gifts as a diplomatist by refraining from comment or propounding a theory of his own. This does not necessarily mean that he has no theory, but perhaps that he is reserving it for his memoirs, which he will doubtless write one fine red day.

Jemal Pasha.

It appears that Jemal Pasha's remains are to be brought to Erzerum, but in the meanwhile the Angora Government is said to have concentrated "one division" on the Caucasian frontier and to have sent a kind of ultimatum to Tiflis demanding the immediate punishment of the Dashnak assassins, or alternatively their surrender to Angora. The Bolshevik authorities are said to have arrested about 150 Armenians in connection with the affair, all belonging to the anti-Bolshevik Dashnakists. One can only say that it was very convenient for the Soviet Government to have got rid of a thorn in the flesh like Jemal, and at the same time to be provided with an excuse for eliminating other thorns in the shape of political antagonists within.

The War in Asia Minor.

At the moment of writing, reports of the renewal of hostilities on the Anatolian front have reached Constantinople. Although the fighting resembles the activities which usually precede a serious offensive, there would seem to be no information here on which a reliable forecast can be based. The belief that the Kemalist transport could not stand the strain of offensive operations on a large scale is prevalent here, but before this letter reaches London the significance of the military movements in question will be known.

IRAQ.

Baghdad, August 18.

The Political Situation.

Ten days ago the situation in this country appeared to be rapidly improving, and both in Baghdad and outside in the districts there were indications that all parties were beginning to settle down. In Baghdad the various Ministers were showing more confidence in themselves, and were grappling with their work, while energetic action in the more troublesome divisions had produced an impression that government did after all exist, and that there was a limit to the extent of lawlessness and disregard of orders which the Administration would allow. This week the position has undergone a complete and sudden change. The opportunity which energetic action in the Hillah division had afforded to Government of taking strong measures to enforce the payment of outstanding arrears of revenue has been allowed to pass unused. If, at the moment when the Government's prestige had been raised by the energetic action of Abdallah Beg, referred to in my last letter (THE NEAR EAST, August 24), a genuine attempt had been made to collect some of the arrears of revenue, there is little doubt that

Digitized by Google

considerable sums would have been realised; but the opportunity was allowed to slip: things are rapidly drifting back into their old state, and to-day it is improbable that any of the outstanding arrears will be collected. In the Diwaniyah and Shamiyah districts there would seem to be little likelihood that much of this year's revenue will be obtained, unless a very great change in the situation takes place. Public security in those districts is at a very low ebb, and little surprise would be felt if a big inter-tribal conflagration burst out there in the near future.

Ministers Resign.

Belief in the weakness of the Government is only intensified by the recent events in the central administration in Baghdad. On the first day of the 'Id it became known that Taufiq Beg al Khalidi, who has been doing well as Minister of the Interior, had handed his resignation to the Prime Minister for reasons not disclosed. Some days passed, and no more was heard of the matter, until suddenly it was announced that all the Cabinet, with the exception of the Prime Minister and the Minister of Wakf, had resigned, and it is said that the latter has since joined his colleagues. The resignations have not yet been accepted, and no reasons for the crisis have yet been officially announced; but it has become known that they were not unlike those which led up to the Cabinet crisis of four months ago, namely, acute disagreement between the King and the Ministers regarding constitutional procedure, as a result of the alleged interference of King Faisal in the work of the Ministers. If this is the case, it suggests that the King has failed to learn a lesson from the former crisis, and has continued to interfere with the Cabinet, especially with the Minister of the Interior, in apparent disregard of the pledge which he gave to the people at the time of his accession that he would rule as a constitutional monarch. The result is that he has produced two serious crises in four months.

What will happen next it is difficult to see. An attempt will probably be made to persuade the Ministers to reconsider their decisions and to withdraw their resignations; but it is difficult to believe that they will be willing to do so, unless the King gives them some definite guarantee that he will abide by the promises made by him at the time of his accession. Any other Cabinet would, in all probability, require a similar undertaking. If the late Cabinet does not consent to resume office, it will mean that the discussions of the proposed Anglo-Iraq treaty during the past three months will have been in vain: the new Cabinet will have to begin negotiations over again, and the country will be no farther on the road to progress than it was three months ago. In fact, it will have moved in a retrograde direction, for, if the late Cabinet can make good its contention and carries popular opinion with it, the country will have less confidence in the King than it had three months ago.

Sultan Ibn Saoud and the French.

The High Commissioner received a letter from Sultan Ibn Saoud a few days ago, in which he said that he had just seen the report issued by Reuter's Agency that he had concluded a treaty with the French. The Sultan indignantly denied that there was any truth in the report, and asked that the High Commissioner would assure King George of his sincerity and his friendship. This spontaneous denial of the report should set at rest any fears that Ibn Saoud was not acting straightforwardly towards Great Britain.

A Robbery with Violence.

Two nights ago an attempt was made by armed men to rob a Jew money-changer as he was on his way home shortly before sunset. The Jew was wounded, and an old woman who tried to give the alarm was shot and killed: in the confusion that ensued another Jew was shot in both legs. One of the robbers has been arrested, and all the stolen money recovered; but another of the robbers is still at large.

PERSIA.

Teheran, August 7.

The Northern Oil Concession.

The last fortnight has not seen any important developments in the political situation. The question of the Northern Oil Concession is still unsettled, and the Government is awaiting the Standard Oil Company's final offer, which is being forwarded by post, and will, therefore, not arrive for another week or two. The negotiations and discussions in this connection have been carried on with the utmost secrecy, and no one except those immediately concerned knows what the Government's final decision is likely to be; but the impending departure from Teheran of the Sinclair Group's representative has given rise to the belief that he has not been successful, and that the concession will be granted to the Standard Oil Company.

Financial Reform.

The Majless last week ratified the engagement of Dr. Millspaul as Director-General of Persian Finance, and approved of the terms of his contract. The Persian Minister at Washington was accordingly instructed by telegraph to make the necessary arrangements for his early departure, with his assistant advisers, whom he will appoint himself. Their number is not mentioned, but it is believed that there will be 18 in all. The Director-General's contract is for a period of five years, with the option for either party to terminate it at the end of three years; but the contract states that should Dr. Millspaul consider at the end of 18 months that he is not receiving adequate support from the Persian Government for the fulfilment of his duty, and that they are not likely to derive any further benefit from his continued stay, he may resign at the end of that time on payment of six months' salary and his passage home.

From his official title it will be gleaned that the new Director-General has executive powers, and is not merely a financial adviser, as was Mr. Armitage Smith under the defunct Anglo-Persian Agreement. The salary attached to the Director-General's post is $15,000 per annum, and a furnished house will be provided for him. He will be under the Minister of Finance and directly responsible to him, and their joint signatures are necessary on all drawings on, and disposal of, Government funds. The Director-

General will take charge of all the financial matters of the Persian Government, and the latter undertake to enter into no financial engagements or transactions without his written authority. The Government will also consult him and ask his advice before granting any concessions. One of the Director-General's first duties will be to draw up a Budget, and by making the utmost of the financial resources of the country to endeavour to balance, more or less, the exports and imports, and thus improve the present adverse economic situation. In terms of his contract, Dr. Millspaul undertakes to take no hand in political or religious matters of any kind, and to adhere to Persian law in the performance of his duties. The new Advisers will also be expected to coach and train the Persians in their service with a view to making them competent to take over their duties in the future. The engagement of these American Advisers is very favourably received in the local Press, and great hopes are expressed that their arrival, coupled with the imminent granting of the Northern Oil Concession, will open up a new era of prosperity for the country, and place its financial position once more on as sound a footing as in the days of Mr. Morgan Shuster's Treasurer-Generalship.

Bolshevist Activities.

The Bolshevists have recently, through their commercial agents, been making great efforts to get Persian goods into Russia by endeavouring to induce merchants throughout the country, and especially in Khorassan, to patronise the approaching fair at Nijni Novogorod, but, in spite of the offers of trading facilities and the promises of full security and protection, the Persian merchants are still very sceptical and chary of trusting either themselves or their merchandise in Russia, and very few have as yet nibbled at the bait. With a view, also, to a resumption of the considerable pre-war trade between south Russia and the north of Persia there has been a strong revival of anti-British propaganda during the past two or three months in Ghilan, where the Bolshevists' activities have resulted in the recall of the Governor, Vossough es-Sultaneh, who was not too well disposed towards them, and the appointment of Nayer es-Sultan, a decided Russophil. The Russians recently imported into Enzeli a sum of about 100,000 tomans in Persian 5-kran silver pieces minted in Russia, where the die has been kept since the time of Muzaffer ed-Din Shah. The Persian Government suspect these coins of containing a smaller percentage of silver than there is in the krans minted here, and as they are therefore likely to have a detrimental effect on the currency of the country, they have retained them in the Customs House at Enzeli pending investigations and assays of the coins.

M. Rothstein, it is now definitely announced, is not returning to Persia as Soviet Minister, and an unconfirmed report from Moscow in the Press states that he may replace Chicherin as Commissary for Foreign Affairs.

Internal Situation.

The internal situation remains quiet, and military operations continue against the tribes in the south-west who have lately been giving trouble. Money is again urgently needed for the payment of the troops, especially in the offensive against the Kurdish rebel Simko, which is being prepared in Azerbaijan.

Sir Philip Dawson, M.P., and Mr. P. J. Hannon, M.P., left London last week for a tour of Germany and Central European countries. They will prepare a report for the British Commonwealth Union on the political, economic, and social conditions of the various communities which they propose to visit. Their itinerary includes the leading industrial and commercial centres of Germany, Czecho-Slovakia, Hungary, Yugoslavia, Poland, Austria, and Northern Italy. They will return to London about October 8.

PRESS ON THE NEAR EAST.

"Sultan of Downing Street."

The *Morning Post*, in a leading article entitled "The Turkish Reply" (August 30), remarks that: "The Turks are as impatient as the Greeks of Mr. Lloyd George's diplomacy. The armies of King Constantine, driven by the intolerable delays of the Allies, were compelled a short time ago to threaten Constantinople. The Turks, forced by the same necessity as the Greeks, have gone a step further; instead of issuing threats, they have launched an offensive." Whatever the result of the Turks' move may be, it is clear, says the writer, that, gravely embarrassed as they are by the prolongation of the exhausting war, they have again had recourse to the arbitrament of arms.

> This offensive comes, then, as a rough interruption in the series of negotiations which have been recently taking place between the French and British Governments concerning the precise character of the invitation to a conference at Venice to the two belligerents and the Constantinople Government. It is also to be taken as the reply of the Angora Government to the cold reception offered to Fethy Bey, the Angora Minister of the Interior, during his recent visit to London, and to the last speech delivered by Mr. Lloyd George in the House of Commons on the Middle East question, in which speech, contrary to the agreement reached between the Allies last March, in Paris, the Prime Minister, in so many words, declared that Turkish sovereignty could no longer be re-established over Smyrna. That speech, which set all the Constantinian flags of Athens waving, was accepted by the Turks as a challenge. It was to them the knell of compromise, the doom of Islam, the loss of Smyrna. In their desperation they have again had recourse to the fortunes of war. What a commentary on our peacemaker and those passionate harangues which he has been delivering to disciples of John Wesley and other simple and worthy people!

The reference in the last sentence is presumably to those addresses delivered by the Prime Minister during his holiday. The article continues:—

> There is a royal way about the Prime Minister. He recalls some of the finest and some of the warmest traditions of the East. He tosses provinces about as if they were bagatelles. He offered Smyrna once to the Turks, then to the Italians, finally to the Greeks. To-morrow he may be presenting it to Herr Stinnes or M. Chicherin. The Sultan of Downing Street is caprice itself, and Anatolian peasants and Greek drachmae are paying a heavy price for his fancies. Immediately the Armistice was concluded, it was the bounden duty of this country to reach a speedy settlement in the Middle East. To the other Powers such a settlement was more or less desirable; to the British Empire it was a necessity. Yet, the Prime Minister allowed precious weeks and months to be wasted in a lukewarm encouragement of Dr. Wilson in his Castle-in-Spain enterprises, and when he did finally condescend to consider the liquidation of the Turkish Empire he tried to impose a solution which was bound inevitably to lead to war. He revived Turkish nationalism to a dangerous pitch, dangerous above all to the *Pax Britannica*; he brought about a menacing combination of militant Islam and Bolshevist Russia, which he tried to break at Genoa, but all in vain; he imposed upon Greece a burden so heavy that it led to the downfall of M. Veniselos, and may also end in the downfall of King Constantine; and, above all, he caused a fatal rift in the En-

Digitized by Google

tente, which forced France to look to Angora while England looked to Athens, and which led to such unfortunate events as the Franklin-Bouillon agreement. We do not seek at the moment to make any comment concerning the respective merits of Greek and Turk, but surely we are right in our assertion that the one supreme aim of Great Britain was peace. Yet it is peace which Mr. Lloyd George's foreign policy has primarily failed to bring.

The writer thinks that the Turk, whether living or dying, can be dangerous, especially to Great Britain. The great tragedy of the War was our failure to win the neutrality, if not the support, of the Turks. Before the War we drove them into the arms of the Germans, and after the War we have handed them over to the Bolshevists. Now, "throughout our dominion in the East we hear of mutterings, of discontent, of actual rebellion. The Turks have undoubtedly played their part in all those disturbances; yet by a resolute and clement policy we might so easily have made them our friends. But Mr. Lloyd George's policy is driving them to despair, and is at the same time making Greece bankrupt, France hostile, and his own country powerless."

Moscow and Angora.

A correspondent of the *Morning Post* writes interestingly on the subject of the Soviet Government's dealings with the Angora Turks. He says:—

> The Angora Correspondent of the Moscow *Isvestia*, in a long letter to his newspaper, reluctantly shatters all hopes and illusions cherished by Moscow as to the prominent part that was to be played by the Turkish Nationalists, and particularly by the Turkish "Communist" Party, in starting the "world-revolution." The correspondent writes:—
>
> "In the beginning of our *rapprochement* with Turkey many of us believed that the Turkish proletariat and poorer classes of the peasantry would prove the chief motive force of the awakening East, and consequently exaggerated hopes and expectations were placed on the as yet non-existent Turkish Communist Party; we wrote about the strength of the proletariat of the Turkish ports, we tried to find Bolshevism in the pro-Greek *défaitisme* of Ethem Bey. And we all know what painful disillusionment followed these enthusiastic dreams.
>
> "To-day we realise that it would be futile to expect the Turkish Communist Party not only to capture power, but even to exercise the smallest degree of influence on the policy of the Turkish Government. . . ."
>
> After the Turkish Communist Party and Enver Pasha having proved "losers," Moscow decided to back another "dark horse"—the Opposition group in the Nationalist Assembly, "consisting of about seventy members, who, while not objecting to Mustapha Kemal Pasha as supreme ruler, has opposed the Government in other matters, and even endeavoured to form a coalition with the embryo of the Communist Party, and published, in conjunction with the latter, an opposition paper entitled *Sharkyn-Sesi* (Voice of the East). But even this last hope of Soviet diplomacy failed, as "the real aspect of this group was revealed at the last elections of the Government," when "the candidate put forward by the Opposition turned out to be more Conservative and more Entento-phile than the Government Party."

The rest of the world will hardly share the regrets of Moscow, as voiced by the *Isvestia*, for the failure of Bolshevist policy, or the hope that "the coolness" may be dispelled by a reconciliation with Mustapha Kemal.

The Rutenberg Concession.

In THE NEAR EAST of August 3 was published a careful analysis of the salient terms of the Rutenberg concession, which, we have always maintained, has not in itself deserved the odium placed upon it, however ill-advised the British Government may have been in negotiating with Mr. Rutenberg alone, instead of with his "principals." The latest issue of *Palestine* now gives a fuller abstract of the terms of the concession, and the *Manchester Guardian* endorses a view consistently urged in these pages. It writes:—

> The text of the famous "Rutenberg concession" has never been published, but this week's *Palestine* has an extended summary of the terms. Had this been available at the time of the Parliamentary debate in July the task of the critics would have been even harder than it was. For though they could still have complained that the concession gives a monopoly to Mr. Rutenberg in developing the water-power of Palestine, the publication of the terms would have shown that it was a monopoly most carefully safeguarded in the interests of the inhabitants of the country and very much under the thumb of its administration in the shape of the High Commissioner. The company which is to be formed will have a busy time minding p's and q's if the High Commissioner turns crusty. At the start he has to approve of the Memorandum and Articles of Association and to see the prospectus in advance, and if any statement in it of which he disapproves is not modified to please him he can "determine the concession." When operations really begin, his figure is always in the background, if it is not at the front. The rates to be charged for water and electricity are fixed, and under certain conditions the High Commissioner can revise the rates, and over a certain percentage appropriate the profits. If the company does not carry out the stipulated works within certain times it will be fined, and in case of default he can cancel the concession. If it does not supply the amount of electric power required he can grant concessions to others. He can order the company to hand over the work of distribution to local government bodies. He can inspect its books and accounts. He can buy the undertaking outright after 37 years. He can exercise such financial and technical supervision as may, in his opinion, be necessary to ensure that it does its work properly, and if it fails to carry out any of the conditions of the concession, and, on complaint, does not put matters right within six months, he can cancel the whole business. The essential vice of a true monopoly is that it places the consumer at the mercy of the monopolist, who controls alike the quality of the article which he sells and the price which he charges for it. It will be the fault of the Palestine administration if it does not properly employ the power which it will possess to protect the interests of the inhabitants at every turn. It can control prices and profits, introduce competition if the monopolist company is inefficient, and quash the concession if the company does not make its undertakings good. It is a pity that this cold douche was not produced two months ago for the confusion of the merchants of hot air.

The Position in Iraq.

The British Government has a "bad Press" on the subject of Iraq, as recent incidents in that

Digitized by Google

country have revived in certain quarters the policy of "scuttle." *The Times*, formerly in the van in regard to that policy, however, says little to support those of its colleagues, who, like the *Daily Express*, talk of "eight millions lost in the sand," and of "the imperative need of reducing British liabilities in Iraq," or reproduce "the Foreign Office description of Mesopotamia to the Versailles Conference"—"a miserable wilderness of barren desert, alternating with vast swamps." The conclusion of *The Times* is as follows:—

> So far, evidently, there has been some serious defect in administration, and the latest events confirm this impression. Clearly we have gone to work in the wrong way, if, within a year after the accession of King Feisal, serious dissatisfaction with our rule is still manifested among the restless politicians of Baghdad. We have not yet advanced very far beyond the Turks, who, at any rate, kept the country quiet, although they paralysed all development. The time has come to ask very seriously what real benefit has been brought by our rule to the mixed and discordant local population, and what practical development of British Imperial interests can be set before the British taxpayer as a reward for the very heavy expenditure to which this country has been committed in the Middle East.

With regard to the alleged "serious dissatisfaction with our rule"—a misreading of the situation that is echoed by most of the Press—General Haddad Pasha, King Faisal's representative in this country, writes to *The Times*:—

> You will perhaps allow me to elucidate a point regarding the situation in Iraq which seems to have been misunderstood and to have led to a wrong impression being formed here.
>
> The unhappy incidents that lately occurred in Baghdad are not in any way the result of an anti-British movement, nor is the discontent which has been simmering for some time due to feelings of hostility towards this country. This dissatisfaction must be traced to the mandatory system, for which Great Britain is no more responsible than the other signatories of the Treaty of Versailles. This system, argue as you may, is profoundly distasteful to the people of Mesopotamia. It is difficult, of course, for an Englishman to see the thing with the eyes of an Arab; but to the latter the mandatory system, to say the least, does not fulfil the expectations held out to him during the war.
>
> The Arabs, however, apart from the mandate, have never evinced any wish not to co-operate with Great Britain. They would, indeed, like a treaty between the two countries, safeguarding, on the one hand, the interests of this country and the other Powers, and on the other granting Iraq those imponderable things which are bound up with the sentiment of Arab patriotism, which brought the Arabs to the side of the Allies during the war.
>
> If the views of the British and Iraq Governments have not yet been reconciled, this is due to perfectly honest difficulties of an international character. The Arabs are desirous of finding a solution which, while safeguarding Great Britain's important economic and political interests and satisfying the requirements of the League of Nations, will constitute Iraq as an independent State and give them the liberty of ordering their local administration with British expert advice.

NEAR EAST BOOKSHELF.

"COLLOQUIAL ARABIC: Shuwa Dialect, Nigeria and Lake Chad." By G. J. Lethem, M.A., LL.B. (London: The Crown Agents for the Colonies.)

This book is intended for those who wish to become acquainted with the Shuwa dialect of Arabic, as spoken in Bornu and other Sudan regions near Lake Chad; a standard that would be generally useful being adopted. Mr. Lethem explains that certain Arab communities settled in these districts and became merged in native tribes as negroids; but the term Shuwa is applied (not by themselves, but only by other natives) to those tribes alone which have settled there during the last 300 years, especially to thirty tribes that arrived about 1808. These latter have preserved in a remarkable degree the language and character of the true Arab. Their dialect, which is colloquial only, owing to the isolation and exclusiveness of some tribes, "adheres more closely to the classical language than do the dialects of some more civilised countries, e.g., Egypt and Syria." The number of words imported from the Sudanese tongues is surprisingly small; but, as Mr. Lethem adds, a number of words and an extended use of Arabic, which resulted from a conquest of Bornu in 1892, probably on the whole vulgarised the standard of the Shuwa dialect."

For those who desire to pick up the dialect without any wider knowledge of Arabic, nothing could be better than the arrangement of the book. Expense, unfortunately, prohibited the use of the Arabic character. This being so, the system of transliteration adopted is excellent. But a student who has the will and the ability to do so should, of course, study the Arabic character from the outset, especially if he is going to make use of the language in after life—whatever the dialect; for Arabic cannot be properly learned in Roman characters.

Half the book is given to a good English (Roman)-Arabic vocabulary, derived "from conversations with natives and numerous MSS." Part I. is devoted to grammar and Part II. to an excellent collection of Shuwa proverbs, riddles, and songs. Of the proverbs the following are characteristic: "Breakfast is better than catching slaves," "Rivers and kings are not to be trusted," "Grinding the teeth doesn't fill the belly," "Being known and trusted is better than (oaths on) the Kurán" (*El walaf b'l amân akbar min el Kurán*). And as to a definition of earthly bliss, we find—

> "The joys of life—porridge and soup,
> A donkey to ride, and a wife to drive it."

BOOKS RECEIVED.

"Tales of Old Sind." By C. A. Kincaid, C.V.O., I.C.S. (London: Humphrey Milford, Oxford University Press. 12s. 6d. net.)

"The Spirit of Islam." By the Rt. Hon. Syed Ameer Ali, P.C., LL.D., D.L., C.I.E. New and revised edition. With two additional chapters. (London: Christophers. 30s. net.)

The moves of units of the British Army during the Trooping Season 1922-23 will commence next month, when one squadron of the 6th Dragoon Guards, one squadron of the 7th Dragoon Guards, one squadron of the 5th Lancers, and the 1st Battalion King's Royal Rifle Corps will embark at Southampton for India, and the 1st Battalion East Yorkshire Regiment, and one squadron of the Inniskillings for Egypt. The Royal Scots Greys will move next month from Egypt to India. The return to the United Kingdom of troops from India, Egypt, and other stations abroad will begin in October.

EGYPTIAN (ARABIC) SELF-TAUGHT

PERSONAL AND GENERAL.

TO-DAY.

September 7 (New Style).
August 25 (Old Style).
Moharram 15, 1341 A.H. of the Moslem Calendar.
Elul 14, 5682 of the Jewish Calendar.

It was reported last week that M. Venizelos would very shortly be in London on a brief visit.

Sir Albert and Lady Stern have returned to London from Paris.

The Hon. Lady Lloyd will leave in October for Bombay.

Lord and Lady Sydenham are in residence at The Priory, Lamberhurst, Kent.

The Shah of Persia has arrived in Paris from Deauville, and is expected to leave shortly for Biarritz.

Major-General Sir John Stevens left Marseilles last week by the P. and O. Kaisar-i-Hind for Port Said.

The Rev. W. A. Wigram, D.D., has been nominated by the Archbishop of Canterbury to be one of his honorary chaplains.

Some 1,240 surplus officers in India have been demobilised, and 360 other officers have been warned that they may be surplus to requirements.

The Maharaja of Cooch Behar left London on August 29 to join the Kaisar-i-Hind at Marseilles, *en route* for Bombay.

Earl Winterton, Under-Secretary for India, left London last week for Bombay. He is travelling by the P. and O. s.s. Kaisar-i-Hind.

King Faisal, according to the latest information that has reached London, continues to make a satisfactory recovery after his operation for appendicitis.

Mme. Stancioff, wife of M. Dimitri Stancioff, Bulgarian Minister, returned to the Legation last week from Manor House, Bradford-on-Avon.

Lord Inchcape will probably leave London for India in the latter part of October, and is expected to arrive in India on November 3.

M. Sandro Contouma, the newly-appointed Attaché to the Greek Legation, accompanied by Mme. Contouma, arrived in London last week from Berlin.

M. Michel Gavrilovitch, Minister of the Kingdom of the Serbs, Croats, and Slovenes, has left London for Berne, on leave. During his absence M. Jevrem Taditch will act as Chargé d'Affaires.

Mr. Henry Morgenthau, formerly United States Ambassador to Constantinople, with Mrs. Morgenthau, arrived in London last Thursday from Torquay.

Mme. Elmina Nazov arrived last week at Oaklands Park, near Battle, Sussex, from Athens, and is staying with her daughter, Mme. Rangabé, the wife of the Greek Chargé d'Affaires.

M. Constantin Fotitch, First Secretary of the Legation of the Kingdom of the Serbs, Croats, and Slovenes, left London on August 29 for Belgrade, on two weeks' leave.

The engagement is announced between Captain Charles Mitford Renshaw, Indian Army, son of the late Major R. W. Renshaw, 16th Lancers, and Jeanne, youngest daughter of Mr. Harold Beauchamp, of Wellington, New Zealand.

The engagement is announced of Ronald Gordon Maclean Wilson, M.C., R.E., elder son of Major J. A. M. Wilson and Mrs. Wilson, of Dumraon, India, and Ida Sylvia Hiam, only child of Mr. and Mrs. Fred Hiam, of Burrell's Corner, Cambridge.

The marriage of Major G. Somers Clarke, of Bokaro, Bengal-Nagpur Railway, with Miss Ethel Beatrice Day, of 37, Whitehall Court, formerly of Wyforme, Newbury, will take place shortly in Bombay.

Lieut.-Colonel J. R. Marryat, R.E. (retired), has been appointed agent and general manager of the Egyptian Delta Light Railways in succession to Mr. W. C. E. Smith, who has left Egypt to join the London Board of the Railways as managing director.

The marriage of Captain R. B. E. Upton, 1st K.G.O. Gurkha Rifles, son of Mr. and Mrs. Upton, of Market Drayton, to Constance, daughter of George F. Palin, of Market Drayton, will take place, quietly, early in October.

The engagement is announced between Captain J. E. B. Barton, 57th Wilde's Rifles, F.F., I.A., eldest son of the late Rev. C. E. Barton and Mrs. Barton, and Mary Knowles Bushby, elder daughter of Mr. and Mrs. H. N. Bushby, Torpenhow, Chester.

The engagement is announced between George Hemming Spence, Indian Civil Service, only son of the late Mr. J. K. Spence, C.S.I., I.C.S., and Constance Isabel, youngest daughter of the Rev. T. N. H. and Mrs. Smith-Pearse, of Launceston, Cornwall.

The engagement is announced between Captain Edward Ellis Anson, 33/34th Cavalry, I.A., younger son of Mr. and Mrs. G. E. Anson, of Oxenholme, Westmorland, and Alice Mary (Mollie), only daughter of Mr. and Mrs. P. F. Holmes, The Knowle, Fixby, Huddersfield.

Major-General Sir George John Younghusband, Keeper of the Jewel House of the Tower of London since 1917, who is on the retired list of the Indian Army, has, with the approval of the Secretary of State for India, been granted a vacant good-service pension.

Sir Maitland Hall Park, M.A., LL.D., of Cape Town, editor-in-chief of the *Cape Times* since 1902, and formerly chief editor of the Allahabad *Pioneer*, who died on March 15, 1921, aged 59, left estate in

SCHOOL OF ORIENTAL STUDIES.
London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

THE PERSIA SOCIETY.

President: Lord Lamington, G.C.M.G., G.C.I.E.

Founded in 1911 to study all questions of common interest to Great Britain and Persia.

Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1

Digitized by Google

the United Kingdom valued at £568 (the value of the Colonial property is not stated in the grant).

The engagement is announced of George Philip Morris, Ministry of Agriculture, Egypt, youngest son of the late Rev. Charles Morris, vicar of Marston, Oxford, and Mrs. Morris, The Woodlands, Beeston, Notts, and Ethelbertha, elder daughter of the late William Brannwell Ransom, M.D., and Mrs. Ransom, The Ropewalk, Nottingham.

A marriage has been arranged between Captain Reginald Malpas Gore, of the 90th Punjabis, son of Dr. A. J. Gore, of Folkestone, and Helen Elizabeth Mary, daughter of Mr. R. J. M. Mayne, Indian Police (retired), and Mrs. Mayne, of Roslyn, Kodaikanal, S. India, and granddaughter of the late Bishop and Mrs. Caldwell.

We regret to learn as we go to press of the death from heart failure of Maharajah Sir Pratap Singh, Regent of Jodpur State, who for his loyalty to the Throne, fidelity to the interests of the Empire, and personal associations held a unique position among Indians in the affections of the British people.

A marriage has been arranged, and will shortly take place, between Major Alan David Macpherson, D.S.O., M.C., Royal Field Artillery, elder son of William C. Macpherson, C.S.I., and Mrs. Macpherson, of Blairgowrie, Perthshire, and Miss Catharine Richardson Hill, second daughter of Mr. and Mrs. Robert H. Hill, of 10, Kensington Park Gardens, London, and Hill Garden, Coupar Angus.

A marriage has been arranged, and will take place at the end of October, between Geoffrey Ross Waller, younger son of the late Robert Ross Waller, of Calcutta, and Mrs. R. R. Waller, of 35, Hereford Square, and Edith Aileen Turner, eldest daughter of the late Harry W. Turner, of the firm of Charles Turner and Son, and Mrs. Harry Turner, 11b, Oxford and Cambridge Mansions.

Sir William Marris, whose appointment as Governor of the United Provinces of Agra and Oudh is announced, has spent the whole of his official life in the service of India. Educated in New Zealand and at Christ Church, Oxford, he went to India as Assistant Magistrate, United Provinces, in 1896, and rose gradually in the service until he became Secretary to the Government of India, 1919-21. In the latter year he was appointed Governor of Assam, a position which he now leaves to be Governor of Agra and Oudh.

The Bishop of Salisbury appeals for help for the Mission of Help to India, which it is proposed to send out during the ensuing winter for work among English Churchpeople (military and civil) in India. The mission will number, it is hoped, at least twenty-four clergy and six women, and while the Indian dioceses will bear the expenses of the missioners in India, the committee at home has made itself responsible for the very heavy cost of passages, outfit, etc. To meet these expenses the committee has appealed for £6,000, contributions towards which may be sent to Mr. P. R. Wilson, care of Indian Church Aid Association, Church House, Westminster.

The Bishop in Jerusalem and Mrs. MacInnes sailed on the Victorian for Montreal on August 31. The Bishop will attend the Convention of the Episcopal Church of the United States at Portland, Oregon, to speak on the question of Christian Unity. Afterwards, at the earnest request of many bishops and clergy, he will make an extended tour through the States and Eastern Canada, visiting especially those centres that support the Jerusalem and the East Mission Fund, which provides the means for the work of the Anglican Church in the Holy Land. The Bishop will pass through England on his way to Palestine at the end of December.

APPOINTMENTS, Etc.

The King has been pleased to approve the appointment of Sir William Sinclair Marris, K.C.S.I., K.C.I.E., I.C.S., to be Governor of the United Provinces of Agra and Oudh, in succession to Sir Harcourt Butler.

The King has been pleased to give directions for the following promotion in and appointment to the Most Distinguished Order of St. Michael and St. George:—

To be Knight Grand Cross.—Sir Harold Arthur Stuart, K.C.S.I., K.C.M.G., K.C.V.O., British Representative on the Inter-Allied Plebiscite Commission in Upper Silesia.

To be Knight Commander.—Major-General Sir William Charles Giffard Heneker, K.C.B., D.S.O., Commander of the British Upper Silesian Force.

A SOLUTION FOR IRAQ.

Mesopotamia is once more proving a blessed word for those with an axe to grind in home politics, for it is possible, with adequate ignorance of the country and present conditions in it, to make recent events serve as an argument for any foolish policy. The situation is, indeed, serious enough; but few of those who use it for an attack on the British Government have taken the trouble to find out in what way Ministers are to blame. It is not correct to represent the Iraquis as hostile to the British, although, no doubt, in time this stage will be reached if the Cabinet continues to mismanage the Iraquian question, as assuredly as it has been reached in Egypt for precisely the same reason. To-day the position in Iraq resembles in one particular the position in Egypt earlier in the year. There is a complete *impasse* between the Iraq Government and the British Government over certain details of the Treaty, which both are decided is to be the instrument regulating the relations between the two countries. After a certain point in the negotiations with Egypt was reached, Lord Allenby sided with the Egyptian Government and insisted upon resigning his post, if his view was not accepted by the British Government. On the point at issue between Iraq and Great Britain the High Commissioner, Sir Percy Cox, is equally at one with the Iraquian Government, but being of a more patient disposition and realising that there is a danger confronting Iraq which Egypt is spared—that of being cast adrift by Great Britain—he has held to his post and has exerted his abilities to the utmost to bring about a settlement for Iraq. Like Lord Allenby, he has to watch the local situation growing gradually worse under the exasperating tactics of the British Government. It requires little imagination to appreciate the cynical bitterness with which Sir Percy Cox penned the introductory words of his latest Note to the Iraquian Government—that "owing to the Parliamentary recess, the British Cabinet is unable to consider the latest proposals in regard to the Treaty until early in September." The situation, he has to own, is "serious." For nine months he has been pressing the Home Government for a decision, but at the most critical stage, when the position is becoming ripe for a repetition of the 1920 revolt, with its cost to the British exchequer and its damage to Iraquian interests, nothing can be done, because British Ministers are on holiday. In Baghdad the thermometer may hover between 100° F. and 110° F. and the extremists may daily be increasing their boldness and their strength, but matters of the gravest import to the Empire, possibly involving British lives, must not be allowed to interfere with Ministers' holidays.

In the circumstances Sir Percy Cox has found himself obliged to take drastic action in Iraq, to cover up the mistakes of the British Government's policy, again following the Egyptian parallel. Commenting last week on the Palace "incident," when crowds blocked the High Commissioner's approach, and a speaker chose the moment of his arrival to raise applause by shouting, "Down with the Mandate," we suggested that Sir Percy Cox might have brought home the seriousness of the offence even more effectually to the Palace officials by abandoning his visit until such time as suitable staff arrangements could be made. Subsequent events, however, have shown that he was at the moment more concerned to allow the Baghdad extremists to fill to overflowing the cup of their misdoings rather than to instruct the King's Chamberlain in his duty. The cry, "Down with the Mandate," it so happens, enunciates in a crude way a policy which Sir Percy Cox himself supports. It is not a case of "the Mandate and the British" as against "no Mandate and no British." The issue is at best a quibble, from whichever side it is viewed. The Iraquis ask that all that is entailed in the Mandate should be embodied in a treaty; but that the word itself, which has become a rock of offence and a rallying point for anti-British intrigue, should be withdrawn. The British Government agrees that the Treaty is a practical substitute, but urges a multiplicity of arguments, concerning France, the League of Nations, and everything but Anglo-Iraquian relations, why the Mandate should not be eliminated. In the face of this *impasse*, both parties follow their natural bent—the Baghdad extremists grow more restless, and British Ministers go on holiday. The resignation of the Iraq Cabinet and the unfortunate illness of King Faisal have compelled Sir Percy Cox to take control of the situation to prevent it from becoming still more out of hand. He has ordered the arrest and removal from Baghdad of prominent extremists, the temporary suppression of political parties, the suppression of two Baghdad newspapers, and the removal of their editors. The wisdom of these measures can only be gauged by an intimate knowledge of actual conditions on the spot; however effective they may be for the moment, they offer no permanent solution of the difficulty, and it is to be hoped that the British Government will not try to find in the recent developments in Iraq an excuse for further delay in effecting a common-sense settlement of the point at issue.

Inasmuch as the word "mandate" is becoming as suspect to British ears as it is to the Iraquis, and as the British Government relies on an annual reduction of expenditure as the main, if not sole, argument in support of its policy in regard to Iraq, it would be thought that Ministers would welcome a substitute for the Mandate which would provide Great Britain with the same degree of practical control, but under less conspicuous conditions, while offering the chance of less financial responsibility. But it has to be inferred that the mere trouble entailed in cancelling by diplomatic machinery the mandatory relationship invented for the League of Nations has outweighed the degree of interest that British relations with Iraq and the future of the Middle East have for Mr. Lloyd George and his Cabinet. Even so, a workable compromise should not be far to seek. It is announced that Egypt is about to apply for admission to the League of Nations. If she is able to enter the League, there can be no valid reason why the same privilege should not be accorded to Iraq. Membership of the League is restricted to a "fully self-governing State"; the status of Iraq is presumably that of certain communities referred to in Article 22 of the Covenant, whose "existence as independent nations can be provisionally recognised subject to the rendering of administrative advice and assistance by a Mandatory until such time as they are able to stand alone." On the analogy of Persia, one of the States invited to join the League, in

Digitized by Google

spite of her dependence on outside administrative advice and assistance, Iraq may reasonably claim to have reached the requisite stage of "standing alone," when she has negotiated a treaty with her Mandatory. On her admission to the League the Mandate could be cancelled on the League's own initiative; the relationship between Iraq and Great Britain would remain as fixed by the Treaty, public opinion in Iraq would be satisfied, and the British Government would have been spared the setting of a precedent in asking to be relieved of a responsibility accepted by it at the hands of the League. Such a solution, if adopted at once, might save the situation in Iraq, as it would cut the ground from under the feet of the extremists and of outside intrigue.

DAGHESTAN: A FOCUS OF MUSSULMAN REVOLT.

BY W. E. D. ALLEN.

Recent reports regarding the activities of Enver Pasha among the tribes of Daghestan and Trans-Caspia* come at an opportune moment—when the development of politics in the Middle East is so gravely affected by the unnatural alliance between Moscow and Angora—to emphasise the fundamental issue between Russia and the Mussulmans.

The history of Bolshevist aggression in Central Asia and in the now defunct Tatar Republic of Azerbaijan is comparatively well known, but it may be useful to recall recent events in Daghestan, where in 1918 the Turko-Germans attempted to evict a "Republic of Mountaineers," which was to have given them control of Grozni and Maikop, and to have constituted a buffer between Russia and the coveted territories of Trans-Caucasia.

Daghestan was conquered by the Russians during the first half of last century, after a long series of campaigns in which the tribes under the famous Imam Shamil offered a desperate resistance. The tribes were later reduced in numbers by enforced emigration, and in the more fertile regions were replaced by Cossack settlers. When the Russian Revolution broke out in the spring of 1917, and separatist tendencies began to develop among the various national groups, the political leaders of the Mussulman tribes of Daghestan, following the example of the Tatars, Georgians, and others, called a Congress, which held its first session at Vladikavkas in May, 1917. The Congress was dominated by the wealthy bourgeoisie interested in petroleum production, chief of whom was Colonel Tapa Chermoiev, a Chechen landowner, whom the development of Grozni had made a millionaire. Chermoiev, whose interests lay with Russian capitalism, pursued a policy of co-operation with the Russian Cadets, and when, in November, 1917, the Bolshevists came into power in Petrograd, he allied himself with the South-Eastern Union, formed by Miliukov and General Alexeiev at Ekaterinodar. Disorders, however, broke out between the Cossack settlers along the Kuban and the Terek and the Cherkesses and Chechens, which tended to strain relations between Vladikavkas and Ekaterinodar, while a party among the Mountaineers led by the Mullahs and by some Tatar agitators from Baku, chief of whom was the notorious Pan-Turanian publicist Hassan Beg Aghaiev, advocated a Turkish orientation. Finally, in January, 1918, when the South-East Union had been overthrown, and the Bolshevists advancing through the Kuban, drove the levies of the Daghestan Council out of Vladikavkas and Petrovsk, Chermoiev himself became converted to Aghaiev's policy of separatism and co-operation with the Turkish army, which was then advancing into Trans-Caucasia.

In May the Turks recognised the independence of the "Republic of the Mountaineers," and Chermoiev proceeded with a Delegation to Constantinople, while the Turks, late in the summer, secured immediate touch with Temir-Khan-Shura, the capital of the Republic by the occupation of Derbend and Petrovsk. In the winter of 1918-19, Chermoiev appeared in Paris, where his claims to independence received the support of certain interested groups. Meanwhile, the leaders of the Mountaineers, who had been joined by numbers of fugitive young Turkish officers, were intriguing with the Azerbaijan Government against General Denikin. The latter occupied Shura in March, 1919. In the early autumn, however, the Daghestanli Khans and their Turkish and Tatar supporters collected levies, about 30,000 strong, including 1,000 Turkish Askers, and occupied Derbend and Petrovsk, in conjunction with Bolshevist elements from Astrakhan. Denikin at a critical moment was forced to withdraw two divisions from Central Russia to meet this attack, and was successful, after a few weeks' campaign, in subduing the Khans. In the spring of 1920, when the Denikin Government collapsed, the Bolshevists occupied Vladikavkas and Grozni, and later Baku. The Bolshevists did not, however, penetrate the difficult mountains of Daghestan, but contented themselves with securing the line of communication with the Trans-Caucasus.

In the autumn of 1920 the Mountaineers again became active, under the leadership of a certain Hajji Usun, in guerilla operations against the Bolshevists, and they renewed their raids again last autumn. The relations between the Russians and the Mountaineers have, in fact, resumed the state which existed until the fifties of last century, when, each autumn, the tribesmen habitually raided the Cossack settlements on the north and the villages of lowland Georgia on the south-east.

The immediate future is difficult to foresee. The Bolshevists could probably reconquer Daghestan by a short and vigorous campaign, but so long as the tribes maintain their insurrectionary independence they will remain a danger to the double line of Russian communication with the Trans-Caucasus, Vladikavkas-Darial-Tiflis and Vladikavkas-Petrovsk-Baku. Further, they will constitute an element susceptible to Islamic propaganda and ready to participate in the schemes of such Turkish adventurers as Enver. At the same time, the very action of suppressing the tribes can only serve to demonstrate the essentially antagonistic attitude of Moscow towards the nationalist aspiration of Mussulman peoples, and to expose the fundamental falsity of their professions of sympathy for the "oppressed races" of Islam.

* This was written before the reported death of Enver Pasha.—Ed.

JEWISH CHARMS AND CURSES.

By ESTELLE BLYTH.

(*Continued from Page* 282.)

Once in my life I have had the strange experience of seeing a Jewish ban put into effect. The story is this:—

In 1896, or 1897, the new hospital of the London Jews' Society was opened outside the city walls, on the Jaffa Road. Over the entrance gateway was placed a name-board, on which the Society's name was given as "The London Society for Promoting Christianity Amongst the Jews." The fanatical element among the Jews in Jerusalem had long been restive under the growing popularity and influence of the hospital, and they now seized upon the word "promoting," and rendered in Hebrew by a word, or words, that meant forcing or compelling Christianity upon the Jews. Around this

Digitized by Google

deliberate misinterpretation was woven a perfect tissue of lies, until the low class and fanatical Jews were ablaze with hatred and anger. The next step was the setting forth in public of a solemn ban upon the hospital.

Jerusalem, dated Nisan 27 (April 29, 1897).

GREAT WARNING!

From the great and mighty Rabbis of the Jerusalem Beth Din.

"It is well known that more than fifty years ago, in the time of the late pious Chief Rabbi of Jerusalem, Rabbi Agan (his memory be blessed), a great and mighty prohibition was proclaimed before the altar of the Lord in the old synagogue of Rabbi Johanan Ben Zakai.

"It was unanimously prohibited by the Sephardim and Ashkenazim Rabbis of that time that any son of Israel should enter within the threshold of the hospital of the enticers; and now that the enticers have built a new hospital without the city, and no one can watch those who enter therein, every man doing what is right in his sight, thus transgressing the aforesaid great and grave prohibition, which prohibition still stands good in its full strength, no Beth Din of any place can loosen or annul it;

"Therefore we, heads and leaders of the Holy Congregation of Jeshurin of the Sephardim and Ashkenazim communities, have unanimously decided to order a decree according to our writ, that it is unlawful for any Shochet to kill either beast or fowl for the use of the aforesaid hospital. Likewise it is unlawful for any Israelite to sell, provide, or permit to be sold any kosher meat to the aforesaid hospital. This prohibition applies to the sellers who sell directly or indirectly, and whosoever transgresses these our demands, if he be a shochet, whatsoever he killeth will be considered "nebela" (beast that dieth of itself), and if he be a butcher he will not be trusted to sell kosher meat to any person; and if any person buy kosher meat and supply the hospital he will be dealt with according to our laws." (Here follow the signatures of the then Chief Rabbi and of three others.)

As the people continued secretly to serve, and also to attend, the place where they received unwearied kindness, together with the most skilled medical treatment available in Jerusalem, the ban was presently made stricter, forbidding burial to any Jew who died in the hospital of the enticers. It must be remembered that at this time the hospital was the only one in Jerusalem, and for a considerable distance round about, which was entirely for the Jews, and their religious prejudices were most carefully observed; the other hospitals were general ones and far too full always to do very much for Jewish patients. The blow fell with cruel force upon the sick and poor Jews.

Matters came speedily to a head. A poor woman was dying, and her relations were told that nothing further could be done for her. They wanted to remove her that she might die at home, but nothing would persuade her to leave the hospital. She said that all her life her own people had shown her little kindness or love, but here amongst the Christians she had had nothing else. She would die in the hospital, and they could do what they liked with her body afterwards. God knew the truth of the matter, and He was her Judge, whether she did right or wrong. She died. As soon as the death became known, a crowd of angry Jews swarmed up to the hospital, quickly growing in numbers until the somewhat narrow street was filled with them. The iron gates were locked against them, and the faithful Sudanese gatekeepers were on guard within. For hours the crowd stormed and cursed and howled outside, now demanding that the body should be given to them that they might stone it and throw it to the dogs; now cursing and threatening horribly if any member of the hospital staff, man or woman, were seen passing.

Under Turkish law, foreign landed property was accounted the actual land of the owner, and therefore sacred. The matter had to be laid before the Governor, and a great deal of coming and going and "argument about it and about" ensued. The Turks said that they would be responsible for the decent burial of a woman who had died on English premises; the Jews swore that they would snatch the body on its way to burial, or, failing that would dig it up as often as it was interred. The body, which had been properly prepared for burial according to Jewish customs, was buried by the Turks, under military escort, on the slopes of that forlorn Jewish cemetery which faces the Holy City. At the Governor's request, the Mayor of Jerusalem, a Moslem, accompanied the body and was present throughout the proceedings. Numbers of Jews, cursing and occasionally throwing stones, followed the funeral party, though never coming to close quarters with it. It was said that the body was dug up that night, and flung out, naked, on the hillside. The grave was watched for some time afterwards by Turkish soldiers.

THE PALESTINE ORDER IN COUNCIL.

The Order in Council providing for the government of the mandated State of Palestine was promulgated last Friday in Jerusalem, together with an Order in Council providing for the election of the Legislative Council. The Royal Instructions to the High Commissioner, Sir Herbert Samuel, have also been published. Instruction 27 of the last document reads:—

The High Commissioner shall be guided by the statement of British policy in Palestine presented to Parliament by our Commune on July 1, 1922. While ensuring that the rights and position of other sections of the population are not prejudiced, he shall facilitate Jewish immigration under suitable conditions, and shall encourage close settlement by Jews on the land, including State lands and waste lands not required for public purposes.

The High Commissioner is specifically debarred from assenting without the previous consent of His Majesty's Government to any Ordinance relating to

(1) Immigration.

(2) Divorce.

(3) The grant of any land or money, or other donation or gratuity to himself.

(4) The currency of Palestine or the issue of bank notes.

(5) Differential duties.

(6) Any Ordinance inconsistent with Treaty or Mandate obligations.

NOTES AND NEWS.

A New Orientation.

The Reparations crisis is over for the present, for which relief we have to thank the Reparations Commission, who managed to find a formula of a satisfactory character after the Powers themselves had hopelessly failed to reach an agreement. On paper, the solution has not been actually a moratorium; in reality that is precisely what has been done under a thin camouflage. Germany is, in fact, granted a brief delay in order to have time "for the preparation and carrying out of the measures" that the Commission has put forward. These measures, it is important to note, now include, besides currency reforms and the balancing of the Budget, the reduction of Germany's foreign liabilities, given the assent of the Governments concerned, and the issue of foreign loans. In these additions will be found, in my opinion, the key to future developments. All the indications suggest that it will be no more possible for Germany to make the requisite Reparations payments in six months' or a year's time than it is to-day. At the same time, as I have pointed out, there is not a shadow of doubt of Germany's capacity to pay her debts ultimately. The only course, therefore, that will meet the situation would appear to be the funding of some portion of the debt, and that is evidently the direction in which events are pointing.

The Greco-Turkish War.

If the Reparations crisis had persisted it would not have had the whole arena to itself this week, for before the above solution was arrived at the news came that the Greco-Turkish conflict, which had been in a state of suspended animation for months, had suddenly broken out again with renewed vigour. Comment on what has been happening, or rather on the larger aspects of it, is not for me in these columns. I can only touch on it from the business man's point of view, which in the present case is rather detached. Certainly I have never known the City less disturbed over the commencement of warlike operations. The explanation of this attitude is not hard to seek. Peace in the Near East has been longed for with increasing eagerness ever since the Armistice, for it is realised very clearly, indeed, that so long as the existing conditions endure, not only can there be no real hope of a trade revival, but also that things are bound to grow gradually worse. The feeble efforts of the Powers to bring about a settlement have been watched with growing exasperation at their ineptitude, and it is small wonder in the circumstances that so far from being perturbed at developments, the business community generally should almost welcome a move which, whatever its immediate consequences, does promise to bring things to a head.

A Ruinous Conflict.

For both Greek and Turk the continuance of the conflict has been ruinous in the extreme. Greece has suffered by having to undertake a vast expenditure which she could not afford in the maintenance of a large army in Asia Minor, with serious consequences to her financial position, which are to some extent reflected in the depreciation of the exchange. Turkey has been divided into two parts, the head being literally severed from the body for a time, and with trade between the provinces and the capital at a standstill, and trade between the interior and the coast a shadow of its normal dimensions, it goes without saying that the country has sustained the greatest economic injury; recovery from this would be difficult enough if it were not superimposed on the effects of the long-drawn-out war, and, as it is, will demand help on an extensive scale from outside and the most careful organisation within, if recuperation is to take place within a reasonable period. It can only be hoped that in what we trust is the closing phase of this futile conflict every care will be taken to avoid doing more economic damage than is militarily necessary. From the reports it would appear that the Turks have this in mind, for there has so far been little fighting in the direction of the Meander valley, a fact which would suggest a desire to prevent the fruit district being overrun a second time.

America and the Near East.

The announcement last week that on account of the lack of development of important American business in the Near East, the Guaranty Trust Company of New York had transferred the business of its Constantinople branch to the Ionian Bank occasioned some surprise. The Americans showed great enterprise in entering the Near East market after the Armistice, and the activity of the various firms established there has been a very marked feature. No firms have been doing much trade in the Near East in the last year or so, and I imagine that because of the lack of old-established connections American firms have found their existence particularly barren. It would, I am sure, be very wrong, however, to interpret the action of the Guaranty Trust Company as indicating any intention on the part of the Americans to ignore the Near East. They are much too astute for that, and having discovered, as they have, the great scope for the development of business enterprise there in normal conditions, they are not likely to be backward when opportunity offers. We should rather be correct, I imagine, if we regard it as indicative of a tendency to curtail commitments until the outlook is clearer, and, according to present signs, that eventuality may not have to be awaited long.

Roumanian 1913 Loan.

Following the arrangements made for the conversion of Roumanian Treasury bills and bonds,

BANK OF ROUMANIA LIMITED

(FOUNDED 1866).

A general Banking business with Roumania is conducted, and correspondence from those having interests in that country is invited.

Digitized by Google

the announcement is made by the Roumanian Legation that the sinking fund in respect of the 4½ per cent. loan of 1913, in respect of those bonds in the possession of British subjects since August 1, 1914, upon which the coupon service has been resumed, will again shortly become operative. The loan was for £9,900,000, of which amount £1,980,000 was offered for subscription in London, the balance being offered in Germany, Belgium, Holland, and Roumania, and it was to be redeemed in forty years by half-yearly drawings at par. It is further announced that from October 1 next the service of the loan will be secured, *pari passu*, with the 4 per cent. Consolidated Loan of 1922 and other funded external loans, present or future, on the surplus of the export taxes, subject to priority of the 4 per cent. External Loan of 1922, authorised for an amount of £2,500,000.

The Roumanian Harvest.

Thanks to climatic conditions, very different from those which we have been experiencing here this summer, the Near Eastern countries as a whole are enjoying good harvests, and Roumania is in a position to export very considerable quantities of grain, a factor which, in conjunction with the rapid development of her oil production, should exert a most favourable influence on the rate of the leu. Unhappily, however, a rather serious obstacle presents itself to the development of the export trade. In their efforts to make their Budgets balance, the Near Eastern countries have resorted to heavy taxation in all directions, not always, it is to be feared, with due consideration of the probable effects of the new taxes. In Roumania's case heavy export duties have been imposed, with the result that the price which the grain will fetch will leave only a scanty profit to the producer after the taxation has been levied. And so there is no rush to export. It is a very clear case for the readjustment of the taxation, for Roumania's hope of rapid economic recovery rests on the development of her export trade.

The Shipping Outlook.

Dealing with the outlook for shipping at the annual meeting of Furness, Withy, and Co., Sir Frederick Lewis said that the situation was no better than it was a year ago, except that a good deal of progress had been made in reducing expenses. "We have to wait," he added, "for the general restoration of the trade of the world, but, in the meantime, the problem to which we have to address ourselves is to take the utmost possible advantage from such business as is being done." He went on to discuss in some detail the proposed legislation in America, and laid great stress on the point that there is no propaganda on the part of British shipowners against the United States mercantile marine. But he pointed out that just as the United States, having acquired its vessels during the war, could not be expected to scrap them at the end of the war, so Great Britain could not be expected to sacrifice the work of generations when the conflict was over. "After all," he remarked, "the existence of our pre-war mercantile marine was one of the greatest factors in securing victory for the Allies." British shipping, he continued, had all along been prepared to welcome the American mercantile marine and to proceed on the lines of friendly co-operation, "but that spirit must be reciprocated if it is to be enduring."

African and Eastern.

At the meeting of the African and Eastern Trade Corporation, the chairman, Mr. J. H. Batty, declared that 1922 would be a lean year, and said that, apart from the excess profits duty refund, he could not promise any considerable profits. This refund will amount, it is anticipated, to nearly £700,000, a sum which will help very considerably in tiding over the remaining period of abnormal conditions. Mr. Batty expressed the view that trade had reached its lowest ebb at the time when the accounts were completed, and he pointed out that since then there had been a slow but gradual improvement. It would take some time yet, he added, before the markets throughout the world recovered from the influences which overshadowed them during the past two years, but he confidently looked forward to a healthier state of things next year.

COMMENTATOR.

ROUMANIAN EXPORT REGULATIONS.

With a view to ensuring adequate supplies for internal needs, the Roumanian Minister of Industry and Commerce has recently issued further measures regarding the export of live stock. Export authorisations for horned cattle, pigs, and sheep are now accorded only to those applicants who deposit with the authorities a prescribed sum in respect of each animal which it is desired to export. This deposit is returned within a period of 30 days from the grant of the export authorisation upon production of evidence that the required quota for home consumption has been furnished. In the case of pigs, for each animal permitted to be exported one animal of equal weight and quality must be held available for home consumption.

Under a Ministerial Decision, dated July 31, bran may be exported from the country subject to the reservation of a quota of 50 per cent. for internal consumption. Oil cakes made from linseed, hempseed, rapeseed, all kinds of sunflower and mustard seed may be exported under a special authorisation provided that a similar quota is reserved for home consumption at a fixed price, and that the commission tax of 500 lei per wagon is paid. The residues remaining after extraction of the oil may be exported freely on payment of the usual export taxes.

The export taxes are fixed at the rates shown by a Royal Decree, dated July 27:—Nuts, 300 lei per 100 kilogs.; buffaloes, 1,000 lei per head; ham, 8 lei per kilog.; spiced sausages, "Salami," etc., 20 lei per kilog.

Commerce and Industry.

ROUMANIA.

Bucharest, August 17.

Revenue Returns.

According to official data just published by the Ministry of Finance, the aggregate revenue collected during the first three months of the current fiscal year (April, May, and June) amounts to 1,931,730,000 lei, against an expenditure for the same period of 785,000,000 lei.

Excessive Heat.

Tropical heat has been prevailing throughout the country during the last fortnight, as much as 42 degrees Réaumur in the shade being recorded, and there are no signs of the end of the heat wave. The southern districts of the country are suffering from the lack of rain, no slight damage being caused to the maize crop, while the autumn ploughing is being somewhat delayed.

The Rate of Exchange.

Since I wrote my last letter there has been a decline in the rate of the leu, which has gone from 420 lei for sterling to about 680. For reasons already mentioned, this movement has been received with a sigh of relief in interested circles here. Naturally the wild fluctuations of the last fortnight, when the leu moved from 200 to 300 points at a time, paralysed trade completely. Despite the heated controversy in the local Press, nobody seems to be able to arrive at the true cause of these fluctuations. Merchants and manufacturers are beginning to wish for a fixed rate of exchange, however high it might be, for it is far more preferable than fluctuations, which have turned trade into a reckless speculation in the exchange, resulting generally in heavy losses for the majority of them.

Bucharest, August 23.

Trade with Egypt.

According to the report of the Roumanian Commercial Attaché in Cairo, Roumania's exports to Egypt during the first three months of the current year—comprising oil products, timber, beans, cheese, and dried fruit—amounted to 2,497,000 gold lei, as compared with 13,643,000 gold lei for the same period in 1919. This decrease arises from the fact that Egypt has reduced its imports in order to use up the large stocks imported during the first year after the Armistice. These stocks are gradually being exhausted. During the first three months of 1922, Egypt exported to Roumania rice to the value of 11,700 gold lei, compared with 49,000 gold lei during the same period in 1919.

EGYPT.

Cairo, August 17.

Favourable Trade Balance.

The half-yearly returns of the Egyptian Customs Administration just issued show what must be regarded from the purely economic point of view as a highly satisfactory state of affairs. Imports have, it is true, fallen off by £E9,244,753, from £E30,104,275 to £E20,859,522, and re-exports from £E4,670,983 to £E1,918,457, but, on the other hand, exports have improved by £E9,250,760, from £E12,140,021 to £E21,390,781. As a consequence, there is a trade balance in favour of the country of £E2,449,716, as compared with an adverse one of £E13,293,271 at the end of June, 1921, and, although this means a contraction in Customs receipts, still, from the general point of view of the country, it is what is most wanted.

Imports.

The chief imports during the half year have been: Cheese, £E196,983; wheat and maize flour, £E897,358; rice, £E237,159; fruits, £E515,791; coffee, £E270,451; petroleum, £E377,097; oil-fuel, £E210,415; stationery, £E484,148; wood for building, £E562,425; coal, £E766,087; cement, £E103,382; household soap, £E197,133; manure, £E220,181; cotton yarn, £E207,272; cotton textiles, £E4,268,583; woollen textiles, £E436,559; silk textiles, £E444,373; manufactured iron and steel, £E964,371; tobacco, £E753,045.

The only item showing any increase of any note at all is cotton textiles, which have improved 30 per cent. in value and 50 per cent. in volume. The most important decreases in value have been wheat, which from £E1,262,000 has dwindled to practically nil; wheat and maize flour, which has diminished by over 80 per cent.; petroleum, coal, and oil-fuel, which have fallen by 50 per cent., 70 per cent., and 45 per cent. respectively. At the same time, as an illustration of how prices have dropped, the volume of all these commodities has increased considerably, the most striking instances being cereals, petroleum, mineral oils, coal, and building materials.

Exports.

Under exports, the chief items were eggs, £E359,053; rice, £E217,599—it is curious to note this appearing on both sides of the account, which is due to the fact that the Egyptian consumer prefers the Rangoon variety, but finds a very remunerative market for the locally produced rice in Syria and Asia Minor, where its superior quality is much appreciated—cotton seed, £E1,215,651; cotton seed cakes, £E336,672; onions, £E1,149,716; cotton, £E16,493,611; and cigarettes, £E364,548. Cotton was responsible for the bulk of the total rise in exports, the value increasing by £E8,072,929 and the volume expanding by 50 per cent. to 2,647,131 kantars, and onions increased by £E801,866. There was very little variation in the values of the other commodities as compared with the first half-year of 1921, but the quantities in almost every case increased considerably. The main causes of the decrease in re-exports were cereals, oil-fuels, and textiles.

United Kingdom's Share in Trade.

The United Kingdom more than held its own in regard to its share of foreign trade. Under imports, which had decreased in aggregate by over 30 per cent., it increased its share from 27 per cent. to nearly 40 per cent., while in exports,

Digitized by Google

where the total rose by 75 per cent., the United Kingdom's share remained stationary at about 50 per cent. The chief imports from the United Kingdom were: boots and shoes, £E57,000; coal, £E603,000; cotton piece goods, £E3,537,000, out of £E4,000,000 (viz., grey, £E390,000; bleached, £E1,048,000; printed, £E975,000; dyed in the piece, £E827,000; dyed in the yarn, £E295,000); woollen and worsted textiles, £E285,000; machinery, £E250,000. Under exports the United Kingdom purchased all the eggs, cotton seed, and cotton seed cake, 65 per cent. of the onions, 45 per cent. of the cotton (of which 20 per cent. went to the United States and 12 per cent. to France). Amongst other countries, the United States showed a remarkable falling off in imports from over £E7,000,000 to under £E1,000,000, due mainly to wheat and maize flour (£E2,800,000), kerosene (£E210,000 less), coal (£E1,314,000 less); while France, Italy, Japan, and Roumania all figure for slightly lower values. The only countries to increase the value of their sales to Egypt were Belgium (90 per cent.), Germany (100 per cent.), Czecho-Slovakia (150 per cent.), Austria (200 per cent.), and Syria (150 per cent.). The totals are not very large in any case, but the tendency to increase trade with this country is clear.

Under exports the main increases are recorded against France, from £E845,000 to £E2,300,000; Germany, £E503,000 to £E1,012,000; Italy, £E483,000 to £E1,173,000; and United States of America, £E1,112,000 to £E3,185,000. In almost every instance this is due to cotton.

Trade with the Sudan.

Trade between Egypt and the Sudan fell off very considerably during the six months. Imports from the Sudan dropped from £E511,241 to £E430,152, and exports from Egypt from £E1,331,199 to £E792,583. It is curious to note that there was a slight increase in the imports via Suez. Under imports into Egypt, the chief items were livestock, £E97,809, with a marked decline under sheep (21,700 head against 8,800); cereals, £E179,448, in which there were important decreases under dates and ground nuts; while under exports into the Sudan there was a material reduction in cereals (£E68,000 less), cotton piece goods (£E165,800 less), and metal and metalware (£E128,000 less); those items representing the main exports from Egypt during the period in question.

BULGARIA.

The Export Trade.

During the period from April 1 to June 30 the exports amounted to 82,071,133 tons, of the value of 810,195,296 levas (£1,012,744). The value of cereals exported amounted to 332,284,978 levas (£415,356), and of food and vegetables 251,094,123 levas (£314,867). The remaining articles exported consisted of skins, cattle, and different products.

It is specially organised for Exchange, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts.

MERCHANDISE DEPARTMENT.

The Bank undertakes the warehousing and sale of goods consigned.

PERSIA.

Teheran, August 7.

New Banks.

The Imperial Ottoman Bank, having established branches at Kermanshah and Hamadan some months ago, has now acquired a building in the Lalezar Street which they are converting into offices which they intend to open shortly. The Germans, I hear, are also making preparations for opening a bank here, and the representative of the Deutsche Orient Bank is already prospecting here in this connection. The Germans are making determined efforts to recapture their pre-war trade with this country, and have already imported quantities of German goods through Bushire. The present depreciated value of the mark, of course, enables them to place goods on the market here at prices which defy all competition, and the recent Russo-German Agreement will afford them facilities of transport through Russia as soon as that route is once more open for trade with Persia. A certain number of German goods have already arrived at Enzeli by that route, and a few travellers to and from this country are tempted to use it on account of the time saved, but it is still very uncertain, and considerable delay is probable in getting out of the Caucasus.

ALBANIA.

Tirana, August 14.

A River Navigation Company.

By the decision of the Council of Ministers, a concession is to be granted to M. Otto Fiala, acting on behalf of a Vienna company, giving the right of river navigation for one year. At the end of that period the company will present a more comprehensive plan for steam navigation along the Albanian coast and on the rivers. For the time being the company will have four motor-boats or little steamboats, ten barges, and twenty boats. The machinery and tools necessary for the construction of this little fleet will be exempted from the Customs tax on their entry into Albania.

OIL RESTRICTIONS IN ROUMANIA.

(From Our Own Correspondent.)

Bucharest, August 23.

As a result of the repeated appeals made to the State by the oil producers and refineries to change the present régime of maximum prices for oil products, a special committee of the Ministry of Industry recently invited the oil firms to draft out a list of suggestions with the object of taking the necessary measure of improvement. The oil firms have now proposed that full freedom should be allowed with regard to the refining of the crude oil and the sale of oil products at home as well as abroad, with the obligation, however, of satisfying home requirements with the necessary oil products to the extent of 30 per cent. of the total quantity of crude oil that enters the refineries. Further, they undertake to supply the State's entire requirements (delivered at the works free of taxes) at the following prices (in lei per kilogramme): Light petrol, 3; heavy petrol, 2; lamp oil, 1.75; fuel oil—motorine, 1.50; crude oil, 1.20. It is proposed that these prices, which represent practically the cost of production, should be revised twice a year by a combined commission of State and oil representatives. They further propose that all obstacles and restrictions interfering with the export of oil products should be removed.

Roumanian Consolidated Oilfields.—The following cable has been received:—"Chiciura well No. 10 made powerful flow for six hours at the rate of 480 tons per day; now cleaning."

Engineering Topics.

A New Pump Lubricator.

One of the most useful and interesting forms of pump lubricator on the market entirely dispenses with the suction valve, which has hitherto been such a fertile source of trouble with appliances of this description. Whilst this lubricator forms a standard component part with the leading manufacturers of steam wagons and traction engines, and is extremely popular with marine engineers, it can be used for all purposes where positive or forced feed lubrication is needed or advisable.

As will be gathered from the above, the pump is of the semi-valveless type, and is consequently without much of the more or less delicate and intricate mechanism which characterises certain forms of Continental pumps, and whilst its parts are simple and not liable to get out of order, any repairs or adjustments that may be necessary can easily be effected by an ordinary mechanic. Whilst there is no suction valve the delivery valve is in accordance with the most modern pump practice and is readily accessible. This valve is protected by means of a second, or auxiliary, delivery valve, which also acts as a check valve. All bearings are of ample width and wearing surface, the body of the pump is of stout cast iron, the pump barrel is of bronze, and this is fitted with a steel ram which is accurately ground to size.

Utilising Waste Heat.

Some interesting figures have recently been supplied regarding the economy which results from a scientific utilisation of the waste heat from various types of gas retorts, and at one large British gasworks two boilers of special type, working in connection with vertical retorts, are giving exceptionally good results. The larger is evaporating 750 lb. of water, supplied at 60 degrees Fahr., into steam at 100 lb. pressure to the square inch, per hour, whilst the smaller is raising 11,000 lb. of steam at 100 lb. pressure per 24-hour day. Figues of this kind are illuminating, especially when one notes that the results are by no means exceptional, but that at another gasworks two of these boilers, working in conjunction with retorts of a somewhat different type, are yielding equally striking outputs. One of these, 5 ft. in diameter and 18 ft. 6 in. in length, is producing 2,500 lb. of steam per hour, this representing an annual saving of about 1,000 tons of coal. In another part of the country a waste-heat utilisation boiler has been fitted to some vertical retorts, and in a four-hour test it generated nearly 24,000 lb. of steam, from which one gathers that it represents a saving of no fewer than 2,380 tons of coal per annum.

Wireless Supplies.

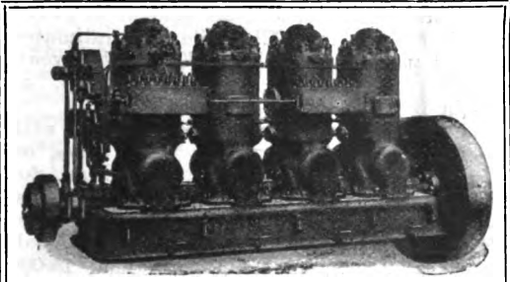
Very keen interest is being taken on every hand in wireless telephony at the present time, and in every part of the Near East a ready market should be found for supplies of various kinds. It is interesting to note that one or two of the larger British electrical engineering firms are making arrangements and laying down special machinery to turn out various parts cheaply and on quantity production lines. Amongst the many supplies and accessories which will shortly be available may be mentioned telephone headdress or ear-cap receivers, casings, sockets, knobs, terminals, and other light metal parts. A number of firms are also turning their attention to designing and making various articles of furniture, such as sideboards, tables and dressers, which incorporate an aerial, and are provided with a loud-speaking reproducer of the hornless type.

Hydro-Electric Development in India.

Sir Ganga Ram, C.I.E., M.V.O., who is at present in this country, has placed an important order with Vickers, Limited, for water turbines and electrical plant, in connection with the development of power from a low-head fall on the Bari Doab Canal in the Punjab. The head which will be utilised is only six feet, and the total power obtained will be 1,925 h.p. The energy will be transmitted to various pumping stations, where irrigation water will be raised, thereby enabling larger areas of good land to be cultivated. The extreme low head makes the proposition an exceedingly interesting one from a hydraulic point of view, and it is pleasing to note that British manufacturers are now in a position to carry out such projects.

OPENING FOR PUMPS IN ARABIA.

A large potential market for pumps exists in Arabia (says an American Consular report). The greater part of the country is desert or arid, although parts of south-western Arabia are well watered. The need for pumps exists in all sections, however. In many cases the wells are over 100 ft. deep in the drier areas, but because of the difficulty of construction with primitive methods it is not often that depths of over 125 ft. are attained. The most general method of drawing water is by a leather bucket and rope, without windlass or other assistance, except in some cases when a camel is harnessed to the bucket rope. In southern Arabia, particularly in the Hadramaut district, a growing interest is being displayed in water-pumping machinery. This district is well watered and fertile in parts, but is cut off from the coast by a desert.



Power at Minimum Cost.
The extreme simplicity of the "Allen" Heavy Fuel Oil Engine renders it particularly suitable for placing in the hands of native or other unskilled attendants without any sacrifice of efficiency.
It is easy to start and runs unattended for long periods.

THE 'ALLEN' HEAVY FUEL OIL ENGINE

From 15 BHP to 200 BHP.

Near East Markets.

LONDON PRODUCE REPORT.

Oil Cakes Lower.

(*From Our Own Correspondent.*)

LONDON, Monday Evening.

Sugar.—Home refined has continued in good request at unchanged rates. Tate's cubes and mineral water sugar are both 3d. lower at 58s. 9d. and 51s. 6d. respectively. London granulated has shed 3d. at 51s., while Lyle's granulated is 3d. down at 50s. 9d. Foreign descriptions have been dull. West Indian crystallised is 1s. lower at 43s. 6d., and white Mauritius is unchanged at 47s. 6d. White sugar quotations are:—October 21s. 4½d., November 21s. 4½d., December 21s. 6d., October-December 21s. 6d.

Coffee.—There has been practically no change in the market position. East Indian has firmed up to 116s., a rise of 4s., while Costa Rica is unchanged at 110s. Nairobi is steady at 100s. The futures market has been fairly firm. Quotations:—September 58s. 9d., December 60s., March 59s. 4½d., May 59s. 4½d.

Desiccated Coconut.—A weak tone has prevailed, and some business has been done below ruling quotations.

Rice.—A brisker demand has been in evidence, and prices show a tendency to firm up somewhat.

Green Fruit.—During the week two shipments of oranges arrived from South Africa, and prices have eased slightly in consequence, as the demand for this fruit is naturally rather slack at this period of the year. The fruit, it may be added, was of excellent quality. The market for lemons continues to be animated, and as arrivals are on a small scale prices are well maintained. Naples fruits are again harder. There is no change in the market for Valencia onions, which continues lifeless.

Oilseeds.—The tone of the market has slightly improved. Indian linseed has gained 9d. at 19s., while La Plata is 1s. 3d. up at 18s. 6d. Rape seed has been dull, with prices again lower. Toria has been done at 18s., a decline of 3d., while bold Ferozepore is 16s. 6d. Cotton seed has been variable, with Egyptian black 6d. up at 10s. 6d., Sakellarides 1½d. lower at 9s. 9d., and Indian 6d. down at 8s. 3d.

Oils.—Prices are again lower. Linseed oil has shed 1s. 6d. at 34s. 6d. Crude rape oil is unchanged at 42s., but refined is 1s. up at 44s. Cotton oil has been dull, with Egyptian crude 4s. lower at 34s. and technical 2s. down at 39s. The refined variety is unchanged at 45s., while deodorised is 1s. lower at 50s.

Oil Cakes.—The market has been unsteady. Cotton-seed cake is 30s. down at 160s., while coconut cake at 190s. is 20s. lower. Cotton-meal cake has shed 20s. at 280s., while linseed cake is a similar amount down at 260s.

ROUMANIAN GRAIN CROP ESTIMATES.

(*From Our Own Correspondent.*)

Bucharest, August 23.

In my last letter I gave the wheat crop estimates. The information is now available that the approximate surplus for export of the other cereals is estimated as follows (in tons): Barley, 1,200,000; oats, 500,000; maize, 1,300,000.

Owing to the instability of the rate of exchange, the grain export trade is at the present moment exceptionally slack, which is quite an unusual feature at this time of the year. There is every likelihood that the export campaign will suffer a delay pending the stabilisation of the currency round a rate which will induce growers to part with their produce.

After a protracted period of tropical heat and drought, the clerk of the weather has at last deigned to gratify the country with heavy and general rain, which lasted about twelve hours, and which has greatly benefited the autumn ploughing, besides rendering the atmosphere more bearable.

ADEN WAX MARKET.

The wax market of Aden is of special interest to importers in the United Kingdom, which is the principal destination of the wax shipped from this port (says the Chamber of Commerce *Journal*). After two years of inactivity the market is again active under the stimulus of a brisk demand from Europe. The largest quantities of the best wax come from the Shankalla district of Abyssinia. The Arabian wax, which comes from Yemen, is inferior in quality and usually adulterated with a certain kind of fat to increase its weight. The Abyssinian wax comes in hard chunks and is usually pure. Imports of wax into Aden amounted to 1,593 cwt. in 1913-14, 3,890 cwt. in 1919-20, and 278 cwt. in 1920-21. Exports during the same periods totalled 1,462 cwt., 4,089 cwt., and 335 cwt. respectively.

SMYRNA SULTANA MARKET.

A Difficult Position.

Messrs. C. J. Giraud and Co., Smyrna, have issued the following report on the sultana market, dated August :—

The position of the sultana market is a very difficult one at present, and no opening in preceding years has witnessed similar conditions existing. Shippers have for weeks past impressed on native dealers that the demand from foreign consuming markets was lifeless, and that prices were continually declining under pressure of offers from speculative Smyrna shippers, without, however, much business resulting. Buyers abroad showed great indifference, and it was daily becoming clearer that, apart from some limited business taken up by above speculators, on a Gaq basis of quality, the volume of general business and extent of orders on shippers' hands was smaller than for many years past. Native dealers, on the other hand, while recognising the existing situation and fully appreciating its bearings, and the necessity of getting prices on to bedrock level as early in the season as possible, cannot get the farmers to share this view. All the early purchases made by dealers upcountry or received on consignment from their agents have been with difficulty realised at a very severe loss. The local Press has also initiated a campaign against shippers who are reported to have beared fruit by early forward sales of Gaq at low prices, and is warning farmers not to sacrifice their produce, but to retail such small portion from time to time as necessitated by their urgent financial wants.

The increase in supplies, as shown by our weekly reports, compared with last season, is mainly due to the earlier maturing and drying of the grapes, especially in the immediate neighbourhood of Smyrna; but it is undoubted that arrivals would have been much heavier if farmers had not set their faces against the present low level of values, rendering it impossible for dealers to buy fruit off them except with the certainty of losing money on the sale. The struggle between the farmers and the dealers will probably continue for some little time yet; but although it is almost certain that the farmer will have to give way in the end, the whole situation has been dislocated for the time being, the normal flow of supplies to market has been suspended, and shippers are nonplussed in their policy, being faced with extremely low offers from their buyers abroad and the obstinate front of native farmers who will not part with their produce at what they consider an entirely unremunerative level of price.

As an instance of how things are going, yesterday being market day in all the leading centres of production, only fifty-four bags of sultanas—say about seven tons—are reported to have been bought by Smyrna dealers from farmers. Prospects point to a very irregular and unsettled market over the next week or two, with wide variations in prices from day to day. If shippers persist in their reserve, the market must decline to a level which will eventually enlist confidence and stimulate activity, but any sudden rush to buy on the part of shippers, with farmers in their present frame of mind, will inevitably give the latter fresh backbone and influence them still further in their attitude of resistance to lower prices.

ASIA MINOR FRUIT REPORT.

Messrs. C. J. Giraud and Co., Smyrna, report as follows for the week ended August 19:—

Sultanas.—The total estimated arrivals amount to 14,095 bags, as against 4,170 bags for 1921. The total estimated sales are 9,095 bags, as compared with 3,670 bags last year, while the estimated stock unsold totals 5,000 bags, as against 500 bags in 1921.

Shipments.—The following steamers are loading with sultanas:—S.s. Ionier, for Antwerp, has 7,866 boxes on board, and is sailing on August 19. S.s. Mardinian, for London, is loading and sailing on August 23; and s.s. Esneh, for Liverpool, is also loading and sailing on August 22. Of the shipments making for London and Liverpool, estimated at about 25,000 b/s for each port, some 15,000 b/s apply against orders received for account of the C.W.S. of Manchester and other buyers at open prices.

Markets.—Prices for sultanas have slowly weakened, and dealers have been more disposed to make concessions to encourage business. Towards the latter end of the week market recorded considerable activity, some 900 tons having been sold in all, and prices have steadied at 55s. to 75s. f.o.b., according to quality. No fine growths have as yet come forward, supplies consisting mainly of medium to choice quality. Orders are coming in from several Continental markets, and indications point to more activity before long. Exchange for sterling steady at 725/730.

DRIED FRUIT REPORT.

Messrs. J. C. Houghton and Co., of Liverpool, in their monthly report, state:—

Currants.—The past month has proved no exception to the general experience of August; in fact, if anything, the slackness of trade has been more pronounced than usual. It sometimes happens that an occasional spurt takes place owing to crop news or other reasons, but even a little flutter of this kind has been denied to us. Probably the financial stringency is a contributory cause. The market has kept wonderfully firm with no undue pressure to sell, though here and there slight concessions in price were made to ensure progress. Sales of g.a.s.d. new Pyrgos qr. cases September shipment were made at 49s. to 52s. c.i.f., but on receipt of reports that the Greek Government had agreed to the proposals of the growers for the retention of 35 per cent. of 1922 crop, shippers advanced their quotations to 56s. c.i.f. for new crop Pyrgos. This had a stimulating effect on spot stocks, but so far has not assisted the demand. Quotations:—Pyrgos, 51s.; Amalias, 52s.-53s.; Patras, 54s.-56s.; Zante, 53s.-56s.; Gulf, 53s.-54s.; Panariti, 55s.-58s.; Vostizza, 55s.-62s. Steamers are loading new fruit in Greece, but owing to lack of cargo they are not likely to leave for some time.

Valencia Raisins.—Offers of new crop have come to hand 60s. to 61s. c.i.f. for September shipment for fair average, but no sales are reported. The first supplies are expected to leave 5th inst.

Cape Raisins continue to sell at 60s. to 62s., and show good value against 60s. c.i.f. for Valencias.

Sultanas.—The market continues to suffer from the absence of demand for immediate consumption, and renewed depreciation in values is the consequence, accentuated by lower quotations from Smyrna for new crop. Good average quality for September shipment was sold at 53s. 6d. c.i.f., but since then a sharp recovery set in and now 62s. c.i.f. is asked. The small remaining spot stocks are being cleared at big reductions. Sales are:—Cleaned 80s. Sulphured varieties 85s.-95s. Afghans offering, Reds 65s., Yellow 70s. to 80s., without attracting buyers. Californian 95s. to 100s. Australian 3 crowns grade 106s. Cape raisins, sun dried quoted 65s., sulphured 75s., but no business passing. First arrival of new Smyrna came to hand per Assyrian, about 1,700 boxes quality and condition being very good for so early a shipment. Sales made comprise ordinary 95s. to 97s. 6d. Sulphured variety 100s., and one parcel of fine 102s. 6d. The next steamer, Esneh, is due about 5th inst.

Figs.—No trade is passing in the small stocks of bags on hand. New naturals for shipment are quoted at 2[illegible]s. c.i.f. for good average, 33s. c.i.f. for genuine.

MACEDONIAN SKIN MARKET.

Greek Macedonia during the year 1921 produced 250,000 lambskins and 70,000 kid skins (says an American Consular report). To these quantities is to be added the production of Thrace, which amounted to 35,000 lambskins and a small quantity of kid skins, which were brought into Salonika for export to foreign countries. This market also received approximately 50,000 lambskins and 60,000 kid skins from Southern Serbia. Stocks still remaining unsold out of the 1921 production of Macedonia amount to 50,000 lambskins and 15,000 kid skins.

Prices for these skins vary according to their origin. Lambskins from Greek Macedonia always sell at higher prices than from any other source except those from Serbia, which have a low percentage of black skins and are invariably sold at more favourable prices in Italy. These skins generally contain about 15 to 20 per cent. black skins, while those of other regions of Macedonia have 50 to 60 per cent. Kid skins from Southern Serbia, called in the local trade "northern skins," are finer in quality and are strongly sought by American and German tanners. Kid skins produced in Greek Macedonia are inferior in quality.

During the present season the Macedonian production has been approximately 400,000 lambskins and 200,000 kid skins. A small quantity of the Thracian production, 100,000 lambskins and 50,000 kid skins, reached here also. The skin market has been replenished with about 70,000 lambskins and 50,000 kid skins from Southern Serbia and 30,000 and 10,000 lamb and kid skins, respectively, from Old Greece. Prices are high, even though no brisk demand exists.

The directors of the Bank of Athens announce an interim dividend for the current year of drachmas 5 on the ordinary shares, free of all Greek taxes, payable at the current rate of exchange on September 7. After the distribution there will remain a balance of drachmas 9.528,867 to the credit of profit and loss, which the directors have decided to carry forward to the second half of the year.

CURRENT PRICES.

General Produce.—Bacon (Continental), 146s. per cwt.; (Canadian), 134s. cwt.; (American), 120s. cwt.; butter (Danish), 219s. cwt.; (Australian), 225s. cwt.; (New Zealand), 214s. cwt.; cheese (Canadian), 87s. cwt.; (New Zealand), 87s. cwt.; lard, 73s. cwt.; eggs (Danish), 18s. per 120; (Styrian), 11s. 9d. per 120; chillies, 130s. cwt.; cloves (Zanzibar), 1s. 3d. lb.; cocoa (Ceylon good to fine), 85s. cwt.; coffee (Costa Rica), 117s. 6d. cwt.; (East Indian), 115s. cwt.; (Central American), 95s. cwt.; (Jamaica), 72s. 6d. cwt.; (Mocha Longberry), 100s. cwt.; (Santos superior), 69s. cwt.; (Nairobi), 101s. cwt.; ginger (washed Cochin), 52s. 6d. cwt.; nutmegs (110's to 80's), 1s. lb.; pepper (Singapore black), 4d. lb.; (Muntok white), 7½d. lb.; pimento, 2d. lb.; raisins (Cape), 45s. cwt.; currants (Vostizza), 63s. 6d. cwt.; currants (Amalias), 53s. cwt.; sultanas (Smyrna), 90s. cwt.; sugar (Tate's cubes), 58s. 6d. cwt.; (Lyle's granulated), 51s. 1½d. cwt.; (Mauritius crystals), 48s. cwt.; (West Indian crystallised), 48s. cwt.; (centrifugal), 17s. 6d. cwt.; tapioca (fair Singapore), 2½d. lb.; rice (Rangoon No. 2), 15s. 4½d. cwt.; (bran Rangoon), £6 17s. 6d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 2s. lb.; tea (Indian common to good common), 11d. lb.; (medium to good), 1s. 4d. lb.; (fine to finest), 2s. 6½d. lb.; Ceylon (common to good common), 11½d. lb.; (medium to good), 1s. 3½d. lb.; (fine to finest), 2s. 5d. lb.; Java (common to good common), 9d. lb.; wheat (English white), 53s. 9d. qr.; wheat (Australian), 54s. 9d. qr.; oats (English), 38s. qr.; oats (La Plata, ex-ship), 26s. 10½d. qr.; maize (La Plata), 41s. 9d. qr.; flour, 41s. 6d. sack.

Chemicals.—Acids: Boric, 61s. cwt.; oxalic, 7½d. lb.; citric, 2s. 3¼d. lb.; tartaric, 1s. 4½d. lb.; ammonia (sulphate), £15 16s. 6d. ton; arsenic (white powdered), £34 ton; benzole (standard), 2s. 5½d. gallon; bleaching powder (35 per cent.), £12 5s. ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 109s. cwt. Potassium: Bichromate, 6½d. lb.; chlorate, 4½d. lb.; caustic, £31 ton; nitrate, £37 10s. ton; permanganate, 8½d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £14 ton; Sodium: Crystals, 110s. ton; bi-carbonate, £10 15s. ton; bichromate, 5¼d. lb.; alkali (58 per cent.), £8 1s. 3d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £20 2s. 6d. ton; hyposulphite, £16 10s. ton; prussiate 11d. lb.; nitrate, £13 2s. 6d. ton; glycerine (crude, 80 per cent.), £48 ton; (industrial, 1,260 per cent.), £87 10s. ton; lemon oil, 2s. 9½d. lb.; quinine, 2s. 2d. oz.; red lead, £39 5s. ton; white lead, £41 15s. ton; white ground lead, £51 ton; sulphate of copper, £26 5s. ton; sulphate of iron, 60s. ton.

Metals.—Aluminium, £100 ton; antimony (English Regulus), £27 12s. 6d. ton; bismuth, 9s. lb.; copper (standard), £61 13s. 9d. ton; copper (electro), £68 10s. ton; gold bars, 92s. 2d. oz.; iron (No. 3 Cleveland), 87s. ton; hematite (mixed number), 89s. 6d. ton; galvanised sheets (25 G), £16 ton; lead (soft foreign), £23 10s. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 37s. 6d. unit; nickel, £145s. ton; platinum, 375s. oz.; graphite (80-90), £13 10s. ton; quicksilver, £12 7s. 6d. bottle; spelter (G.O.B.), £30 5s. ton; tin (standard), £157 12s. 6d. ton; wolfram, 14s. unit; zinc sheets, £37 10s. ton; tin plates (20 by 14), 19s. 3d. box; silver bars, 34⅜d. oz.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 9½d. lb.; 80 to 89 lb., 9½d. lb.; 70 to 79 lb., 9¼d. lb.; 60 to 69 lb., 8¼d. lb.; 59 lb. and under, 6⅞d. lb.; (second), 90 lb. and up, 8¾d. lb.; 80 to 89 lb., 8¼d. lb.; 70 to 79 lb., 7⅝d. lb.; 60 to 69 lb., 6¾d. lb.; 59 lb. and under, 5⅛d. lb.; cows (first), 60 lb. and up, 7¼d. lb.; 59 lb. and under, 6⅝d. lb.; (second), 60 lb. and up, 5¼d. lb.; 59 lb. and under, 5d. lb.; bulls (first), 5d. lb.; (second), 3⅜d. lb.; kips (first), 6d. lb.; (second), 5⅛d. lb.; (third), 3⅛d. lb. Calcutta Market (prices in rupees per 20 lb.): Arsenic hides (cows): Agras, 7 to 12; Durbhangas, 6 to 8; Patnas, 5.4 to 6. Salted cows, 6 to 8.8. Arsenic hides (buffalo), 3 to 6.8. Skins: Calf, 8 to 10; goat, per 100 pieces, 200 to 260.

Miscellaneous.—Cotton (American), 13.70d. lb.; Egyptian (Sakel), 17.35d. lb.; jute (first grade c.i.f., £28 15s. ton; jute (lightnings), £25 5s. ton. Oilseeds: Linseed (La Plata), £16 12s. 6d. ton; palm kernels, £15 16s. 9d. ton; castor seed (Bombay), £18 12s. 6d. ton; sesame seed (China), £24 10s. ton; soya beans, £12 7s. 6d. ton. Oils: Linseed, £35 ton; olive (Spanish), £75 10s. ton; rape (crude), £44 ton; soya, £35 17s. 6d. ton; petroleum, 1s. 4½d. gallon; petrol, 2s. 1d. gallon; fuel oil (ex-tank), 65s. ton; coconut (Ceylon), £36 16s. 9d. ton; cotton (crude), £38 2s. 6d. ton; ground nut, £47 15s. ton. Rubber: Plantation (No. 1 crepe), 7d. lb.; smoked sheet, 7d. lb.; fine hard Para, 10½d. lb.

A Reuter message from Sofia states that owing to the great heat this summer and the absence of rain, the maize crop is severely affected in parts, and the vine and tobacco crops are also suffering, which renders the economic situation in Bulgaria still more difficult.

Cotton and Cotton Goods.

THE EGYPTIAN MARKET.

Absence of Demand.

The Commercial Company of Egypt, in their report for the week ended August 18, state:—

The market during the past week has been nervous, and the tone has on the whole been poor. The feeling is somewhat better to-day, although we find no real reason for the change, and put it down to reaction after the recent decline. Demand from the consuming centres is very small, and we find no tendency on the part of spinners to anticipate their requirements. There is a certain amount of inquiry from America for uppers, but we have not heard of any further important sales. Total sales amount this week to about 4,700 bales, of which we estimate 3,450 bales Sakellaridis, 1,200 bales uppers, and 50 bales brown.

Sakellaridis.—The demand has not been so good this week. All grades have been dealt in. A small business continues to be done in the low grades, middling to middling fair, but this cotton is now almost exhausted.

Uppers.—Practically the only grades dealt in have been good fair to fully good fair and fully good fair, at reasonable prices. A few lots of middling fair have also changed hands on a very dear basis owing to the extreme scarcity of these low qualities.

Brown.—Some business has been done in middling fair to fair at about last week's prices. The crop is going on well, and although we have reports of withered bolls as a result of the heat and excessive humidity of late, damage from this cause is insignificant. The worm attack has increased slightly in parts, but it is not by any means serious up to the present. In Upper Egypt picking is in full swing, and the ginning factories are about to re-start, so that we may expect new cotton down very shortly. In Lower Egypt the bolls are maturing well and the lower ones are already opening in some of the early plantations. Bolls are plentiful, and the plants are full of flowers and capable of making quite a lot of cotton, given good weather during August and September.

MANCHESTER MARKET.

The American Crop.

(*From Our Own Correspondent.*)

Manchester, September 2.

The feature of the market during the past week has been the issue by the Washington Bureau of Agriculture of the average condition of the American cotton crop as on August 25. The figure was 57.0, as compared with 70.8 for July and 49.3 for the corresponding date in 1921. On the above estimate the indicated crop is 10,575,000 bales, against 11,449,000 bales a month ago and 7,037,000 bales at the same date last year. On the report being received a sharp break occurred in raw cotton values, but in Manchester it is felt that if the yield is not more than 11,000,000 bales, a serious situation will be created before the season is over. Lancashire does not want high prices for the raw material, for there is ample evidence to show that most of our customers abroad are not prepared to pay anything above present values. With regard to the business passing in the market during the past week no transactions of any importance were registered. As was expected, traders held aloof pending the report of the Bureau, which was issued late on Friday afternoon. Buyers for the outlets for the Near East have acted very cautiously, and it must be remembered that these outlets at present are over-shadowed by serious disturbances. A fair amount of cloth inquiry was met with for India, but sales have been quite isolated. No developments have taken place in connection with China, and shippers to that outlet are very slow in raising limits. Only small sales have been recorded for the remaining outlets. American and Egyptian yarn quotations have ruled firm, but users have not taken any important lines of weight. Most offers in export numbers have been a long way out.

LIVERPOOL REPORT.

Poor Inquiry.

Messrs. Reynolds and Gibson report as follows for the week ended August 30:—

The week just over has brought no improvement in trade. It must be borne in mind, however, that the month of August is usually a dull one for the cotton trade, as it constitutes the "fag end" of the season. Under the circumstances, with the market manipulation which has been taking place of late in New York, and the uncertainties, financial and political, of the European situation, it is rather remarkable that our market has displayed the steadiness it has done. The inquiry has been of a very poor description, and has been due largely to a number of outside firms, not normally buyers of Egyptian at all, who have come in to see what bargains can be picked up in the lower qualities. A sure sign of bad trade is the accession of inquiries which are always received for cotton between 3d. and 10d. per lb. Apart from this, the demand has shown no variation from the preceding two or three weeks. That is to say, Sakellaridis good fair to fully good fair still holds chief place, with uppers between fully good fair and good a poor second. The latter appear to be rather pressed for sale, and some useful bargains have been picked up here and there.

An occasional request for white cotton and Pilion has been noted, but little business has been passed in these qualities. The better qualities of Sakellaridis are still neglected. Certain information from Egypt reports damage to the Upper Egyptian crop, but no precise details as to the extent have yet become available. Were it at all serious, we are inclined to think that considerably more would have been heard about it ere now. Manchester reports vary a good deal. There is obviously a large cloth inquiry coming from India, but a hard fight is taking place between buyer and seller, and it is only occasionally that any weight of business materialises. China seems to be entirely out of the running at present, and but little is reported from the secondary outlets. The Oldham holidays have necessarily curtailed yarn business to a large extent, but on one day the offtake in Egyptian yarns was reported to have shown some improvement—a rare admission! C.i.f. business continues on the customary quiet lines, and no deal of any importance has been reported. Evidence is not wanting that considerable financial tightness is still being felt in some quarters.

Stocks locally show a distinct decline, but they still stand at the very useful figure of 93,000 bales, and weekly takings by spinners show a big decrease. The future trend of prices will be governed entirely by the course of the American market. Sales estimated, 2,200 (620 bales Sudan). Quotations are unchanged on the week. Fully good fair Sakellaridis, 18.00d.

MANCHESTER COTTON REVIEW.

Business on Restricted Scale.

The cotton trade review of the Imperial Ottoman Bank for the week ended September 2 states:—

General.—Business during the past week has been to a considerable extent under the influence of political conditions, and it is difficult to see how confidence can be firmly established until there is an improvement therein. The depreciation of German marks and consequent financial disturbance on the one hand, and the renewal of active warfare in Asia Minor on the other, have been discouraging factors.

Digitized by Google

Yarn.—No sales of any large size are reported, though a fair volume of inquiry continues. Spinners continue to decline to entertain most of the offers they receive on account of price discrepancies, and the number of buyers who can be induced to increase their bids remains small. Reduction of stocks in the mills is said to be going on as much as possible, so that when revival in trade comes along it will have a more potent effect on prices.

Cloth.—Conditions remain virtually the same as those reported last week. The increased prices demanded, as a result of the rise in cotton during the past fortnight, causes many buyers to hold aloof, as they are unwilling to pay the enhanced rates. Certain kinds of light cloths are said to have been bought for India, though the general volume of business has been on a smaller scale than recently. China has not yet commenced to place the large orders which recent inquiries have led to be expected. The smaller outlets abroad remain dull, though South America and the East Indies are said to have placed a few useful lines. Trade for the Near East is duller than ever, and advices from the other side are anything but encouraging.

Raw Cotton.—There have been few changes in price and little business doing as regards "spot" sales. An improvement in turnover is hoped for in the near future when the holidays in the industrial centres end, but it is difficult to see how this could be maintained without genuine trade activity on which to base it. For Egyptian cotton there has been a limited demand, without alteration in price. Closing prices are as follows:—American Fully Middling, 13.80; Egyptian Fully Good Fair, 18.00.

THE TERRIBLE BOLL WEEVIL.

Inspired by a perusal of some of the accounts of boll weevil depredations that usually become current about this period of the year, a Lancashire spinner, who writes under the signature "G. W. A.," has contributed some highly amusing verses to the *Manchester Guardian* (August 30). We quote the following:—

Don't talk of the Terrible Turk!
He was kindly and courteous and mild
Compared with the weevil, whose work
Makes Abdul Mohamed a child.
He devours without pause or delay;
His life is perpetual bite;
He munches twelve hours in a day,
And chews double shift through the night.

The Americans say (and of course
One should always believe what they say)
That a weevil the size of a horse
Will manage a bale in a day.
The big ones do better than that,
And some of exceptional power
Will lay a plantation out flat
Quite pleasantly under the hour.

And they won't look at ordinary food.
If you go to a weevil and say
"Will you have a banana?" No good!
He only turns coldly away,
And resumes the implacable crunch
Of his jawbone—or is it his beak?
Anyhow, he has more for his lunch
Than a cardroom would use in a week.

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on August 18 were as follows:—Agricultural Bank of Egypt, £5⅛; Alexandria Water Company, Ltd., £8½; Anglo-American Nile Steam, £2 27-32; Associated Cotton Ginners, 29-32; Banque d'Orient, 49 fr.; Behera Ord., £E7⅞; Brasseries d'Egypte, 73 fr.; Building Lands of Egypt, £31-32; Cassi di Sconto Priv., 96 fr.; Comptoir Fin et Com. d'Egypte, £1 3-16; Consolidated Lands, Pt. 7½; Credit Foncier Fondateur, 1,000 fr.; Credit Foncier Act, 699 fr.; Credit Foncier 1886 Oblig., 314 fr.; Eaux du Caire, Capital, 86 fr.; Eaux du Caire Jouissance, 113 fr.; Egypt and Levant, S.S. Ord., 33s.; Egyptian Delta Light Railways, £4 13-16; Filature National d'Egypt, £10½; Immeubles d'Egypte Soc. an des., £6 17-32; Khedivial Mail S.S. Ord., 100s.; Khedivial Mail S.S. Company Pref., £3½; Kom Ombo Ste an de Wadi, £4⅛; Kom Ombo Ste An Fondateur, £32½; Land Bank of Egypt, Parts de Fond., £46; Lots Turc., £44½; Menzaleh Canal Navigation, Pt. 251; Grand Hotels d'Egypte, £7 11-16; Ramleh Railways, £2⅞; Urbaines et Rurales, £3¾; Union Fonciere Fond., £½.

CATALOGUES FOR CONSTANTINOPLE.

An Anglo-French bank established in Constantinople, with branches in the interior of Asia Minor, Syria, and Palestine, is anxious to receive catalogues of British manufacturers and trade journals for the purpose of exhibiting them in their branches in the interior. At the same time, posters would be displayed in prominent places in the interior towns informing the public that these catalogues are open for inspection at the offices of the Bank, and, in addition, circular letters will be addressed to prominent local traders. Further particulars may be obtained from the Department of Overseas Trade, 35, Old Queen Street, London, S.W.1.

MARKET FOR TIMBER IN SYRIA.

On account of the overcrowded conditions in Aleppo, Syria, and the comparatively low cost of labour, there is a large amount of building being done, says the American Vice-Consul at Aleppo, Mr. T. R. Flack, in a recent report. The houses are all made of stone, with cement floors and roofs. However, the more modern style of construction calls for a bay window effect, and a considerable amount of wood is used for this purpose. Wood is also used for doors, window frames, shutters, and floor and roof supports. The greater part of this wood is now imported from Trieste. It is secured, as is also hardwood for furniture making, through commission agents in Beyrout.

PRINTING "THE NEAR EAST."

The present and the last two issues of THE NEAR EAST have represented a new departure in newspaper production in England, inasmuch as they have been produced entirely by mechanical means, by St. Clements Press, London. Not only the text matter, but also the whole of the advertising pages have been set by machinery, the former by the usual Linotype machine, the latter by the Intertype composing machine and the Ludlow. Commenting on this innovation, the *Sunday Times* writes:—

Although such a feature is not uncommon in America, the St. Clements Press are the pioneers of the production (in London) of a complete newspaper, including a large variety of the usual displayed advertisements, entirely discarding the ordinary movable type of Caxton. Even a practical printer would be unable to discover the absence of the use of type, except that he would be charmed with the clearness and sharpness of the impression which such an entirely new equipment had given.

As is well known, the Intertype machine ("the Better machine"), like the Linotype, produces a line of matrices from which a line is cast. Originally this principle was confined to ordinary text matter, but has now been extended to the larger types necessary for general advertising matter, in which the Intertype has made a great advance. The other machine, the Ludlow, whilst adopting the same principle, uses matrices set by hand instead of by a keyboard as in the first-named machine.

The oil production at Baku in July amounted to 266,000 tons, against 254,000 tons in June.

The traffic receipts of the Suez Canal from August 12 to August 18 amounted to 3,070,000 francs, as compared with 2,450,000 francs for the corresponding period of the previous year.

Stock and Share Markets.

TONE GENERALLY GOOD.

Anglo-Persians a Feature.

(From Our Own Correspondent.)

LONDON, Tuesday Morning.

It has been a week of vicissitudes. While the uncertainty over the Reparations question lasted, a very dull tone prevailed and business was restricted to the smallest dimensions, prices tending to sag in certain directions, the tension being increased by the pending pre-war settlement. As soon as the news of the arrangement arrived at by the Reparations Commission was known, however, the atmosphere became almost buoyant in comparison to what it had been, and anxiety over the settlement disappeared—and, as the event showed, justifiably.

With the settlement out of the way and the German crisis over—for the time being, at any rate—it would have taken something quite out of the common to affect prices adversely, and the Greco-Turkish developments failed to cause more than a ripple of interest, except in the Foreign market. But while the renewed fighting has not been a "bear" point, there is no doubt whatever as to the effect of a settlement—that is, a settlement in the Near East—on the markets. It would be a "bull" point with a vengeance, marking, as it would, a very great advance towards the return of normal conditions, and when that day arrives the markets are likely to be very buoyant indeed.

Gilt-Edged Improving.

Needless to say, gilt-edged descriptions were seriously affected by the adverse conditions in the early part of the week, and prices declined sharply. A much better tone developed at the week-end, and yesterday the market was quite cheerful. Consols are 57⅜ xd, which is about the same as the previous quotation. War Loan Fives at 100¼ are 7-16 up, while the Conversion Loan is up to 74⅛, a rise of ⅞. Indian stocks are about the same, the 7 per Cent. stock being 116½ xd, while the 3½ per Cent. stock is 68¼ xd and the 3 per Cent. stock is 57¼ xd.

There have been some fluctuations in the Foreign group, but here, too, the market closed yesterday on a decidedly firm note. French stocks have hardened somewhat, War Loan Fives being 1½ up at 35½, while the 4 per Cents. at 28¼ show a gain of 1⅜. German 3 per Cents. have improved slightly as a result of the settlement of the Reparations question, and at 1 9-16 are ⅛ up. Italian Rentes are unchanged at 21. Turkish Unified, after weakening somewhat, have hardened, and at 34½ are only ½ down on the week. Greek securities have been dull, but they have not been affected by the adverse developments to the extent that might possibly have been expected. In Russians the 4 per Cents. are ¼ up at 6½, the 4½ per Cents. are unchanged at 6, but the 5 per Cents. are a point down at 9½. South American securities have been quite bright. Brazilians have displayed strength, and Argentines have been firm, while Peruvian Government 5½ per Cents. have been quite a feature at 93.

Industrials Firm.

After a somewhat doubtful opening the week-end has seen the development of much brighter conditions in the Industrial group. Business is still on a very restricted scale, however, and it is only in certain directions that buoyancy has been in evidence.

Tobaccos have again been in fair request, with Bats 9d. up at 89s. 3d., while Imperial Tobaccos are 6d. lower at 69s. Textiles have met with a somewhat better demand, Courtaulds rising 1s. 3d. to 53s. 3d., while Listers have firmed up to 25s. 6d. Coats have eased off a trifle, and are 9d. lower at 67s. 9d. There has been little doing in Iron and Steel descriptions, and prices have weakened. Armstrongs are 9d. down at 15s. 6d., Vickers are 3d. lower at 11s. 9d., while Guest Keens are 6d. down at 34s. 6d. In Indian railways Bengal and North-Western are 140, at which they are ½ up, Bombay Baroda are 94¼, and Madras and Southern Mahrattas are 104¼.

A quiet tone has ruled in Shipping descriptions. P. and O. deferred are 2 up at 307, Cunards are unchanged at 20s., while Furness Withys are 3d. lower at 33s.

Oils Better.

Considering the conditions that have prevailed during the week the tone of the Oil market can only be described as surprisingly good. The market closed yesterday, indeed, on quite a buoyant note, Anglo-Persians being a special feature, rising to 6¼, a gain of ¾, on the general prospects of the company. Burmahs also improved, and at 5¾ are 3-16 up. Mexican Eagles have been in improved request, and are ¼ up at 3¼. Shell Transports have been a good feature, closing at 4 9-16. In Trinidad issues Apex are 1-32 lower at 2 1-16, Centrals are 1 15-16, a decline of ⅛, while Leaseholds are unchanged at 1¼.

Among Egyptians Anglo-Egyptian B are the same at 1 7-16, while Oilfields of Egypt are again lower at 2s. 6d., a decline of 6d. The Roumanian group has not shared in the buoyancy of the market, and shares are slightly easier. Roumanian Consolidated are 1s. 3d. down at 15s. 6d., Phœnix are 3d. lower at 27s. 9d., Steaua Romanas are unchanged at 10s. 3d., while Dacia Romanos at 13-16 are 1-16 lower. Two reports will be forthcoming from this group shortly, and I shall be surprised if they do not impart a much brighter tone to the market.

Banks Steady.

Banking descriptions have been fairly firm. Chartereds are 18⅛, at which they are 1-16 lower, National of Indias at 43¾ are unchanged, P. and O. Banks are 14⅜, a gain of ⅛, while Bank of British West Africas are the same at 4¾.

In Egyptian securities Aboukirs are unchanged at 20s. 6d., Beheras remain at 8, Egyptian Markets are the same at 21s. 6d., Gharbieh Lands at 1 3-16 are 1-32 up, while New Egyptians are 3d. down at 23s.

Rubbers Dull.

As was only to be expected, a very dull tone has ruled in the Rubber market. Business has been on a most restricted scale, and the wonder is in the circumstances that prices remain as steady as they do.

The approximate field gross production of the Steaua Romana Co., Bucharest, for the month of July was 19,170 tons.

Import duties on all kinds of wheat, buckwheat, rye, barley, oats, and maize imported into Yugoslavia have been withdrawn as from August 18.

The exportation of barley, vetches, dried and salted fish, semolina and macaroni, from Turkey is now permitted by the Ottoman Government.

According to the *Moniteur du Pétrole Roumain*, Roumania's oil output in the first half of 1922 was 663,385 tons, against 550,463 tons in the first half of 1921.

The Imperial Merchant Service Guild have made representations to the Foreign Office concerning the light of Mocha, in the southern part of the Red Sea, which has been extinguished since 1916.

COMPANY MEETINGS.

FURNESS, WITHY & CO.

Proposed U.S. Shipping Legislation Criticised.

The thirty-first annual general meeting of Furness, Withy and Co., Ltd., was held on August 31 at the registered office of the company, Furness House, Leadenhall Street, E.C.

Sir Frederick W. Lewis, Bart., presided, and was supported by the directors of the company.

The Secretary read the notice convening the meeting, and Mr. Ralph T. Warwick (of Messrs. W. T. Walton and Son) read the auditors' report.

Sir Frederick W. Lewis, Bart., in moving the adoption of the report and accounts, said: When I addressed you last year I indicated that a difficult period lay ahead of us, and I think everyone who knows anything about shipping will agree that the past twelve months have been just about as depressing as they well could be. I think, therefore, we may congratulate ourselves upon the results shown in the accounts before us. Naturally, the figures are reduced in comparison with previous years, the profit including the carry-forward being £858,554 19s. 4d., as against a corresponding figure of £955,848 4s. 6d. last year. This is the net profit after charging up all expenses and making provision for taxation. After allowing for the dividend on the preference share capital, and for the interim dividend already paid on the ordinary shares at the rate of 5 per cent. per annum, we have transferred £200,000 to general reserve, and I will submit to you at the close of my address a resolution that a bonus of 5 per cent., free of income-tax, be paid to the ordinary shareholders, making a return for the year of 10 per cent., free of income-tax.

I have on many occasions, both in my capacity as chairman of a number of representative British shipping companies and as President of the Chamber of Shipping of the United Kingdom, made a point of explaining what I conceive to be the attitude of British shipping towards the United States Mercantile Marine. Yet I am afraid that attitude is still misunderstood in certain quarters, as I am repeatedly hearing reference to the propaganda which it is alleged British shipping interests are directing against the growth and development of the United States Mercantile Marine. I desire to state publicly and emphatically that there is no such propaganda on the part of British shipowners, and any reports to the contrary are calculated to create an unfortunate atmosphere. We appreciate to the full the circumstances under which the United States became possessed of its present mercantile fleet, and because of these circumstances we have watched with sympathetic interest the difficulties with which they are confronted in their endeavours to turn a war-time product into a commercial asset instead of the liability it now is. But just as the United States, having acquired its vessels during the war, cannot be expected to scrap them at the end of the war, so we, having by the work of generations built up a large mercantile marine before the war, cannot be expected to give up and sacrifice our trades after the conflict is over.

We have these definite conditions to face, that Great Britain has no increase in her mercantile marine as compared with pre-war, while the United States has increased in ocean-going shipping from under 2,000,000 to 12,500,000 gross tons. That problem seems to me to be only capable of solution by friendly co-operation with the object of increasing the trade of the world.

The legislation that is now being considered in the United States would entirely destroy the principle upon which the present relationships between the mercantile marine of the British Empire and the United States is founded, and it certainly appears to be inconsistent with the spirit of the Washington Conference. As I have said, I do not think any stranger has the right to interfere in a question of a nation's domestic policy, and consequently I have never heard any British shipowner so much as suggest that the United States is not entitled to grant a State subsidy to its shipping, if it is considered that this is the best method of establishing its mercantile marine. But the proposals go a great deal further than this, and contain many discriminatory clauses which will be inimical to British shipping interests.

British shipping has all along been prepared to welcome the American merchant marine, and to proceed along lines of friendly co-operation and friendly rivalry, but that spirit must be reciprocated if it is to be enduring.

The report and accounts were unanimously adopted and the bonus of 5 per cent. agreed to. The retiring directors were re-elected, and after a vote of thanks to the Chairman and the staff, the proceedings terminated.

AFRICAN AND EASTERN TRADE CORPORATION.

The Company's Position.

Mr. J. H. Batty (chairman of directors), presiding over the thirty-fourth ordinary general meeting of the African and Eastern Trade Corporation, Ltd., which was held on September 1 at the Banqueting Hall of the Exchange Station Hotel, Liverpool, in moving the adoption of the report and accounts, said the total of the authorised capital was not altered from that of last year, viz., £13,000,000. The 5,000,000 15 per cent. cumulative preferred ordinary shares were now changed, and were shown as "shares authorised but not issued," in accordance with the special resolution confirmed on August 4; the rights to be attached to these shares were to be determined before or at the time of issue. There was a small increase of £14,862 in the ordinary shares, which now stood at £3,560,368, in connection with the completion of previous agreements, and the acquisition of a small concern to ensure the supply of packing cases and boxes required for A. J. Caley and Son and other subsidiary companies. The next item of importance on the debit side of the balance-sheet was sundry creditors, £2,417,208 14s. 2d.; included in this was about £1,500,000 for contingencies, excess profits duty, and income-tax adjustments, and when the final settlement with the Government was made this should show a corresponding decrease. The advances by bankers, £490,275 4s. 10d., was a fluctuating amount. The whole of the company's assets were free from encumbrances. They had during the year, when conditions were most difficult, provided the moneys required to take up their commitments, including the payments on the construction of Africa House, without occasion to resort to the hypothecation of properties, produce, or merchandise. Whenever they required help in that direction their bankers had assisted them with a readiness which they most cordially appreciated, and he thought he could assure them that they continued to enjoy their full confidence. There was a new item, allied companies £139,424 16s. 6d., consisting of internal adjustments between the subsidiary and parent companies, and these were liable to fluctuation. The depreciation fund showed an increase of £36,687 3s. 4d. The insurance fund was increased by £10,618 2s. 1d., which was the profit on the underwriting by the company during the year. General reserve stood at £3,220,045 8s. 8d., the balance remaining after transferring £1,750,000 to profit and loss account and writing off £1,500,000 from investments. On the credit side the value of buildings, lands, steamers, etc., was £972,849 5s. 4d., an increase of £265,305 0s. 11d., mainly explained by the transfer of certain properties of subsidiary companies, the completion of one new bar steamer, another in the course of construction, and properties purchased in other markets than West Africa. The properties in London and Liverpool showed an increase of £201,910 8s. 6d., which was accounted for by the additional expenditure on Africa House, Kingsway, London. He thought they would all agree with him that it was not the time to consider selling a property of that kind even if it was decided to do so. The stocks of goods, produce, and debts in Africa, U.K., and elsewhere showed a decrease of £790,397 2s. 1d., as compared with last year. Produce in transit and in store in U.K. and elsewhere was somewhat less than last year. Sundry debtors and payments in advance £252,884 1s. 10d., and advances to allied companies £2,638,424 13s. 4d., would be very materially reduced when E.P.D. and income tax adjustments were fully completed. Trade conditions in 1921 throughout the world were disastrous, and West Africa was still suffering from over-taxation and the natives were discouraged. The abomination of the export duties was having a very detrimental effect on trade in the British West African colonies, and they were determined not to rest until they got these duties removed altogether. Arrangements had been made for Major-General Grey and Mr. A. A. Cowan to visit West Africa shortly. During the year the Corporation entered into agreement with the Société Française de Petrole, Ltd., for the option of four concessions in the district of Half Assinie, in the Gold Coast Colony, comprising an area of about 150 square miles. The directors, wishing to show their sympathy with the shareholders in the unfortunate results of the year's trading, suggest that the amount of directors' fees for this year should be £1,500 instead of £3,000.

Mr. Robert Miller seconded, and the resolution was unanimously adopted.

The retiring directors, Messrs. T. Rowland Hughes, J.P., H. C. Hutchinson, J. Pickering Jones, and M. H. McNeill were re-elected, and the auditors (Messrs. Harmood Banner and Son) reappointed. A resolution fixing the directors' fees at £1,500 was also adopted.

SPECIAL MARKET REPORTS.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

CONSTANTINOPLE, August 14.

Flour.—In this market prices tend to weaken as a result of the large stocks. On the other hand, the latest reports from New York speak of an improvement. The arrivals have been 145 tons of Bulgarian and 556 tons of American. Quotations (per sack of 63½ kilos): Nelson, Ps.850; Goldstar, Ps.820; Apollon, Ps.700; Durum, Ps.710; native flour, Ps.650-675 per sack of 72 kgs.

Wheat.—632 tons have arrived from Bulgaria.

ALEPPO, July 31.

Imports: The approach of the Mohammedan holidays has imparted some activity to the market in manufactured goods. On the other hand, the situation in Anatolia has tended to have more and more demoralising effects. Imports in general have ceased. A marked rise in the price of colonial produce being recorded in Europe, prices here have risen, but the consumption is restricted to the needs of the town.

Exports.—There has been great activity as regards washed wool, which is in demand for America. 1,500 bales have been consigned to that destination via Alexandretta. The demand has resulted in a rise of 10 per cent. on the prices of the previous month.

ALEPPO, August 8.

It becomes more and more evident that the crops of cereals are good. Harvesting is going on actively, also threshing. As a natural consequence prices have begun to fall.

HOMS, August 8.

The harvest proceeds normally. The crop of cereals in the neighbourhood of Homs is estimated at half a good normal crop. The fall in prices and the increase in expenditure have placed the farmers in a precarious position. The reduction in the cost of rail transport will remedy this state of things to some extent.

The crop of silk has been very good. The crop of wool has been satisfactory both as regards quantity and quality. The rise in the price of this commodity on the European markets, coinciding with the rise in the European exchanges, has brought about a strong rise in the markets of Homs and Hamah. The *rotol* of unwashed wool, which stood at 15 piastres in April, had reached 28 piastres at the end of June.

Generally speaking, there have been no notable changes in the economic situation. Imports of foreign merchandise have not tended to increase, and arrivals of colonial produce are limited to the amount necessary for the needs of the district during the month. Business is restricted in cotton goods and manufactures generally, for which there is little demand. On the other hand, construction materials are arriving in large quantities to meet the needs of the numerous works that are in progress.

Exports of cotton tissues for Anatolia viâ Mersina tend to increase. Some lots have been consigned to Mersina at remunerative prices. On the other hand, exports of silk tissues for Egypt have decreased.

It is estimated that there are about 1,000 motor-cars in Beyrout and the immediate neighbourhood.

It the first five months of this year 900 marten and 4,700 fox skins were exported from Roumania.

There is a growing market for writing paper and stationery in Palestine.

ROUMANIAN SERVICE TO EGYPT.

(*From Our Own Correspondent.*)

BUCHAREST, August 23.

The passenger and cargo boats of the Service Maritime Roumaine, which since the Armistice have been plying only between Constantza and the different Levant ports, will from next month extend their traffic to Alexandria, as before the war.

GROWTH OF GREEK MERCHANT SERVICE.

In reviewing the work accomplished by the Greek mercantile marine in 1921 it must be borne in mind (says Mr. Vice-Consul Watkinson in the recently issued annual report on Greece) that the country has throughout the year been at war, and has been suffering from considerable financial difficulties. The vitality displayed by the merchant service is, therefore, all the more remarkable, and the efforts of the Greek shipowners are deserving of the greatest praise from their Government.

The Greek merchant fleet has increased from 200 vessels at the end of 1918 to 513 ships at the close of 1921. Since the Armistice the following have been purchased or built:—323 ships (548,000 tons) and 548 sailing vessels (90,493 tons). Twelve German vessels of a total tonnage of 45,181 tons have also been handed over to the Greek Government during 1921 in accordance with the Peace Treaty between Germany and the Allied Powers and 17 more vessels are to follow later. Deducting 10 ships (15,000 tons) and 40 sailing vessels (3,000 tons) representing casualties and sales to other countries, the strength of the Greek mercantile marine on January 1, 1922, is found to be 513 ships of a net tonnage of 713,000 tons and 1,148 sailing vessels of a net tonnage of 202,493 tons.

Port of Piræus.

The bulk of the local trade in Greece is between Piræus, Salonika, and the islands. The great distributing centre for imported goods is now Piræus, though the revival of Yugoslavian prosperity has given a considerable impetus to the activities of Salonika.

The port is well protected by nature; in parts of the harbour, where large vessels discharge, the depth is 32 ft., the minimum depth in the inner harbour being 25 ft. The channels by which vessels enter and leave the port are 45-48 ft. Ocean-going steamers are unable to lie alongside the quays, and the traffic of the port is conducted by lighters. The Troumba Wharf, used by the Government only, accommodates three vessels up to 5,000 tons and drawing not more than 24 ft. of water. A scheme for enlarging and deepening the port has for some time been under the consideration of the Greek authorities. There are no dock railways, but the termini of the Larissa and the Peloponnese Railways are situated close to the quay.

There is, unfortunately, always a considerable amount of congestion in the port. The quay space is altogether inadequate, and labour has been somewhat disorganised during last year by strikes. Goods are also left for months in the Customs, where the organisation is inadequate to cope with the accumulation of goods in the limited accommodation at their disposal. The schemes for improving the port also comprise a considerable increase in the existing warehouse accommodation.

The traffic receipts of the Smyrna-Aidin Railway for the week ended August 26 amounted to £10,427.

NEW BLACK SEA STEAMSHIP SERVICE.

A monthly steamship service has been inaugurated on the Black Sea by the Lloyd Triestino Company, according to a report forwarded by the Commissioner in Constantinople of the Federation of British Industries. This service, which has the approval of the Soviet authorities, is expected to run between Novorossisk, Kertch, Theodosia, Sevastopol, and Odessa.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis:—

Anchor Line.—S.s. Elysia for Bombay (Liverpool, September 18).

Anchor Brocklebank Line.—S.s. Mandasor for Calcutta (Birkenhead, September 16); s.s. Mahsud for Port Said, Colombo, Madras, and Calcutta (London, September 16); s.s. Mathura for Calcutta (Birkenhead, September 27); s.s. Macharda for Calcutta (Birkenhead, October 7); s.s. Makalla for Port Said, Colombo, Madras, and Calcutta (London, October 10); s.s. Holywell for Port Said, Colombo, Madras, and Calcutta (London, October 21).

Bibby Line.—S.s. Yorkshire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, September 13); s.s. Arracan for Rangoon (Middlesbrough, September 27); s.s. Warwickshire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, September 27).

British India Line.—S.s. Margha for Bombay and Karachi (London, September 8); s.s. Madura for Colombo, Madras, and Calcutta (London, September 15); s.s. Malda for Bombay and Karachi (London, September 22); s.s. Domala for Colombo, Madras, and Calcutta (London, September 29); s.s. Nevasa for Bombay and Karachi (London, October 6); s.s. Mandala for Colombo, Madras, and Calcutta (London, October 13).

Clan Line.—S.s. Clan Matheson for Colombo, Madras, and Calcutta (Birkenhead, September 7); s.s. Clan Mackenzie for Bombay and Persian Gulf (Birkenhead, September 8); s.s. Hyacinthus for Colombo, Madras, and Calcutta (Birkenhead, September 21); s.s. Willcasino for Bombay and Persian Gulf (Birkenhead, September 27).

Cunard Line.—S.s. Brescia for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, Novorossisk, Poti, and Batoum (Glasgow, September 22); s.s. Cypria for Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Liverpool, September 28).

Ellerman Line.—S.s. Gulf of Suez for Genoa, Leghorn, Naples, Palermo, Messina, etc. (Liverpool, September 14).

Ellerman "City" Line.—S.s. City of Brisbane for Calcutta (Birkenhead, September 16); s.s. City of Genoa for Bombay and Karachi (Birkenhead, September 22); s.s. Kalomo for Karachi direct (Birkenhead, September 22); s.s. City of Nagpur for Calcutta (Birkenhead, October 6)

Ellerman's "Hall" Line.—S.s. Trafford Hall for Bombay, Karachi, and the Punjab (Liverpool, September 13); s.s. Kalomo for Malabar Coast ports (Liverpool, September 19); s.s. City of London for Bombay, Karachi, and the Punjab (Liverpool, October 2).

Ellerman's Westcott and Laurance Line.—S.s. City of Alexandria for Gibraltar, Malta, and Alexandria (London, September 9); s.s. Borodino for Malta, Piræus, Salonika, Smyrna, Constantinople, Galatz, and Braila (London, September 9); s.s. Tasso (new steamer) for Gibraltar, Malta, and Alexandria (London, September 20); s.s. Eden Hall for Malta, Piræus, Salonika, Smyrna, Constantinople, Galatz and Braila (London, September 23); s.s. Mardinian for Gibraltar, Malta, and Alexandria (London, October 11).

Glen Line.—S.s. Glengarry for Port Said, Port Swettenham, Singapore, etc. (London, September 7); s.s. Carnarvonshire for Port Said, Port Swettenham, Singapore, etc. (London, September 21); s.s. Gleniffer for Port Said, Port Swettenham, Singapore, etc. (London, October 5).

SULZER BROTHERS, ALEXANDRIA.

SPECIAL BRANCH.

Harrison Line.—S.s. Explorer for Calcutta (Liverpool, September 16). A steamer will sail from Birkenhead on October 26 for Port Said, Port Sudan, Aden, Mombasa, etc.

Henderson Line.—S.s. Bhamo for Port Said and Rangoon (Birkenhead, September 20).

Holt Line.—S.s. Philoctetes for Port Said, Port Swettenham, Singapore, etc. (Glasgow, September 7); s.s. Demodocus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, September 7); s.s. Teucer for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, September 7); s.s. Achilles for Port Said, Port Swettenham, Singapore, etc. (Swansea, September 14); s.s. Agapenor for Port Said, Port Swettenham, Singapore, etc. (Swansea, September 28).

Johnston Line.—S.s. Willowmore for Galatz and Braila only (Liverpool, September 7); s.s. Aviemore for Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz, and Braila (Liverpool, September 30).

Moss Line.—S.s. Siptah for Gibraltar, Malta, Syra, Piræus, Smyrna, Salonika, Constantinople, Bourgas, Varna, and Constantza (Liverpool, September 9); s.s. Amarna for Gibraltar, Oran, Malta, and Alexandria (Liverpool, September 9).

Papayanni Line.—S.s. Assyrian for Algiers, Malta, Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, September 16); s.s. Grodno for Melilla, Malta, and Alexandria (Liverpool, September 16).

P. and O. Line.—S.s. Perim for Colombo, Madras, and Calcutta (London, September 9); s.s. Delta for Bombay (London, September 9); s.s. Kashmir for Bombay (London, September 22); s.s. China for Bombay (London, September 29); s.s. Magoya for Colombo, Madras, and Calcutta (London, October 6).

Prince Line.—S.s. Scottish Prince for Tunis, Malta, Alexandria, and Syria (Manchester, September 16); s.s. Black Prince for Tunis, Malta, and Alexandria (Manchester, September 30); s.s. Stuart Prince for Malta, Alexandria, and Syrian Coast (London, September 30).

COMPANY NOTES AND REPORTS.

Alliance Bank of Simla.

The accounts of the Alliance Bank of Simla for the year to June 30, 1922, show that to meet the losses and doubtful debts which have been incurred, the directors have appropriated a reserve of Rs. 44,00,000. By this means the whole of such doubtful debts have been fully covered. An interim dividend of 7 per cent. has been paid, but a final dividend has been passed. The head office is being transferred from Simla to Calcutta.

Darjeeling Himalayan Railway.

The accounts for the year to March 31 last show balance of net earnings, after providing for debenture interest and estimated payment due to Government and other items, of Rs. 4,02,115; brought in, Rs. 3,13,820, plus amount for special expenditure debited to reserve subsequently written back, Rs. 30,000; total, Rs. 7,45,935. Interim dividends have been paid of Rs. 6 per ordinary share, Rs. 1,05,000, and Rs. 2.8 per preference share, Rs. 1,09,375, leaving Rs. 5,31,560. The directors recommend further dividends of Rs. 6 per ordinary share, Rs. 1.05,000, and Rs. 2.8 per preference share, Rs. 1,09,375, carrying forward Rs.3,17,185.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.)

Egypt.

Steam Roller.—The Director-General, Main Roads and Bridges Department, Cairo, invites tenders for the supply of one 10-ton compound steam roller. September 20.

Oils, etc.—The Director of Stores, Frontier Districts Administration, Arsenal, Alexandria, invites tenders for the supply of oils, paints, varnishes, and consumable stores, such as marine articles, ropes, locks, nails, leather, etc. October 10.

Coal Tar.—The Director-General, Cairo Tanzim Department, invites tenders for the supply of 300 tons gross of refined coal tar. Delivery to be made before December 15. September 28.

Switchboard, etc.—Tenders are invited by the Chief Electrical Engineer, Electrical Service, Ministry of Public Works, Cairo, for the supply and installation of a switchboard and a system of feeders in armoured cable for works of the Palais de Ras el Tine at Alexandria. September 11.

Bulgaria.

Tubes.—The Secretary in Charge of Commercial Affairs at Sofia reports that the Bulgarian Directorate of Railways and Ports invites tenders for the supply of 2,500 weldless locomotive fire tubes 5,000 m.m. long, assorted; 1,500 tubes, 46 by 52 m.m.; 500 tubes, 39 by 45 m.m.; 500 tubes, 44 by 50 m.m.; 800 weldless iron boiler tubes, assorted, 200 each, 70 by 76 by 1,055 m.m., 54 by 60 by 1,500 m.m., 72 by 78 by 1,100 m.m., 64 by 70 by 1,550 m.m. The estimated value of the contract is 1,250,000 leva, and it is understood that the tenderers must deposit a sum equivalent to 5 per cent. of the amount of the offer as a guarantee, which in the case of unsuccessful tenderers will be returned after the adjudication has taken place. September 18 (D.O.T.).

Telephone Material.—The Bulgarian Directorate of Posts, Telegraphs, and Telephones at Sofia invites tenders for:—(1) The supply of cables and other material, and the transference of the existing underground cables to the new telephone exchange. (2) The supply of the material and the work involved in the extension of the network of underground cables. (3) The supply of the underground and armoured cables, including the runnings of the cables through the tubes as well as effecting their connection to the boxes and the ends of the cables to the exchange, etc. This section also deals with the supply of lightning conductors with aerial cables, and other material. (4) The supply of iron terminal standards with cable racks (main distribution poles). Tenders must be presented in Sofia by October 16 (D.O.T.).

India.

Axles, Cranes, Bellows, etc.—The Great Indian Peninsula Railway Company invites tenders for the supply of straight axles (forgings and crank axles—machined), steel tyres for carriages and wagons, rolled steel disc or spoke wheels and axles and axle forgings, helical and volute springs, laminated springs, axleboxes, water cranes, bellows. September 12.

Sleepers, Cotters, etc.—The Madras and Southern Mahratta Railway Co., Ltd., invites tenders for the supply of fittings for pot sleepers, viz., 436 tons wrought iron tiebars, 16¼ tons wrought iron cotters, six tons wrought iron gibs. September 12.

Steel Sheet Piling.—The Calcutta Corporation invites tenders for the supply of 80,000 lineal feet of light section steel sheet piling of various lengths; also for the supply, delivery, and erection of a steel-screw pile jetty on the river bank at Pulta, near Calcutta. Tenders for the former close on October 9, and for the latter on October 10.

Locomotives.—The South Indian Railway Company invite tenders for the supply of: 1. 46 metre gauge locomotives and six locomotive boilers. 2. 108 metre gauge wagons. 3. Bridgework. October 8.

Irak.

Clothing, etc.—The Ministry of Defence is inviting tenders for the supply of: (1) Clothing requirements—including clothing, tailors' tools, grindery, shoemakers' tools, etc. (2) Leather and web accoutrements. (3) Camp equipment: including repair materials, and general camping accessories.

Tenders on the proper form, with all quotations in rupees, must reach the Ministry of Defence, Baghdad, not later than mid-day September 30. The Minister of Defence suggests that tenders be despatched by Air Mail followed by duplicates by post. Wherever possible samples should accompany tenders. (D.O.T.)

NOTES OF THE WEEK.

Back to Principles.

The time has come for Great Britain to have a policy of her own in the Near East. For the last three years she has adopted a Greek policy, and has wasted much time in trying to persuade France to adopt it as well. The French have refused, and the policy in question has proved a disastrous failure. It does not necessarily follow that the British Government must embrace France's policy, which shows no sign of being other than opportunist and short-sighted; but it is indicated that Great Britain ought to review her whole position in the Near East by herself, and dispassionately. In the past she has been too concerned to make her attitude in regard to Turkey fit in with more important considerations in other directions. As for the moment she has no formidable enemy in Europe, she can indulge in the luxury of adapting her Turkish policy to recognised principles which can be openly avowed and supported with conviction.

A New Orientation.

The principles enunciated during the Great War or tacitly accepted as the British aims in that struggle offer a satisfactory basis for the new policy. Turkey's capacity for disturbing the peace of the world by misgoverning alien populations was to be curtailed as far as possible, and to this end it has been found necessary and practicable to cut off her Arab dominions. It was only after the Armistice between the Allies and Turkey that an attempt was made, in peace time, to invent a Greek tract of country that could also be detached from the former Ottoman Empire regardless of the principle of nationality or "Turkish territory for the Turks." The Allies launched the war in Asia Minor, hoping to justify their action; but the scheme failed, and the Turks have gained their point that no Turkish territory shall at this stage be handed over to Greece. Thus the attempted settlement in regard to both Smyrna and Thrace goes by the board, and there must be a fresh demarcation of the northern littoral of the Ægean. At the same time the contention that the waterway connecting the Mediterranean and the Black Sea must always remain open holds good, and the Allies can enforce this point, settled by the Great War, with a clear conscience. On this basis a new orientation of British policy may possibly lead to the establishment of friendly relations with Turkey in accordance with Great Britain's imperial interests. The future, after that stage has been reached, will depend on Turkey's own attitude and behaviour; and Great Britain will be able to face it with the consciousness of having acted correctly.

Greece's Ordeal.

Only those who have consistently protested against the course that Greece has been made to pursue during the last three years at the prompting of the Allies can feel any genuine sympathy with her in her present ordeal. The cynical and ill-informed who endorsed Greece's imperialistic aims, and since the fall of M. Venizelos have schemed to do the maximum harm to Greece by promoting her disunion, may feel annoyed at the failure of their plans, but their only feelings for Greece are conceived in a party spirit. For this reason their advice now should be viewed askance. The first thing that Greece needs to-day is a united people; with that all things may be added to her. Her worst enemies are those who are urging her, *tout court*, to change King Constantine for M. Venizelos. Anyone acquainted with the actual conditions in the country will know that such a course would once more split the people into two hostile camps. It might be well for Greece if she could command again the services of M. Venizelos, but only on condition of such a recantation as he would never agree to make. As things are, the whole people, not merely one man, must work to save the nation, but only one man, as far as anyone can tell, can keep Greece at unity with herself, and that man is King Constantine.

A Satisfactory Start.

The true friends of Greece will hope that no panic measures will dominate the situation in Athens, but that the Greeks will meet their difficulties soberly and unitedly. A satisfactory start has been made by the appointment of M. Triantafylakos as Prime Minister. M. Triantafylakos

Digitized by Google

was Greek High Commissioner in Constantinople, and he resigned his post because he was strongly opposed to the late Government's policy of reinforcing the Greek army in Thrace and applying to the Entente Powers for leave to march on Constantinople. The arguments with which M. Triantafylakos sought to deter the Greek Government from its unwise action show that he had a proper appreciation of some of the facts of the Near Eastern situation, and if the promise of statesmanship that he has already given is confirmed in his political office, all may yet be well with Greece.

France and Greece.

We could wish that French policy in the Near East were worthier of a Great Power. It would seem to be conditioned by an insensate hostility to King Constantine, based, as far as can be gathered, on the evidence of a single French representative who was worsted in the duel that he provoked between himself and the Greeks, and who entirely mismanaged the mission with which he was entrusted. In France to-day it is not considered derogatory to launch one false statement after another regarding Greek affairs, in the childish belief that by so doing French interests are promoted. Ephemeral advantages may be secured, but not a single nation in the East, the Turks included, can feel any respect for a Western people who act in this way, and France can hardly suppose that she will always be able to afford the luxury of an anti-British policy in the Near and Middle East. While the French Government has striven to thwart Greece at every turn for the last two years, a French Military Mission has been engaged in reorganising and training the Greek Army, which has now come to grief in Asia Minor mainly owing to the French war material supplied to its enemies. It is now rumoured that the Mission is to be withdrawn by France "on account of the expense involved," but, as the Mission has presumably been a charge on the Greek exchequer, it is not clear where the expenditure has been incurred. All who know Greece can testify to the good work done by the French Mission, and it may be wondered whether Mustapha Kemal Pasha has complained of the extra burden imposed upon him for three years as a result of the French training of Greek troops for ten years or more.

Iraq Frontier Unrest.

Immediately after the drastic action taken by the High Commissioner of Iraq to deal with extremist activities in Baghdad comes the news of a frontier engagement in the Kurdish hills; but it should not be necessary to point out that there is no connection between the political agitation and the tribal unrest, nor can either be used legitimately as an argument against Great Britain's position in Iraq. The political agitation is for the most part directed against the retention of the word "mandate," and not against the presence of the British, although there are inevitably extremists who would like to go "the whole hog." Unrest is second nature to the Kurds, and they must have a longer experience of settled and firm government than they have had so far before any marked improvement can be expected in their general conduct. A significant feature of the trouble on August 31 near Rania, which has led to the withdrawal of the few British officials in the Suleimaniyeh region, was that it was started by a band of Turkish irregulars, who were supported by Kurdish tribesmen. Our Kurdish levies behaved badly, and the small Anglo-Indian force suffered thirty-five casualties in consequence. Trouble in this part of the world must be expected for the present. Peace with Turkey alone would have kept this frontier reasonably quiet; but the British Government has failed to appreciate the strength of the argument, although it has been strongly urged by the British authorities in Iraq. As a result of recent developments in Asia Minor, it has been considered advisable to strengthen the Iraq garrison, which was being reduced.

The Palestine Mandate.

The British Mandate was duly proclaimed in Palestine on September 11, the ceremony in Jerusalem taking place in the presence of Lord Allenby. The Arabs observed the occasion as a day of mourning, and their shops were closed. In the circumstances no other attitude could have been expected. Many of their warmest sympathisers, however, are of opinion that the Arab fears will not be realised, and that the Mandate will prove not only tolerable, but also attractive in working, if they will consent to give it a chance. As nothing could be more foolish from the Arab point of view than the policy agreed upon by the Nablus Congress, it is satisfactory to learn that a prominent Arab paper calls attention to its weakness from a financial point of view. It is easy to protest and boycott at other people's expense, and we hope that the Arab fellaheen will not allow themselves to be exploited by a handful of townsmen.

Lord Reading and the Legislature.

Lord Reading's address at the opening of the Simla legislative session, the text of which was made available in this country with commendable promptitude, strikes us as an adequate pronouncement on an occasion of some importance. We, at least, cannot joint in the criticisms evoked by it in certain circles in India, for its principal points have been frequently urged in these columns, and we hold very strongly that at the present juncture it is essential to bring home to Indian politicians the true facts of a position which they have either failed to grasp, or are reluctant to acknowledge before the public. The actual intentions of Parliament, as expressed in the preamble of the Act of 1919, the need for evidence that Indians are ready and able to work the constitution in accordance with those intentions, and, most of all, the importance of developing a genuine electorate out of the amorphous masses of the people, all these are commonplaces to the serious student, and, if their enunciation annoys practical politicians, as appears to be the case, the only course is to go on repeating them until annoyance gives place to comprehension.

The Loss of the "Egypt."

The findings reached by the Wreck Commissioner, who inquired into the loss of the Egypt, were uncomfortable reading to those with whom the P. and O. is a household word. The company's regulations were adequate, but the machinery for enforcing them was not effectively worked. The discipline of the crew was consequently defective, and the defect extended to all ranks, with the result that unnecessary loss of life occurred. We have no doubt that the company has already taken all measures necessary to remedy these defects, and for readers in India the most immediate interest of the findings is the portion which relates to the conduct of the lascars, stokers, and Goanese stewards. "Confusion, bordering on panic," is the verdict as regards a considerable portion of these classes, whose actions can be accounted for only by lack of discipline and proper leading. This part of the Commission's Report may be commended with confidence to the ardent advocates of the immediate "Indianisation" of the Army. The crucial question there is the ability of Indians to lead the men of their own nation; their

Digitized by Google

weakness in this matter is established by the verdict of at least four centuries; and until it is remedied Indianisation must proceed slowly, or "confusion bordering on panic" will be the inevitable result in times of stress.

Sir Pertab Singh.

By the death of Sir Pertab Singh India has lost one of the small number of outstanding leaders of the last half-century, and a man who was known and honoured throughout the British Empire. To most people his fame was that of the soldier, and, on a different plane, the sportsman, but his most valuable work was done as an administrator in the impoverished and backward States which he governed for so long. He was not adept in the art of judicious self-advertisement, which so many modern administrators have cultivated with success, and his work was done in regions where the special correspondent has not yet penetrated. His achievements are therefore not widely known, but they suffice to stamp him as one of the noble band of soldier-administrators who have from time to time brought peace and prosperity to one region or another of a country which asks for little more.

Central Europe.

For a moment the situation in Austria threatened somewhat ominously the peace of Central Europe. After its vain appeals to the Entente Powers for immediate action, the Austrian Government made an individual application to Italy who showed unexpected readiness to meet the request half-way. In the meantime reports were current that Yugoslavia, with or without the support of Czecho-Slovakia, was preparing to move troops to Austria with a view to being prepared for all emergencies in the event of the complete financial collapse of that country. The Austrian request became virtually an appeal for protection against Yugoslavia, which Italy at once promised. But the Yugoslav Government has denied that it was making any military movement against Austria, and the Italo-Austrian understanding can be confined to the economic sphere in the form of a customs and monetary union. The strengthening and broadening of the alliance between Czecho-Slovakia and Yugoslavia, however, are exercising the Italian mind and must almost inevitably lead to a counter-movement, unless all the States concerned realize how much better their interests, jointly and individually, will be served by economic co-operation than by political antagonism.

THE WEEK AT HOME.

Home Politics and Ireland.

Home politics have been dead during the week, and there is no sign of their revival. One hears nothing of autumn campaigning, and our statesmen seem for once to have lost their tongues. Nobody is a penny the worse for this unaccustomed silence, and nobody would mind very much if things remained in this condition for some time.

If anybody wants excitement, he has only to go across to Ireland, and he will have it in abundance. The Irish Parliament has at last met, several months after the date originally fixed, and the first and apparently the only business it has done was to suspend a member—the notorious Mr. Ginnell—on the opening day. It was rumoured during the week that Mr. de Valera had been caught and killed, but there was no truth in the report.

The Air Race.

More exciting than home politics was the air race round Britain, from Croydon to Glasgow via Birmingham and back again via Bristol. The winner only won, so to speak, by a neck; but more important than the times or the incidents of the race was the fact that out of twenty-odd starters eleven competitors completed the course, and no accident of any kind occurred. That in itself is sufficient indication of the safety of present-day flying.

But the aeroplane is enlarging its scope every week. The service to Paris, which has been running steadily for the last three years, is now augmented by a second service to Brussels, and a third to Berlin via Amsterdam, the latter to be, it is hoped, merely the first stage of an air mail service to India. This may take a little time to arrange, but it is hardly likely to be more than a year or so before it is in operation; and once that is arranged, it will be no long time before Australia presses for an extension to Sydney.

The aeroplane manufacturing companies are still in difficulties, but the prospect is far more hopeful than it was a few weeks ago for the development of the industry.

The Trade Union Congress.

There was a great deal of talk at the annual meeting of the Trade Union Congress last week, but, unless the reporters have done it a grave injustice, it was not very fruitful nor constructive, and some of it was merely of the "to hell with the capitalist" variety, which does not carry anybody anywhere. It was admitted that the plans for a confederation of all Labour unions had broken down, and that nothing will induce the unions to give up their autonomy to a Labour dictator; at the moment, apparently, there is no intention of repeating the abortive Triple Alliance experiment. The unions reported a grave loss of membership, a million and a quarter out of six million members having resigned, and the tone was, therefore, rather *piano* throughout. There were some political discussions and resolutions, but these seem to have been perfunctory.

The British Association.

This year's meeting of the British Association was held last week at Hull, and the usual variety of papers was read. Perhaps the most generally interesting was Sir Charles Sherrington's presidential address on "Animal Mechanism," which was absurdly attacked by the *Daily Express* as "Science abolishing the soul." It discussed the scope and difficulties of the new physiology, and the

part played by nerves and the cerebral cortex; but it avoided the philosophical implications of these discoveries, and can, therefore, hardly have offended the weaker brethren. A few years ago, one imagines, the exponents of the vitalist school would have repudiated this mechanistic view, but the vitalists are rather under the weather just now, and Bergson, the protagonist of that view, is more popular in mystical and philosophical circles of the idealist and Hegelian variety than in strictly scientific discussions.

Botulism.

An inquiry has been held into the death of several people at a Scottish hotel recently from eating sandwiches prepared from a pot of Lazenby's wild duck paste. Considerable alarm was caused when the news first became known, and this is not likely to be lessened by the facts elicited by the inquiry. Lazenby's are a firm of high reputation, and their factory proved on inspection to be scrupulously clean and efficiently run—the evidence, indeed, was so conclusive that they were exonerated from blame.

Nevertheless, the poison was in the pot, and the conclusion seems irresistible that the danger, although admittedly slight and very rare, cannot altogether be eliminated from these preserved foods. One result of the inquiry has been that the Ministry of Health has arranged for botulus anti-toxin to be kept ready for immediate use at convenient centres throughout the kingdom, in order to minimise the risk of another outbreak.

The Death of Dagonet.

Mr. G. R. Sims, who died last week, has been saluted as "the last of the Bohemians"—although the type survives yet in odd corners. For forty-five years he was the life and soul of *The Referee*—he is said not to have missed a single week's issue—and his "Mustard and Cress" was probably very widely read at one time. It remained a fresh, light, and amusing feature to the end—the last contribution was corrected by him the day he underwent the operation that was to prove fatal—but the vogue had begun to pass, and *The Referee* had probably suffered a good deal from the competition of the new Sunday newspapers of late years. Mr. Sims was, perhaps, even better known as the writer of melodramas, which have been played all over the world. He was a kindly, cheery soul who will be missed.

The Week's Books.

"British and Continental Labour Policy" (Kegan Paul), by B. G. de Montgomery, is an analysis and contrast between the Labour movements at home and abroad. The author points out that "the main restraint on independent Labour representation is the attitude of the workers themselves. In England the workers vote first of all for workers, not—as they do in the Scandinavian countries—for lists. Moreover, it must not be forgotten that the present social order, with all its drawbacks, is still popular among large sections of the working classes. It is characteristic of the present social system in Great Britain that there is no real difficulty for any man or woman of ability, of however humble an origin, to rise from one social class to another. The road to the highest offices and the most exalted social positions is open to every citizen. A social system where everyone would be equal, and where there would be no reward for individual ability and deeds of valour, does not appeal to the British mind." Incidentally, the author comes to the conclusion that as a result of the Russian revolution, the question of nationalisation has, "to say the least, been definitely postponed."

"Anatole France and His Circle" (John Lane), by M. Paul Gsell, is an intimate account of the great French ironist. I quote the following story: A bishop once called on Anatole France. "Monsieur," said the bishop, in a supercilious tone, "I must admit quite plainly that I have not read your novels." "Monsignor," replied France, with sacerdotal unction, "I must confess to you quite frankly that I have not read your charges."

The fourth volume of Colonel John Buchan's "History of the Great War" (Nelson) has now been published, and it forms a good and on the whole singularly impartial record. No excuse is needed for making a somewhat long quotation of the narrative covering the period of March, 1918. "As for Sir Hubert Gough, who suffered most in repute, there was no single flaw in his conduct of the retirement. On the contrary, it was due to him and his staff that Carey's detachment held the gap, and his courage and cheerfulness never failed him. The responsibility for the defeat must be laid upon the British War Cabinet, and principally upon the Prime Minister.

"Mr. Lloyd George saw with perfect clearness one part of the military problem of Britain, but he saw nothing steadily or whole. He realised the folly of a divided command, but his solution was a committee instead of a man; he saw the good prospects before Allenby in Palestine and the propagandist value of a victory there, but he did not realise that while battles were being won in the East the war might be lost for good in the West. There is much to be said in his justification. He had some reason for thinking that the British Staffs were unimaginative and slow to revise their methods. Since, in common with these staffs, he did not foresee the new German battle plan, he might fairly argue that if a huge Allied superiority in the spring of 1917 could not break the German front, no more could Germany's extra 300,000 rifles now win a decision. But he was clearly at fault in leaving Haig so grossly weak when the troops could have been provided.

"Here, again, it is right to distinguish. Mr. Lloyd George could not get troops in large numbers from Britain without raising the age limit; he dared not do that while leaving Ireland exempt, and he was naturally averse to putting his head into the Irish bramble-bush. It is true that when the disaster came he followed the first of these courses with the complete assent of the nation; but it may be doubted whether that assent would have been given so readily without the spectacle of the Somme retreat to compel it. But there were troops to be got elsewhere, troops kept in Britain as security against a mythical invasion, troops with Allenby and in Salonica; and the true charge against the Prime Minister is that when Haig's necessity was made plain he did not discard the invasion whimsy, that he still flirted with Palestinian crusades, and did not do what he did later and bring back every unit that could be spared from the Near East." OCELLUS.

The Near and Middle East.

From Our Own Correspondents.

EGYPT.

Cairo, August 31.

Government and the Outrages.

In connection with the Brown outrage, the Prime Minister, Sarwat Pasha, has addressed a letter of regret to Lord Allenby, in which he assures him that the inquiry is being prosecuted with the utmost energy. At the same time, he complains to him of the manner in which these incidents have been reported to and commented on by the British Press, which, he says, is leading the English public to believe that these outrages are a new phase coinciding with the change in the political status of Egypt. The Prime Minister points out to the High Commissioner that the majority of these outrages have occurred during the period December, 1921—February, 1922, that is to say, before the present Cabinet took office, and he asks his Excellency to take steps to acquaint the British public with the true situation in regard to these outrages and the fact that the Egyptian Government places in the forerank of its duties the discovery of the authors.

This letter has given rise to no little adverse comment. In many quarters, Egyptian as well as European, it is felt that it would have been more dignified had the Cabinet merely addressed a letter of sincere regret to the High Commissioner without going into the genesis of the series of outrages.

Again, the letter is criticised because it has the appearance of wanting to diminish the responsibility which the Egyptian Government bears in this matter and transfer it to the shoulders of those who administered the country in the period between the fall of the Adly Cabinet and the advent of the present one. It is pointed out, and with truth, that there is no comparison between the political situation existing then and now; that, whatever excuse there might have been for anti-British activities before February 28, such excuse no longer exists; that during the early period there was no Egyptian Cabinet, and, consequently, it was exceedingly difficult to take the steps which the situation required in order to stop these outrages; but that since February 28 there has been an Egyptian Cabinet, which, in taking office under the new *régime*, accepted responsibility for the proper administration of the country; and that, although this large number of political crimes affecting the reputation of Egypt still remained undiscovered, no really special steps were taken to deal with the situation until at least three more similar attempts had been made. Even in circles sympathising with the Cabinet in its difficulties much regret is felt that it should have included the reference in question in this letter of regret, for it is regarded as merely begging the question without benefiting the Cabinet in any way.

Finally, the letter is criticised because it would seem to cast a reflection on the good faith of the English correspondents in Egypt. It is, indeed, quite without precedent that the head of the Egyptian Government should appeal officially to the British representative to enlighten the British public on the true facts of the situation in regard to these outrages. In the past it has always been customary for the Egyptian Government, when what it considered were incorrect versions of incidents had been published, either to lay its own version before the correspondents in question or to issue an official *communiqué*, as, in fact, it did only a week previously in the matter of the statements published with regard to Mr. Brown's treatment at the Giza Mudiria. The fact that, on the contrary, it appealed to the High Commissioner to communicate the "true facts" to the British public, coupled with the earlier reference to the accounts sent from Egypt, naturally was regarded as a reflection on the good faith of the English correspondents. It is, however, satisfactory to learn that when this view of his letter was brought to his notice, Sarwat Pasha repudiated any such idea, and officially declared that he had had no intention of questioning the good faith of the representatives in Egypt of the British Press.

Mr. Brown's Protest.

In the meantime, Mr. Brown has addressed an official letter of protest to the High Commissioner. He characterises the *communiqué* referred to above as being contrary to the facts; he gives a detailed description of what took place at the Mudiria, and emphatically declares that the police employed every means in their power to prevent him leaving; and he would appear to make it clear that, even taking the time at which the Mudiria admits having first heard of the incident, there is a period of at least twenty-seven minutes to be accounted for. This conflict of statements requires very serious investigation, and it is to be hoped that a further inquiry will immediately be opened, both in the interests of those who issued the *communiqué* and of the foreign communities, who not unnaturally have been somewhat alarmed by the details of his treatment revealed by Mr. Brown.

The Constitution and Minorities.

The Constitution Commission is at last within sight of a conclusion of its labours. This week it considered the question of the representation of minorities, which it had put off until all the other important points had been dealt with. It has decided to reject the proposal for the provision of guaranteed representation of minorities in the new Parliament on the grounds that there is no need for such guarantee where the nation is united.

As the declaration of February 28 reserved to Great Britain, amongst other things, the protection of minorities, it remains to be seen whether, if the Cabinet leaves the question as it now stands, the British Government will insist on the provision in the new Constitution of a guarantee of minimum representation for the more important minorities, or whether it will content itself with the present decision and reserve to itself the right to intervene, if and when members of any minority appeal for its protection.

There is no need, I feel, for me to deal with the various arguments put forward by both sides; but it has been interesting to note how extraordinarily the interpretation of the position in regard to Great Britain's reservation of the protection of minorities has varied amongst even the most instructed Egyptians, and how illogical and inconsistent some of them have been in their deductions.

pleted her passage of the Canal during the night, and few people are aware that Zaghlul Pasha was on board.

[H.M.S. Curlew arrived at Gibraltar on September 3.—ED.]

ROUMANIA.

Bucharest, August 29.

Cabinet Council.

As foreshadowed in my last letter, the last Ministers' Council, which was held at Sinaia on August 24, has decided to convoke Parliament for a short extraordinary session to take place during the first half of October. The chief activity of the Assembly will consist in the readjustment of the Budget in accordance with the present improved financial situation, with a view to allocate part of the budgetary surplus, which will be available on September 30, to a special fund required for the betterment of the State employees' lot. An increase of wages will be granted as from October 1, and will be accorded to all State functionaries, including magistrates, as well as to military officers.

The Prague Conference.

The local Press emphasises the importance of the Prague Conference of States constituting the Little Entente, the main object of which is to exchange views on the questions that will be discussed at the next meeting of the League of Nations, to take place at Genoa on September 4. At Prague the representative of the Little Entente in the League of Nations will be elected. M. Duca, Roumania's delegate, left Bucharest for Prague last Thursday evening, in order to take part also at a preliminary conference, which was held on the 27th between the Foreign Ministers of Czecho-Slovakia, Yugoslavia, and Roumania.

The Coronation.

It was decided at the last Ministers' Council that the coronation of the King and Queen of Roumania, which has been postponed several times, shall take place this autumn—most likely in October.

Marshal Pilsudski's Visit.

A report from Warsaw states that Marshal Pilsudski's visit to Bucharest is again "on the tapis." The exact date of his departure for Roumania is not yet known, but he is expected to leave about the middle of September. The President of the Polish Republic will be accompanied by M. Narutovici, Minister for Foreign Affairs.

It is further rumoured that the King of Roumania will return this visit some time during this autumn, in which event he will be quartered in the old Royal Palace of Warsaw, which will be specially prepared for the occasion.

A Roumano-Hungarian Union?

It is not amiss to mention the effect produced on the imagination of certain Magyar journalists in Transylvania by the meeting which is supposed to have taken place at the picturesque summer resort, Dorna Vatra (Bukovina), between M. I. C. Bratianu and Count Bethlen, the Hungarian Prime Minister. These journalists profess to know that the two Premiers discussed the possibility of a union between the two countries, which could easily be achieved by offering the Hungarian throne to Prince Nicholas of Roumania. The same source has it that the leading politicians in Budapest are very eager for this union, which would—among other advantages—enable Hungary to develop her industry, since her factories are sorely in need of raw materials from Transylvania. Also the Magyars of Transylvania are said to be heart and soul for such a union.

It is further reported that Count Teleky, the former Hungarian Prime Minister, is supposed to be sojourning at present at Sinaia.

War Indemnities.

After the close of the Genoa Conference, Germany promised to send a Commission to Roumania to settle the manifold questions of war indemnities pending between the two countries. The Commission continually deferred its arrival until at last it was generally thought that the idea had been dropped. Germany has now reverted, however, to her promise made at Genoa, and a Commission, consisting of financiers, announced its arrival for September 15. The principal subjects of discussion will be the restitution of all that Germany took from Roumania during the time of occupation, the war indemnities which Germany is obliged to pay according to the Versailles Treaty, and various financial questions, including the redemption of the Banca Generala notes issued by the German military authorities during the occupation.

Miscellaneous.

The Roumanian Commission entrusted with the identification of materials taken by the Bulgarians from Roumania during the war has now discovered in Bulgarian ports 40 tank-cars, which had been repainted, apparently to prevent recognition. The Bulgarian Government has already been approached on the subject and asked to return them.

The State Railways.

Some time ago it was confidently reported that the present general manager of the railways, M. Tancred Constantinescu, intended to resign, but had postponed the step at the special request of the Government, who could not decide upon a successor. The report has now been revived, and it is stated that M. Alexander Perietzeanu, a former

general manager of the railways, is being pressed to resume this important post. At first he declined, but is now said to have accepted on condition that the railway system becomes an autonomous institution independent of any political influence. In no other way, according to M. Perietzeanu, can it prosper and respond fully to the present need for national economy.

The Conversion Loan.

There were rumours lately that the difficulties raised by certain important French holders of Roumanian Treasury Bonds had not been overcome, in spite of the fact that the new Loan was already being floated on the London market. The Ministry of Finance has now received from the Roumanian Legation in Paris a statement to the effect that this difficulty has at last been settled to the satisfaction of both parties. M. Victor Antonescu further announces that on paying a visit to the Governor of the Bank of France, the latter expressed his satisfaction with the way the entire consolidation question has been settled, and at the same time assured the Roumanian Government of the support of the Banque de France as well as of that of the French Government in the efforts required for making the Conversion Loan a success.

BULGARIA.

Sofia, September 7.

The Retort Courteous.

In last week's letter I quoted *in extenso* the Note transmitted to M. Stambolisky by the Diplomatic Corps. This Note protested against the Prime Minister's treatment of the foreign representatives in Sofia. Three days ago M. Stambolisky replied to the following effect:—

"With reference to the Note in which you express regret that the representatives of the foreign Powers in Bulgaria encounter difficulties owing to not being received sufficiently often by me, I recognise that lately I have not kept in close touch with the Diplomatic Corps, but I would remark that my absence has been caused solely by advice tendered me by my doctor. In addition, I would remind your Excellency that, when absent from Sofia, I leave one of my colleagues in charge, and that the Secretary-General, who is always in touch with me, is also at the disposition of the Diplomatic Corps. This being said, it is impossible for me to pass over in silence certain passages of your Note, which refer to internal matters, and are quite apart from the subject of the Note. I am astonished at these passages and deeply regret them."

Practically all the Diplomatists were received by M. Stambolisky before this Note was drafted, and in view of the conciliatory attitude adopted by the Bulgarian Prime Minister it is considered that the incident is closed. At the same time the fact that the Diplomatic Corps insinuated that M. Stambolisky is unwilling to return to Sofia owing to fear of political assassination is not forgotten. It is understood that the "certain passages" mentioned by M. Stambolisky are regretted even by the authors themselves. Certainly they have not served any useful purpose. After all, the Prime Minister of a Balkan country rarely enjoys such a measure of popularity that enables him to dispense with precautions for his personal safety. M. Stambolisky is no exception to the rule, and he is governing at a time when political feeling runs very high.

Motor Crimes.

The month of August has been singularly free from murders, but September has already provided two daring motor crimes. In both cases the *apaches* selected the road from Banki to Sofia as the venue of their operations. Banki is a health resort situated ten miles from Sofia. In the first case an open touring car was fired at, and a young and well-known Bulgarian actress, Mlle. Shopova, who was sitting beside the chauffeur, was instantly killed. Although upwards of thirty shots were fired, the chauffeur was able to continue control of the car and managed to escape.

The other crime was not attended by violence, but all the occupants of the taxicab were robbed of their belongings.

Certain local newspapers were not slow in pointing out that two Ministers, MM. Manovloff and Thomoff, Minister of Railways and of War respectively, were due to return from Banki to Sofia that same evening, and that Mlle. Shopova owed her death to her car being mistaken for that of the Ministers. This is as may be, but it is distressing that, as has been the case with previous murders, no news is yet to hand regarding the identity of the criminals.

A Communist Trick.

The Russian Legation has been the scene of an amusing episode. Certain Communistic agents, desirous of discrediting the old Russian régime in the eyes of the Bulgarian Government, contrived to place a quantity of old war material in the garden of the Legation. Directly this had been done they told the Bulgarian police that they had reasons to believe that Wrangel's army was planning another *coup d'état* against Bulgaria and that a search in the Legation garden would reveal the truth of their statement.

Their trick did not, however, succeed, as the Russian Minister was aware of the proceedings and informed the authorities before the Communists had finished installing the material in his garden!

The question is now asked, From where did the Communists secure the war material? Perhaps the Inter-Allied Military Organ of Liquidation will be called upon to investigate this matter.

The Military Organ of Liquidation.

Whilst on the subject of the Organ of Liquidation, it is worthy of remark that the "Organ" has now been in operation for more than double the time that was originally intended. No doubt the members thereof enjoy the Bulgarian summer and are in no hurry to leave. Perhaps even the Bulgarian Government are at heart also glad to have the "Organ," as it serves as a useful prop against the constant accusations brought against Bulgaria by her neighbours. Still, a casual observer does feel curious as to what the "Organ" is doing, how long it proposes to stay, and last, but not least, how much its members are paid?

General News.

Owing to illness, General Savoff, Bulgarian Minister in Paris, is unable to attend the League of Nations Assembly at Geneva. He has been replaced by Colonel Noykoff.

M. Georges Picot, the French Minister, has gone on leave, and M. le Comte de Sartige, of the French Legation in Bucharest, is acting as Chargé d'Affaires.

PALESTINE.

Jerusalem, September 3.

The Arabs and the Government.

The most resounding event recently in Palestine's little world has been the return of the Arab Delegation from England. They reached Haifa on August 21, and reported themselves to the "Fifth Arab Congress" at Nablus two days later. The attitude of those assembled at this Congress

was that the critical moment had at last arrived; the return of their nominees, who were to plead the cause of Arab Palestine, together with the ratification of a Mandate of which the Jewish National Home policy was an integral part—all this the Congress could only interpret as the failure of their past methods and a call to assert their existence in more telling fashion. The main resolutions arrived at were :—(a) To send out further delegations to America, to Arabia (this must be to Ibn Saud and his Wahabis), and to "Eastern Countries" (apparently meaning the Angora Government); (b) a detailed statement is to be drawn up on the Arab question generally, and a permanent "Palestine House" set up in London to continue the work of the Delegation there. To fulfil these proposals will be expensive, and the Arabs themselves are wondering where the money is to come from. Such activities are, from the Arab point of view, defensible and desirable; the only question is whether they will be worth the outlay. Another series of resolutions has as its purpose the setting up of a reign of non-co-operation with the established Government—non-recognition of the Constitution, and non-co-operation in the elections to the Legislative Assembly. What is of more immediate seriousness is the decision to boycott all trade with Jews.

This boycott was resolved upon a week ago, but it has not yet come into operation; it awaits the views of the inner Executive Council of the Moslem-Christian Association, which is to meet one of these days, as to time and methods. This Executive Council has been newly formed. It was decided at the last session of the Congress to include in the executive the members of the Delegation to London, and to add to them a representative from each town of Palestine, one from the tribes of the Beersheba district and two for those in the Beisan districts. Musa Kazem Pasha, the head of the London Delegation, was unanimously elected President, and Sheikh el Muzaffar, who had headed the Delegation to Mecca, as Vice-President; the rest of the committee now consists of a delegate each from Jaffa, Ramleh, Gaza, Nablus, Hebron, Beersheba, Tul-Karem, Tiberias, Nazareth, Safed, Akka, Jenin, and one for Arab Palestinians resident abroad.

The Rift in the Lute.

An "Economic Committee" has already submitted a lengthy memorandum to the Nablus Congress on the need for such a boycott, and how to carry it out effectively. It recommends beginning on a specified day, before which time the most active propaganda is to be carried out by special committees and representatives in every corner of the country, to persuade all alike as to the necessity for the measure. These same agents are to maintain constant touch with the Arab merchants and tradesmen with a view to influencing them to lower the prices of their goods and to be content with moderate profits. On the positive side, it recommends the formation of co-operative groups with adequate capital, throughout the length and breadth of the country, which shall aim at satisfying all the commercial needs of each community, and wipe out in detail such Jewish competition as shall anywhere raise its head. It then goes on to point out how in Bethlehem alone there are resources in money and commercial ability to set up large stores and businesses in Jerusalem and the larger towns of Palestine, and compete with the strongest and most modern Jewish enterprises. And, lastly, the memorandum treats along obvious lines the methods to be applied in the case of recalcitrant Arabs who refuse to join wholeheartedly in the boycott.

On all these resolutions the comments of an Arab paper, the *Lisan el-Arab*, seem the most apt: "We do not know whether these resolutions have been passed unanimously, or by large or small majorities, or which delegates voted for or against them [the Congress was held behind closed doors]; in any case, these resolutions assume a great responsibility, if not political, at any rate moral, and require large sums of money. The responsibility is great enough, but, so far as we know, there is not much money, and the country is in a critical state, if not at an absolute financial crisis, which we do not think will be helped by the boycott declared. We do not know how the country, which is in such financial straits, and which will not be assisted by the boycott, will find the necessary money for all these great works." The same paper goes on to compare the action of the Arab Congress in fixing a programme before it has a budget to the action of the man who buys reins and pulls them before he has bought a horse, and then continues: "We are unable to refrain from commenting on the fact that the Arab Congress displayed the spirit of extremism, and we do not know whether such extremism is suited to the present condition of the country or is for its benefit, especially after we have seen the damage caused by such actions in other countries which are richer and more developed than Palestine."

In view of the gravity of the measures that are being adopted by the members of this "Congress," it should be borne in mind that the members do not hold their position by right of popular election. As representing the landed, the educated, and the professional classes, they are performing a national duty in putting the case of their people to the world at large. Yet their position as casual members of an improvised Congress does not give

them the right to dragoon their fellow Arabs along lines of action which impinge so grossly on the individual Arab's liberty, a point which is beginning to be expressed somewhat forcibly by the various prospective victims.

Immigration Returns.

The returns of immigrants entering Palestine during July give the total of 349 only. Of these, 56 come under the category of "persons of independent means who intend to take up permanent residence in Palestine, 3 "members of professions who intend to follow their calling," 219 "wives, children, and relations wholly dependent on residents in Palestine," the remaining 71 are persons, with their dependents, who "have a definite prospect of employment with specified employers or enterprises."

Political Crimes.

Since the ratification of the Mandate no fewer than seven cases of murder or attempted murder have been committed against Jews by Arabs. Although this is not largely in excess of the usual rate of loss of life due to armed robbery, these recent cases are supposed to be purely political, there being no question of robbery, and no personal motives traceable in any particular case. There has, naturally, been a great outcry from the side of the Jews. But what gives the ugliest complexion to things is the fact that certain Arabs have been murdered, apparently in the same indiscriminate way, by Jews.

IRAQ (Mesopotamia).

Baghdad, August 23.

The Serai Incident.

August 23, being the first anniversary of the accession of King Faisal, was observed throughout the country as a public holiday. The day was marred, however, by an unpleasant incident, which reflects the greatest discredit on the King's personal staff, and has been followed by important developments. As is usual on the occasion of big public holidays, the King, after attending prayers, and on this occasion after a review of the troops of the Arab Army stationed in Baghdad, and the presentation of colours to one of the regiments, held a reception in the Serai, at which the various classes of visitors were received in audience at fixed times. The High Commissioner, on arrival at the Serai at the time fixed for him, found the crowd around the King's reception room engrossed in listening to a speech which was being delivered from the balcony, and which it was afterwards discovered was inflammatory and anti-British. At the same time, after Sir Percy Cox's car had pushed its way through the crowd and he had begun to ascend the stairs leading to the reception rooms, cheers and clapping arose in reply to a cry the purport of which the High Commissioner was unable to catch, but which subsequent inquiries proved to be "Down with the Mandate." This was a direct affront to His Majesty's Government, for the High Commissioner was at the time paying an official visit to congratulate King Faisal on the anniversary of his accession, and, as such, serious notice had to be taken of it. The High Commissioner then wrote to King Faisal pointing out the circumstances, and informing him that he had reported the matter to the British Government. At the same time he demanded an apology, the immediate dismissal of Fahmi al Mudarris, the King's Chamberlain, who, as inquiries showed, had organised or, at any rate, had given permission for the demonstration, and asked what steps the King proposed to take regarding the persons responsible for making the anti-British speeches. The King's reply expressed regret at what had occurred, and promised to make amends and to comply with the High Commissioner's wishes, while at the same time expressing the hope that the High Commissioner would forget the episode. The whole episode was an unfortunate occurrence, which marred what should have been an auspicious day.

The King's Health.

On the following day it was announced that the King was suffering from a bad attack of appendicitis, and had to undergo an operation at once. The operation was successful, and the King is making good progress towards recovery, but will not be able to resume his duties for some time. There is still no Cabinet, as no new Ministers have been appointed since the resignation of the Naqib's Cabinet some three weeks ago. In these circumstances the High Commissioner alone remained responsible for the administration of the country and the maintenance of law and order.

Unrest and a Corrective.

During the past few weeks the state of the country has become very unsettled owing to the activities of the extreme Nationalists, who have been demanding the removal of the British Advisers, the abrogation of the Mandate, and the boycott of the elections, if they are held while the present form of administration exists. Finally, a long *fatwah* to that effect, issued by S. Muhammad Sadr ud Din, appeared in the *Mufid*, one of the extremist newspapers, and on August 23 there appeared in the *Mufid* and the *Rafidan*, the other extremist paper, a resolution which had been passed by a joint committee of the Hizb al Watani and the Hizb al Nahdhah, the two Nationalist parties, which was directed against the existing form of government and was a direct incitement to sedition and disorder. These happenings in Baghdad and the very unsettled state of some of the out-districts, especially the Hillah division, made it essential that some very firm action should be taken if serious trouble was to be avoided. On Saturday it became known that the High Commissioner had himself taken a strong line and had ordered the arrest of seven of the Nationalist leaders, the suppression of the *Mufid* and the *Rafidan* and the arrest of their editors, and the closing of the Hizb al Watani and the Hizb al Nahdhah until adequate guarantees could be provided that their business would in future be carried on in a legitimate manner. In the evening he issued a proclamation in which, after setting out the events which had led up to the present crisis and the action he had been compelled to take, he called on all people who have the interests of the country at heart to stand firm and to see that there was no disturbances of the peace and no incidents which might endanger the continuation of the happy relations which have existed hitherto between the Governments of Great Britain and Iraq. At the same time, he warned townsman and tribesman that he would take very drastic action against anyone who did anything calculated to produce unrest or breaches of the peace.

The effect of this action was magical. The Nationalists have completely collapsed and the country is in a much more stable condition than it has been for several months, while another frequent source of trouble has been removed by the departure for Persia of S. Muhammad Sadr ud Din and S. Muhammad, the son of Su Mahdi al Khalisi, two prominent Shiah Ulema, who have been prominent among the Nationalist leaders. It is hoped that things will now settle down

Digitized by Google

and that it will be possible for the country to make some progress.

Fire and Water.

Several fires have occurred recently in Baghdad, one being serious, as it burnt out some twenty houses in a very crowded part of the city. On every occasion the Baghdad municipal fire brigade has shown the most commendable promptitude and has done very good work, but it is often hampered by the inefficiency of the water supply, which makes it necessary to obtain water direct from the river. When fires, as in the case of the recent big one, are some distance from the river, it means that there is considerable delay in getting to work until the military fire engine can be brought up from Hinaidi cantonments to render assistance. It is satisfactory to know that plans for a new water supply are now being drawn up, and are said to be nearing completion.

Miscellaneous Items.

Advices from Basrah show that a good deal of grain is being exported this year, and two or three boats have already left. Meanwhile the price of grain is hardening, and must almost have reached the point at which exporting is profitable.

A fatal flying accident occurred on the Hinaidi aerodrome a few days ago. One aeroplane crashed from a height of some 500 feet, the officer pilot and the N.C.O. who was with him being killed.

PERSIA.

Teheran, August 21.

The Operations Against Simko.

The expedition which I mentioned in my last letter the Minister of War was preparing against the Kurdish rebel, Ismail Agha Simko, resulted last week in complete success for the Government forces. In this, as in previous expeditions against disturbers of the peace in other parts of the country, Sardar Sepah has given further proof of his capabilities as Commander-in-Chief, and of his ability to cope with internal troubles, if provided with the necessary sinews of war in the shape of funds wherewith to pay his troops. He has also shown that the army of his creation is a serious fighting force to be reckoned with, and not merely a collection of "Chocolate soldiers," as formerly. The Government troops advanced from the north into territory between Lake Urmiah and the frontier of Turkish Kurdistan on the west, and after occupying Salmas attacked Simko's stronghold and headquarters, the fortress of Chehrigh, which, after some hours' fighting, was captured. The Army Commander's report does not give full particulars, but it appears that considerable casualties were inflicted on the rebels, and a number of guns fell into the hands of the Government troops, including those taken from them at the reverse sustained at Saoujboulagh a couple of months ago. The pursuit of the rebels continues, and Urmiah is expected to be occupied by the Government forces very soon, if this has not already taken place. Simko himself fled, presumably across the frontier, and his present whereabouts are unknown. He has been a thorn in the side of the Persian Government for many years, and with the Kurds of the district to the west of Lake Urmiah he has always defied the authority of the Central Government, as did his father and grandfather before him. Simko was taken prisoner during the Premiership of Vossough-ed-Dowleh in 1919, and liberated by the orders of the latter, to whom, consequently, the local Press attributes the responsibility for the situation in that part of the country, and the cost to the Government in money and men of the present and past expeditions against Simko.

To celebrate the Government victory over Simko a display of fireworks took place yesterday evening on the Parade Ground, where earlier in the day four rebels, captured by the Government troops, were shot.

A Reverse in the South.

The satisfaction felt at this success has been tempered to a certain extent by the news which was received a few days ago of a disaster to a small Government force in the south. It appears that a detachment, about 250 strong, left Isfahan some weeks ago for Ahwaz, and, while traversing the Bakhtiari country, it was ambushed by tribesmen near Shelil. The wild, mountainous nature of the country lends itself to an attack of this sort, and the column stood little chance; it was practically wiped out, very few escaping. It is not yet known to what tribe the perpetrators of the outrage belonged, and although it occurred in Bakhtiari territory, the latter tribe disclaims all responsibility, and accuses the Kuhgeloos, whose country lies to the south-east of theirs. The Minister of War is at present investigating the matter and endeavouring to trace those responsible.

The Northern Oil Concession.

No progress has been made in regard to the Northern Oil concession; and the Government seems as far off reaching a decision as ever. Although the granting of the concession is practically the only hope the Government has of raising the funds of which it is so sorely in need, it would appear to be awaiting the arrival of the financial advisers who are expected to leave America for Persia next month. One of the Sinclair Company's representatives has left Teheran in disgust at the unsatisfactory result of his negotiations with the Government and their dilatory methods. The company's other representatives last week addressed a letter to the President of the Majless protesting against the delay in arriving at a decision, and pointing out that the Sinclair Company is a responsible concern; that it has now been negotiating for eight months, and has made a serious offer in all good faith to the Persian Government, who, although it has been considering it ever since, and has promised a definite reply, one way or the other, has put it off from time to time; and that the company can waste no more time, and unless a reply is forthcoming very soon it will be compelled to withdraw its offer. This dilly-dallying on the part of the Cabinet on a question of such undoubted importance for the future of the country, financial and economic, has occasioned severe criticism of the Premier and his policy, and the result of the Sinclair Company's representative's letter was that a special session of the Majless was summoned some days ago, which the Prime Minister and Cabinet attended. The President was authorised to form a Commission composed of prominent politicians and deputies to examine the relative offers of the Standard and the Sinclair Companies and to report to Parliament. This Commission is expected to submit the result of its deliberations in a few days.

GEORGIA AND ITALY.

The arrogance of the Georgian Bolshevists apparently knows no limits, when it is stimulated by instructions from Moscow (writes a correspondent of the *Daily Telegraph*). After seizing British-owned vessels at Batoum and expelling all British nationals from the country, the Georgian Soviet has now coolly informed the Italian Legation at Tiflis that it declines to accord it any recognition. This is an act, not only of discourtesy, but of signal ingratitude towards the one Entente Power which had continued to maintain a legation at Tiflis after the Bolshevisation of Georgia, perhaps out of regard for Moscow. One trembles to think of the fate reserved to the representatives of the two French syndicates which are just now quietly vieing with each other for concessions from the Georgian Soviet!

CORRESPONDENCE.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper.

TURKEY.

To the Editor of THE NEAR EAST.

Sir,—It is gratifying to learn from your Constantinople correspondent "C." that "there is no one who has lived in Turkey who would not, instinctively, subscribe to the main object of the 'Near and Middle East Association'—the maintenance of a sympathetic attitude towards Moslem sentiment in the British Empire and the Moslem world at large."

This object, however, is, in England, no "pious platitude," as "C." suggests. Unfortunately, the crusading spirit still lingers, and there are priests who profess and call themselves Christians who would be surprised and shocked to learn that a sympathetic attitude "towards the Moslem is part and parcel of the Christian faith."

There still exists, as when Colonel Burnaby wrote in 1878, "some few clergymen of the Church of England who, secretly hankering after the superstition attached to the Greek faith . . . would gladly re-establish the Inquisition in our midst. They could defend the massacres of St. Bartholomew, if the victims had been Mohammedans; and on the seventh day of the week they stand up in their pulpits and preach the doctrine of peace by advocating the extermination of the Turks."

"C.'s" suggestion that some such similar organisation as the Near and Middle East Association should be formed by the Turks with the object of promoting "the maintenance of a sympathetic attitude towards Christian sentiment in the Turkish Empire and the Christian world at large" is an excellent one.

Once the Turkish homelands are restored and peace established, a society of this sort might be of immense service in obliterating the legacy of hatred left by the invaders. But the success of and the support given to any such movement would, in a large measure, depend upon the attitude of Christianity within and without the Turkish Empire.

Let the Powers agree to sink their jealousies and ambitions and work whole-heartedly for the welfare of the Ottoman people, whether Moslem or Christian, to stop the introduction into Turkey of agents-provocateurs, to discourage propaganda by the priests of the Greek Church and by foreign missions and schoolmasters who were, as Sir Edwin Pears says in his book, "Forty Years in Constantinople," "in a very real sense the fomenters of political agitation," and, finally, to suppress the Armenian revolutionary committees in Europe and America; then the success of such an organisation would be assured, and the good-natured and kindly Turk might be trusted to forgive and forget the wrongs of the past.

In conclusion, let me correct "C.'s" statement that the objects of the Near and Middle East Association "advocate the return to Turkey of practically all that she lost in the war," the three-fourths of her territory comprising Mesopotamia, Syria, Palestine, and Arabia.

The Near and Middle East Association ask simply for the restitution of Eastern Thrace and Anatolia, districts of which she was never deprived during the war, but which were filched from her during a time of Armistice, and this despite Mr. Lloyd George's pledge to the Indian Moslems upon which Turkey relied when she unconditionally surrendered.

I am, etc.,
C. F. DIXON-JOHNSON.

PRESS ON THE NEAR EAST.

The Turk of Anatolia.

There is a good character sketch of the Anatolian Turk in the August issue of the *Review of Reviews*, by Roy Elston. According to this writer, the Anatolian Turk "is really a very normal person." His primitive vice is nearer to the surface than with us; so also are his primitive virtues. His hostility to the Armenians Mr. Elston attributes to the sinister usury practised by the Armenians in Anatolia. There is a similar bitterness between Greek and Turk, but he does not consider that the Ottoman dislike of the Greek is a very deep one. It has been alternately fanned and allayed, and has resulted in a mutual distrust that sometimes ends in bloodshed, and "very often it is merely opportunity that decides which of the two is the more lawless." The Christian races of Asia Minor are superior, economically, to their Turkish neighbours; "however, so far as an 'unspeakable' nature is concerned, the Turk is really no worse than Greek or Armenian, and, of course, no better." Mr. Elston continues:—

> Massacre and cruelty have occurred and do occur to horrify the world from time to time: and, of course, I do not desire to condone these things. I wish only to insist that the true Anatolian Turk—and here I do not include the Kurds, Circassians, and Black Sea Lazis, who are not true Ottomans at all—has no love for needless cruelty, though if, according to his morals, which obviously and naturally differ from ours, he considers the occasion merits it, and there is no other way of securing what, to him, is a legitimate end, he does not shrink from deeds that, despite our European War, causes us to turn shocked eyes to heaven.
>
> If we would seek to find the cause of massacre and outrage in Asia Minor we must look to the administrative fortune-seekers of Stamboul. A great pity it is that people have so often judged the Turks by a handful—city-full if you will—of corrupt administrators. A very great difference exists between these Turks of Stamboul and those of Anatolia—the difference between an artificial and a natural environment; and one is sometimes forced to the conclusion that the greatest disaster in Turkish history was the capture of Constantinople, and the retention by its captors

of a Byzantine legacy of intrigue and luxury, a legacy clung to by successive Sultans and bureaucracies till only complete revolution now can cleanse the Porte of accumulated vice.

Effete, corrupt, "unspeakable" even, might fit the state of the Ottoman Court; it certainly cannot be said of the Anatolian Turk, in whom reposes to this day much of that same vigour and virility that made an empire of a tribe, and extended that empire's will from Baghdad to Cairo, from Buda Pesth to the Black Sea. At present that vigour and virility would seem to be slumbering; and for this there are two causes over and above the corrupt state of the governing classes: one of these causes is the lack of a brilliant and trustworthy leader whom the people could regard as an instrument of Allah; the other, the careless, liberal ideas on religion and politics that have filtered from Europe to Asia.

The first of these reasons is easily understood: the Ottoman of Anatolia requires a contemporary hero whose actions and intentions are not subtle, but obvious; he cannot, himself, see into the minute details of modern diplomacy; he cannot understand the trend of his country's fortunes when not one man but a score seems to be directing them; and so he goes on in the dark, fulfilling, as well as he may, the simple teachings of the Koran. What comes or goes he accepts with a shrug of the shoulders and a pious ejaculation, and the time seems to him very distant when events had any meaning worth his bothering about. Without some strong mind to rouse him from his lethargy, and instil in him the fire of ambition, he will continue in the careless, slothful existence that may at length destroy his stamina.

The second reason is not, perhaps, so easy for a Western mind to appreciate; but it is a dangerous reason none the less. The subtle, almost invisible, penetration of Western ideas into Turkey greatly affects the character of the peasants, and affects it in a way that spells disaster. Already the Islamic religion in Turkey is losing that vigorous militancy that once distinguished it; much of that militancy, I agree, could have been modified without harm, but in so far as liberal ideas are destroying the discipline and strength of the Church, Turkey as a nation is being morally weakened, is losing one of its greatest incentives; and this is due, in certain measure, to that Western influence which leads men to think a great deal more of freedom than of duty, of self than of nation.

When I speak of Western ideas, I do not mean those progressive ideas of commerce and industry—Turkey has room for some of those ideas—but social ideas, the "high-falutin" doctrines which seem to destroy the need for individual thought, destroy that thought itself, and feed the mind with dreamy vaporous utopias: even far afield in Anatolia one occasionally hears repeated those moral and social platitudes with which the Western world in recent years has become so painfully familiar: and absurd enough they sound from the lips of these strong-looking dignified Turks, whose very nature breathes robust conservatism.

Despite this, one must admit that, in certain social directions, the Turk could profit by the careful acceptance of one or two Western institutions: such, for example, as the traditional family life of Europe; such life with these peasants has, I fear, degenerated. They have physical desires, they require cheap labour for the fields and the forests, they recognise the national necessity for propagation; indeed for a purely political reason, this necessity is drilled constantly into their minds by the authorities: and that is all their family or home life consists of; in no sense is there anything beautiful or inspiring about it, save when a Turkish mother rocks her babe to sleep as sweetly as any mother in the world.

All this has been said in an endeavour to show that the Turk of Anatolia is neither "unspeakable" nor greatly to be admired. Centuries of maladministration, the lack of great national figures, the growing carelessness of thought: all these things have done their best to reduce the Turk to impotency. Notwithstanding this, the spirit of his forefathers smoulders still in the blood of the Anatolian peasant: whether at length it will die out or blaze again to strength and greatness is a matter purely for conjecture. Those who have dwelt in Anatolia are optimistic.

NEAR EAST BOOKSHELF.

EMMELINE VERINDER.

"SPINSTER OF THIS PARISH." By W. B. Maxwell. (London: Thornton Butterworth. 7/6 net.)

This is one of the most charming and successful of Mr. Maxwell's novels. It is told at length, and in his leisurely manner, but everything combines to give one clear, beautifully built up impression. He has achieved something really noteworthy in the creation of Emmeline Verinder, the quiet, old-maidish lady living in South Kensington, with her faithful maid, her cat, and her parrot, keeping to her punctilious habits, while behind her lie the amazing adventures of her journey in the Andes with Anthony Dyke, and in her heart there is always the thought of him and his welfare on his great journeys of exploration. Where Mr. Maxwell has been so successful is in showing us that when Emmie leaves her parents' solid house in Cromwell Road to go to Dyke, when she follows him on board his ship at Liverpool, when she shoots the South American bandit just in time to save her Anthony's life, and, later, when she speculates wildly and successfully so that he may not lack funds for his ventures, she is exactly the same person in every detail of character and outlook as gentle Miss Verinder primly counting the spoonfuls of tea into her silver teapot. Had she ever for a moment been different, we are made to feel that Dyke, the huge, tempestuous explorer, could not have loved her unswervingly and devotedly as he did, and always turned to her for help, as to a sure refuge.

Never have we felt that the characters in a novel were so certain to "live happily ever afterwards" as we do of these two, when, after twenty-five years, Dyke, freed at last by the death of his poor mad wife, stands by Emmie's side to hear their banns called.

Mr. Maxwell writes with the same precise touch and air of authority of the rise of South Kensington and of the barren rocks of the Andes. We could have done without the story of Miss Verinder's successful venture in financing a theatrical production, which does not seem to us quite up to the level of the rest, and is the only thing that makes us feel that the book might have been shorter.

Earl Winterton, who left for India a fortnight ago, will return to London at the end of November.

Major Blake, the airman, left Bombay for England on September 9 on board the "Plassy."

Lieutenant-General Sir John and Ladv Du Cane are spending this month in Venice and at Cadenabbia.

The Emir Zaid, youngest son of the King of the Hejaz, touched at Aden on his way to Iraq last week.

Sir Ronald Graham left London for Rome last week. Lady Sybil Graham will shortly join him.

M. Milan Stevanovitch, Secretary to the Legation of the Kingdom of Serbs, Croats, and Slovenes, left London for Bournemouth last week.

The Hon. Lady Lloyd left London last week for a stay of several weeks at Dinard, before her departure for India.

Recent appointments at Robert College include that of Professor Chester F. Lay, of Chicago University, to the Professorship of Commerce.

Dr. Christine E. Essenberg has been appointed Professor of Biology at Constantinople Women's College.

M. Mastny, the Czecho-Slovak Minister in London, arrived at Rio de Janeiro last week to represent his State at the Brazilian Centenary celebrations.

Colonel Sir Roper Parkington, chairman of the Montenegrin Red Cross and Relief Fund, has sent to *The Times* correspondent in Rome £500 for the relief of destitute Montenegrins in that city.

The Earl of Shaftesbury, accompanied by Lord Ashley and Lady Mary Ashley, arrived last week at Zampach Castle, Czecho-Slovakia, on a visit to the Dowager Countess von Lützow.

Mr. and Mrs. Francis A. Anderson left Enderby Hall, Leicestershire, last week, for Athens, where Mr. Anderson is resuming his duties as Attaché to the British Legation.

Lord Allenby left Egypt on Friday, September 8, by special train for Jerusalem. He was present at the proclamation of the Mandate, and returned to Egypt on Tuesday.

Sir Ali Imam Syed, former Law Member of the Governor-General's Council, has resigned his office as Prime Minister of Hyderabad. Sir Faridoon ul Mulk will act temporarily as Premier.

Mrs. Charlotte Cameron, O.B.E., has returned from Roumania, where she has been the guest of their Majesties King Ferdinand and Queen Marie at Castle Pelishor, their mountain home at Sinaia.

Lord Lee of Fareham, First Lord of the Admiralty, returned to London last week from his official visit of inspection to the Mediterranean Fleet, in Turkish waters, and has resumed his duties at the Admiralty.

Dr. John W. Shuman, of Sioux City, Ia., has joined the medical staff of the American University of Beirut. Dr. Shuman has specialised in internal medicine, and will fill the vacancy caused by the death of Dr. Graham.

The engagement is announced of Lieutenant Ian H. Morten, R.N., H.M.S. Marlborough, elder surviving son of Mr. and Mrs. John Garrett Morten, and Vivian May, youngest daughter of Mr. and Mrs. A. Baker, of Constantinople.

The engagement is announced between Mr. Alexander Paton, Royal Artillery, Abbottabad, N.W.F.P., India, only surviving son of Mr. and Mrs. Alexander Paton, 40, Hurlingham Court, S.W.6, and Sybil, elder daughter of Sir Grimwood and Lady Mears, Allahabad, U.P., India.

The engagement is announced between Captain Charles L. Sevenoaks, 24th Punjabis, eldest son of Mr. and Mrs. Sevenoaks, Srinagar, Kashmir, formerly of Tonbridge, Kent, and Norah Katherine, second daughter of the late W. J. Ager, Darjeeling, India, and Mrs. Ager, Hythe, Kent.

A marriage has been arranged, and will shortly take place, between Ernest Cornforth, of Lahore, India, son of Mr. and Mrs. William Cornforth, of Scarborough, and Hilda Gertrude, daughter of Mr. J. W. Witherington, of Newcastle-on-Tyne, and the Esplanade, Sunderland.

A marriage will take place in October between Captain Robert Henry Dundas Bolton, the Duke of Wellington's Regiment, elder son of E. C. Bolton, late of Mysore, India, and Aileen, youngest daughter of the late Louis Rivett-Carnac, Administrator-General of Bombay, and Mrs. Rivett-Carnac, 85, Addison Road, W.

The engagement is announced between Major Alexander Nairne Kerr, M.C., 38th Dogras, Indian Army, eldest son of the late Colonel J. M. Kerr (3rd Madras Cavalry) and Mrs. Kerr, and Eva Theresa, only daughter of Mr. and Mrs. Wayne, of Campfield, Battle. The wedding will take place early in October.

SCHOOL OF ORIENTAL STUDIES.
London Institution. Finsbury Circus, E.C.2.
ORIENTAL LANGUAGES AND RELIGIONS.
Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.
For particulars, apply to Sir E. DENISON ROSS, Director.

THE PERSIA SOCIETY.
President: Lord Lamington, G.C.M.G., G.C.I.E.
Founded in 1911 to study all questions of common interest to Great Britain and Persia.
Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1

Digitized by Google

A marriage has been arranged, and will shortly take place, between Captain William Ferguson Menzies, 7th Lancers, Indian Army (retired), third son of the late Sir Walter Menzies and Lady Menzies of Culcreuch, Fintry, Stirlingshire, and Kathleen Augusta Cheivey Capel-Cure, only daughter of the late Frederick Capel-Cure and Mrs. Capel-Cure.

Prince Nicholas Demetrie Ghika, of the National Bank, Bucharest, Roumania, who died on November 8, intestate, left estate in the United Kingdom, now sworn for the purposes of the English grant at £7,793. His widow, Princess Yvonne Ghika, being now resident in Roumania, letters of administration of his English estate have been granted in London to her attorney.

In response to a request from the civilian community in Basrah, Iraq, the Archbishop of Canterbury has nominated the Rev. Cyril W. Carter, A.K.C., as Civilian Chaplain at Basrah. Mr. Carter was ordained in 1914 to the curacy of St. John's, Upper Norwood, and has served as Chaplain to the Forces from 1918 to 1922 in Palestine and Mesopotamia (now Iraq), and lately with the Rhine Army. He sails next week, and is due at Basrah about the second week in October.

The General Committee of the Anglican and Eastern Churches Association will hold a reception in the Council Chamber of the Guildhall on Wednesday, October 25, at 6 p.m., when the guests of the Committee will include Archbishop Germanos, Metropolitan of Thyatira (Greek Orthodox), and Archbishop Eulogius, Metropolitan of Holm and Volhynia (Russian Orthodox). The Bishop of London, President of the Association, will be in the chair. The Orthodox Liturgy will be celebrated at the Russian Church, Buckingham Palace Road, at 10.30 a.m. the same day, when a sermon will be preached by the Right Rev. Dr. Gore.

It is announced that the King has approved the appointment of the Right Rev. Edward Harry Mansfield Waller, Bishop in Tinnevelly and Madura, to be Bishop of Madras, in succession to the Right Rev. Henry Whitehead, who has tendered his resignation, with effect from December 31, 1922. Bishop Waller, who is fifty-one years of age, is the son of the Rev. Dr. Waller, late Principal of St. John's Hall, Highbury. He was formerly a scholar of Corpus Christi College, Cambridge, and took Second-Class Honours in Classics. He became a tutor at St. John's Hall in 1893 and assistant chaplain on his ordination in 1894. Three years later, he went to India as Vice-Principal of St. Paul's Divinity School, Allahabad, succeeding to the Principalship in 1903. From there he went as Principal to Jay Narayan's School, Benares, and in 1909 became C.M.S. Secretary, United Provinces, and Secretary of the C.M.S. (Indian group) in 1913. He was made a canon of Lucknow in 1910, and was consecrated Bishop in Tinnevelly and Madura in 1915. While at Cambridge he won the Colquhoun Sculls in 1892, and rowed in the University Eight in 1893.

OBITUARY.

The death took place last week at the Tropical Hospital, London, of Major Evelyn H. F. Apthorpe, of the 90th Punjabis.

Lieutenant-Colonel H. G. Bally, Commandant of the 10th Jats, I.A., died on September 4 at Queen Alexandra's Hospital, Millbank. He transferred to the Indian Army in 1900 from the West Riding Regiment, and took part in numerous frontier expeditions. In the late war he was selected to raise and train a battalion of the Bhopal Infantry, which he took on service to Mesopotamia, where he remained till the close of 1920.

In the death of the Maharajah of Jaipur, which took place on September 7, the British Empire loses another able and generous ruler in India. His name is associated with many benefactions to Indian and Imperial causes.

The death is announced of Mr. Wilfrid Scawen Blunt, at the age of 83 years. Mr. Blunt, who was in the Diplomatic Service from 1858 to 1869, will be remembered in the Near and Middle East for his association with Egypt, where he lived (near Cairo) for so many years, an uncompromising opponent of the British administration and supporter of the Egyptian extremists from the days of Arabi onwards. Artistic, literary, generous, unbalanced, unpractical, he leaves behind him a better record as a poet than as a politician. His services to Arab horse-breeding, in regard to which he was an enthusiast, will also not be forgotten.

Where to stay in the East

CAIRO

THE
CONTINENTAL - SAVOY
THE MOST UP-TO-DATE AND BEST SITUATED HOTEL IN CAIRO.

Entirely Renewed. Overlooking Ezbekieh Gardens. Opera Square. Famous Terraces. 300 Rooms. 150 Bathrooms. Cairo's Fashionable Grill-Room Restaurant. Daily Concerts. Weekly Dances. Open all the year round

MENA HOUSE HOTEL,

THURSDAY, SEPTEMBER 14, 1922.

GREAT BRITAIN AND THE NEAR EAST.

With the capture of Smyrna by the Turkish Nationalists the issue between Greece and Turkey may be regarded for the time being as settled, and the question that ought to engage both the British Government and the British public is that of Great Britain's relations with the Near East, which for better or for worse must endure for all time. Ever since the Armistice the Near East has been obscured, so far as the British Government is concerned, in an atmosphere of unreality, and, even now, among the public there is a tendency to ride off on prejudices in regard to the combatants rather than to consider Great Britain's position in that part of the world. Three lines of policy were open: to support the Greeks against the Turks, to support the Turks against the Greeks, or to behave as an enlightened Great Power, and, refusing to countenance their traditional antagonism, to work for peace in the Near East by pointing both to better things. Any one of the three courses could be supported by weighty arguments. The policy actually followed by Great Britain was, at a time when peace had been restored to the Near East by the Allied victory over Turkey, to pit the Greeks against the Turks, to encourage, if not actually to order, them to wage war in the most disadvantageous manner, from Smyrna into Anatolia, to handicap them by restricting their use of sea-power, in which they had overwhelming superiority, and to deprive them of all financial facilities, without which war cannot be successfully waged. Now, whether it was right or whether it was wrong to urge the Greeks against the Turks, there can be no doubt that it was Great Britain's duty, having urged them, to see the matter through. It is difficult to understand how any impartial judgment on British conduct can do otherwise than pronounce it despicable. That our original support was given to M. Venizelos, who was subsequently rejected by his countrymen, that the French proved difficult, or any other excuse does not really affect the case. The moral obliquy attaching to the whole business, however, sits lightly on the British public, and there would seem to be only one explanation. The British Government's policy has run so counter to the nation's views that, as soon as it is seen to have suffered shipwreck, the first feeling is one of relief that at last it will have to be abandoned, and there has scarcely been time to appreciate the other aspect of the policy, which is bound to make a deep impression on the outside world and which is the one that will determine the verdict of history.

What course, then, is the British Government going to adopt in the face of the débâcle attending its former action? It would be a mistake to take it for granted that there is to be an immediate change of policy. The line of action in regard to the Greeks in Asia Minor was persisted in so long after its failure was established that a similar blindness may govern future policy, unless Parliament or people can assert itself. For two or three years it was sought to justify British action by an appeal to the sacred cause of minorities. During that period Turks and Greeks have dealt with minorities as they thought fit, and, far from protecting the unfortunate people, Great Britain's policy has directly resulted in swelling the list of victims. With the victorious onrush of the Kemalist forces the sorry farce of trying to devise safeguards is dropped, and the only course that has ever been practicable, that of urging the Greeks not to provoke reprisals and of asking the Kemalists not to massacre, is to be adopted. Blindness in regard to Asia Minor is no longer possible, but it may be persisted in with reference to Thrace. Here the British Government seems prepared to pay the same homage to the sanctity of the Treaty of Sèvres as it did to the sacred cause of minorities in Asia Minor, and the result will presumably be the same. There will be the same friction with France, the Nationalist Turks will consider themselves as still fighting with their backs to the wall, and minorities wherever accessible will continue to suffer.

For three years the British Government has pursued a certain line of action in regard to Greece and Turkey, and at the end of the period—actually on August 4—Mr. Lloyd George stated the arguments on which his policy was based. Within four weeks arguments and policy, roundly denounced everywhere at the time, were completely demolished by the facts of the case. It would surely be only fair and prudent that the Prime Minister, forced now to modify his policy, should declare beforehand the arguments on which he is basing his new policy, in order that, if Government and people are again at variance, the latter should have an opportunity of weighing the motives which prompt the policy to which it is being committed. The position has been clarified by recent events. Mustapha Kemal Pasha is now master of Asia Minor, to flout Europe, to massacre at pleasure, or to prove a statesman and the regenerator of Turkey. Whether he imposes his presence as well as his will on Constantinople remains to be seen. It would not seem to matter much. Turkey without Asia Minor has been shown to be a useless burden to the Allies, and Great Britain's immediate concern is the restoration of peace in these regions. If Mustapha Kemal is going to control Turkey and is to be aggressively anti-British, the Turkish possession of Thrace will not add perceptibly to British troubles with Turkey. On the other hand, if an enemy cannot be "downed," it is better to make a friend of him as far as possible. It may prove to be the case that the Turks are serious in wanting to mind their own business in their own country: if this should be so, Great Britain will lose nothing by maintaining friendly relations with them. At all events, as Great Britain has declared her incapacity or unwillingness to cope with their enmity, prudence would suggest an attempt to placate them. The question of Thrace is understood to have a certain importance in the eyes of the British Government, because it represents all that is left of the wreck of the Treaty of Sèvres. But no one has succeeded in attaching any value at all to the Treaty as a whole; it is difficult, therefore, to see how part of it can be valuable. It were surely better to acknowledge the whole to be a mistake, and to start all over again. It matters not how much ground has to be dug up again. The important thing now is lasting peace or the nearest approach to it. The Treaty of Sèvres conformed to no recognised principles, and for that reason there is nothing in it that can be salved with any conviction. It should be regarded as dead as, and more ill-omened than, the Treaty of Berlin. Turkey has always been regarded by Great Britain in terms of her enemy in the East—Russia or Germany, as the case may be. To-day Russia is in political cold-storage: France appears anxious to take up

Digitized by Google

Germany's rôle, but her enmity to the British Empire has to be inferred from the indiscretions of her Press rather than from official declarations, and she is nominally an ally. For the moment, therefore, the British Government need not subordinate its Turkish policy to European complications. It can live up to the lofty principles that it enunciated during the Great War. Turkey asks for nothing more, and nothing less. There will be time enough, when our post-war conscience is clear on this point, to decide how our relations with Turkey can be adjusted to our position *vis-à-vis* Europe.

MAGIC IN MESOPOTAMIA.

By E. S. STEVENS.

In a country supposed, above others, to be the birthplace of sorcery, magic, and incantation, one would expect a wealth of legend and folklore. In a measure, one is disappointed. It is possible that the rationalism of Islam has dispelled many of the darker beliefs, for the native of Iraq is no practician of midnight rites, like the negro with his voodoo mysteries; he is not enwrapped in a consciousness of the other world, like the Irish peasant; he does not fear the unseen, like the Indian. One seldom hears of a haunted house, and although he believes in Jinns, he sleeps sound o' nights.

The superstition that enters most into the life of the Iraqi, as into the life of the Italian, is the fear of the evil eye. What is the evil eye? It is the power possessed by certain persons, often against their will, of casting a blight or bringing misfortune. Unhappy is the lot of one known to have the evil eye. His neighbours dread and shun him, his family look on him as a misfortune; he is an unwelcome guest at any social festivity. With the tribes, a man sometimes divorces his wife because she is thought to have the evil eye. A man told me that he had known the owner of an evil eye to boast that before a ship then sailing down the river had reached a bend which would take her out of sight, he would, by the power of "el ain," break the mast. Bets were made, but those who had doubted the baleful eye lost their money, for the mast broke.

In England there is a saying that every bride must wear "something blue" on her wedding day. The belief that blue is efficacious against the eye of envy is almost universal, I believe; for here, as in Italy and Sicily, children, horses, donkeys, and mules wear blue beads as a charm against the eye. Gufas, the round basin-shaped boats which one sees on the Tigris, are decorated with blue beads and cowries stuck into the bitumen. My chauffeur hangs a few blue beads on the switch when we go any distance. Pieces of blue pottery or beads are built into the masonry of the houses. Harness and saddles are gay with fringes and embroidery of blue beads and cowries. The cowrie, a phallic charm of great antiquity, is used here against the evil eye as in South Europe. A Baghdad rhyme says:—

"Wadda ou dehasha — "Cowrie and blue bead
Min ain el lasha." — Against the evil eye."

The "dehasha" of the rhyme is a five-holed blue button-bead, sold simply for sewing on to garments or caps as an amulet. The celebrated abbas, or silken mantles, woven in Nejef, are distinguished by the little scrap of turquoise blue thread woven into one corner, and blue is the favourite colour for the beautiful glazed tiles with which every dome and minaret in Baghdad is covered. Not every shade of blue is lucky; it must be the bright turquoise, sky blue, or larkspur blue. A gall-nut is also lucky against the eye, and one sees it sewn on to babies' caps in conjunction with the cowrie and "dehasha." An old shoe nailed to the door or window of a house is also a preventive.

It is unlucky to admire. "What a pretty izzar you are wearing!" says one woman to another. "La tesibni bil ain!" (Do not cast the evil eye on me!) is the fearful response. Women are careful to leave dirt on their babies' faces and dress them poorly lest their beauty may attract "el ain." Suppose a woman some day of festival succumbs to the temptation of seeing her darling at his best; with his little cap sewn with charms, a silken coat, and silver bangles hung with bells, baby is carried out, perhaps in the hot sun and dust, to see the fun. On his return he is ailing and feverish. The mother is alarmed. The charms were not enough. Some evil eye has fallen upon him. She will find out who it is—perhaps some neighbour envious of the child's good looks. She takes a small ball of lead, and goes to seven virgins in succession. She knows of a house where there are three unmarried daughters, and then there is Fatima bint Ibrahim, the two daughters of Seyyid Hussein, Warda bint Suleyman and her neighbour's daughter. She goes to the five houses in turn, and each of the seven girls, at her request, takes the leaden bullet into her mouth, and spits it out into the opening of her clothing, so that the bullet falls through her loose garments to the ground. The mother takes the bullet home, melts it in a metal spoon over the fire, and puts a cake of dried cow-dung, such as is used for fuel, upon the sick child's head. The melted lead is poured on the "patokh" or dung-cake, and she peers anxiously at the form which the melted lead takes as it congeals on the cake. Neighbours, called in, look too. "It is an abba! The shape of a fat woman!" "I thought I saw a fat woman gazing at him yesterday near the Coppersmith's Bazaar!" "No! it is clearly a saw——! Some carpenter——" "——Ah, it must be the carpenter just by Seyyid Hussein's house; he is known to have the evil eye!" General opinion has it that it is the carpenter, and the mother must then have recourse to a wise man or woman for a charm which will counteract the baleful influence.

The wise man is called a fattahfal, or opener (if a woman, fattahatfal), because he opens his book of charms for such as seek advice. If a youth is in

ASK FOR

WHITE HORSE WHISKY

BY APPOINTMENT.

Digitized by Google

love with a woman who loves another, he has recourse to the fattahfal, and discloses his trouble. The wise man looks wise, writes out a potent charm on a scrap of paper, and gives it to the youth with a little incense (bukhur). He then places his book of charms (kitab el fatah) on his visitor's head, opens the book, and begins to read. When he has consulted the oracle, he says, "On such-and-such a day put the charm I have given you into water. Drink some of the water yourself, and cause by some means or other the woman you desire to drink of it. At sunset cense yourself with this incense, and she, beholding you, will love you and forget the other."

The Iraqis also use what is termed, I believe, sympathetic magic. Here is a charm against fever and headache. A branch of palm tree is brought and set on fire. A woman is made to carry the burning branch away. When she has walked a little distance with it, they call out to her to stop, the fire is extinguished, and the fever in the same moment departs. A woman with child, fearing a miscarriage, has recourse to the "said el hayya" or serpent charm. A sparrow is caught and given to a snake to swallow. As soon as the snake has swallowed the bird it is killed and opened, and the sparrow taken out and sewn into a leathern bag. This the woman girds to her back with a girdle. A cold in the chest is cured by branding on the chest; stomach-ache in children by branding with a cigarette-end all over the abdomen. If an adult has a pain in the stomach, he is branded by a smouldering twist of blue cloth (native-dyed), which is applied freely to the aching part. A Christian told me that when he was with some Bedouin, a man with enlarged spleen was cured in the following manner. First they bound his arm high up, then they plunged his arm into hot water, and opened a vein. With the blood so obtained, a cake was made, and as this dried, so the man was cured. To complete the cure, a sheep was killed and skinned and the man covered with the fresh warm skin. To cure a Baghdad boil, which has so far defeated science, a simple method is the following. Take a sparrow, kill it, and apply its body so that the fresh, warm blood touches the sore. Then hang the sparrow up. As the body dries, so will the boil dry up and disappear.

Similar to the "ain" or evil eye, is the "nefs" or evil breath. A man who doubted this was shown a man who killed a dog merely by breathing and exclaiming "What a fine dog!" The dog rolled over dead. A man with the "nefs" against his will blighted all his children so that they died in infancy. He had recourse to a Mulla, who advised him to abstain from circumcising them, although this is ordained by Moslem law. The man followed his advice and reared a family of sons.

Before I leave the subject of cures, however, I must not forget the local cure for whooping-cough. The local names for this disease are Humeira (little donkey, on account of the braying noise) and Khanezira (little pig), both being animals which it is impolite to mention. The father of a child with whooping-cough will go with him to a slipper-seller, that is a "khafaf" or maker of the red and lemon-coloured slippers only worn by Moslems and Jews, and say to him: "Ia kelb, sowwi li kelb, khatr el kelb, ibn el kelb" (Oh, dog, make a dog for him, for the sake of the dog, son of a dog"). To call a person "son of a dog" is a fearful insult, but on this occasion the slipper-maker merely smiles, and cuts out a dog from a scrap of leather, which is hung from the child's neck.

(To be continued.)

CONSTANTINOPLE REFUGEES.

The United States Administration, says a Reuter's message from Geneva, recently made an offer to the League of Nations to provide for the wants of Russian refugees at Constantinople for a period of four months, and, further, to contribute $25,000 for their evacuation to other countries subject to the League securing the amount necessary to bring this sum to £36,000. The League accepted the offer, and succeeded in securing the required balance. The American High Commissioner has now appointed a committee of Americans to administer the £36,000.

Another report says:—"Five hundred of these refugees are scheduled to leave for Bulgaria on September 1. Visas for one thousand others for Hungary have been secured. They are to leave in groups of one hundred and fifty, the first group going early in September. Yugoslavia and Bulgaria, however, owing to the heavy drift of migrants direct from Russia itself, are fast reaching the point of saturation. Consequently efforts are being made to find homes for these people in still other countries. Norway has signified her willingness to take two hundred women for domestic service. It is expected that the number of refugees will be decreased to some eighty-eight thousand in the first weeks of September."

THE ARMY IN INDIA.

As the outcome of the report of the Innes Committee on the work of Army Headquarters, the *Pioneer* understands that a committee will shortly sit, under the presidency of Lieut.-General Sir Walter Braithwaite, to inquire into the organisation of the Quartermaster-General's services in India, says Reuter. The committee will include Sir Walter Campbell and Sir Edgar Halberton, and the terms of reference are likely to be comprehensive, the military authorities being anxious to have expert judgment on the organisation of supply and other services which were built up during the war and may be unsuitable in peace time. Expert opinion will be of great value to the Inchcape Committee, for whose benefit it is presumed the inquiry will be conducted.

NOTES AND NEWS.

State or Company.

The Central Railway Advisory Board in India has decided in favour of State management of the Railways as against company management; and it is understood that a Government resolution is to be put forward embodying this decision, which would seem to indicate that the days of company management in India are numbered, for while the Legislative Council might negative the decision, it is extremely unlikely to do so. The Board's verdict will be absolutely unintelligible to the vast mass of the British electorate, whose experiences during the war have only served to confirm their innate hostility to State-owned enterprises of any kind. It is, it may be added, extremely unpopular among the British commercial community in India, whose vote would go whole-heartedly in favour of company management. As is well known, there are admirably managed State lines in India, and if it could be guaranteed that all would be of the same standard, there would be nothing to be said, for as between a well-managed State line and a well-managed company line there is nothing to choose. But everyone familiar with the working of official organisations knows that that is an impossible ideal. It is true that company lines vary very greatly, too. I have specially in mind one of our lines, whose utter disorganisation on the occasion of a fair or some such event at, shall I say, Slocum-cum-Muddlemore was described to me recently with extreme relish by a friend. But company lines have their limit in badness, and the same cannot be said for an indifferently-run State line, and for that reason alone I feel that India in adopting State management will be taking a course she will be likely to regret.

Smyrna.

The extraordinarily rapid conclusion of the Turco-Greek struggle—if such be the correct term for so one-sided a conflict—should leave little room for apprehension as to the possibility of any great economic damage in the Meander Valley, or elsewhere, for the matter of that. It would probably be rash to assume, however, that the fruit district has escaped unscathed, for even an army retreating at the pace of the Greeks can scarcely avoid leaving marks of its progress on the way. But the injury inflicted cannot have been really serious, as would inevitably have been the case if the Meander Valley had been the scene of protracted engagements, as it must have been if the Greeks had succeeded in putting up anything of a stand before Smyrna. One can well imagine the relief of the farmers that they did not, as little progress has yet been made towards the export of this year's crop.

Need for a Settlement.

Now that the Turco-Greek problem has been definitely solved, it is profoundly to be hoped in the general interest that there will be nothing to delay the protracted question of a settlement with Turkey. The Turkish question has been responsible to a very considerable extent for the economic ills from which the whole of the Near East has been suffering. A settlement is above all things essential if there is to be a rapid recovery from the effects of the world-war; for no country is it more vital than for Turkey itself, a fact which, it may be trusted, has been appreciated by the Kemalists. In some respects Turkey has been fortunate in having escaped some of the worst consequences of the war. Her financial position is not nearly so bad as it might have been; her internal resources, though seriously affected, can be repaired, provided the country devotes itself whole-heartedly to the task of reconstruction and refuses to participate in futile adventures. The Kemalists have a great opportunity before them in devoting their organising talents to peaceful pursuits. It is no mean ambition before them to make Turkey more prosperous than ever before. Will they recognise it as such?

The B.I.F.

The appearance of the advertisement of the British Industries Fair is a reminder that we are rapidly approaching what has generally come to be regarded as the function that marks the beginning of the commercial year. I cannot but feel sorry that it has been found necessary to hold the fair once again at the White City, which by no stress of imagination could be deemed suitable for an event of this character, though it is certainly far more satisfactory than the Crystal Palace and the other places at which the fair has been held. As it seems certain that the next fair will mark the turning of the trade tide and will herald the long and patiently-awaited "boom," it would have been better in keeping with the occasion if it could have been held at its destined home at Wembley. But that, for obvious reasons, was out of the question. I only hope the White City will prove equal to the demands likely to be made on its accommodation, for I shall be very surprised if there is not a vast increase in the number of firms desirous of exhibiting.

Imperial Bank of India.

The present report of the Imperial Bank of India is the third to be issued since this bank was formed by the amalgamation of the three Presidency banks, and, like its predecessors, it shows a record of steady progress. The net profits for the half-year amounted to Rs. 63,52,241, the available total being Rs. 76,26,493, of which Rs. 44,98,300 was devoted to the maintenance of the dividend at 16 per cent. Rs. 10,00,000 is placed to the reserve, Rs. 5,00,000 to pension funds, and the carry forward is Rs. 16,28,435. It will be remembered that the institution has among its objects the opening of 100 new branches in India within five years. The report states that during the period under

BANK OF ROUMANIA LIMITED

(FOUNDED 1866).

Bank of England. **Messrs. Glyn, Mills, Currie & Co.**

A general Banking business with Roumania is conducted, and correspondence from those having interests in that country is invited.

Digitized by Google

review eleven new branches were opened, while in the previous half-year eight were established, and arrangements have been made for opening an additional nine branches. Satisfactory progress is, therefore, being made towards giving Indians adequate banking facilities. As I pointed out recently, the Indian Government's loans have gone far to educate the Indians in the art, if it can be so called, of investing their surplus funds instead of hoarding them, and as the Imperial Bank of India extends its facilities, it will be able to give increasing aid in the same direction.

Roumanian Oil Progress.

One cannot help being impressed by the steady advance that is being made by the oil industry in Roumania. Scarcely a week passes without the issuing of a report by one or other of the oil companies giving details of important strikes of oil or other promising developments. In the last ten days or so three such notable announcements have been forthcoming. Roumania owes the companies no small debt of gratitude for the perseverance which has achieved such successful results in the face of the most serious obstacles, and if the country does achieve normal conditions within a reasonable space of time, it will be to no small extent because of the energetic way in which the companies have faced their own very special problems of reconstruction. The progress of the industry has been rendered more difficult as a result of the numerous restrictions with which it has been surrounded, notably as regards exports and prices. The Government have now had placed before them the views of the companies, who have elaborated a considered programme which includes the full freedom of trade, and it may be trusted that they will recognise the extreme advisability of removing all restrictions as far as possible.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.)

Bulgaria.

Leather and Balata Belting, etc.—The Bulgarian Ministry of Posts, Telegraphs, and Telephones, Sofia, invites tenders for the supply of leather and balata transmission beltings and leather belt laces. Tenders must reach Le Directeur Général des Postes, Télégraphes, et Téléphones, Sofia, Bulgaria, not later than September 27, and should, if possible, be in the French language.—(D.O.T.)

Telephone Material.—The Bulgarian Directorate of Posts, Telegraphs, and Telephones at Sofia invites tenders for:—(1) The supply of cables and other material, and the transference of the existing underground cables to the new telephone exchange. (2) The supply of the material and the work involved in the extension of the network of underground cables. (3) The supply of the underground and armoured cables, including the runnings of the cables through the tubes as well as effecting their connection to the boxes and the ends of the cables to the exchange, etc. This section also deals with the supply of lightning conductors with aerial cables, and other material. (4) The supply of iron terminal standards with cable racks (main distribution poles). Tenders must be presented in Sofia by October 16 (D.O.T.).

India.

Railway Wagons.—The High Commissioner for India invites tenders for the supply of 3,000 railway wagons. Forms of tender may be obtained from the Director-General, India Store Department, Belvedere Road, Lambeth, S.E.1. October 17.

Steel Sheet Piling.—The Calcutta Corporation invites tenders for the supply of 80,000 lineal feet of light section steel sheet piling of various lengths; also for the supply, delivery, and erection of a steel screw pile jetty on the river bank at Pulta, near Calcutta. Tenders for the former close on October 9, and for the latter on October 10.

Locomotives.—The South Indian Railway Company invites tenders for the supply of: 1. 46 metre gauge locomotives and six locomotive boilers. 2. 108 metre gauge wagons. 3. Bridgework. October 8.

Egypt.

Consumable Stores, etc.—The Frontier Districts Administration, Alexandria, is inviting tenders for the supply of consumable stores, oils, and paints. Tenders, on the proper form, accompanied by a provisional deposit of 2 per cent. of the total value of the tender, should reach the Director of Stores, Frontier Districts Administration, Alexandria, by noon on October 10. The schedule is rather extensive and includes, among other goods, oils, paints, and varnishes, hardware, brushware, canvas, lamp glasses, leather, rope (manilla and wire), soap, etc. (D.O.T.).

Commerce and Industry.

ROUMANIA.

Bucharest, August 29.

Maize Export Tax.

The Cabinet has decided to free the maize export from the obligation on the part of exporters to supply the corresponding quota for home requirements, but, on the other hand, have increased the export tax from 20,000 to 30,000 lei per wagon of 10,000 kgrs. By thus increasing the tax—to an almost prohibitive point—the Government manifestly aims at reducing the export of maize until the new crop is available, and at the same time influencing home prices for this commodity. This measure was actuated by the great scarcity of maize existing in the mountainous regions owing to the fact that exporters were evading their obligation of producing the corresponding quota for home needs. Prices in these remote regions have therefore reached an unusually high level.

This new regulation will most likely only remain in force until a definite estimate of the forthcoming crop is at hand—namely, in two to three months' time.

The Government's Oil Policy.

In refuting the allegation that the Liberal Party, now in office, has changed its policy with regard to the oil question, in consequence of the financial and economic condition of the country, the Government Press publishes the following declaration, which bears the stamp of an official communique: "We maintain that the oil wealth of this country, now and for all time, must remain the patrimony of the Roumanian State, as this wealth is too closely connected with the national defence. But we never stated that foreign capital will be excluded from oil exploitation; on the contrary, its participation in the exploitation—to a certain extent and on certain conditions—is welcome."

PERSIA.

Teheran, August 21.

Russo-German Trade Activities.

It seems a far cry from Enzeli on the Caspian to Hamburg, and yet it was announced in the papers the other day that, at the instigation of the Russian Soviet authorities who, through the "Vneshtorg," their commercial agents, are making great efforts to capture Persian trade in conjunction with the Germans, we are shortly to have a direct steamship service between Hamburg and the Persian ports on the Caspian, via Petrograd and the Volga. This service will naturally be open only part of the year, the northern Russian ports, the Volga, and the port of Astrakhan being all ice-bound for the greater part of the winter, and the sailings will probably be few and far between; but in their present state of antipathy to everything British, including British trade (which during and since the war has practically monopolised the markets here), the Persians take delight in welcoming the idea of German and even Russian goods ousting the British and Indian articles so plentiful in the bazaars at present. It is rather extraordinary how many and what a varied assortment of British goods one sees during a morning's stroll in the Lalezar and other streets, where only a few years ago such things were not to be found throughout the length and breadth of the country. The Crown Prince and the Minister of War will pass you in their Rolls-Royces, and you will also notice a few Austin cars, for which the Anglo-Persian Oil Company's petrol is always on sale; wines and Scotch whiskies of every kind are in every wine-shop window, although the importation of these is supposed to be prohibited; and hawkers in the street will offer you "Pear's Soap" and "Cobra" boot polish. If you are in need of films for your Kodak you can buy nearly every size, and if your paint-box needs replenishing, Winsor and Newton's oil and water colours are at your disposal. English tobaccos here are actually cheaper than at home; a shop down the road proudly exhibits a notice offering you "Huntley and Palmer's biscuits straight from Reading," and if you wander into a sweetshop your Turkish delight or macaroons will probably be wrapped up in THE NEAR EAST or *The Times*! Many of these goods were ordered during the trade boom after the Armistice, when the rate on London was down at 19 and a kran equalled more than a shilling, but now that the rate is abnormally high, round about 58 krans to the £, and with the lack of money, it is little wonder that merchants cannot order goods from England and hope to sell them at a profit, and it is only natural that they should welcome the idea of a cheap German and Russian market consequent on the depreciated values of the mark and rouble.

AGRICULTURAL SITUATION IN INDIA.

The India Office has issued the following *communiqué*:—August was marked in India by a prolonged break in the monsoon in the Peninsula, Central Provinces, and North-West India, due to the weakness of the Bombay monsoon, and by heavy rainfall in the United Provinces of Agra and Oudh, Bengal, and Bihar and Orissa. The break in the Bombay monsoon was relieved, however, by occasional but timely rainfall everywhere except Western Hyderabad, Madras, and Bombay Deccans, and parts of North-West India. The agricultural situation is generally satisfactory to good, except in Western Hyderabad, Bombay, and Madras Deccans, and the dry zone of Upper Burma, in all of which parts the position is unsatisfactory and rain is urgently needed. One test work is now open in the Kurnool district of Madras. Rain is also now necessary in Assam, Baluchistan, and North-West India. Some damage to crops has been caused by floods in parts of Burma, Bengal, and the United Provinces of Agra and Oudh. Prospects of rice crops at present are good. Prices remain practically stationary.

It is reported that the Persian Government has removed the prohibition on the importation of alcoholic beverages which has been in force for two years.

A Reuter message states that the Czecho-Slovak iron producers held a meeting recently in order to consider means of improving the industrial position. In order to bring prices into line with foreign market quotations, it was decided to reduce the quotations for the various descriptions of iron by from 30 to 100 crowns per 100 kilos.

THE TURKISH DEBT.

Bondholders' Position.

Those who wondered whether it would be possible for the Council of Administration of the Ottoman Public Debt under existing conditions to justify the hopes that were raised by the payment on July 17 of 75 per cent. on Coupons 34 to 37 of the Turkish Unified 4 Per Cent. Loan had their answer last week in the announcement of the payment of 6s. on the September Coupon of this loan. All things considered, it cannot but be admitted that the Debt Council have carried through a very remarkable piece of administration. The part of Turkey from which revenues have been available has been very small; in fact, the Council has had to rely in the main on the receipts from Constantinople and the neighbouring districts. In addition, the transit trade of Constantinople has greatly diminished as the result of local conditions, so that bondholders have every reason for hopefulness, for it is obvious that if it is possible to maintain payments at the present time there should be little difficulty about the resumption of regular distributions when normal circumstances obtain. The position of the bondholders, in fact, must be reckoned as far from unsatisfactory, though the ruling quotation for the stock would suggest that the position has not yet been fully appreciated. It is not merely a question of the restoration of the revenue-producing area; there are also very considerable receipts to come from various quarters. There is, in the first place, the amount that the Germans appropriated during the war. Then there is the question of the revenues formerly allocated to the Debt Council in the mandated territories. One assumes that when a treaty with Turkey is concluded these sums, which must amount to a very considerable total, will be handed over, and that they will be available in the first place for meeting any claims in respect of overdue coupons, etc. It is, unfortunately, not possible to write so confidently with respect to the receipts that ought to accrue from the authorities at Angora. The revenues of the territories controlled by the Kemalist Government have been collected and applied to its own purposes, and it is to be feared that there must be small prospect of anything materialising in this direction. It is the first time, as Sir Adam Block pointed out in his recent report, that the receipts due to the Debt Council have been otherwise utilised, and it can only be hoped that it will be the last. It must be if Turkey is to retain the confidence of the Powers and to obtain from them the financial assistance which will be indispensable for her economic recovery.

THE COMING B.I.F.

A More Hopeful Outlook.

It seems only the other day that we had the last British Industries Fair, but already we have the announcement of another of these annual events appearing. When one was young the time did not seem to fly like that; but perhaps it is just as well it should in the circumstances, for the last few years have been a perfect nightmare from the commercial point of view. Always the promise of improvement; never the fulfilment. Indeed, things have seemed, superficially, to go from bad to worse. It has not been what we expected when the maroons went off on that dull November morning in 1918. Perhaps the greyness of that ever-to-be-remembered day foreshadowed the immediate prospects. But no one in the City would maintain for a moment that things need have been so bad. The general view, indeed, is that but for the politicians we should have had the real—one might add the inevitable—post-war trade boom long ago.

However, it would be futile to concern ourselves now with vain regrets or speculations as to what might have happened given a different set of circumstances. What we are concerned with is the immediate future of trade endeavour, on which will depend the prospects of the coming fair. At first sight the outlook does not appear too promising, for Central Europe, to take one important region, is very evidently in a worse position than a year ago, with Austria apparently on the verge of chaos and Germany defaulting in respect to Reparation payments. In the Near East, too, developments have been such as to give cause for disquiet. But if the surface indications are unfavourable, there are many other factors, less obvious, perhaps, but of extreme importance, which enable a very different purview to be taken of the situation. For one thing, a final settlement of the Reparations problem seems a probable development, and this would bring the mark down to a more reasonable level, and thus go far to removing one barrier to trade. Then in the Near East, with which we are primarily concerned, and on whose return to normal conditions a trade revival depends to a far greater extent than is generally recognised, the position is undoubtedly gradually improving. In the very large areas in the Near East in which the exchanges impose no barrier on trade activity, commerce has been in a state bordering on stagnation for many months, simply because the markets were overstocked as a result of an underestimation of the effects of the war on the consuming centres, and the position was rendered worse owing to the efforts of centres like Constantinople to find relief by shipping surplus stocks to less awkwardly situated places. Happily, for many months past it has been increasingly evident that stocks have been declining in many centres, as is shown by the gradually growing demand for cotton goods and other commodities. On the other hand, in the Balkans the exchanges still remain high, though in one or two cases there has been an appreciable improvement during the past few months. It cannot be emphasised too much, however, that these exchanges grossly misrepresent the actual state of affairs in these countries. In Roumania, for instance, considerable progress has been made in reconstruction, and there is very little doubt that, provided it is not necessary for economic reasons, as may possibly be the case, to delay the improvement in the exchange, another year should see the leu somewhere near parity. Of the factors that have adversely affected the Turkish market one, and that the most important, should be removed as soon as there is a settlement of the Greco-Turkish war. It is almost impossible to estimate what the temporary loss of Anatolia as a trade outlet has meant to the Constantinople market. The effect on the exchange of a settlement should be pronounced, for while the Turkish Exchequer is, as always, in a precarious position, Turkish finances are by no means in as adverse a state as might be imagined, and it is a very strong point in the country's favour that there has been no recourse to the printing press since the Armistice.

From this brief survey it will be seen that the position in general affords distinct grounds for hope from the trade point of view. We may not have an extensive revival of business for some months, but there is no doubt at all that we have passed the worst period of depression, and that henceforward commerce will steadily improve. The fair will therefore be held in an atmosphere of hope, with the certain prospect of a trade "boom" not far ahead—the least optimistic anticipate something approaching normal conditions in 1924—and one is justified in anticipating that it will therefore prove a most successful undertaking. Not that one of the fairs that has been held so far has been anything approaching a failure. The unvarying success of these annual events has been one of the most remarkable phenomena of this trying period of depression. Buyers have come from all parts, however adverse the conditions. In 1923 one rejoices to know that, so far as can be seen, there will be little to deter them from attending in their thousands, for while the exchanges will still be adverse the course of events will be sufficiently evident to make it clear that the time for buying has arrived, for buyers have to look ahead and anticipate market requirements. Therefore it seems probable that the fair of next February—the last, it is believed, that will be held at the White City, for the permanent habitat at Wembley will presumably be ready in 1924—will be a notable event in British commercial annals, the first sign since the war of the flow of trade on normal lines.

The oil production of Persia in 1921 is estimated at 14,000,000 barrels.

The duty on lard and goose fat exported from Yugoslavia has been increased from 300 and 400 dinars respectively to 2,500 dinars per 100 kilogs.

The Chartered Bank of India, Australia, and China has declared an interim dividend at the rate of 14 per cent. per annum (free of tax), payable September 13.

The directors of the National Bank of India have declared an interim dividend for the half-year ended June 30 at the rate of 20 per cent. per annum, free of tax, payable September 19.

BANKING IN YUGOSLAVIA.

The Adriatic Bank.

The Adriatic Bank, Ltd., was established eighteen years ago in Trieste by a group of Southern Slav bankers, all natives of the Southern Slav (Yugoslav) Adriatic littoral. The history of the Adriatic Bank from the date of its foundation in 1905 has been one of steady progress. The original capital of the parent bank in Trieste was of very modest dimensions—only 1,000,000 pre-war Austrian kronen. To-day the capital has reached the figure of 60,000,000 dinars, and the surplus fund amounts to 30,000,000 dinars. At the last general meeting it was decided to raise the capital to 100,000,000 dinars. The capital of the old Adriatic Bank in Trieste amounts now to 15,000,000 Italian liras, and its surplus fund exceeds 5,000,000 lira.

When it was decided that Trieste—and with it the Adriatic Bank—should remain outside the State frontiers of Yugoslavia, the original founders opened the Adriatic Bank in Belgrade. Within the newly-constituted State, the bank now has branches in Bled, Cavtat, Celje, Dubrovnik, Ercegnovi, Jelsa, Jesinice, Korcula, Kotor, Kranj, Ljubljana, Maribor, Metkovic, Prevalje, Serajevo, Split, Sibenik, Trzic, and Zagreb. Most of the branches established in the past three years are in the Adriatic littoral.

In South America the Adriatic Bank is affiliated with the Banco Yugoslavo de Chile. In North America the Frank Sakser State Bank has been opened in New York under the presidency of Mr. Frank Sakser, the well-known banker and member of the board of directors of the Adriatic Bank. This bank suffices for the bank's business with Yugoslav emigrants in that city. The Adriatic Bank also has connections with leading American banks at all places where there are Yugoslav colonies throughout the United States. A special American department has been opened at the head office of the Adriatic Bank under the management of American bankers.

Both Adriatic banks, that of Belgrade and that at Trieste, have always pursued the policy of raising Yugoslav economic conditions by financing trade, business, and industrial enterprises. The bank devotes special attention to the development of Yugoslav shipping and the improvement of the overseas trade.

According to last year's balance-sheet the available assets of the Adriatic Bank on December 31 amounted (in dinars) to:—Cash, 22,792,073.62; due from the State National Bank and other banks and bankers, 80,404,851.61; bills of exchange, 85,401,267.02; securities, 61,243,790.86; foreign cheques and currency, 3,040,390.33; total, 252,882,373.44 dinars. The turnover of the bank in 1921 amounted to 30,079,591,930.78 dinars. The net profits were 4,522,986.14 dinars, and a dividend of 12 per cent. was paid.

It remains to be added that the bank takes an active interest in the welfare of Yugoslav emigrants and their relations with the mother country. The bank seeks by every means to supply prospective emigrants with information regarding foreign countries, to facilitate business relations and intercourse between emigrants and their people at home, and to interest them in commercial and industrial enterprises.

OIL OUTPUTS, Etc.

Steaua Romana.—The Steaua Romana (British), Ltd., states that the approximate production of the Steaua Romana Co., Bucharest, for the month of August was 20,680 tons.

Gemsah Oil Reefs, Ltd., has received a cable stating that the position of No. 1 well is depth 1,100 ft., formation gypsum.

Anglo-Egyptian Oilfields.—Production for week to September 1: Gemsah, 33 tons; Hurghada, 5,051 tons.

Algerian Oilfields.—Advice has been received from the Societe Algerienne des Petroles de Tliouanet that the output for August was 122 tons. Well No. 9 has now reached a depth of 77 metres. Well No. 23 172 metres, and well No. 26 180 metres.

Dacia Romano Petroleum Syndicate.—The following cable has been received:—"Moreni No. 1. Production August 1-16, 789 tons when well choked at 775 metres. Now swedging casing. Moreni No. 2, depth 551 metres. Chiciura No. 2, resumed work last Tuesday, depth 290 metres. Baicoi No. 3, erecting rig. Total production August, 1,107 tons."

An Italian-Oriental Congress will be held at Trieste from September 12 to 15. It has been promoted by the Italian Institute for Commercial and Colonial Expansion with the object of developing trade with the Near East.

THE OIL AGE AND WORLD ECONOMICS.

The effect that the oil age may have on the world's economic life is discussed by Dr. Helmer Key in an article quoted in the *Economic Review*. He points out that oil is the principal power asset of the American Pacific coast, and that the future history of this part of the world centres round oil. He continues:—"The age of Atlantic Primacy is based upon coal fuel; it was abundance of this which brought about Great Britain's, Germany's, France's, and Belgium's economic greatness; also that of the United States. The oil resources of the European Continent are less abundant. Europe has, indeed, respectable oil fields in Galicia and Roumania, and also controls considerable extra-European oil resources. Apart from the Pacific countries, where England and Holland have important interests, the oil fields controlled by Europeans are situated in Asiatic Russia, Caucasia, Mesopotamia, and Persia. There are also oil fields in Egypt.

"It is calculated that England, as represented by the two great companies, the Royal Dutch (Shell) and the Anglo-Persian, controls now about half of the world's potential oil resources. This does not mean, however, that Englishmen control a corresponding proportion of the present yearly output, for most of the resources included in this calculation are as yet quite unexploited. Of the present yearly output the U.S.A. control about 80 per cent., England only about 10 per cent. This output emanates partly from fields within the U.S.A. boundaries, partly from Mexico. If the North American consumption of oil continues, it is probable that the U.S.A. will be forced to import oil to cover the home demand. If the extra-European oil resources of the world be examined, it will be found that they are principally concentrated in the coasts round the Pacific, both Asiatic and American, and in the Pacific islands. . . . If it be true that the coal age is now to yield to the oil age, it follows from purely geographical considerations that a shifting of the point of balance of the world's economic life from the Atlantic to the Pacific countries in inevitable."

COUNCIL OF ADMINISTRATION OF THE OTTOMAN PUBLIC DEBT.

NOTICE TO HOLDERS OF THE OTTOMAN FOUR PER CENT. UNIFIED CONVERTED DEBT, COUPON No. 38.

The Council of Administration of the Ottoman Public Debt inform holders of the Unified Debt that in accordance with Article No. 1 of the Décret-Annexe, and without prejudice to their rights under that Article, they have decided to authorise the payment in London of the sum of 6s. per unitary Coupon of 8s. on Coupon No. 38, due 1-14th September, 1922.

Provision for the payment of this amount is in the hands of the Imperial Ottoman Bank, London Agency.

Holders are invited to present the above-mentioned Coupon at the Imperial Ottoman Bank, London, either direct or through the intermediary of any of the under-mentioned establishments:—

Banque Imperiale Ottomane.....	Constantinople.
,, ,, ,, ...	Paris.
Banque de Paris et des Pays-Bas..	,,
Comptoir National d'Escompte.....	,,
Crédit Lyonnais.....	,,
Société Générale.....	,,
Crédit Industriel & Commercial...	,,
Crédit Mobilier Francais.....	,,
Banca d'Italia.....	Rome.
Banco Commerciale Italiana.....	Milan.
Banque de Bruxelles.....	Brussels.
Banque de Paris et des Pays-Bas..	,,
Banque Centrale Anversoise.....	Antwerp.
Amsterdamsche Bank.....	Amsterdam.

In exchange for the Coupons, accompanied by a declaration of nationality, holders will receive, at the same time as the cash payment, receipts representing their rights, all charges and expenses being borne by the depositors.

Payment of this amount will take place from the 14th September, 1922, to the 28th February, 1923.

Constantinople, 24th August, 1922.

With reference to the foregoing advertisement, the Imperial Ottoman Bank give notice that Coupon No. 38 may be deposited on and after the 14th September next at their Coupon Office, 25, Austin Friars, E.C.2, listed on forms which may be obtained there on and after the 11th September. The cash payments are subject to deduction of income-tax, and also to a deduction of 2d. per receipt for stamp duty on all receipts whereon the payment made amounts to £2 or over. It will be convenient if holders will present Coupons through their Bankers.

IMPERIAL OTTOMAN BANK.

26, Throgmorton Street, E.C.2.

6th September, 1922.

Engineering Topics.

Electrical Porcelain.

It is interesting to note that in spite of the keenness of Continental competition the makers of English porcelain for electrical purposes are comparatively busy, a fact due to the generally recognised superior quality of the British product. It is an open secret that large sums have been spent by our leading makers in research work as well as in staffing the designing departments and drawing offices with experts, and not only are the goods themselves of superior quality porcelain, better baked and better glazed, but the design, particularly of the high tension fittings is more suited to meet the needs of modern methods of distribution.

The rapid development of high tension work both in the generating and the distributing sides, has necessitated this elaborate research work, and the porcelain fittings of to-day are greatly superior to those which passed muster before the war, both as regards insulating properties and durability. Further, the rapid development of wireless work has made demands of a special nature which have had to be filled by the porcelain makers. Electrical porcelain fittings of a new type, to meet severe strains, have had to be designed, and it is gratifying to know that so well have these demands been satisfied that users everywhere are expressing their appreciation, and that, as a result, a new and a large field has been opened up for the manufacturers. Whilst a few years ago the production of ordinary insulators for telegraph and telephone lines was the principal work of the British factories, now these are by no means in such demand, a falling-off due primarily to the growth of the modern practice of running such conductors in underground conduit. This policy is being followed also wherever manual telephone exchanges are being converted to the automatic type, and so the continued demand for the replacing of breakages, which provided a steady and almost uniform field for output is steadily decreasing. The overseas demand, however, shows little diminution in spite of Continental competition, and taking this in conjunction with the heavy demand for high tension insulators, our factories are rather busier than during the busiest pre-war period.

Pumping Plant for the Sudan.

A brief description of the very large pumping plant, which, as already recorded in these columns, Messrs. W. H. Allen, Sons and Co. Limited, of Bedford, are making for the Sudan Plantations Syndicate, should be of considerable interest to my readers. The machinery consists of three 950 b.h.p. Diesel engines of the four-cylinder, four-cycle, single-acting trunk type, running at 150 revolutions per minute, with water-cooled cylinders and oil-cooled pistons. The engines are completely enclosed, and are fitted with forced lubrication. They drive three 45-in. pumps, which are complete with suction and discharge pipes, rising main, valves, and auxiliary machinery. The pumps are of the "Nile Conqueror" centrifugal twin series type, and each pump will deliver two cubic metres (448 gallons) of water per second, against a maximum head of 25.5 metres when running at the speed of 150 revolutions per minute. The machinery is to be in operation by next June.

Producer Gas for Motors.

A good deal of attention is now being devoted to the merits of suction gas as an alternative fuel for motors. The reduction of running expenses is a primary consideration in these days, and it appears that the use of suction gas would result in a distinct economy which is quite enough of itself to commend it to the attention of motorists. As to the actual saving, it is interesting to note the conclusions arrived at by M. Auclair, president of the Mechanics' Committee of the Research and Inventions Department of the French Government, in his survey of the results of the recent French trials, for which one British firm entered and carried off the first prize. He points out that the alteration from petrol to producer gas must entail loss of power even if the engine has been specially adapted for the latter fuel, though in the latter case the loss of power will be smaller. Going into figures, it is estimated that the power in the case of an engine that has not been altered will be reduced from 1 to something between .5 and .73, and that where the engine has been adapted the latter figures would be raised to .7 and .9. Allowing for the reduction in power and the consequent increase in expenses, it is M. Auclair's view that a net saving of 25 per cent. could be made by the use of suction gas.

Prospects of Utilisation.

A saving so substantial is, of course, a matter of no small concern to large companies, while it cannot be a matter of indifference to the small concern. But while I have little doubt that many firms would be prepared to experiment with this fuel, it is extremely unlikely that it will be used on any wide scale in this country, at any rate for a long time to come. It is all a question of organisation. The petrol-user has everything ready to his need wherever he may be in this country, and before the producer gas could come into anything approaching general use it would be necessary to bring into being a very considerable organisation, and as there is always the possibility that petrol will fall in price, the likelihood of such an undertaking can only be regarded as extremely uncertain. To my mind, the best field for the development of the use of the new fuel would be in a region like the Near East, where in no regions have petrol users an elaborate organisation at their disposal, and in the greater part of the area there is, of course, no organisation at all. One could well imagine what a boon it would be to motorists there to have at their disposal an alternative fuel, cheaper than petrol at present prices, and of a character which gives the driver no trouble whatever except to see that the fuel-bin is kept charged.

OAKEY'S WELLINGTON KNIFE POLISH
The Original Preparation for polishing Cutlery.
Canisters, 1d., 2d., 3d., 6d., 1s., 2s. 6d. and 4s. each.

Shipping Intelligence.

TRADE OF BASRAH IN 1921.

The *Iraq Trade Journal and Bulletin of Statistics* gives details of the trade of the port of Basrah in 1921. The imports, exclusive of military and Government stores, amounted to Rs. 1,085,94,904, as compared with Rs. 1,213,12,111 in 1920 and Rs. 1,399,22,376 in 1919. The chief imports were as follows (in lakhs of rupees), the figures in parentheses representing the totals for 1920:—Sugar, 258 (283); piece goods, 245 (262); grains, pulse, flour, 142 (86); oil, 40 (17); liqueurs, 29 (32); tobacco, 30 (63), wood (including date box materials), 28 (57); provisions and groceries, 25 (43); motor-cars, cycles, and accessories, 22 (45); tea, 20 (20); coffee, 15 (25); soaps, 13 (15); metals and ores, 7 (25); machinery, 11 (12). The Collector of Customs states that the decreases were due to (1) large stocks in the country, (2) adverse exchange, (3) break in the Persian market, (4) large decreases in overseas personnel.

Imports by post during the year showed a decrease of Rs. 3,11,729, due to the closing of the value-payable parcel system between Iraq and India, the figures being Rs. 32,38,318, as compared with Rs. 35,50,047.

The export of commercial commodities from Basrah amounted to Rs. 284,69,960, as compared with Rs. 359,34,167 for 1920 and Rs. 360,67,200 for 1919. The principal exports (in lakhs of rupees) were as follows, the figures for 1920 being given in parentheses:—Dates, 126 (208); piece goods, 34 (24); grains, pulse, and flour, 33 (20); sugar, 22 (10); carpets, 6 (24); hides and skins, 5 (9); wool, 5 (8); intestines, 5 (1); liquorice, 4 (5), and tobacco, 3 (3). The export of specie in 1921 amounted to Rs. 743,34,555.

During 1921 273 steamers, with a cargo tonnage of 571,287, arrived in the port of Basrah, as compared with 239 steamers, with a cargo tonnage of 552,795, in 1920. Of these ships 263 were British, the remainder being Japanese 4, Norwegian 2, Swedish 1, and Greek 1.

EUROPEAN COMMISSION OF THE DANUBE.

The accounts of the income and expenditure of the European Commission of the Danube for the past year show a balance of 4,722,760 francs. The principal receipts were in respect of dues (10,638,045 francs) and the balance for the year 1920 (5,043,103 francs). On the expenditure side, the expenses of administration amounted to 1,883,983 francs, those connected with the upkeep of the river to 2,912,016 francs, and extraordinary expenses to 3,591,835 francs, including a sum of 1,891,820 francs paid to the Admiralty on account of coal supplied during the two preceding years. Advantage was taken of the depreciated value of the local currency to liquidate advances which had been made to the Commission by the Roumanian Government and certain local banks. Measures have been taken, by requiring vessels to pay navigation dues in francs, or the currency of the country to which they belong, to guard against future loss due to the depreciation of the Roumanian currency, which during the year under review amounted to 2,717,433 francs. The value and allocation of the invested funds of the Commission is shown. Securities representing these funds were deposited with the Deutsche Bank in Berlin in 1893, and it is only within the last few months that the Commission has been able to re-obtain possession of them. The present market value of the Swiss and Swedish stock is slightly higher than was the case on December 31, 1921. The statement of accounts includes a balance-sheet showing the financial situation of the Commission at the end of 1921. The outstanding loans, amounting to 3,076,930 francs and 2,196,147 francs, were due respectively to the British, French, and Italian Governments and to the French, Italian, and Roumanian banks which came to the assistance of the Commission in 1919.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. Elysia for Bombay (Liverpool, September 20); s.s. Vindelia for Bombay (Liverpool, October 5).

Anchor Brocklebank Line.—S.s. Mandasor for Calcutta (Birkenhead, September 16); s.s. Mahsud for Port Said, Colombo, Madras, and Calcutta (London, September 16); s.s. Mathura for Calcutta (Birkenhead, September 27); s.s. Macharda for Calcutta (Birkenhead, October 7); s.s. Makalla for Port Said, Colombo, Madras, and Calcutta (London, October 7); s.s. Holywell for Port Said, Colombo, Madras, and Calcutta (London, October 21).

Bibby Line.—S.s. Arracan for Rangoon (Middlesbrough, September 27); s.s. Warwickshire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, September 27).

British India Line.—S.s. Madura for Colombo, Madras, and Calcutta (London, September 15); s.s. Malda for Bombay and Karachi (London, September 22); s.s. Domala for Colombo, Madras, and Calcutta (London, September 29); s.s. Nevasa for Bombay and Karachi (London, October 6); s.s. Mandala for Colombo, Madras, and Calcutta (London, October 13); s.s. Mashobra for Bombay and Karachi (London, October 20).

Clan Line.—S.s. Hyacinthus for Colombo, Madras, and Calcutta (Birkenhead, September 21); s.s. Willcasino for Bombay and Persian Gulf (Birkenhead, September 27).

Cunard Line.—S.s. Brescia for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, Novorossisk, Poti, and Batoum (Glasgow, September 22); s.s. Cypria for Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Liverpool, September 28).

Ellerman Line.—S.s. Grodno for Genoa, Leghorn, Naples, Palermo, Messina, etc. (Liverpool, September 14).

Ellerman "City" Line.—S.s. City of Brisbane for Calcutta (Birkenhead, September 19); s.s. City of Genoa for Bombay and Karachi (Birkenhead, September 22); s.s. City of Nagpur for Calcutta (Birkenhead, October 5).

Ellerman's "Hall" Line.—S.s. Kalomo for Malabar Coast ports (Liverpool, September 19); s.s. City of London for Bombay, Karachi, and the Punjab (Liverpool, October 2).

Ellerman's Westcott and Laurance Line.—S.s. Tasso (new steamer) for Gibraltar, Malta, and Alexandria (London, September 20); s.s. Eden Hall for Malta, Piræus, Salonika, Smyrna, Constantinople, Galatz, and Braila (London, September 23); s.s. Mardinian for Gibraltar, Malta, and Alexandria (London, October 11).

Glen Line.—S.s. Gleniffer for Port Said, Port Swettenham, Singapore, etc. (London, October 5); s.s. Carnarvonshire for Port Said, Port Swettenham, Singapore, etc. (London, October 19); s.s. Glenbeg for Port Said, Port Swettenham, Singapore, etc. (London, November 2).

Harrison Line.—S.s. Explorer for Calcutta (Liverpool, September 21). A steamer will sail from Birkenhead on October 26 for Port Said, Port Sudan, Aden, Mombasa, etc.

Henderson Line.—S.s. Bhamo for Port Said and Rangoon (Birkenhead, September 20); s.s. Amarapoora for Port Said and Rangoon (Birkenhead, October 4).

Holt Line.—S.s. Philoctetes for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, September 14); s.s. Demodocus for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, September 14); s.s. Achilles for Port Said, Port Swettenham, Singapore, etc. (Swansea, September 14); s.s. Agapenor for Port Said, Port Swettenham, Singapore, etc. (Swansea, September 28); s.s. Pyrrhus for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, September 28).

ANCHOR LINE
First-Class Passengers only.
LIVERPOOL TO BOMBAY.
KARACHI via Bombay, calling at Gibraltar & Egypt.

LARGE STEAMSHIPS. UPPER DECK CABINS.
FITTED WITH ELECTRIC FANS.
RECOGNISED BY INDIAN GOVERNMENT.

Passenger sailing dates:—
Elysia, Sept. 20. Castalia, Nov. 21.
Circassia, Oct. 20. Scindia, Dec. 6.
Olympia, Nov. 7. Massilia, Dec. 22.

ANCHOR LINE (HENDERSON BROTHERS), LTD.,
16, GRACECHURCH STREET, LONDON, E.C.3.

SULZER BROTHERS, ALEXANDRIA.
SPECIAL BRANCH.
CLEARING, FORWARDING and TRANSIT
4 Rue de la Gare du Caire, 4
P.O.B. 1492. Tel. 1025.

Digitized by Google

Johnston Line.—S.s. Aviemore for Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz, and Braila (Liverpool, September 30).

Papayanni Line.—S.s. Assyrian for Algiers, Malta, Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, September 16); s.s. Flaminian for Melilla, Malta, and Alexandria (Liverpool, September 16).

P. and O. Line.—S.s. Kashmir for Bombay (London, September 22); s.s. China for Bombay (London, September 29); s.s. Nagoya for Colombo, Madras, and Calcutta (London, October 6); s.s. Kashgar for Bombay (London, October 6); s.s. Morea for Bombay (London, October 13).

Prince Line.—S.s. Scottish Prince for Tunis, Malta, Alexandria, and Syria (Manchester, September 16); s.s. Black Prince for Tunis, Malta, and Alexandria (Manchester, September 30); s.s. Stuart Prince for Malta, Alexandria, and Syrian Coast (London, September 30).

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cable received from the Director-General of Commercial Intelligence, Calcutta, dated September 4:—

Season, August 28.—Monsoon weak in Western India, but general rain on Burma coast and North-East India. August 29 to September 3.—Monsoon generally active in Gangetic Plain, central parts of India and Burma, and to some extent in Peninsula.

Condition of Crops, August 31.—In Bengal weather continues favourable and prospects of winter rice are good, but those of paddy are satisfactory on high lands and fair on low lands. In Bombay the absence of rain during the week, except in Konkan and Gujarat, has rendered the whole agricultural situation less satisfactory. In Khandesh, absence of rain causes anxiety, but cotton and other crops are still satisfactory. In East Bombay, Deccan, and Karnatak, *kharif* crops—*i.e.*, crops sown just before or during the south-west monsoon—will now definitely be poor, and anxiety is being felt as to the sowing of *rabi* crops—*i.e.*, the spring crops sown during or after the north-east monsoon and harvested in March or April. Situation is improved in Sind areas which depend upon rain. In Central Provinces sesamum and rice are expected to be very good, but growth of cotton is checked by long breaks following heavy rain. In Punjab crops profited by light rain and are in good condition. Prospects in other provinces are unchanged.

Markets, August 31.—Bombay cotton market steady. Fine M.G. Oomras, Rs.482 September, Rs.438 December-January. Bombay cotton arrivals from September 1, 1921, to August 25, 1922, were 3,453,000 bales, as compared with 2,858,000 bales during the same period of last year. Bombay imported piece-goods market dull, but old stock being slowly reduced. Local good quiet. September 2.—Calcutta jute market firm but dull. Gunnies steady. Ready 9 porters. Rs.17.12; 11 porters, Rs.24.8. At tea sale on August 29 market was very strong, and buying was general for all grades. All leaf teas advanced ½ to 1 anna. Useful liquorings, broken Pekoes, and broken Pekoe Souchongs advanced ½ anna. Fine tea realised full price. Tippy tea and Darjeelings rather easier. Dusts very strong and dearer. Keen buyers from all markets. 225,330 packages sold to date at an average price of 11 annas per lb. August 29.—Rangoon rice market lifeless. No offers for actual rice and no sellers among millers, whose quotations fell from Rs.452.8 to Rs.445, while bear speculators sold for October at Rs.427.8 and for spot down at Rs.420. September transactions fell to Rs.427.8. Very little paddy was offered, and there were no buyers. Boat paddy quoted at Rs.200 to Rs. 195. September 1.—Large mills quoted at Rs.435.

No change in bank-rate.

COMPANY NOTES AND REPORTS.

Imperial Bank of India.

The report for the half-year ended June 30 last states that the net profits amounted to Rs. 63,52,242, and Rs. 12,74,494 was brought in, making Rs. 75,26,736. This sum has been allocated as follows: For payment of a dividend at the rate of 16 per cent. per annum, free of tax, Rs. 44,98,300; to reserve fund, Rs. 10,00,000; to pension funds, Rs. 5,00,000; carried forward, Rs. 16,28,435.

Darjeeling Himalayan Railway Extension.

The report for the year ended March 31 last states that as the net earnings of the Extensions were insufficient to give a return of 5 per cent. on capital raised the difference, in terms of the contract, will have to be made good by Government, and the necessary claim for rebate, amounting to Rs. 61,872, has been preferred against the Eastern Bengal Railway. The balance from net revenue account is Rs. 2,20,937; less interim dividend of Rs. 2.8, Rs. 1,09,375; balance, Rs. 1,11,562. The directors recommend a further payment of Rs. 2.8 per share, Rs. 1,09,375, carrying forward Rs. 2,187.

EARLY CIVILISATIONS.

Natural Resources and Evolution.

The economic causes which led to various centres becoming cradles of civilisation were discussed by Miss Marion Newbigin in the course of her address as President of the Geographical Section of the British Association on September 7. The first causes which led to fixation in the river-valleys of Babylonia and Egypt, she said, were doubtless the natural resources, scanty though these doubtless had been. The birds of the valley marches, the relatively small number of mammals and the fish of the rivers, must have supplied a certain amount of animal food. The date palm—at least in the Tigris-Euphrates areas, even in its wild state, must have yielded some food.

An important factor in the development of cultivation was the presence of what botanists called the "open" plant formation. Native trees were very few, the date palm being strictly limited in its distribution by its need for water at the roots. For the greater part of the year the ground between the scattered trees was either naturally devoid of vegetation or occupied only by a few desert plants. But after the periodic flooding by the rivers an abundant growth of vegetation sprang up. Man did not require to clear ground for crops; Nature periodically cleared it for him. He had only to make the obvious deduction that water alone was necessary for the apparently barren soil to blossom, and from all the choice of plants which the flooded soil produced from seeds or bulbous roots to pick out those of some use to him and to suppress the rest.

As soon as he had learned the initial lessons of cultivation, he was tied to the area normally flooded at certain seasons or to which he could lead the flood water. The bordering desert ensured isolation. Thus the whole energy of the community was thrown towards its centre, for the periphery formed an area in which the characteristic mode of life could not be practised. The conditions led necessarily to a centralised and imperialistic form of Socialistic organisation. The gradual growth of an elaborate irrigation system required a centralised power for its maintenance. This also brought the possibility of defence when developing neighbouring communities attempted to encroach, but if the attack were made with sufficiently powerful forces to destroy the irrigation system, then reconstruction on the old basis was almost impossible. The community had become adapted to artificial conditions created by itself; if and when these conditions were destroyed the survival of the old culture became impossible.

In the Mediterranean region the characteristic vegetation was alternately open and closed; closed during the cooler season of the year, when the winter rains had caused a brief but intense growth, open during the drought of summer, when the trees and shrubs stood apart with bare earth between. But the contrast was due to rainfall, not to flooding. There was no natural renewal of fertility. Trees and shrubs, however, were far more numerous in species and in individual numbers than in the river-valley systems. There was, however, the curious fact that most of the trees and shrubs actually cultivated, such as the olive and many fruit trees, were introductions from other regions. The suggestion was that when they saw in any part of that area olives or figs arising from above a plot of wheat or barley, it was an adaptation to a new set of conditions of the type of cultivation first practised on any scale in Babylonia and Egypt, olive or fig representing the date palm, the narrow plot of corn the local modification of the broad fertile fields of the river valleys.

Man had been attracted to the area by the natural resources, small although these had been, with the addition of sea fisheries. He had become fixed to it when he had learnt that the hill spurs gave safe sites for settlements, while affording easy access to the slopes on which his special form of intensive cultivation could be carried on. The sea gave a possibility of free movement absent in the river valleys. Thus there had occurred the spread of the higher forms of Mediterranean culture from the eastern end of the sea towards the west, with the founding of new settlements of generally similar type to the old. But the Mediterranean area had the great disadvantage that breadstuffs were difficult to produce in quantity. The Greeks and many mediæval cities overcame this difficulty by sea trading; the Romans by holding in subjection the areas, outside that of the characteristic climate, which were corn-producing.

Clayton Wagons, Ltd., of Lincoln, have secured a substantial order for rolling stock for the Indian railways, and Penney and Porter, Ltd., of Lincoln, have received an order for semi-Diesel engines, also for India.

The new Southampton office of the Canadian Pacific, in charge of Mr. David Drummond, was opened on September 4. The premises, which are situated in Canute Road and will be known as "Canadian Pacific Building," are close to the dock gates and to the railway.

Near East Markets.

LONDON PRODUCE REPORT.

Oilseeds Weak.

(*From Our Own Correspondent.*)

London, Monday Night.

Sugar.—Home refined has continued in good request. Tate's cubes are 3d. lower at 58s., while mineral water sugar is 52s. London granulated is also 6d. up at 51s. 6d., while Lyle's granulated has gained a similar amount at 51s. 3d. Foreign descriptions have been harder. West Indian crystallised has been done at 43s. 9d., a gain of 3d., while white Mauritius is unchanged at 47s. 6d. White sugar quotations are:—October 20s. 4½d., November 20s. 5½d., December 20s. 8½d., March 20s. 10½d.

Coffee.—There has been little change in the market position. East Indian is unchanged at 116s., while Nairobi remains at 100s. Costa Rica, however, has gained 2s. at 112s. The futures market has been harder. Quotations:—December 60s. 4½d., March 60s. 3d., May 59s. 7½d.

Desiccated Coconut.—The position remains much the same, though rather more buying has been in evidence in expectation of an increased demand.

Rice.—A firm tone has prevailed, and rates are again the turn harder.

Green Fruit.—Prices for South African oranges have tended to ease off slightly owing to the supply being in excess of the demand. A brisk demand continues for lemons, and prices are firmer for Naples fruit. The market for Valencia onions remains featureless.

Oilseeds.—The market has been rather weak. Indian linseed is 7½d. down at 18s. 4½d., while La Plata has shed 1s. 6d. at 17s. Rape seed has been variable, with Toria 6d. down at 17s. 6d. and bold Ferozepore 6d. up at 17s. Cotton seed has been dull, with Egyptian black 6d. down at 10s., while Sakellarides is 9d. lower at 9s. Indian is, however, 1½d. up at 8s. 4½d.

Oils.—The position is much the same. Linseed oil is unchanged at 34s. 6d. Crude rape oil remains at 42s., while refined is the same at 44s. Cotton oil has been dull, with Egyptian crude 1s. down at 33s. and technical 2s. lower at 37s. The refined variety is 1s. lower at 44s., while deodorised is 1s. down at 49s.

Oil Cakes.—The market has been steady. Cotton seed cake is unchanged at 160s., while coconut cake remains at 190s. Cotton meal cake is the same at 280s., while linseed cake is unchanged at 260s.

SMYRNA FRUIT MARKET.

Effect of Offensive on Prices.

Messrs. C. J. Giraud and Co., Smyrna, report as follows under date of August 28:—

Sultanas.—Farmers continue resisting the present level of values. Native dealers are experiencing the greatest difficulty in buying up country, and the volume of supplies is reaching a dangerously low point. There are pretty heavy engagements to be covered by shippers during the next fortnight, and if the farmers, as appears likely, persevere in their present attitude, we may possibly see a squeeze at a given moment, accompanied by a sharp advance in values. Stock on the market is at present reduced to barely 500 tons, a good portion of which, under instructions of farmers, is not being offered for sale.

Very little business is reported yesterday, market day up country, and on present indications no marked increase in supplies can be expected during the course of this week. Shippers are showing reserve in their operations, but with the season entering into its period of greatest activity, more buying must inevitably develop from September 1 onwards.

Exchanges have fluctuated pretty widely during the week, advancing from 730/735 to 780/785, and reacting to 758/762. The improvement has counteracted in some measure the increase in the foreign equivalent cost of sultanas, and has partly neutralised the advance in local currency which shippers have been compelled to pay on their purchases during the week. The outlook generally is very uncertain, but prices seem to have grounded for the time being. Fine qualities continue very scarce, farmers holding on to their stocks and only disposing for sale of the more inferior grades. Owing to the heat wave during the early part of August, qualities have been affected, and fine outstanding growths are reported to be in shorter supply than last season.

Figs.—First arrivals reached the market on the 22nd inst. Quality shows very sound, healthy fruit, but development leaves a good deal to be desired. All the supplies till the week-end have been swept up for shipment to the United States.

Difficulties of transport in the Meander Valley and frequent raids of Nationalist armed bands on the frontier line are disturbing features likely to upset the normal flow of supplies, and to delay the decline in values which generally follows the opening level. Any more serious developments in the military situation may, moreover, by reducing supplies, influence a stronger market.

Owing to the reports of a fresh Turkish offensive and the wholesale requisitioning of all transport animals up country threatening a continued reduction in supplies, figs opened a strong market, and all arrivals, amounting to about 4,000 loads, have been bought up at an advance of 20 per cent. on Saturday's closing rates. Sultanas are strong, dealers holding for higher prices or refusing to sell.

In their weekly report dated August 26 Messrs. Giraud state:—

Sultanas.—The total estimated arrivals amount to 22,045 bags, as against 13,965 for 1921. The total estimated sales are 18.045 bags, as compared with 11,465 bags last year; whilst the estimated stock unsold totals 4,000 bags, as against 2,500 bags in 1921.

Markets.—Sultanas opened weak on Monday, but with the exchanges tending to advance, business was stimulated and daily assumed more activity, sales for the week totalling about 1,100 tons. Farmers persist in their attitude of resistance to the present level of values. Arrivals have been on a small scale and are not likely to increase in the near future. Prices in local currency have marked an advance of 10 per cent. on the week, but the higher exchanges have offset in some measure any increase in foreign equivalents. Heavier buying must be reckoned with next week, and if supplies from the country do not come forward more freely an all-round advance in prices may be anticipated. Exchange for sterling from 730 advanced to 780.5, but closed weaker at 755-760 with uncertain tendency.

AGRICULTURAL SITUATION IN IRAQ.

Crops Generally Good.

The following extracts are taken from the Agricultural Bulletin of Iraq for the month ended July 15:—

The "Shamal" wind set in later than usual this year, and so far has been mild compared to last year. Although it is reported as having had an adverse effect on cotton where adequate wind screens have not been provided, there has been less shedding of flowers and bolls than was anticipated. It will be at least another month, however, before it is possible to estimate damage to crops caused by hot winds.

Irrigation and Condition of Crops.

The Khalis canal was closed from June 13 to 16, whilst attempts were made to blast a piece of rock which had fallen in near the head of the canal. Owing to shortage of material, it is understood, the attempt was not quite successful, and it is reported that the canal will probably have to be again closed in order to facilitate completion of the work. The Khorassan Canal was closed from June 17 to 21 for silt clearance. Summer crops and vegetables dependent on this canal for their water supply are said to have suffered. Elsewhere the supply appears to have been sufficient, although cultivators at the tail of the Gurma have complained of shortage. The appearance of their crops, however, does not include any grounds for complaint from this cause.

Summer crops generally are reported to be doing well. In the Amara rice areas the prospects are good. There is a shortage of vegetables reported from Basrah, but elsewhere the supply is plentiful. Sesamum appears to be more widely cultivated than usual this summer, with a corresponding decrease in "dukhu." Winter crops have all been gathered, but threshing and winnowing are progressing slowly.

There is very little grazing to be had at this time of year, but the supply of fodder is everywhere plentiful. Cattle and sheep continue to appear in good condition.

Experimental Farms.

Work on the Kut and Baquba farms is now restricted almost entirely to cotton demonstration. Preparations are being made for the closing down of the former at the end of the cotton season. The various experimental plots at Central Farm, Rustam, look very promising.

Research.

Spraying operations carried out against Peach Stem Aphis in Karradah gardens last year have made a marked

Digitized by Google

beneficial effect this year. It is a hopeful sign that the benefits derived from these measures are being appreciated by one of the leading garden-owners, who has purchased a spraying outfit and is now combating this pest on his own.

The Assistant Entomologist has proceeded to Basrah in order to carry out methods of controlling the Ghubar disease of dates. This work in itself is sufficient to justify the employment of a whole-time entomologist, who should be provided with the necessary facilities for running an entomological section at Basrah for the purpose of combating date diseases.

Owing to the locust campaign at Mosul and the necessity for attending to diseased dates at Basrah, there has not been much opportunity for coping with the laboratory work, which continues to accumulate in the entomological section. It has not been possible to give any attention to a study of the life-history or habits of the "Soon" pest, which is doing much damage to wheat in Mosul and Upper Iraq this year.

Some remarkably good photographs of economic insects of Iraq have been prepared by the Assistant Entomologist. An attempt will be made (if time and circumstances permit) to make a complete series of these photographs, showing the more common insect pests in the different stages of their life-history.

District Work.

Winter cereals have all been gathered and threshing has become general throughout. Various reports go to show that this operation is in many cases being retarded near to large towns on account of labour difficulties. District staff have been giving their whole attention to the cotton crop. The Diyalah areas absorbed the largest quantities of seed at sowing time, but the crops are far from promising in this tract. The reason is entirely due to lack of attention and general slovenliness on the part of the cultivators. There is a very marked difference, however, in the Yusufieh area, where results appear to be much more promising, although unfortunately the area under cotton is very small. Several cultivators have succeeded in raising first-class crops, which give every indication of heavy yields, judging from the number of bolls which are forming.

By far the biggest cotton-planting venture in Iraq this year is that of Messrs. Koyumdjian at Falluja. At very short notice, and despite initial delays for which they were in no way to blame, they have succeeded in raising nearly three hundred acres of cotton. It is interesting to note that the thirty odd acres of Egyptian cotton grown by them as a commercial experiment appears so far to be doing as well as the Mesowhite variety. Climatic conditions have not been so severe this year, however, and as yet it is too early to form an opinion on which is likely to be the better-paying variety. It is interesting to record that demands are already being received for next year's seed.

The sudden drop in prices of wheat and barley has quickened the interest of cultivators in the possibility of growing some other and more remunerative crop. The idea of growing flax as a winter crop is appealing to many, possibly on account of the high prices which are now being obtained for the fibre. The growing of flax is a simple enough matter, but the subsequent treatment of the crop requires expert knowledge before a marketable fibre can be produced. The Department of Agriculture have imported scutching machinery which is being erected at Shaikh Janaid in order to deal with the flax which was grown on the Department's experimental farms this year. A great deal of experimental work remains to be done, however, before much progress can be made. It should be borne in mind that it is a crop which appears to be eminently suited to the climatic and soil conditions of Iraq, and as such demands full investigation, all the more so as its fibre is an exportable product of which there is at present a world shortage.

CURRENT PRICES.

General Produce.—Bacon (Continental), 146s. per cwt.; (Canadian), 132s. cwt.; (American), 113s. cwt.; butter (Danish), 219s. cwt.; (Australian), 205s. cwt.; (New Zealand), 214s. cwt.; cheese (Canadian), 87s. cwt.; (New Zealand), 87s. cwt.; lard, 73s. cwt.; eggs (Danish), 18s. per 120; (Styrian), 11s. 9d. per 120; chillies, 130s. cwt.; cloves (Zanzibar), 1s. 3d. lb.; cocoa (Ceylon good to fine), 81s. 6d. cwt.; coffee (Costa Rica), 117s. 6d. cwt.; (East Indian), 115s. cwt.; (Central American), 95s. cwt.; (Jamaica), 72s. 6d. cwt.; (Mocha Longberry), 100s. cwt.; (Santos superior), 69s. cwt.; (Nairobi), 101s. cwt.; ginger (washed Cochin), 52s. 6d. cwt.; nutmegs (110's to 80's), 1s. lb.; pepper (Singapore black), 3¾d. lb.; (Muntok white), 6¾d. lb.; pimento, 2d. lb.; raisins (Cape), 49s. cwt.; currants (Vostizza), 64s. cwt.; currants (Amalias), 53s. cwt.; sultanas (Smyrna), 90s. cwt.; sugar (Tate's cubes), 58s. cwt.; (Lyle's granulated), 50s. 7½d. cwt.; (Mauritius crystals), 47s. 6d. cwt.; (West Indian crystallised), 45s. cwt.; (centrifugal), 18s. 1½d. cwt.; tapioca (fair Singapore), 2½d. lb.; rice (Rangoon No. 2), 15s. 4½d. cwt.; (bran Rangoon), £6 17s. 6d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 1s. 11d. lb.; tea (Indian common to good common), 11d. lb.; (medium to good), 1s. 5d. lb.; (fine to finest), 2s. 8d. lb.; Ceylon (common to good common), 1s. lb.; (medium to good), 1s. 5d. lb.; (fine to finest), 2s. 5d. lb.; Java (common to good common), 10d. lb.; wheat (English white), 46s. 6d. qr.; wheat (Australian), 53s. 6d. qr.; oats (English), 41s. qr.; oats (La Plata, ex-ship), 26s. 1½d. qr.; maize (La Plata), 33s. 3d. qr.; flour, 39s. 6d. sack.

Chemicals.—Acids: Boric, 61s. cwt.; oxalic, 7½d. lb.; citric, 2s. 3¼d. lb.; tartaric, 1s. 4½d. lb.; ammonia (sulphate), £15 16s. 6d. ton; arsenic (white powdered), £43 10s. ton; benzole (standard), 2s. 5½d. gallon; bleaching powder (35 per cent.), £12 5s. ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 109s. cwt. Potassium: Bichromate, 6¼d. lb.; chlorate, 4½d. lb.; caustic, £31 ton; nitrate, £37 10s. ton; permanganate, 8½d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £14 ton. Sodium: Crystals, 110s. ton; bi-carbonate, £10 15s. ton; bichromate, 5¼d. lb.; alkali (58 per cent.), £8 1s. 3d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £20 2s. 6d. ton; hyposulphite, £16 10s. ton; prussiate, 11d. lb.; nitrate, £13 2s. 6d. ton; glycerine (crude, 80 per cent.), £48 ton; (industrial, 1,260 per cent.), £87 10s. ton; lemon oil, 2s. 11d. lb.; quinine, 2s. 2d. oz.; red lead, £37 17s. 6d. ton; white lead, £40 10s. ton; white ground lead, £49 2s. 6d. ton; sulphate of copper, £26 5s. ton; sulphate of iron, 60s. ton.

Metals.—Aluminium, £100 ton; antimony (English Regulus), £27 12s. 6d. ton; bismuth, 9s. lb.; copper (standard), 62 16s. 3d. ton; copper (electro), £69 15s. ton; gold bars, 92s. 4d. oz.; iron (No. 3 Cleveland), 87s. ton; hematite (mixed number), 89s. 6d. ton; galvanised sheets (25 G), £16 10s. ton; lead (soft foreign), £23 18s. 9d. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 37s. 6d. unit; nickel, £145 ton; platinum, 420s. oz.; graphite (80-90), £13 10s. ton; quicksilver, £12 12s. 6d. bottle; spelter (G.O.B.), £30 12s. 6d. ton; tin (standard), £160 11s. 3d. ton; wolfram, 14s. unit; zinc sheets, £37 10s. ton; tin plates (20 by 14), 19s. 1½d. box; silver bars, 35⅛d. oz.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 9½d. lb.; 80 to 89 lb., 9½d. lb.; 70 to 79 lb., 9¼d. lb.; 60 to 69 lb., 8¼d. lb.; 59 lb. and under, 6⅞d. lb.; (second), 90 lb. and up, 8⅜d. lb.; 80 to 89 lb., 8⅛d. lb.; 70 to 79 lb., 7¾d. lb.; 60 to 69 lb., 6¾d. lb.; 59 lb. and under, 5⅜d. lb.; cows (first), 60 lb. and up, 7¼d. lb.; 59 lb. and under, 6⅝d. lb.; (second), 60 lb. and up, 5¼d. lb.; 59 lb. and under, 5d. lb.; bulls (first), 5d. lb.; (second), 3⅜d. lb.; kips (first), 6d. lb.; (second), 5¼d. lb.; (third), 3d. lb. Calcutta Market (prices in rupees per 20 lb.): Arsenic hides (cows); Agras, 8 to 12; Durbhangas, 6 to 7.8; Patnas, 4.12 to 5.12. Salted cows, 6 to 8.8. Arsenic hides (buffalo), 3 to 6.8. Skins: Calf, 8 to 10; goat, per 100 pieces, 200 to 260.

Miscellaneous.—Cotton (American), 13.76d. lb.; Egyptian (Sakel), 17.50d. lb.; jute (first grade), c.i.f., £31 15s. ton; jute (lightnings), £28 5s. ton. Oilseeds: Linseed (La Plata), £16 11s. 3d. ton; palm kernels, £16 2s. 6d. ton; castor seed (Bombay), £17 17s. 6d. ton; sesame seed (China), £23 17s. 6d. ton; soya beans, £12 5s. ton. Oils: Linseed, £35 5s. ton; olive (Spanish), £75 10s. ton; rape (crude), £41 ton; soya, £35 15s. ton; petroleum, 1s. 4½d. gallon; petrol, 2s. 1d. gallon; fuel oil (ex-tank), 65s. ton; coconut (Ceylon), £36 17s. 6d. ton; cotton (crude), £35 ton; ground nut, £47 15s. ton. Rubber: Plantation (No. 1 crepe), 6⅞d. lb.; smoked sheet, 6⅞d. lb.; fine hard Para, 10¼d. lb.

The demand for sewing machines is increasing in the Red Sea district, although imports for the years 1919, 1920, and 1921 ran ahead of the demand and caused a sharp decline in the imports for 1921-22, says an American Consular report.

The transfer books of the 4 per cent. debenture stock (both 1936 and 1938) of the Madras and Southern Mahratta Railway Company, Limited, will be closed from September 16 to 30 (both days inclusive), for the preparation of warrants due to stockholders who are registered on the company's books on September 30. No transfer deeds of the 4 per cent. debenture stock will be received during the time the books are closed. The warrants will be posted on September 30.

SPECIAL MARKET REPORTS.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Alexandretta, August 8.

The report for June states :—The crops are pursuing a normal course. It is now clear that it will not be necessary this year to import foreign cereals. The crop of *dari* will, however, be short.

The market has been quiet during the month, and commercial transactions have been restricted. The departure of a large number of Armenian refugees from Cilicia has naturally affected the sale of the principal articles of primary necessity, and, further, the general trade stagnation which has particularly affected Alexandretta has only served to intensify the existing commercial crisis. Hardly 10 or 12 per cent. of the articles imported during the month are for local consumption, the balance being in transit for Aleppo, Antioch, etc.

Zahle, August 8.

The opening of the summer season has been marked by a certain amount of commercial activity in this region. Prices of cotton goods and manufactures are a little higher following the rise in cotton and the depreciation of the French exchange. Transactions have been rather more animated in the market, which has commenced to make purchases of these commodities.

Remittances of money from America have been more numerous than last month, though below those of the corresponding period of last year. This increase is particularly due to the appreciation of the Brazilian exchange, which has enabled some emigrants to resume their remittances, which had been suspended almost entirely for some time.

Latakia, August 8.

The tobacco crop of 1922 has been reduced by half, as a result of the measures taken recently by the Régie, prohibiting the picking of second growths of the plant. At the beginning of the year that Administration established a small factory for the manufacture of cigarettes, to utilise the "Chaik-et-Beut" tobacco. The results of the sales have been : first quarter £S4,659, second quarter £S8,835. The "Abourika" tobacco, much appreciated on the English market, is a variety of the "Chaik-et-Beut" tobacco, which is submitted for many months to a special fumigation and afterwards to fermentation. A part of the 1919 crop of this tobacco, fumigated in 1920, remains in England still unsold, because of its inferior quality, which has occasioned traders in this commodity a loss of 60 to 70 per cent. The crop of 1920, fumigated in 1921, which amounted to 9,500 bales, of which more than half was purchased by the Imperial Tobacco Company, has not yet been entirely disposed of. In view of these disappointments the tobacco merchants formed a syndicate last year with a view to the elimination of competition and the maintenance of prices so as to be able to control the sale in England of the stocks standing over. This year the syndicate has again been formed, and, with a view to preventing the overloading of the English market, has decided that a part of the 1921 crop, fumigated in 1922, shall be held here after fermentation. After five or six months this tobacco will be consigned to London, where it will be sold more easily owing to the exhaustion of old stocks—which, on the other hand, will sell better in default of arrivals of the new crop.

DULL TONE PREVAILS.

Prices Generally Lower.

(From Our Own Correspondent.)

LONDON, Tuesday Morning.

In these days one has to be prepared for the unexpected, at any rate on the Stock Exchange. It seems hardly possible to have two good weeks running, a fact which reflects the uncertain conditions that still obtain. One hoped with the Reparations question settled temporarily that the worst of the immediate difficulties was over, but to-day the markets are subdued as a result of the Near Eastern crisis, while, as if that were not enough to depress prices, there is a renewed difficulty in regard to Reparations, this time over the question of the Treasury Bills Germany has undertaken to hand over. Needless to say, business has been on a very small scale. It has, indeed, been abundantly evident in the last few days that buyers have no intention of undertaking operations until the situation is clearer.

There is, it may be added, little disposition to take an adverse view of the Near Eastern position, though it is realised clearly enough that there are unpleasant possibilities. On the contrary, indeed, the tendency is rather to welcome the development as likely to bring about at long last a settlement in the Near East, and thus enable the markets of Asia Minor to be again open for trade.

It has been a lean time for weeks as regards new companies, but I expect things will brighten up in this direction next month. At any rate, it is understood that there are a number of new issues in the offing. Whether they appear soon or not, no doubt depends on the general situation.

Gilt-Edged Dull.

Gilt-edged have been affected by the political situation, and yesterday saw an all-round decline. Consols, at 56⅝ xd, are ¾ lower, the Conversion Loan at 72¾ is 1⅜ down, while War Loan Fives at 99 13-16 have shed 7-16. Indian stocks have shared in the prevailing decline. The 7 per Cent. stock at 114½ xd is 2 down, the 3½ per Cent. stock at 67¾ xd has shed ½, while the 3 per Cent. stock is ½ lower at 56¾ xd.

An uncertain tone has ruled in the Foreign group, which has been under the influence of the political situation. French stocks drooped as a result of the new Reparations difficulty, War Loan Fives being ½ down at 35, while the 4 per Cents. are unchanged at 28¼. German 3 per Cents. have eased off somewhat, and at 1 7-16 are ⅛ down. Near Eastern developments are reflected in the weakness of Greek and Turkish securities. Greek Monopolies are down to 33½, while Turkish Unified are ½ lower at 34, after being as high as 36½ on the announcement of the payment in respect of the September coupon. Russians have firmed up on the news of the agreement with the Russo-Asiatic Company. The 4 per Cents. are unchanged at 6½, but the 4½ per Cents. at 7½ are 1½ up, while the 5 per Cents. are 2 up at 11½. Czecho-Slovak 8 per Cents. have been rather dull, and close at 92½.

In South American securities a rather variable tone has been in evidence. Brazilians have been dull; on the other hand, Peruvian securities have been in some request.

Industrials Steady.

The Industrial market has not been affected so far by the political situation to any great extent, and, on the whole, a fairly steady tone has ruled. Business, however, has been on a most restricted scale, except in the case of a few descriptions for which there has been something of a demand.

Tobaccos are about the same, with Bats unchanged at 89s. 3d., while Imperial Tobaccos are 3d. up at 69s. 3d. Textiles, as usual, have been a firm spot. Courtaulds have been in good demand, and at 55s. 6d. are 2s. 3d. up, while Coats are 67 xd. Listers have continued their rise, and at 28s. are 2s. 6d. up. There has not been very much doing in Iron and Steel securities, but, all things considered, the tone has been quite good. Vickers are 3d. up at 12s., Armstrongs are 9d. lower at 14s. 9d., while Guest Keens are 6d. up at 35s. In Indian railways Assam Bengal are 56, Bengal and North-Western are 1½ up at 141½, Bengal Nagpur are 98½; Bombay Baroda at 94⅝ are ⅜ up, while Madras and Southern Mahratta have gained ¾ at 105.

A quiet tone has ruled in Shipping descriptions. P. and O. deferred are unchanged at 307, Cunards remain at 20s., while Furness Withys are 31s. 6d. xd.

Oils Dull.

As was only to be expected, in view of the general situation, a dull tone has developed in this market, and yesterday prices eased off almost all along the line, it being a case of sellers predominating. Anglo-Persians close at 6 1-16, at which they are 3-16 down, while Burmahs are ¼ lower at 5⅝. Mexican Eagles are unchanged at 3¼, after being considerably higher, and were, in fact, specially weak yesterday, easing off 3-16. Shell Transport have been fairly firm, and at 4⅝ are 1-16 up. Trinidad issues have been steady. Apex are 1-16 up at 2⅛, Centrals are unchanged at 1 15-16, while Leaseholds are the same at 1¼.

Russian stocks firmed up on the report of the arrangement, Spies being 6s. 6d., Anglo-Maikops, 3s. 9d.; North Caucasians, 16s. 6d.; Ural Caspians, 13s. 9d.; and Uroz, 9s. 9d. Among Egyptians Anglo-Egyptian B are 1⅝, at which they are 3-16 higher, while Oilfields of Egypt are 9d. up at 3s. 3d. In the Roumanian group, Phœnix has been a good feature, rising to 29s., a gain of 1s. 3d. on the week. I shall be very surprised if this share does not go considerably higher when conditions are a little more favourable. Roumanian Consolidated are 3d. down at 15s. 3d., Steaua Romanas are 1s. 3d. up at 11s. 6d., while Dacia Romanos are unchanged at 13-16.

Banks Steady.

A fairly steady tone has ruled in Banking descriptions. Chartered are 17¾ xd, while National of India are ¼ down at 43½. P. and O. Banks are ⅛ up at 14½, while Bank of British West Africas are unchanged at 4¾.

In Egyptian descriptions Aboukirs are 6d. up at 21s., Beheras have gained ¼ at 8¼, Egyptian Markets are 3d. up at 21s. 9d., Gharbieh Lands are 5-16 up at 1½, while New Egyptians are 6d. up at 23s. 6d.

Rubbers.

A better tone was in evidence in this market yesterday as a result of the resolution of the Rubber Growers in regard to restriction, and, for once in a way, prices actually went higher.

The traffic receipts of the Suez Canal from August 19 to 25 amounted to 2,900,000 francs, against 2,860,000 francs for the corresponding period of last year.

Cotton and Cotton Goods.

THE EGYPTIAN MARKET.

Prices Maintained.

The Commercial Co. of Egypt, in their report for the week ended August 25, state:—

During the week under review the market has been moderately active. Fluctuations have been fairly severe; the unfavourable reports on the American crop have contributed to hold prices up. Demand from the consuming centres has not improved, although the daily spot sales in Liverpool have been somewhat larger than recently. But for the strength of America we do not think that prices would have been so well maintained in the face of the poor demand and the very unsatisfactory political situation in Europe, which is not calculated to inspire confidence in a quick return to better trade.

The spot market has been quiet this week, and sales for the four days amount to 4,000 bales, of which we estimate 2,800 bales Sakellaridis, 1,000 bales uppers, 150 bales white, and 50 bales brown. The first lots of new crop uppers have been sold this week at current prices; there was no rush to secure them, as sometimes happens. The cotton sold was over "good" in class, and the staple was fairly good, but such early lots are no guide to the general quality of a crop.

Sakellaridis.—Most of the business has been done between fully fair and fully good fair to good, the high grades being neglected and offered rather cheaply. To-day has seen quite a good demand for good fair to fully good fair and fully good fair with good staple. Business has also been done in low grades about middling fair. The basis is rather easier for the grades above fully good fair, but steady and hardening for those below fully good fair.

Uppers.—A little business has been done in low grades, which are very scarce, and in high-grade new crop, but the bulk has lain between good fair and fully good fair. The basis is without much change and inclined to stiffen.

Brown.—A retail business has been done. The basis is almost unchanged and inclined to ease, except for fair and fully fair, which are a little dearer.

White.—A small business has been done at an unchanged basis.

Crop.—Reports received this week indicate a continuance of the good progress reported in our recent circulars. Some further withering of bolls owing to the excessive heat and humidity, is reported, but the damage from this cause is negligible. The picking of the crop in Upper Egypt is proceeding apace. The yield has in many cases been considerably affected by the shortage of water during July; the plants have, however, plenty of top bolls, and good weather during the next two or three weeks will ensure a yield which will, in spite of all, be satisfactory. The attack of the pink boll worm, although somewhat increased in certain districts, still continues to be light, and it would appear that the disease which was noticed last summer to have attacked the late generations of the worm must have materially reduced this pest.

MANCHESTER MARKET.

Business Still Restricted.

(*From Our Own Correspondent.*)

Manchester, Saturday.

The tone of the market during the past week has been the quietest we have experienced for some time back, and the actual amount of business which has been done has been of small extent. The smart fall in values for the raw material at the beginning of the week caused buyers to adopt a policy of caution, but towards the end of the week rather a steadier tone prevailed in raw cotton circles, which had the effect of forcing out a little more trade. With regard to future developments, however, there is very little prospect of any increased business if raw material rates do not keep steady, and the opinion as to the future course of prices is very divided. Taking the statistical position of raw cotton into consideration, there does not seem to be any reason why lower values should be registered, but the markets at the moment are governed by outside influences. Owing to the disturbed conditions in the Near East, trade with Egypt, the Levant, and Constantinople has been at a standstill, and it is futile to expect any developments until the trouble out there is over. Quotations for Egyptian yarns have been rather easier when tested, and sales for home use have been unimportant. During the last few days rather more activity has been displayed by buyers for India and China, but transactions have not been of any weight. Most of the offers have been a long way out. Day-to-day transactions keep being recorded for the remaining minor outlets. Home trade buying has been patchy. Spinners of American counts have been full of complaints, and prices all round have been reduced. The turnover is far in excess of the demand.

LIVERPOOL REPORT.

Business Featureless.

Messrs. Reynolds and Gibson report as follows for the week ended September 6:—

The feature of the past week has been the advent of the American Bureau Report giving the condition of the crop there as 57, and this has been interpreted as being "bearish" in character. Our market here duly conformed to the weakness displayed in the American markets, and, as we write, prices show a relapse from last week's figures of roughly ¾d. per lb. This drop has brought in some purchasing, but, as prior to the publication of the Bureau, spinners had deliberately held off whilst waiting to see which way the cat jumped, no great increase in business is shown on the week's figures.

The enquiry here has been only of a moderate description and, as usual, has been somewhat featureless. There have been one or two requests for good brown, and Nubari, but the cotton desired has been difficult to find. The upper market has been slightly more popular, and holders of this cotton are generally glad to liquidate their stocks, with the result that some cheap bargains have been picked up here and there. There has been a little more doing in Sudan cotton, and several lots of Tokar, of somewhat indifferent grades and staple, changed hands in the neighbourhood of 13.00d. This last style of cotton is showing signs of scarcity, although there is probably a considerable stock in warehouse, which is still carrying impossible limits placed upon it two years ago or thereabouts. The demand for the really good Tokar Sakellaridis (21.00d.) has completely died away with the rapid falling off in the quality of the cotton itself. A fair trade continues in good fair to fully good fair Sakellaridis, but owing to the amount of re-cleaned cotton, which is so generally mixed in nowadays, the prices obtained have varied considerably.

C.i.f. business shows no improvement, and enquiries for new crop are conspicuous by their absence. Business here is still of such a hand-to-mouth character, and there is such a large stock of cotton immediately available on the spot, that the majority of spinners seem to be taking but little interest in the new crop, which, judging by the report cabled on the 5th instant by the Alexandria Produce Association, looks like being a very good one. Boll worm has done a certain amount of damage, estimated in the Delta at from 15 to 25 per cent., and in Upper Egypt at 10 per cent. Picking has begun. Manchester reports have not been of an exciting nature. A large cloth inquiry still comes from India, but offers are again reported as being "hopelessly" out of it, and sales of weight are isolated. Yarns appear to be holding their own fairly well, although the recent drop in the raw material is bound to have its effect sooner or later. At the moment, fears of big fluctuations in the future markets of the world appear to be acting as a deterent to much fresh business. Pending a direct improvement in the trade itself (and there are many well-informed people who believe that this is not far distant) the immediate course of prices must still depend to a great extent on the fluctuations in the American market. Total sales 2,900 (including 350 Sudan). Quotations are reduced 75 points, with the exception of good and above in uppers, which are only 50 points lower on the week. Fully good fair Sakellaridis 17½d.

MANCHESTER COTTON REVIEW.

The cotton trade review of the Imperial Ottoman Bank for the week ended September 9 states:—

The cotton trade has experienced a disappointing week, the outstanding feature of which has been the fall in American raw cotton prices following the publication of the official Bureau report. Although a "condition figure of 57 compares unfavourably with the previous one of 70.8," it is no worse than the private estimates from usually well-informed quarters had led the market to expect, and its publication brought about heavy selling orders. The result of this has been a further lack of confidence on the part of prospective buyers, who are once again holding off purchases just at a time when the market hoped the tide was about to turn.

Raw Cotton.—When business opened on Monday last there was an immediate drop of 37 points, following the publication of the American official statistics regarding the condition of the crop. In the middle of the week a further substantial decline occurred. Though some recovery from the worst has been experienced, the market closes without much confidence. Egyptian cotton, which has fallen to some extent in sympathy with American, has nevertheless found more buyers than recently. Closing prices are as follows:—American fully middling, 12.94; Egyptian fully good fair, 17.50.

NOTES OF THE WEEK.

Britain and the Near East.

The situation in the Near East is serious, and we are not in possession of the considerations which led to the issue of the British semi-official statement on the subject last Saturday. We are forced to admit, however, that the events of the last three years compel distrust of any step taken at this stage by a Cabinet that has consistently mismanaged Near Eastern affairs, and until further information is available it would seem as if the Government, for reasons of its own, is magnifying a bogey of its own creation. Great stress is being laid on the supposed menace to the Straits, and the demand for an open waterway between the Mediterranean and the Black Sea is linked up, quite unnecessarily, with the maintenance of the *status quo* in Thrace. An attempt is being made to mobilise in support of the Government's policy both Roumania and Yugoslavia, who have hitherto been virtually ignored in connection with the Allies' handling of the Near Eastern question. The British public, however, will do well to remember that in everything that concerns the Near East the Government has been altogether badly advised for the last three or four years; the delay in drafting the treaty of peace was wrong, its terms were impossible, and the Allies' action in pitting the Greeks against the Turks was the crowning blunder.

The Bogey of the Straits.

The evidence that the Turkish Nationalists are opposed to the opening of the Straits is by no means convincing in view of the fact, persistently ignored, that the so-called National Pact provides for this measure. Until there is evidence, therefore, that the National Pact (the text of which appears on another page) has been repudiated by the Turks there is no reason to lose our heads over this bogey. For the last fifty years the Great Powers of Europe, rather than Turkey, have been mainly responsible for the Rule of the Straits, and in view of the special conditions, their own geographical position, the rivalries of the Powers, and the incidence of war in which the Ottoman Empire has been involved, it cannot be said that the Turks have been exceptionally aggressive in interfering with the waterway. Even if we accept to-day without question the principle of the complete freedom of the Straits, it would be difficult for anyone to show that Great Britain's interest in that freedom is greater than her interest in the establishment and maintenance of peace throughout the Near and Middle East, including India. The bogey of the menace to the Straits, therefore, need have no excessive terrors for the British public, especially as all the indications are that the Turks, if properly handled, are quite prepared to accept the principle, provided that some concessions are made to their *amour propre*, which was not considered in the Treaty of Sèvres.

A Fresh Orientation.

The suggestion is made by or on behalf of the British Government that the victory of the Turks over the Greeks has nothing to do with the relations between the Turks and the Allies, which remain what they were at the signing of the Armistice in 1918. [If in the discussion of Near Eastern affairs we seem to draw a distinction between the British Government and the Governments of France and Italy, it must be remembered that the Treaty of Sèvres, although signed by all three Allies, was repudiated almost at once by the other two, and the contention of its sanctity or validity has been upheld by the British Government alone.] It can be urged that any definite war aim of the Allies has been secured by their victory; but this contention cannot be made to cover the whole of the Treaty of Sèvres. In that document an unjustifiable attempt was made to graft on to the Allied victory an *ex parte* settlement of the Greco-Turkish question. The Turkish Nationalists joined issue with the Allies on this point, and the latter bade the Greeks substantiate their claims; for it must be borne in mind that the particular virtue in the Allies' eyes of M. Venizelos' programme, which they accepted and incorporated in the Treaty, was that it represented a just and workable settlement of the Near Eastern problem. The Turks have shown that the Greek settlement was neither just nor workable; in fact, was no settlement at all, and, consequently, the whole of M. Venizelos' programme goes by the board. Thus the Greek claim to Eastern Thrace is disposed of, as well as the claim to the Smyrna enclave; and it

Digitized by Google

is idle for the British Government at this stage to appeal to the Little Entente to support the decision regarding Thrace that was embodied in the Treaty of Sèvres.

The Kemalist Attitude.

In sharp contrast with the British Government's sudden rattling of the sabre there are abundant indications that the Turkish Nationalists are, to say the least, officially keeping themselves in hand. (The fate of Smyrna is, of course, another matter.) It is even reported that the Kemalists have specifically undertaken not to enter those zones where Allied troops have been in occupation since the Armistice, a distinction being naturally drawn between the Allies and the Greeks; also not to attack Constantinople, nor to send troops to Thrace. They claim at the same time, however, the right to occupy any territories hitherto held by Greeks and not by the Allies, and this distinction presumably covers Eastern Thrace. But the point to observe is that in this statement of Turkish claims, if correctly reported, there is absolutely nothing to justify the panic appeal to arms issued from the Prime Minister's official residence last week. On the other hand, such a provocative step, in addition to exasperating our Allies, who were not previously consulted, may render the course of future negotiations with the Turks far more difficult.

M. Venizelos and Smyrna.

At the time when M. Venizelos was persuading the Prime Minister of Great Britain to embody a purely Greek settlement in the Treaty with Turkey, an Englishman urged him to abandon his claims to Smyrna and Thrace in the interests of Greece herself. He was reminded that Greece was not strong enough to hold for all time, across the sea, an Asia Minor enclave, and that, even if she could hold it for a period, the maintenance of a long land frontier with Turkey would impose an oppressive burden upon her, in the face of the permanent hostility of the Turks. Producing a map of the Near East, M. Venizelos pointed out how easily a compact Empire, such as Greater Greece would be, grouped around the Ægean Sea, could be defended, and he insisted that sea lines of communication facilitated the task of reinforcing Greek troops in Thrace and Asia Minor. He followed this contention with a moving statement of Greek claims and of Anglo-Greek destiny, and it was easy to realise how his persuasive eloquence might carry all before it when it could not be checked by actual first-hand knowledge.

The End of a Gamble.

Smyrna in ruins to-day is the answer to M. Venizelos' dreams. In point of fact, however, they were not dreams. M. Venizelos is far too able, far too well informed in Greek affairs to be at fault in matters which were perfectly obvious to any foreign observer. His Greater Greece was a desperate bid for clinching his political power as against King Constantine. He had made sure of Allied help in his duel with the King, and all that was lacking was to rally the nation as a whole to his side. He believed that he could do this by presenting the Greek people with a Greater Greece, and, though knowing that the Greeks single-handed would never be equal to the task of holding their oversea empire, he trusted to being able to make the Allies do this for them. The gamble has ended disastrously for the Greeks; but there is no reason to despair of their future nor to doubt their capacity to rise superior to the present blow to their hopes. M. Venizelos believed that, if he could round off Greece's territorial empire, he could set himself to put things right at the centre. Personal considerations overruled his statesmanship. Greece will now reverse the process, and by first building up a strong and efficient kingdom will prepare for the day when she is called to assume additional responsibilities.

Greek Democracy in the Ritz Hotel.

It would be unfair to judge the Greek nation by the opulent gathering that assembled on September 12 "in a mass meeting held at the Ritz Hotel in London," but the incident is a reminder of one of the dangers that Greece will have to overcome before she takes on the burden of extended possessions. The success attained by the British Empire as a constitutional entity is based to no small extent on the instinct of the individual parts to mind their own business and not to interfere in the domestic affairs of the Mother Country or of any other portion of the Empire. The members of the Greek colonies in England, however, who from their description may be supposed to consider affairs in Greece from a distance, have taken upon themselves to pass at their "mass meeting" resolutions recommending "King Constantine's immediate abdication" and "the speedy return to power of M. Venizelos" —matters, one would have imagined, entirely in the province of the Greek electorate. These resolutions were forwarded, pleasantly, to King Constantine and M. Venizelos. The one desire of any true friend of Greece at this time must be to see the Greek people united among themselves and facing the future with the confidence that union alone can give. Any dispassionate observer, Greek or foreigner, knows that there was no unity in the country, and no prospect of it, during the régime of M. Venizelos, whereas by the common consent of all but the extremist of the latter's followers, a very large measure of unity has been achieved since the return of King Constantine. We hold no brief for the King or for any party; but no one with the real interests of the Near East at heart, which requires that each of the constituent countries should be at peace and prosper, can remain silent when intrigue is on foot to thrust Greece deeper into the mire. Dynastic complications on the top of her other troubles, it will be noted, are not suggested in Greece, but are warmly advocated in France and echoed in the Ritz Hotel.

British Refugees from Smyrna.

Even though the first reports of the happenings in Smyrna have happily proved to be exaggerated, the havoc and desolation wrought have been sufficient to shock the whole world. Thousands of those who thronged the city during the last two fateful weeks are now beyond help. Of the others, the British inhabitants are entitled to, and will receive, a full measure of sympathy in this country. Although Turkey was the enemy of Great Britain in the Great War, the political game was subordinated to the personal equation, and the Turks, having no grievances against British Smyrniots nor any special animosity against Britons as a whole, treated those who were compelled to remain in the city in a fairly satisfactory manner. To-day, because British official policy has espoused another cause to the neglect of British interests, these same British Smyrniots have not been able to count on favoured treatment at the hands of the victorious Turks, even if the flames spared their property. Their losses in the destruction of the major portion of the city are, it is to be feared, enormous, and the question whether these can ever be made good either by direct compensation or by the restoration of Smyrna to her former conspicuous position, must for the moment remain problematical.

Digitized by Google

The Turkish Victory.

If Mustapha Kemal's forces intentionally set fire to Smyrna, their action represents the blunder that is worse than a crime. A similar blunder was committed by the Greek troops in the course of their withdrawal from Asia Minor. We must leave it to Bishop Cannon, of America, to deal with these matters in the proper Christian spirit, as he is able to distinguish between the massacres committed by "infidels," which count, and the massacres committed by Christians, which are merely "dust." For ourselves, our indignation embraces not only the actual perpetrators, but also those smug people who, while mouthing "peace" and "humanity" and "the safeguarding of minorities," have deliberately set in motion the machinery that produces massacres and wipes out minorities. At the end of 1918 the Allied Governments had it in their power to put an end to massacres in the Near East, as far as human prevision could arrange. They chose instead a line of action which inevitably doomed thousands and thousands of hapless victims, Christians and "infidels," to a violent death. Unless a close watch is kept on Allied policy to-day, the martyrs' roll will continue to be added to.

The Attitude of Bulgaria.

It would be interesting to know on what grounds the British Government justifies the reference to Bulgaria in the semi-official statement regarding the situation in the Near East. "The union of Turkey and Bulgaria," it is stated, "would be productive of deadly consequences to Serbia in particular and to Yugoslavia as a whole." To pass over the distinction between Serbia and Yugoslavia, which is equivalent to drawing a distinction between England and Great Britain in regard to foreign affairs, it may be asked what justification the Cabinet has for the insinuation against Bulgaria. If there is any, it is surely the Allies' duty to see betimes that there is no chance of a "union" between Bulgaria and Turkey. Without such a justification, which can be made public for all the world to appreciate, will not the reference to Bulgaria suggest that the British Government is so hard put to it to support its action that every likely or unlikely bogey has to be marshalled in order to make the picture sufficiently lurid? The correspondent of *The Times* at Constantinople states that the present Bulgarian Government is *mal vu* at Angora, and there is general testimony among Allied representatives in Sofia of the correctness of Bulgaria's attitude towards the Entente Powers. (It is obvious to any observer that it could not be otherwise.) But the statement in the Downing Street *communiqué* can only help to undermine the position of the Bulgarian Government and encourage its opponents to try a fresh orientation in foreign affairs.

Party Quarrels in Bulgaria.

An amazing incident is reported from Bulgaria by the Correspondent of *The Times*. M. Daskaloff, Minister of the Interior and Acting Prime Minister in the absence of M. Stambolisky, appears to have been the object of a hostile demonstration at the hands of adherents of the Opposition parties, who resented the simultaneous holding of an Agrarian party meeting at Tirnova as a counterblast to a meeting arranged by the Opposition *bloc*. On the train which conveyed M. Daskaloff were also travelling three Bourgeois leaders, and at a station *en route* they were seized by a crowd of Agrarians, maltreated, and were in danger of losing their lives, until M. Daskaloff intervened. The latter is said to have saved them only by promising to introduce immediate legislation providing for the trial of the Bourgeois leaders (the three victims are ex-Prime Ministers) on the charge of being responsible for the late war. It will be remembered that the Radoslavoff War Cabinet has been brought to trial, and there is an impression abroad that the present Bulgarian Government has gone as far as was necessary in affixing war guilt. But responsibility for the war would not justify the lynching of MM. Malinoff, Daneff, and Todoroff, and it will be an evil day for Bulgaria if the Agrarian leaders allow their followers to get out of hand with impunity. These things cannot happen in the Balkans without producing reprisals.

THE WEEK AT HOME.

London, Monday Evening.

The Russian Agreement.

The lull in home politics continues, and, indeed, the crisis in the Near East has stilled any tendency to talk of ministerial changes or a General Election for the autumn. Another factor, which will, perhaps, have even more weight on public opinion in the long run, is the publication of the Urquhart trade agreement with Russia. This will clearly operate to increase trade and to diminish unemployment in this country, and it will help to restore the fallen fortunes of Russia, and so assist the general texture of civilisation. Incidentally, it relieves the fear occasionally expressed in some quarters that the future of Russia lay with the Germans.

The agreement has been used, not unnaturally, by the advocates of individualism and private enterprise to point out that an individual can succeed where a Government Department fails, and that the idea of restoring international trade by administrative commissions has proved futile by the event. That is true, but Mr. Leslie Urquhart has himself stated that it would not have been possible to make the agreement at all had it not been for the enterprise shown by Mr. Lloyd George in reopening communications with Russia, in spite of much criticism of the "shaking hands with murder" type. The acknowledgment is both generous and just, and the moral of the tale will do good to the Coalition Government.

Ireland.

The chief events in Ireland during the week have been a recrudescence of warfare in the South, where the Republicans have seized several outposts and one or two towns, and done much other damage. The Free State appears to feel the loss of Michael Collins in a military sense, as was only to be expected; in a political sense, Mr. Cosgrave, the new head of the Government, seems to be a man of determination, and his speech in the Parliament showed no lack of decision. Unfortunately, the country is still in the throes of a postal and telegraph strike.

In Ulster military plans have been stolen, presumably by the Republicans, and there are indications of a revived Republican action against that province.

The Kipling Storm.

The echoes have reached here of a newspaper storm in the United States. Mr. Kipling was reported as saying that "America came into the war two years, seven months, and four days too late; that she forced the Allies into making peace instead of finishing the war in Berlin; and that America quit the day of the Armistice without waiting to see the thing through." This was strong enough, but the real chilli in picalilli was, "They lent us money at 5 per cent., and made good business out of it; they have got the gold of the world, but we have saved our souls."

Mr. Kipling has denied the interview, which was said to have been given to Mrs. Clare Sheridan, the

Digitized by Google

sculptor, and was published in the *New York World*. But who is it that makes these things up? I remember that somebody once wrote a poem in Kipling-ese, signed it with the name of the master, and sent it to *The Times*, which fell a victim and published it. The perpetrator of that hoax has never been discovered, although Sir Basil Thomson and Scotland Yard are said to have spent sleepless nights in the endeavour to discover the literary forger.

The House Fit for Heroes.

Apparently the housing difficulty is getting better. Two years ago you could not get a house for love or money. Probably love would not get very far with a house agent to-day—they see so many newly-married couples—but housing schemes are advertised on all sides. One of the most novel is fathered by a Labour candidate in the following terms: "You have £150. Very well! Hand it over to us, and we will not only provide you with a new house and a quarter-acre garden, but we will furnish it as well. All you have to do is to pay us 37s. 6d. a week for eight years, and the house, furniture, and land are then your own property."

This reminds one of the man who wrote to Whiteley's for a furnished flat, and when they had completed the order, discovered that he was lonely, and asked if he could order a wife in addition. The story goes that the universal providers assured him that they had a nice collection of wives in stock, but that these goods could not be had on approval or exchange, or even on the hire-purchase system, and that owing to circumstances over which they had no control only one could be supplied to each applicant, but that no charge would be made. Another version says that they offered to put the "goods" free on rail, but I am afraid that is merely *ben trovato*.

Antiques and Excavations.

It is the fashion to lament that British antiques are being exported to America, but nobody seems to realise that the discoveries being made in the soil year by year more than compensate for the losses. A few days ago a Greek statue of 300 B.C., apparently originating from Smyrna, was dug up in a Dorsetshire village; and it has now been added to the Ashmolean Museum. It is of great beauty and held to be very valuable.

At the same time, further additions have been made to our knowledge of pre-historic times by the excavations at Glastonbury Lake village, where a considerable number of antiquities has now been unearthed. When completed, the collection is likely to be as complete as any in existence. The settlement is not as ancient as the remains discovered by Mr. J. Reid Moir at Ipswich, nor does it rival the relics which are found at Walton-on-the-Naze in Essex, which represent the culture (if culture it can be called) of the oldest known type of man in the world, but in completeness this ancient Somerset village has hardly a rival.

A C.M.S. Controversy.

For the first time in its long and successful history the Church Missionary Society is rent by controversy, and so serious has the position become that this great society is likely to be in a position of some difficulty. Indeed, I understand that many subscriptions have been already withdrawn. The trouble arises over the teaching given by the missionaries. A minority of subscribers insists that they shall proclaim the verbal inspiration of the Bible, but a majority seems to favour a compromise which would affirm simple acceptance of the formularies of the Church of England. I should imagine myself that it would be difficult at the present day to maintain the former position, and the fact that only a minority desires to do so is significant. It is announced that a conference is to be held at Cheltenham to discuss the whole position.

Mr. Scawen Blunt.

A hundred years hence Mr. Scawen Blunt, who died at an advanced age last week, will be remembered—if remembered at all—for his verse, some of which was very beautiful. Curiously enough, it never attained the popularity it deserved, although everybody seems to have read his very indiscreet diaries, which set the fashion of revealing things said by contemporaries in private conversation—a habit that has become a curse to the present day. Mr. Blunt knew everybody, and entertained most people; but he was a rebel at heart, and though he did no particular harm to his own country, he did no particular good to Arabia or Egypt. He did not come very well out of his controversy with Lord Cromer, but if some hard things were said of him at the moment, nobody bore him any particular malice. He was an *enfant terrible* with a streak of genius, but he had no influence whatever on either home or international politics.

The Week's Books.

"Money and Foreign Exchange After 1914" (Constable), by Gustav Cassel, the well-known Swedish authority on finance, is an important work. The author dissents from many of the published views of the banking experts, but he gives reasons for the faith that is in him; he is particularly clear on the causes and consequences of inflation, which, indeed, he regards as the *fons et origo mali*. (In the case of Germany, he remarks that inflation has degenerated into an absolute swindle.) On the other hand, the evils of a too sudden deflation are pointed out as one, at least, of the causes of the present slackness of trade; it is, I suppose, similar to the case of the confirmed drinker who suddenly takes to rigid abstinence.

"Albert Ballin" (Cassell), by Bernhard Huldermann, is in fact, if not in name, a war book. It contains accounts of the Haldane mission to Berlin which caused such searchings of heart in 1912, and gives some curious letters from the ex-Kaiser. Wilhelm II. thought "Haldane very nice and very reasonable, and he perfectly understood my position as Commander-in-Chief and that of Tirpitz." But Mr. Churchill was so "arrogant" that the Kaiser thought there ought to be an apology for his description of the German Fleet as an article of luxury, and Bethmann-Hollweg clearly shared his master's view, since he wrote: "Churchill's speech did not come up to my expectations. He really seems to be a firebrand past praying for." The book is a real addition to the materials for history.

Ocellus.

The Near and Middle East.

From Our Own Correspondents.

EGYPT.

Cairo, September 7.

The High Commissioner.

Two items of information have stirred the public deeply during the past week. The first has been the announcement that the High Commissioner had indefinitely postponed his departure for England, and the second was the news of the transfer of Saad Pasha Zaghlul from the Seychelles to Gibraltar. Viscount Allenby was due to leave this week for a short holiday in England, the Hon. Sir Ernest Scott, his Counsellor, having returned in order to take over the duties of the High Commissioner. In view, however, of the forthcoming presentation of the recommendations of the Constitution Commission, the coming two or three months will probably be politically of the utmost importance to the future of Egypt, and in the circumstances Lord Allenby decided that it would be wisest for him to remain in Egypt during that period. His decision has been exceedingly well received on all sides, for there are unmistakable indications of heavy weather ahead, and the Constitution barque will have to be very skilfully steered if it is to reach harbour, not only intact, but without any serious untoward incident en route.

Zaghlul Pasha.

As regards Zaghlul Pasha, the public here were somewhat prepared for the news, partly because it was known that the British Government was seriously considering the question of his transfer, and partly because a telegram purporting to come from the whole party detained at Seychelles, which was received last week, did not include his signature. Except among the extreme Extremists, whom only his return to Egypt will content, the transfer has been very well received, and although greater satisfaction would have been felt at the whole party being so dealt with, it is recognised that, while Zaghlul Pasha has been transferred because of his health, the same considerations do not apply to his companions.

A Departure in Party Politics.

With the completion of the Constitution Commission's report in sight, and therefore the possibility of early elections, a certain amount of electioneering activity is noticeable in political circles. A welcome development has been the advent of a new party called the "Liberal Constitutional Party," which is being formed by the supporters of Adly Pasha, who will in all probability lead it.

As a first step towards the creation of the party permission has been obtained for the publication of a new paper, to be called *Assyassa* (politics), which will be its organ. It is understood that its policy will be the same as that on which the change in the political status was brought about. It will work for the realisation of the country's reasonable aspirations by constitutional means, and for the making of a real and lasting agreement with Great Britain on lines which will reconcile the vital interests of both countries.

The Liberal Constitutional Party is not being formed as so many people, among them its opponents, contend, in order to bolster up the present Cabinet. Although many of its founders are personal friends of the members of the present Cabinet, they are acting quite independently, and reserve to themselves full liberty to criticise the manner in which the policy on which they are agreed is being carried out and the country's aspirations are being realised.

For more reasons than one the formation of this new party is very satisfactory. In the first place, it means the return to active politics of Adly Pasha, the man who stands absolutely alone in the influence for good which he exercises over all elements of the political community; secondly, owing to the unpopularity which the Sarwat Cabinet has acquired as a result of certain of its actions, a large number of the moderate-minded Egyptians have been disheartened, and it was very much feared that, as a result of this, the Zaghlulist faction might triumph sufficiently to become a real embarrassment to the Government. By the formation of this party these dissatisfied Moderates have offered them a rallying point by means of which they can oppose the Zaghlulist and Hisb El Watanist element, and there is now much greater prospect of a Moderate as opposed to an Extremist Nationalist majority at the elections.

Thirdly and lastly, the presence in the new Parliament of a party headed by a man like Adly Pasha Yeghen will be a guarantee that the proceedings will be conducted in a more or less orderly fashion, and that we shall not be treated to the scenes which marred the first and only Session of the Legislative Assembly; while if, as is generally hoped, the Liberal Constitutional Party gets under weigh, there is every prospect that other shades of opinion will crystallise and form definite parties, and that, thus, party politics will be introduced into Egypt on proper constitutional lines.

The Anglican Cathedral.

The Anglican Committee have just published the correspondence exchanged between the High Commissioner and King Fuad and the Council of Ministers with regard to the site for the new Cathedral. As already reported in these columns, the Anglican community, having found it impossible to carry out the original scheme, decided to restore to the Egyptian Government the land which the late Sultan Hussein so generously gave them, and the correspondence now published records the restoration and the Government's acceptance of the land.

The Civil Service.

The Civil Service has been getting somewhat impatient over the long delay which is taking place in connection with the regrading that was decided on some time ago. The delay appears in the main to be due to the question of expatriation allowance to foreigners. As may be remembered, some two years ago the Egyptian Government appointed a special commission to draft a scheme for regrading the service, so as to avoid, amongst other things, the many anomalies and injustices that have existed in the past. The Commission duly presented its report, in which it established the salaries to be paid for each post on the assumption that the holder would be an Egyptian, with the proviso, however, that, if it was found necessary to appoint a non-Egyptian born out of Egypt to any of these posts, he should receive an additional annual sum to be called "Expatriation Allowance," to make up to him for the extra expense to which he might be put by being compelled to live outside his native country.

The Cadre Commission proposals were generally accepted by the Cabinet, but it reserved the ques-

Digitized by Google

tion of expatriation allowance, and, in consequence, the regrading has had to be held up. At its last meeting, however, the Council of Ministers approved of the proposal, but amended it in the sense that instead of a sliding scale with a maximum of £E300 a year it will take the form of a percentage (25 per cent.) of salary, with a minimum of £E60 and a maximum of £E250. So far, so good; and it is to be hoped that no time will be lost in putting this proposal into effect, as all promotions and increases have been held up ever since April, 1921, and many categories in the service are feeling the pinch very severely.

ROUMANIA.

Bucharest, September 6.

Cabinet Rumours.

Persistent rumours were abroad all last week regarding a prospective Cabinet reshuffle. The Independent and Opposition Press went so far as to announce the resignation of the Minister of Justice, which was to be the signal for other Ministers to follow, so as to permit the intended reshuffling. The names of the new Ministers to replace the retiring ones were also given.

The Government Press, in order to put a stop to this game of intrigue and not to allow public opinion to be misled by false reports, published an official statement denying the resignation of the Minister of Justice and contradicting the rumours of an impending change in the Cabinet.

There is, however, still the belief that the Prime Minister intends to put forward a reconstructed Cabinet at the extraordinary Parliamentary session to be held at the beginning of next month.

Coronation Festivities.

It is not amiss to mention also the rumour of a possible National Government, to be formed for the special purpose of presiding at the Coronation festivities, which now seem to be fixed definitely for the autumn. The last Ministers' Council was almost fully taken up with the discussion of this question, and the following general outline for the festivities is said to have been decided upon:—The main features of the programme will be: A religious service at the Cathedral of Alba Julia (Transylvania), which is being specially built for this purpose, and where the King's proclamation to the nation will be read. During the service the King and Queen will receive the Crown, Sceptre, and other regal insignia. This ceremony will be followed by a military parade, and afterwards by a gala dinner, concurrently with a mammoth dinner offered to the peasants who will come in large numbers to attend the Coronation. In the evening the Royal party with all the guests and dignitaries will return to Bucharest, where the ceremony will be continued the next day.

The Royal procession will enter Bucharest from the Chaussée Kisseleff—passing through the Arc of Triumph, also specially erected for this occasion—and will proceed to the Cathedral, where a Thanksgiving Service will be celebrated. The Cathedral service will be followed by a military parade; in the afternoon ethnographic and historical pageants and a procession of local Mayors from all parts of the country and special delegations will take place. In the evening popular performances will take place at the National Theatre and the Opera House. Invitations to attend the Coronation ceremony will be sent to the Royal families and heads of all Allied and neutral countries. The festivities will last three days—one day at Alba Julia and two at Bucharest.

It is known that it is the earnest wish of the King that the Coronation celebrations should not be a one-Party affair, but should be presided over by a National Government constituted by the leading personalities of the various parties and groups. To comply with this wish the Prime Minister is credited with the desire of using his efforts with the representatives of the Opposition to bring about the realisation of this scheme. It is thought that he may succeed in obtaining the support of the leading men of the National Democrats (under M. Jorga) and the late M. Take Jonescu's party, but it is doubted whether the leaders of the other parties of the Opposition whose relations with the present Government are very strained, will consider the offer. Finally, some apprehension is expressed that the Coronation may after all be again postponed, not so much on political grounds as owing to the fact that the works at Alba Julia, and especially the decorations in the interior of the Cathedral, which are manifold and elaborate, may not be completed in time for the date in view.

The Alleged Magyar Plot.

The Secret Service of the Roumanian police claim to have frustrated, after protracted and laborious investigations, the designs of a conspiracy to assassinate the King and Queen of Roumania and other high personages. The men arrested are former officers of the Hungarian Army and members of the Magyar Irredentist Organisation, who are said to be under the leadership of Colonel Pronay and Lieutenant Hejasz, who during a recent trial at Budapest declared that they have under their sway a devoted body of men who would murder anybody they indicated. Among them are Count Belmont, who has been staying in Bucharest

for some time, and was a prominent figure in the sporting circles of this town, and two other Hungarian ex-officers, who crossed the Hungarian-Roumanian frontier in a peasant's cart, in which explosives and mines were found after the men's arrest. There are also other minor accomplices. All are now safely under lock and key. On being cross-examined they are reported to have stated that their plan was to place bombs under the Royal stand of the racecourse, which would have been timed to explode about four oclock in the afternoon of the Coronation Day, when the whole Royal Family, the nation's leaders, the foreign guests, the Diplomatic Corps, etc., would have been assembled near the King.

It has been reported that a similar plot was planned by the same organisation on the occasion of the Royal wedding at Belgrade.

Indemnity for the Destroyed Oil Wells.

M. Lucien Wenger, who, a few months back, sought on behalf of the British and French Governments to reach a settlement with the Roumanian Government regarding the damage done to the oil industry by the destruction of the wells and refineries during the retreat of 1916, returned to Bucharest with a view to resuming the negotiations. The bone of contention of the previous negotiations was chiefly the method of payment. It is now agreed between the interested Governments that the claims of private owners should be established first, leaving those of the State for a later date. The Ministry of Commerce is now busy drafting a list which will comprise the names of all those who sustained losses on this score, showing at the same time the respective amounts to which they are entitled as compensation. The damage done to private concerns is estimated at about 10 million pounds sterling, and to the State at about 6½ to 7 million pounds sterling.

TURKEY.

Constantinople, September 9.

The Greek Débacle.

The Near East has furnished many surprises in the course of the last century, but surely there has never been anything more surprising than the utter collapse of the Greek army and its virtual annihilation in the space of a week or ten days. It was, indeed, common knowledge that the morale of the Greek army had suffered considerably, and that discontent was widespread, but the same could be said of the Kemalist army. It is now certain, however, that the state of the Greek army was far worse than even the Kemalist propagandists averred, and reports are leaking out concerning the hoisting of the red flag by certain battalions and the assassination of officers. At all events, it appears that a few days before the commencement of the Kemalist offensive rumours were current at the Greek front to the effect that the Athens Government had decided to withdraw the army to the Sèvres Treaty line. The result of this was that a certain proportion of the troops put up a very feeble resistance when the main attack was launched by the Kemalists in the Afion Karahissar sector. At the same time, it also seems certain that the Kemalists were remarkably well provided with artillery and ammunition, and made the very best possible use of these advantages. Within a couple of days after the fall of Afion Karahissar the Greek army was cut in two by the loss of Altyntash, and the defeat rapidly degenerated into a rout all along the line. At the present moment Mustafa Kemal is said to be at Kassaba, a few miles to the east of Smyrna, where he is discussing with the Allied Consuls the assumption by the Kemalists of the administration and measures for avoiding disorders. The Greek High Commissioner has left, together with the General Staff, and Greek government in Smyrna is at an end. Such is the tragic end of the ill-inspired plans which commenced with the debarkation of a Greek army in Smyrna just over three years ago. Those who foretold disaster at the time can hardly have the heart to-day to utter the usual "I told you so!"

The Consequences.

The consequences of the Greek *débâcle* will most probably be felt first in Greece, but whatever may happen in this connection, the consequences to the Allies themselves are of far greater moment. The Allies must now face the consequences of their own ineptitude during the last three and a-half years, and there is every reason to believe that those consequences will soon become evident. The crude facts of the situation are that the Angora Government possesses to-day a victorious army numbering at least 60,000 rifles, whilst the Allied guards at the Dardanelles number some few hundreds. The tone of the Anatolian press leaves no room for doubt as to the intentions of the Angora Government, so far as the so-called Straits zone is concerned, but the most sinister factor is the incredibly virulent attitude of Anatolia towards Great Britain, whatever Fethi Bey may have told London editors. Neither must it be supposed that the leading articles of the Anatolian newspapers emanate from irresponsible Turkish journalists. The principal editor of the *Yeni Gun* of Angora, for instance, is Yonus Nadi, who is to-day the President of the Foreign Affairs Commission of the Great National Assembly and Vice-President of the majority party. Yonus Nadi openly speaks of forcing the British Government to accept terms at the point of the bayonet. Never even during the course of the General War was the Turkish press so utterly uncompromising and defiant. Readers of THE NEAR EAST would do well to recall the warnings given by the writer upon many previous occasions—*the Turkish question is not merely a territorial problem, but is concerned with what the Young Turks call "independence."* Those who have listened to Mr. Kenworthy and General Townshend and believe that peace with Turkey will be easily concluded now that the Greeks are out of Anatolia and may easily be forced to abandon Eastern Thrace will very soon realise the fallacy of their belief, for the achievement of "independence" is for the Kemalists an even more important matter than frontiers. So long as there was a Greek army in Anatolia the real issue was veiled, but the Angora Government will very soon make the issue clear beyond all equivocation, and the Angora Government possesses a very potent means of demonstrating their point of view. The nature of that point of view has frequently been explained in THE NEAR EAST, and there is no need to dwell upon the matter beyond stating that the Angora Government have not swerved one hair's breadth from their original aims, which radically affect the vital interests of the Allies.

Allied Policy.

It would be waste of time to discuss the respective responsibility of the Allied Governments in connection with the present situation, for each and all have committed every possible and conceivable error between them. The question is, What are they going to do now? The announcement to the effect that the result of the hostilities in Anatolia will make no difference to British policy concerning

Digitized by Google

the freedom of the Straits and that the Cabinet has decided not to withdraw the forces occupying Constantinople is reassuring, for any other policy, however conciliatory or productive of immediate economy, will lead to disaster. In reality, the Allies are faced with two alternatives only—to throw up the sponge or fight. This will become abundantly clear when the proposed Conference meets at Venice or elsewhere, and an attempt is made to come to a compromise on the vital issues of the Straits and the Capitulations, amongst others. These issues are vital, not only to Great Britain, but also to the French and Italians, and the attitude which our Allies will assume will be of considerable interest. It is to be hoped that they will not be permitted to shelter themselves behind the British Government, in order to avoid the consequences of truckling to the Angora Government, with a view to scoring off the British.

Local Celebrations.

On Sunday evening tremendous manifestations were organised to celebrate the recapture of Smyrna. No fair-minded critic can cavil at this, and, on the whole, in spite of a certain amount of window-smashing, the manifestations were not more disorderly than the "mafficking" seen in Britain and other countries on similar occasions. The crowds which gathered in Stamboul and marched to "Liberty Hill" through the European quarter of Pera must have numbered some 50,000. They shouted themselves hoarse for Mustafa Kemal, and there were also cries of "Long live the French" and "Down with the English." The demonstration continued until a late hour, and after dark there was a good deal of revolver-firing in the air, but, so far as is known, no one was hurt.

NEAR & MIDDLE EAST ASSOCIATION.

ACTING CHAIRMAN OF COMMITTEE:

Maj.-Gen. LORD EDWARD GLEICHEN,

ALBANIA.

Tirana, August 29.

Tour of Inspection.

M. Jafer Ypi, President of the Council and Minister of Foreign Affairs, accompanied by M. Eshref Frasheri, President of the Chamber of Deputies, has just completed a tour of inspection in the prefectures of Argyrocastro, Koritza, and Valona, in the course of which he was able to investigate the question of the settlement of the southern frontiers of Albania and the internal situation of the country. There can be no doubt that Albania is in urgent need of having her southern frontiers, with Greece, definitively settled so as to allow a resumption of normal conditions in these regions. Here, I may point out, the Greek frontier remains closed as far as Albania is concerned, and the transit of passengers and goods is entirely forbidden. Greece has adopted this policy without giving any explanation, and in spite of the Barcelona Convention (March, 1920) for the free intercourse of people and goods, to which she was a signatory.

The second object of the President's tour was to examine more thoroughly the economic and political situation in the country. M. Jafer Ypi was particularly anxious to discuss the position with people on the spot, to hear their views, and to consider with them suitable steps for the improvement of the situation. As far as the political aspect is concerned, it will be recalled that Koritza is the centre of the Opposition—that is to say, of the Radical Party—and the President of the Council, who himself originally comes from Koritza, considered it useful to get into personal touch with the groups of this prefecture before the reopening of the Chamber of Deputies. As for M. Eshref Frasheri, President of the Assembly, he is not only from Koritza, but also Deputy of this constituency.

The British Minister to Albania.

Mr. Harry Eyres, British Minister to Albania, has also been touring in the southern provinces—Argyrocastro, Koritza, Valona, Pogradec, and Elbasan. I understand that Mr. Eyres has been well satisfied with his tour; in particular with the warm welcome that he received from the population of Koritza. Perhaps I may be allowed to mention here one episode. In the town of Koritza Mr. Eyres, M. Jafer Ypi, and the members of the International Frontier Commission were invited to an afternoon tea by a Koritza Ladies' Society, the "Perlindja" (La Renaissance). The interesting point is that this society consists of both Moslem and Christian ladies, and both sections acted as hostesses at the tea. For some years now the Moslem women of Albania have been considerably emancipated, and the famous Turkish *charshaf* and *yashmak* have disappeared, except at Tirana, Scutari, Durazzo, and Berat, where the population still keep their old customs. At Scutari, for instance, a stranger is surprised to find that even Christian women go out into the street with their faces covered.

Greece and Albania.

It will be remembered that the Greek delegate to the Frontier Commission left Albania, refusing to take part in the demarcation, unless the Corfu Pact was applied. The Great Powers, through the Ambassadors' Conference and their representatives in Athens, have informed the Greek Government that they consider the Corfu Agreement as non-existent, and that Greece must conform with the decision of the Great Powers and take part in the demarcation of the Greco-Albanian frontier.

Digitized by Google

Up to the moment of writing, the Greek delegate has not returned. In the meantime the International Commission is working in the neighbourhood of St. Naoum, on Lake Ochrida, to delimit the Serbo-Albanian frontier. The Serbian colonels Stoiyanovitch and Yovanovitch are taking part in this work.

Reduction of Officials.

For the last six weeks the Tirana Government has been engaged in reducing the number of officials with a view to curtailing expenditure. Among the steps also taken to this end is the placing of the London and Paris Legations under a single Minister, who will be M. Mehmed Konitza, at present Albanian Minister in London. M. Midhat Frasheri, who was recently appointed Minister Plenipotentiary to Paris by the Albanian Government, has been appointed Minister Plenipotentiary to Washington.

Summer Heat and Fires

Tropical heat has been prevailing and still prevails in a greater part of Albania. At Tirana the temperature has been as high as 104° F. in the shade. Forest conflagrations are reported from Mat, Elbasan, and Valona, causing considerable damage.

Statistics.

The Ministry of the Interior publishes a monthly statement of crimes and vital statistics. According to the return for the month of June, there were in the ten prefectures of Albania 38 murders, 18 suicides, 24 assaults with violence, ten attempted suicides, 14 thefts, two people burned by accident, and one accidental death. During the same period 60 people were arrested, and 38 people wanted by the police succeeded in escaping. With reference to these statistics, I would point out that the figure of 38, representing the number of murders, is unusually heavy, assassinations as a rule ranging between 15 and 20 for the whole of Albania—a marked improvement, it may be mentioned, on the situation under the Ottoman régime. Another point worthy of remark is that of the 38 people who have escaped arrest during the month of June hardly one will be able to remain at large for many weeks without falling into the hands of justice. The gendarmerie is showing at this moment considerable activity and daily those who are being looked for are surrendering themselves to justice, or are being arrested by flying squadrons of the gendarmerie.

With regard to vital statistics, the figures for the 18 sub-prefectures included in the prefecture of Scutari, Durazzo, Koritza, Berat, and Valona show 618 births, of which 347 were male and 271 were female, and 286 deaths (179 male, 107 female). The *Official Gazette*, in recording these figures, calls attention to the low figure of births compared with that of deaths, and emphasises the necessity of hygiene and of precautionary measures against contagious diseases. Unhappily, two scourges—malaria and tuberculosis—to say nothing of epidemics and contagious diseases, cause considerable ravages in Albania. The Director-General of Health and the Director of the Albanian Red Cross are making great efforts to improve the sanitary situation of the country. Durazzo and Valona, which suffered from malaria, are confronted with a heavy expenditure for the necessary works for draining marshes and improvement of the climate.

The Soviet Press announces the arrival in Moscow of Ismail Khan, the Chief of Staff of the Persian Army. On the first day of his arrival he had a long conference with the Acting Commissary for Foreign Affairs, Karachan.

THE TURKISH "NATIONAL PACT."

As reference is continually being made these days to the Turkish National Pact, we reproduce here the text as given in Professor Arnold Toynbee's recent book "The Western Question in Turkey and Greece." This text is stated to be a close translation from the Turkish as printed in the "Proceedings of the Turkish Chamber of Deputies" of February 17, 1920:—

> The members of the Ottoman Chamber of Deputies recognise and affirm that the independence of the State and the future of the nation can be assured by complete respect for the following principles, which represent the maximum of sacrifice which can be undertaken in order to achieve a just and lasting peace, and that the continued existence of a stable Ottoman Sultanate and society is impossible outside of the said principles:—
>
> FIRST ARTICLE.—Inasmuch as it is necessary that the destinies of the portions of the Turkish Empire which are populated exclusively by an Arab majority, and which on the conclusion of the Armistice of the 30th October, 1918, were in the occupation of enemy forces, should be determined in accordance with the votes which shall be freely given by the inhabitants, the whole of those parts whether within or outside the said Armistice line which are inhabited by an Ottoman Moslem majority, united in religion, in race, and in aim, imbued with sentiments of mutual respect for each other and of sacrifice, and wholly respectful of each other's racial and social rights and surrounding conditions, form a whole which does not admit of division for any reason in truth or in ordinance.
>
> SECOND ARTICLE.—We accept that, in the case of the three Sanjaks which united themselves by a general vote to the mother country when they first were free, recourse should again be had, if necessary, to a free popular vote. (The three Sanjaks are Kars, Ardahan, and Batoum.)
>
> THIRD ARTICLE.—The determination of the judicial status of Western Thrace also, which has been made dependent on the Turkish peace, must be effected in accordance with the votes which shall be given by the inhabitants in complete freedom.
>
> FOURTH ARTICLE.—The security of the city of Constantinople, which is the seat of the Khalifate of Islam, the capital of the Sultanate, and the headquarters of the Ottoman Government, and of the Sea of Marmora must be protected from every danger. Provided that this principle is maintained, whatever decision may be arrived at jointly by us and all other Governments concerned regarding the opening of the Bosphorus to the commerce and traffic of the world, is valid.
>
> FIFTH ARTICLE.—The rights of minorities as defined in the treaties concluded between the Entente Powers and their enemies and certain of their associates shall be confirmed and assured by us—in reliance on the belief that the Moslem minorities in neighbouring countries also will have the benefit of the same rights.
>
> SIXTH ARTICLE.—It is a fundamental condition of our life and continued existence that we, like every country, should enjoy complete independence and liberty in the matter of assuring the means of our development; in order that our national and economic development should be rendered possible and that it should be possible to conduct affairs in the form of a more up-to-date regular administration.
>
> For this reason we are opposed to restrictions inimical to our development in political, judicial, financial, and other matters.
>
> The conditions of settlement of our proved debt shall likewise not be contrary to these principles.
>
> January 28, 1920.

THE INDIAN CIVIL SERVICE.

To the Editor of THE NEAR EAST.

Sir,—The circular letter of the Government of India to the Provincial Governments on the subject of the Indianisation of the Civil Services affords food for reflection. Lord Sydenham, from his letter to the *Morning Post*, would appear to regard the action of the Government of India as a capitulation to the views of Indian extremists, and *The Times* in its leader of September 4 speaks of the circular as "wholly wrong in even admitting the possibility of the rapid Indianisation of the services." But others, including myself, regard it as an attempt on the part of the Indian Government to clarify the situation which the declaration of August 20, 1917, has created, and to ascertain to what an extent the services have been affected by that declaration. For it seems absurd to suppose that, having of our own free will initiated this policy, we can go on recruiting the services as before. It is equally ridiculous for Mr. Lloyd George, in his endeavour to reassure the members of the Civil Service, to make a speech which has subsequently to be explained away by the Viceroy.

The Times describes the resolution of the Legislative Assembly, on which the circular to the Provincial Governments was based, as "cautious in wording but revolutionary in purport," but, after all, was not the declaration of August 20 revolutionary? A Government which accepts formulas of "self-determination" at Versailles, and subscribes to declarations of the August 20 type in the House of Commons, cannot well complain if the various subject-races which are included in the British Empire lose their heads and endeavour to dictate the pace at which self-government should proceed. The truth is that our rulers entirely misjudged the effect their formulas and declarations would have. They fondly imagined that everyone was so contented under our tutelage that the policy we were dictating to Austria and Turkey could also be accepted for our own subject-races, and that we could choose our own time to put it into practice. We had a rude awakening both as regards the Asiatics in our Empire and also in carrying out the mandates on backward races entrusted to us by the League of Nations. The knell of the British Empire was sounded years ago in South Africa, as far as the white races are concerned, and the tie that holds us together is purely one of sentiment, and now India asks to be treated as an equal and to become a full-blown member of free nations hitherto known as the British Empire. But although we accept this sentimental tie in our dealing with our own race (we cannot do otherwise) we are afraid to trust our Oriental subjects to the same extent, notwithstanding that these same Orientals are prepared to go further than our own kith and kin and bind themselves to us by treaty. Why do we hesitate? Their standards may not come up to our standards; but all nations must walk before they can run, and upwards of a hundred years is a longish time for leading strings, that is, if emancipation is ever to take place.

Moreover, we can never go back or return to bureaucratic government which existed before the war, however much we may flatter ourselves that the Act for the Better Government of India is only an experiment. If we are to believe the older generation, as voiced by Lord Sydenham and others of that school, an India united under our government without the guiding influence of Englishmen can never exist, and we must always remain to look after the interests of the under dog. Undoubtedly, too, they are right in so far that, if we were to clear out of India forthwith, the result would be disastrous; but there is a great deal of difference between clearing out altogether and granting considerably more in the way of Home Rule than we are doing at present. Let us, therefore, cease to equivocate, and lay down a definite programme which will be adhered to irrespective of extremist clamour on either side. In a recent article in the *Contemporary* I endeavoured to show how our task would be facilitated if the Provincial Governments were broken up into Principalities, and I was fully convinced that such action on our part would go further than anything to satisfy the natives that we were in earnest. Quibbling about the necessity of manning the services with Englishmen for years to come will certainly be resented and add to the irritation which already exists.—I am, etc.,

COLES PASHA.

British Club, Biarritz, Sept. 7.

THE CASTLE OF BUDRUM.

The Imperial Society of Knights Bachelor have decided to undertake the work of raising a sum of between £200 and £300 required to repair the Tower of the English Knights in the Castle of Budrum, Anatolia. A circular letter intimating this decision and giving a brief history of the castle has been sent to members of the society. It is recalled that the castle sustained a heavy bombardment by the English and French fleets during the war, part of the walls being destroyed, especially on the front towards the sea. Several of the principal towers were also severely damaged. During the brief Italian occupation Professor Maiuri, the Superintendent of the Antiquities of Rhodes, with the aid of the garrison, was able to restore the two central towers of France and Italy, which had been the most severely damaged, but the work had to be suspended when, on the withdrawal of the troops, the expense became very much greater.

It is suggested that a tablet be placed in the Tower of the English Knights recording the fact that the work of repair was undertaken by the Imperial Society. Donations should be forwarded to the Imperial Society of Knights Bachelor, at 2, Mitre Court, Temple, London, E.C.4.

INDIAN MOSLEMS ON TURKEY.

Reuter's Simla correspondent reports that the meeting of the Mohammedan members of the Legislature on September 12 sent the following telegram to Mr. Lloyd George:—

"This meeting of Mohammedan Members of the Council of State and the Legislative Assembly impresses on his Majesty's Government the vital need of observing strict neutrality between the Turks and the Greeks in the conflict now in progress in the Near East, and earnestly appeals to his Majesty's Government to avail themselves of this opportunity to restore Anglo-Turkish friendship, and thereby bring about a reunion between the British Empire and the Moslem world."

The following telegram was sent to the Viceroy:—

"This meeting, representing seventy millions of his Majesty's Indian Moslem subjects is sincerely convinced that the conclusion of an honourable peace whereby the Turkish Empire will retain Asia Minor and Thrace, including Adrianople, with guarantees for the protection of minorities, whereby international control over Constantinople and the Straits should be removed, with guarantees for the freedom of the latter, and whereby the religious position of the Sultan, as Caliph of Islam, should be duly recognised, is essential to the restoration of peace in the Near and Middle East and to mutual co-operation and goodwill in it."

THE GREEK MINISTRY.

The new Cabinet formed in Greece under M. Triantafylakos as Prime Minister and Minister of War and Marine, includes the following:—M. Eftaxias, Minister of Finance; M. Boussios (the leader of the Macedonian Deputies), Minister of the Interior and Supplies; M. Calogeropoulos, Foreign Minister; M. Giannopoulos, Minister of Justice; M. Scoufos, Minister of Education and Agriculture; M. Matsas, Communications, Posts, and Telegraphs; M. Maneas or M. Charilaos, National Economy.

According to a message from Teheran, the Mejliss has agreed to the appointment of eight American experts to assist the American Finance Adviser-in-Chief of Persia. These advisers will leave America shortly.

Mrs. Helen Pears, widow of Lieutenant-Colonel T. C. Pears, of the Foreign Department, Government of India, died on August 31, at Richmond, Surrey. She was the daughter of Major-General Sir William Davies, K.C.S.I.

Prohibition on the importation of alcoholic beverages into Persia, which has been in force for two years, has ceased.

TO BRITISH REFUGEES FROM SMYRNA.

THE NEAR EAST *will be happy to publish the temporary addresses of British refugees from Smyrna who may wish to let their friends know by this means where they are now to be found. Names and addresses should be sent to the Editor,* THE NEAR EAST, *Devonshire Square, London, E.C.2. No charge will be made for this service.*

PRESS ON THE NEAR EAST.

The Situation in the Near East.

With the exception of that portion which betrays its manners and mentality by referring to King Constantine as "Tino," the British Press appreciated the significance of the Turkish offensive at the outset, and indicated how strongly opposed to the national inclination had been the Government's policy in the Near East. The following passage in the *Westminster Gazette* reflected the general desire to see Great Britain extricate herself from a false position :—

> The war which all detached observers anticipated in Asia Minor has at length broken out, and the Government will now be forced to put a truce to its evasions. . . . In the face of troubles so much nearer our door, it is unhappily certain that few people will realise how gravely our interests are prejudiced by the renewal of the fighting, and it is equally certain that few will appreciate how deeply we are implicated in the responsibility for this eventuality. No part of the peace-making has done our Government so little credit. . . . There is no dignity in deliberate blindness, and we must convince ourselves of the fact that what we do in Turkey will produce heavy repercussions in Mesopotamia, in Egypt, and in India. However illogical it may be, there is a widespread notion in the East that our policy is deliberately anti-Moslem. Such an idea is too absurd to deserve discussion. No statesman, representing the greatest Moslem Power in the world, could be so misguided as to embark on a policy designedly hostile to the creed of so many of its subjects. But our dealings with Turkey require a more reasonable explanation than so far they have secured. The Sèvres Treaty was so obviously unworkable that, forced through the Conference by our Government, it was soon effectively undermined by our Allies. The offer of last March, which represented a distinct advance upon the earlier decisions, was put forth with so much ambiguity that nothing came of it. The Turks were allowed to regard it as the basis of negotiation, and in no sense an ultimatum, but when they treated it as such they met with a rebuff. The recent Turkish Mission was bowed out of England, and since then our attitude to the March proposals has been so rigid that, if maintained, the proposed Conference at Venice will probably never meet, or if it meets will be foredoomed to failure.
>
> If we have our responsibilities with regard to Turkey, it must not be forgotten that our honour is also involved in the fate of Greece. . . . It is unfortunate that the need for decision comes at a moment when the Government is adopting a negative attitude in many directions. The temptation to apply it to the Near Eastern question must be resisted at all costs. If there is a spark of statesmanship in the Government, we must hope that it will give its attention to the need for a final settlement of the Turkish issue. At this point Turkey demands no more than we could give with a good grace, and ought to give if we have the cause of peace at heart. If the change involves some abatement in the claims of Greece, we must remember that graver issues are at stake; and Greece herself will gain more by the establishment of stability in the Near East than the minor pawns she surrenders.

When the completeness of the Turkish victory became apparent, the conviction gained ground that only complete agreement between the Entente Powers could meet the new situation, and the Press of all shades of opinion emphasised this point. Thus the *Morning Post* of September 9 :—

> It is surely unnecessary to rub home the truth that the unity of the Allies alone can meet the grave issue which has arisen in the Middle East. If France, Italy, and Great Britain were to fall apart at this critical moment, then each country would in time suffer an overwhelming disaster. Between those three Great Powers there have been jealousies and differences which in the Middle East have taken a more exasperating turn than elsewhere, but surely the Kemalist victories ought to bring them into line. We have again and again deplored that fatal policy of Mr. Lloyd George which, in estranging the national sentiment of Turkey, drove the Kemalists into the arms of the Bolsheviks, and which sought to find in Greece, a country enfeebled by a prolonged period of war and by profound political dissensions, an instrument for furthering the aims of British policy in the East. But what Mr. Lloyd George, as Prime Minister of this country, has to do, is to seek, by all means in his power, above all, by cordial co-operation with France and Italy, to bring about that united front which alone can secure the fruits in the East of the Allied victory.

The general tendency to lay responsibility for British policy in the Near East and its resounding rebuff at Mr. Lloyd George's door brought his organ, the *Daily Chronicle*, to the rescue, in an attempt to shoulder all the responsibility for the disaster on to Greece, and to defend the objection to meeting the Turkish claim to Eastern Thrace by compromising the Balkan States in the decision. Prominence was given to the following statement by the paper's "Diplomatic Correspondent" :—

> It is no use blinking the fact. The Near East situation is exceedingly grave. Turkey, four years ago militarily annihilated, is to-day once more a military Power of some strength. Technically the Allies are still at war with Turkey. Turkey has just defeated Greece. She has not defeated the Allies. The Turco-Greek conflict has been, so to speak, a side-show. The Allies have had nothing to do with it. It has had nothing to do with the general situation.
>
> Despite statements to the contrary in the French Press, and, strangely enough, in a section of the British Press, this country has

for 18 months past warned Greece against a policy of adventure in Asia Minor. These warnings were disregarded, and to-day Greece has suffered the consequences. [This passage is printed in heavy type.]

But the relation of the victorious Allies to their common enemy remains unaffected. As a guarantee at the Armistice the Allies occupied the Straits and established a neutral zone. That Occupation remains until peace is concluded. A Turkish attempt upon the occupied zone would mean, of course, the renewal of the war on the part of all the Allies (interrupted after the Turkish and Central European collapse in 1918).

After a reference to the pending Peace Conference, the correspondent continues :—

> It is true that at Paris last March it was agreed among the Allies to restore a portion of Thrace to Turkey and even to create a short common frontier between Turkey and Bulgaria. But that frontier would have had no military value, and, in any case, the limited Turkish zone in Europe would have been completely demilitarised. Any vital modification of the plan, thus agreed upon, would restore the Balkan danger in its old and even an acuter form. The States of the Little Entente would be put into immediate danger. That they must and will have their say in the eventual settlement with Turkey is beyond discussion.

In a leading article of the same date (September 15) the *Daily Chronicle* returned to the charge :—

> If, then, our duty to the Christians of Asia Minor remains intact and the freedom of the Straits remains a vital principle of international policy, what else is there left in doubt? The Turks are asking for Adrianople and large concessions in Thrace. But if she is to reappear as a serious European Power, that is a prospect that would cause much concern to the Baltic Powers. Even if we were willing to concede more of Thrace to the Turks, it would be wrong to do so without consulting Powers like Roumania and Yugo-Slavia, who have every right to be represented at any future Peace Conference in South-Eastern Europe which may vitally affect their interests.
>
> Let us beware of accepting the argument of force when it is used by Turkey. If we do, we shall be creating a dangerous precedent, which we shall bitterly regret. Turkey's victories over Greece, we repeat, have nothing to do with the policy of the Allies, and if only they are loyal to each other, leave the situation precisely where it was.

Hardly in any paper has any stress been laid on the fact that Great Britain's interest in the Near East is the establishment and maintenance of peace, and not one attempts to show how peace can be attained if the Allies insist on terms that the Kemalists will not accept.

Seventeen to twenty deaths daily among Europeans were reported to have occurred this summer at Baghdad from heat stroke by passengers who arrived at Plymouth from Mesopotamia.

Under date of September 8 Reuter's Simla correspondent reports:—The Legislative Assembly to-day passed a resolution by forty-eight votes to thirty-four expressing grave concern at Mr. Lloyd George's recent speech in the House of Commons on the future of India, as conflicting with his previous declarations regarding self-government and the Indianisation of the services.

NEAR EAST BOOKSHELF.

EARLY YUGOSLAV LITERATURE.

"EARLY YUGOSLAV LITERATURE." By Milivoy S. Stanoyevitch, Ph.D. (Columbia University Slavonic Studies. Vol. I., 1922. $1.75 net.)

This work, which, as an outline of its subject, will be most useful to the student of Slavonic literature, will probably surprise the ordinary person whose average view of Serbian letters is that it is confined to a series of folklore poems which attracted the attention of Goethe. As a matter of fact, these are scarcely referred to in Dr. Stanoyevitch's book, which does not bring us down later than the close of the eighteenth century.

The first part deals with the origins—that is, with the old Slavonic language and literature. There is an extensive series of works by eminent philologists and Slavologues dealing with the dawn of the Serbo-Croatian language, and, especially, the work of Cyrillus and Methodius. Authorities no less than Kopitar, Miklositch, and Yagitch maintain that the apostles of the Slavs, doing their work at Blatni Grad, on the flat shores of Lake Balaton, which is now a purely Magyar district, adopted the Pannonian dialect there spoken in those days, connecting Slovakish with Slovenish, now extinct, but closely related to the existing Slovene speech, which contains many archaic forms. But the author agrees with Yirechek and Novakovitch that, as Cyril and Method were natives of Salonika, they were probably familiar, as many Greeks of that city to-day are, with the dialect spoken in the adjoining districts of Macedonia, and it is natural that they should have assumed that a single Slavonic speech extended throughout the area inhabited by the people. Most probably, even at that remote period, the colloquial speech varied locally, but was, in essentials, one language still. Certainly one form, crystallised by ecclesiastical use, persisted throughout the Yugoslav territories, including the greater part of Pannonia and much of Roumania, as well as Bulgaria, while in its lay employment, dialectical differences of structure, vocabulary, and intonation crept in and the proto-tongue split by natural growth into Bulgarian, Serbian, Croatian, Slovenish and Macedonian. Stanoyevitch writes that: "Since the eleventh century one can accurately speak of the Serbian, the Russian, and the Bulgarian recensions, or, rather, of Serbo-Slavonic, Bulgaro-Slavonic, and Croato-Glagolitis." The Cyrillic alphabet, identified with the Orthodox Slavs, is generally attributed to St. Cyril, as its name implies, but some authorities consider that the apostles invented the curious Glagolitic alphabet still employed in church use in parts of Dalmatia, and invented the Cyrillic alphabet afterwards. But this seems inherently improbable, as the Cyrillic is far more obviously based on the Greek script, with new forms invented for sounds unknown in the Hellenic tongue; but the origin of Glagolitic, with its curious letters, is still disputed. It appears to have come into use in parts of Dalmatia at a later date than the Cyrillic among the Roman Catholics, who, of course, normally used the Latin alphabet.

The earliest known documents in the old tongue include a manuscript in the Latin script of a sermon, prayer, and confession, found at Friesing, in Bavaria, dating from about the year 1000, but the composition is, without doubt, older. The Bashka tablet (about 1100 A.D.) is the oldest Croatian Glagolitic inscription, while the oldest Serbian is the Povela Bana Kulina, the Cove-

nant of Ban Kulin, which was a treaty made between Ban Kulin of Bosnia and the *Knez*—that is, President or Prince—of the Republic of Dubrovnik in 1189. From that date onward a fair number of codices and chronicles have been preserved.

The main mass of the early literature is, of course, ecclesiastical, but in the eleventh, twelfth, and thirteenth centuries we find a growing quantity modelled on Byzantine prose writings on historical subjects and romances of Oriental origin, such as the legend of Baarlam and Josaphat and the tales of Stephanit and Ichnilat, both of which have been traced to India. Bestiaries of the fifteenth century exist in manuscript, but were of older origin. About the thirteenth century we find Bogumil influence exercised, to which we must attribute the Palæoslavonic apocryphal books, such as the Book of Enoch and Narratives of Abraham.

Lay literature is headed with the works of Stephen the First, crowned (*ob.* 1223), who wrote the biography of his father, the great Stepan Nemanja, who united the Serbs and founded a dynasty which was to last three centuries; and by St. Sava, Nemanja's youngest son, founder of the Serbian Church and of Serbian education. Two legal documents are of especial interest, from their contents as well as from their language—the Law of Vinodol, a code written at Novi, on the Croat coast near Fiume, in 1288, and the famous Code of the Tsar Stepan Dushan, which was passed by the *Sabor* or Congress of Serbs in 1349 and confirmed in 1354. This codification of the then existing laws throws a most precious light upon the contemporary state of civilisation of the Serbs; their legislature was, for its age, remarkably mild, and provided for trial by jury.

While the Ottoman invasion extinguished intellectual progress in Serbia and stamped out the rapidly-developing young civilisation, the focus shifted to Dalmatia, and at Dubrovnik, the aristocratic mercantile Republic which rivalled Venice, a brilliant literature, largely influenced by the Greek and Roman classics and by contemporary Italian writing, developed in luxury, till in the sixteenth century we find lyrics, drama, and epics in abundance, culminating in the great Gundulitch, a prolific writer, whose *Osman*, an epic describing the wars between Slavonic Christianity, represented by Poland, and Islam, represented by the Turks, which is one of the gems of Yugoslav letters. Gundulitch was obviously inspired by Virgil, Homer, Horace, and Ovid, and also largely influenced by Ariosto, and, above all, by Tasso.

But the apogee was passed, and in the early seventeenth century a decline set in, and the eighteenth century is perhaps the least glorious of any in the history of the Yugoslav people. With Dositej Obradovitch, Vuk Karajitch, and Ludevit Gai, the modern period begins and this work closes.

Dr. Stanoyevitch's work is full of interest. He adopts the orthography of the Yugoslav Academy of Sciences and Arts, which is unfamiliar to the eye, but it must be the Atlantic Ocean, separating him from his motherland, which makes him state that the Southern Slavs call themselves *Jugosloveni* and their land *Jugoslavija*, a statement which should be qualified. Some of the spelling seems odd, as Chilendar for Hilendar, Captat for Cavtat.

The part of the book which will probably be of greatest to English readers is the account of Dositej Obradovitch. Most visitors to Belgrade are familiar with his street, *Dositejeva Ulica*, though probably few recognise the statue of the energetic old gentleman in the Kalemagdan facing the Hotel Kruna. The father of modern Serbian education, who lived from 1742 to 1811, visited England, where he read Swift, Pope, and Addison. In his letters describing his impressions we gather that he never regretted abandoning the cloister for the wide world, and it is interesting to observe how he was struck by our English womenfolk. "These beautiful creatures," he writes, "if I had a thousand eyes, I would not be tired of looking at them for a thousand years! The longer you look, the handsomer they appear to you. Do you wish to be safe, then go straight on your way, do not glance at them, for if you only raise your eyes towards them and look, you could not proceed further; you will remain there for ever." Dositej was a true Serb!

TURKEY, GREECE and ARABIA

THE HEART OF ARABIA. A Record of Travel and Exploration. By H. ST. J. B. PHILBY, C.I.E. 2 volumes. Illustrations and maps. 63s. net.

In 1919 Mr. Philby crossed Arabia from the Persian Gulf to the Red Sea. His journey was no unworthy successor to that of Charles Doughty, and his book, in which are detailed not only his adventures, but also his geographical, geological and archæological discoveries, is likely to become a famous volume of pioneering history.

Evening Standard.—"Mr. Philby has written here a great travel book. . . . It recounts a story of rich and permanent human interest in a style which is modest, dignified, picturesque and admirably suited to its theme."

THE WESTERN QUESTION IN GREECE AND TURKEY:
A Study in the Contact of Civilisations. By ARNOLD J. TOYNBEE. Maps. 18s. net.

Manchester Guardian.—"Professor Toynbee has exceptional qualifications for the task he undertakes in this volume, and his book will be read with respect by all who value knowledge, conscientious scholarship and a rare grasp of history, and with pleasure by all who admire skill and art in bringing to the aid of such studies the large and illuminating ideas of an imaginative and generalizing mind."

Constable & Co. Ltd. 10-12 Orange St. London W.C.2

ÆSOP IN ARABIC.

"THE THOUGHTFUL READER: being the translation of Æsop's Fables." By Mohammad F. Deya Effendi. (Tanta, Egypt. 8 piastres.)

No country can remain in ignorance of these immortal lessons of childhood, and M. Deya has done well in presenting to Arabic readers the fables of "the learned Æsop." The book is intended for advanced students in upper standards, and is translated from the English "into the best style of the purest Arabic language." It is illustrated with simple woodcuts, and deserves to be popular in Egypt and other Arabic-speaking countries. It may be hoped that the translator will follow up the work with other stories for young Egyptians on similar lines. The output of translations from European languages into Arabic is steadily increasing, and liberal encouragement is given by a society in Cairo which specially interests itself in promoting competent translations.

Some of the fables have, indeed, been already published in Arabic by Abdullah Nedim, and La Fontaine has been rendered into colloquial Arabic in verse by Osman Bey Gelál, as mentioned by Sheikh M. Abder-Ráziq, in his "Arabic Literature of the Nineteenth Century" (the first part of which has recently appeared). The present booklet is printed at Cairo, and published by the translator at Tanta. The few errors and misprints that appear will no doubt be corrected in a future edition.

BOOKS RECEIVED.

"There was a King in Egypt." By Norma Lorimer. (London: Stanley Paul and Co. 2s. net.)

"Prose: A Kipling Anthology." (London: Macmillan and Co., Ltd. 6s. net.)

"The Street of the Gazelle." By Dulcie Deamer. (London: T. Fisher Unwin, Ltd. 7s. 6d. net.)

"Peradventure or the Silence of God." By Robert Keable. (London: Constable and Co., Ltd. 7s. 6d. net.)

The Egyptian Government has offered a reward of £E2,000 for information leading to the conviction of the authors of recent outrages.

Mr. Ralph Michaelis, says the *Star*, has set out to walk from Ostend to Constantinople, a distance of 1,500 miles, and hopes to accomplish the journey in ten weeks.

A British air service between London and Berlin is being organised with the support of the Department of Civil Aviation, as a first stage, it is hoped, of an air route to India. General Sir William Brancker, the new Director of the Department, has arranged for the elimination of competition between the three British air lines now operating between London and the Continent. The new service to Berlin (a journey of 570 miles) will be undertaken by the Daimler Airway, while the Handley-Page Transport Company will operate the Paris route and the Instone Air Line the Brussels route.

PERSONAL AND GENERAL.

TO-DAY.

September 21 (New Style).
September 8 (Old Style).
Moharram 29, 1341 A.H., of the Moslem Calendar.
Elul 28, 5682, of the Jewish Calendar.

The Raja of Rajpipla has left London for Paris.

The Persian Minister returned to London last week from Paris.

The Earl of Balfour will return to London at the end of the month from the Continent.

King Alexander of the Serbs, Croats, and Slovenes left London on September 13 for Paris, where he was joined by Queen Marie.

Seyed Qasim Khan, Counsellor of the Afghan Legation, arrived in London last week from Berlin.

Sir Lawless and Lady Hepper left London for Bombay on September 15.

The Gaekwar of Baroda arrived in London from the Continent last Friday, and is staying at Claridge's Hotel.

The Earl of Meath is visiting Lieutenant-Colonel Harold and Lady Mary Holt at Cleshnagarroch Lodge, Aberdeenshire.

Marshal Pilsudski, the Polish Chief of State, has arrived at Sinaia, Roumania, being received by King Ferdinand.

Mrs. Winston Churchill, wife of the Colonial Secretary, gave birth to a daughter at her London residence late on Friday night.

We are informed that Lord Islington has recently become a member of the "Near and Middle East Association."

Mlle. Nadejda Stancioff, daughter of the Bulgarian Minister, left London on September 14, for Geneva, to act as interpreter for M. Stambolisky, the Bulgarian Premier.

Sir Charles Marling, British Minister at The Hague, and formerly H.M. representative at Teheran, has become honorary president of the Anglo-Dutch Association.

Sir E. D. Maclagan, Governor of the Punjab, has been making a brief visit to Amritsar and Multan, where there have recently been disturbances. The situation has, however, so much improved that the number of troops has been reduced.

The marriage arranged between John O'Shea, of Calcutta, and Jessie, eldest daughter of Farquhar Deuchar, Shortridge, Warkworth, will take place at Warkworth Parish Church early in October.

The engagement is announced, and a marriage will take place shortly, between Mr. George Donald Mackay, of Jafferbund, Cachar, Assam, India, and Miss Dorothy Muriel Fitzgerald, of Prince of Wales Terrace, Kensington.

Lord Plumer is visiting Constantinople, where he will be the guest of Sir Charles Harington, who was his Chief of Staff during the War. His visit is stated to have no military significance.

Dr. S. Y. Grouitch, the Yugoslav Minister at Washington, has retired from the Diplomatic service, and is returning to Belgrade. He was formerly Minister in London, where he and Mme. Grouitch—an American by birth—were very popular.

The engagement is announced between Captain Oliver St. John, D.S.O., M.C., Royal Corps of Signals, eldest son of Sir Frederick R. St. John, K.C.M.G., and Lady St. John, and Dotie, elder daughter of Sydney B. Burney, C.B.E., and Mrs. Burney, of 7, Porchester Square, W.

On September 12, in Cairo, Lieutenant-General Sir Walter Congreve, V.C., General Officer Commanding the British troops in Egypt, met with a slight accident, his horse bolting and throwing him. He was not seriously injured, but suffered from shock and abrasions. Later reports fortunately announce his complete recovery.

On September 16, at All Saints, Boscombe, Mr. Gerald Farrell, Commissioner of Police, Nigeria, was married to Evelyn Helen Mary, the only daughter of Mr. E. A. Reynolds-Ball, F.R.G.S., author of "Mediterranean Winter Resorts" and other well-known topographical books of reference, and formerly editor of "Travel and Exploration."

A marriage has been arranged, and will shortly take place at the Church of St. Mary Abbot, Kensington, between Mr. Leslie Williams, third son of Mr. and Mrs. Howard Williams, of Ardna, Bickley, Kent, and Miss Lilian Margaret Batchelor, only daughter of Mr. and Mrs. W. H. Batchelor, of Bombay.

Queen Olga of Greece, attended by Mlle. Baltazzi, lady in waiting, left London on September 14 for Copenhagen on a visit to the Dowager Empress of Russia. She will afterwards proceed to Athens. The Queen travelled from Victoria by the Flushing boat train express, which left at half-past eight.

The marriage is arranged, and will take place in London on October 1, between Cecil Bernard Cotterell, Commissioner of the Agency Division, Madras Presidency, and Dorothy, widow of Lieutenant Charles W. Jemmett, 2/5th (attached 7th) Battalion The Buffs, of 6, Westbourne Gardens, Folkestone.

The marriage was celebrated on September 11, at St. Lawrence's, Downton, by the Rev. J. F. Northcote, C.F., between Captain Edward M. Hodding, late Middlesex Regiment, younger son of the late H. Hodding, and Margaret Clifton, youngest daughter of the late S. H. Carver, of Alexandria, Egypt.

SCHOOL OF ORIENTAL STUDIES.
London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

THE PERSIA SOCIETY.

President: Lord Lamington, G.C.M.G., G.C.I.E.
Founded in 1911 to study all questions of common interest to Great Britain and Persia.
Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1

Digitized by Google

The marriage arranged between Major Duncan Mills, Hampshire Regiment (attached Egyptian Army), son of Mr. and Mrs. Mills, Longdown Lodge, Sandhurst, Berks, and Olga, only child of Mr. Vincent Frisby (late Devonshire Regiment) and Mrs. Vincent Frisby, Lynton, Bedford, will take place at the end of October.

The engagement is announced between Jim W. Hyde Harrisson, M.C., Indian Army, only son of the late Captain Hyde Harrisson and Mrs. Pearson, of Grove Lodge, Upper Deal, to Sylvia Hayward, only daughter of the late W. Hayward Pitman, J.P., and Mrs. Pitman, of 6, St. James' Terrace, Regent's Park.

The Bishop of Gibraltar left England on Saturday on board H.M.S. Centurion for Gibraltar. He proposes to go from there to Malta, Constantinople, and, if possible, Smyrna, and hopes to visit afterwards Roumania, Bulgaria, and Yugoslavia. All communications should be addressed to him at the Gibraltar Diocesan Office, Church House, Westminster, S.W.1.

Under date of September 15, Reuter's Bombay correspondent reported:—Earl Winterton, Under-Secretary of State for India, arrived here this morning. He will proceed to Poona by the mid-day train on a visit to Sir G. A. Lloyd, Governor of Bombay. General Sir Joseph Byrne, the new Governor of the Seychelles, will accompany Earl Winterton to Poona, and will be the guest for a few days of Sir G. A. Lloyd.

The marriage arranged between Lieutenant Robert Tatton Bower, R.N., son of Major Bower, C.M.G., and Mrs. Bower, of West House, Thirsk, Yorkshire, and Miss Henrietta Strickland, daughter of Sir Gerald Strickland, G.C.M.G. (Count Della Catena), and of the late Lady Edeline Strickland, of Sizergh Castle, Westmorland, and Villa Bologna, Malta, will take place on September 26 at Kendal. The reception will be at Sizergh Castle.

The engagement is announced, and the marriage will shortly take place, of William Hannah McLean, Engineer-in-Chief to the Municipality of Alexandria, Egypt, son of Mr. William McLean and Mrs. McLean, of Drimard, Dunoon, Argyllshire, and Frances Gwendolin, only daughter of Colonel W. E. Donohue, C.B.E., and Mrs. Donohue, of 25, Harrington Gardens, South Kensington.

Colonel J. J. Boyle is on his way to Tiflis in order to try to obtain the release of Mr. Claud A. Solly, representative of the Shell Company in Transcaucasia, who has been imprisoned by the Bolshevists for over a month. This is not the first time that Colonel Boyle has met Soviet authorities on a similar errand, for he was successful in rescuing from Odessa a number of prominent Roumanians who had fallen into Bolshevist hands.

Prince and Princess Christopher of Greece, accompanied by Princess Andrew of Greece, with Princess Margaret, Princess Theodore, Princess Cecilia, Princess Sophia, and Prince Philip, left London on September 17 for Paris. Among those present to wish them *bon voyage* were Princess Nicolas of Greece with Princess Elizabeth, the Grand Duchess George of Russia, the Marchioness of Milford Haven, the Greek Chargé d'Affaires and Mme. Rangabe (the latter presented bouquets to the Princesses), the *personnel* of the Legation, M. and Mme. Sztoeckl, Count Mercati, Marshal to the Greek Court, M. Stuker, and several leading members of the Greek community.

APPOINTMENTS, Etc.

Captain F. Routner, of the Czecho-Slovak Legation, has been transferred from London to Hamburg.

The Bishop in Egypt and the Sudan (Dr. Gwynne) has appointed the Rev. Archibald Shaw Archdeacon of the Southern Provinces of the Anglo-Egyptian Sudan.

The King has given to Major F. B. Pearce, C.M.G., late British Resident, Zanzibar, authority to wear the Insignia of the First Class of the Order of the Brilliant Star of Zanzibar, conferred on him by the Sultan of Zanzibar.

M. Maximilian Lobkovicz, Second Secretary to the Czecho-Slovak Legation, arrived in London last week from Prague.

THURSDAY, SEPTEMBER 21, 1922.

THE ACHIEVEMENT OF THE INDIAN LEGISLATURES.

The Indian legislatures, both central and provincial, are now about to enter on the third and last year of the short term for which the Constitution wisely provided. By next autumn the members will be face to face with their constituents, and such of them as have learned to look ahead are doubtless already casting up the account to see what they have to their credit, or considering how their balance can be augmented in the time that still remains. At the same time the public is being led by a variety of incidents to examine the wider question of the achievement of the legislatures taken as a whole, and to ask how far they have fulfilled the hopes of their founders, how far they have justified the adverse criticisms passed on them in advance, and what is the prospect of improvement or retrogression during the ensuing year. In approaching this question, let us begin by making it plain that achievement is something entirely different from output. We are not at the moment concerned with either the quantity or the quality of the measures added to the Statute-book, but rather with the habits which have been formed and the aptitudes which have been displayed, with the dangers which have been avoided, and with the risks which still impend. In the first place every fair critic must recognise that in many respects the legislatures have done well. We were, of course, prepared for the attainment of a high standard of eloquence, dignity, and intellectual ability; to these have been added a rapid development of debating power, which justifies high hopes for the future, and, what is still more important, an ability to appreciate the standpoint of opponents, and to work with men of substantially different views. These latter gifts have been more prominent in the committees than in set debates, and there is consequently some risk of their being overlooked, but the evidence of their existence is convincing, and, while it would not be correct to say that communal and religious dissensions have been entirely eliminated, their expression has at any rate been controlled to an extent which must have surprised the hostile critics of the new policy. In the conduct of legislative business the worst feature is the continued neglect of the time-factor. The habit of irresponsible oratory is dying hard; every branch of the administration is clogged with useless verbiage, while matters of real importance are perforce inadequately discussed: and until the value of occasional silence receives fuller recognition, the legislatures will remain imperfect realisations of the ideals of their founders.

A defect which goes much deeper is the lack of political courage and leadership disclosed by the proceedings of these bodies, and by the actions of their individual members. It must be admitted that in this respect the initial test has been exceedingly severe. Inexperienced legislators were suddenly confronted with a ruthless revolutionary movement, directed by some of the keenest brains in India, and having for its figure-head a man whose character, both in its strength and in its weakness, made a peculiar appeal to many classes of the population; for a time the Executive deliberately abstained from heading the forces which made for the maintenance of order; and no one came forward to fill the gap. Even when the conduct of the rebels had shocked India, as, perhaps, India was never shocked before, and when the slow but solid sense of the countryside had gradually found a measure of expression, the record of some, at least, of the legislative bodies was a serious disappointment to their best friends. Having failed to lead, they were slow to follow; they cavilled, blustered, and whined; yet they were quick to claim credit for results secured by an Executive which they had done their best to paralyse. If in this matter we use plain language, it is with no desire to wound. We speak of disappointment, but not of surprise, for the results which we have recorded follow almost necessarily from the history of the country, and, while the hope might be entertained, it would have been useless to expect a sudden breach with the past. For an indefinite number of centuries rebellion was a normal feature of Indian life, and while the majority of the rebels probably failed, the number of successes was sufficient to establish the principle that prudent men should be slow to take sides. To wait upon events, to procrastinate, to prevaricate, that is the tradition in which Indian legislators have been nurtured. Of its wisdom in the past there can be no question, and its unconscious influence is strong to-day, but it is essential to recognise the fact that the new Constitution calls for a departure from the spirit of this old tradition, and that men who have been endowed by Parliament with rights worth fighting for must be prepared to stand up for those rights before the world. We believe that this idea is gaining ground, though its fruits are not yet apparent, and if we insist on the need for its more rapid extension, the reason is that, unless this condition is realised, the new Constitution is doomed to failure.

One other serious defect is apparent in the transactions of the last two years, the slowness to recognise hard facts, and to use them as the basis of constructive policy. Some observers are content to attribute this feature of to-day to the dense mist of illusion which spread over Indian politics during the viceroyalty of Lord Hardinge, but in fact it goes much further back into history. Unpalatable truths found no welcome in the old days, and consequently they were rarely spoken, and more rarely heeded. To prophesy smooth things was the royal road to success, and the old signposts still exert their influence, though in these times the road they mark leads only to disaster. In politics, as in economics and finance, and in the pursuit of knowledge itself, we are forced to recognise the persistence of this tendency: knowing its history, we can make allowance for its strength; but in this case also we are bound to urge that the time has come for a conscious and definite breach with the past. There were sound reasons for prophesying smooth things in the days of Jahangir or Aurangzeb, but they have now lost their value. The practice of auto-suggestion, so much in vogue just now, is no novelty in India, but it has not yet shown us how to abolish such ugly realities as anti-social propaganda, frontier lawlessness, religious feuds, uneconomic spending, or insanitary habits of life. So long as legislators persist in shutting their eyes to such facts as these, their constructive efforts must be crippled, or, if they build at all, they can build only castles in the air. It is from this standpoint that we have welcomed the recent speeches of the Premier and the Viceroy, which have placed certain essential facts of politics

Digitized by Google

in a clear light. The storm of protest evoked by those pronouncements furnishes the measure of their value at the present juncture, and, now that the protests have been made, the immediate future depends on the extent to which the facts themselves are appreciated and accepted. Indian legislators have, indeed, much leeway to recover before they can face the public with confidence, but their position to-day gives no cause for despondency, and if the next twelve months should show definite progress in the direction we have indicated, it will be possible to hold that the new institutions have achieved a reasonable measure of success.

MAGIC IN MESOPOTAMIA.

By E. S. STEVENS.

(*Continued from page 346, September 14*).

Curing certain diseases runs in families. A delightful old man I know, holding Government office, has the hereditary power of curing fever. He writes on a peeled almond the opening verse of the Koran, and the sick man eats it. If the fever persists, he prepares a second almond, and no one has ever been known to need a third.

The wife of a well-known merchant in Baghdad, of a very wealthy family, once made a vow when her son was sick, that she would dress herself in rags and go barefoot to beg alms from seven poor houses. If she received any charity, it was a sign that her vow was accepted. She received a small sum, and her son did recover. She is now an old woman, but yearly the poor people of Baghdad receive her bounty on the anniversary of her vow.

Many, also, are the charms against the losing of weakly children. In a country where the infant mortality is at the rate of 70 per cent. there is a tragic note about these superstitions. A woman, however wealthy, who has lost her children, on the birth of a new baby will sit in disguise by the roadside and beg from the passers-by with the words "Min barrakatkum" (from your blessings). With the money so procured she must buy a small piece of gold or silver, scratch on it her name, and sew it on to her baby's coat or cap with the words, "Ya eysh!" (Live.) Or she may go to a luckier mother whose children are all living, and beg from her some baby's clothes to put on her own weakling.

A Baghdad girl who is afraid that she will not get married, performs the "pilgrimage of forty Saturdays." She must rise early, go barefoot, or in her stockinged feet, and not speak to a living soul on the road, and make her way to the mosque of Imam Moussa el Kadhim, or that of Maaruf el Kerkhi. When she has arrived at the mosque, she goes to the tomb of the Imam, and knocks loudly at the door of the tomb. "I have come to you, don't say I have not come!" She must return to her house as she left it, and she is certain to get married before long. A similar visit to the tomb of Ab Hanifa, Imam el Adham, may be made for forty Sundays, or to Abdul Kadr el Gilani for forty-three.

Many are the charms for women who desire children. A common occurrence is for a woman to crawl between the legs of a standing camel. On Good Friday the childless Arab Christian woman creeps beneath the miniature coffin filled with flowers which is carried round the church. Women of all creeds tie rags to the chains of an old cannon known as Abu Khezama, Father of a Nose-ring, at the Gate of the Citadel in Baghdad. (This cannon, three hundred years old, has other magical properties. Mothers bring their newly born children to it and put their heads into the mouth of the cannon for luck). Childless women often pay a visit to the mosque of the Abu Jeneid, a few miles outside Baghdad, near Zobeyda's Tomb. Behind this mosque, on the east side, there is a well in the water of which Jeneid is said to have performed his ablutions. Here the woman must draw up water in the leathern bucket, and tip a little over her shoulder with the word "Tehabbel!" (be fruitful), and she will have her desire. The mosque and the Imam have great powers. A stone within the mosque has healing virtues, and if it is rubbed with the hand and the hand placed on an ache or pain, the pain will immediately disappear. Still better is to touch the afflicted part with the stone, or to carry the stone round the Imam's tomb.

But the favourite saint to whom to have recourse in time of trouble is Khidr Elias, or Elisha. He is honoured by Moslem, Christian, and Jew alike, and is a kindly, holy man with an ear for any suppliant, whether barren wife, lovelorn youth, or troubled mother. If one mentions his name, he is immediately present, so great is his interest in human affairs. Vows are made to him, candles are burnt in his honour, offerings are made in his name. It is a common sight on the Tigris to see small floats made of the stem of a palm branch and plastered with mud, bearing five lighted candles and floating down the stream. They are watched anxiously by those who launched them. If the frail bark reaches a certain point in the river with at least one of its candles alight, it is certain that Khidr Elias has accepted their vow and will grant their request. A fortnight before Lent, a fast is observed known as the Nineveh fast (in memory of the destruction of Nineveh) or the Fast of Khidr Elias. This is a favourite time for making vows to the saint. A childless woman, fasting, will promise Khidr Elias that she will distribute a number of sweetmeats or cakes in his name to the poor, if he will ask Allah to give her a son. If the son is born, she makes a yearly donation of cakes on the anniversary of her vow all her life. She may be curious to know if her vow has been accepted, and if so, she makes a room in the house ready by placing in it a large tray full of cakes, another tray full of lighted candles, a bowl of water, a comb, a brush, and some celery. She is careful to spread the cakes thickly with sugar and flour because the next morning, if her vow has been accepted, she will find the mark of El Khidr's staff on her cakes, or the impress left by the bridle chain of his mare. The celery is for the mare to eat, and the comb and brush are set ready so that the saint may comb his long beard and make his toilet. The man who told me this—an educated person—assured me that marks of the saint's presence were often clearly visible. If there are no marks, however, the woman comforts herself by saying: "Never mind, perhaps he will call at our house next year!" It is said that El Khidr will return to earth at the reappearance of the thirteenth Imam and Christ.

There are lucky and unlucky days. The Shiahs consider the ten first days of Moharrem and all the month of Saffer unfortunate, because the former marks the tragedy of Kerbela and the death of Hussein, and the latter because it was in this month that Mohammed died. Thursday and Saturday the Moslems think are lucky days on which to begin an enterprise (perhaps the latter because there is no Jewish competition!)

There are various superstitions connected with seyyids, that is to say, one of the numerous so-called descendants of Mahommed and Ali. Seyyids wear a green turban as a mark of their sanctity (green is sacred to both Moslems and Yezidis, the latter considering it the colour of their tutelary "saint"

Digitized by Google

Satan), and any seyyid, however dirty and ill-behaved, is reverenced on account of his holy descent. Even Christians and Jews will sometimes have recourse to seyyids for charms. A friend of mine was asked one day by his washerwoman, a respectable young Jewess, for an advance of ten rupees. He inquired why she needed it, and was told that he wished to fee a seyyid on the other side of the river who had a great reputation as a seer. Her betrothed had been carried off by the Turks, and as she had heard nothing of him, she was anxious to know where he was to be found. As long as he lived she could marry no other man, for a betrothal ceremony among Mesopotamian Jews is as binding as marriage. My friend asked her what the seyyid would do. "I must buy a piece of meat, and give it to him with ten rupees, and he will put the meat under his pillow. When he sleeps it will be revealed to him in a dream where my betrothed is, if he is still alive."

A seyyid was tried recently in Hillah for the murder of a boy. He caught him gathering firewood outside the city, killed him, and cut out his heart. The evidence against him was strengthened by the finding of a blood-stained razor in his possession. It was said of him that he had murdered other boys in the same fashion, and it appears that for a certain disease a sure cure is to eat part of a young boy's heart, cut from his body by a seyyid. Very high rewards are sometimes offered in secret to a seyyid willing to commit the crime and secure the remedy. The victim must never have smoked tobacco. A servant of a friend told his mistress that when a boy he had narrowly escaped a similar fate.

NEWS IN BRIEF.

Thirty picked Maltese emigrants, including women and children, sailed for Australia last week.

A Bombay message states that Mr. Gates, an American missionary, was murdered at Bijapur on September 6 by a Moslem.

A Colombo despatch to the *Madras Mail* states that the Ceylon Government have decided not to take part in the British Empire Exhibition in 1924.

Mrs. Sara Isaacs, the mother of Lord Reading, and widow of Joseph Michael Isaacs, died on September 12, at 29, Alleyn Park, Dulwich, aged 87.

The Rome correspondent of the *Morning Post* recently announced that General Vucinitch, ex-Premier of Montenegro, had died at the Park Hotel, Rome.

The fifty-seventh annual "Statement exhibiting the moral and material progress and condition of India" was last week issued as a Blue Book. The price is 2s. 6d.

The Indian Government have sanctioned the electrification of a large portion of the Bombay suburban lines of the Great Indian Peninsula Railway, says the *Railway Gazette*.

Lord Peel, Secretary of State for India, has sanctioned the proposal that the Executive Council of Bihar and Orissa shall be reduced from three to two members as from November 1.

The thirty missionaries, men and women, who are going to India as a Mission of Help, will be publicly "dismissed" by the Archbishop of Canterbury at a special service in Westminster Abbey on October 5.

In the Legislative Assembly at Simla the Workmen's Compensation Bill was introduced on September 13. It was referred without comment to a Joint Select Committee of twenty-two members of both Houses.

It was officially stated in the Legislative Assembly last week that the value of the Imperial Government buildings in Simla, including the Viceregal estate, was 205 lakhs of rupees (£1,366,666), says a Reuter message.

The Italo-Oriental Congress meeting in Rome has passed a resolution urging the Italian Government to take prompt and strict measures to prevent the Italian flag from being fraudulently flown on foreign vessels in the Levant.

A well-dressed young man fired a shot outside the entrance to the Elysée, Paris, on September 8. He gave his name as Georges Salem, and said he came to Paris from Cairo, where his family live. Another report states that he is a Persian.

M. Casolani's report on his mission to London, the primary object of which was to endeavour to place the question of migration from Malta and Gozo to Australia on a satisfactory basis, has been issued as a Blue Book by the Government of Malta.

A White Paper (Cmd. 1,747, price 3d.) has been issued, giving the text of the Treaty concluded in Paris on October 28, 1920, between the principal Allied Powers and Roumania, in which Treaty the sovereignty of Roumania over Bessarabia is recognised.

It is announced in the native papers that the Egyptian Postal Administration has definitely approved of the types of new postage stamps bearing the head of the King of Egypt. They will be put into circulation at the commencement of the new financial year.

A statement issued by the British Relief Mission in Transcaucasia (95, Victoria Street, S.W.1) calls attention to the continued need of support of the Armenian Refugees (Lord Mayor's) Fund, which for the past seven years has been giving relief to the sorely tried people of Armenia.

The Postmaster-General announces that the air mail for Baghdad, which left London on August 24, reached Baghdad on September 2. The air mail for London, which left Baghdad on September 2, reached Cairo the next day, and London on Monday.

Commercial & Financial Section.

NOTES AND NEWS.

The Near Eastern Position.

In view of the imperative need for a settlement of the Turkish question, it is difficult to understand the developments of the last few days. Things have been done which would seem to show the most deplorable lack of appreciation of the general economic position. The Great War brought every participant in it near to ruin, and the world as a whole can stand little further strain of that kind. Great Britain is not so well situated economically as to be able to incur any extensive military expenditure, while it is certainly beyond question that if Turkey is ever to recover from the strain of her experiences since 1914 she must have peace, and at once. I gather from an interview he has given to the Press that Kemal Pasha is not without a lively appreciation of this aspect, and I am, therefore, hopeful that the issue of the present position will be a settlement which will enable Turkey to devote herself to the development of her resources.

Smyrna.

But for the closing pages in the story of the Greco-Turkish conflict that task would have been much easier than will now be the case. There is no point, and nothing would be gained, in attempting to disguise the fact that, arising out of the offensive, literally enormous economic damage has been done. I had hoped, as my readers know, that the speed of the Greeks' retreat would have been a security against any very extensive destruction; but it was not to be so. The railway, to which I shall have occasion to revert later on, the fruit district, and various towns on the line of retreat suffered severely, and the toll was rendered complete by the almost entire destruction of Smyrna by fire. The responsibility for this calamity has not yet been fixed. It may have been an accident, it may have been by intent; it is really quite immaterial how the city came by its fate. What does matter is that Turkey is deprived for the time of a vital trade centre, while many British subjects, whose work had made Smyrna a great emporium and who had not received compensation for the losses incurred in the previous war, are now brought near ruin. The position of these people must be considered in any settlement, for if ever compensation was essential, it is in this case.

The City's Future.

It is difficult to write with any certainty of the city's future at this juncture, but I may say at once that I do not share the pessimism that appears to prevail in business circles here as to the outlook. The site of the city is ideal, and that is alone sufficient to ensure it renewed life. Of course, so long as there is any likelihood of disturbed conditions, recovery will be out of the question; but once people know where they stand, there is no doubt that there will be a rapid return of those refugees who are in a position to do so. But the task of rebuilding the intricate business life of the city will be, in the best circumstances, a very long and laborious process. It will be a question in regard to many things of commencing again at the foundations. Of course, the great distributing concerns will be on a different plain, though they, too, will find the resumption of the commercial road anything but an easy matter.

The Smyrna-Aidin Railway.

The report of the Smyrna-Aidin Railway, which was issued last week, covers the half-year ended June 30, and so, of course, makes no reference to recent events, which will naturally have very materially affected the position of the company. The company has only been in possession of about half its line, and in the prevailing circumstances what has been achieved can only be regarded as very remarkable. The earnings for the period amounted to £167,105, the net profit being £45,963. The earnings in sterling are much below those of the corresponding period of 1921, for which the exchange was partly responsible, the decline in traffic being not so great as would appear. For the debenture interest £105,000 is required, and the debit balance of £694,177 brought forward is thus increased to one of £738,832. The company has been doing all it could to prepare for more settled conditions, and every effort has been made to put the line and rolling stock into good order so as to be ready to cope with normal trade. Agriculture has, of course, been gravely handicapped under the unsettled conditions, and the general manager refers to the continuance of the exodus of the Turkish peasants and to a "certain deterioration of the country that is perceptible." He, however, regards "the surprising vitality that is left" as a good portent for the future.

The Company's Position.

It is not yet certain how the company fared in the recent hostilities. Reports speak of damaged bridges, but I have so far received no confirmation of this. But even if the railway had escaped unscathed, which it certainly has not, it cannot fail to be adversely affected in a variety of ways. The reduction of the population and the general dislocation of business must mean, unfortunately, a further set-back for the company. On the other hand, as soon as a settlement is arrived at, the company will be able once more to regain possession of the whole of its system, and it may be taken for granted that the Turks will do everything in their power to facilitate the work of reconstruction. The future will then depend on the rapidity with which the district is able to recuperate from the prolonged strain to which it has been subjected. There is little reason for being otherwise than confident on this score, and the time

may, therefore, not be so far distant when the line will recover something of its former prosperity.

Danube Navigation.

Elsewhere in this issue will be found the report of the Danube Navigation Company for the year ended July 31. Considering the adverse conditions that have been encountered, the company can be said to have come through its second year very well, there being a credit balance in sterling of £11,900, of which £11,000 has been written off preliminary expenses, the balance being carried forward. In addition, the company has credits abroad in foreign currency, including 1,400,000 German marks, 24,917,300 Austrian kronen, and 134,700 Czecho-Slovakian kronen, which amounts are being used for the company's local business. At the general meeting the chairman, Sir Frederick Lewis, emphasised the difficulties that had to be faced as a result of the conditions in Central Europe. Every one of the concerns in which the company is interested has earned substantial profits and been able to declare a dividend, but owing to the exchanges it has, of course, been futile to translate these dividends into sterling. How the position has altered for the worse will be gathered from the fact that at the time of the formation of the company the Austrian exchange was round about 600, while the German was in the neighbourhood of 150. Sir Frederick expressed the view that, if the promoters had had any idea of what was to take place, none of them would have entered into the business. Besides the difficulties of the exchanges, the company has still to solve serious problems connected with the internationalisation of the river, for there is as yet apparently little realisation of the fact that the countries touching the Danube can only benefit from that trade route by the uninterrupted flow of commerce.

Roumanian Grain Export Delay.

It is much to be regretted that there should have been delay in the shipment of Roumanian grain exports. As I have pointed out before, the country has a considerable amount of grain to dispose of, and it ought to prove an important factor in the improvement of the exchange. Unfortunately, the close season in the Danube is approaching, and, in addition, we have the new Near Eastern complication, which, it may be feared, will prejudice whatever efforts may be made to ship the grain before the Danube navigation is suspended. It would seem only too probable, therefore, that Roumania may be in the unfortunate position of not reaping the full benefit from a good harvest. We can only hope that the moral will be appreciated, and that care will be taken next year to see that there can be no possibility of this occurring again.

The Coming Fair.

One factor which should have a special influence on the success of the coming fair is the almost complete failure of the Leipzig autumn fair. If business is to be done on a large scale, it is absolutely essential that manufacturers should be able to quote firm prices and also to guarantee delivery. German firms were unable to do these things, with the result that little business was done. British firms are in a position to do both; hence it is possible to be almost optimistic as regards the prospects of foreign orders. It must be remembered, however, that what happens at the fair will be enormously influenced by political developments in the meantime, and if, as there is every reason to hope, economic conditions enormously improve as soon as the present crisis has passed, then the outlook for the fair will be more than promising.

Commentator.

INTERNATIONAL COTTON STATISTICS.

Striking Figures.

The first issue of the "Bulletin" of the International Federation of Master Cotton Spinners' and Manufacturers' Associations has been published. The "Bulletin" will be issued quarterly, and will contain the usual half-yearly statistics relating to the consumption and stocks of raw cotton throughout the world. The secretary of the Federation, Mr. Arno S. Pearse, has produced a most valuable document.

Particulars are given of the amount of short time worked by master spinners throughout the world during the half-year ending July 31 last, with comparative figures for previous half-years. With regard to Great Britain, it is stated that the stoppage of machinery during the past six months was equal to 4,539 weeks of 48 hours, against 6,037 weeks in the half-year ended January 31 last. The comparative figures for France are 1,147 weeks, against 2,876 weeks; Germany 1,745 weeks, against 3,257 weeks; Japan 12,541 weeks, against 16,521 weeks; Belgium 4,322 weeks, against 7,712 weeks; and Switzerland 3,113 weeks, against 2,538 weeks.

The officials of the Federation have obtained returns from the owners of 132,085,210 spinning spindles out of a total throughout the world of 154,555,267. The consumption of all kinds of raw cotton in the six months ended July 31 was 9,487,245 bales, against 9,322,213 bales in the previous half-year. With regard to American cotton, the world consumption for the six months was 5,946,711 bales, as compared with 5,803,626 bales. It is of interest to mention that these figures, after allowance is made for the amount used by spinners who have not made any returns, confirm the consumption estimate of Mr. H. G. Hester, of New Orleans, of 12,800,000 bales for the season 1921-22. The consumption of American cotton in Great Britain during the half-year was 1,034,791 bales, against 1,003,772 bales in the previous six months; whilst the consumption of all kinds of raw cotton in Great Britain is given as 1,319,099 bales, as compared with 1,247,464 bales in the previous half-year.

Some interesting statistics are given relating to mill stocks of raw cotton. The Federation give the supplies throughout the world of all kinds of cotton on July 31 last as 4,286,315 bales, as compared with 3,926,619 bales twelve months previously. Spinners in Great Britain held on July 31 274,667 bales of cotton, against 296,997 bales at the end of July, 1921. Spinners' stocks of American cotton on July 31 last were 161,942 bales, as compared with 204,523 bales a year before.

It may be pointed out that out of the 132,085,210 spindles that have made returns, 55,670,665 are mule spindles and 76,414,545 ring spindles. In Great Britain the owners of 50,135,638 spindles made returns. Mule spindles are given as 38,964,670 and ring spindles 11,170,968. The number of spindles in Great Britain using Egyptian cotton is given as 14,419,329.

The Bulgarian-Czecho-Slovak Chamber of Commerce recently constituted, has just commenced its activities at Sofia, Klementina No. 15.

During the first half of the current year, 80,372,000 persons were carried on the Czecho-Slovak railways—an increase of some six millions over the corresponding period of 1921. The goods traffic totalled 18,085,591 tons, as compared with last year's figure of 20 millions.

A TURKISH SETTLEMENT—AND AFTER.

Its Meaning for British Trade.

Paradoxical as it may seem, the Near Eastern crisis is from the economic point of view one of the most hopeful moments that the world has known since the Armistice, for it promises to bring to a head at long last one of the most serious difficulties in the way of reconstruction. The *impasse* in Turkey has absolutely clogged the wheel of progress throughout the Near East, from the Danube to the Persian Gulf, from the Black Sea to the Piræus. Not a region but has felt in some way or other the repercussion of the existing conditions in Asia Minor. The Balkans have been affected in a variety of ways, but most especially through the disturbing effect on commerce of the temporary loss of some of the principal consuming centres and also through the influence of the general feeling of unrest arising from the uncertainty of the outlook, and the unreal rates at which many of the exchanges of these countries stand are to no small extent due to these factors. The mandated territories, with the exception of Syria, are rather more happily situated, Mesopotamia, for instance, being a distinct economic entity with its own trade outlet; but they have one and all been affected by the delayed settlement, the effect of which has been to hinder enterprise and generally to check development. If, as we are still justified in assuming, despite the rather adverse happenings of the last few days, the crisis eventuates in a speedy and a real settlement that will open once more the ways of commerce and remove finally the shadow of the fear of future conflicts in that region, then it is clear that the consequences for the world will be of the first importance. A settlement will mean, in short, that the first great step has been taken in the direction of normal conditions. The great obstacle to progress in the Near East will have disappeared, and the countries in that region will be free to devote themselves to the task of reconstruction.

For no country is a settlement more vital than for Great Britain. It has long been a habit in some quarters to disparage the Near Eastern markets, and there are many firms who have persistently declined to cater for them, though willing enough to take advantage of specific openings brought to their notice. It is to be assumed, therefore, that the effect of the loss of Asia Minor as a trade outlet is not so generally realised as it should be. As a matter of fact, a very considerable percentage of our exports of cotton goods went to that destination. A certain amount of trade has been done since the Armistice, but nothing compared to the normal, and the loss of this market has naturally contributed to a considerable extent to the maintenance of adverse conditions in the Lancashire industry. Our trade also covered a comprehensive range of other commodities, but was not large in volume, not because of the non-existence of openings, but rather owing to the competition of other countries, coupled with too little enterprise on the part of our traders. A settlement will mean the immediate reopening of this market, while the effect on neighbouring markets should be to broaden demand while at the same time helping to bring about conditions under which it is possible to carry on commerce.

There need be little apprehension that what has happened will adversely affect British prospects in Asia Minor. As a race, the Turks are very reasonable beings, and it is not believed that the fact that we have been temporarily brought into opposition with them will result in the tendency on their part to avoid dealings with us whenever possible. In a few instances we may lose concessions that would have come to us, but that kind of thing could not endure. Kemal Pasha's avowed aim is to develop the resources of the country to the greatest possible extent, and that ideal cannot be pursued concurrently with the boycott of the chief industrial country in the world. Given a satisfactory settlement, his inclinations will be rather to do everything to develop trade relations between the two countries. This was indeed the tenor of what he said to a correspondent at Smyrna. Quite apart from these considerations, it must be remembered that it is not an easy thing to put a brake on the wheels of commerce. Trade does not run smoothly on these lines. Broadly, it is a question of supply and demand, and if the Turks want the best goods they will come to us, irrespective of other considerations.

One further point must be emphasised, and that is that important as the Turkish market was before the war, there is every reason for anticipating that it will be vastly more so in the years to come. The resources of the country are unquestioned. Minerals exist in vast quantities; the country is a rich agricultural region, capable of production on a large scale, given energy and competent administration. These things have hitherto been lacking, but if the talent for organisation shown by the Angora authorities goes for anything, it suggests that the Turks have begun to develop unexpected qualities, whose application to peaceful pursuits should go far to transforming the face of the country. The task will be arduous as a result of the legacy of decades of inefficiency, and it has been rendered more difficult by the serious damage that has been done in the past fortnight, but if it is faced with determination and enterprise a few years should suffice to bring Turkey within sight of prosperity such as she has not hitherto known.

PHŒNIX OIL AND TRANSPORT.

The progress report of the Phœnix Oil and Transport Company for August states that the month's total crude oil production was 3,250 tons. The throughput of the refinery for the month was 7,090 tons. No. 5 well, in the Moreni Stavropoleo district, greatly increased its production during the first week of the month, but became plugged on the 7th, and has since been in process of cleaning, and work at well No. 1, in the Runcu district, had to be temporarily suspended owing to a neighbouring well getting out of control. Bordeni, well No. 15, at 1,172 ft. entered oil sand; yielding a steady production of 20 tons daily. Arabansi, well No. 10, at 1,771 ft. struck oil sand, and is now being tested.

The position of the wells in drilling at the end of August was as under:—Moreni Stavropoleos, well No. 6, erecting derrick; well No. 8, depth 2,224 ft.; well No. 16, erecting boiler. Tuicani, well No. 2, depth 1,026 ft. Baicoi, well No. 5, depth 1,689 ft.; struck oil sand, well now being tested. Chiciura, well No. 1, depth 1,618 ft., preparing to continue drilling. Well No. 2, depth 1,521 ft.; well No. 3, depth 2,099 ft. Runcu, well No. 3, depth 729 ft.; well No. 4, depth 277 ft.; well No. 5, derrick erected. Well No. 27, in the Bordeni district, is now being deepened.

PORT SAID LUMBER MARKET.

There are about forty buildings under construction in Port Said at the present time, including dwellings, apartment houses, and business establishments, says the American Consul-General at Port Said in a recent report. The Suez Canal Co. is building 110 houses at Port Fouad, opposite Port Said, on the Asiatic side of the canal, and plans to build 100 more at Suez. Brick, artificial stone, and cement are used for wall construction, but some lumber is used for floor beams, flooring, doors, blinds, and window frames. In addition to the demand for building, a well-equipped woodworking plant in Port Said is supplying the oil refinery at Suez with cases for gasoline tins and the Palestine orange growers with orange boxes. A total of about 6,000,000 board feet of rough lumber has been absorbed by the Port Said market in the last two years.

THE LJUBLJANA FAIR.

Slovene Industrial Prowess.

(*From a Correspondent.*)

Ljubljana, September 2.

The second Ljubljana Samples Fair was opened on September 2, and is to continue until September 11. Last year Ljubljana had the advantage of being first in the field with no competitors in sight. It was the first fair ever held in Ljubljana, and exceptional weather conditions favoured the enterprise. This year the fair has been somewhat handicapped from the start. Zagreb has been beforehand with a very successful Samples Fair, in June-July, and the Prague Fair coincides with it. Lastly, the Clerk of the Weather evidently thought he had done enough for Ljubljana this season in keeping the rain sluices closed so long, and the opening days of the fair have been rather spoilt by the wet. In the circumstances, the attendance was decidedly large, especially as it consisted mainly of visitors interested in business, and not mere holiday-makers. There was plenty to see, and the different sections were conveniently grouped together. On the whole, last year's impressions were confirmed. The machinery section was the largest, the most important exhibitors being Yugoslav and German firms. Large turbines of the latest patterns testified to the demand for this commodity in this land of only partially exploited water-power. (Something like 7,000,000 h.p. is available.) We were shown an electric plough at work, and an enormous complicated saw for slicing up wood into small pieces. Most of this machinery is made in Ljubljana.

The leather industry is well developed in this country from tanning and preparing the hides to most highly finished products. I noticed some very attractive harness (made in Slovenia), and the boots and shoes made in Yugoslavia are as sound, and as shapely too, as any I have ever seen or worn. Excellent tourist boots are made in Ljubljana, where there is naturally a considerable demand for them. The foreign visitors—French, Belgian, and British—were especially interested in pillow-lace, which is a Slovene speciality. The lace is of all grades, from the most delicate to heavy patterns suitable for curtains or bedspreads. Of course, the custom of trimming wherever possible with hand-made lace or embroidery still survives here, and lends an air of old-world distinction to the house linen and underclothing in use in every cottage. The Slovene hat factories displayed some beautiful velours, which made me ask why they did not make for women as well as for men. These firms have long had a fairly good export trade. Basket-making and wicker-work furniture are other Slovene specialities, and again show the subtle touch of home industry influence which is distinctive of most goods of native manufacture in this country.

A Zagreb firm gave us jam to taste; but you cannot get jam in this country such as is made even in France, for instance. Yet there ought to be possibilities in that direction. On the other hand, the bottled fruit is good, and there is a considerable trade in dried plums, mainly from Bosnia. Very beautiful was the stall of Serbian Pirot carpets, served by two sonsie lasses in Serbian national dress. I'm afraid they talked broad Slovene, though, when spoken to. The Croatian Home Industries Association again showed the lovely Croatian peasant embroideries which were one of the most attractive features of the Zagreb Samples Fair. There was some good furniture to be seen, both Slovene and Croatian (Zagreb), and a fair amount of glass and china, including what is known all the world over as Bohemian glass. Small arms have long been well made in this country, where good shots and good shooting are both traditional. But the only fishing tackle I saw had come from Germany. The wine and spirit section was very large, of course. All Yugoslavia, with the exception of the Alpine district, is a wine country, producing a large variety of wines, some of which have long been in the habit of travelling abroad under borrowed names, as white burgundies or clarets. But most of the finest and most specific brands are not known abroad. Styrian white wines and Dalmatian "black" (i.e., dark red) are most in favour here. As in France, it is always best to order the local wine. You are sure to be well served. The famous Bohinj cheese (something between Gruyère and Orkney cheese in flavour and appearance) had a stand to itself, and the huge "wheels" attracted much attention.

Among fancy goods the most remarkable exhibit was some artificial amber. This "amber" is practically indistinguishable from natural pale amber, clear or clouded, and has the specific weight of natural amber. It is even claimed for it that the colour mellows with time, as in real amber. Two firms showed games and gymnastic apparatus, etc., which were especially interesting after the Sokol gathering. The apparatus was most beautifully finished. One was struck by the fact that cricket, golf, and bowls are apparently unknown in this country. Someone ought to introduce them, for they ought to become popular. A famous British firm had bicycles on view, and a motor-cycle and side car, which were greatly admired. The textile section again showed that there is great room for improvement here. Among the foreign exhibitors the Czecho-Slovaks were the best. The next in number were the Italians, and there were some German goods as well. But there was nothing that could even remotely compare with British textiles. The Slovene cotton hosiery has at least the merit of durability and usefulness.

One of those curious local industries which the world profits by and knows not of is the horsehair industry at a small village near Kranj, Slovenia, where a whole community is busy, year in year out, weaving hair-sieve bottoms for home and foreign trade. I was also shown the machinery for blocking hats which is made in Ljubljana and exported all over the world. The most noticeable items, however, in the whole fair were two sets of bells—a bronze set and great iron bells. The latter were exhibited for the first time at last year's fair, when they attracted a good deal of attention. There is a sweetness about the bronze bell which her iron sister cannot hope to rival, but she has a grim sonority of her own, and the cost is about one-eighth of the other. During the war the Austro-Hungarian Government carried off numbers of old church bells to turn them into guns. The despoiled churches are too poor now to replace them with bronze bells, and so iron ones are in demand. Seven hundred and fifty firms were represented at the fair, 500 of which were Slovene. Although the rest of Yugoslavia was well represented, and there were a good many foreigners there, the exhibition was above all a testimonial to the development of Slovene industry and enterprise, and in that respect confirms the impression that all that this country wants is further growth and more trade.

It is reported that the Algerian grape harvest is good, and will be somewhere in the neighbourhood of eight million hectolitres.

Agricultural Bank of Egypt 3½ per cent. Bonds.—Coupon 36, due October 1, 1922, will be paid at the offices of the National Bank of Egypt in Cairo, Alexandria, and London (6 and 7, King William Street, E.C.4).

The Postmaster-General announces that, according to information received from Smyrna, the postal service is suspended. No letters or parcels can be accepted for transmission to that place until further notice.

Commerce and Industry.

CYPRUS.

August 29.

The Economic Situation.

The outlook is rather disheartening, and the papers comment gloomily on the prospects of the coming year. The harvests have been unsatisfactory, and the prices of produce are low. Once more the moneylender is profiting from the opportunity, and the properties of the hard-pressed village creditors are threatened in all districts. There are some hopes that the High Commissioner, now in England, may be able, in conference with the Colonial Office, to devise some means of alleviating the depression and the distress that is likely to arise. It is, for example, suggested that a portion of the reserve fund derived from revenue surpluses (already drawn upon to some extent, but theoretically set apart for hard times) should be applied to measures of relief. Again, the establishment of an agricultural bank under Government auspices is proposed as by far the best remedy for the evils that press upon the rural classes. The hopes that were raised by the foundation of an agricultural bank by the Anglo-Egyptian Land Allotment Company—who have exclusive privileges for fifty years—have hardly been realised. It is suggested that "the share and interest of the proprietors of the said bank should become the property of the Government by purchase or otherwise" and be administered by the Government. Conditions in Cyprus render the maintenance of a co-operative bank very difficult. The obstacles are great and too many to refer to here.

The Greek Press rightly points out that great injustice would be done if the salaries of officials were reduced. Their pay, at the best of times, was relatively small, and only raised—in many cases inadequately—since the war, owing to the excessive rise in the cost of living. Nor would it be easy to reduce the number of officials. It is not here that any ill-judged economy is to be sought. An increase in the taxation of luxuries may contribute. The thorough remedy for recurrent periods of depression in Cyprus can only come when a permanent and stable Government devotes attention to its real needs, and renders possible the investment of capital for the development of its dormant and latent agricultural resources

Some Census Figures.

The increase of population has been 36,607 in the last ten years, or 3,660 a year. A few other figures are of interest. According to the returns, there were in 1921 90 centenarians (32 male and 58 female), the ages varying from 100 to 120. The records are, however, unreliable, as births were not registered before the British occupation, and villagers are apt to exaggerate. The health of Cypriots, however, is in general very good, and there are many cases of longevity. At one village a Turkish woman of 106 was wont to carry her daughter, aged 75, across the yard of her house.

The area of Cyprus is given as 3,584 square miles. The cultivable area is (converting Cypriot into English acres), roughly, 1,409,408 English acres. Uncultivable land (forest, etc.) is about 903,465 acres. Large tracts, over 720,000 acres, consist of the category of land called in Turkish *khali*, much of which could, and may, be brought under cultivation. The land registers give only about 687,808 acres as actually cultivated, and as belonging to 46,000 owners. Thus about half only of the cultivable area is really under cultivation. Even now, sparse as is the population, if more water and sufficient hands were available, the area under the plough could be very largely increased; and it is to be remembered that in Cyprus, under present circumstances, half of the arable land (except in the few favoured spots where holdings are irrigated by torrents or springs all the year round) is allowed to remain fallow every year. With artificial irrigation, or storage of water now running to waste, the cereal production of the island could even now be doubled. As it is, until the island survey is completed, all the above figures must be looked upon as far from accurate; but they will give some idea of the relative distribution of lands. The number of towns and villages is 738; but about 100 of these are only "temporary villages"—inhabited during parts of the year for agricultural purposes—*chiftliks* (farms), etc.

A Loss to Cyprus.

Great grief has been caused throughout the Greek community, especially at Nicosia, owing to news of the death of M. John Vergópoulos, who has been such a munificent benefactor to that town in late years. He died at Mouresi, near Volos, in Thessaly, in a house which he had but just built, and in which he was spending the summer. He is deeply lamented in Nicosia, of which town he was a truly generous and kind-hearted citizen. Few men have made better use of their good fortune. He derived his wealth from the large and well-known tobacco factory of Vergopoulos and Dianellos, famed throughout the Levant, which, indeed, sends its cigarettes to all parts of the world. Telegrams expressing condolence have been sent to the widow by the Greek Archbishop, the School Committees, the Mayor, the Bank of Athens, and many Cypriots.

The gathering of carobs is proceeding. The locust beans are being sold at 14s. to 15s. the Aleppo kantar (180 okes), or £3 2s. to £3 6s. the ton. The yield is considerably below the average.

CONSTANTINOPLE'S MARKET FOR ELECTRIC HEATERS.

Two gas companies which operated in Constantinople in pre-war days have not yet resumed service, and this fact, combined with proposed special rates for electric heating, should result in the broader use in that city of electric radiators and, to some extent, of electric ranges and smaller cooking devices, says the American Consul-General at Constantinople in a recent report. Heating facilities in Constantinople are somewhat inconvenient and rather expensive. All oil heaters are not satisfactory, and wood is expensive.

The electric lighting company is said to be anxious to build up an electric heating load. During and since the war its generating capacity was increased to meet the demands of munition plants, and there has naturally been a heavy decrease in its power load as such production was discontinued. With a total installed capacity of 28,000 kilowatts (including a 10,000-kilowatt unit being put into service this year) the maximum demand is now only about 9,000 kilowatts. Of this amount, 1,000 kilowatts is traction load, 2,200 kilowatts is power, and the rest is lighting. On April 1, 1922, there were 22,903 consumers on the company's lines, of whom only 1,552 were on flat rate; the connected load was 27,185 kilowatts, of which 4,500 kilowatts was power, 3,200 kilowatts was traction, and the remainder lighting. It is the company's policy to reduce its tariff and to offer all possible inducements toward making the use of electricity general throughout the city. It is proposed to grant favourable rates to new power consumers, and hopes are entertained that these rates will be sufficiently attractive to increase the load of the company considerably.

The lighting company does not do any wiring work, and does not sell electric appliances or apparatus. Interior wiring is done by a number of electrical contractors, who have had to fulfil certain technical requirements in order to establish their ability, and to deposit a specified amount of money as a guaranty of responsibility before they were permitted to carry on a wiring business. There are no restrictions, however, regarding the merchandising of appliances and apparatus.

The directors of the Eastern Extension Australasia and China Telegraph Company have declared an interim dividend for the three months ended June 30 of 5s. per share, payable, free of tax, on October 14.

Stock and Share Markets.

MARKETS AND THE CRISIS.

General Depression Prevails.

(From Our Own Correspondent.)

London, Tuesday Morning.

The markets have been overshadowed this week by the Near Eastern situation. Until yesterday the crisis cannot be said to have had any very marked effect, but the week-end developments led to an all-round lowering of prices, and to-day rates stand well below the levels of a week ago. The declines, it should be emphasised, have not been produced by any pressure to sell. As a matter of fact, there has been no particular increase in offerings. All that has happened is that dealers, with their proverbial caution, have lowered rates to what they considered to be levels that will protect themselves. The markets this week, therefore, are by no means a reliable index of prices, and a small buying order would probably have a quite disproportionate result.

In one or two markets specially susceptible to political influences a certain amount of weakness has developed, notably Oils, which, as is usually the case on critical occasions, have been unloaded by the Continent. But in no direction has there been anything approaching a slump, nor is there likely to be, for, to tell the truth, the Stock Exchange up to the present is distinctly optimistic as regards the outcome of the situation, despite all the alarums and excursions. The view is taken that a settlement will, after all, not prove difficult to negotiate, and while the wish may be father to the thought, the Stock Exchange is usually a fairly accurate judge in these matters.

Of course, in present conditions it would be worse than futile to look for buoyant markets. If prices are maintained, it is as much as can be expected until we are safely through this crisis. But once there is a settlement things will begin to happen, and in more sections than one it is not difficult to prophesy something akin to a "boom." The fact is prices have reacted in the last few months to a quite uncalled-for extent, and except in the case of gilt-edged and a few other descriptions which are at levels which will not be maintained when commerce begins to revive, there is ample room for a sharp recovery. In no case is this truer than in regard to Oils. Indeed, I regard this section as offering some of the best opportunities for profit at the present time. Keeping to the leading categories, it would be difficult to go wrong in this group, in my opinion.

Gilt-Edged Lower.

An exceptionally dull tone has prevailed in gilt-edged descriptions, which close on a weak note as the result of the latest developments. Consols at 56⅛ x.d. are ½ lower, the Conversion Loan at 72⅜ has shed ⅜, while War Loan Fives at 99 9-16 are ¼ down. Indian stocks have been exceptionally weak as the result of the crisis. The 7 per Cent. stock at 111 is 3½ down, the 3½ per Cent. stock at 65¾ is a point lower, while the 3 per Cent. stock is 1¾ down at 55.

The foreign market has naturally been very considerably affected by the prevailing conditions, and with few exceptions stocks have moved to lower levels. French stocks have sagged, War Loan Fives at 33 being 2 lower, while the 4 per Cents. at 27 are 1¼ down. German 3 per Cents. are, exceptionally, 1-16 higher at 1½. Near Eastern securities have, of course, been dull. Turkish Unified are down to 30 x.d., while Greek Monopolies are a point lower at 32½. Russians remain much about the same. The 4 per Cents. are unchanged at 6½, the 4½ per Cents. remain at 7½, while the 5 per Cents. are ½ down at 11. Czecho-Slovak 8 per Cents. have continued a dull spot, and close ½ down at 92. South America securities have eased off somewhat. Argentines have been specially weak, while Peru Corporation Prefs. have reacted.

Industrials Dull.

The general political situation has adversely affected this group, and a very dull tone has been in evidence. There has not been much business passing, but prices in almost all cases have reacted to lower levels.

Tobaccos have weakened in common with other favourite speculative mediums, Bats being 3s. 9d. lower at 85s. 6d., while Imperial Tobaccos have shed 3s. 3d. at 66s. 3d. Textiles have eased off practically all along the line. Courtaulds at 53s. 9d. are 1s. 9d. down, Coats at 65s. 6d. are 1s. 6d. lower, while Listers are 1s. down at 27s. Iron and Steel shares have been fairly well maintained. Vickers are unchanged at 12s., Armstrongs at 15s. 6d. are 9d. up, while Guest Keens remain at 35s. Indian railways have shared in the general weakness. Bengal and North-Western at 139¾ are 1¾ down, Bengal Nagpur at 98 are ½ lower, Bombay Baroda at 94¼ are ⅜ down, while Madras and Southern Mahrattas at 104 are a point below last week's level.

Shipping securities have been dull. P. and O. Deferred are 12 lower at 295, Cunards are 9d. down at 19s. 1d., while Furness Withys at 30s. 3d. are 1s. 3d. down.

Oils Weak.

I have already referred to the weakness of Oils as the result of Continental selling. At the close yesterday, however, an improving tendency was in evidence, but prices in most cases are well below the previous week's levels.

Anglo-Persians at 5½ are 9-16 down, while Burmahs at 5½ are ⅛ lower. Mexican Eagles at 3¼ are unchanged, while Shell Transport at 4 17-32 are 3-32 down. Trinidad issues have been weak. Apex at 2 1-16 are 1-16 down, Centrals at 1 15-16 are the same as before, while Leaseholds at 1 3-16 are 1-16 down.

Russian stocks are rather lower. Spies are 6d. lower at 6s., Anglo-Maikop are 3d. up at 4s., North Caucasians are ¾, at which they are 1s. 6d. down. Ural Caspians, however, are 1s. 3d. up at ¾, while Uroz are 6d. down at 9s. 3d. Among Egyptians Anglo-Egyptian B are 1½, at which they are ⅛ down, while Oilfields of Egypt at 2s. 6d. are 9d. lower. In the Roumanian group Phœnix are 27s., at which they are 2s. down. Roumanian Consolidated are 2s. 3d. down at 13s., Steaua Romanas at 10s. 3d. are 1s. 3d. down, while Dacia Romanos are unchanged at 13-16.

Banks Dull.

A rather dull tone has ruled in banking descriptions. Chartered at 17½ are rather lower, while National of India are unchanged at 43½. P. and O. Banks are ¼ lower at 14¼, while Bank of British West Africas are unchanged at 4¾.

In Egyptians Aboukirs are unchanged at 21s., Beheras are ¼ down at 8, Egyptian Markets at 21s. 6d. are 3d. lower, Gharbieh Lands at 1 7-16 are 1-16 down, while New Egyptians at 23s. 9d. are 3d. higher.

The Eastern Telegraph Company announces a dividend at the rate of 3½ per cent. per annum, less tax, on the preference stock for the quarter ending September 30, and a second qaurterly interim dividend of 2½ per cent. on the ordinary stock, free of tax.

ENQUIRY BUREAU.

Merchants, etc., may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau, 'The Near East,' 1, Devonshire Square, London, E.C.2." It must be understood that "The Near East" accepts no responsibility in connection with such replies.

129.—Principal of old established textile manufacturing and import firm in Aleppo (Syria) now in Switzerland wishes to get in touch with cotton and woollen yarn manufacturers or exporters in Lancashire and Yorkshire.

130.—Import and export merchants in Beirut (Syria) in a position to export dried carobs in any desired quantity wish to be connected with interested British firms.

Engineering Topics.

High-Speed Diesels.

It is announced that one of our leading British electrical manufacturing firms has now completed plans for making high-speed Diesel engines, of the opposed piston type, and for developing this line with a view to perfecting it for dynamo driving. Some little time ago the opinion was fairly generally held, in engineering circles, that high-speed Diesel engines, though eminently desirable, were hardly practical propositions, but in high-speed work more depends upon the perfect balance of the reciprocating parts than on the load or its nature. Internal-combustion engine-makers have paid considerable attention to this feature, and in the engines mentioned the upper pistons in each pair of cylinders are connected, by means of diagonal rods, to the lower pistons. This appears to give a perfect balance, and, consequently, comparatively high speeds are possible. An engine of the type recently completed gives out 750 brake horse-power at a speed of 250 revolutions per minute, and is directly coupled to a 500 kilowatt direct-current generator. This engine has two pairs of cylinders of 14 ins. diameter, the stroke being 16 ins., and it is interesting to note that its average fuel consumption is appreciably less than half a pound of standard Diesel fuel oil per brake horse-power at full load. The cylinders are water-cooled, and the pistons are cooled by oil, and in addition to all other usual controls, means are provided for regulating the supplies of both oil and water for cooling purposes. There is a fuel pump for each cylinder, and compressed air for starting is supplied by a 3-stage air compressor.

Coke Cooling.

Reference was made recently in these columns to a method of utilising the hitherto waste heat from gasworks, where coal is treated by the high temperature distillation process. The usual method was to quench the live coke with water sprayed on by a hose or by other arrangements, a method which resulted not only in the absolute waste of all the heat contained in the coke as it issued white hot from the retorts, but which disintegrated an appreciable proportion of the coke itself, liberated fumes which were injurious to all metal work in the vicinity, and produced huge clouds of steam and deleterious gases.

A new process consists of emptying the coke retorts into a closed tank through which a stream of nitrogen or other non-flammable gas is passed. In its passage this gas absorbs a large amount of heat, and as it issues from the tank it passes through the flues of a boiler giving up its heat to the water. As it issues from the flues it is again forced into the tank, through the coke, taking up more heat, which it gives up to the water in the boiler, this process being repeated until the coke is practically cooled, or cooled down to about 500 degs F., and the boiler is generating steam under pressure. In practice any gas which does not contain oxygen may be used, and, as a matter of fact, the air contained in the tank when the coke is first admitted answers the purpose admirably, as all its oxygen is burnt out when the coke is first admitted. It is understood that the circulation of the heated gas is effected by an electrically driven fan, but it would seem possible that the expansion of the inert gas in the coke tank would serve to assist its passage through the flues, and its contraction, as it gave up its heat, would be of still further assistance in promoting the flow. The plant is in operation at the Zurich Gasworks, and it is said that the results of working so far show that each ton of coke cooled will produce nearly 900 lbs. of steam at a pressure of just under 60 lbs. This means that each pound of glowing coke gives up 450 B.T.U. in the form of steam. The working of the plant is automatic, and there is little or no disintegration of the coke.

Moulding Sand.

With the need for improved castings and for more speedy methods of production, the subject of moulding sands and of binders has received considerable attention of late, and at the recent meeting of the Iron and Steel Institute at York an investigation was described by Mr. C. W. H. Holmes, which was undertaken with a view to ascertaining quantitatively the effect which the various processes to which moulding sands are subjected has on the sand itself and its properties.

The results seem to show that for grey-iron casting it is as important to consider the mechanical and physical properties of the sand as it is to consider its chemical nature. No matter how apparently suitable the sand may be from a chemical point of view, it must possess sufficient mechanical strength, with its bond, to stand up against the strains during pouring and cooling. Further, the conclusion was arrived at that the mechanical treatment to which the sand was subjected had a good deal of influence and effect on the bond value obtained on the raw sand. It appears, also, that the most successful of all moulding sands are those which contain both a fixed and a mobile bond, and the mechanical preparation as generally effected results in a more or less appreciable deterioration of the sand itself. It is evident that further research work on the subject would be of value, as it has been shown that the bond distribution factor is an important characteristic in view of the excessive deterioration that may be caused by milling prolonged beyond the time actually required for a perfect blending of sand and bond.

New Switches.

A steady increase in the use of high candle-power gas-filled electric lamps has caused switch-makers to go into the question of producing switches which would be more suitable than those hitherto used, the idea being that a quick "make," as well as a quick "break," was eminently desirable. Hitherto, whilst all small switches have been of the quick "break" type, the speed with which contact was made was governed by the person who manipulated the switch. It has long been known that lamps of the type mentioned are of comparatively low resistance when cold, the resistance rising with the increase of temperature. That means that a lamp which takes a certain amount of current when in use takes, perhaps, ten or twelve times that amount momentarily when it is switched on. Slow switching may, therefore, cause local heating, burning, and ultimate deterioration of the switch, so that the new quick "make" type should find a ready market. It is exceptionally strong mechanically, and, in addition to its use for lighting purposes, should be used in both heating and cooking installations where comparatively heavy currents are being dealt with.

The London offices of the Tata Industrial Bank are now at 31, Great St. Helens, E.C.3.

The directors of the Barsi Light Railway Company recommend a final dividend of 3 per cent., with a bonus of 4 per cent (14s. per share in all), making a total distribution of 12 per cent. for the year to March 31.

Near East Markets.

LONDON PRODUCE REPORT.

Serious Outlook for Dried Fruit.

(From Our Own Correspondent.)

London, Monday Night.

Sugar.—Home refined has been in fair demand at unchanged rates. Tate's cubes and mineral water sugar are steady at 58s. and 52s. respectively. London granulated is firm at 51s. 6d., as also Lyle's granulated at 51s. 3d. Foreign descriptions have been unsteady. West Indian crystallised and white Mauritius have both shed 3d. at 43s. 6d. and 47s. 3d. respectively. White sugar quotations are:—September, 21s. 6d.; October, 20s. 7½d.; November, 20s. 6d.; December, 20s. 7½d.; March, 20s. 10½d., and May, 21s.

Coffee.—The market has been steady. East Indian is unchanged at 116s., as also Costa Rica at 112s. The futures market has been variable. Quotations are:—December, 60s.; March, 60s. 9d.; and May, 61s. 3d.

Desiccated Coconut.—Prices have fluctuated during the week, owing to small arrivals. The demand still remains normal.

Rice.—The demand has shown a decided improvement, especially for the "two star" variety, which has been in considerable favour. A good request has also been experienced for ground rices, but other growths remain unchanged.

Green Fruit.—Further arrivals of South African oranges have reached the market this week, and a quite unexpected demand has materialised. The quotations have remained unaltered. Naples lemons have almost reached the end of their season, with the result that prices are firmer. The request for Valencia onions has improved, but quotations remain steady.

Dried Fruit.—The dried fruit position is now very obscure, and in view of the events in Asia Minor, prospects of Smyrna sultanas or figs for Christmas must be very doubtful.

Oilseeds.—A dull tone has prevailed throughout. Indian linseed has shed 1½d. at 18s. 3d., while La Plata is 6d. down at 16s. 6d. Rapeseed is lower with Toria 1½d. down at 17s. 4½d. and bold Ferozepore at 16s. 6d. shows a loss of 6d. Cottonseed has been weak. Egyptian black has shed 6d. at 9s. 6d., and Sakellarides is 3d. lower at 8s. 9d. Indian has declined 1½d. to 8s. 3d.

Oils.—An unsteady tone has been in evidence. Linseed oil is 6d. higher at 35s. Crude rape oil and refined remain the same at 42s. and 44s. respectively. Cotton oil has shed 1s. in all cases. Quotations are now 32s. for Egyptian crude, technical, 36s.; refined, 43s.; and deodorised 48s.

Oilcakes—Prices have declined all along the line. Cottonseed cake has lost 20s. at 140s., and coconut cake is 10s. down at 180s. Cottonmeal cake has shed 40s. at 240s., and linseed cake has eased off 10s. at 250s.

A rise in the Ganges beating all previous records during the last thirty years has led to heavy inundation of vast tracts of country on the Unao side. Many villages on both sides of the railway line to Unao are under water, and hundreds of hamlets have been washed away.

COMMERCIAL BANK OF GREECE, LTD.

(Limited Liability Registered in Athens.)

CAPITAL PAID UP - Drs. 20,000,000.

RESERVE FUNDS - Drs. 11,360,832.45.

Head Office: ATHENS.

Branches: Piraeus, Argos, Pyrgos, Patras, Corfu, Cephalonia, Nauplia, Vostizza (Aegion), Calamata, Syra, Chio, Candia, Volo, Salonica, Larrissa, Triccala, Mitylene, Canea, CONSTANTINOPLE

AGENTS IN ALL PARTS OF GREECE, THE LEVANT AND ABROAD.

The Bank conducts every kind of Banking, Commercial and Stock Exchange business and extends special facilities to traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts.

MERCHANDISE DEPARTMENT.

The Bank undertakes the warehousing and sale of goods consigned.

SMYRNA FRUIT POSITION.

Panic-Stricken Farmers.

In a special report dated September 2, which we give below, Messrs. C. J. Giraud and Co., Smyrna, deal with the opening phase of the Turkish offensive, and its effects on the fruit market position. The report is of special interest from the way in which it foreshadows subsequent developments:—

Developments, both from the political and military aspect, have moved rapidly within the past two days.

The defeat of the Greek army, the fall of Afion Karahissar, Oushak and Kutahiah, all reported in flames, and the panic setting in throughout the province, are circumstances entirely unexpected a few days ago, but which in their unfortunate materialisation, are naturally dislocating all business and tending to interrupt the flow of supplies of both sultanas and figs to market.

Facts cannot any longer be concealed. Thousands of refugees are moving on to the neighbourhood of Smyrna. The Greek army has been entirely disorganised as a fighting force, and its defeated remnants now constitute the most serious element of danger. In their rapid retreat, towns and villages are being pillaged or destroyed, and the civil authorities are being concerned about the maintenance of order even in our town.

Conditions are likely to assume a more acute phase before many days are over, and foreign warships have been cabled for, for the protection of the population. The gravity of the situation is extreme, and with the requisitioning of the railway lines for the withdrawal of Greek troops and war material, it is natural to anticipate a reduction in supplies and possibly a temporary interruption at a given moment.

Meanwhile, news coming in from both the Hermus and Meander valleys is to the effect that a feeling of panic is setting in and farmers are lowering prices to stimulate the sale of their figs and sultanas. Dealers will doubtless endeavour to take advantage of these changed conditions to purchase and rush supplies to Smyrna, but the dominant factor rests more on the question of transport than on the matter of price.

Conditions governing markets here and exchanges are becoming increasingly chaotic. Shippers are not inclined to venture on forward commitments and business has been limited to spot purchases for immediate shipment. Exchanges are fluctuating hourly and from 775/785 piastres a week ago have collapsed to as low as 700/710 piastres per £ sterling.

The latest news from the front is to the effect that the Greeks have been able to reconstitute their line in the Alascheir plain and are at present holding up the Turkish advance. But the continuance of hostilities is an unsettling factor, the more so, that the Nationalist forces are well organised, and it is not believed that Greek resistance can be long maintained. This is the situation at present, and any further developments will be shortly reported.

We cannot conceal the seriousness of the outlook. Our clients can rely on our continuing business and shipping off their orders so long as a single pound of fruit can find its way on board ship. But if a general panic sets in, a temporary suspension of all business may come about.

In their usual weekly report, dated September 2, Messrs. C. J. Giraud state:—

Sultanas.—The total estimated arrivals amount to 36,520 bags, as against 38,480 bags for 1921. The total estimated sales are 28,520 bags, as compared with 26,480 bags for last year, whilst the estimated stock unsold amounts to 8,000 bags as against 12,000 bags for 1921.

Figs.—The week's estimated arrivals total 18,500 loads as compared with 9,883 loads last year. The estimated sales are 15,500 loads, as against 7,883 loads for the same period of last year, while the estimated stock unsold totals 3,000 loads.

Shipments.—The following ships are loading with sultanas: S.s. Bulgarian for London, sailing September 5; s.s. Cavallo for Liverpool, sailing September 3; s.s. Merope for Amsterdam, sailing September 3.

Markets.—Sultana and fig markets are in a state of uncertainty and disorganisation owing to military developments. Exchanges rapidly declining, closing rates being 700/710 against 755/760 a week ago.

A Smyrna message (says Reuter's Paris Correspondent in a cable dated September 17) states that the funds in the French banks there and bonds belonging to those members of the French colony who desired it have been placed on board French vessels. The message adds that the staffs of the railways are safe.

LIVERPOOL DRIED FRUIT REPORT.

Messrs. J. C. Houghton and Co., Liverpool, report as follows under date September 15:—

With the Near East turmoil dominating the whole of the market we feel it would not be out of place if we departed from our usual custom and printed a report on the state of affairs up to date, seeing such a volte-face has taken place in the situation.

Currants.—Shortly after the issue of our last report trading broadened out, consumers being induced to purchase more freely by fear of delayed shipments; this caused an awakening in the market. Later, when the seriousness of the position was realised prices commenced to jump shillings per cwt. The old fruit showed good value against prices demanded by the Greek growers for shipments of new fruit, and this assisted the rise in values which continued every day. Markets are almost cleared of old fruit now, and latest sales show an advance in some grades of fully 10s. per cwt. on those ruling in the closing days of last month. Latest sales are:—Pyrgos, 56s., 57s.; Amalias, 57s., 60s.; Patras, 61s., 63s.; Zante, 61s., 62s.; Gulf, 61s., 63s.; Panariti, 61s., 63s.; Vostizza, 59s., 67s. S.s. Gulf of Suez, the first steamer, which is due early next week, brings about 750 tons, and is eagerly looked forward to. A fair quantity has already changed hands on a c.i.f. basis at prices ranging from 61s. to 68s. Some interest was also shown in new fruit for September shipments, Pyrgos changing hands at 54s. to 55s. 6d., mostly at the former figure, and Amalias 55s. 6d., Patras 57s. 6d. c.i.f. terms.

Valencia Raisins.—First steamer, Torres y Bages, is due early next week, and prices are quoted equal to about 90s. ex quay, but from information received from Spain that growers are still asking high prices, it does not appear that we shall see any appreciable fall in value in the near future. Latest quotations are 60s. c.i.f. good average September. This certainly ought to help. Cape raisins are showing very good value at 60s. to 62s., and, with the dearness of sultanas, ought to be appreciated by the country.

Sultanas have been affected, as is natural, more than currants by the unfortunate state of affairs that has arisen, entailing the closing down of all shipments from Smyrna. The market has been a very excited one during the last few days. Overland samples of s.s. Esneh were to hand, and business was done from 70s. to 75s. c.i.f. Upon arrival of steamer several parcels were sold from 82s. up to 100s., but later prices jumped very rapidly owing to the acute position in Smyrna, and latest sales are 125s. to 150s. for good bleached varieties. S.s. Cavallo is afloat with about 25,000 boxes, but we understand she is at present loading in Patras, so is not likely to be here for some time. Old fruit has also been in request, and considerable business has been done from 80s. to 110s., and stocks are almost exhausted. Afghan sultanas.—Prices are also higher, reds 70s., yellow 85s. to 90s., but up to now buyers have not appreciated these and have not paid prices demanded by sellers Cape sultanas.—The last few days more enquiry has been in evidence, and business has transpired in sun-dried at 95s. and bleached variety 105s. Considerable business has been transacted on the spot in Californian soda bleached from 92s. 6d. to 105s., and also forward business in new crop. Prices opened for September-October shipment at 54s. c.i.f., later sales were done at 57s. 3d., and now 60s. is demanded, although at this last price buyers for the time being are not inclined to operate.

Figs.—From the latest accounts it looks as if we are likely to have very few of these this season. A few skeleton cases and bags are afloat in s.s. Cavallo, and it is quite probable that this may turn out to be the only shipment. When the trade realise this they will no doubt clear up the few remaining bags of old genuine that are left for sale.

SUDAN PRODUCE.

The following extracts are taken from the C.E.B. report for July:—

Gum.

The exports of gum were as follows:—Via Port Sudan, 1,005.020 kilos of hashab of the value of £E40,053, 89,879 kilos of bleached of the value of £E4,286, and 80,970 kilos of talc of the value of £E1,730; and via Halfa, 1,446 kilos of hashab of the value of £E58.

Kordofan Province.—The amount of gum sold in El-Obeid market during July was 7,692 kantars, as against 6,038 during the same month last year, at an average price of £E1.605 m/ms. per kantar. The arrivals at El-Obeid from Nahud were 11,174 kantars, as against 5,197 kantars last year; 6,378 kantars were sold in Nahud market during the month, as against 3,138, the average price being £E1.450 m/ms. The amount of gum sold at Um Ruaba was 163 kantars, as against 60 last year, at an average price of £E1.370 m/ms. per kantar; 469 kantars were sold at Rahad market during the month at £E1.400 m/ms. No gum sold during this month last year.

White Nile Province.—450 kantars of 100 rottles (45 kilos) of gum were exported from Tendelti. Prices ranged from £E1.350 to £E1.750 per kantar at Tendelti.

Cotton.

Blue Nile Province.—The final yield at Hosh was just over 4 kantars, and the Sudan Plantations Syndicate completed their ginning operations at Medani early in July.

Dura.

Blue Nile Province.—Dura brought into moradas in ardebs of 300 rottles (135 kilos):—Wad Medani 5,788; Hassa Heissa 2,839.

Upper Nile Province. Dura crops are doing fairly well up to date, though much retarded owing to the first sowing being entirely destroyed in some places by heavy rain at the end of June and beginning of July.

Dates.

Halfa Province.—The following report has been received:—The quinquennial census of date trees in Sukkot District was started at the beginning of the month, and is proceeding rapidly. The average increase to date of a number of villages is approximately 10 per cent. Average market prices were as follaws per 100 kilos:—Gondeila, £E1.800 m/ms.; Barakawi, £E1.700 m/ms.; Gargouda, £E1.500 m/ms.

Livestock, Hides, and Skins.

Berber Province.—1,016 sheep and goats and 105 cattle were sold in Damer market during the month. Of these, 146 and 15 respectively were exported. Average prices: sheep £E1.062 and cattle £E5.980 m/ms.

Darfur Province.—26 head of cattle and 319 sheep were imported from Wadai during the month.

Halfa Province.—The following passed through Halfa during the month:—Cattle 530, goats 1,139, sheep 572, hides 50, skins 800.

Rainfall and Cultivation.

Bahr-el-Ghazal Province.—June: In Wau 7.586 ins., which is 3 ins. more than last year and 2 ins. above the average. Crops are reported to be doing well.

Berber Province.—Prospects from rain cultivation are excellent so far. The majority of the nearer wadis have been well flooded. Part of the Hawad has been flooded, but it is reported that more rain is needed there. Work on the pumping stations at Gendettu and Kitiab has been delayed by the rains. The prospect at Wad Hamid Basin is poor, as the rains have caused a strong growth of grass in both Hods. This is particularly unfortunate as regards the lower Hod, which hitherto has been fairly clean. Some little damage has been caused by rain to the pitching at the regulators and to the earthwork at Wadi Hamid Basin. Tubga Basin has been well flooded by rain water, and it is proposed to sudd the canal and keep the river water out if possible. In view of the rain cultivation prospects, Sakia flood crops and basin crops are not likely to receive much attention.

Blue Nile Province.—The early rains have been exceptionally good this year, just over 10 ins. having fallen in Medani in July as against under 3½ ins. last year. Similar reports have been received from all districts, and large areas have been sown throughout the province. There are fewer people cultivating with hired labour than in 1920, but as cultivators are reported to be relying more on their own labour instead of hired labour, it is believed that the bulk of the land that has been sufficiently watered has been sown, and if the late rains are good a big crop should be harvested.

Nuba Mountains Province.—Crops backward owing to the scarcity of rains. In some parts crops have not yet been sown.

Red Sea Province.—The first Baraka flood is reported to have come down on July 20, area watered being the same as by the first flood last year, which is entirely on the eastern side of the Delta. There have been some heavy rainstorms, but as a whole the rains so far are disappointing.

White Nile Province.—Good rains have fallen during the month in most parts of the province; in some places sowing commenced earlier than usual, and the crops are already well advanced; in others sowing has only just begun. Generally speaking, crops on Goz land, Simsim and Dukhn promise well. Up to the end of July, reports from Jebelein, where the bulk of the Ful Sudani crops are grown, are not so good. The cotton soil crops feterita (and hacharig) dura are doing well in those places which had early rains.

Communications.

Bahr-el-Ghazal Province.—Meshra Channel: The new Khor Toor Channel is well reported on, and the scheme is showing every sign of being a success. Only one bank was made this year, and it is hoped the dredger will be available next year for about a month to make a bank on the other side and also to clear the short distance between the present landing and the old landing. The latter is more convenient, and will save distance merchandise which has to be transported.

Digitized by Google

Cotton and Cotton Goods.

THE EGYPTIAN MARKET.

Business on Small Scale.

The Commercial Co. of Egypt report as follows under date September 1:—

The market during the past week has been fairly steady at the advance. There has been some speculative buying in anticipation that the American Bureau Report, due to be published this evening, will show a very low condition. Somewhat less favourable Egyptian crop news has also contributed to the advance in prices and the better tone which has prevailed. A certain amount of inquiry has emanated from the consuming centres, but it does not seem to have resulted in much actual business; spinners appear content to pursue their waiting policy, and even the cheapest offers do not attract them for more than their immediate requirements. The Spot market has been moderately active this week, and sales amount to about 5,900 bales, of which we estimate 3.200 bales Sakellaridis, 2.400 bales uppers, 250 bales brown and pilion, and 50 bales white. Arrivals are beginning to increase and new crop uppers are now showing in fair quantities, but are not being quickly taken. The demand from overseas is still very restricted, and spinners are obviously unwilling to commit themselves to any extent at present prices.

Sakellaridis.—As last week, the business has been chiefly in the medium grades fully fair to fully good fair, but there has been more inquiry for low grades, which are, however, very scarce and hard to buy. The good grades are neglected and pressed for sale. With the exception of fair and fully fair, which show no change, the basis is rather easier, and good is offered at quite an attractive basis to which we would commend spinners' attention.

Uppers.—An improved demand has been met with, and all styles have been dealt in at about last week's basis except for the grades above good, which are easier.

Brown.—A fair business has been done at last week's rates.

White.—A retail business has been done at a somewhat easier basis.

The Crop Position.

Our agricultural expert has completed his first tour of inspection, and we give below a summary of his reports:—

Upper Egypt.—All the fields, with the exception of the few estates provided with artesian wells, show the effects of the shortage of water during July; some of the early bolls have been forced to maturity prematurely, and the opening of these bolls is not by any means so good as was anticipated. The bottom bolls—which are the bolls already opened—are not as plentiful as could be desired; the plants have, however, plenty of top bolls, and the maturity and opening of these depend on the weather during the next week or two. Pink boll worm attack is light so far—up to 10 per cent. Some damage has been done by Nadua el Assalia—a local damp fog in the early morning, which prevents the opening of the bolls affected.

Lower Egypt.—Only in the Southern districts is the crop enough advanced to make inspection now of any real worth—in the Northern districts the plant is still growing. The provinces visited were—Galoubieh, Menoufieh, and the Southern districts of Gharbieh, Sharkieh, and Dakablieh. As in the case of Upper Egypt the shortage of water during July is reflected in the only moderately satisfactory opening of the early bolls. In these districts, however, the number of bolls already opened is not very large—a big percentage of the bolls have not yet reached so advanced a stage. Bottom bolls are not numerous, but there are plenty of top bolls. Pink boll worm attack is a good deal heavier here than in Upper Egypt and cases of 30 per cent. bolls attacked have been found. Nadua el Assalia has also caused some damage. In the Northern districts of the Delta the plants are progressing favourably, and are flowering and fruiting normally. Withering of bolls is again reported as a result of the heat and excessive humidity. Pink boll worm attack has somewhat increased, and is now about 12 per cent. to 14 per cent. in these districts.

AGRICULTURAL BANK OF EGYPT £3½ PER CENT. GUARANTEED BONDS.

The COUPONS falling due on the 2nd October, 1922, on these Bonds, should be PRESENTED for PAYMENT between the hours of 10 and 2.30 (Saturdays, 10 to 11.30), at the Bank of England Dividend Pay Office, Lombard Street, E.C.3, where lists may be obtained. Coupons must be left three clear days for examination.

MANCHESTER MARKET.

Unsteady Tone Prevails.

(From Our Own Correspondent.)

Manchester, Saturday.

The tone of the market during the past week has been firmer, but the ups and downs in raw-cotton rates have proved disconcerting. Buyers, generally speaking, have had matters all their own way, and it is evident that our customers are not prepared to give out sufficient orders to strengthen in any way the position of producers. The majority of the sales which have taken place have been at low rates. American cotton crop news during the week has been less favourable. With regard to cloth, nothing can be expected of the Near Eastern outlets just at present, and it will probably be some time before any buying movement commences for those outlets. Egyptian yarns have been steadier in price, but the business has not been important. Users, however, do not appear to be afraid of prices going against them. The demand has mostly run on the finer numbers. The bulk of the piece goods inquiry has been for India, and some encouraging transactions have been recorded in light cloths and shirtings. China has continued quiet. American yarn quotations have ruled firmer, but cases are frequently mentioned of deplorable prices being accepted by needy sellers.

LIVERPOOL REPORT.

Better Demand for Sudan Cotton.

Messrs. Reynolds and Gibson report as follows under date September 13:—

A hardening tendency has been noticeable in our markets during the past week, in spite of some minor fluctuations from day to day. The inquiry has broadened out somewhat, practically all descriptions of Egyptian cotton having been asked for at one time or another. The demand for low cotton still continues to be one of the chief features, and, if anything, is actually growing in extent, whilst the finer grades of Sakellaridis are still neglected. A good deal of interest was displayed at one time in white Sudan cotton, but only the best qualities found favour, and the amount of actual business passing was small in extent. A fairly persistent inquiry has existed during the last week or two for "fine brown," but here, again, the amount of actual business put through has been very limited. Odd lots of Pilion cotton, which have been held in stock here for some considerable time, also found buyers here and there, but the prices obtained were irregular, and holders were easy to deal with.

Trading in Sudan cotton was dull at the commencement of the week, but improved somewhat during the last few days. As stated in previous reports, the selection in Sudan cotton, good colour and staple, has narrowed down considerably, although there still appears to be a fair quantity of the lower cotton on offer which is changing hands at anything between 12.00d. and 13.50d. per lb. We should advise holders of this style of cotton to sell now at every available opportunity, for, when the Egyptian new crop begins to arrive next month, interest is almost sure to be centred on it, and they stand a chance of carrying the cotton well on into the next season, or even further. Yesterday's announcement of the U.S. Ginners' Condition estimate of the American crop as 49.4 has administered a certain amount of kick to all markets, and, as we write, prices are hardening all round. Another announcement which intimately concerns Egyptian shippers was received to-day in a cable from Boston, U.S.A. It is to the effect that long staple cotton (*i.e.*, 1⅛ inches and over), on which a tariff of 7 cents per lb. is at present chargeable, as on all such cotton imported into U.S.A., is shortly to be placed on the free list. This comes as a culmination of several other similar rumours and at present must be regarded as unofficial, but where there is so much smoke it is only reasonable to suspect a certain amount of fire beneath it. Rather more attention has been paid lately to reports of crop damage in Egypt, and it would be dangerous at this stage to risk an actual crop estimate. A large carry-over is, however, a certainty, and with trade as it is at present there should be enough Egyptian cotton to go round.

On the other hand, the general situation in the cotton world appears to be undergoing certain modifications, which can only be construed as "bullish" in effect (as witness the recent Ginners' estimate, and the rumour regarding the 7 cent tariff mentioned above). Trade has been quiet for a very long time now, and, by the law of averages if for no better reason, it would only be reasonable to anticipate a

Digitized by Google

change for the better during the coming season. Quick changes of sentiment are notoriously frequent in our particular trade, and at the present time it looks very much as if the stage was being set for one. Manchester reports, generally speaking, have been firm in tone, and on one or two days were quite optimistic. To the somewhat erratic markets, which have recently been upsetting business there, we now have the very disturbing political news from the Near East, and this is likely to hamper business still further for the time being.

C.i.f. business this week has shown some signs of recovery, and Alexandria quotations appear to be getting more in line with those ruling on this side. With a little more unbending from Egypt, we should not be surprised to find quite a brisk business doing once more in cotton for forward delivery. Total sales, 2,700 (including 600 Sudan). Quotations from fair to good all round are raised 25 points. Fine brown and Sakellaridis are raised 25 points. Extra fine brown and Sakellaridis are unchanged. Fine upper is unchanged, whilst extra fine upper is exceptionally 50 points lower.

COTTON TRADE REVIEW.

Market Very Depressed.

The Manchester cotton trade review of the Imperial Ottoman Bank for the week ended September 16 states:—

General.—This market continues in a depressed condition, and there is nothing to report this week of a redeeming character. Inquiry continues to be entirely out of proportion to actual contracts placed, and when the latter result is achieved it is only too often at prices which leave the producer with a loss on the transaction. Ways and means of improving this state of affairs are very freely discussed, but no practicable plan has yet been evolved. Recent events in Asia Minor have made it useless to expect support from the Levant and the Balkans for the time being. The Reparations tangle and an unsettled raw cotton market are other disturbing factors.

Yarn.—There is practically no change to report in this section. The turnover continues to be disappointing, and there is greater irregularity in quotations. Shipments abroad, as disclosed by the Board of Trade Returns, during the month of August amounted to 15,400,000 lbs., against 19,852,000 lbs. in July and 15,285,000 lbs. in August last year.

Cloth.—There has been no increase of activity in the cloth market, buyers being still content to purchase from hand to mouth. India continues to operate on a moderate scale, but China, Egypt, and other outlets give little support. Shipments during July amounted to 377,985,000 square yards, against 443,609,000 square yards in July, and 212,403,000 in August last year. The latter, of course, was a very bad month.

Raw Cotton.—As indicated above, the raw cotton market has been disturbed. Fluctuations during the early part of the week were as follows:—Monday, 24 points rise; Tuesday, 17 points fall; Wednesday, 40 points rise. During the last two or three days the price has been stable, and business both in "spot" and "futures" has been rather better. News regarding the American crop is not very good. Closing prices are as follows:—American fully middling, 13.42; Egyptian fully good fair, 17.50.

ROUMANO-CZECHO-SLOVAK ECONOMIC CONFERENCE.

In the course of the Roumano-Czecho-Slovak Economic Conference held at Prague in connection with the Industrial Fair, it was stated that before the end of the present year the Finance Ministers of the States comprising the Little Entente would meet at Prague for the main purpose of dealing with the stabilisation of the exchange. The Roumanian delegate M. Joachim read a paper on the preliminary arrangements which have been made with a view to the establishment of a Roumanian-Czech bank. The Roumanian delegate M. Petrescu proposed the issue of a special common currency, guaranteed by the two States, and serving only to facilitate reciprocal business transactions. The subsequent debates on the industrialisation of Roumania showed a preponderance of views in its favour, it being held that this industrialisation, far from impairing Czecho-Slovak industry, would tend rather to enhance it. The Conference concluded with the passing of several resolutions on the topics discussed, and as regards the Danube traffic, it emphasised the necessity for increasing the means of communication and of organising economic and financial institutions for the purpose of collaborating closely in this respect. The resolutions will be transmitted to the headquarters of the Czecho-Slovak Chambers of Commerce, to the Chamber of Commerce at Bucharest, and to the industrial federations, from which they will be communicated to the respective Governments.

CURRENT PRICES.

General Produce.—Bacon (Continental), 146s. 6d. per cwt.; (Canadian), 130s. cwt.; (American), 108s. 6d. cwt.; butter (Danish), 220s. cwt.; (Australian), 199s. cwt.; (New Zealand), 211s. cwt.; cheese (Canadian), 88s. cwt.; (New Zealand), 88s. cwt.; lard, 73s. cwt.; eggs (Danish), 19s. 9d. per 120; (Styrian), 12s. per 120; chillies 140s. cwt.; cloves (Zanzibar), 1s. 3½d. lb.; cocoa (Ceylon good to fine), 81s. 6d. cwt.; coffee (Costa Rica), 117s. 6d. cwt.; (East Indian), 115s. cwt.; (Central American), 95s. cwt.; (Jamaica), 72s. 6d. cwt.; (Mocha Longberry), 100s. cwt.; (Santos superior), 69s. cwt.; (Nairobi), 101s. cwt.; ginger (washed Cochin), 52s. 6d. cwt.; nutmegs (110's to 80's), 1s. lb.; pepper (Singapore black), 3¾d. lb.; (Muntok white), 6¾d. lb.; pimento, 2d. lb.; raisins (Cape), 49s. cwt.; currants (Vostizza), 64s. 6d. cwt.; currants (Amalias), 56s. 6d. cwt.; sultanas (Smyrna), 90s. cwt.; sugar (Tate's cubes), 58s. 6d. cwt.; (Lyle's granulated), 51s. 3d. cwt.; (Mauritius crystals), 47s. cwt.; (West Indian crystallised), 45s. cwt.; (centrifugal), 18s. 3d. cwt.; tapioca (fair Singapore), 2½d. lb.; rice (Rangoon No. 2), 15s. 4½d. cwt.; (bran Rangoon), £6 12s. 6d. ton; cinnamon (firsts), 10½d. lb: mace (fair Singapore), 1s. 11d. lb.; tea (Indian common to good common), 1s. lb.; (medium to good), 1s. 5d. lb.; (fine to finest), 2s. 8d. lb.; Ceylon (common to good common), 1s. lb.; (medium to good), 1s. 5d. lb.; (fine to finest), 2s. 5d. lb.; Java (common to good common), 10d. lb.; wheat (English white), 46s. 6d. qr.; wheat (Australian), 53s. 6d. qr.; oats (English), 41s. qr.; oats (La Plata, ex-ship) 26s. 1½d. qr.; maize (La Plata), 40s. 3d. qr.; flour, 37s. 6d. sack.

Hides and Skins.—Ox and heifer (first) 90 lb. and up, 9¾d. lb.; 80 to 89 lb., 9½d. lb.; 70 to 79 lb., 9½d. lb.; 60 to 69 lb., 8⅝d. lb.; 59 lb. and under 7⅛d. lb.: (second), 90 lb. and up 8⅜d. lb.; 80 to 89 lb., 8¾d. lb.; 70 to 79 lb., 8d. lb.; 60 to 69 lb., 6⅞d. lb.; 59 lb. and under, 5½d. lb.; cows (first), 60 lb. and up 7½d. lb.; 59 lb. and under 6⅝ lb.; (second), 60 lb. and up, 5½d. lb.; 59 lb. and under, 5¼d. lb.; bulls (first), 5d. lb.; (second), 3½d. lb.; kips (first), 6⅛d. lb.; (second), 5½d. lb.; (third), 3⅜d. lb. Calcutta Market (prices in rupees per 20 lb.): Arsenic hides (cows); Agras, 7 to 12; Durbhangas, 5 to 7.8; Patnas, 4.12 to 6. Salted cows, 6 to 8.8. Arsenic hides (buffalo), 4 to 6. Skins: Calf, 8 to 10; goat, per 100 pieces, 200 to 260.

Chemicals.—Acids: Boric, 61s. cwt.; oxalic, 7½d. lb.; citric, 2s. 3¼d. lb.; tartaric, 1s. 4½d. lb.; ammonia (sulphate), £15 16s. 6d. ton; arsenic (white powdered), £41 10s. ton; benzole (standard), 2s. 5½d. gallon; bleaching powder (35 per cent.), £12 5s. ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 109s. cwt. Potassium: Bichromate, 6½d. lb.; chlorate, 4½d. lb.; caustic, £31 ton; nitrate, £37 10s. ton; permanganate, 8½d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £14 ton. Sodium: Crystals, 110s. ton; bi-carbonate, £10 15s. ton; bichromate, 5½d. lb.; alkali (58 per cent.), £8 1s. 3d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £20 2s. 6d. ton; hyposulphite, £15 10s. ton; prussiate, 11d. lb.; nitrate, £13 7s. 6d. ton; glycerine (crude, 80 per cent.), £48 ton; (industrial, 1260 per cent.), £87 10s. ton; lemon oil, 2s. 11d. lb.; quinine, 2s. 2d. oz.; red lead, £37 17s. 6d. ton; white lead, £40 10s. ton; white ground lead, £49 2s. 6d. ton; sulphate of copper, £26 5s. ton; sulphate of iron, 55s. ton.

Metals.—Aluminium, £100 ton; antimony (English Regulus), £27 12s. 6d. ton; bismuth, 9s. lb.; copper (standard), £63 3s. 9d. ton; copper (electro), £71 ton; gold bars, 92s. 5d. oz.; iron (No. 3 Cleveland), 90s. ton; hematite (mixed number), 89s. 6d. ton; galvanised sheets (25 G), £16 10s. ton; lead (soft foreign), £23 17s. 3d. ton; managanese Poti, 1s. 1½d. unit; molybdenite, 40s. unit; nickel, £145 ton; platinum, 460s. oz.; graphite (80-90), £13 10s. ton; quicksilver, £12 12s. 6d. bottle; spelter (G.O.B.), £31 2s. 6d. ton; tin (standard), £159 13s. 9d. ton; wolfram, 14s. unit; zinc sheets, £37 10s. ton; tin plates (20 by 14), 19s. 1d. box; silver bars, 35⅛d. oz.

Miscellaneous.—Cotton (American), 12.92d. lb.; Egyptian (Sakel), 16. 65d. lb.; jute (first grade), c.i.f., £35 12s. 6d. ton; jute (lightnings), £32 15s. ton. Oilseed: Linseed (La Plata), £17 5s. ton; palm kernels, £16 16s. 3d. ton; castor seed (Bombay), £17 7s. 6d. ton; sesame seed (China), £23 5s. ton; soya beans, £11 15s. ton. Oils: Linseed, £34 5s. ton; olive (Spanish), £75 10s. ton; rape (crude), £40 10s. ton; soya, £35 15s. ton; petroleum, 1s. 4½d. gallon; petrol, 2s. 1d. gallon; fuel oil (ex-tank), 65s. ton; coconut (Ceylon), £36 15s. ton; cotton (crude), £33 10s. ton; ground nut, £47 15s. ton. Rubber: Plantation (No. 1 crepe), 7⅛d. lb.; smoked sheet, 7⅛d. lb.; fine hard Para, 10¼d. lb.

SPECIAL MARKET REPORTS.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

JAFFA, August 19.

Small quantities of wheat have been exported to Syria during the week. The prices of cereals are much firmer, with an upward trend.

MOSUL, August 19.

Marked weakness has developed in the market for wool and gall nuts during the week. The former commodity is quoted at Rs.8. the latter at Rs.6 per batman of 13½ kilos.

CONSTANTINOPLE, August 29.

The imports this week have been good, principally as regards sugar, large quantities of which have arrived from America, Egypt, Holland, and France. On the other hand, arrivals of flour have been small, America as well as Egypt having almost ceased exporting this product.

Flour.—Prices have risen in this market as a result of the rise in the exchange. 108 tons have arrived from Bulgaria, and 388 tons from America. Quotations (per sack of 63 kilos):—Nelson, Ps.910; Goldstar, Ps.820; Durum. Ps.710-730. Native flour is quoted at Ps. 625-650 per sack of 72 kilos.

Cereals.—1,125 tons of wheat have arrived from Bulgaria. Quotations per oke: Wheat (in Customs), Ps.11¼; rye, (in Customs), Ps.8½; maize (in transit), Ps.8½; barley (in Customs), Ps.8½.

BEYROUT, August 31.

The following particulars are given of the position in July:—

Cocoons and Silk.—There is nothing particular to record regarding the crop. There has been a sharp rise in silk at Lyons as a result of the depreciation of the French exchange. It is estimated that 200 bales have been exported since the commencement of the season. The prices ruling during the month have varied between 195 and 210 francs on the free markets.

Oil.—The rise in oil recorded in the previous report has been accentuated. Quotations have ranged between Ps.60 and Ps.65 per two okes. A new rise is expected.

Wheat.—Damascus wheat is quoted wholesale at Pe3 per rotor of twc okes. Despite the gloomy forecasts the Syrian crop appears to be satisfactory. The market counted on imports from Cilicia, but the Kemalist Government, which had authorised the export, has suspended this permission pending the complete provisioning of the Turkish troops. The amount of cereals received from Cilicia is not more than 5-6,000 tons.

Compared with June commercial transactions have been satisfactory. Some consignments have been made to Palestine and Cilicia, as well as for the interior, including manufactured articles, drapery, hosiery, fancy goods, haberdashery and lace. The last article has been in great demand. German competition continues to be active as regards hosiery, as well as in respect of materials for construction, cement, ironmongery, stationery, toys, etc. Merchants turn to the countries with the depreciated exchanges. Although Germany invoices its merchandise in francs or sterling, prices remain always in its favour, and orders for Germany increase more and more. Czecho-Slovakia is making a great effort to develop trade with Syria. Many orders have been placed for glassware and earthenware. Austria (Vienna, Stakenitz, Biala) is beginning to regain its pre-war position as regards Arab cloth and tarbouuhes.

THE FUTURE OF GALATZ.

Galatz has been to a special degree affected by the confused conditions in the Near East during the past few years, gaining enormously in population through refugees, while its trade has assumed a much more important aspect. How far the position of the port will be modified in the near future is discussed in an interesting article in the *Correspondance Economique*, which commences with a striking comparison of the port as it was and as it is to-day. "Galatz, which was the port of import and export, before the war, for planks and wood, and to a similar extent for cereals, had then some 50,000 to 60,000 inhabitants, and was noted for its lack of life and commercial activity. The refugees of 1916 began to populate it; the Russian revolution and the restoration of Bessarabia to Roumania have ended by raising its population to between 220,000 and 250,000, which is what it is to-day, including the floating population. From the spring of 1919 the trade of Galatz has undergone a remarkable development, and, as all the world knows, the commercial activity of the country has been concentrated in the port for the last few years."

The article goes on to point out that Galatz is badly situated in regard to relations with Bessarabia because of the lack of through communications. "Always in considering the question of the future of Galatz," the article continues, "it is necessary to point out that the development of the port from 1919 onwards . . . has been due to a large extent to the fact that the port of Constantza was unable to serve the interior of the country because of the destruction of the Borcea bridge. Now that the bridge has been restored and the trade with Constantza has been re-established the question arises as to what extent the great port of the Black Sea will divert trade from Galatz. It is indisputable that Galatz will suffer particularly because of the great inconvenience arising from the closing of the Danube through ice, paralysing commercial activity for three months every winter. Other points to the disadvantage of Galatz are the freight from Constantza to Galatz, and the excessive dues levied on the S.M.R. (because of these dues this company has decided not to ply its vessels on the Danube, and to make Constantza its last stopping-place). Moreover, difficulty is caused by the claims of the workers, who demand salaries out of proportion to the work they do, and, lastly, there is the lack of transport after unloading.

"It is not less certain that Moldavia, Bessarabia, Bukovina, and a great part of Transylvania will have to rely on the commerce and industry of Galatz, whether they like it or not, for the supply of merchandise. By its position this port is on the trade route of these provinces, whose merchants should have to stop first at Galatz, and consequently will contribute, as in the past, in a great measure to the maintenance of the commercial and industrial activity of this town. It is further worth recalling that those in charge of water communications are studying the question of permitting Poland and also Czecho-Slovakia to establish a shipping base at Galatz, a free zone. . . . When that project is realised Galatz will gain very materially. One other fact is also certain; that is, that Galatz will be relieved from its present congestion when the frontiers of Russia are opened, and particularly when the port of Odessa is opened."

Under the auspices of the Italian Colonial Institute the steamer Milano has sailed on a month's cruise in the Eastern Mediterranean, organised as a sample fair of Italian agricultural and industrial products.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. Vindelia for Bombay (Liverpool, October 5).

Anchor Brocklebank Line.—S.s. Mathura for Calcutta (Birkenhead, September 27); s.s. Makalla for Port Said, Colombo, Madras, and Calcutta (London, October 7); s.s. Macharda for Calcutta (Birkenhead, October 11); s.s. Masirah for Calcutta (Birkenhead, October 18); s.s. Holywell for Port Said, Colombo, Madras, and Calcutta (London, October 21).

Bibby Line.—S.s. Arracan for Rangoon (Middlesbrough, September 27); s.s. Warwickshire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, September 27); s.s. Leicestershire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, October 11).

British India Line.—S.s. Malda for Bombay and Karachi (London, September 22); s.s. Domala for Colombo, Madras, and Calcutta (London, September 29); s.s. Nevasa for Bombay and Karachi (London, October 6); s.s. Mandala for Colombo, Madras, and Calcutta (London, October 13); s.s. Matiana for Bombay and Karachi (London, October 20); s.s. Mantola for Colombo, Madras, and Calcutta (London, October 27).

Clan Line.—S.s. Willcasino for Bombay and Persian Gulf (Birkenhead, September 27); s.s. Clan Macphee for Malabar Coast and Tuticorin (Birkenhead, October 26).

Cunard Line.—S.s. Brescia for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piræus, Syra, Volo Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Poti, and Batoum (Liverpool, September 23); s.s. Cypria for Genoa, Leghorn, Naples, Palermo, Messina, Catania, Fiume, and Gravosa, etc. (Liverpool, September 28).

Ellerman Line.—S.s. City of Palermo for Gibraltar, Malta, and Alexandria (Liverpool, September 23); s.s. Trentino for Patras, Syra, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, October 7).

Ellerman, Bucknall, and Strick Line.—S.s. Frankenfels for the Persian Gulf (London, October 20).

Ellerman "City" Line.—S.s. City of Genoa for Bombay and Karachi (Birkenhead, September 22); s.s. City of Nagpur for Calcutta (Birkenhead, October 5); s.s. City of Marseilles for Calcutta (Birkenhead, October 14).

Ellerman's "Hall" Line.—S.s. City of London for Karachi and the Punjab (Liverpool, October 2); s.s. Karroo for Bombay, Karachi, and the Punjab (Liverpool, October 12).

Ellerman's Westcott and Laurance Line.—S.s. Eden Hall for Malta, Piræus, Salonika, Smyrna, Constantinople, Galatz, and Braila (London, September 23); s.s. Mardinian for Gibraltar, Malta, and Alexandria (London, October 11); s.s. Orlando for Gibraltar, Malta, and Alexandria (London, November 1).

Glen and Shire Line.—S.s. Gleniffer for Port Said, Port Swettenham, Singapore, etc. (London, October 5); s.s. Carnarvonshire for Port Said, Port Swettenham, Singapore, etc. (London, October 19); s.s. Glenbeg for Port Said, Port Swettenham, Singapore, etc. (London, November 2).

Harrison Line.—S.s. Defender for Calcutta (Liverpool, October 5); s.s. Director for Port Said, Port Sudan, Aden, Mombasa, Jibouti, etc. (Birkenhead, October 26).

Henderson Line.—S.s. Amarapoora for Port Said and Rangoon (Birkenhead, October 4).

Holt Line.—S.s. Agapenor for Port Said, Port Swettenham, Singapore, etc. (Swansea, September 28); s.s. Pyrrhus for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, September 28); s.s. Meriones for Port Said, Port Swettenham, Singapore, etc. (Glasgow, October 5); s.s. Oanga for Port Said, Port Swettenham, Singapore, etc. (Glasgow, October 5).

Johnston Line.—S s. Aviemore for Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, September 30); s.s. Incemore for Piræus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, October 21).

ANCHOR LINE

First-Class Passengers only.

LIVERPOOL TO BOMBAY.

KARACHI via Bombay, calling at Gibraltar & Egypt.

LARGE STEAMSHIPS. UPPER DECK CABINS.
FITTED WITH ELECTRIC FANS.
RECOGNISED BY INDIAN GOVERNMENT.

Passenger sailing dates:—

Circassia, Oct. 20. Scindia, Dec. 6.
Olympia, Nov. 7. Massilia, Dec. 22.
Castalia, Nov. 21.

Moss Line.—S.s. Esneh for Casablanca, Gibraltar, Oran, Malta, Port Said, Jaffa, Haifa, Beyrout, and Famagusta (Liverpool, September 25).

P. and O. Line.—S.s. Kashmir for Bombay (London, September 22); s.s. China for Bombay (London, September 29); s.s. Nagoya for Colombo, Madras, and Calcutta (London, October 6); s.s. Kashgar for Bombay (London, October 6); s.s. Morea for Bombay (London, October 13); s.s. Nore for Colombo, Madras, and Calcutta (London, October 20).

Prince Line.—S.s. Scottish Prince for Tunis, Malta, Alexandria, and Syria (Manchester, September 16); s.s. Black Prince for Tunis, Malta, and Alexandria (Manchester, September 30); s.s. Stuart Prince for Malta, Alexandria, and Syrian Coast (London, September 30).

[*Under the existing conditions it will be understood that these routes will not necessarily be followed in their entirety.*]

COMPANY NOTES AND REPORTS.

Danube Navigation.

The report of the Danube Navigation Company, Ltd., for the year to July 31 last states that the accounts show receipts which have been retained in foreign currencies, viz.: German marks, 1,400,000; Austrian kronen, 24,917,273; Czecho-Slovakian kronen, 134,665; in addition to dividends, etc., converted into sterling, amounting to £4,225, and an exceptional item of capital profit, viz., £36,376. Practically the whole of the foreign currencies are being utilised in the business of the Sud-Deutsche Company. The net result of the year's operations is to leave a credit balance to profit and loss account of £11,914. The directors write £11,000 off preliminary expenses account, and carry forward the balance, as well as the foreign currency credits, to the current year's account. Since the close of the financial year the directors have concluded a mutually satisfactory agreement with the Government of Czecho-Slovakia in regard to that portion of the fleet of the Sud-Deutsche Company which was ceded to Czecho-Slovakia by the American arbitrator's award.

National Bank of Bulgaria.

The net profits of the National Bank of Bulgaria in 1921 amounted to 234,614,234 levas, against 112,113,120 levas for 1920. The allocations include: Bank employees' benefit, 3,647,582 levas; mortgage reserve funds, 92,916 levas; doubtful debts, 20,000,000 levas; foundation capital, 50,000,000 levas; and State Treasury, 95,473,736 levas.

Smyrna-Aidin Railway.

The council of administration of the Smyrna-Aidin Railway in their report for the half year to June 30 state that the earnings of the railway for the period amounted to £167,105, as compared with £265,218, and that the expenditure was £121,142, as against £160,847. The mileage worked during the half-year is still the same—namely, 193 miles—which is about one-half of the company's entire system, the remainder of the railway being in the possession of the Turkish Nationalists. The working of this restricted portion of the line is still much interfered with by the political and military state of affairs, and, as pointed out by the council in previous reports, no revival in agriculture or trade can be expected until the future government of the country is more clearly defined.

In the meantime, every effort has been made to put the line and rolling stock over which the company has control into good going order, to meet the heavier traffic to be expected when the present war ceases and normal trading and agricultural operations are resumed. The re-valuation of the stores referred to in the auditors' certificate has not yet been concluded, but will be carried into effect in the next half-year's accounts. The auditors, in their certificate, say: "Owing to the manner in which the stores have been dealt with in the Smyrna books in regard to the value of the Turkish piastre, in which there have been wide fluctuations during 1921, it has been found necessary to have a re-valuation of the stores, which is not yet completed. Subject to such reduction in the value of the stores as may be found necessary as a result of this re-valuation, and to such adjustments as may arise on settlement of the company's claim against the Turkish Government, and on the company obtaining possession of the whole of its line, in our opinion the accounts show the true and correct financial position of the company."—Meeting, Winchester House, E.C., September 26, noon.

RECENT ADJUDICATIONS.

The Clothing and Equipment Company of Egypt were among the successful tenderers to the Egyptian Frontier Districts Administration (Stores Department) for the supply of clothing for the second six months of 1922-23.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.)

Bulgaria.

Leather and Balata Belting, etc.—The Bulgarian Ministry of Posts, Telegraphs, and Telephones, Sofia, invites tenders for the supply of leather and balata transmission beltings and leather belt laces. Tenders must reach Le Directeur Général des Postes, Télégraphes, et Téléphones, Sofia, Bulgaria, not later than September 27, and should, if possible, be in the French language.—(D.O.T.)

Telephone Material.—The Bulgarian Directorate of Posts, Telegraphs, and Telephones at Sofia invites tenders for:—(1) The supply of cables and other material, and the transference of the existing underground cables to the new telephone exchange. (2) The supply of the material and the work involved in the extension of the network of underground cables. (3) The supply of the underground and armoured cables, including the runnings of the cables through the tubes as well as effecting their connection to the boxes and the ends of the cables to the exchange, etc. This section also deals with the supply of lightning conductors with aerial cables, and other material. (4) The supply of iron terminal standards with cable racks (main distribution poles). Tenders must be presented in Sofia by October 16 (D.O.T.).

Copper Tubes, etc.—The Bulgarian Directorate of Railways at Sofia invites tenders for the supply of 1,500 kilos copper tubes, 8,000 kilos copper discs, 100 kilos brass wire, 4,950 kilos round brass rods, 2,750 kilos hexagonal brass rods, 50 square metres brass woven wire. Tenders must be presented at Sofia by October 7, and prices are required covering delivery c.i.f. Bulgarian port, Black Sea or Danube, or in Sofia. The estimated value of the contract is 1,351,000 levas. (D.O.T.)

India.

Copper Tubing, Iron Split Pins, etc.—The High Commissioner for India invites tenders for the supply of (1) Tubing copper, solid drawn (about 14 tons); (2) Pins, iron, split (1,650 gross), and screws for wood (43,250 gross); (3) Files, various (3,019 dozen). Forms of tender may be obtained from the Director-General, India Store Department, Belvedere Road, Lambeth, S.E.1.—September 29.

Railway Wagons.—The High Commissioner for India invites tenders for the supply of 3,000 railway wagons. Forms of tender may be obtained from the Director-General, India Store Department, Belvedere Road, Lambeth, S.E.1.—October 17.

Steel Sheet Piling.—The Calcutta Corporation invites tenders for the supply of 80,000 lineal feet of light section steel sheet piling of various lengths; also for the supply, delivery, and erection of a steel screw pile jetty on the river bank at Pulta, near Calcutta. Tenders for the former close on October 9, and for the latter on October 10.

Locomotives.—The South Indian Railway Company invites tenders for the supply of: 1. 46 metre gauge locomotives and six locomotive boilers. 2. 108 metre gauge wagons. 3. Bridgework.—October 8.

Shovels, Point Rodding, etc.—The High Commissioner for India invites tenders for the supply of:—1. Shovels, round nose, with handles, number—8,004; and shovels, stoking, with handles, number—3,000. 2. Cocks, bib, galvanised, ½-in. and ¾-in., number—2,500; and cocks, stop, galvanised, ¾-in. to 4½-in., number—1,634. 3. Point rodding, 1¼-in., solid, complete with bolts and nuts, feet—45,000. Forms of tender may be obtained from the Director-General, India Store Department, Belvedere Road, Lambeth, S.E.1.—October 6.

Egypt.

Electric Pump, etc.—The Engineer-Electrician-in-Chief, Electrical Service, Ministry of Public Works, Cairo, invites tenders for supplying and mounting an electric pump, accumulator plates, and a three-phase transformer at the Asile des Aliénés, Khanka.—September 30.

Consumable Stores, etc.—The Frontier Districts Administration, Alexandria, is inviting tenders for the supply of consumable stores, oils, and paints. Tenders, on the proper form, accompanied by a provisional deposit of 2 per cent. of the total value of the tender, should reach the Director of Stores, Frontier Districts Administration, Alexandria, by noon on October 10. The schedule is rather extensive and includes, among other goods, oils, paints, and varnishes, hardware, brushware, canvas, lamp glasses, leather, rope (manilla and wire), soap, etc. (D.O.T.).

NOTES OF THE WEEK.

Great Cry and Little Wool.

Never certainly in the history of the present generation has there been so great a cry and so little wool as during the past week in connection with the Turkish question. One can hold this view without in any way belittling the gravity of the situation, for the main difficulty has been the overlapping of the serious with the unnecessary. The only official facts of which the British public and, we may shrewdly suppose, the British Government had cognisance were that Mustapha Kemal's victory over the Greeks had been rendered complete by the capture of Smyrna, and that the town had been destroyed by fire, with the inevitable accompaniment of pillage and murder. Before the Allies, individually or collectively, had taken any steps to get into official touch with Mustapha Kemal Pasha, the British Government appears to have made up its mind that both the waterway between the Mediterranean and the Black Sea, which for convenience is referred to briefly as the Straits, and Constantinople were in imminent danger. It has not been made clear what ground the British Cabinet had for forming this conclusion. The Kemalists' quarrel was with the Greeks, and they had declared emphatically that they would never consent to Turkish territory being handed over to Greece; for the rest, they had asked for the termination of the Allied occupation of Constantinople, to which the Allies had already specifically agreed. As far as the Straits are concerned, both the National Pact and Kemalist treaties with neighbouring Governments have implicitly accepted an open waterway supervised by an international commission.

The Semi-Official Statement.

In view of the fact that the Straits separate Mustapha Kemal Pasha from Constantinople and Europe, that he has no naval transport, mines, nor siege artillery, and that the Allied fleets are strongly represented in the waterway, it would have been thought that the British Government, even if it had every reason to be suspicious of French policy, could have afforded to keep calm and to give Mustapha Kemal an opportunity of stating his intentions. Instead of adopting this course, however, a semi-official statement (intemperate to the verge of the hysterical) was published, in which it was stated that the demands of the Angora Government "involve nothing less than the entire loss of the whole results of the victory over Turkey in the late war," that "in view of the excited mood and extravagant claims of the Kemalists" it would be futile and dangerous to trust simply to diplomatic action, and that adequate force must be available to guard the freedom of the Straits "against a violent and hostile Turkish aggression." Reference was made to the reappearance of the victorious Turk on the European shore as likely to provoke a situation of the gravest character throughout the Balkans, and it was added that His Majesty's Government was addressing itself to Roumania, Yugoslavia, and Greece "with a view to their taking a part in the effective defence of the neutral zones." The Dominions were invited to send contingents to defend the Straits, and orders were given to the British Fleet in the Mediterranean "to oppose by every means any infraction of the neutral zones by the Turks."

Pertinent Questions.

No one would wish the British Government to be caught napping, and there can be no doubt that the appearance of the Kemalist Army in the streets of Constantinople might be followed by regrettable incidents. But ever since the issue of the semi-official statement the man in the street has been asking himself how the Kemalist Army could reach Constantinople with the British Fleet patrolling the Sea of Marmora and the Bosphorus, and how any action on the part of that army could affect the permanent status of the Straits, which at best or at worst must be settled round a table and not on the waterway itself. No answer has been given to these questions. Instead, official attention appears to have been riveted upon the small town of Chanak on the Asiatic side of the Narrows, which, it had been decided, was the key position of whatever might be the British Government's policy. The occupation of Chanak by a hostile force might incommode the free passage of the Straits, until warships intervened; but if there had been anything resembling the "violent and

Digitized by Google

hostile Turkish aggression" of the semi-official statement, its retention by British troops could only have provoked the collision with the Kemalist Army that it was in Great Britain's interest to avoid. As a matter of fact, the "violent and hostile aggression" so far has resolved itself into the appearance within the Chanak neutral zone of Turkish cavalry, who were approached by a British patrol with the request to withdraw, and subsequently withdrew outside the zone.

Clouding the Issue.

As the days passed the war babel grew louder. In the organs of Downing Street the terrible danger of war was the meat of the sandwich with which the public was being fed, the Government's desire for peace serving as the bread. The yellower Press waited "for the guns to go off" and grew hoarse in efforts to stop a war that had not begun. Fortunately, in this turmoil two important people kept their heads—the Marquis Curzon and Mustapha Kemal. The latter lay low and said nothing; Lord Curzon went to Paris for the purpose of extricating the British Government from an impossible position and of tempering its provocative panic, with which he was not personally associated, with common sense. The service that he has rendered the country cannot be overestimated. The real danger was that Downing Street, having imagined danger where none existed, would provoke war by a refusal to listen to reason. If no attack were made on the Straits, a cold douche would be administered to the alarm over the menace to the waterway; but it would still be possible to drive the Kemalists to desperation by one means or another. There was only one point on which Mustapha Kemal insisted, and for which it could be taken for granted that he would fight—the evacuation of Eastern Thrace by the Greeks. In regard to this question the mouthpieces of Downing Street assured their readers that the Government was "adamant"; to promise Eastern Thrace to Mustapha Kemal would render a Peace Conference useless, the world was solemnly told.

Invitation to Mustapha Kemal.

In Paris, Lord Curzon has achieved the double object of restoring co-operation between Great Britain and France, and of making sure that the Turks shall be approached by the Allies in accordance with the practices of diplomacy and not in the language of Limehouse. A joint Allied Note has been addressed to Mustapha Kemal inviting him to meet the Allies in a conference to be attended also by Japan, Roumania, Yugoslavia, and Greece. He is assured that the three Governments regard with favour the desire of Turkey to regain possession of Thrace as far as the Maritza and Adrianople, and that they are willing to support the allocation of these frontiers to Turkey, as well as the admission of Turkey to the League of Nations. The Greek forces—in Thrace—are to be withdrawn to a line to be fixed by the Allied Generals, in agreement with the Turkish and Greek authorities. Mustapha Kemal, or, rather, "the Government of the National Assembly of Turkey," to whom the Note is actually addressed, is asked to undertake that the Turkish Army during the negotiations will not penetrate the zone of which the Allied Governments have proclaimed the provisional neutrality, and will not cross the Straits or the Sea of Marmora.

The Kemalist Demands.

It will be seen that the Note concedes the main point for which Mustapha Kemal was known to have stipulated—the surrender of Eastern Thrace—although the Allies have preferred to leave the concession in the form of an undertaking to support the surrender at the Conference. At the moment of writing, the Turkish reply is not known; but there has been nothing in the attitude of Mustapha Kemal to suggest that he will not accept the Allies' invitation. For all the attempt to represent him as a grave menace to the British Empire, his claims could not be regarded by any dispassionate observer as excessive in the circumstances. On the ground that he had settled on the battlefields of Asia Minor all points at issue between Turks and Greeks, he demanded that the Greeks should evacuate the remainder of the Turkish territory occupied by them under the Treaty of Sèvres, and he contemplated further hostilities only in the event of an attempt to thwart Turkey on this point. Mustapha Kemal's power in Asia Minor has been based solely and entirely on his undertaking to put an end to the Greek occupation of Turkish territory. If he proved false to that trust, he was a doomed man. Consequently, he could not make peace, nor agree to an armistice while a Greek army remained on Turkish soil. The only risk of war between Great Britain and the Turks lay in the possible refusal of the British Government to realise this aspect of the situation.

Mr. Lloyd George's Apologia.

In a statement made last Saturday to representatives of the Press, Mr. Lloyd George sought to clear away the "misapprehension" which he considered had arisen regarding the British Government's action. His long speech, however, only served to show that the Prime Minister, as was well known, had no real grasp of the Near Eastern question, and, in addition, had not understood the public attitude in the recent crisis. British action, he declared, had two objects, to preserve the freedom of the Straits and to prevent the Asia Minor war from spreading to Europe. But he made no attempt to explain how the freedom of the Straits was in danger. He dilated as usual on Turkish atrocities, and he called the Asia Minor campaign, for which possibly he bears more responsibility than any other single individual, an "exceptionally horrible war"; but he adduced no evidence to show that Mustapha Kemal had threatened the freedom of the Straits, still less to justify the expressions used in the semi-official statement of a week previously, such as "extravagant claims of the Kemalists," or "violent and hostile Turkish aggression." The only point that really exercises the public mind to-day is that, if the British Government had drafted the Allied invitation to Mustapha Kemal a week earlier instead of the intemperate semi-official statement issued from Downing Street, all the fuss and the loss of Government prestige would have been avoided.

The Better Way.

Some justification has been found for the Government on the ground that only a very firm line of action, bordering upon the bellicose, had any chance of bringing the Kemalists to reason. To this the reply is that there was no evidence—the Government, at least, has produced none—that they were going to be unreasonable. In view of the fact that their worst unreason would not have worried us overmuch, so long as the British Fleet remained in the Straits and Bosphorus, it would seem to have been bad statesmanship to propound a policy that could not be enforced, such as warning off the Turks from the neutral zone, to provoke them to do their worst by weakening the hold of the Angora moderates on the extremists, and to put Great Britain in the wrong with Moslems throughout the world. The nightmare, we may now trust, is over. Certainly the world seems nearer a Near Eastern

Digitized by Google

settlement on the lines consistently urged in these pages—the only lines on which peace could be just and durable—than it has been at any time since the Armistice. There are still pitfalls ahead, but the Entente Powers have taken the first step in allowing their own judgment to prevail over the Balkan States' estimates of one another.

The Indian Moslems.

It was inevitable that the Kemalist successes in Asia Minor should react upon the feelings of the large Moslem population of India, and, apart from the language of some extremist organs, there is nothing in the news which has been received so far to justify any criticism of the manner in which those feelings have been displayed. It may be hoped that this attitude will be maintained, for, as we read the situation, anything like violence in India would react most injuriously on opinion in this country, which at the moment is prepared to accept a settlement favourable to the saner Indian views, though not going so far as the intransigents urge. It is noteworthy that some of the cabled messages insist on the abstention of the Hindus from the demonstrations organised by the Moslems. Early last year it was the fashion to talk as if the hatchet had been finally buried by the two communities, but the events which have intervened in more provinces than one have shown that among the people, if not among the politicians, the old antagonism still survives, and, while we have no wish to pose as prophets of evil, we fear that an anxious time is in store for the hard-worked officers whose business it is to keep the peace, and whose usual reward for doing so is little more than the absence of publicity.

Anxiety in Constantinople.

It is natural that anxiety should prevail in Constantinople, because a vacillating policy must necessarily provoke the worst fears. Now that it is seen that the British Government has done the right thing in abandoning an untenable position in regard to Thrace, while emphasising the necessity of the freedom of the Straits, we can only hope that British residents will be reassured. The correct attitude that Mustapha Kemal Pasha has so far maintained is a strong point, as he must realise now that all Turkish scores against the Greeks are settled with the evacuation of Thrace. There is no reason to suppose that any of the Allied Governments will sacrifice the personal safety of their nationals when they agree to modifications of the Capitulatory system. In the proposals of the Paris Conference last March an indication was given of the points in that system that might be modified, but it was not suggested that the safeguards of the judicial Capitulations should be abandoned.

Rounding Off the Settlement.

With the return to Turkey of Eastern Thrace the proposal of Bulgaria's Prime Minister that Thrace as a whole should be made an autonomous State under the League of Nations falls to the ground; but if Greece does not see her way to handing back Western Thrace to Bulgaria in order that the latter may have the access to the Ægean Sea, given her in 1913, it would still be possible for the Allied Powers to round off the Near Eastern settlement, in the interests of all the Balkan States, by resuming the possession of Western Thrace that the Treaty of Neuilly gave them, and entrusting it to the League of Nations. The territory was handed over to Greece when the latter received Eastern Thrace, and on the condition that Bulgaria was accorded an outlet on the Ægean. This stipulation has not been carried out, and under the actual conditions obtaining it will always remain a dead letter for all practical purposes. An autonomous Western Thrace would obviate a common Greco-Turkish frontier, and would probably introduce a small enclave of peace and contentment in the restless Balkans. Given a settlement on these lines, we do not despair of an era of unprecedented quiet in South-Eastern Europe. All the countries are war-weary, but with unrest in any quarter the different Governments feel obliged to be on the *qui vive*. Hence the alarms and excursions.

Midsummer Madness in Bulgaria.

The exemplary policy pursued by Bulgaria abroad is unfortunately not reflected in her domestic policy. An ugly incident is reported from Philippopolis, where Major Neate, the British officer on the Allied Military Control Commission, was arrested while performing his official duties, and detained in prison. Apologies have been tendered, but it is hardly likely that the matter will end there. Again the decision to place on trial all Opposition ex-Ministers with a view to determining their responsibility for Bulgaria's part in the war will certainly not enhance the Agrarians' reputation for political sagacity, but will expose them to the charge of political vindictiveness. The episode in connection with the Tirnovo meetings, when some of the ex-Ministers were nearly lynched, suggests party politics run mad, instead of a country trying to compose its domestic quarrels, in order that it may bring its best brains and all its energy to the task of Bulgaria's rehabilitation.

THE WEEK AT HOME.

Monday Evening.

The European Crisis.

The newspapers have been full of the European crisis this last week, but there has been little visible excitement. The public has followed events day by day with eagerness, albeit with a certain feeling of puzzledom at the quick changes of the Downing Street orchestra, but the real reactions on political opinion will necessarily come later.

With the best will in the world, even the Coalition Press has been unable to put up an enthusiastic, far less a logical, defence of the Government's policy. To the man in the street, who is unacquainted with the niceties of the Near Eastern

situation, it appears to have been compounded of an unfortunate mixture of bluff and surrender, and the justification for either or both these attitudes fails entirely to appear.

Mr. Lloyd George's speech on Saturday, grave as it was in tone, has not brought conviction—it contrasts too sharply with what is already known as the "Winston note" and the S.O.S. to the Dominions a week before to carry quite the weight a Prime Ministerial pronouncement should possess, and it seems in striking conflict with the terms of the Allied Note published this morning, which involve a backdown all round to Turkey.

In ordinary circumstances Parliament could be relied upon to thresh out the whole question, upon which the country would eventually pass a considered judgment. But Parliament does not meet until November; few of its members are familiar with the terrain; and fewer still want to see the Government dismissed.

The Independent Liberals, indeed, who have been badly gravelled for topics lately, obviously hope to make some capital out of the Government's inconsistencies; since they are now hastily arranging an autumn campaign, of which there was no mention whatever ten days ago. But one's experience is that the Wee Frees of to-day lack fire and carry no conviction. A Gladstone would set the whole country ablaze with the story of Smyrna, but nothing of the kind is to be expected from the frozen rhetoric of Mr. Asquith and Sir John Simon.

As to the Labour Party, they have been nobbled. One day last week they went to Downing Street, by invitation; the Prime Minister gave them an exposition; and when the deputation came out it was found that he had bound them to silence. What he said remains a profound mystery, but it is an interesting comment on Labour's late denunciation of secret diplomacy. This particular episode will hurt the Labour Party more than the Government, which, in spite of its blunders, seems immortal.

By Air to Berlin.

The air service to Berlin was inaugurated last week, the time of flight, including stops at Amsterdam and Bremen, taking seven hours, against twenty-three by rail and steamer. The cost is at present rather higher than that by the older route, but this will no doubt be reduced in time—indeed, the fare to Amsterdam was lowered last week. That is not, of course, the only consideration. "The business man," said the head of the line, "will probably first send his subordinate, and when he finds the man returns alive will probably go himself. That is how air-travel will become popularised." As a fact, there is a very high percentage of safety in air-travel; and this is steadily overcoming prejudice in every direction.

The Farmer's Woes.

There has been some talk lately of the evil condition of agriculture, and the farmer's woes are again being discussed in the papers. The heavy fall in produce prices has, of course, affected them, and it is the fact that many farmers bought their land at absurdly high prices two years ago when estates were being broken up—for which they have only themselves to blame—the tremendous competition to get land at that time having forced it up beyond the true economic value. But most of the farmers I know are doing very well. They are not making money, of course—no farmer will ever admit the word profit into his vocabulary—but they are keeping going very well, and steadily improving their farms. The present year has not been as good as 1921, which was an *annus mirabilis*, but agriculture has done better than it expected. (It generally does.)

The only man who is really entitled to pity is the smallholder. Sir A. Griffith-Boscawen, the Minister of Agriculture, who really knows his job—quite an unusual thing for that particular department—has said a word recently in favour of that unfortunate being, but the plain fact is that the smallholding is not an economic proposition. It is an attempted revival of the old type of small farm, which died out a hundred years ago, and has now become more than ever impossible with the increasing dominance of machinery.

The steam plough, the tractor, the reaper are now essential to good farming, but they all mean more capital sunk, and it practically takes no more capital to farm two or three hundred acres than fifty. But the small farm cannot grow sufficient stuff to get a profit on the preliminary outlay of capital; the small farmer, as a rule, is pressed for money all the time, and one bad season ruins him; and, moreover, he is less able to take advantage of the scientific knowledge which is now increasingly available and requisite. The tendency is all for the big mixed farm, run by the practical man with a motor-car, some knowledge of chemistry and mechanics, and a shrewd eye to the economics of crops and stocks. This type of man is making money quietly and steadily, and saying nothing about it. It is his unsuccessful competitor who talks.

Wireless Concerts.

In a little country town last week I paid a shilling and was admitted to the vicar's garden to listen to a wireless concert in aid of some local charity. (The excellent padre remarked with a sigh that perhaps a wireless sermon would even tempt people to come to church.) The concert, which originated in Marconi House, seventy miles away, was so admirably done that I remained for the evening performance. If this idea spreads, as it should, it will do a great deal to brighten up village life, and I really cannot see why it should not in due time be used for lectures and dances. Political speeches should be barred, of course—they might jam the instrument.

There have, however, been mysterious delays in the promised broadcasting, and something—or many things seem to have happened to the negotiations between the Postmaster-General and the other parties concerned. Unkind folk are suggesting that the newspapers do not look very kindly at the prospect of what Mr. H. G. Wells once called "Babble machines," but the short answer to that is that people in these enlightened days buy newspapers for the insurance coupon, and not to read them. But there is something to be said for the delay in broadcasting. In America, where they dispensed with licences and regulations, and everybody was a law to himself, every message gets jammed, and anarchy reigns supreme.

Ocellus.

The Near and Middle East.

From Our Own Correspondents.

EGYPT.

Cairo, September 15.

Conspiracy Prosecution.

The four men accused of complicity in the attack made on Hassan Farghal, the informer in the case of conspiracy against Sarwat Pasha, have been brought before a military court on a charge of possessing arms in contravention of the proclamation. The case has lasted six days; numerous witnesses have been called, and the evidence of the handwriting experts for the prosecution has been contested by the defence. In the course of the prosecution, Mr. Maxwell showed that one of the accused had written a threatening letter to Hassan Farghal some days before the attempt on his life, and that three at least of the accused were members of a society for killing Englishmen, and had had in their possession a revolver of the same make as those used in some of the recent outrages.

Egypt's Foreign Representation.

I understand that it will not be long before the Egyptian Government appoints its diplomatic representatives in London and Paris. As may be remembered, one of the concessions made by the British declaration of February 28 last was the revival of the Egyptian Ministry of Foreign Affairs, which had been merged in the Residency on the declaration of the British Protectorate in December, 1914, with power to nominate Egyptian diplomatic representatives. The Egyptian Government has now come to the conclusion that the time has arrived for the organisation of its representation abroad, and steps are being taken to establish Legations, starting with London and Paris. Various names have been mentioned, but it would serve no useful purpose to repeat them, as there is no means at present of obtaining confirmation or the reverse. One thing is, however, certain, and that is that the Egyptian indicated in every way for the London Legation will not be able to go there. Adly Pasha Yeghen has throughout been regarded as the ideal representative of Egypt in the British capital, where he won such golden opinions last summer. Unfortunately, the political situation in Egypt is such that his presence is more urgently required here, where by common accord he is regarded as the only man who commands the respect of all parties to the extent of being able to carry through the reforms which the country requires.

Simultaneously with foreign representation, the question of Egypt's admission to the League of Nations is being considered by the Egyptian Government, and in the very near future an official application to this end will be made.

The Tripoli Frontier.

Sir Ibrahim Fathy Pasha, Minister of War, has returned from his mission to the Western frontier, and his report will be very shortly handed to the Egyptian Government. I understand that the Minister of War is very satisfied with the result of his trip. Whenever occasion required that he should meet Italian officials, he was always treated with the greatest courtesy. The Egyptian Government, I believe, expects no difficulties to supervene when official negotiations for the delimitation of the frontier between Tripoli and Egypt are opened next month with Italy.

The Cotton Tax.

There has of late been considerable agitation in circles interested in cotton production with regard to the tax on ginned cotton. This tax was introduced in 1920, in order to make the cotton producers contribute to the alleviation of the conditions of the urban population, who were suffering from the high cost of flour brought about by the rise in cotton prices, and the Egyptian Government looked to the proceeds of this tax to reimburse it for part of the loss it was incurring on the sale of wheat and flour to the urban population.

Since then cotton prices have, of course, dropped, and in many instances the tax reacts somewhat harshly on the cultivators, who in this case have to pay it. The Egyptian Government has not been able for obvious reasons to abolish the tax, as so many people demanded; but it has endeavoured to meet the situation by reducing the rate from £T35 to £T25 per cantar of ginned cotton and by exempting Scarto, which is the lowest grade of cotton.

An Economic Council.

An interesting innovation has just been made by the Egyptian Government in the creation of what is to be known as an Economic Council attached to the Ministry of Finance. This Council will be entrusted with the duty of studying various economic questions which may arise from time to time, of carrying out the research which such study may necessitate, and generally of advising the Minister of Finance with regard to the manner in which the financial and economic resources of the country can best be developed, while reconciling the interests of the State with those of the industrial and agricultural communities and encouraging private enterprise. There are innumerable financial and social problems which must be solved in order properly to develop the country and cope with the requirements of a rapidly growing population, and Sidky Pasha, Minister of Finance, has very rightly judged that the only hope of satisfactorily dealing with these problems lies in seeking the advice and drawing on the experience of the experts available in the country. For this purpose he has united on the Council, which will sit under his chairmanship, men who are recognised as experts in one or other of the branches of economic activity. Thus, in addition to such *ex-officio* members as the Egyptian Under-Secretaries of the Ministries of Finance, Education, Communications, Agriculture and Public Works, he has nominated various Egyptians of note and recognised ability in economic matters, and such leading members of the non-official community as Mr. Hornsby, Governor of the National Bank of Egypt; Henry Naus Bey, Director-General of the Sugar Company; Monsieur Miriel, managing director of the Crédit Foncier Egyptien; and Monsieur Laskaris, general manager of the Banque d'Athènes.

The creation of this Council has been exceedingly well received, particularly in European circles; for the fact that nine out of the twenty-three members are Europeans constitutes an assurance to the European community that the Egyptian Government is desirous of associating the latter with the study and execution of the economic development of the country, as well as a guarantee that its interests will always obtain a proper hearing.

PALESTINE.

Jerusalem, September 10.

Tribal Incidents.

Interest during the past week or two has turned chiefly in the direction of the activities of the tribes beyond Jordan. Some very effective propaganda has been done by anti-Zionist agitators from this side, and the results have been prompt. About four weeks ago the Arweli tribe crossed the Jordan in some force on one of their usual errands of cattle-lifting. This particular visit would seem to have been a return call in search of some of their own cattle which had been "removed" from their side. Normally, these raiders do their business quickly and quietly, and by the time the hue and cry is raised and the police brought to the spot, the raiders are far away in safety. This time they had the misfortune to run up against the higher gendarmerie and, what was more unfortunate for them, armoured cars. The result was that several of the Arweli were killed, many more wounded, and a very big haul of captured camels. The sequel—whether serious or simply humorous still remains to be seen—came about ten days ago. A representative of the damaged tribe called on the Governor of Tiberias with an ultimatum to be answered within twenty-four hours. The tribe was to receive as compensation to the relatives of the dead men, and for the lost camels, the sum of six thousand pounds; another six thousand was also demanded from the Government of Palestine for permission to construct a railway through the Arweli sphere of influence, instead of the three thousand which had previously been fixed. After conferring with Jerusalem, the Governor of Tiberias returned an emphatic negative to these proposals, and a warning that, if the tribe ventured again to cross the frontier, they would find that adequate precautions had been taken. The Arweli Ambassador went on to dilate on the fact that they were not demanding such compensation from the British Government. That was not at all their intention. The damage, he averred, had been committed by the Zionists who had cowardly concealed themselves in the treacherous armoured cars, which had been mainly responsible for the maltreatment of his tribesmen. And since the Arweli had no personal dealings with these Zionists, the British Government must act as go-between and undertake the responsibility of levying the amount of the compensation on the Jews. The Governor's explanation that the Jews had nothing whatever to do with the case, and that the British police forces shouldered the entire blame, does not seem to have carried conviction. The Ambassador allowed four days' grace, and then he threatened the full wrath of the Arweli. Nothing seems to have happened since then, but the adjoining Jewish colony of Minhamia has been warned to be particularly on the alert for trouble.

A less serious event, though startling enough in its way, was the feat accomplished by another Transjordanian tribe, the Beni Sakhr. Considerable numbers of these contrived to cross the frontiers and penetrate into Palestine, some groups to the north, Nablus way, and others farther south, by Beersheba, meeting short of Jaffa. They succeeded in getting back before serious harm was done by them or to them. Their movements must have entailed excellent staff work. The reason for their adventure is rather obscure. It is supposed that they imagined the fellahin to be in such a state of anti-Zionist unrest that their presence would bring around them thousands of supporters, and that they would see what they would see. But the country remained perfectly peaceful, and the prevalence of law and order must have cast a chill in the souls of the Beni Sakhr.

These two little affairs, added to the revival of the Wahabi tribesmen, make it appear that Transjordania may well become a considerable thorn in the flesh of an industrial Palestine. There are some who would make our flesh creep with the information that Ibn Saud, the Wahabi Emir, is in the pay of Mustapha Kemal, and that the French are preparing to create free or semi-free Arab States to the north and north-east of Palestine—after the model of our conduct in Transjordania and Iraq—with Kemalist governors.

Arabs and the Constitution.

The new Constitution for Palestine was published in the *Official Gazette* on September 1. The contents were more or less accurately known beforehand, so its appearance was not productive of any marked stir. Arab opinion—so far as it is articulate in the Moslem-Christian Association—is completely antagonistic to it. The Arabs look upon it as a complete betrayal of their rights, and a quite deliberate handing over of the country to the Jews. They argue that the Legislative Assembly can never be anything but a helpless tool in the hands of the High Commissioner—to their mind utterly Jewish and utterly Zionist—since his wish must always, according to the Constitution, be backed by a majority of fourteen against ten. For this reason, the President of the Executive Council of the Arab Congress has issued a further proclamation urging non-participation by all Arabs in the elections to the Legislative Council.

Jewish opinion is inclined to accept the Constitution, but with a considerable measure of reserve. They consider that they have a genuine grievance. For example, *Ha-Aretz* of to-day writes: "In itself the Statute is not bad, and con-

tains the maximum of freedom and self-government that can possibly be given to such a tiny, undeveloped country . . . but . . . the entire Palestinian Constitution is drafted as though the proclamation of the (Jewish) National Home did not exist. . . . If we omit two sentences, there is not left the slightest hint that the Jews in Palestine are promised a thing that is not promised to them in any other country, great or small, in East Europe, as, for example, in Poland, Lithuania, Roumania, Austria, Esthonia, and the like." The writer goes on to complain of the lack of recognition of rights for women, and the high age, twenty-five, required in a voter. (We are very puzzled to know how this matter of age is to be adjudged. It is rare, indeed, to find Arabs who know their age exactly. Registration of births is an innovation scarcely more than a couple of years old.) Exception is taken to the fact that in the Jewish National Home only two of the twelve elected non-official members of the Council must be Jews; whereas, according to Jewish views, if the measure of Jewish influence in their National Home is to be limited by their numerical strength and proportion to the whole population, even so they represent something between a fourth and a fifth of the total.

A Question of Statistics.

In this matter of numbers, the Jews take strong exception to the recently published figures issued by the Government, which would make the number of Christians slightly more than a seventh, and the Jews slightly less than a seventh, of the total of Moslems. The Jews argue that these figures are based on a rough estimate made in O.E.T.A. days, when the almost exclusively Moslem Transjordanians, from Akaba to the Hauran, and Syria, from Beyrout to Tyre and Sidon, were included within the totals. The writer of the article in question considers that in the present attenuated Palestine there are no more than 400,000 Moslems, 65,000 Christian Arabs, and no less than 100,000 Jews.

In another direction dislike is expressed at the excessive privileges extended to foreigners, more, it is argued, than they possessed under the terms of the Capitulations in Turkish days. The Jews in their suspicion—not unjustified—of one another, think that these foreign rights will militate strongly against Jews assuming Palestinian citizenship, and so failing to pull their weight as full members of a Jewish Palestinian National Home.

A Boycott in Abeyance.

Little has so far happened in the matter of the Anti-Jewish trade boycott resolved upon by the Nablus Arab Congress; and it looks as though nothing will. The one definite conclusion reached seems to be that it must not be a boycott of Jewish purchasers—Jewish money need never be refused—but of Jewish sellers. Since the bulk of Jewish trade lies in the direction of goods of foreign manufacture, for the consumption of people of Western origins and tastes, or articles of necessity or semi-luxuries for newcomers to the country, the vast majority of the Arab population is not in the least affected. The boycott, if it materialise, might perhaps serve to set free some of the useless, idle capital of certain of the wealthier Arabs, in the opening up of Arab commercial ventures to replace Jewish concerns. But that is all clear gain to the country at large. The fundamental fact would still seem to remain—that the patriotism of the Arab is not proof against selling his land at a good price to the Jews.

GREECE.

Athens, September 9.

Yesterday and To-day.

All is not well with Greece just now; in fact, things could not be worse. But two years ago Greece was an all-powerful country, respected by her many friends and feared by her enemies. Her trade was flourishing, and her financial position better than that of many of the Allied nations. Her army was firmly established in Asia Minor, and the Greek flag was proudly flying in Constantinople between the Union Jack and the Tricolor. And to-day! To-day Hellas of two years ago is nothing more than a dream—a long sweet dream! The majority of her friends have abandoned her—nay, more than that—they despise her, and her enemies laugh at her. Her trade is dead, and the country on the verge of bankruptcy. Her most hated enemy is on the heights dominating Smyrna, and her army, which for the last ten years kept its head very high, is to-day fleeing before the troops of Mustapha Kemal. Her generals have fallen into the hands of the enemy, and the capital of Ionia is guarded, as far as possible, by foreign bayonets. Thousands of Christian refugees, mostly women and children, after tasting the sweetness of freedom, are crowding on the quay of Smyrna waiting for the boats which will convey them to safety.

These are black days indeed for Hellas. But she has still faithful friends, who will surely not refuse to help her in this her hour of need.

The Situation.

At the time of writing Greece is without a Government. MM. Protopapadaki, Gounaris, and their colleagues, realising at last that even their most faithful followers have turned against them, bowed to the inevitable, and the Premier handed in the Cabinet's collective resignation to the King, who immediately entrusted M. Calogeropoulos with the formation of the new Cabinet. It will be remembered that M. Calogeropoulos was Greece's first delegate at the London Conference last year, and he, after conferring with M. Triantafyllakos, ex-High Commissioner at Constantinople, and M. Boussios, the leader of the group of Macedonian deputies, informed His Majesty that he was willing to undertake the difficult task. M. Calogeropoulos, however, did not foresee another difficulty—that of finding his new Ministers. Many of his political friends whom he approached on the subject refused point blank to have anything to do with the new Government, while others declared that they would afford their co-operation only on condition that M. Venizelos were officially asked to represent Greece abroad at the coming peace conference. As was only to be expected, this was rejected, and thus still another opportunity for the reconciliation of the two rival parties was lost. Finally, M. Calogeropoulos, finding himself in an "impasse," declined the mandate. It is now rumoured that an offer will be made to M. Triantafyllakos.

The military situation is naturally the main topic of discussion, and although very little official news is communicated to the Press and the censor is unusually busy, it is now beyond doubt that the Greek Army in Asia Minor has suffered a severe defeat. Needless to say, that the capture of General Tricoupis was one of the chief factors in lowering the "moral" of the Greek troops. Although this general was taken prisoner on September 2, the Government appointed him Commander-in-Chief on the 4th, and did not receive the disheartening news of his capture until the morning of the 6th.

The army is now evacuating Asia Minor as fast as it can, and the troops, except those who come from the provinces of Attica and Bœotia, are being transported to the islands of Samos, Chio, and

Mitylene, whence they will be granted long leave home. This was, indeed, a wise move of the authorities, who foresaw trouble had the men been allowed to proceed to Athens or Salonika. As it is, each man will be sent straight home from the particular island in which he happens to be.

The Refugees.

The question of the refugees is one which will undoubtedly cause a good deal of anxiety to the new Government. Many thousands of these have already arrived, and many more are expected within the next few days. Heaven only knows where all these unfortunate victims of the war will be accommodated, and how they are going to be fed. To the British and French diplomatic representatives who called to-day on the Director of the Foreign Office, M. Lagoudakis, it was pointed out that Greece was mostly depending on the Allied Powers to supply the means of transporting the refugees to this country and for their maintenance on arrival here. It is believed that both the British and French Governments are doing all they can to assist Greece in the matter.

ROUMANIA.

Bucharest, September 13.

The Coronation Programme.

The local Press is keenly discussing whether the Coronation will or will not take place this autumn, and, in case it should come off, what attitude the Opposition will take up. The Executive Committees of the various political groups are holding meetings in order to determine their prospective demeanour. All give expression to their feelings of loyalty and devotion to the Crown and the entire Royal Family, but, at the same time, give vent to their resentment against the present Government's intention of presiding alone over the Coronation celebrations instead of giving this historic occasion a more national character. The Transylvanian National Party has already intimated—for stated reasons—that it will abstain from attending the Coronation fête. The members of this party have further decided to call a mass meeting, to be held next month at Alba Julia, as a prelude to the campaign they intend to start for the overthrow of the Government.

Government circles, however, are in no way impressed by the menacing attitude of the Opposition, and much less by their prospective abstention from the Coronation. The Government Press recalls that a similar course was followed by the Opposition when King Charles was crowned. The Conservative Party—then in Opposition—also abstained from attending the Coronation festivities from personal and political motives against the Liberal Party, then at the helm; nevertheless, this action did not prevent the Coronation from being carried out in all its splendour, amid the rejoicing of the entire nation.

Parliament.

At the last Cabinet meeting it was decided that both the Coronation and the extraordinary session of Parliament should take place during the month of October, but so far the exact dates have not been definitely fixed, nor is it as yet decided whether this short Parliamentary session will be held before or after the Coronation.

It is announced that the Government purports to bring before Parliament, besides the urgent Bills to which reference was made in previous letters, the following two projects of law: (1) To make the railways an autonomous institution, and (2), to increase the Civil List of the Royal Family in order that it may correspond with present needs.

Civil List.

It has been an open secret for a long time, and frequently discussed by the Press and political circles, that the Civil List of the Royal Family—which has remained unaltered since before the war—no longer corresponds with present exigencies. It is, further, a well-known fact that the private purse of the King—besides being considerably reduced since a large part of the Crown domains have been divided among the peasants—has had to stand many a strain on the occasion of manifold Court functions.

It was thus tacitly agreed among the various political parties that this abnormal state of things should be remedied at the first opportunity, and that the Crown should be endowed with adequate means in accordance with present requirements, having regard to the enlarged territory and increased population, not to mention the high cost of living and the depreciation of the Roumanian currency. This increment of the Crown income by Parliament will be hailed by the nation as a small token of its devotion and loyalty towards its Sovereigns.

Marshal Pilsudsky's Visit.

A slight change is made in the programme for the reception of Marshal Pilsudsky on the occasion of his visit to Roumania. Contrary to previous arrangements, he will pay his visit to King Ferdinand at Sinaia instead of at Bucharest. Poland's President will set foot on Roumanian territory at the frontier station "Grigore Ghica" in the afternoon of September 13, and will proceed by special train straight to Sinaia, where he will arrive the next morning. At Sinaia station he will be received by the King and Queen and other members of the Royal Family, as well as by the Cabinet Ministers and other high officials. Marshal Pilsudsky will be accompanied by the Polish Ministers of War and Foreign Affairs. His stay at Sinaia will last two days. In honour of the distinguished guest, a military parade will be held and a gala dinner will be given to him, followed by a concert. Very important political and military questions concerning the two States will be discussed.

General News.

Owing to the events in Asia Minor, the Crown Prince of Greece left Sinaia suddenly for Athens last Wednesday. Princess Elisabeth is staying on in Roumania, and will spend a month at Constantza in order to complete her convalescence.

The devastating fire, which was raging for over ten days in the forests near the famous Hercules Baths (Banat), was fortunately extinguished by the timely rains which fell a few days ago. Great fears were entertained that the renowned baths, with all the premises and installations, would have been consumed by the flames. No human efforts could have stemmed the process of destruction. The origin of the fire was due to a slight neglect of an unknown shepherd, who, on returning home in the evening with his flock, forgot to put out the small fire which he lighted during the day to prepare his meals. The smouldering embers, kindled by the then prevailing wind, set fire to the surrounding dead leaves, spread to the trees, which were very dry owing to the protracted drought, and finally embraced an area of about 150 hectares of forest.

BULGARIA.

Sofia, September 21.

The Tirnovo Riots.

Those people who predicted that the political meetings due to be held at Tirnovo on the 17th inst. would pass off quietly have been sadly mis-

Digitized by Google

taken. The trouble began in this way. On the evening of the 15th the leaders of the Bourgeois *bloc*, MM. Malinoff, Theodoroff, Daneff, and Madjaroff, left Sofia by train for Tirnovo. In the same train travelled M. Daskaloff, Minister of the Interior, accompanied by several Government officials. There were also a number of newspaper correspondents on the train.

Even at Sofia station political feeling was running high, but as the train continued its journey matters became steadily worse. At Mesdra, a station three hours from Sofia, a large body of Agrarians had assembled, and the rival parties indulged in wordy recriminations. It was now past midnight, and at every station along the route the scenes became livelier and livelier. At last the Agrarians, infuriated by nobody quite knows what, decided to arrest the Bourgeois leaders. They placed guards in the coach in which the former Ministers were travelling, and allowed no one to get in or get out. When M. Daskaloff was informed of what was going on, he endeavoured to secure the release of the Bourgeois leaders, but without success. The temper of the crowd had now risen to an extent impossible to control. Shortly afterwards, the news spread that the crowd had decided to try the former Ministers on the charge of having been guilty of Bulgaria's participation in the Balkan and World Wars. At this stage M. Daskaloff again interfered, but again in vain. When, however, he heard that at the station of Levski the Bourgeois leaders were to be taken out of the train and summarily lynched, he succeeded in securing the attention of the crowd to an impromptu speech. This speech was thoroughly demagogic in tone, the Minister himself saying that the Bourgeois leaders deserved to be punished, but adding that justice would not be served if the Bourgeois leaders were executed on the spot. He also reminded the crowd of the deplorable effect such an execution would have abroad. In fact, by judiciously playing on the minds of his listeners, he succeeded in averting a catastrophe. When the train reached Tirnovo the situation became even worse. Huge crowds of peasants were assembled in and around the station. These crowds were also in a dangerous mood, and M. Daskaloff was forced to make several speeches, during which he pledged the Government to bring to trial all the members of the 1913 and 1918 Cabinets.

Meanwhile the Bourgeois leaders had been conveyed to the police station, where they remained until yesterday. They have now been brought to Sofia, and as I am writing, news is forthcoming that they will be released on parole until December 30. On this date a referendum will be taken throughout the country for the purpose of deciding their fate. The Sobranye is being assembled immediately, and a law will be drafted which will provide for the necessary measures.

The Actual Meeting.

Apart from the disorders immediately connected with the Bourgeois leaders, there was on September 16 and 17 a certain amount of guerilla warfare between the Agrarians and the Bourgeois. This took place mainly round Tirnovo and Gorna-Orechovitza, and it is understood that the casualties run into several hundreds. No meeting was held by the Bourgeois, but M. Bouroff, ex-Minister of Finance, and a leading Narodniak, gathered round him at Gorna-Orechovitza a force which is estimated at between 2,000 and 5,000. Rumours regarding his intentions are numberless, but although in the lack of definite information it is dangerous to prophesy, it is not expected that he will be able to accomplish anything serious.

The Effect in Bulgaria.

The news of the Tirnovo disturbances was received with stupefaction in Sofia. For a long time feeling between the Government and the Bourgeois *bloc* had been running high, but no one imagined that matters would so quickly come to a head. The moment, however, was opportune insomuch that two political meetings representing two entirely opposite shades of political opinions had been organised on the same day and at the same place. Moreover, the harvest is finished, and there are a number of people in the country without any definite occupation. Although the disturbances were purely internal ones, it is nevertheless feared that such disturbances, coming at a time when Bulgaria was hoping to obtain a favourable settlement regarding her outlet to the Ægean Sea, cannot fail to produce a bad impression abroad.

A British Officer Arrested.

On the top of all this it has just been announced that Major Neate, the British Representative on the Inter-Allied Military Organ of Liquidation, has been summarily arrested by the Bulgarian police while engaged in his duties. Full details are not yet to hand, but it is known that Major Neate was wearing uniform at the time, and in addition carried papers from the Bulgarian Ministry of War, which rendered impossible the chance of his identity being mistaken.

ALBANIA.

Tirana, September 3.

The Reopening of Parliament.

The Chamber of Deputies assembled as expected, and with the customary ceremony, on the morning of the first of the month. The British Chargé d'Affaires (the Minister himself is on leave), the Italian Minister, the Serbian Chargé d'Affaires, and the United States Commissioner took their places in the diplomatic seats.

The first sitting did not pass without a certain commotion. Even worse trouble was feared owing to the election of the new deputies in the prefectures of Durazzo, Dibra, and Kossovo to replace the members unseated after the troubles of last March. The Opposition wished to refuse admittance to the new members, and discussion grew warm. Bad feeling was caused, for the fall of the present Government would have brought about a very grave crisis.

In his opening speech the President of the Council described clearly the internal situation and Albania's relations with foreign countries, laying emphasis upon the results already obtained. The statement of M. Ypi agrees with that made by M.

Frasheri, the Albanian delegate, before the League of Nations—namely, that Albania is fundamentally peace-loving, desires to live in concord with her neighbours and to maintain friendly relations with them, provided that her independence is respected. "On the basis of these principles our foreign relations have much improved, and difficulties have been softened down," said M. Ypi; "we are in normal diplomatic relationship with Serbia, Italy, and France. One difficulty still remains—namely, on the south, with Greece, who will doubtless yield ultimately to the advice of the Great Powers and will despatch her delegate for the delimitation of the frontiers between herself and Albania."

The Internal Situation.

The Government's chief occupation is the assuring of peace and security in the country. Already the whole of Albania has been disarmed. Next the Government has been busy improving the means of communication by repairing the old roads and laying down new ones. These repairs are being done very economically by the process of impressment, every Albanian having either to work twelve days a year for the Government or to provide a sum of money in proportion to his income. Thus the improvement in the ways of communication means ultimately the improvement of the economic state of the country, though some time must elapse before any marked results are attained. A start has been made by removing the Custom duty on several articles, such as benzine, motor tyres, agricultural machines, etc; and chambers of commerce have been established in every prefecture.

The Future.

The Chamber has ratified the mandates of the new deputies, thus giving the Government a majority in Parliament. The exact number of deputies belonging to the various parties is not yet known, for many of the members are still absent. The optimists think that the present Government will remain in power without difficulty; and others think that the Opposition will very shortly upset the Government. It should be noted, however, that public opinion in Tirana and in certain other towns is frankly hostile to a change.

In view of the difficulties which there might be in submitting to a regular authority a population which had enjoyed *ab antiquo* privileges and immunities, the idea of applying to Albania a decentralised government had been mooted. Nevertheless, according to my information, this idea would appear to have been abandoned. The supporters of a united and uniform Albania seem to outnumber those who wish for decentralisation. It is alternatively thought that the country is too weak and small to be able to support semi-independent districts, and that, on the other hand, to police and civilise the mountaineers one would have to begin by putting them in contact with the inhabitants of cantons more docile and less recalcitrant to progress. And it is in this way that probable surprises in the future can be foreseen.

But it is to be remarked, on the other hand, that since 1910, since the hand-to-hand struggles against the Turks, since the Balkan War and the World War, people's ideas have undergone an important change in the mountainous regions of Albania, whether by the force of circumstances or by contact with the exterior world. It is not, therefore, absolutely impossible to see the programme of the present Albanian Government applied in uniform fashion, especially if it be carried out with tact and a certain discretion. To avoid trouble it is thought that the Government of Jafer Ypi should be maintained, and that he should be helped to establish security. The stability of authority is, one would think, the only way to inspire confidence abroad and to increase the credit of Albania.

Centralisation and Decentralisation.

One has often mentioned the difficulty there would be in administering Albania under a uniform régime and in the centralising of power; and it has been thought that the system of government in Albania would have been a government according large local privileges, and respecting the tradition by which certain regions, which under the Turkish régime enjoyed practical autonomy, benefited. It must be remembered that under the Ottoman domination several parts of Albania, especially the mountainous districts of the north, never submitted to any form of service or obligation, being exempted from military duty, from taxes, and recognising no administrative or legal authority of the Sultan, thus forming minute independent States. Hence the difficulties attending the birth of the national Albanian Government, hence also the favourable ground for the intrigues of Albania's neighbours, such as, for example, the wiles employed last year by the Serbs at Mirdita with the famous Marko Gjoni.

THE CARAVANSERAI

Month by month I turn to the *Cornhill* for entertainment, and I have never yet been disappointed in my expectations. The dear old magazine does indeed live up to its reputation and to its own high standards in a wonderful way; and it is worth a score of the more modern slushy and trashy things that are foisted off upon an undiscerning public. However, this is not a "boost" of the *Cornhill;* merely the acknowledgment of much pleasure received from its pages. What turned my thoughts to it just now is an article in the current issue describing the hunting of moufflon in Sardinia, written by Mr. H. Hesketh-Prichard (now deceased), a famous "big game" man. And in the very first paragraph of his interesting paper the author writes:—

> Cyprus has a moufflon of its own—a smaller creature which flourished to a certain degree under British protection, but which is now probably condemned to swift extinction.

***

Now what *does* that mean? Why the "now probably condemned"? It looks as if Mr. Hesketh-Prichard believed that Cyprus was no longer under British protection. And if that guess be right, it is safe to say that he is not alone in his error. The ever-active Cypriot propagandist has worked so hard that he has succeeded in making quite a number of folk outside Cyprus, as well as in it, believe that the island must pass from British rule. And the next step is easy. For the sake of the moufflon, as well as of the Turks, let us hope that the change will not take place in our time!

***

A former British resident in Mesopotamia has directed my attention to an article which appeared almost a year ago in one of the monthly magazines, and purported to give an account of an "adventure" with the Arabs of the lower Euphrates. I have read it carefully, and with deep amazement, not to say disgust. The writer calmly admits that when he was suddenly fired on by some Arabs and chased by others he coolly contemplated shooting down one of his two Arab guards "in case he meditated treachery!" What a confession for a British officer to make! The poor guard *was* shot a few minutes later by the pursuers, for sticking to his charge. But that is not all. Captured by the Arabs, this gallant officer's first thought seems to have been to shoot, or in some other way kill anyone who befriended him. This occupied his mind constantly when he was not picturing to himself the awful things that *might* be done to him. And after all he was got away to safety by one of the people he had thought of assassinating, and the great "adventure" fizzled out without any stake-and-faggot trouble. Anybody who does not know the Arabs of those parts might be thrilled by such a tale. Anyone who does can only wonder at the fatuousness of putting such stuff into writing. If the author were typical of the British officer in Iraq it would be easy to understand trouble arising there. But, thank goodness! he is not.

PRESS ON THE NEAR EAST.

A Liberal Solution.

The Rt. Hon. C. F. G. Masterman has recently contributed a series of articles to the *Westminster Gazette* on "The Eastern Chaos—Yesterday, To-day, and To-morrow." He is interesting upon the entry of Bulgaria into the war on the wrong side :—

> Although history may record when all the negotiation of the time is revealed—and not a fraction of it has been revealed at present—that Britain made mistakes in a most difficult problem, the attack on Lord Grey is childish to those who know the facts. England alone could easily have effected an alliance with Bulgaria. England, indeed, had not an enemy in Bulgaria; where Gladstone still lived. The whole course of the diplomacy was deflected by the men who led Russia in the old régime, and who showed the same incompetence in dealing with external affairs as with the internal revolution. Whenever the Russian army advanced, the Bulgarian demands were refused. Whenever the Russian army was defeated, liberal promises were again made to Bulgaria.
>
> The Bulgarians are the realists of the East. They care nothing for England, France, Germany, or Russia. They cared for their own country and the advantage of their own country. After the great Russian defeat they came to the conclusion that the Central Powers would win, and give them the revision of the iniquitous Bucharest Treaty, under which they were suffering. And so they went in with the Central Powers. They were never convinced that, even if the Allies won, such a revision would be carried out. And, even so, three-quarters of the people would have voted against war against Russia and England.
>
> It was quite obvious that immediately we had lost Bulgaria we should have thrown every support and alliance possible to Greece, our only possible remaining friend in the Balkans. It was a second best, and a very poor second best. For except for the mountaineers and highlanders and the inhabitants of the islands, the Greeks are non-fighters. But they had one great patriot statesman in Venizelos (a Cretan), and his influence, combined with the actual victory of the Allies, seemed destined to restore the glories of the ancient Athenian Empire. In the Treaty of Sèvres that Empire was guaranteed to them by the Supreme Council, with England leading. It included not only Thrace, but Smyrna and the surrounding enclave. That Empire was, after all, in the main an Empire over districts which, in a free plebiscite, would have declared themselves Greek.
>
> The only sane policy for Britain to pursue after this Treaty was made was to ensure that by the giving of every conceivable support, in diplomacy, in munitions, and even in men, those who had thus become our allies, and almost our representatives, would be able to preserve intact this "scrap of paper." Our Government foolishly and criminally failed altogether to maintain such a policy. They preferred to divert our energies and millions of money and war stores, and even our soldiers, to attacking the Bolsheviks in Russia and the Arabs in Mesopotamia. And the result to-day is what any man who knew the East at all could have foreseen—a Greek conscript army, mostly unwilling to fight, and always in panic fear of the hereditary Turkish enemy, has been hopelessly destroyed. And with its destruction has gone all faith in the prestige, or the honour, or the belief in promises made by this country in the East.
>
> But there would seem to be only one policy for Liberalism in this, the most disastrous of all the collapses of the amateur diplomacy of the Coalition in Europe and Asia. The barbaric tribe which had at last been expelled from Europe although receiving liberal supplies of munitions and stores from European scurces, shall never be allowed to cross the Straits and re-establish itself in Europe again. No Christian population shall ever again be subjected to their rule of alternate indifference and massacre. This inheritance of the policy of Gladstone should be retained by all who recognise how vindicated that greatest of all Liberal leaders has been, by every event which has taken place since his death: in Turkey, in Ireland, in Europe, at home."

The writer of these articles sees no goodness whatever in the Turk—"The Turk never changes. He came in as a pestilence. He went out as a pestilence. And if he returns to Europe it will be as a pestilence again." In his final article he outlines certain fundamental conditions necessary to a permanent Balkan peace :—

> 1. The Turk, as I have said, must never return to Europe. Constantinople and the Straits must be internationalised, preferably under the League of Nations. Smyrna should also be made a port under the protection of the same assembly, under conditions similar to that of Danzig. Those Turks that remain in Thrace should be offered immigration to their own regions in Asia, in exchange for the property of the Christian refugees who are now crowding Smyrna and all the seaboard cities of Anatolia.
>
> 2. No permanent peace in the Balkans is possible unless Bulgaria has access through its own territory to some efficient port on the Ægean. You may establish, if you please, the conditions of the first Balkan War. You may establish the conditions after the Second Balkan War. But the present conditions are impossible. Neither the League of Nations, nor the Supreme Council, nor the "Big Four," nor Article 10 of the Covenant, nor the Little Entente, nor the cries and resistance of Greece, can prevent this thing being accomplished. It can be accomplished by treaty, through which Bulgaria may be weaned from her present deplorable condition of looking to Turkey, her age-long enemy, as her only friend. If it is not accomplished by war; for this race is only waiting its time; and it is the most tenacious race in the world. Venizelos himself, the one Greek statesman, perhaps the greatest of present-day European statesmen, realised this necessity at the time when Greece and Serbia and Roumania were exulting over their victory against Bulgaria, and also at the time of the outbreak of the European War of 1914. He could not control his people, who were drunk with the intoxication of unexpected triumph. He was denounced for offering Kavalla to the Bulgars as the price of a Balkan Federation. But he was right and his critics were wrong.
>
> 3. Where are the Greeks to obtain compensation for what will be to most of them a bitter sacrifice? The answer is obvious. Cyprus is almost entirely a Greek island. Disraeli snapped it up at the Berlin Conference, with the approval of Bismarck, in order to show that, besides peace with honour,

Digitized by Google

he had brought back some tangible addition to British territory. That was in the old world. But by every principle of the new world we have no more right to Cyprus than we have to Washington or Buenos Aires. By self-determination, and the votes of its population, it would go Greek. Even on the lowest calculation, it is no use to us for British do not settle there, and it has no harbours worth counting in the balance of naval power in the Eastern Mediterranean. We offered it to Greece in the war as a gift for coming in on our side. Cyprus, willingly given to Greece as the price of a Balkan settlement, would not be an exhibition of the weakness of British rule. It would be an exhibition of the strength of British rule.

4. We are told that if we do not allow the Turk to return to Europe the Indian Moslems will revolt against us. I have the utmost respect for the Indian Moslems, but if their sentiments of revolt are to control the policy of the British Empire, then the star of the British Empire has set.

The greatest of our Ambassadors in Constantinople, Sir William White, wrote in 1885 : 'We cannot shape our course in Europe by purely Asiatic considerations.' And if the policy of the five nations which make up the British Empire and this little island itself, in connexion with a decision which may mean European peace or inevitable European war is to be decided not by these five nations themselves but by those who claim to speak for the Moslems of India, the effect is that we shall have become a subject race to a minority in one of our great dependencies. On the other hand, it is obvious that this Government has in every way outraged Moslem sentiment. What is it doing in Mesopotamia? And why, in Heaven's name, are British soldiers and administrators, four years after we had promised Mesopotamia freedom, now imprisoning or deporting members of the local Government in the very 'sacred city' of Baghdad? If we could show to the Moslems of India that we were leaving Mesopotamia to a purely Moslem Government, that we were giving back Egypt to her own destinies, that we were on the side of the Arabs who fought with us in the war, and that our own controversy with the Turks is, not that they are Mohammedans, but that they were savages, I cannot but believe that this revolt might be appeased."

Another Solution.

The *Outlook* of September 16 contains an article upon "An Entente with Turkey," which states that our rulers are shrouding their panic and indecision in silence, and that our Press is barren of constructive suggestions. But it concludes more helpfully :—

> After pointing out how bemused appear English statesmen and the English Press, we have no comprehensive and concrete cure-all to present. Why should we not violate one of the most sacred journalistic taboos, and confess that we, like our colleagues, are puzzled and in doubt? But if a definite, worked-out solution of our difficulties is not to be fished up in an instant out of the welter, there seem a few considerations that must be embodied in any British Eastern policy. We must, first and foremost, recognise that Turkey is not moribund. As Turkey's great Moslem rival, we must then fight her and seek to destroy her, fight her ourselves and not with undependable mercenaries, or we must make friends with her. If the former, the sooner we declare war the better. But if, as we believe, the British people would not tolerate such a war, only the other half of the alternative remains—we must revert to Disraeli's policy and come to terms with the Turk. We cannot do this now, alas! by soft words. We must pay the Turk, and pay him well, to be our friend. We can do this. France has forestalled us in seeking his affections, but if we enter the lists the superior gifts we can dispense would soon secure the dismissal of that suitor. We can assent to the Turk's return to Thrace, as the Indian Government months ago demanded of the Foreign Office; we can give him back his capital, which France, without our consent, cannot do, for we and not the French control the Straits. We can listen to his other demands, those relative to the late Turkish territories wherein we have installed ourselves, and bargain with him. All this would be most unpalatable, no doubt. But it is possible to come to an agreement with Turkey, we believe, without sacrificing either of those two major Imperial interests about which there can be no bargaining—the freedom of the Straits and the safety of the Suez Canal. There would be important advantages for us in a Turkey protected by England in Europe and Asia Minor against any interference from Continental nations, provided Turkey as a *quid pro quo* put a stop to the pan-Islamic propaganda that is troubling India. And such an arrangement would be no less in the interests of Turkey. At any rate, whether we like it or not, we must recognise that the choice is not between negotiating a deal with Turkey and letting Turkey alone—it is rather between making what amounts to an Entente, and fighting a war in which Egypt, Iraq, Palestine, perhaps even India, would rise against us.

MISSION OF HELP TO INDIA.

The Bishop of Peterborough and Mrs. Woods will leave the Port of London on October 6 in the Nagoya for Colombo as members of the Mission of Help to India, and they will be away from England for six months. There will be a leave-taking ceremony in Peterborough Cathedral next Saturday. The Bishop, in a letter to the diocese, speaks of the mission as a modern instance of the men of Macedonia who beckoned across the sea to St. Paul, "Come over and help us." The Bishop is to preach in Rangoon Cathedral on Christmas Day.

M. Grivas, a well-known Venizelist, has been arrested in Athens on a charge of complicity in a political plot.

An Angora message, via Constantinople, reports the resignation of the Nationalist Minister of the Interior, Ata Bey.

According to a message from Moscow, the Commander-in-Chief of the Red Army, accompanied by the Chief of Staff, has left Moscow for an inspection of the Caucasian Army.

The Indian Legislative Assembly has upheld the action of the Government in connection with the Moplah train tragedy, and has rejected a resolution urging the punishment of certain high officials.

TO BRITISH REFUGEES FROM SMYRNA.

THE NEAR EAST *will be happy to publish the temporary addresses of British refugees from Smyrna who may wish to let their friends know by this means where they are now to be found. Names and addresses should be sent to the Editor,* THE NEAR EAST, *Devonshire Square, London, E.C.2. No charge will be made for this service.*

PERSONAL AND GENERAL.

TO-DAY.

September 28 (New Style).
September 15 (Old Style).
Safar 7, 1341 A.H. of the Moslem Calendar.
Teshri 6, 5682 of the Jewish Calendar.

General Sir C. Townshend, M.P., arrived in London last week from the East.

M. Gugushvili, Secretary at the Georgian Legation, has left London for Brussels.

The Minister of the Kingdom of Serbs, Croats, and Slovenes has arrived in London from Geneva.

Rear-Admiral Sir Richard Webb has returned to England from the Mediterranean Fleet, and has joined Lady Webb at 28, Wilton Place, S.W.

The Czecho-Slovakian Minister and Mme. Mastay have left Rio de Janeiro for England, and are expected to arrive in London about October 14.

The Marquess of Donegall, who is staying with Prince Nicolas of Roumania in Bucharest, will shortly return to London.

Mr. Henry Morgenthau, formerly American Ambassador to Turkey, left London on Wednesday for New York.

Viscount and Viscountess Erleigh, who are visiting the Earl and Countess of Reading in India, will return to London on October 8.

M. Nicolas Mishu, Secretary to the Roumanian Legation, arrived in London last week from the Continent.

A banquet was given at Simla last week to Sir William Vincent, the outgoing Home Member, by the non-official members of the Council of State. Sir Dinshaw Wacha presided.

At the invitation of the President, Earl Winterton, M.P., the Under-Secretary for India, was present at last Thursday's sitting of the Bombay Legislative Council at Poona.

The Greek Church Bishop of Ephesus has expressed to the British Legation in Athens his thanks for having been rescued from Smyrna by the British.

Bishop Gwynne, who is President of the Cairo branch of the C.E.M.S., has recently returned to Cairo after visiting the Southern areas of his diocese, which extends to the borders of Uganda.

Major A. C. B. Neate, Royal Artillery, the British representative on the Allied Military Control Commission in Bulgaria, who while engaged in his duties was arrested by the Bulgarian police authorities, was set at liberty very shortly.

Mr. D. T. Chadwick, late Indian Trade Commissioner, and Mrs. Chadwick left London on September 23 for Delhi, where Mr. Chadwick will take charge as Secretary to the Government of India in the Commerce Department.

The betrothal is announced of His Highness the Rajah of Mandi to Princess Amrit Kor, the only daughter of His Highness the Maharajah of Kapurthala, G.C.S.I., G.C.I.E. The wedding will take place at Kapurthala on February 5, 1923.

In memory of the Salonika Army, a wreath will be placed on the Cenotaph on Friday. A deputation will leave the War Office (main door) at three o'clock in the afternoon. Members of the Salonika Army are invited.

Princess Nicolas of Greece and her daughter, Princess Elizabeth, who came to London to attend the wedding of Prince Nina of Russia to Prince Chavchavadze, left last week for Paris on her return journey to Corfu.

The wedding of M. Constantine Fotitch, First Secretary at the Yugoslav Legation in London, and Mlle. Tatiana, daughter of Dr. T. Zurunitch, of Serajevo, will take place next month at the Serbian Church in Vienna.

The marriage arranged between Philip Nield Cook, M.B., son of the late Dr. Nield Cook, of Calcutta, and Mona Frances Schofield, youngest daughter of Frank Schofield, will take place at Mickleton, Gloucestershire, on Thursday, October 5.

Among the passengers who travelled last week by the P. and O. Bombay Express the Narkunda were Sir Thomas Catto and Lady Wheeler, the Raja of Rajpipla, and Mrs. Joseph S. Cornfeld (wife of the American Minister Plenipotentiary to Persia).

A marriage has been arranged between Rudolph Milner-White, I.C.S., second son of the late Sir Henry Milner-White, LL.D., of The Deepdene, Southampton, and Geraldine, daughter of the late Hon. J. D. FitzGerald, K.C., and of the Hon. Mrs. FitzGerald, of 33, Harrington Gardens, S.W.

A marriage is arranged, and will take place in Calcutta in November, between G. W. Frederick MacGwire, second son of the late J. F. Kane MacGwire, and Mary Geraldine Aldersey, eldest daughter of Cecil Henry Bompas, C.S.I., of the Indian Civil Service.

A marriage has been arranged between Mr. William E. D. Allen, eldest son of Mrs. Allen and of the late Mr. W. E. Allen, of Commonwood House, Chipperfield, Herts, and Lady Phyllis King, second daughter of the Earl and Countess of Lovelace.

Lieutenant Geoffrey Congreve, R.N., son of Lieut.-General Sir Walter Congreve, V.C., K.C.B., will be married to Madeleine, elder daughter of Mr. Henry Allhusen, of Stoke Court, Stoke Poges, Buckinghamshire, on Saturday, October 14, at St. James's Church, Piccadilly.

SCHOOL OF ORIENTAL STUDIES.
London Institution. Finsbury Circus, E.C.2.
ORIENTAL LANGUAGES AND RELIGIONS.
Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.
For particulars, apply to Sir E. DENISON ROSS, Director.

THE PERSIA SOCIETY.
President: Lord Lamington, G.C.M.G., G.C.I.E.
Founded in 1911 to study all questions of common interest to Great Britain and Persia.
Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1

Digitized by Google

A marriage has been arranged, and will take place in Colombo in November, between C. Hedley Todd, late 5th Dragoon Guards, of Agrapatanas, Ceylon, son of the late Hedley Todd, of Adelaide, and Nancy, the younger daughter of F. Burgoyne Wallace, of Beechmount, Cheltenham.

The engagement is announced, and the marriage will shortly take place, of Captain Humphrey St. John Carruthers, 10th Gurkha Rifles, younger son of the late Colonel Herbert St. Clair Carruthers, I.M.S., and Dorothy Alice, second daughter of Mr. and Mrs. Thomas Marlowe, 123, Victoria Street, S.W.

Mr. Charles Henry Tawney, C.I.E., M.A., of Chartley, Camberley, Surrey, lately Librarian to the India Office, formerly Principal of Presidency College, Calcutta, Registrar of Calcutta University, and Director of Public Instruction in Bengal, an authority on Sanskrit, who died on July 29, aged 85, left estate of the gross value of £13,323, with net personality £10,546.

APPOINTMENTS, Etc.

M. D. Bikelas, Secretary to the Greek Legation, has been transferred to the Legation in Berlin.

The King has approved the appointment of Sir John Henry Kerr to be Governor of Assam in succession to Sir William Marris.

Fathallah Khan Noury, First Secretary to the Persian Legation, left London last Friday for Berlin, on leave.

Abdul Hossein Khan, Miftah-es-Saltaneh, son of the Persian Minister, has been appointed an Attaché to the Legation.

M. Jan Broz has been appointed Counsellor to the Czecho-Slovakian Legation, in succession to M. Jan Masaryk, who has returned to the Foreign Office at Prague.

M. Milan Stevanovitch, Secretary to the Legation of the Kingdom of Serbs, Croats, and Slovenes, has been transferred to the Foreign Office in Belgrade.

M. Tresitch Pavitchitch has been appointed Minister of the Kingdom of Serbs, Croats, and Slovenes to Washington. He was formerly Minister in Madrid.

President Harding has nominated Mr. Ulysses Grant-Smith, formerly United States Chargé d'Affaires in Hungary, to be American Minister to Albania.

OBITUARY.

Lieutenant-General George Thomas Halliday, colonel, 16th Indian Cavalry, died at Wiesbaden recently. He was commissioned in the Indian Army in 1858, and became Brigade Major and Deputy Assistant Adjutant-General, India, in 1874. He was afterwards Commandant of the 16th Bengal Cavalry, 1889; colonel on the Staff, 1894; and officiated as Officer Commanding the Oudh District in 1895. He became lieutenant-general in 1900, and retired in 1901. He was in the Hazara Expedition 1888, for which he received the medal with clasp.

The death is announced of Sir Julian Stafford Corbett, the distinguished naval historian. His studies included much ground that is familiar to readers of THE NEAR EAST.

The death has occurred, at the age of seventy-nine, of Major-General Sir John Palmer Brabazon, K.C.B., C.V.O., Colonel of the 18th Hussars. His war service was varied. He retired by sale as captain in 1871, but served as a volunteer in the Ashanti campaign of 1873-4, and with the 10th Hussars in the first Afghan campaign of 1878-9. In the second Afghan campaign of 1879-80, he was brigade major of the Cavalry Division, and was in the march from Kabul to Kandahar. He also served with the Khost Valley Expedition. From 1878 to 1880 he was A.D.C. to the Viceroy of India (Lord Lytton). In the Sudan campaign of 1884 he was wounded at El Teb, and took part in the subsequent operations for the relief of General Gordon. In the South African War he commanded the 2nd Cavalry Brigade, and later the Imperial Yeomanry, and was mentioned in dispatches, receiving five clasps to his medal. He was awarded a pension for distinguished services in the field, and was created C.B. in 1893, C.V.O. in 1901, and K.C.B. in 1911. He had also the First Class of the Danish Order of the Dannebrog. From 1889 to 1901 he was A.D.C. to Queen Victoria, and was afterwards Gentleman Usher to King Edward VII.

Where to stay in the East

CAIRO

THE
CONTINENTAL - SAVOY
THE MOST UP-TO-DATE AND BEST SITUATED HOTEL IN CAIRO.

Entirely Renewed. Overlooking Ezbekieh Gardens. Opera Square. Famous Terraces. 400 Rooms. 200 Bathrooms. Cairo's Fashionable Grill-Room Restaurant. Daily Concerts. Weekly Dances. Open all the year round

MENA HOUSE HOTEL,
At the Foot of the Pyramids. The Ideal Hotel out of Town.

HELOUAN. **HEALTH RESORT near CAIRO. Sulphur Baths & Thermal Establishment.**

GRAND HOTEL, HELOUAN. Strictly First Class.

"A JUST AND DURABLE PEACE."

In the welter of words that has been expended, officially and unofficially, over the Near Eastern question during the past week most of the disputants seem to have lost sight of what the pother is about. Why all this turmoil in the Near East? What is the goal towards which everyone is striving or wishes to be thought to be striving? The answer is a single word, Peace; permanent peace, if possible, but in any case peace for some years to come. The Near East has long been the storm-centre of Europe, and after the world war it was felt that, whatever happened elsewhere; the foundations of peace must be firmly laid at least in the Near East. Accordingly, Allied wisdom, as represented by the Supreme Council, devoted itself to the problem for nearly two years. The result of their deliberations was embodied in the Treaty of Neuilly and the Treaty of Sèvres. Of these two documents one has been carried into effect, more or less; the other has not only proved unworkable, but, far from establishing peace, has brought about war, and a particularly sanguinary war at that. To-day the desire for peace is as keen and the need as urgent as ever; but the whole subject is once again in the melting-pot and a new instrument of peace has to be forged. As a treaty of peace is a formidable undertaking—the Treaty of Sèvres is divided into thirteen chapters and 433 clauses—there is no need here to attempt more than an outline of the main provisions of a fresh convention. The Treaty of Sèvres can be, and has been, challenged on a number of points, but it was mainly on a single fundamental issue that it actually broke down. In their quest for "a firm, just, and durable peace," as the language of the Preamble has it, in the Near East the Allies hit upon the principle of transferring to Greece as much of Turkish territory as they could conveniently, under the impression, presumably, that Greece would prove an effective policeman against a Turkey disposed towards law-breaking. The event has shown that, as far as the aim of peace was concerned, no more unfortunate principle could have been evolved. A beaten and exhausted Turkey was at once galvanised into vigorous life by the Greek seizure of its territory, and at the end of three years has inflicted a crushing defeat on the Greek army.

Whatever else may be durable in the Treaty of Sèvres, it is evident that this basic principle, the placing of portions of Turkey under Greek jurisdiction, whether just or otherwise, cannot be perpetuated, for it spells war, not peace, in the Near East The point has already been admitted by the Allied Governments, who in their fresh quest for a peace formula have now guaranteed to Turkey possession of Thrace as far as the Maritza and Adrianople. Those who contend that the Turks are thereby escaping the penalties of defeat in the Great War must address their complaints to the Governments which obscured the issue of the world struggle by engineering an unjust attack of Greeks on Turks, thus enabling the latter to change their rôle from that of vanquished to that of victors, and reversing values in the moral equation of the Near East. This latter point, it is to be feared, will have to be borne constantly in mind by the Allies, if they are to bring to a satisfactory conclusion the good work that they have begun by addressing to the Angora Government an invitation to a peace conference. It is idle to expect the Kemalists to imagine themselves back in November, 1918; the Allies' prestige of those days has not stood the strain of three years' war, for they deliberately vacated their pedestal, as far as the Turks are concerned, and set the Greeks upon it in their stead. That pedestal, with all that it implied, has been overthrown. The proposals of the Allied Foreign Ministers at the Paris Conference last March went some way towards meeting the National Pact of the Turks in all but the territorial arrangements. These now have gone by the board, and it should be possible to frame a peace which will appeal to the Turks as being free from vindictiveness and prompted solely by a desire to promote Turkey's own interests. In many quarters such a treaty will be decried as a craven surrender to the Turks; but it will be in effect the logical outcome of the mishandling of the Turkish question ever since the Armistice was signed on October 30, 1918. Those who protest will need to be reminded that the urgent need of all countries in the Near and Middle East is peace. Worse results cannot follow from the readjustment than the war, massacres and misery that attended the Treaty of Sèvres. If the new settlement should prove even moderately unsatisfactory, opportunity for further revision will be provided in due course—when Europe is not as war weary as it is at present. In the meantime there will at least be peace in the Near East, and the freedom of the Straits will have been secured.

The restoration of Eastern Thrace to Turkey leaves Greece with a narrow strip of land between the Mesta and the Maritza, taken from Bulgarian territory and given to her by the Treaty of Neuilly. In spite of the sore trials through which the Greeks have passed and with the fullest sympathy for them in a position for which their own responsibility is not as great as that of the Allied Powers who urged them on to their undoing, we would press upon the Greek Government of its own free will to restore to Bulgaria the Thracian lands that she had under the Treaty of 1913, or at least to hand them back to the Allied Powers. Thrace, the whole of Thrace, may well have been too valuable to surrender voluntarily, but Eastern Thrace has gone, and Western Thrace by itself is not worth the trouble and anxiety that its retention will cause Greece. Our prognostications in regard to Asia Minor and Thrace have proved true, and we believe that the future in regard to Western Thrace and Macedonia can be foretold with equal certainty. With a *beau geste* to-day, Greece can make a useful friend of Bulgaria, and need not then worry about Salonika. It is true that Western Thrace is safely hers for the present, as she knows that Bulgaria single-handed will not be allowed to commit an act of aggression; and there is little chance that the Allied Powers will wish to victimise her further by calling upon her to surrender this territory as well. But the consequent lack of finality in the Near Eastern settlement will react on the Greeks more than on any other country, for as the traders of the Orient they stand to gain more than any others from settled conditions in their own and neighbouring lands.

SMYRNA.

The Fate of the British Community.

It is to be hoped that in the absorption of the political aspect of the Near Eastern question the claims of the British refugees from Smyrna to sympathy and practical help will not be overlooked. The circumstances of their evacuation and the destruction of the city have left most of them penniless, and there can be no doubt that relief measures will have to be initiated on their behalf. A committee consisting of Smyrna residents and others interested in the city has been formed to consider the steps that should be taken to help the refugees, and we trust that any appeal made by them will meet with a ready response.

We publish below a communication from a correspondent embodying some of the information that has been gleaned from a few of the refugees who have already reached this country.

September 24.

"Scattered to the four winds of heaven like the ashes of St. Polycarp, the first Smyrna martyr, is the fate of the Smyrna British colony. Some beaten, many robbed, all insulted, and a few murdered, and then cleared off 'bag' and not baggage. The first batch of refugees reached London last night, and gave heartrending accounts of the final end of a colony that has kept the flag flying for nearly 300 years. In the Armenian cemetery is the grave of an English official bearing the date 1631, and this indicates that Englishmen settled in Smyrna before Samuel Pepys referred to the 'Smyrna Fleet' in his Diary. Yet the Dutch Smyrna colony preceded the English, for the De Hochepied family settled in Smyrna in 1625, as their records still prove. By a curious coincidence the Dutch colony were also the first to suffer in this horrible Smyrna holocaust. Mr. and Mrs. Oscar de Jongh were shot dead in the streets of Boudjah at the first appearance of the Turks. A prominent official of the British railway had the bodies carried to the British churchyard, where the De Jongh family vault exists. Mr. De Jongh was aged and infirm, and his faithful wife refused to leave him, and died at his side. Their son arrived too late to save his parents, but hastily dug a shallow grave, and interred them. The body of Dr. Murphy, murdered in Bournabat, was still lying in the street when the rest of the British colony were hustled past to Smyrna. A British clergyman, after being stripped and beaten, was placed against the wall to be shot, and only saved by the prompt arrival of a Turkish officer who happened to know him. Several Britons were stripped and beaten and made to witness outrage and murder committed on their unfortunate Greek and Armenian domestics. Most of the massacring was done by Turkish irregulars, who showed themselves far more enraged against the Armenians and British than against the Greeks, who are said to have committed wholesale destruction of Turkish villages. Nureddin Pasha, the Turkish Governor, was, however, anxious to save the British, and urged all to get away. On the day that the fire started, he declared that he would not be responsible for the lives of any Briton who remained until the next day.

Of the British community that has been compelled to leave Smyrna, some are at Malta, fairly well looked after by the Government; some are in Cyprus, some in Mitylene, and others at the Piræus; a few have borrowed money and have reached Venice, Paris, or England. All are penniless. Reuter's correspondent in Malta reports:—

> "The British refugees have asked me to appeal to the British Government in their name for some sort of compensation in view of the fact that this is the second time that they have lost practically everything."

What steps are going to be taken to help this unfortunate colony that has never failed to rally to the flag when the Empire called? Its young men were lost in the opening stages of the Great War, as the Memorial Tablet—on the Smyrna Post Office wall, that has escaped the flames—indicates: its old people are either murdered, left in Smyrna, or living in discomfort on an island in the Ægean Sea. Three Englishmen, P. G. Barff, and Robert and James Hadkinson—all well over 80—are in Turkish hands. Mr. Robert Hadkinson was several times condemned to death by the Turks during the Great War, although he helped them against the Russians in the Crimean War. His life was spared through the exertions of Rahmy Bey—subsequently imprisoned in Malta in spite of his friendliness to the Smyrna British Colony—and Mgr. Dolce, the Papal Legate in Constantinople. Several aged ladies have taken refuge in the American College at Paradise, near Smyrna, in charge of Rev. Cass Reed, Rev. A. McLachlan's son-in-law, where there are thousands of Armenians in jeopardy of their lives.

Through all this nightmare of murder, fire, and rapine Sir Harry Lamb has worked night and day for four days without sleep to save the British community. In spite of his age—he has seen forty-five years' foreign service—he has been almost superhuman in his efforts to rescue and evacuate those in danger. On the day when the fire started he went to warn the British colony at Bournabat, where Dr. Murphy had been murdered the previous day. At every step he was met by panic-stricken Greeks and Armenians clamouring to be saved. His Vice-Consul, Robert Urquhart, ever at hand to carry out Sir Harry Lamb's orders, always cool and practical—thanks to his training in the Navy—is the only man who can adequately relate what extraordinary capacity Sir Harry showed for handling a situation fraught with great danger and suffering to the British.

EGYPT'S TOURIST SEASON.

We have received from the publishers of the *Sphinx* a copy of its special Tourist number for the season 1922-23, entitled, "Egypt: The World's Winter Playground." The magazine contains not only information indispensable to all tourists, but also well-reproduced illustrations of things of interest and informative articles to guide the visitor. The photographs, indeed, are the best feature in this periodical, but such articles as "The Streets of Romance," by Arthur Snave; "Mausoleums and Shrines in Egypt," by Mrs. R. L. Devonshire; or "The Wonders of the Nile," by René Francis, are well worth reading on their own account.

CORRESPONDENCE.

The columns of The Near East *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* The Near East.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper.

NEAR AND MIDDLE EAST ASSOCIATION.

To the Editor of The Near East.

Sir,—May I venture to call the attention of your readers to the existence of the above society, which forms a useful centre for focussing the interest and sympathies of those British subjects who are distressed by the pitiful exhibition of the present Government's handling of Eastern affairs and are anxious to bring about a peaceful state of things in the Near and Middle East by urging principles of justice and fair dealing towards the Mohammedan world as well as towards the other nations concerned?

The Near and Middle East Association includes the names of many members of both Houses of Parliament and of a large number of business men associated with Eastern trade. The subscription is almost nominal.

For the last four years the British Government, mainly owing to the interference of certain Ministers in matters outside their own province and to the combined subservience and indecision of others directly responsible, has steadily alienated the respect and aroused the enmity of the Moslem community. It has thereby created a serious danger to the Empire, not only in the Near East and Asia Minor, but in Egypt, Arabia, and India as well. The recklessness of this course has only been equalled by the callous manner in which the Greeks, urged on by the Premier to an adventurous career in Smyrna and beyond, have now been left by him there to bear the consequences of their folly in trusting to his encouragement. And, to mend matters, recourse is now had to the bellicose rattling of a sabre, which the common sense of the British nation, it is sincerely hoped, will never allow to be drawn.

Whatever may be the outcome of the present crisis, the Near and Middle East Association stands for the possession of Anatolia and Constantinople by the Turks; the peaceful evacuation by the Greeks of Eastern, and the creation of a neutral buffer state in Western, Thrace; the freedom of the Straits; guarantees for the protection of minorities, as long as they behave themselves; sympathetic but knowledgeable treatment of Moslem religious susceptibilities; the opening-up of internal and external trade by practical economic methods; the elimination of Bolshevist interference; and the laying down—and adhering to—of a definite and broadminded policy in accordance with the principles of justice and of British security.—I am, etc.,

Edward Gleichen, Acting Chairman,
Near and Middle East Association.

7, St. James's Terrace, N.W.8,
September 25, 1922.

EGYPT AND THE SUDAN.

To the Editor of The Near East.

Sir,—My attention has been drawn to a paragraph which appeared in your issue of June 1 under the heading of "Egypt and the Sudan."

In justice to the Egyptian Mamur referred to therein, I beg to inform you that the account given by your correspondent is grossly exaggerated and wrong in many important particulars, and conveys an entirely false impression of political significance which the incident in no way merited.

I should be obliged if you would publish this letter.—I am, etc.,

C. E. Lyall,
Civil Secretary, Sudan Government.

Civil Secretary's Department,
Sudan Government,
September 9, 1922.

ZAGHLOUL PASHA.

A well-known English lawyer is now on his way to Gibraltar to apply for a writ of *habeas corpus* on behalf of Zaghloul Pasha, the Egyptian leader. The Government has protected itself against this eventuality by obtaining the issue of an Ordinance in Gibraltar, where the Governor is himself both the Legislature and the Executive. This Ordinance specifically excludes any such application being made in the court of the colony, so that the proceedings there are merely the necessary first step to obtain the decision of a higher court on a question affecting the most fundamental constitutional rights of every resident in the British Empire.

SCHOOLS IN PALESTINE.

The Church Missionary Society have received from their authorities in Palestine a statement showing what the retrenchment ordered by the General Committee involves in that mission. A number of schools will have to be closed, although, in the opinion of the Christians in the country, they are more important even than hospitals or of any of the other mission activities.

NOTES AND NEWS.

An Improved Outlook.

Developments at the week-end brought a feeling of great relief to the City, which had begun to view the prospect of a further conflict as a factor that would have to be taken into consideration. The Stock Exchange, always a good barometer in regard to issues of high import, quickly reflected the change for the better, almost a buoyant tone being in evidence at one time on Monday, while the exchanges showed an improving tendency. Of course, it is too soon to say that we are out of the wood, for crises have arisen in the past out of peace conferences, but the indications at the moment are certainly in favour of a satisfactory settlement. The desire of the business community is that it should be brought about with the least possible delay. Conferences are too often unnecessarily drawn out, and then there is usually a long delay before a peace is ratified. In the economic interests of every country it is essential that no time should be wasted over the settlement. Is it too much to hope that the politicians in all camps will recognise this fact on this occasion?

Commerce and the Straits.

With the Prime Minister's speech on Saturday as a whole I have no concern; but one, and that the most important, part of it calls for comment in these columns, namely, his wholly admirable presentation of the case for the freedom of the Straits to commerce. As he indicated, it is absolutely essential for the world's prosperity, quite apart from any question of the Empire's security, that the trading vessels of all countries should be immune from interference in the Straits. On that matter I have no doubt that all countries are in agreement. For Roumania and for South Russia the free use of the Straits is a particularly vital matter, and, as the Prime Minister pointed out, their economic well-being depends on their ability to utilise the waterway connecting the Mediterranean with the Black Sea. Where a strip of water has such exceptional importance, it is obvious that purely national considerations must cease to count, for trade is the one essential factor for the continuance of civilised communities, and not the maintenance of positions in a state of preparedness for war.

The War and Greece's Position.

There seems to be a very general idea that the crushing defeat sustained by Greece in Asia Minor will have an enduring effect on the general economic position of the country. This is not my view at all. Of course, a set-back of this character is bound to have an immediate repercussion on the national life, and the considerable depreciation of the drachma is one obvious indication of its influence on Greece. But there is no reason, so far as I can see, why it should be lasting, provided the Greeks recognise the position as it is, and settle down quietly to the task of reconstruction. It is not as though Greece had suffered some vital injury in the loss of Asia Minor (and, I suppose one must now add, Eastern Thrace). Actually, her forced withdrawal is a very positive gain, for the maintenance of her troops has been draining the vitality of the country, and imposing a financial burden that Greece was not able to endure. Relieved of the white elephant of Imperial responsibilities, for that is briefly what Asia Minor has been to Greece, I should not be at all surprised to see the country begin to display rapid recuperative powers.

Smyrna—A Lost Opportunity.

For a long time Greece is bound to be sore at the loss of the Smyrna vilayet, but when the Greeks come to consider the matter calmly, I feel sure that they will arrive at the conclusion that the great adventure was beyond them. It is very open to question now whether they ever had a great opportunity at Smyrna, for the continuance of the economic importance of that region depended very largely on the goodwill of the Turks, who had it in their power to divert no small portion of the trade that normally would find an outlet at that port, and there is no room for doubt that they would have done so had they consented to a peace that would have left Greece in possession of the vilayet. That apart, Greece's government of Smyrna was such as to leave room for doubt as to the capacity of the Greeks for Imperial responsibilities, unless we can attribute all the misunderstandings and mistakes to the exigencies of war. It was to their interest to do everything to encourage commerce at the port: instead of doing so they appeared to place every possible obstacle in the way of the traders whose work had resulted in the development of the port. For one thing they will be missed at Smyrna. Under Greek auspices there was a sense of security at the port such as was never known under Turkish rule.

The Coming Egyptian Season.

There is every reason for thinking that Egypt is going to have a good season. The war wrought havoc with the habitual clientele of the Nile Valley as it did with everything else, but if Egypt has lost many of its habitual visitors, it has gained others, and always will continue to do so, for the spell of the Nile is irresistible. Hence the very promising reports of the tourist agencies this year as regards would-be visitors from this country and America. It goes without saying that Egypt can do with the harvest she is wont in normal times to reap from the tourists, and the only thing that can prevent her from enjoying it this time is an adverse turn to the political situation. The events of the week-end suggest that that contingency will, after all, not have to be taken into consideration.

The Tourist Traffic.

It was an excellent idea to hold a joint conference last week of Egyptian and American tourist interests, and it is surprising that it should have been left until the present time to bring about such a meeting. Egypt's capacity for assimilating tourists is not yet very extensive; in other words, there is not the extra accommodation in the way of hotels and travelling facilities to meet any undue inrush of tourists. Consequently, it has often happened in the past that there have been far too many tourists at one time, though in other periods of the season quite the opposite may have been the case. A more methodical arrangement of the various tours is all that is required to solve the difficulty, and as a result of the conference, this will be brought about, though, naturally, it is too late for anything to be done in the present season.

Roumanian Exports.

It is not possible so far to record any improvement in regard to the question of Roumania's grain exports; indeed, the trade has come practically to a standstill. This development, as I have pointed out in previous notes, is due to the heavy export taxes, combined with the depreciation of the leu, which, together, leave the producers with insufficient profits to make export worth while. Any marked improvement in the exchange will make a great difference, but the season is getting on, and political developments are not likely to improve the prospects of shipping any considerable quantities of grain in the period that remains. It would be a thousand pities were the deadlock to continue, and Roumania's progress was thus to suffer a set-back, for, as the figures given elsewhere in this issue show, the country's trade has made a very notable advance during the present year, and it is more than a little surprising that the great increase in the exports has not had a substantial effect on the exchange. That, however, will come in due course, and developments have made it abundantly clear that all that Roumania requires for a complete and rapid recovery from the war is the establishment and maintenance of normal conditions. A settlement with Turkey, bringing about the opening of the markets of Asia Minor, will go far to bringing that goal within sight.

India's Economic Position.

As September comes to an end it is possible to form a trustworthy idea of the prospects of India for the winter and spring, and this year there are happily good grounds for cheerfulness. The rains have been favourable nearly all over the country, and if the last few weeks have been rather too wet in parts of the North-West, there will be ample compensation later on in the extended sowings of wheat and oilseeds rendered possible thereby. The latest news from Calcutta shows that piece-goods were moving up-country in increased quantities, or, in other words, that the peasants in the North are supposed to have more money to spend, while the railways seem at last to be making up some of the leeway of the first four months of the official year. A month ago Sir David Yule gave it as his opinion that from the point of view of internal and external trade India is in a sounder position than any country in the world, and there is no one entitled to speak with greater authority on the subject. With more produce to sell, and with old customers beginning to buy again, the country will presently have more to spend, and that is good news for a very extensive portion of the civilised world.

Some Adverse Factors.

When things are so promising, it is particularly to be regretted that there are signs of a recrudescence of the irresponsible, and often irrational, strikes which have cost India so much during the last few years. It is true that the ordinary workers have not full reason to be satisfied with their position, but, in order to be successful, a strike must have a better basis than vague aspirations, and, now that prices are falling, it is quite impossible at this distance to detect any reasonable grounds for knocking off work. Even more regrettable, however, is the fact that India continues to insist on taking so large a share of the value of her exports in the forms of gold, silver, and precious stones, things which may gratify individual taste, but which, as an old Scottish economist said, "do not breed." If India is poor to-day, the chief reason is that, at any rate, for the last twenty centuries, she has been accustomed to give bread for stones, and the rapidly increasing number of her public men who are feeling the daily pinch of the shoe might do real good by concentrating on this habit as an evil to be eradicated. Engines before armlets, and looms before lockets, is a motto which might serve for the leaders of a new crusade.

Protection for India.

A preliminary summary of the report of the Fiscal Commission, which was appointed last year by the Government of India, has just been issued. As was to be expected, the Commission has decided in favour of protective measures, the object aimed at being the development of internal industries. The United Kingdom is to be granted preference under the tariff that will be framed, while the grant of Preference to the Dominions is to be a matter of reciprocal agreement.

Assam Railways and Trading.

Notable features of the past year's working of the Assam Railways and Trading Company were the increase in the total earnings and the decrease in the expenditure. The total earnings amounted to Rs.17,16,337 as compared with Rs.15,88,178, while the expenditure amounted to Rs.12,38,692 as against Rs.12,59,699. On the general revenue account there was a profit for the year of £86,192 as compared with £87,045 for the previous year. The sum of £22,132, representing credit balances of previous years held in abeyance and no longer required, has been brought into the accounts in order to pay the Preference dividends. After meeting the debenture interest and allowing for the Preference dividend, £2,521 remains, which is to be carried forward. Last year a dividend of 5 per cent. was declared on the B stock, and the carry forward was £2,498.

Commerce and Industry.

GREECE.

Athens, September 9.

Proposed Petroleum Refinery.

The Minister of National Economy is studying proposals submitted to the Government by an important British company for the installation in Greece of a large factory for the working of non-refined petroleum imported from Batoum and Mosul. The company in question has applied to the Greek Government for a site of about forty hectares in the neighbourhood of Athens, Piræus, or Phaleron for the purpose of constructing the factory, which would employ some 20,000 workmen.

The company has undertaken to supply refined petroleum to the Government at reasonable prices to be fixed in advance by agreement. The Government will give its decision within a month.

New Issue of Notes.

The Ministry of the Treasury has put into circulation five million notes of 10 leptas, and is shortly putting into circulation a further five million. A small amount of nickel coins has also been passed into currency. Twenty-eight million 50-lepta pieces and 28,700,000 20-lepta pieces are shortly expected to arrive from England. These new coins are being made from a composition of nickel and bronze, and their intrinsic value is slightly less than their face value. In addition to the above, Messrs. Aspiotis, of Corfu, are about to deliver a large quantity of one and two drachmæ notes.

Miscellaneous.

The Minister of Finance has invited tenders for the printing of 10 million postage stamps of 10 lepta, 25 million of 30 lepta, 25 million of 50 lepta, 500,000 of one and two drachmæ, 300,000 of three drachmæ, and 200,000 of five drachmæ.

A new company called the "Industries Réunies de Thrace" has been founded at Arcadiopolis with a capital of £80,000. The company will erect factories for the manufacture of various sweetmeats.

ROUMANIA.

Bucharest, September 13.

Rising Exports.

The exports for July show a considerable increase in oil products and timber as compared with the corresponding figures of July, 1921. Exports of grain show, however, a decline, but the exports of cattle, pigs, wine, salt, eggs, etc., have increased. For the first seven months of this year the principal exports were as follows in tons (the figures in parentheses representing the totals for the previous year): Timber, 331,409 (36,070); maize, 256,433 (590,642); barley, 159,602 (210,956); refined oil, 126,902 (54,284); 4,558,988 casks of wine were exported, and 8,122,299 pigs.

Miscellaneous.

In view of this year's abundant crop of grapes and also of the large stocks of wine remaining from last year, the Government intends to permit the export of grapes, charging a nominal export tax of lei 0.10 per kilogramme.

This year's sugar production is estimated at about 40,000 tons, against about 20,000 tons last year. Home requirements are, however, about 60,000 tons.

An aeroplane belonging to the Franco-Roumanian Air Line Company arrived in Bucharest from Paris last Thursday. The journey between Budapest and Bucharest was made in 4 hours 45 minutes. This aeroplane was piloted by the French airman Deullin, and is one of the eighteen "Berlines Spad" machines specially destined for the Budapest-Bucharest-Constantinople service, which is to be started towards the end of this month by the company mentioned.

SYRIA.

Beyrout, September 5.

France's Economic Policy.

Evidences of the sound economic policy pursued in Palestine are to be found in the measures that have been taken by the authorities with regard to the Ottoman Public Debt and the Régie Co-interessée des Tabacs and in steps such as the reduction of the Customs duty on building material to 3 per cent. These measures by themselves would suffice, one would think, to win the sympathy and gratitude of the population.

Talking to a high official at the High Commissariat at Beyrout recently, the writer expressed his surprise that France had been so slow in taking action on similar lines in Syria. The official explained that as the share of the Ottoman debt falling to Palestine was comparatively small, the British authorities could well afford to take drastic action with regard to it, hoping to be able later to compensate the bondholders from the revenues of Palestine. The feeling in Syria on this question is so strong, however, that France is likely to be forced into taking such a line, if only for political reasons. If the Ottoman Public Debt and the Régie des Tabacs were allowed to continue, the Syrians might well ask wherein lay the difference between the old and the new régime, more especially as, owing to various reasons, prominent among them being the depreciation of the franc, the French authorities' efforts to interest French capitalists in works of a productive nature in Syria have so far met with but a scant response.

It appears that things are now about to move, however, and that a commencement will be made with the Régie des Tabacs. The concession of this concern expires in six years, and the Director of Finance proposes its immediate termination, an indemnity being paid for the unexpired portion. There has been an exchange of views between himself and the Director of Finance at the Haut Commissariat, and a common basis of agreement is said to have been reached. The question, it may be pointed out, has been agitating the public mind for some time, and there has been a vigorous campaign in the Press, which is not surprising when it is borne in mind that the tobacco industry constitutes one of the few vital resources of Syria. Before the war, seeds of the Turkish variety were experimented with in various parts of the mountains. But it is on the cigarette industry that chief hopes are based, and its development, it is trusted, will put a stop to the wholesale emigration from the country. An expert in tobacco culture and cigarette making, who has made a lifelong study of this question in the Lebanon, estimates the income from this industry after the third year at eighty million francs. When it is realised that the total revenue from silk, oil, liquors, etc., hardly amounts to this sum, the importance of the industry to the Lebanon will be readily appreciated. There is every reason to believe that, with adequate State aid and protection, the cigarette industry in the Lebanon, which has always been known to be a tobacco-growing country, will prove a greater success than in Egypt where the soil and climate have been proved unfit for tobacco culture.

THE CALCUTTA HIDES TRADE.

A Critical Position.

The present position of the Calcutta hides trade is calculated to arouse considerable interest among those who imagined that the steps that have been taken since 1914 would have ensured that at any rate the bulk of Indian hides would be tanned within the Empire. Before the war, as readers of The Near East are well aware, the trade was one of the choicest preserves of Germany, while her ally, Austria, was largely concerned in it. The two countries between them took 19,385,905 hides from India in the three and a-half years before the outbreak of war. Germany's normal imports averaged three and a-half million hides, while the annual imports through Trieste averaged one and a-half million hides. One hide, it may be pointed out, yields five pairs of army boot uppers, and it is not without significance as an indication that the Great War was predestined that in the first six months of 1914 Germany imported two and a-third million hides, while Austria's imports amounted to 1,178,466 hides. Of course, it may have been a coincidence, due to a sudden and quite unexpected trade development, and, on the other hand, it may not. Anyway, we need not now concern ourselves with the point. Naturally, the position of the trade came in for serious consideration during the war period, and it was felt very strongly that while the trade had been practically a German monopoly for upwards of thirty years, there was no real reason why this should have been so, since it had as late as the seventies been entirely in British hands—in 1872 the United Kingdom imported seven million hides and none went to the Continent or America—and had only passed from them as the result of Germany's unscrupulous methods. It is unnecessary to recapitulate the various developments, which have already been dealt with in these columns, and it must suffice to say that the ultimate issue was a rebate of 10 per cent. on the export tax of 15 per cent. in respect of hides exported to destinations within the Empire. As the war had, of course, eliminated the German firms concerned in the export trade, it was felt that this protective measure would very effectually keep the trade within the Empire for the future. Unfortunately, this is precisely what it has failed to do, up to the present at any rate, and while the time has not arrived to speak with absolute certainty, the indications undoubtedly suggest that when normal conditions return India will again find her chief market for hides in Central Europe. It is not a pleasant outlook from many points of view, but if it happens we shall only have ourselves to thank.

The present position in the Indian hides trade is abnormal as a result of the existing world economic conditions. The market is very depressed in consequence of the absence of demand, and the bulk of such export trade as is being done is for Central Europe. That this should be so, despite the barrier on trade imposed by the exchanges, is extremely significant. The demand in Great Britain for Indian hides is almost negligible, and it seems that the efforts to extend their utilisation in this country have been practically without effect. At any rate, British tanners are not showing any great eagerness to develop a market for them, though they have been afforded a unique opportunity of recapturing the trade. Of course, if they were to take them extensively it would entail alterations, and they are evidently unwilling to make changes, however good a reason exists for them. They prefer to deal with heavy hides, while on the Continent—in Germany, Czecho-Slovakia, and Italy—the tanners want the light hides. They have one sound reason on their side, and that is that British people generally demand a very high standard for their footwear, which means that the chief market here for leather goods is for those made from heavy hides. But there is a very considerable trade to be done here in leather goods made from the light hides, while the possibilities in this direction in the foreign markets, particularly in regions like the Near East, are immense. Before the war Germany found a very profitable trade in exporting to this country leather goods made with Indian hides, and it is obvious that the same thing will happen again if British tanners continue their present policy, while our Continental competitors will be able to score all along the line in foreign markets. It may be that British tanners regard competition with the Continental tanners in leather goods made with light hides as impossible; if so, all that can be said is that it shows a remarkably poor spirit. But it is difficult to believe that that is so, and it is far more probable, as we have suggested, that the apathy shown by British tanners is due in the main to the innate conservativeness of British industry, which only too often takes the form of a refusal to launch out into new lines. The adverse effects of this policy were becoming very plain in many directions before the war, while now it would be little short of disastrous to allow development to be impeded by any such considerations. The trade, it must be emphasised, is well worth the attention of British tanners, and they still have their opportunity of capturing it, since the exchanges limit Germany's activities at the moment; but the sands are running out, and if action be delayed much further there can only be one result.

REMOVAL OF MORATORIUM IN SYRIA.

H.M. Consul at Damascus reports that the moratorium in force in Syria since 1914 has been in great measure removed. The main conditions are as follows:—(a) Debts incurred on Tirlosj currency before March 31, 1916, must be repaid in their present gold value. (b) Debts incurred at any time in any specified currency must be repaid in the present value of such currency. (c) Where, after March 31, 1916, debts were incurred in Turkish currency, but gold was not specifically mentioned, such debts are repayable in Turkish paper.

BANKING IN SLOVENIA.

An interesting article on Slovenian banks, by M. Alfred Cebular, appeared in the *Zagreber Tagblatt* of August 10. We give the following extracts:—

"Since the breaking up of the (Austro-Hungarian) Monarchy and the foundation of our State, the business life of Slovenia has made a great step forward. Industry, commerce, and also lately co-operative trading, which are in close relation with the financial institutions, have received therefrom a strong stimulus towards increased and concentrated efficiency. The following outlines of the position of the Slovenian banks give a picture of their financial strength and influence upon economic life.

"Before the war Slovenia had three locally-established banks: The Ljubljana Credit Bank, the Adriatic Bank, and the Maribor Discount Bank. The last-mentioned amalgamated a short time since with the Slavenska Banka of Zagreb and, therefore, does not need to be further referred to here. The war year of 1916 brought us another bank, the Slovenska Eskomptna Banka v. Ljubljani. With the end of the war the steadily increasing industry, smelting trade, commerce, and, as already mentioned, co-operative trading demanded a further development of financial enterprise. This led in 1920-21 to the founding of new banking concerns. These were the Zadruzna Gospodarska Banka v. Ljubljani and the Kreditni Zavod za Trgovini i Industrijo Ljubljana in 1920, and the Obrtna Banka Ljubljana in 1921. From this time Slovenia counted seven banks, of which one, the Adriatic Bank, will, as soon as its new premises are ready, remove to Belgrade.

"In addition to these local banks, there is a number of Croatian and Dalmatian banks with branches in Slovenia, and now the National Bank is also represented. The communal savings banks, of which there are 15, should also be mentioned. The needs of the province are supplied by a system of financial institutions, consisting of seven large local banks, three agricultural societies dealing with finance, fifteen communal savings banks, seventy-seven agricultural loan banks, on the Schulze-Delitsch system, 334 Raiffeisen Kassen (agricultural banks on the Raiffeisen system), and nearly fifty branches of other banks.

"We see from the yearly reports how the seven Slovenian banks are of the first importance to industry, commerce, and metallurgy, and how they serve these enterprises. Slovenian capital not only works in Slovenia, but also in Dalmatia, Croatia, Slovenia, Vojvodina, Belgrade, and of late also abroad. These seven banks together own thirty-eight branches in the country distributed among the larger commercial and industrial towns.

"In going over the turnover of the banks I would point out that, in order not to be misled, one must take the depreciation of currency into consideration. The share capital of the seven banks at the end of 1921 amounted to 269.000.000 kronen. In accordance with decisions taken at the general meetings of the banks, the share capital of five of the banks will be raised during the current year. The reserve funds amount to 122¼ million kronen. The net profit for 1921 shows an increase of 10¼ million kronen. The proportion of reserve funds to share capital at the end of 1921 is 45.5 per cent. The banks' own capital, by which is understood the share capital and reserve funds, amounted at the end of the year 1921 to 391¼ million kronen. This will, through the above-mentioned increase of capital, in the carrying forward of part of the profit to the reserve fund, be increased by about half a milliard kronen.

"The deposits (savings and current accounts) reached at the end of the year 3,885½ million kronen. Against this are the outstandings (credits) of 3,147 million kronen. In this last figure are included, of course, investments with other financial institutions. Unfortunately, it cannot be seen from the reports what is the extent of these investments for all the banks. For three of the banks the amount invested in other banking concerns can be put at 746½ million kronen. One can fix the amount of the credits at about 2,400¾ million kronen. The proportion of credits to deposits is 76.3 per cent. The proportion of the banks' own capital (share capital and reserves) to outside (deposited) capital is 10.06 per cent. The financial position of the institutions reflect a well-thought-out and sound financial policy, for the deposits of 3.885½ million kronen stand against liquid money to the value of 1.731¾ million kronen. To the liquid capital must be added cash, foreign currency, bills of exchange, and drafts, securities and investments with other banks. The proportion of liquid resources to deposits is 44.5 per cent.

"Six of the seven banks own large bank premises, which can be reckoned as assets of a value of approximately 50,000,000 kronen. The banks' balance-sheets show on the credit side, under shares, 188¾ millions in different securities, in which are included participations in other concerns, moneys in transit, and the inventories. On the debit side are shown 133¾ million kronen in guarantees, re-discounts, caution money, unpaid dividends, and money in transit.

"In conclusion, there remains the profits and their distribution to be mentioned. The seven banks showed at the end of 1921 a net profit of 50¾ million kronen. From this sum 30 millions as dividends and bonuses were paid, and 10¾ millions went to reserve funds. From the remainder 4½ million kronen were paid as bonuses to the management and advisory councils, 2½ millions to employees' pension fund, and ½ million kronen to charitable objects. The balance of 2½ million kronen was carried forward to the new account. On the average 10 per cent. was paid on the share capital as dividends. The lowest dividend was 7 per cent., and the highest 15 per cent. The difference in the return on money in the various parts of our country is too great for a flat rate of interest to be fixed. What is customary in one part of the country would be considered unusual in another. In reviewing the seven Slovenian banks we find they participate in seventy-three industrial and commercial undertakings. The banks make their influence felt in all branches of business life—metal, timber, textiles, building, artificial manure, brewing and distilling, sugar, colour manufacture, foreign trade and transport enterprises, printing, wholesale provision trade, etc."

PALESTINE IMPORT DUTIES.

For a period of two years commencing from September 1, 1922, import duty on wooden staves for making barrels and cut timber for the manufacture of orange cases, and on the following classes of building materials will be at the rate of 3 per cent. *ad valorem*, plus 1 per cent. *ad valorem*, foreign imports additional duty, viz.:—

Timber.—Hard or soft wood in the round, baulk, or sawn square, for house building or constructional purposes; but excluding prepared joinery, such as doors and windows, with or without frames and the like, laths for blinds, palings, pickets, dressed or undressed, architraves, mouldings, and skirtings of any material, picture, and room mouldings.

Iron or Steel.—Galvanised iron sheets, plain or corrugated; sections, rolled iron or steel of H, channel, angle, or other shape, or built up girders; all forms of iron or steel reinforcement used in ferro-concrete construction, cast iron or steel columns; but excluding all articles of brass, copper, and lead, and such articles of iron and steel lined or plated with brass, copper or lead; pipes and tubes, wrought and cast-iron fittings for pipes; metal parts of machinery and manufactures of iron and steel not otherwise stated.

Window glass, ordinary, but excluding plate glass, looking-glass and mirrors, whether mounted or not.

Bricks.—Hollow bricks for partitions; slates and tiles for roofing; but excluding wall, bath, fire, and glazed bricks.

Cement.—Portland cement; also Roman, Keen's, or similar cement; but excluding plaster of Paris, limes, and patent plasters having a lime basis.

Other articles.—Roofing felt, asbestos sheeting.

ROUMANIAN RAILWAY DEVELOPMENT.

A report received by the Department of Overseas Trade states that the new normal gauge railway between Ungheni (now called Vasile Lupu) and Kishinew (Bessarabia), which is 120 kilometres in length, was finished on August 14, and the first trial took place the day after, when a train loaded with 500 tons of goods made a satisfactory run over the whole of the line. The official inauguration of the line was fixed for September 1, and it will now be possible for the railway administration to run direct trains from Bucharest to Kishinew, which has previously not been feasible owing to the Bessarabian railway line being of the broad gauge type.

Stock and Share Markets.

BETTER TONE PREVAILS.

Anglo-Persians a Feature.

(From Our Own Correspondent.)

London, Tuesday Morning.

In view of the Near Eastern crisis, it was not to be expected that there would be any movement in the Stock Exchange during the past week, and, as a matter of fact, the markets have been dull and featureless for the most part. The week-end improvement in the situation came as a very welcome relief, and yesterday saw a distinct hardening tendency, though it was not altogether maintained, for towards the close a dull tone set in again, probably due, to some extent, to Paris selling.

We must expect inactivity to prevail generally until the Near East situation is settled, and that means that a considerable time must elapse, for, as everyone knows, peace negotiations have a habit of being unduly prolonged. It can only be hoped that it will not be so in this case, for it is essential in the general interests that the world should settle down as soon as possible. It is the more deplorable that a crisis should have arisen, as commerce was undoubtedly beginning to improve, and, of course, the only result of what has been happening in the Near East will be to put things back. But there could have been no real trade recovery until there was a settlement in the Near East, and when that is brought about commerce should develop rapidly, and the effect on the stock markets—on many of them at any rate—should be pronounced.

The announcement of the placing of the large contract for irrigation in the Sudan has naturally attracted attention to the Sudan Plantations Syndicate, whose shares are now 4 5-16, to which they have risen from about 2½ at the beginning of the year. The company recently declared an interim dividend of 3s. per share, which was the same as the total distribution for the previous twelve months. Naturally, there is considerable speculation as regards the possible final distribution. It is noteworthy that for 1919-20 dividend and bonus together amounted to 7s. per share, but conditions then were, of course, much more favourable than they are now.

Gilt-Edged Better.

Turning to the markets, Gilt-edged generally show an improvement on the prices of the previous week, and this group was fairly strong yesterday, despite the dull tendency, which, as I have already pointed out, developed at the close. Consols at 55⅞ make a better showing, while the Conversion Loan at 72¾ has gained ⅜. War Loan Fives at 99⅝ are 1-16 up, while Fundings are 86⅝. The Indian group generally has recovered somewhat. The 7 per Cent. Stock is ½ up at 111½, the 3½ per Cent. stock at 65¼ is ½ up, while the 3 per Cent. stock has gained ¼ at 55¼.

With a few exceptions a fairly firm tone has obtained in the Foreign group, and prices have shown a tendency to recover. French stocks, in particular, have improved. War Loan Fives are 2¾ up at 35¾, while the 4 per Cents. at 29 are 2 up. German 3 per Cents. have also hardened, and are ⅛ up at 1¾. In Near Eastern securities Turkish Unified have improved to 31½, but Greek Monopolies are unchanged at 32½. Russians have been rather dull. The 4 per Cents. are ½ down at 6, the 4½ per Cents. are the same at 7½, while the 5 per Cents. are unchanged at 11. Czecho-Slovak 8 per Cents. have been better, and close ½ up at 92½. An inactive tendency has ruled in South American descriptions, and Brazilians tended to ease off somewhat. Argentine and Chilean descriptions were, however, fairly steady.

Industrials Quiet.

A better tone has ruled in the Industrial group, and in some directions a sharp improvement is to be recorded. Business, broadly speaking, has been on the most restricted lines, however, and this condition of things is not likely to be changed until the political situation becomes much clearer.

Tobaccos have been a notably firm spot during the week, Bats being 1s. 6d. up at 87s., while Imperial Tobaccos at 68s. 9d. are 2s. 6d. up. Textiles have improved, but close below the best. Courtaulds at 54s. 3d. are 6d. up, Coats are 6d. up at 66s., while Listers are 3d. down at 26s. 9d. Iron and Steel secur[illegible] fairly well maintained. Vickers at 12s. 3d. are 3d. up, Armstrongs are unchanged at 15s. 6d., while Guest Keens remain at 35s. A weak tone has prevailed in Indian railway descriptions. Bengal and North-Westerns are 4¾ down at 135, Bengal Nagpurs are 3 down at 95, Bombay Barodas at 93½ are ¾ lower, while Delhi Umballa are 18½.

Shipping securities have been rather featureless. P. and O. Deferred are unchanged at 295, Cunards are 19s. 6d., Furness Withys are unchanged at 30s. 3d., and Khedivial Mails are 3¼.

Oils Improve.

A better tendency has ruled in the Oil group, though, as in the other markets, prices closed below the best. The recovery in this market speaks eloquently of the renewal of confidence as regards the situation.

Anglo-Persian ordinary have been a feature of the week, closing at 5 15-16, a gain of 7-16, while Burmahs at 5 11-16 are 3-16 up. Mexican Eagles at 3 5-32 are 3-32 lower, while Shell Transport at 4 19-32 are 1-16 better. Trinidad issues have shown a steady tendency. Apex are unchanged at 2 1-16, Centrals at 1 15-16 are the same as before, while Leaseholds at 1⅜ are 3-16 up.

Russian stocks have been a shade harder. Spies at 6s. 9d. are 9d. up, Anglo-Maikops are unchanged at 4s., North Caucasians at 13-16 are 1-16 up, Ural Caspians are unchanged at ¾, while Uroz are 9d. up at 10s.

Among Egyptians Anglo-Egyptian B are 1½, the same as last week, while Oilfields of Egypt are 3d. up at 2s. 9d. In the Roumanian group Phœnix are 6d. up 27s. 6d., Roumanian Consolidated are 9d. up at 13s. 9d., Steaua Romanos have gained 6d. at 10s. 9d., Dacio Romanos are unchanged at 13-16, while Hamilton's Concessions are 1s. 9d.

Banks Inactive.

A rather dull tone has ruled in banking descriptions. Chartered at 17⅜ are ⅛ down, National of India are 41½ xd., P. and O. Banks are 14⅛, at which they are ⅛ lower, while Bank of British West Africa are unchanged at 4¾.

In Egyptians Aboukirs are unchanged at 21s., Beheras at 7¾ are ¼ down, Egyptian Markets at 21s. 6d. are the same as before, Gharbieh Lands remain at 1 7-16, while New Egyptians are 9d. down at 23s.

The numbers are published of bonds of the Greek Government that have been purchased for cancellation. These include 1,045 obligations of the Four per Cent. Loan of 1910, and 2,250 obligations of the Five per Cent. Loan of 1914.

The Postmaster-General announces that the air mail for Baghdad, which left London on September 7, reached Baghdad on September 18. The air mail for London, which left Baghdad on September 15, reached Cairo on September 17, and should arrive in London this week.

The headquarter authorities of the Czecho-Slovak Chambers of Commerce at Prague have held an inquiry on the economic crisis, and it was agreed that the most effective measures for attaining stability of the crown and a consequent improvement of trade and industrial conditions would comprise the establishment of a bank of issue with an adequate metal reserve, the abolition of export licences, a strict frontier control of the purchases made abroad by Czecha-Slovak subjects, together with the reduction of official salaries, taxes, tariffs, and workmen's wages.

Engineering Topics.

Boiler Essentials.

A query raised by a correspondent gives rise to some thoughts on boiler design, and it would appear that, after all, the chief essentials are that a boiler should be efficient, simple, and straightforward; have a large safe evaporative capacity; provide a large margin of safety, and be durable. The days of the old-fashioned, cumbersome, and wasteful boiler are gone never to return, but there certainly is, as my correspondent remarked, a danger of over-elaboration in boiler design.

It is universally understood that for many big installations the Lancashire type of boiler would be quite impracticable, by reason of the large amount of space it occupies. Even with modern boilers of the water-tube type, this question of space is compelling more and more attention. Especially is this the case with electrical power stations, as the demands on these are generally increasing, and few have room in which to instal further boiler power.

Actually, the power station engineer is bound to have regard to every factor which will reduce capital expenditure, and from this point of view he must inevitably prefer that type of boiler which will reduce the initial outlay to a minimum, and, as an authority has just said, he must inevitably come to prefer the type of boiler which, consistent with conditions of high efficiency, will give him the maximum amount of steam in a given time out of a given size of boiler-house. It is for this reason that the Multidrum boiler, with tubes connected direct to the drums, which is capable of being worked at evaporative rates relatively higher than is usual with the sectional boiler, has made steady progress against many other types. It is for a similar reason that the Clayton boilers, now so popular, have been designed with special regard to high steaming capability, and as a result I hear that it is possible in practice to operate them satisfactorily at much higher rates of evaporation in terms of heating surface than are safely possible with alternative types.

A New A.-S.

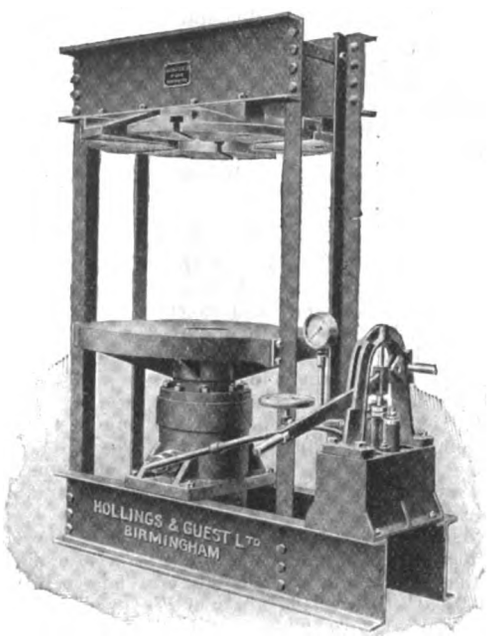
I am given to understand that a new Angus-Sanderson may shortly make its appearance, with a four-cylinder, 8 h.p., water-cooled engine, a three-speed gearbox with a right-hand change-speed lever, a Lucas electric starting and lighting set, detachable wheels, good-sized tyres, and comfortable body work, to sell at something below £500. The old 14 h.p. Angus-Sanderson was a first-class production, and if the new model is anything like as good, comparatively speaking, it should prove a sound investment. Another new car which may be on the market shortly will be a six-cylinder Berwick, but it is just possible that there may be some little delay in the appearance of this car. The new Crouch, I hear, will be in evidence at the forthcoming Olympia show, and I have been informed by several other makers that they will be showing new models at Olympia.

Sudan Irrigation.

The interesting announcement has just been made that Messrs. S. Pearson and Son, the famous firm of contractors, have been given a contract for new irrigation works in the Sudan, the amount involved being approximately £4,000,000. The contract, for which five other well-known firms also competed, is the first substantial order obtained by this country from overseas since the war. The scheme—the work on which will be commenced at once—will include the construction of a dam across the Blue Nile nearly two miles in length, and also about 650 miles of canal and drainage. The area that will be irrigated is about 300,000 acres. It is expected that the work will be completed in about three years. All the plant and machinery required will be obtained in this country, and it is stated that contracts for this material will be placed without delay.

Tyre Presses.

I have just received a copy of Messrs. Holling's and Guest's new illustrated list giving details of their latest models of tyre presses, etc. Illustrations are given of the firm's well-known standard presses, one of which, designed for the heaviest class of work, is fitted with power pumps driven by an electric motor, also of the slot-head tyre press, which is similar to the standard presses, but, in addition, is made with an open slot, so



A Light Tyre Press.

that tyres can be fixed or removed without taking the wheel from the axle. The illustration on this page shows the firm's light-tyre press, which is very useful for small garages, and is specially suitable for the export trade.

A 1923 Model.

The new 1923 model of Napier 40-50 h.p. car, which will be on exhibition at the forthcoming Olympia show, is not, to outward appearance, much different to that of the present year, but a number of minor improvements have been incorporated which add greatly to the comfort of riding, ease of driving, and flexibility of the engine. I was afforded an opportunity, a day or two ago, of trying out the new production on the road. I took it a fairly average journey, out of London through High Wycombe, through some byways, hills, and lanes in the Chiltern district, out to Oxford and home by way of Dorchester, Henley, and Brentford, and throughout the run the amazing flexibility of the engine was conspicuously in evidence. It was, in effect, a top-gear run, it being possible to slow the car down in traffic to five or six miles an hour and pick up, on top, to any speed one wanted. The car is a fine car for traffic work, and by reason of its quick acceleration a very high average rate of speed can be maintained. At all speeds there is a marked absence of vibration, and the springing of the chassis is little short of perfection. I should think the Napier has now reached the zenith of British car production.

Near East Markets.

LONDON PRODUCE REPORT.

Dried Fruit Position.

(*From Our Own Correspondent.*)

London, Monday Night.

Sugar.—Home refined has been in moderate demand at lower rates. Tate's cubes have shed 1s. 6d. at 56s. 6d., while mineral water sugar has lost a like amount at 50s. 6d. London granulated is 1s. 9d. lower at 49s. 9d., while Lyle's granulated is eighteenpence down at 49s. 9d. Foreign descriptions are lower. West Indian crystallised has shed 1s. at 42s. 6d., and white Mauritius has declined 6d. at 46s. 9d. White sugar quotations are:—September, 21s. 6d.; October, 20s. 7½d.; November, 20s. 6d.; December, 20s. 7½d.; March, 20s. 10½d.; and May, 21s.

Coffee.—The market remains steady. East Indian shows no change at 116s., as also Costa Rica at 112s. The futures market is firm. Quotations are:—December, 60s.; March, 60s. 9d.; and May, 61s. 3d.

Desiccated Coconut.—The demand has improved slightly, while prices have again risen

Rice.—"Two Star" rices are very difficult to obtain owing to a small stock after the large demand of the past few weeks. Further supplies are not expected to reach here until November. Prices for this variety have also advanced during the week. The new crop of Spanish Japan rice is said to be in very good condition, and first arrivals are due in a few weeks' time.

Green Fruit.—Large quantities of South African oranges have arrived during the week, while the demand is sufficient to clear the market of this stock in a few days. Quotations remain steady. A small shipment of Naples lemons has come to hand, and exceedingly high prices are being demanded. The season is expected to close after the next two or three shipments. Valencia onions have been in marked request at slightly higher rates.

Dried Fruit.—The market is going to be uncommonly short of dried fruit until peace is arranged with Turkey, and it seems fairly clear that, while steps will be taken to reorganise the trade immediately conditions permit, sultanas and figs will be conspicuous by their absence at the table this winter.

Oilseeds.—A variable tone has been in evidence. Indian linseed has risen and is now 19s. 1½d., a rise of 9½d., while La Plata has gained 1s. 3d. at 17s. 9d. Rapeseed is unsteady, with Toria 4½d. lower at 17s., while bold Ferozepore is firm at 16s. 6d. Cottonseed has been variable. Egyptian black is unchanged at 9s. 6d., while Sakellarides has gained 6d. at 9s. 3d. Indian has shed 3d. at 8s.

Oils.—An irregular tone has prevailed. Linseed oil has advanced 1s. at 36s. Crude rape oil and refined have both shed 1s. at 41s. and 43s. respectively. Cotton oil has been unsteady. Egyptian is unaltered at 32s., as also technical at 36s. Refined and deodorized have both dropped 2s. at 41s. and 46s. respectively.

Oilcakes.—Steadiness has been noticeable throughout, with the exception of coconut cake, which has advanced 30s. at 210s. The remaining quotations show no change. Linseed cake is 250s., cottonseed cake is 140s., and cotton-meal cake is 250s.

OPIUM MARKET REPORT.

Messrs. Barker Bros., Smyrna, report as follows under date August 31:—

Since our last report of the 15th inst., we have had two very active weeks, with sales amounting to 148 cases, at prices fully Ps.100 per oke higher, which at to-day's exchange of Ps.740 per pound sterling is equivalent to 10s. 6d. for current new manufacturing qualities about 11 per cent. morphia, 11s. 6d. for selected druggists 11½ per cent., and 12s. 6d. for old selected druggists 12 per cent.

Our stock is now fast depleting, and what is worse, it cannot at present be replenished, owing to renewed fighting between the Greeks and Turks, which cuts us out of all communications with the principal opium-growing districts. The arrivals to date are 608 cases, against 290 at same date last year, and our stock in first and second hands is now 713. The exchange is now Ps.740 per pound sterling, and 0.60 dols. for one Turkish pound.

Maize may now be exported from Roumania subject to the payment of an export tax of 3,000 lei per metric ton.

Numbers are announced of 291 bonds, amounting to £88,000, of the Ottoman Four per Cent. Loan of 1891, secured by the Egyptian Tribute, which have been drawn for redemption on October 10.

EGYPTIAN CROPS.

The bulletin of the Egyptian Ministry of Agriculture gives the following particulars of crop conditions in Egypt in August:—

Cotton.—During the month under report the weather was generally favourable, except on a few days when temperature was too high. Water shortage was felt on tails of canals, but with diminishing severity until about the middle of the month; subsequently the supply everywhere was adequate. In some localities, where water shortage occurred in conjunction with high temperature, a certain amount of premature ripening occurred, with subsequent drying of bolls in certain localities. The cotton worm (*Prodenia*) attack died out early in the month. Pink boll worm is reported from all provinces. The degree of attack varies considerably, but up to the present it is not in general abnormally severe. The percentage of green bolls attacked in the last week of August was considerably higher than for the corresponding date of late year. As, however, the crop this year is about ten days earlier than last year, the comparison is better made with a date ten days later last year. In this case there is seen to be practically no difference.

Millet (Sêfi).—Harvesting is general. Very slight attacks of smut, rust, aphis, and stalk-borer (*Sesamia Cretica*) have been reported. A fair yield is expected.

Rice (Sêfi).—Weather was generally favourable. Owing to water shortage, the area under this crop is limited. Where a regular supply of water was obtained from artesian wells or from the Nile, the crop is fair and is forming ears. The general condition is below average.

Sugar Cane.—The weather was most favourable, and water supply was ample during the month. Lateness of sowing has affected the crop. On the whole, its condition is about normal.

Earth Nuts.—Water supply is now ample. The crop is not expected to ripen before October.

Maize (Nili).—The weather was favourable. Owing to the scarcity of water when sowing started, the crop is somewhat later than last year. The early-sown crop is well advanced.

YUGOSLAV FRUIT HARVEST PROSPECTS.

The Commercial Secretary to H.M. Legation, Belgrade, reports that the great heat which prevailed at the end of July has caused considerable damage to the plum crop, and it is anticipated that the yield will now be some 10 to 15 per cent. smaller than was originally estimated. The original estimate for the Serbian and Bosnian dried plum crops amounted to 4,500 and 2,500 wagons respectively. In West Serbia and Bosnia the plums are of excellent quality, and it is hoped that they will be able to compete on favourable terms with the Californian product.

The demand from the United Kingdom and Germany for prunes is stated to be considerable, and the Minister of Transport has arranged for a large number of wagons to be held at the disposal of exporters. A further measure taken to facilitate the trade in this staple commodity is the reclassification of prunes in the State Railway Tariff to allow of their transportation at lower rates whether for exportation or local transit.

OLIVE-OIL INDUSTRY OF GREECE.

In recent years Greece has become one of the most important olive-oil producers in the world, says an American Consular report. Its production in 1921 was one-sixth that of all countries (final estimates placed the total world production of olive oil at 1,100,000 metric tons), about one-third that of Spain and Italy combined, and a little more than 35,000 metric tons larger than that of Tunis, Portugal, and France put together. The chief centres of production are the islands, the Peloponnesus, and some of the departments a little away from the coast. Production near the sea is very limited, as the sea winds are almost fatal to the growth of the olive trees.

In general, Greek oils are not of the best grades, but that does not mean they cannot be improved. The Greek olive is said to be as good as that of any other country. The trouble is that the methods still used are generally primitive. In many cases the fruit is not properly cared for nor pressed immediately, for lack of adequate means, especially when the olive crop is large. The result is that the oils contain as a rule a high percentage of free fatty acids which greatly reduce their otherwise good quality. There are many qualities and consequently many different prices. The cheapest oils are largely produced in the islands of Crete and Corfu and, to a large extent, in Laconia. These oils are invariably quoted below the average, while the oils from Chios, Larissa, Achai, and Eliad always command the highest prices.

ROUMANIAN GRAIN OUTPUT.

(*From Our Own Correspondent.*)

Bucharest, September 11.

The Ministry of Agriculture has issued details of this year's grain crop, as compared with that of last year. The area under wheat was 2,615,010 hectares as compared with 2,488.335, the yield being 35,821,990 hectolitres as against 27,648,749. Barley was grown on 1,746,838 hectares as compared with 1,569.373, and the yield was almost double at 31,095.100 hectolitres as against 15,517,886. An area of 1,319.000 hectares was devoted to oats as against 1,239,006, the yield being 26,037,000 hectolitres as compared with 20,344,778. The area under rye was smaller at 266,543 hectares as against 326,576, but the yield was greater at 3,411,600 hectolitres as compared with 3,199,166. The exact figures for the maize crop will be known in about two months' time.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated September 18:—

Season.—September 11—Heavy rain in Central Provinces. September 12—Heavy rain in central parts of India and East Gujerat. September 13—Monsoon strengthened slightly in Burma and north of Peninsula. September 14—Strengthened in central parts of India and extended to Punjab. September 15—Active in north-west India and extended to frontier. September 16—Strengthened in Peninsula and extreme north. September 17—Weakened in Peninsula and Punjab.

Condition of Crops.—September 5.—Bombay rains this week have ensured good cotton crops in Khandesh and Gujerat. In Gujerat, rain now is excessive and Bajri crops will be injured. In Bombay, Deccan, and Karnatak, kharif crops will be good in west. but very poor or even a failure in east. Much anxiety is felt as to the possibility of sowing rabi crops everywhere in these areas as sowing rain is very deficient. Sind prospects are satisfactory. In Punjab good rain has fallen nearly everywhere, benefiting kharif crops. In Central Provinces, sesamum and rice prospects are good, and cotton fair to good. Prospects of other provinces are unchanged.

Markets.—September 15.—In Bombay cotton market attention of trade is centred on attempted corner in Oomras section, and genuine trading is on a very small scale, Japan, Europe, and local mills not being in market. Fine M.G. Oomras, Rs.473.8, September; Rs.421.8, December-January. Bombay cotton arrivals from September 1 to 8 were 8,000 bales, as compared with 18.000 bales during the same period of the last year. Bombay imported piece-goods market continues dull, but retail inquiries are helpful. Local goods moving steadily. September 16.—Calcutta jute market steady. Rates slightly better. Hessians steady, but business small. Ready 9 Porters Rs.18.6, 11 Porters Rs.25.4. Heavies quiet but steady.

Tea.—At tea sale on September 12 selections were generally less attractive, but quality was good. Market declined for all leaf grades. Prices of well-made orange Pekoes and Pekoes were lower by 9 pies to 1 anna, at which decline there were good inquiries. Common tea also was easier, but mediums, brokens, and best liquorings were steady to occasionally dearer. Dusts were lower. There were strong demands from all out markets. This sale's average price was 11 annas 3 pies per lb., as compared with the last week's average price of 11 annas 10 pies per lb. 234.398 packages were sold to date at an average price of 11 annas 1 pie per lb. Crop returns for August show an increase of 6¼ million pounds over last season. Total to end of August was 161 million pounds against 137¾ million pounds of the last season. September 13.—Rangoon rice market witnessed considerable fluctuations due to bear operations. It opened weak at Rs.430 for September special Straits quality rice, and Rs.414 for October sellers. October sellers were strongly in evidence. Heavy selling sent price rapidly down to Rs.424 September, Rs.408 October. Quotations on September 15: Boat Paddy, Rs.195 to Rs.200; rail, Rs.185 to Rs.190. September 15.—Shellac market unchanged. No change in Bank rates.

During the 1921-22 fur season just ended the principal furs received in the Salonika market were:—Hare, 150,000; fox, 17,000; stone marten, 6.000; wild cat and jackal, 4.000 each; and badger, 3,000. Prices were 70 per cent. higher than in the previous season.

The Egyptian Delta Light Railways, Ltd., announce that coupon No. 50 falling due October 1, on the 5 per Cent. Debentures of the Egyptian Delta Light Railways, Ltd., should now be lodged at the Bank of England for payment.

CURRENT PRICES.

General Produce.—Bacon (Continental), 146s. 6d. per cwt.; (Canadian), 130s. cwt.; (American), 108s. 6d. cwt.; butter (Danish), 226s. cwt.; (Australian), 198s. cwt. (New Zealand), 209s. cwt.; cheese (Canadian), 90s. cwt.; (New Zealand), 91s. cwt.; lard, 73s. cwt.; eggs (Danish), 19s. 9d. per 120; (Styrian), 12s. per 120; chillies, 140 cwt.; cloves (Zanzibar), 1s. 3½d. lb.; cocoa (Ceylon good to fine), 81s. 6d. cwt.; coffee (Costa Rica), 117s. 6d. cwt.; (East Indian), 115s. cwt.; (Central American), 95s. cwt.; (Jamaica), 72s. 6d. cwt.; (Mocha Longberry), 100s. cwt.; (Santos superior), 69s. cwt.; (Nairobi), 101s. cwt.; ginger (washed Cochin), 52s. 6d. cwt.; nutmegs (110's to 80's), 1s. lb.; pepper (Singapore black), 3¾d. lb.; (Muntok white), 6⅜d. lb.; pimento, 2d. lb.; raisins (Cape), 55s. cwt.; currants (Vostizza), 70s. 6d. cwt.; currants (Amalias), 65s. cwt.; sultanas (Smyrna), 130s. cwt.; sugar (Tate's cubes), 58s. cwt.; (Lyle's granulated), 50s. 9d. cwt.; (Mauritius crystals), 47s. cwt.; (West Indian crystallised), 45s. cwt.; (centrifugal), 16s. 9d. cwt.; tapioca (fair Singapore), 2½d. lb.; rice (Rangoon No. 2), 15s. 4½d. cwt.; (bran Rangoon), £6 8s. 9d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 1s. 11d. lb.; tea (Indian common to good common), 1s. lb.; (medium to good), 1s. 5d. lb.; (fine to finest), 2s. 8d. lb.; Ceylon (common to good common), 1s. lb.; (medium to good), 1s. 5d. lb.; (fine to finest), 2s. 5d. lb.; Java (common to good common), 10d. lb.; wheat (English white), 46s. 6d. qr.; wheat (Australian), 52s. 6d. qr.; oats (English), 41s. qr.; oats (La Plata, ex-ship), 26s. 1½d. qr.; maize (La Plata), 40s. 3d. qr.; flour, 36s. 6d. sack.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 9½d. lb.; 80 to 89 lb., 9½d. lb.; 70 to 79 lb., 9½d. lb.; 60 to 69 lb., 8⅝d. lb.; 59 lb. and under, 7⅞d. lb.; (second), 90 lb. and up, 8⅜d. lb.; 80 to 89 lb., 8¾d. lb.; 70 to 79 lb., 8d. lb.; 60 to 69 lb., 6⅞d. lb.; 59 lb. and under, 5½d. lb.; cows (first), 60 lb. and up, 7½d. lb.; 59 lb. and under, 6⅝d. lb.; (second), 60 lb. and up, 5½d. lb.; 59 lb. and under, 5¼d. lb.; bulls (first), 5d. lb.; (second), 3½d. lb.; kips (first), 6⅛d. lb.; (second), 5½d. lb.; (third), 3⅜d. lb. Calcutta Market (prices in rupees per 20 lb.):—Arsenic hides (cows): Agras, 7 to 12; Durbhangas, 6 to 7.8; Patnas, 5 to 6. Salted cows: 6 to 8.8. Arsenic hides (buffalo): 3 to 6.8. Skins: Calf, 8 to 10 per 20 lb.; goat, 200 to 260 per 100 pieces.

Chemicals.—Acids: Boric, 61s. cwt.; oxalic, 7½d. lb.; citric, 2s. 3½d. lb.; tartaric, 1s. 4½d. lb.; ammonia (sulphate), £15 16s. 6d. ton; arsenic (white powdered), £41 10s. ton; benzole (standard), 2s. 5½d. gallon; bleaching powder (35 per cent.), £12 ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 109s. cwt. Potassium: Bichromate, 6¼d. lb.; chlorate, 4½d. lb.; caustic, £30 5s. ton; nitrate, £37 10s. ton; permanganate, 8½d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £13 15s. ton. Sodium: Crystals, 110s. ton; bi-carbonate, £10 5s. ton; bichromate, 5½d. lb.; alkali (58 per cent.), £8 1s. 3d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £20 2s. 6d. ton; hyposulphite, £15 10s. ton; prussiate, 11d. lb.; nitrate, £13 7s. 6d. ton; glycerine (crude, 80 per cent.), £48 ton; (industrial, 1260 per cent.), £87 10s. ton; lemon oil, 2s. 11d. lb.; quinine, 2s. 2d. oz.; red lead, £37 17s. 6d. ton; white lead, £40 10s ton; white ground lead, £49 2s. 6d. ton; sulphate of copper, £26 5s. ton; sulphate of iron, 55s. ton.

Metals.—Aluminium, £100 ton; antimony (English Regulus), £27 12s. 6d. ton; bismuth, 9s. lb.; copper (standard), £63 3s. 9d. ton; copper (electro), £71 2s. 6d. ton; gold bars, £93 1d. oz.; iron (No. 3 Cleveland), 89s. ton; hematite (mixed number), 89s. 6d. ton; galvanised sheets (25 G), £16 10s. ton; lead (soft foreign), £23 15s. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 40s. unit; nickel, £145 ton; platinum, 500s. oz.; graphite (80-90), £13 10s. ton; quicksilver, £13 7s. 6d. bottle; spelter (G.O.B.), £31 5s. ton; tin (standard), £159 13s. 9d. ton; wolfram, 14s. unit; zinc sheets, £39 3s. 9d. ton; tin plates (20 by 14), 19s. 1d. box; silver bars, 35½d. oz.

Miscellaneous.—Cotton (American), 13.40d. lb.; Egyptian (Sakel), 17.15d. lb.; jute (first grade), c.i.f., £34 5s. ton; jute (lightnings), £31 5s. ton. Oilseeds: Linseed (La Plata), £16 2s. 6d. ton; palm kernels, £16 3s. 9d. ton; castor seed (Bombay), £16 16s. 3d. ton; sesame seed (China), £22 12s. ton; soya beans, £11 15s. ton. Oils: Linseed, £34 10s. ton; olive (Spanish), £75 10s. ton; rape (crude), £40 10s. ton; soya, £34 ton; petroleum, 1s. 4½d. gallon; petrol, 2s. 1d. gallon; fuel oil (ex-tank), 65s. ton; cocoanut (Ceylon), £36 15s. ton; cotton (crude), £32 10s. ton; ground nut, £47 15s. ton. Rubber: Plantation (No. 1 crepe), 7⅛d. lb.; smoked sheet, 7⅛d. lb.; fine hard Para, 10¼d. lb.

Abyssinia offers a market for textiles, but suppliers must be willing to accept small orders until the market is more fully developed.

A message from Smyrna, says Reuter, states that the railway from Angora to Afium-Karahissar and Smyrna has now been completely repaired, and traffic will shortly be resumed.

Cotton and Cotton Goods.

THE EGYPTIAN MARKET.

Poor Trade Demand.

The Commercial Co. of Egypt, in their report for the week ended September 8, state :—

The market during the past week has been irregular; the tone on the whole has been weak. Despite the low figure of the American Bureau Report, published last Friday evening, and the admittedly less favourable reports on the Egyptian crop, the better feeling apparent at the end of last week was not maintained, and on Wednesday prices were again under 34 dols. for November. A rumour that the Government was about to publish a preliminary crop estimate—which was to show 4,100,000 cantars—produced a reaction, and prices improved 1 dol. during yesterday's session. We cannot find that the rumour has any foundation—indeed we consider it unlikely that the Government will issue any estimate so early. Trade demand continues to be poor; the inquiry persists, but present prices are apparently above spinners' ideas, and little actual business is put through. Arrivals show a slight increase, whilst exports have been restricted, owing to a labourers' strike at Minet-el-Bassal. The stock stands at 1,369,946 cantars.

Spot.—The Minet-el-Bassal market has been rather more active this week. Sales amount to about 7,800 bales, of which we estimate 4,600 bales Sakellaridis, 3,000 bales Uppers, 100 bales Brown, and 100 bales White. Cotton from Upper Egypt is beginning to arrive fairly freely, and we have also had one or two lots of Sakellaridis, but it is too early as yet to offer an opinion on the cotton.

Sakellaridis.—The bulk of the business has centred on the medium grades from fully fair to fully good fair, with a little demand for the low qualities. More attention has been paid to the high grades, due, no doubt, to the attractive basis at which these cottons are offered in comparison with the medium grades. The basis is firm and generally rather dearer.

Uppers.—Rather a good business has been done in all styles, with more attention to high grades new crop. There has been some fairly good buying of medium qualities good fair to fully good fair. The basis is without quotable change.

Brown.—A small business has been done in the medium qualities without change in basis.

White.—There has been a small but persistent demand in medium and good grades. Only a small business has resulted, as supplies are very small, but very good prices have been paid for high grades in comparison with similar grades of Sakellaridis. The basis is markedly dearer than last week.

Crop.—Crop news is only fairly satisfactory. It becomes more apparent that the shortage of water during July has had much more effect than was anticipated, and the opening of the early bolls shows no improvement. However, the plant has now had nearly a month's growth with sufficient water, and the bolls formed during that period may, and probably will, open much better. Pink boll worm attack is about the same as last week. The disease which attacked the worm last year is again in evidence, and is restricting the activities of this pest. Temperature continues above normal, and the humidity is high.

MANCHESTER COTTON TRADE.

Transactions Very Limited.

(*From Our Own Correspondent.*)

Manchester, Saturday.

During the past week this market has again been seriously affected by the political situation in the Near East, and owing to the uncertain outlook traders generally adopted a policy of caution with the result that no business of any importance has been done. There is a feeling, however, that the Near Eastern question will soon be settled. On the other hand, many traders are afraid of the trouble spreading to India. The fluctuations in raw cotton rates have been very disconcerting. With regard to the cloth section, as can only be expected, trade with the Near East has been at a standstill. Many shippers have lost heavily on account of the trouble, and merchants with stocks out there are very nervous as to their safety. Small cloth transactions have been recorded for India, chiefly Madras. Monsoon news has continued favourable. This is a time of the year when buyers for China should be operating in a fairly large way, but during the week there has been practically a total absence of workable demand. Isolated transactions have taken place for the smaller outlets of the Far East and South America. Home trade buying has been patchy. With regard to yarns the position of spinners is amply illustrated in the decision of the Masters' Federation to restrict the output in the American section to the extent of two days a week for one month, commencing September 30. Spinners should now be able to improve their position.

LIVERPOOL REPORT.

Market More Optimistic.

Messrs. Reynolds and Gibson report as follows for the week ended September 20 :—

Business during the past week has ruled on very quiet lines. The crisis in the Near East has shaken still further what little confidence still remained to traders, and yet another outlet for Lancashire's goods has been placed temporarily out of the market. During the last day or two, the clouds have lifted somewhat, and a more optimistic feeling prevails, but the situation is still very obscure and is dangerously sensitive. Under the circumstances, it is not surprising that the volume of business done here shows a decrease on the previous week. The enquiry, which on one or two days assumed quite large proportions, has again been of a more general description, and a good deal of "averaging," which we hope will bear fruit in due course, has taken place. The only features calling for remark are: (1) A slight broadening of the enquiry for Upper cotton F.G.F. to Good, and (2) a still further accession to the enquiry for Low cotton. This latter is not a healthy sign, as it generally crops up when trade is bad. The Upper basis has stiffened slightly, and cotton such as is referred to above changed hands at about 14.50d.—14.75d. per lb. Best Sakellaridis has been asked for once or twice, but there appears to be little weight behind the enquiry.

White cotton is still in request, but there are few lots offering, and prices asked are generally high (19d.-20d.), with the result either that the prospective buyer is frightened away or else contents himself with White Sudan as a cheaper substitute. Brown Sudan cotton still continues to find favour, and good staple lots are not easy to find. A few enquiries for the best Tokar Sakellaridis have cropped up, but this style of cotton appears to be non-existent as far as this market is concerned. A certain amount of interest has also been displayed in Brown Afifi cotton with good staple at a figure of about 17½d. The enquiry generally proved to be for average. Pilion cotton has been neglected. C.i.f. business, which has shown some signs of waking up latterly, has been temporarily checkmated by the political trouble in Asia Minor.

Manchester reports have been quietly steady, and the tone has held remarkably firm in face of the many adverse influences affecting that centre. India has been the chief stand-by, as usual. The vote for short time in the American section of the trade has proved inoperative up to the present, as eight per cent. of the mills did not vote. These mills are being approached again, and a definite result is expected on Friday, 22nd instant. Eighty per cent. is required to carry the measure. Total sales, 2,100 (includes 600 Sudan). Quotations of Good Fair Upper and Brown are raised 25 points. Other quotations are unchanged on the week

COTTON TRADE REVIEW.

Business at a Standstill.

The Manchester cotton trade review of the Imperial Ottoman Bank for the week ended September 23 states :—

General.—The cotton trade during the past week has been dominated by the political situation in the Near East. Not only is trade at a standstill as regards the markets directly affected, but all other markets have been adversely influenced to a considerable extent. There is a distinct feeling of nervousness concerning the course of events in the near future, and so long as this continues no improvement is to be expected. The disastrous occurrences in Smyrna have doubtless inflicted heavy losses on many Manchester shippers who have goods lying there for their own account.

Yarn.—The yarn market has fully shared in the general depression, and very little business has been put through. Spinners of American coarser yarns will probably feel some relief that organised short time has become an actual fact, the Master Spinners' Federation having announced the decision to stop all mills spinning American yarns from Friday night to Tuesday morning during the period of one month.

Cloth.—It cannot be said that there has been any movement worth mentioning during the past few days. Inquiry for India continues, but prices offered remain in most cases unacceptable, and it is feared that, if Near Eastern developments are distasteful to Indian sentiment, further damage to British trade interests may result. China is still stand-

Digitized by Google

ing aloof, in spite of good reports concerning trade in Hong Kong and Shanghai. The increase in the tariff, however, is said to mean an addition of about 1½ per cent. all round in the price of cotton goods, and this is not going to help Lancashire exports. A little business is said to have been put through for the Argentine and the United States, and orders are spoken of here and there for Java and Singapore. The home trade remains dull, and purchases are on a very moderate scale.

Raw Cotton.—The happenings in Smyrna and the general situation in the Near East have not only caused buying for actual consumption to be reduced to a minimum, but have also prompted sales by speculative holders. Whilst the political news varies the outlook from day to day it is useless to anticipate any settled basis. Crop prospects in the United States have undergone practically no change. Closing prices are as follows:—American fully middling, 12.98; Egyptian fully good fair, 17.50.

EGYPTIAN TOURIST SEASON.

Important Meetings in London.

On September 21 a meeting was held at the offices of Messrs. Thomas Cook and Son of the members of the Executive Committee of the Egypt Promotion Association. Mr. H. W. Tite presided, and the other members present were Brigadier-General Blakeney and Messrs. C. Landauer, Gordon Clay, W. R. Todd, and P. S. Taylor. The advertising campaign for the ensuing season was discussed, and steps are to be taken to give immediate effect to the committee's decisions.

On the previous day representatives of Egyptian tourist interests held a conference with representatives of the principal American tourist agencies at Queen Anne's Chambers. Those present were:—Brigadier-General Blakeney, C.M.G., D.S.O., general manager of the Egyptian State Railways; Mr. H. W. Tite, manager for Egypt and Palestine of the manager of the Palestine Railways; Mr. Gordon Clay, Secretary-General of the Egyptian State Railways; Mr. G. H. Griffith, goods manager of the Egyptian State Railways; Colonel Newcombe, D.S.O., traffic manager of the Sudan Government Railways and Steamers; Mr. Austin Bull, European traffic manager of the Sudan Government Railways and Steamers; Mr. Charles Baehler, representing the Egyptian Hotels, Ltd., and the Upper Egypt Hotels Co.; Mr. C. Landauer, of the Grand Hotels of Egypt; Mr. Cornez, of the Heliopolis Hotels; M. Calomiris, proprietor of the National Hotel, Cairo; Mr. W. R. Todd, of Messrs. Thos. Cook and Son (Egypt), Ltd.; Messrs. R. Diacono and A. P. Friend, representing the Anglo-American Nile Steamer and Tourist Co.; Mr. F. A. Smyth, manager in Egypt of the American Express Co.; M. D. de Sejour, representing the Messageries Maritimes S.S. Co.; Mr. D. F. Murari, representing the Lloyd Triestino S.S. Co.; Major Stormont, representing the Societa Italiana di Servizi Marittimi; Mr. P. S. Taylor, secretary of the Egypt Promotion Association; and representatives of Messrs. Thos. Cook and Son and of the following American agencies:—Clark's Tours, Frank Tours, Raymond and Whitcomb, American Express, Temple Tours, the American Travel Club, and the Wayfarers' Travel Agency.

Mr. Tite, who presided, pointed out that it was the first gathering of its kind. The great problem with which they were confronted was to provide for and to regulate the inrush of tourists, particularly of the American spring tours, so as to promote the comfort of tourists and to prevent possible congestion at the hotels and on the railways and steamers.

It was pointed out by the Americans in the discussion which followed that it would be impossible to persuade Americans to commence their tours before Christmas, and also that whatever alterations might be made in the dates could only affect the 1923-24 season. A conference among the American representatives followed, the result of which was an agreement among the agencies which will do away with the congestion, dates being so arranged that the tours will follow one another.

CZECHO-SLOVAK TRADE WITH EGYPT.

The Czecho-Slovak Government has just officially recognised the sovereign and independent status of Egypt. This step is of considerable significance in the matter of trade and commerce with that country. Czecho-Slovakia, as the inheritor of the overwhelming majority of the pre-war industries of Austro-Hungary, carries on the traditional export to Egypt, which includes fez-caps, glass, porcelain, beads, jewellery, beer, furniture, clothing, leather and leather goods, carpets, etc. Imports into Egypt have quadrupled since 1913. Exports to Egypt in 1913 totalled in Egyptian pounds 26,782,809; in 1920, 98,695,956.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.)

Bulgaria.

Telephone Material.—The Bulgarian Directorate of Posts, Telegraphs, and Telephones at Sofia invites tenders for:—(1) The supply of cables and other material, and the transference of the existing underground cables to the new telephone exchange. (2) The supply of the material and the work involved in the extension of the network of underground cables. (3) The supply of the underground and armoured cables, including the runnings of the cables through the tubes as well as effecting their connection to the boxes and the ends of the cables to the exchange, etc. This section also deals with the supply of lightning conductors with aerial cables, and other material. (4) The supply of iron terminal standards with cable racks (main distribution poles). Tenders must be presented in Sofia by October 16 (D.O.T.).

Copper Tubes, etc.—The Bulgarian Directorate of Railways at Sofia invites tenders for the supply of 1,500 kilos copper tubes, 8,000 kilos copper discs, 100 kilos brass wire, 4,950 kilos round brass rods, 2,750 kilos hexagonal brass rods, 50 square metres brass woven wire. Tenders must be presented at Sofia by October 7, and prices are required covering delivery c.i.f. Bulgarian port, Black Sea or Danube, or in Sofia. The estimated value of the contract is 1,351,000 levas. (D.O.T.)

India.

Railway Wagons.—The High Commissioner for India invites tenders for the supply of 3,000 railway wagons. Forms of tender may be obtained from the Director-General, India Store Department, Belvedere Road, Lambeth, S.E.1.—October 17.

Steel Sheet Piling.—The Calcutta Corporation invites tenders for the supply of 80,000 lineal feet of light section steel sheet piling of various lengths; also for the supply, delivery, and erection of a steel screw pile jetty on the river bank at Pulta, near Calcutta. Tenders for the former close on October 9, and for the latter on October 10.

Locomotives.—The South Indian Railway Company invites tenders for the supply of: 1. 46 metre gauge locomotives and six locomotive boilers. 2. 108 metre gauge wagons. 3. Bridgework.—October 8.

Shovels, Point Rodding, etc.—The High Commissioner for India invites tenders for the supply of:—1. Shovels, round nose, with handles, number—8,004; and shovels, stoking, with handles, number—3,000. 2. Cocks, bib, galvanised, ½-in. and ¾-in., number—2,500; and cocks, stop, galvanised, ⅜-in. to 4½-in., number—1,634. 3. Point rodding, 1½-in., solid, complete with bolts and nuts, feet—45,000. Forms of tender may be obtained from the Director-General, India Store Department, Belvedere Road, Lambeth, S.E.1.—October 6.

Egypt.

Consumable Stores, etc.—The Frontier Districts Administration, Alexandria, is inviting tenders for the supply of consumable stores, oils, and paints. Tenders, on the proper form, accompanied by a provisional deposit of 2 per cent. of the total value of the tender, should reach the Director of Stores, Frontier Districts Administration, Alexandria, by noon on October 10. The schedule is rather extensive and includes, among other goods, oils, paints, and varnishes, hardware, brushware, canvas, lamp glasses, leather, rope (manilla and wire), soap, etc. (D.O.T.).

Iraq.

Ordnance Stores.—The Ministry of Defence in Baghdad invites tenders for the supply of annual stores required by the Iraq Army Ordnance Department. The stores are divided into three sections, as follows:—

Section 5a.—Packsaddlery, harness, and miscellaneous stable requirements, such as nose-bags, brushes, curry combs, horse-rubbers, etc.

Section 6a and 6b.—Officers' saddlery, universal saddlery, and various articles for repair, including buckles, curb chains, etc.

Section 11b.—Pickaxes, crowbars, intrenching implements, brass and copper sheet, mild steel flat and bars, brass and copper wire, etc.

Endeavours are being made to secure an extension of time for the presentation of tenders, and in the event of a postponement of the date fixed for the receipt of tenders being secured a further notice will be given. Any communication with the Ministry of Defence, Baghdad, should be made by Air Mail.—October 31.

The Albion Motor Co., Scotstoun, Glasgow, have secured a contract for the India Office for fifty 30-cwt. motor lorries of an up-to-date type.

SPECIAL MARKET REPORTS.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

Salonika, August 31.

The Macedonian harvest is about 50 per cent. below that of last year. Local production, even in good years, is not enough for the needs of the population. Quotations per oke: Wheat, 2.70-3 drachmæ; barley, 1.70-1.90 drachmæ; maize, 1.80-2 drachmæ.

Sugar.—Stocks are not precisely known; it is estimated, however, that with the cargoes expected in September they will amount to 700 wagons.

Cotton.—The crop has been entirely destroyed as a result of the drought. Stocks, including holdings of the spinning mills, amount to 4,000 bales.

Oil.—It is too soon to say what the yield will be of this year's harvest. It is estimated, however, that it will be equal to that of the previous year. Quotations, 10.50-13.50 drachmæ per oke, according to quality.

Opium.—This year's crop is 50 per cent. below that of the previous year.

Tobacco.—It is thought that the crop in Macedonia will be about half of last year's. This commodity is not ready until November in each year, and prices, which vary much according to the quality of the merchandise, are ordinarily fixed in December.

Kavalla, September 1.

The tobacco crop of the regions of Serres-Drama-Kavalla will amount this year to about eight million okes, as compared with six million okes last year. The area cultivated in 1922 has been 30 per cent. greater than in 1921. The first rains fell at the commencement of the planting, and made it probable that there would be an abundant harvest. However, the great heat during four months of the summer and the drought have caused these hopes to be modified. According to our information this drought has adversely affected all the crops from Nish (in Yugoslavia) as far as the tobacco districts of old Greece. On the other hand, it is said that heavy rains have fallen in the tobacco regions of Bulgaria.

Owing to the excessive heat the tobaccos have matured a little more quickly, and cultivators, in view of the lack of labour, have only been able to gather the leaves with difficulty. At the moment the gathering is at its height, and if the drought continues it will be carried out in twelve days. The drying of the leaves is going on normally in favourable climatic conditions.

Busreh, August 26.

The date trees have an excellent appearance. The yield is expected to be much better this year for the three principal qualities of dates that are exported—Hellawi, Khedrawi, and Sayer. Despite the attack of the disease known as "Ghoutar," which has affected the Khedrawi and Hellawi varieties especially, destroying about 30 per cent., the yield of Hellawi remains important. Prices have not yet been fixed. The great exporting houses have not come to a decision as to the quantity to be exported this year for the London and Levant markets. Consignments to America will probably be very considerable this year, in view of the competition existing here between exporters in regard to the New York market. In these circumstances there is reason for thinking that the fruit will reach a high price, especially Hellawi, which is in greater request in America than any other variety of dates.

NAVIGATION OF THE DANUBE.

Open and Closed Periods.

A Genoa contemporary points out that the European Commission of the Danube frequently receives inquiries from private people or steamship and insurance companies as to the time navigation on the Lower Danube opens or closes. It is thought by some that the European Commission may have to announce officially the dates in question. It is not every year that the river freezes, and sometimes the freezing is only partial, when it is possible for vessels to cut through the ice, but the captains, more frequently than not, do not care to risk navigation in such circumstances, either owing to weak engine power or want of confidence in the resistance of the hulls.

If it is, therefore, a question of delivering official certificates to serve the purposes of insurance, navigation, or of questions affecting the public, the European Commission will refuse to issue them, because, in the majority of cases, the navigation of the Danube in winter is relative, never absolute.

MESSAGERIES MARITIMES' NEW PORTS OF CALL.

The Messageries steamers on the Marseilles-Beyrout-Constantinople service will henceforth call at Malta and Messina. This week also the southern commercial service—Marseilles, Bizerta, Alexandria, Beyrout—commences to be monthly. The Worms Line, on the other hand, has just started a bi-monthly service between Havre and Concarneau.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. Vindelia for Bombay (Liverpool, October 5); s.s. Circassia for Bombay (Liverpool, October 17).

Anchor Brocklebank Line.—S.s. Makalla for Port Said, Colombo, Madras, and Calcutta (London, October 7); s.s. Macharda for Calcutta (Birkenhead, October 11); s.s. Holywell for Port Said, Colombo, Madras, and Calcutta (London, October 21); s.s. Masirah for Calcutta (Birkenhead, October 23).

Bibby Line.—S.s. Herefordshire for Rangoon (London, October 5); s.s. Leicestershire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, October 11).

British India Line.—S.s. Domala for Colombo, Madras, and Calcutta (London, September 29); s.s. Nevasa for Bombay and Karachi (London, October 6); s.s. Mandala for Colombo, Madras, and Calcutta (London, October 13); s.s. Matiana for Bombay and Karachi (London, October 20); s.s. Mantola for Colombo, Madras, and Calcutta (London, October 27).

Clan Line.—S.s. Clan MacNaughton for Colombo, Madras, and Calcutta (Birkenhead, October 5); s.s. Clan Mackinlay for Bombay and Persian Gulf (Birkenhead, October 9); s.s. Clan Macphee for Malabar Coast and Tuticorin (Birkenhead, October 26)

Cunard Line.—S.s. Cypria for Genoa, Leghorn, Naples, Palermo, Messina, Catania, Fiume, and Gravosa, etc. (Liverpool, September 28); s.s. Brescia for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Swansea, October 3).

Ellerman Line.—S.s. Gulf of Suez for Patras, Syra, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, October 7); s.s. Cavallo for Genoa, Leghorn, Naples, Palermo, Messina, etc. (Liverpool, October 12).

Ellerman, Bucknall, and Strick Line.—S.s. Frankenfels for the Persian Gulf (London, October 20).

Ellerman "City" Line.—S.s. City of Nagpur for Calcutta (Birkenhead, October 5); s.s. City of Marseilles for Calcutta (Birkenhead, October 14).

Ellerman's "Hall" Line.—S.s. City of London for Karachi and the Punjab (Liverpool, October 2); s.s. Karroo for Bombay, Karachi, and the Punjab (Liverpool, October 12).

Ellerman's Westcott and Laurance Line.—S.s. Mardinian for Gibraltar, Malta, and Alexandria (London, October 11); s.s. Orlando for Gibraltar, Malta, and Alexandria (London, November 1).

Glen and Shire Line.—S.s. Gleniffer for Port Said, Port Swettenham, Singapore, etc. (London, October 5); s.s. Carnarvonshire for Port Said, Port Swettenham, Singapore, etc. (London, October 19); s.s. Glenbeg for Port Said, Port Swettenham, Singapore, etc. (London, November 2).

Harrison Line.—S.s. Defender for Calcutta (Liverpool, October 5); s.s. Director for Port Said, Port Sudan, Aden, Mombasa, Jibouti, etc. (Birkenhead, October 26).

Henderson Line.—S.s. Amarapoora for Port Said and Rangoon (Birkenhead, October 4); s.s. Arracan (cargo only) for Port Said and Rangoon (Birkenhead, October 13).

Holt Line.—S.s. Agapenor for Port Said, Port Swettenham, Singapore, etc. (Swansea, September 28); s.s. Pyrrhus for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, September 28); s.s. Meriones for Port Said, Port Swettenham, Singapore, etc. (Glasgow, October 5); s.s. Oanfa for Port Said, Port Swettenham, Singapore, etc. (Glasgow, October 5); s.s. Calchas for Port Said, Port Swettenham, Singapore, etc. (Swansea, October 12).

Johnston Line.—S.s. Aviemore for Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, September 30); s.s. Incemore for Piræus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, October 21).

Moss Line.—S.s. Sitra for Gibraltar, Algiers, Malta, and Alexandria (Liverpool, September 30).

Papayanni Line.—S.s. Fabian for Melilla, Malta, and Alexandria (Liverpool, October 7); s.s. Falernian for Algiers, Malta, Syra, Smyrna, and Constantinople (Liverpool, October 21).

P. and O. Line.—S.s. China for Bombay (London, September 29); s.s. Nagoya for Colombo, Madras, and Calcutta (London, October 6); s.s. Kashgar for Bombay (London, October 6); s.s. Morea for Bombay (London, October 13); s.s. Nore for Colombo, Madras, and Calcutta (London, October 20).

Prince Line.—S.s. Black Prince for Tunis, Malta, and Alexandria (Manchester, September 30); s.s. Stuart Prince for Malta, Alexandria, and Syrian Coast (London, September 30).

[*Under the existing conditions it will be understood that these routes will not necessarily be followed in their entirety.*]

BULGARIA'S WATER POWER.

It is estimated that Bulgaria has in its rivers and falls an available potential energy of over a million hydro-electric horse-power, says the American Vice-Consul at Sofia. According to projects recently planned for its useful conversion, only about 150,000 horse-power would be required primarily for the electrification of the railways and industries, leaving the remainder for lighting and agricultural purposes.

The State propose the construction of a number of central hydro-electric stations, interconnected with transmission lines to all parts of the country. The power plants would be erected near the dams, and by means of the latter the stream flow would be so regulated as to realise a constant water supply for irrigation purposes, power for the development of electricity, and flood control below the dams.

Since Bulgaria is already confronted with the task of finding the means for meeting the many obligations now incumbent upon her, it has been suggested that the required working capital for this project be obtained by means of special loans issued through the Banque Agricole, in co-operation with the water syndicates already mentioned. It is reported that the preliminary estimate of the cost of this State project amounts to 260,000,000 leva. This is believed to be only a part of the final cost of the work, the practical execution of which, according to present indications, will be deferred for some time to come.

Mr. W. L. Griffith, the Permanent Secretary of the Canadian Government Office in London, has joined the Committee of Roumanian Government Bill holders to represent the Canadian interests.

The Dacia Romano Petroleum have received the following cable from Roumania:—"Moreni No. 1 swedging, No. 2 631 metres, Chiciura No. 2 346 metres, Baicoiu No. 3 rig erected, fixing engine."

COMPANY NOTES AND REPORTS.

Assam Oil.

The report for 1921 states that a balance was brought in of £17,227; add E.P.D. for all periods, over-reserved or recoverable, and refund of income-tax, less corporation profits tax for 1920, £30,306, making £47,533. Deduct loss for the year, after charging income-tax, directors' fees, etc., and writing off £53,160 for depreciation and fields expenditure £16,697, leaving £30,836. Less preference dividend for the year, £6,300, leaving £24,536. The directors place £20,000 to general depreciation, and carry forward £4,536, subject to corporation profits tax. The £30,000 appearing in last year's balance-sheet at credit of general reserve has been transferred to the credit of general depreciation account, bringing the latter up to £305,500. The profits on exchange were only £531, as against £20,209 during the previous year.

The shortage in staff and materials has prevented the completion of the full programme of field development it had been hoped to realise, but substantial improvements have been effected on fields organisation in the collection, storage, and transport of crude. Owing to considerable material difficulties experienced on the test well undertaken some time ago in one of the outside areas, progress has been disappointing, but every effort is being made to overcome these difficulties. Operations have been commenced to put down a test on another of the company's virgin concessions, while the testing of further areas is still under geological consideration.

Much-needed alterations and improvements have been made in the working of the refinery, resulting in a general increase in efficiency and decline in fuel consumption, while proposals as to the partial reconstruction of the refinery are now under consideration. Marketing operations were on much the same level as in 1920, and, with the exception of wax, which is disposed of almost entirely outside India, prices generally have been maintained. While it is not anticipated that the current year's trading results will show much improvement, if any, on those of 1921 they should, given a continuance of the conditions existing up to the date of this report, not be inferior to them.

Assam Railways and Trading.

The report for the year to March 31 last states that the gross earnings (Rs.17,16,337) show an increase of Rs.1,28,159, while expenditure (Rs.12,38,692) shows a decrease of Rs.21,008, as compared with the previous year. The collieries' output was 284,091 tons, against 279,909 tons, and sales 280,087 tons, against 293,111 tons.

The company's holding in the Rivers Steam Navigation Co. remains at 4,193 shares of £20 each, £15 paid. A final dividend for 1920 at the rate of 5 per cent., making 8 per cent. for the year, and an interim dividend for 1921 at the rate of 3 per cent. were received, amounting in all to £5,032. The company also holds 20,000 shares of 10s. each, fully paid, in Makum (Assam) Tea Co., Ltd. A final dividend of 10 per cent. was received for the season 1920, and an interim dividend of 5 per cent. on account of the season 1921, amounting in all to £1,050.

The general revenue account shows a profit for the year of £86,192. The expenditure in colliery account has continued to increase, and is chiefly responsible for this poor result. In order to pay preference dividends the board has brought into the account £22,132, representing sundry credit balances from previous years, which were held in abeyance and are no longer required. After payment of the debenture interest and allowing for all the preference dividends to the date of the balance-sheet, there remained a credit balance of £2,521, which the directors recommend should be carried forward. They regret the accounts do not permit the payment of a dividend on "B" stock.

CZECHO-SLOVAK FOREIGN TRADE.

Increase in Exports.

Official statistics just issued relating to foreign trade during the first half of the current year show a trade balance in favour of Czecho-Slovakia even greater than that for the corresponding period of last year. Imports into Czecho-Slovakia from January to June last amounted roughly to 1,750,000 tons as against 4,720,000 tons of exports. Compared with 1921, exports have increased, while imports have fallen off. The figures are all the more noteworthy when it is borne in mind that many factors have militated against industry and commerce during the period in question. Above all, there has been the rise in the exchange value of the Czecho-Slovak crown which, by automatically increasing the price of Czecho-Slovak products, has seriously affected the ability of Czecho-Slovakia to compete in foreign markets.

The export figures for the first six months of this year are able to compare well with the favourable figures of last year. Subsequent to the period covered by these figures the further rise of the crown has, it is true, brought about a serious trade crisis through which the country is at this moment passing, but there is every reason to hope that by a strict exercise of internal economies and substantial reductions in food prices the costs of production may be so brought down as to enable the export trade of Czecho-Slovakia to meet successfully the temporary stagnation resulting from the appreciation of the currency and the depreciation of the currencies of the neighbour States.

The Czecho-Slovak Statistical Bureau publishes the lists of exports and imports for the first six months of the year. The figures relate only to weight, those relating to value being due to appear later. The exports amounted to 4,270,000 tons, as against 4,580,000 in the corresponding period of 1921. The imports totalled 1,760,000, as compared with 2,130,000 in 1921. Exports have thus increased by 140,000 tons, while imports have declined by 370,000 tons. There was a slight increase in the exports to England—64,000 tons, as compared with 61,000 in 1921. Exports of corn and malt rose from 18,000 to 66,000 tons; cotton yarn and cotton goods from 14,000 to 19,000 tons; woollen yarn and goods from 4,000 to 7,000 tons; paper from 39,000 to 48,000 tons; glass and glassware from 61,000 to 46,000 tons. On the other hand, sugar exports fell from 225,000 to 190,000 tons; beverages from 20,000 to 6,000, and machinery from 23,000 to 14,000 tons. The exports to England, France, and Germany rose, while those to Austria, Hungary, and Poland fell.

EGYPTIAN MARKET FOR SAFES.

A report has been received from the British Commercial Agent for Egypt (Mr. E. Homan Mulock) relative to competition in Egypt in regard to safes, from which it would appear that this country is in danger of losing its position in the trade. Although the number of safes imported from all countries during the first six months of this year as compared with the corresponding period of 1921 shows an increase of 166, the number received from the United Kingdom has fallen from 349 to 78. The increase in the business is thought to be due to the fact that several banks have recently installed new safes and strong rooms. The number of burglaries which have recently occurred in jewellers' and other shops, where the thieves were successful in escaping with valuable goods, may also in a measure have been responsible for the enhanced demand.

The British Commercial Agent states that from his observations in many offices of well-known firms in Egypt, it is surprising, in view of the exceedingly old, and in some cases obsolete, safes in use that more burglaries have not taken place. Many firms apparently do not possess any safes at all. It is stated that there is little propaganda undertaken by British firms among commercial houses, and that the majority of the safes imported from this country have been for use by the Egyptian Government or the banks.

The special tax, imposed by the Decree of January 9, 1920, on the importation into the French Zone of Morocco of goods originating in, or coming from, Germany has been increased. This tax is increased to 25 per cent. ad valorem for imports direct from Germany, and to 30 per cent. ad valorem for other imports.

NOTES OF THE WEEK.

The Near Eastern Question.

The indications of a week ago that the worst was over in the Near-Eastern crisis, when an invitation was sent from Paris to Mustapha Kemal to meet the Allies in conference, on the understanding that Eastern Thrace was to be restored to Turkey, have been confirmed. There has been no collision at Chanak, and the Turks have withdrawn from Erenkeui. An acknowledgment of the Allies' invitation has been received from the Foreign Minister at Angora; it is courteously worded, and promises a formal reply in a few days; at the same time, it presses for the evacuation of Thrace by the Greek Army, and agrees to a preliminary conference between a Turkish general and Allied generals, which it fixed for October 3 at Mudania. A complication has arisen in the declaration of the new Greek régime that it will fight for the retention by Greece of Eastern Thrace, and firm action on the part of the Allies is required, if Mustapha Kemal is to place any reliance in the terms of the invitation. The proposal that Allied missions should proceed to Thrace to calm the populace is sound; but is hardly sufficient in the face of the incursion of Turkish irregulars. No time should be lost in calling upon the Greeks to withdraw in accordance with the Allies' undertaking to Kemal.

Cutting the Gordian Knot.

The moment would seem to have arrived for the Prime Minister to decide whether his own personal interests are to count above those of the Empire as a whole. We have Mr. Lloyd George's assurance that he is to devote the rest of his life to securing peace; but it need not take so long as that. The few minutes required to hand in his resignation would be sufficient for the purpose. As explained elsewhere in this issue, Mr. Lloyd George, with his commitments to Greece or to individual Greeks, and with his fiery hostility towards the Turks, is a personal obstacle to peace in the Near East. He is distrusted by the Kemalists, and until M. Venizelos or Sir Basil Zaharoff turn pro-Turk he is not likely to be able to counsel moderation for the Greeks, if they are intent on making trouble in Thrace. In these pages we are concerned only with the Near and Middle East, and not with Mr. Lloyd George's achievements in home politics. However brilliant the latter, his Eastern policy has been disastrous. At this particular moment there is reason to suppose that a brief *interim* Government, under a Prime Minister who has not forfeited the respect of the East, would be able to re-establish peace in Turkey. It would have to get to work at once, leaving home politics and Parliamentary affairs to readjust themselves after elections had been held.

The Sèvres Fetish.

If only the British Government could have eliminated the halo with which they have invested that pernicious document the Treaty of Sèvres, they would have saved themselves and the country a lot of trouble. One by one our Allies have ostentatiously thrown the Treaty on the scrap-heap; but back it comes, carefully smoothed out by loving hands, to be recited pompously on every possible occasion. An unratified Treaty, several times torn up, has neither sanctity nor moral force. If it happens to register a condition of things that actually exists, the condition is dependent to-day upon other and more potent factors than the provisions of the Treaty. For instance, British troops are in Constantinople and Chanak because they have been sent there and have been kept there, not because there is any virtue in the Treaty of Sèvres. The Treaty talks grandiloquently of neutral zones, but no inviolability attaches to them for that reason, as the Kemalist troops have shown, although the British Cabinet fondly imagined that these zones, already modified once, must be sacrosanct for all time. How much better it would have been to face facts! The more salient are that the Treaty of Sèvres is as obsolete as the Treaty of San Stefano, that a victorious Turkish army cannot be bluffed, but may fight on its own ground, and that such an army is more likely to come to terms from a desire for peace after it has blown off superfluous steam, than if an attempt is made to coerce it at the moment of victory.

Greece's Tragedy.

The aftermath of the Greek army's *débâcle* in Asia Minor has been a revolution, so far pacific, in Greece. King Constantine has abdicated and left the country. On this point the authors of the

Digitized by Google

military pronunciamento were emphatic; for the rest, they would seem to have no very clear policy. They require an Administration that will find favour in the eyes of the Allied Powers, but insist upon Greece holding by force of arms that part of Thrace which these Powers have undertaken to hand over to Turkey. This is a circle that not even M. Venizelos can square unless the Turks can be brought to agree to an autonomous Thrace, entailing the surrender by Greece of the Western as well as the Eastern section. It remains to be seen whether the Greek people, when they recover from the blow that has momentarily stunned them, will accept all that the military leaders have arranged for them. Never has a nation been called upon so urgently to apply the business maxim of cutting losses, and it is to be hoped that, on reflection, it will shrink from any further steps along the dangerous and unhappy path of political persecution.

The New Greek Regime.

The Crown Prince of the Hellènes has succeeded to the throne vacated by his father, and becomes King George II. A new Cabinet has been nominated, with M. Zaimis as Prime Minister; but it is not yet known whether he will accept the office. Another appointment made by the Revolutionary Committee is that of M. Politis as Minister of Foreign Affairs, a post which he held under M. Venizelos; but he has declined to take office. At the moment of writing, therefore, it cannot be said whether a Ministry exists or not. The real power will in any case remain for the present in the hands of the Revolutionary Committee, whose actions have so far inspired confidence in the nation. As almost inevitably in the Balkans, ex-Ministers have been arrested and are to be put on trial. At the request of the Allied Powers, they will be brought before a civilian court, and not before a revolutionary tribunal. Since 1915 these political prosecutions or persecutions have created a considerable amount of bad blood in Greece, and are mainly responsible for the inability of the nation to let bygones be bygones, and to pull together. M. Venizelos has been asked to represent his country abroad, which may be taken to mean with the Allied Governments, and his former nominees are to be reinstated in the London and Paris Legations. As he will be expected to save as much as he can of his Greater Greece, fears are expressed in some British circles lest his influence over Mr. Lloyd George, which has been responsible for the blunders of British policy in the Near East since the Armistice, will still be strong enough to jeopardise the Allied decision regarding Eastern Thrace and to prevent a satisfactory settlement in the Near East. We prefer to think that M. Venizelos will appreciate the facts of the new situation.

Egyptians and English.

An interesting official publication is announced from Egypt. This contains correspondence relating to resolutions passed by Provincial Councils denouncing the recent outrages against Englishmen in Cairo, and calling on the public to aid the authorities in discovering and arresting the criminals. Making every allowance for any "inspiration" of the resolutions referred to, it still remains a fact that their passing by the Councils, and their publication, have considerable value. For, after all, the ventilation of the subject must serve to strengthen the condemnation by all decent Egyptians of crimes committed by extremists, probably of unbalanced temperament. Sarwat Pasha, communicating the resolutions to Lord Allenby, hoped that the latter would interpret them as proof of sincere friendship; and Lord Allenby replied that he had no doubt of the friendliness of the Egyptian people. His lordship should be in a good position to form a judgment on that point, and we may accept his view.

"The City of David."

Amidst all the bad news that has been coming from the Near East in the past week it is a pleasure indeed to welcome the announcement of an important archæological undertaking in Palestine. Sir Herbert Samuel has consistently shown himself alive to the great possibilities offered by that country to the antiquary and the excavator. He has done good work in providing safeguards against unauthorised digging and the illicit removal of antiquities, and has at the same time lent powerful support to the competent excavator, bent, not upon plunder, but on adding to the world's knowledge of the history of the Holy Land. And now comes the news that the Palestine Administration has put forward a proposal for the systematic excavation of the City of David on Mount Ophel—one of the most interesting sites, surely, even in that land of unique interest. The work, it is suggested, shall be shared by several countries, it being considered that "a work of such importance on a site whose memories are sacred to many nations should not be entrusted to the resources, however ample, or to the labours, however devoted, of a single scientific institution or nation." On behalf of Great Britain, the Palestine Exploration Fund has been asked, and has already agreed, to co-operate in the work, and besides the Jewish Exploration Society, French and American representative bodies have been approached.

The "P.E.F." and the Public.

All friends of the "P.E.F." will be unfeignedly glad that that excellent society has been chosen as the representative of Great Britain in this important undertaking, and no other body in this island could justly dispute its claim to the honour. But, as our readers are aware, the "Fund" has lately been but indifferently supported by the public, and has had the misfortune to lose some of its most generous helpers. Its work at Askalon, in spite of its interest and its promise of rich reward for labour on the site, has had to be temporarily abandoned for lack of funds. That does not augur well for the future, and in the circumstances the committee of the Fund have shown some courage in accepting the Mount Ophel invitation. It is unthinkable, however, that, having accepted, they will be left in the lurch by the British public. It is true that we are extremely heavily taxed, and that we have apparently no rich men ready to bear the expense of excavating a whole site in Palestine or in Egypt, as America has; but a work such as this should appeal to a very wide public, and if the P.E.F. can make its need of financial help widely known, support should surely be forthcoming for it.

Disturbance in Teheran.

Teheran has been the scene of an anti-Jewish demonstration, due, it is reported, to assaults by Jewish schoolboys on a mullah's servant. Jews were maltreated in the streets and bazaars, and for a day or two Jewish shops in the town and the bazaars were closed. Fortunately, the authorities appear to have kept cool: the police fired over the heads of the demonstrators, and mounted patrols soon restored, and kept, order. Finally, the Premier, in Parliament, gave assurances that steps would be taken to prevent any recurrence of the trouble, and that those responsible for it should be captured and punished; and thereupon the Jews reopened their shops, and work was resumed. The only significance of the incident lies in the evidence which it affords that the Persian Government

Digitized by Google

is at last really learning how to handle little troubles of this kind.

A Political Breeze in India.

The breeze which sprang up suddenly last week in Simla should do something to clear away some of the mists of unreality, of which we wrote not long ago. The facts are very simple. At the opening of the session the Viceroy told the Legislature that not only his Government but also the Secretary of State, was "bound by agreements and honour" to protect Indian Princes against seditious Press campaigns conducted from British territory. The Assembly threw out the Bill drafted to make it possible to fulfil this obligation, and Lord Reading promptly "certified" the Bill as essential, so that it will become law after being laid before Parliament. The Assembly then became contrite, and representative members are said to have waited on the Viceroy to ask for another opportunity. We are doubtful whether this was possible under the rules, but, in any case, we think it is much better for India that the legal procedure was strictly followed. The Joint Committee did their best to make it plain that the Constitution drafted by them was meant for use, but the Assembly has hitherto been inclined to treat some of its provisions as bogeys which could safely be ignored; and the little lesson in responsibility for votes cast will probably produce valuable results in future.

Indian States and the Press.

Of the need for legislation on this matter there is, unfortunately, no doubt. The Indian Press has made great strides forward, and the improvement which began at the top is spreading downwards, but it has not yet reached the lowest layers. At the very bottom stand the journals which from time to time spring up in British India just outside the borders of a State, and endeavour to live by a stream of scurrilous sedition directed against the Prince and his Ministers, often in the hope of being bought out by men who are not inclined to seek an expensive and rather dubious remedy in the British law courts. The existence of such organs was formerly an open scandal. They were stopped for a time by the Press Act of 1910, but now that the measure has been repealed, most Englishmen will agree with the Viceroy that, apart from formal undertakings, it is a matter of honour that the scandal should not be allowed to recrudesce. The only surprising thing is that so many as 45 members of the Legislative Assembly should have voted in such a way that outside observers might infer their approval of journals of the class we have described.

The Indian Tariff Reports.

Outside purely business circles, the main interest of the Reports produced by the Indian Tariff Commission lies in their probable effect on the course of current politics. The situation is simplified by the absence of any voice in favour of free trade. The main, or compromise, report advocates a sort of protection, hedged round by so many safeguards that, while in practice it might work tolerably well, it can hope for no support from party spirit. The minority report favouring high protection will, on the other hand, appeal very strongly to a large section, probably a majority, of the present legislature; and, if the members had many years of official life before them, we should have to expect an annual orgy of tariff-tinkering, in the course of which the initial safeguards would rapidly disappear. The protection now sought for is, however, essentially a townsman's ideal, and the future depends really on the development of effective public opinion in the rural districts. When the peasants finally take charge, they are likely to brush a protective tariff, and its authors, contemptuously aside.

THE WEEK AT HOME.

London, Monday Evening.

The Turkish Crisis.

The situation still remains obscure. The newspapers assured us alternately that it was graver or easier every day last week; but the fact that there were two meetings of the Cabinet on Saturday, and that the second broke up at 1 o'clock on Sunday morning, is sufficient indication of the tension. The Government has been severely, and justly, criticised for its past policy, and also for the bellicose Note of a fortnight ago, but there has been a distinct disposition to rally to its support during the past few days. To this the tactics of Kemal have contributed not a little; and also an increasing realisation of the difficulties raised by French methods in Asia Minor.

The Entente may survive even this shock, but it is doubtful. There will be very general regret here should it prove no longer possible to work with Paris, but France, an ideal comrade during the War, has proved a singularly difficult companion in peace, and it is almost impossible to keep step with her.

The abdication of King Constantine caused little surprise or regret in London. Greek stock is heavily down, but Turkish stock has hardly gone up, and the ordinary man in the street at least will regret the return of the Turk to Europe, if only on the ground that it will lead to future trouble. Apart from the actual rights and wrongs of the case—if there are any—the public are keenly interested in the suggestion that Moscow may take an active hand in the business, and there is a pretty general feeling that, if the understanding between Russia and Angora involves anything more than pleasant words, a first-class war will sooner or later be inevitable.

Nobody in this country wants a war, but it must be admitted that the protests against war have been singularly lacking in force. The fact is that the situation cuts across old traditions in rather an embarrassing fashion. The Liberals and Nonconformists are generally the first to protest against war, and the Conservatives occasionally, too, look upon it as a regrettable necessity. But the Liberals and Nonconformists have detested the Turk—on political and religious grounds—since Gladstone's day, and they have fewer objections to fighting the Turk than anybody else. Thus what Mr. Lloyd George once daringly called "the tocsin of peace," which one anticipates from that quarter, has been rather discordant and feeble; whereas the Conservatives, on the contrary, still remember the old Disraeli-Salisbury policy of supporting the Turk, and have no natural ardour for a war in that direction.

Party Rumours.

It is a puzzling position, and the clubs are naturally full of gossip, rumours of "palace revolutions" in Downing Street, the supersession of Mr. Lloyd George, and the elevation of Mr. Chamberlain. (Mr. Bonar Law is practically forgotten in these calculations, but as I saw him the other day, melancholy as usual, but apparently vigorous and healthy, there are the best of reasons for concluding that he is still alive.)

Mr. Chamberlain is a good Conservative, a straightforward and honourable man, and a charming person. But he has no magnetism, and I doubt whether the country would regard him as a heaven-sent leader. He would carry on as the head of a Conservative Government, but he would hardly do anything more. It is suggested, of course, that people do not want any more, and that "anything for a quiet life" may be a winning suit in the next

Digitized by Google

political rubber. But this view proceeds from those who talk about degeneration, materialism, and the decay of national fibre as proved; but wherever I go about the country I seem, on the contrary, to sense everywhere a bubbling and overflowing vitality that makes me doubt the chances of a do-nothing Government rather considerably.

For another thing, I doubt whether Mr. Lloyd George has had enough of Downing Street yet, and if he does not want to go, it does not seem particularly likely that he will go. Nor would there be many to support his going, if he would only get out of his head the idea that he is a heaven-sent Foreign Minister; the last infirmity of this noble mind is that he *is* the Foreign Office. If that delusion were cured, all would be well.

There are to be party conferences next month, and the Tadpoles and Tapers of Pall Mall shake their heads and assure me that "we shall see what we shall see." I regret to admit that I was rude enough to assure one of these augurs that we should probably see precious little, although we should undoubtedly hear a great deal, that being the way of party conferences. There will be a lot of talk against Mr. Lloyd George, particularly by the Die-Hards, but that obscure sect is rather down at the moment, and the ordinary Conservative is in a mood to be terrified by awful predictions of what a Labour Government would do. As a matter of fact, there is not one chance in a hundred of a Labour Government at present, and if there were, they would do very little to justify these tales of terror. But the *Morning Post* has gone to the heads of these good folk like bad sherry.

Improving Revenue.

Our finances are definitely improving, as, indeed, they ought to, for the tax-collector bleeds one dry. The six months of the financial year just closed show an improvement of many millions over 1921, and a considerable excess over the estimated revenue. This will probably encourage the Americans to press still harder for the payment of our war debt, as Sir Robert Horne has just gone to Washington to discuss that thorny subject. The country is perfectly willing to pay, although most of it was contracted on behalf of our Allies, who have no present intention or capacity to pay us; but unluckily the world does not contain enough money to pay it in cash, and the Americans will not let us pay in goods, having just introduced a tariff which renders imports impossible. It would be interesting to know in what other way we can pay them, but so far they have made no suggestions.

American financiers, of course, who are familiar with economics recognise the absurdity of the position, but the American Government depends on farmers of the Middle West, whose attitude is the simple one that a debt is a debt, and must be paid, and, therefore, as one of them said in a letter to an Englishman recently, "pay up, old top, or bust." It is a charming exhibition of innocence, but I gather that it is rather embarrassing to those Americans who object to seeing their country made a laughing-stock. These are protectionist days all over the world, but the American tariff is like a Chinese wall. In the long run, of course, it will hurt their exports as well as imports, and harm that American mercantile marine of which we have heard so much and seen so little; but the mills of Congress grind slowly, and we shall have to wait for a return of common sense—which, indeed, seems to be rather at a discount everywhere to-day.

The Defeat of an Idol.

The fall of Carpentier before the West African negro Siki almost eclipsed the Near Eastern crisis for a few hours last week. "Carp" was a popular hero on both sides of the Channel, whereas his opponent was practically unknown; but his star had been declining since his defeat by Dempsey in New York last year, and there had been ugly rumours that he had not played fair in his recent fights—kicking and butting were openly alleged against him. These rumours were definitely confirmed by his conduct in the ring against Siki, and the idol is now execrated by his former worshippers. He is said to contemplate a return to the ring to revenge himself on Siki, but I doubt whether he will regain his popularity.

Cheaper Petrol.

A reduction has been made in the price of petrol—by no means before it was due—with the result that transport charges of all kinds will come down. Motoring, both by air and road, will be cheaper, and it is said that even omnibus fares may be reduced. The wet summer—which has developed into an autumn of Noachian type—was a bad one for the motor coaches and charabancs, and one of the leading companies is now in the liquidator's hands. But it is to be reconstructed, and if we see the sun at all next summer the open road may again be worth while. But before that time it is expected that the railways will at last have reduced their present extortionate charges. The managers are still "considering" the matter; but cheaper petrol and the certainty of keener competition than ever will probably assist their meditations quite considerably.

An Underground Extension.

The South London Electric Railway—the oldest of the Tubes—no longer deserves its name, for it is being extended to Edgware, a Middlesex village which, until recently, escaped the suburban builder. The work is understood to be rather difficult, as much of it can be done only at night, and it involves the removal of thousands of tons of soil from the bowels of the earth. But it is giving employment to a large number of men during very hard times, and it will considerably increase the facilities between North and South London.

Ocellus.

KING OF ROUMANIA'S CORONATION.

The Coronation of the King of Roumania will take place on the 15th inst. at Alba Julia. The members of the foreign delegations will arrive at Bucharest on the 12th inst., leaving there two days later to attend the Coronation. On the morning of the 15th a public religious service will be held prior to the Coronation ceremony, and afterwards the King will give a luncheon, which will be followed by a military parade. On the 16th the King and Queen return to Bucharest, and will attend the Cathedral, when a *Te Deum* will be sung. During the afternoon there will be a military review, followed by public festivities in the Parc Carol. The foreign delegations will be entertained at luncheon by the members of the Royal Family on the 17th, and in the afternoon the King and Queen will attend the races, when the Coronation Prize will be run for. The same evening a gala performance will be given at the National Theatre.

The Near and Middle East.

From Our Own Correspondents.

EGYPT.

Cairo, September 18.

Criminal Jurisdiction.

The status of the Judicial Adviser having been completely changed as a result of the recognition of the independence of Egypt, that official, like the Financial Adviser, will no longer issue to the public an annual report. While, however, we shall no longer have the illuminating review of the progress of the administration of justice which Sir John Scott and his eminent successors were wont to give us, we still shall have an annual statistical report, the latest of which for the judicial year 1920-1921 has just been published.

This report confirms the increase in crime which has been periodically recounted of late. Whereas in 1918-1919 crimes numbered only 4,644, in 1919-1920 they jumped to 6,779, and in 1920-1921 to 8,676—*i.e.*, an increase of about 90 per cent. in three years. The cause has undoubtedly been the after-effect of the troubles of 1919 and the economic stress under which the country has suffered. Compared with the preceding year, murder and attempted murder rose from 2,300 cases to 2,546 cases, or an increase of over 10 per cent.; arson increased from 1,654 to 2,333 cases, or 41 per cent.; forgery by 48 per cent.; and destruction of crops by 24 per cent. The province of Assiut headed the list with 801 crimes, or an increase of 13 per cent. over the previous year, while the province of Dakahlia showed 683 cases, or an increase of 58 per cent. The proportion of crimes to head of population was 6.8 per 10,000 inhabitants, against 6.1 the previous year.

Contraventions rose from 108,411 to 127,017, or an increase of 17 per cent., the chief offences being those against public health and municipal regulations. On the other hand, it is satisfactory to note that in the aggregate misdemeanours show a decrease, the total for the year being 128,739, or a decrease of 7.1 per cent., mostly due to a decrease of 20 per cent. in theft. But at the same time there was an alarming increase in offences against cotton regulations, due possibly to closer supervision, and in destruction of crops and vagabondage.

As a consequence of this increase in crime the Courts have been considerably burdened, and in order to assist the Assize Courts, where, compared with two years previously, the number of cases (3,591) had increased by 67 per cent., and also to cope with the extra civil work, three new Counsellorships have had to be created. While general crime has increased, it is interesting to note that the number of young offenders has decreased by nearly 10 per cent., and a considerable reduction has been made in the number sent to prison.

Civil Jurisdiction.

The civil jurisdiction has also had a remarkable increase in work, the number of cases dealt with by all the Courts rising from 265,376 in 1920 to 422,744 in 1921. For this the fall in the price of cotton and the financial crisis which has followed are undoubtedly responsible. The most striking increases were recorded under the Summary Courts and the Cantonal Courts. The former had 144,440 new cases brought before them as compared with 110,596 the previous year. The main increase was in personal cases, and the majority were those in which the amount in dispute did not exceed £E10. The Cantonal Courts had to deal with no fewer than 264,356 cases, or an increase of 87 per cent. by comparison with the preceding year, the majority being cases in which the amount in dispute ranged from £E1 to £E5. These Courts, which were first instituted by the late Lord Kitchener, are certainly doing good work, and are gaining in prestige. This is clearly indicated by the fact that the number of cases within the competence of the Summary Court submitted by agreement between the parties to the Cantonal Courts, either with a view to conciliation or for decision, increased by 62 per cent. in the former case and 358 per cent. in the latter case.

The above figures throw a remarkable light on the work which has to be done by the native courts during the past judicial year, but there is no doubt that the increase in their work would have been even greater had not the Government instituted special Rent Courts to deal with the disputes naturally arising between landlords and tenants owing to the enormous fall in the price of cotton, on which land rents had been based. These Rent Courts had submitted to them 111,139 claims, of which more than a half were definitely dealt with during the year. It is interesting to note that the average rental claimed under the leases in the cases submitted to these Courts was £E33.960 per feddan, and that the average rental awarded by the Courts was £E19.415.

The statistical report under review includes a very interesting survey of the progress made during the past thirty years. Thus, whereas in 1891 there were 1 Court of Appeal, 8 Central Courts, and 23 Summary Courts, with 129 judges, 74 parquet officials, and 468 clerks and agents, in 1920 there were 1 Court of Appeal, 8 Central Courts, 90 Summary Courts, 27 District Courts, and 234 Cantonal Courts, with 202 judges, 184 parquet officials, and 1,119 clerks and agents (the latter figures do not, of course, include the notables sitting on the Cantonal Courts). During the period in question the receipts of the Native Courts rose from £E78,939 to £E509,196, and expenditure from £E141,497 to £E519,183, while the total number of cases increased from 18,777 to 265,376, and the number of criminal offences rose from 80,287 to 254,801 (real crime and contraventions more than doubling, and misdemeanours more than quintupling).

The Mixed Jurisdiction.

The figures for the Mixed Courts reveal, as might be expected, a similar increase in work. Civil actions entered during the year rose from 4,057 to 4,816; commercial cases from 2,930 to 5,757; and summary cases from 6,877 to 12,749. It certainly redounds to the credit of the judges that, although the Mixed Courts were not up to full strength, the arrears had only increased by a little over 30 per cent. as compared with an increase of 60 per cent. in the total number of new cases presented to the Courts.

The Procureur-General, in commenting on this, points out that there is every reason to expect for some little time to come a continuation of the upward tendency of the work of the Mixed Courts, and, while making suggestions whereby procedure might be expedited, he foreshadows the possibility of the Government's being compelled to increase the number of judges.

In this connection the review of the past thirty years gives some interesting figures. In 1891 the total number of cases brought before the Mixed Courts was 3,876, and in 1920 this figure had risen

Digitized by Google

to 14,455 cases. On the other hand, in the same period the number of judges had only increased by eight—*i.e.*, from 56 to 64. Since in the same period the revenue received from these Courts had risen from £E248,555 to £E1,412,618, and the net return to the Government after payment of all expenses was £E1,095,450, it is apparent that there is every justification for some addition to the judicial personnel of the Mixed Courts, to enable them to deal more satisfactorily with the enormous amount of litigation which is nowadays referred to them.

Port Said, September 19.

The Kantara Bridge.

The floating bridge at Kantara connecting the east and west railway stations, which was used for motor and foot traffic, has for a month or more been superseded by two floating ferries, after the style of the pre-war transport. This new method is certainly slower, but, on the other hand, it is more sure, and the expenses of working it are probably considerably less than were entailed by the bridge, which needed a large number of men to manipulate it.

Two Fetes.

A Maltese fête was held here in the grounds of the Frere's School last week to celebrate the granting of the Constitution to Malta, and to-morrow the Italian fête of September 20 will take place, though there do not appear to be the same preparations as in previous years. There is also a large display of Italian photographic views at the Casino Hotel, of which I hope to send an account in the next mail.

An Egg-Ship.

A large ship whose sole cargo was eggs recently passed through the Canal on her way from China to England. Chinese eggs have been long known in England, and the trade must be flourishing when a ship can be devoted entirely to the single cargo. Some of the eggs were in cold storage, and the rest were tinned. In pre-war times there were large quantities of game sent home in cold storage from China, and when freights come down a little this trade may revive.

Ship Movements.

H.M.S. Caradoc, our guard-ship, left suddenly the other night for an unknown destination. The transport Syria passed through here yesterday outward bound with details on board for India.

Later.

Local Rumours.

Owing to the news from Asia Minor, there are several rumours going round among the natives, one of which is that large numbers of the Bedouin have proclaimed the Jehad and are marching on Egypt. Three battalions of the Egyptian Army are said to have been moved to Kantara to oppose them. These and other wild rumours show the extreme state of tension which is engendered by the Kemalist victories, and may have reference to tribal movements in Palestine from Transjordania.

Born 1820———Still going Strong!

HISTORICAL SPIRIT SERIES NO. 14.

The "OLD GEORGE," Salisbury: Built in 1320, and full of the well-preserved timbering and panelling of the Middle Ages. Here Pepys stayed and grumbled at the heavy bill.

Shade of Pepys: "Ah, JOHNNIE WALKER! had I known you there would have been many another line to my famous diary—'Another JOHNNIE WALKER and so to bed'."

JOHN WALKER & SONS, LTD., Scotch Whisky Distillers, Kilmarnock, Scotland.

PALESTINE.

Jerusalem, September 17.

September 11.

Last Monday, September 11, will remain as one of the various dates which mark the landmarks in the history of the New Palestine. The formal proclamation of the appointment by the King of Sir Herbert Samuel as his High Commissioner for Palestine, together with the taking of the Oath of Allegiance, does not of itself alter anything in apparent fact; it only stands for the abolishing of anything that may have been regarded as provisional or temporary or tentative in the nature of the Government. And that is a matter of considerable importance. It is a principle to be grasped for the proper understanding of so much that seems feeble and ludicrous in Palestine—that you must look to what it all stands for, and not to the sometimes miserable show that things too often make to the critical eye. But that is a digression.

The Proclamation Ceremony.

The usual assembly of Government officials, representatives of communities, and district notables were invited to be present, and both Lord Allenby and King Abdullah attended to lend a further importance and dignity to the function. After the formal reading of the King's Proclamation and the signing and witnessing of the Oath of Allegiance, Sir Herbert gave a short address. The only point in it which attracted more than a passing notice was the promise of handing back Palestine to Palestinians so soon as the country was prosperous enough and able to manage its own business.

The only other point provoking comment is the behaviour of some of the Arabs on the day of the ceremony. The executive of the Christian-Moslem League "ordered" the day to be marked by a general strike. In Palestine a "general strike" seems to mean mainly the closing of shops. On this occasion it did not prevent the Arab "garry" drivers doing a good day's work, and a considerable amount of Arab labour was in evidence. A version current among the simpler classes of the population was that the High Commissioner was that day "to be crowned King of the Jews"! More deserving of notice, perhaps, is that about a third of the Arab

Digitized by Google

notables who had been invited to Government House, together with the Latin Patriarch, also saw fit to mark the occasion by a "strike," and failed to take their places at the ceremony. The extremer sections of the Arab Press spread the news that all Palestinian Arab Nationalists had boycotted the function, but that is not true, unless "Arab Nationalism" is confined to the Christian-Moslem League and the Supreme Moslem Council.

The Christian-Moslem League made a vain effort to compel King Abdullah to join the "general strike." A telegram was sent to him to the effect: "The Palestinian nation has resolved to bann the Mandate and to proclaim a general strike. Palestine looks to you, therefore, as a son of the Family of the Prophet and a son of that man who led the Arabs to freedom, and adjures you in the name of God and of History that the proclamation of the slaying of the Arab People shall not take place in your presence. It adjures you likewise, in the name of the Tombs of your Ancestors and in the name of His Majesty your father, to respect the feelings of the Palestinian nation and take no part in the function of the proclamation of the Mandate which is to take place on Monday, so that this act of yours may stand as a portent and proof before God and the generations yet to come."

Yet, in spite of this, King Abdullah was a prominent figure in the ceremony.

The Conflict in Arab Opinion.

The cleavage in Arab opinion as to the advisability of conforming to the resolutions adopted by the recent Congress at Nablus, organised by the Moslem-Christian League, is daily becoming more marked. Two Jerusalem Arab papers, *Lisan el-Arab* and *Mirat esh-Sharq*, have declared themselves wholeheartedly in opposition to such tactics as the boycotting of Jewish trade and non-co-operation with the Government by abstention from the elections to the Legislative Council, and by refusing to register their names for the purpose of the census. The former paper has also launched a bitter attack on the members of the Supreme Moslem Council for their inconsistency in consenting to accept office under the British Mandate, and then presuming to boycott it. *Falastin*, on the other hand, an extremist Jaffa paper, extols the President of the Moslem Council to the skies, and makes him the hero of the day: "We would make known to the entire Arab nation and all the Moslems and Christians in every part of the world, the courage of this president. . . . It seems to us that it is as though, when they tried to persuade him to attend the function of the Proclamation as representative of the Moslem people, he had lifted up his voice and said: I will by no means suffer myself to be a liar and a hypocrite: how could you have me represent the nation at a function when the same nation opposes and rejects that function"!

The Government and Agitators.

Everybody is interested to see what will be the attitude of the Government to the group of agitators who are doing their best to stir up opposition and disloyalty to the Mandatory Power. So far it has shown such utter disregard to the doings of the local malcontents that most self-respecting agitators would surely have wilted under the treatment and felt themselves badly snubbed. Since that method has had no effect, the Government seems to propose the other way, and a few days ago published a notice "for general information," calling attention to certain provisions in the Penal Code applicable to any person using "influence or coercion for the purpose of opposing the carrying out of the orders of the Government," and giving the tariff of fines and imprisonment bearing on just those activities which the Nablus Congress advocated.

The National Moslem League.

Up and down the country there are being created branches of "The National Moslem League." It would seem to be an attempt to provide an antidote to the somewhat barren extremism towards which the Moslem-Christian League is rapidly drifting. How far this new league represents anything beyond the "playing for safety" on the part of certain of the commercial classes among the Arabs it is not yet possible to say. Their principles are thus described: (1) The League will endeavour to create bonds between the races dwelling in Palestine, regardless of creed. (2) It will endeavour to spread education, and develop agriculture and commerce by supporting those engaged in these occupations as far as possible, and will give support to those who opened it. It will care for orphans and their future, and protect the rights of the inhabitants by lawful methods.

Naturalisation.

The one topic that is engaging the local Jews is the question of naturalisation. The Constitution made provision for giving Palestinian nationality to the thousands of newcomers into the country. What is causing serious perturbation to Jewish leaders here is that the response by the Jews to this invitation to shed their foreign nationality and become citizens of the land of Israel has been almost negligible. The following plaintive paragraph occurs in *Ha-Aretz* of to-day's date: "Naturalisation of the Jews is making its way but slowly. They are not coming forward in their crowds to receive the nationality of the land of Israel. In Jerusalem there are at least ten thousand foreign nationals, old-standing residents and immigrants of the last three years—Russians, Germans, Austrians, Hungarians, Czecho-Slovakians, Roumanians, Lithuanians, Latvians, Poles, Americans, Spaniards, British, Persians, and others. Of these, during the fortnight that the Naturalisation Office has been opened only ten older residents and 170 newcomers have registered. Some of those who sought naturalisation were not able to pay the fee of two shillings; they offered one shilling, but were refused. As in Jerusalem, so also is it in other towns of Palestine—only about 500 have sought naturalisation. It is estimated that there are not less than 30,000 nationals of foreign States among the old and new Jewish population. Also non-Jews are not seeking naturalisation: in Jerusalem only five—Greeks and Italians—out of the hundreds of foreigners, and in other towns not a single one. Were they (the Jews) to come forward in their multitudes, the clerks in the Naturalisation Department would not suffice. And who knows if the Government will agree to extend the period for naturalisation after November 1?"

A heavy campaign is now being waged to rope in the hesitating Jews, and the various community committees and societies and newspapers publish proclamations and arguments day by day urging the duty of Jews to enroll themselves in the "Family of the National Home."

A committee has been appointed to assist and advise those Jews who wish to change their names, and, instead of the miscellaneous and heterogeneous names which they have picked up in various parts of the world, assume once more names characteristic of the Jewish race and Hebrew history. The Jewish National Council has concluded a bargain with the Government, and persuaded them to reduce the current rates for changing names from twenty-five to ten piastres. Instead of the Finkelsteins and Goldbergs, the Privovrizhenskis and Pochozhanskis, the Rubinovitches and Yitzchakoffs, they may now, for the modest charge of two shillings, become Jeroboams and Ahitophels, Ben Baruchs and Ben Aminadabs, Yerushalmis and Hebronis.

TURKEY.

Constantinople, September 17.

Suspense.

The destruction of the Greek army in Anatolia has given rise to widespread feelings of apprehension in Constantinople, not only amongst Armenians and Greeks, but also amongst a considerable section of the Turks themselves, not to mention the British Colony in particular. It is common knowledge that the Allied Forces of Occupation are completely inadequate to defend the so-called Neutral Zones against a determined attack by the Kemalist army, and hitherto there has been practically no indication of any intention on the part of the Allies to act together with energy and loyalty. It is true that the French Government has formally notified the British Government that "they agree in considering it desirable" to maintain the neutrality of the Straits and Constantinople, but what the world wants to know is whether the French are prepared to *act* in order to give effect to their pious desire. Unhappily, there is here a general conviction that the French cannot be trusted in this connection, and the policy of the British Government, in spite of solemn pledges both during and after the War, has been so weak that the feelings of those whose very existence is in the balance are naturally fearful and pessimistic. The Turkish victory celebrations that took place in the capital on the 10th afforded a hint that could not possibly be ignored, for all along the main road between Taxim and Chichli the windows of every Greek and Armenian house were deliberately smashed by revolver shots, stones, and lances. Turkish houses and shops were untouched, as also the French Girls' School of Notre Dame de Sion.

Subsequently, reports from Smyrna have proved indubitably that the fears of the Christian population of the capital are only too well founded. The Turkish papers even make no attempt to hide the fact that numerous arrests and executions have taken place, including the execution of Chrysostom, Bishop of Smyrna. It is feared that in reality something much worse has taken place, but most of the evidence has doubtless been destroyed in the disastrous fire that has ruined the city. The first act of the newly-installed Kemalist administration was not to proclaim even a limited amnesty, but to establish an Independence Tribunal, which is functioning with vigour. In these circumstances the conviction expressed in a Parisian paper to the effect that Mustapha Kemal would "have too much good sense" to attack the neutral zones or the capital carries little weight. And why not, indeed? What have the victorious Kemalist warriors to fear from those who surrendered Cilicia and failed to save their mandatory from disaster? Equally ludicrous were the French papers' attempts to slur over the significance of the recent demonstrations in Constantinople.

The Straits and Thrace.

According to an obviously inspired announcement that appeared in the local Press recently upon the return of Mustapha Kemal to Angora, discussions commenced with regard to the policy to be followed in connection with the Straits and Constantinople, and it is expected that definite decisions will be taken. Like the French Government, the Angora Government admits the principle of the liberty of the Straits, and, as has been announced upon numerous occasions, maintains that this liberty may be guaranteed to everyone's satisfaction by the formation of a Straits Commission. It will be remembered that by the treaties binding Anatolia to Russia the Angora Government agreed that such Straits Commission should be composed only of delegates of the States bordering upon the Black Sea, but, presumably as a concession to the French, the Angora Government will now consider the admission of Allied delegates as well. How such a Commission alone could prevent the closing of the Straits by the Turks is left to conjecture. The extent to which the French are building castles in the air in this connection is indicated by a statement by M. Taponnier to the local Press. M. Taponnier is described by the *Stamboul* as being not only a Deputy for Haute Savoie, but also charged with a mission on behalf of the French Government and his views, therefore, may be regarded in some measure as reflecting the opinions of the French Foreign Office. After having dwelt upon the soundness of French policy, the great influence of the French Government in the East, which has won the sympathy and the admiration of the world by its heroic attitude and so forth, M. Taponnier continued: "We think that in Thrace the benevolent and beneficial administration inaugurated by General Charpy to the general satisfaction having been tested, there would be in the establishment of an analogous system the basis of agreement calculated to calm many anxieties, to eliminate many sources of conflict, and to avoid the friction of legitimate national considerations."

Consider now the following extracts from the Turkish Press:—

> "We are astonished that people should ask what the Turks will do now that they have beaten the Greeks in a couple of weeks. The Turkish national cause can be summed up in a few words—namely, complete independence within our national frontiers. Everything else is a matter of detail."—*Tevhid-Efkiar*, September 13.
>
> "With regard to Western Thrace (the question) may be settled by a plebiscite . . . but the one question we must not neglect is that which concerns Eastern Thrace. . . . The arms which have liberated Smyrna can also liberate Adrianople. We prefer, however, first to try peaceful methods, as in the case of Smyrna."—*Vakit*, September 13.
>
> "We desire the liberty of the Straits as much as anyone else, and shall do our utmost to obtain it, but the question which concerns liberty of passage through the Straits for the European Powers has a quite different meaning for Turkey. For Turkey the territorial factor is more important . . . . the Danube is a neutral river, but the States through which it flows consider its banks as their own property, and we wish to own the shores of the Straits in the same way. . . . . Consequently, there is no need for a Neutral Zone."—*Ileri*, September 13.

These are precisely the views of the Angora Government, and the Angora Government is preparing to back those views in the only way that really counts.

GREECE.

Athens, September 18.

The Tragedy of Smyrna.

Smyrna has ceased to exist. The once beautiful nymph of the Ægean is to-day but a heap of black ruins, amidst which stands unscathed the Turkish quarter. It is firmly believed here that the Turks did not set fire to the town during the first two days after their entry, because the wind was blowing in an easterly direction, and would thus

Digitized by Google

endanger their own quarter. As soon, however, as the wind became favourable the Greek and Armenian houses in the centre of the European quarter were set ablaze. No doubt some will maintain that the fire was started either by the Greeks and Armenians, or by the Turkish irregulars, whose actions the Kemalist authorities were unable to control. Against this must be set the evidence that the fire was caused by non-commissioned officers of the Kemalist regular army. Miss Minnie B. Mills, the headmistress of what was once the American college in Smyrna, has told the writer that she herself saw a Turkish sergeant of the regular army enter a house near the college carrying tins of kerosene. A few minutes later the house in question was ablaze. Miss Mills' statement was confirmed by many other trustworthy American eyewitnesses. Soon after the outbreak of the fire, those of the inhabitants who were still hiding in their houses abandoned their shelter and rushed to the quay for safety, whereupon the Turks, finding the doors open and the houses empty, began systematic looting. It was, of course, impossible to carry off furniture and other heavy articles, so the looters turned their attention chiefly to the rugs, jewellery, and clothing.

And then come the stories of massacres—the stories which are familiar to all who follow closely the affairs of the Near East.

The refugees are arriving here in thousands. The Government, in its effort to save as many lives as possible, requisitioned every available Greek ship, and has, in addition, chartered several foreign steamers, which are incessantly travelling between Smyrna, Mytilene, Chios, and Piræus, discharging loads of hungry people who have lost everything they possessed. Most of the American subjects have also arrived in Athens. Some of these were brought by the U.S. destroyer Simpson, and others by the American cargo boat Winona, which also took aboard and fed without any charge more than 1,500 Greeks and Armenians. The writer, who went on board the Winona before the refugees landed in the Piræus, was told of the many kindnesses of the officers and crew of the American ship and of the pluck of the ship's first mate, Mr. H. E. Dow, who remained for many hours in a small boat rescuing those of the swimmers who were fortunate enough to escape from the quay. It is understood that all the British subjects have also left Smyrna. The majority of these were conveyed to Cyprus and a few to Malta. According to the refugees' statement, the British Consul and Vice-Consul were taken on board H.M.S. Iron Duke.

Greek Fears for Thrace.

Now that the last Greek soldier has left Asia Minor the attention of the entire nation is turned towards Thrace. "What is going to happen there?" is the question asked by everybody and everywhere. The unexpected loss of Ionia was, of course, a heavy blow to the nation, but the loss of Thrace—should such a thing happen—would be an irreparable calamity. The danger of a Kemalist attack on Constantinople, followed by an offensive against the Greek lines at Chatalja, is seriously occupying the Greek Government, and everything possible is being done to reinforce that front. All the troops who succeeded in embarking at Moudania have landed at Rodosto, and numerous officers who had hitherto been staying in Athens have been ordered to hold themselves in readiness to proceed to Thrace. Furthermore, the 1923 class is about to be called up, and this would enable at least one of the other classes to go to Thrace. The Press is urging the people to unite in order to defend the "Gate of Greece," and is publishing patriotic articles with titles such as "Watch Thrace," "All and Everything for Thrace," and so forth.

Many rumours have been current in Athens during the last few days to the effect that serious disturbances had occurred in Rodosto and Adrianople, and that some of the troops paraded the streets with red flags clamouring for peace and asking to be sent home. Though these rumours were promptly denied by the Government, it is no secret here that some cases of insubordination did occur among the troops, and particularly those from Moudania which landed recently at Rodosto. Bolshevism appears to be gaining ground in Greece just now, and it would be the undoing of this country if the troops in Thrace allowed it to master the proverbial patriotism of the Hellene.

Athens, September 23.

The Situation.

Many rumours were current in Athens during the last few days to the effect that we were once again on the eve of a Ministerial crisis. In spite of the Government's emphatic declaration to the contrary, it appears that there is a good deal of truth in these rumours, and the Cabinet is standing on ground that is by no means firm.

Meanwhile the convocation of the Constituent Assembly, which had been fixed for this week, is postponed. The Premier, after conferring with the President of the Chamber, M. Lomvardos, announced that the "Voulé" will not resume its sittings until the reorganisation of the Army, now taking place in the two new army bases at Mytilene and Chios is complete. As soon as this is done the troops which belong to the four younger classes (1919, 1920, 1921, and 1922) will be sent to the Thracian front in order to relieve the older classes, which will, with the exception of those whose home is in Thrace, be demobilised. Thus the army which Greece apparently intends to keep at present in the field to oppose the threatened Kemalist invasion will consist of five classes only, namely, the 1919, 1920, 1921, 1922, and the 1923 class, which has been called up for the end of the month. It is estimated that the entire army in Thrace, including the Thracians of the older classes, will number something like 220,000. The enrolment of volunteers is also receiving every encouragement from the Government.

The Refugees.

The refugees from Asia Minor are still flocking in. In addition to those from Smyrna, many families which had succeeded in escaping to Mytilene and Chios are now coming to the capital, and Athens is simply crowded with these unfortunate victims of the war. All the hotels and *pensions* are packed, and the Government has requisitioned every empty house in Athens and the suburbs—to the great chagrin of some of the landlords, who had more than doubled their rents. Relief committees have been formed in every town in Greece, and contribution lists have been opened by many Athenian newspapers. The King has offered 100,000 drachmæ, and the Queen 400,000 drs. The National Bank of Greece voted a credit of 1,000,000 drs., while Mme. Helena Venizelos, the ex-Premier's wife, contributed 500,000 drs., with the promise to send a further contribution. Everything possible is being done, but still more is required, and it should not be forgotten that winter is approaching rapidly.

ROUMANIA.

Bucharest, September 21.

The Dardanelles Question.

It goes without saying that Roumania is watching with strained attention the developments which may eventuate following on the Turkish successes in Anatolia. The free passage of the Straits, as well as the equilibrium of the Balkans, are problems which interest her deeply, and for the just solution of which she is determined to use all her prestige and authority. Up to the moment of writing, however, it is not yet known to what extent Roumania would intervene should the Turks continue their aggressive attitude in connection with the Straits question, or whether she will adopt Great Britain's or France's standpoint.

In this connection I may quote the following declaration made by M. Duca, Minister for Foreign Affairs, to local and foreign pressmen: "Roumania has special interests that the freedom and internationalisation of the Straits, as well as peace in the Balkans, should be maintained. In agreement with the Allies she will take up the attitude which will safeguard her interests and help to maintain peace."

The Visit of Poland's President.

The visit paid by Marshal Pilsudsky followed the lines sketched in my last letter. A most cordial atmosphere prevailed throughout. At the gala dinner the King greeted Poland's President as the great patriot who, in his country's hardest moments, rendered the greatest services, and who, both as statesman and soldier, understood how to lead the brave Polish nation towards its revival and consolidation. Stress was laid on the age-long sympathy and friendship of the Roumanian people towards the Polish nation, which remained unabated up to the present day, and which, on this occasion, was being strengthened. The King further added that the war caused deep wounds to both countries, and that therefore a great task lies before them.

Marshal Pilsudsky, responding, expressed his happiness at finding himself in great and beautiful United Roumania, the victorious neighbour, and for all times allied with Poland by a common boundary and similar destinies. The President also said:—"The bonds that at present bind Roumania United and Poland Revived are the live expression of the triumph of right and of the imminent victory of justice. Neither in the past nor in the present, nor in the future, is there anything that divides or may divide the two neighbouring peoples, so that it may be affirmed that from the Baltic Sea to the Black Sea there is but one people with two flags, inspired with identical wishes for peace that emanate from a sense of right—a peace which shields right and guarantees liberty."

M. Narutovitch's Interview.

The Polish Minister for Foreign Affairs, in the course of an interview granted to the local Press, stated that, although Poland does not actually belong to the Little Entente, yet she forms a *bloc* with the other three component States in all important problems pertaining to foreign policy. As regards Poland's relations with Russia, he asserted that he received M. Litvinov's visit in Warsaw a short time ago, on which occasion assurances of sincere and pacific sentiments were exchanged. Russia, however, he added, is a great enigma.

The Coronation.

Barring any unforeseen eventualities, the Coronation festivities have now been definitely fixed to take place on October 15, 16, and 17. It is reported that Great Britain will be represented by the Duke of York. The Post Office Department has already announced that Coronation stamps will be issued for the occasion. These stamps, in various colours, will consist of the following four types:—(1) Representing the King with a helmet on his head, (2) the King and Michael the Brave's effigies, (3) the Queen attired as a hospital nurse, (4) the Queen with the Crown, arrayed in the historical costume of "Doamna Chiajna," holding in her hand a miniature structure of the Cathedral of Alba Julia, where the Coronation will be celebrated.

Fire at the Electricity Works.

Fires have been pretty frequent of late in Bucharest and in other parts of the country, but the climax was reached when the population of the capital heard that the Central Electricity Works were on fire. The effects were immediately felt, for the electric light went out suddenly throughout the town. It appears that the fire arose from one of the sky rockets which were fired on the occasion of a festival that took place in "Parcul Carol," situated close to the electricity works. The rocket, which was still burning when it fell on the works, set fire to the wooden part of the roof. The fire, which lasted all night, spread to the engine rooms and destroyed several of the large Diesel motors. Fortunately, a few of them were saved, but, nevertheless, electric current output will be considerably reduced. More than half of the town will be affected by the shortage of electric light and power. This state of affairs is expected to last for at least two months pending the arrival from Switzerland of two powerful Diesel engines which were ordered some time ago.

Miscellaneous.

Sir Herbert Dering, British Minister at Bucharest, returned last Friday from leave in England.

M. Sterghiadis, formerly Greek High Commissioner in Smyrna, on arriving at Constantza from Constantinople en route to Switzerland, met with a none too friendly reception on the part of the Greek colony of that town. His compatriots make him responsible for having proposed the evacuation of Smyrna.

BULGARIA.

Sofia, September 27.

Political Arrests.

Since my last letter the Bourgeois leaders have been subjected to further indignities. On their return to Sofia from Tirnovo on the 20th inst. they were liberated. Three days after they were re-

arrested; but were allowed to remain in their own houses under guard. The reason advanced for their rearrest was that the Supreme Council of the Agrarian Party, at their meeting at Sofia last week-end, might be inclined to show violence towards the Bourgeois leaders if the latter were at liberty. In fact, the Government claim that it was in their own interest that the former Ministers were arrested. This is as may be, but yesterday even more drastic measures were taken. All the former Ministers were taken from their houses in the early hours of the morning and put into prison. They have been placed in the same building as the members of Dr. Radoslavoff's Liberal Cabinet, and thus under one roof are imprisoned practically all the Bourgeois leaders in Bulgaria.

Those arrested yesterday included M. Malinoff, chief of the Democrat party and Prime Minister in 1918; his assistant, M. Liaptcheff, former Minister of War; and other Democrats included MM. Danailoff, Moushanoff, and Rashko Madjaroff. Besides the above, M. Theodor Theodoroff, leader of the Narodniak party and Prime Minister in 1919; M. M. Madjaroff, a former Foreign Minister and Minister in London before the War, were arrested. MM. Kostourkoff and Fadenhecht, chiefs of the Radical party, have also been imprisoned. M. Bouroff has up to the present not been found, and it is understood that he has been declared an outlaw. M. Ivan Gueshoff, the veteran Prime Minister, and Dr. Molloff are both abroad, and so for the moment have escaped.

The arrest of so many prominent men has naturally caused something like a panic in Sofia. Business is at a standstill, and everyone is asking what will happen next. M. Stambolisky is expected to return from Geneva very shortly, and it is to be hoped that he will take prompt measures to alleviate a situation which is detrimental to the interests of Bulgaria.

Major Neate's Arrest.

The details concerning the arrest of Major Neate are as follows: In company with a French officer, Captain Bruyas, Major Neate went to Philippopolis to search for a hidden depôt that was supposed to contain 50,000 shells. On reaching the building where the shells were thought to be the Allied officers were forbidden to enter. As it was late in the day Neate and his companion tried to seal up the door, but were prevented by the sentry. They then decided to guard the depôt during the night. Bruyas took the first watch, and while Neate was on his way to relieve him, he was arrested by three gendarmes and marched off to the police station.

The fact that he was wearing British uniform, and also had papers of identity from the Bulgarian Ministry of War, proved to be of no assistance, and even his revolver was taken from him. After being at one police station for a short time, he was sent to another. There he was released, but was allowed to return to his hotel only under an armed guard. On arrival at the hotel he decided that the best thing to do was to return to Sofia at once. But when he tried to leave the hotel he was forcibly prevented by gendarmes. This he attributes to the fact that a great number of motor-lorries could be heard passing. These lorries were undoubtedly engaged in moving the hidden shells from one place to another.

Major Neate has made a full report to Paris concerning his arrest, and it is reported to-day that Lord Balfour has made a very energetic protest to M. Stambolisky. Meanwhile, it is said here that several of the Army and gendarmerie officers may be removed from their posts as having been instrumental in arranging Major Neate's arrest.

Thrace.

Although internal politics are for the moment absorbing the greater part of Bulgaria's attention, interest is also manifested in Thracian affairs. Bulgaria is alive to the fact that although the driving out of the Greeks from Eastern and Western Thrace will be to Bulgaria's advantage, the setting up of an entirely Turkish régime will have its disadvantages. Bulgarians and Turks are old rivals, and it is not long ago since they fought against each other at Adrianople. Bulgaria herself wants Western Thrace, but in the event of this not being possible would like to see the creation of an autonomous State. But until the Greeks are out of Thrace there is bound to be a certain amount of friendship between Turks and Bulgarians, and the Thracian Committees are already becoming active in this direction. The situation in Thrace itself is very bad. Over 150,000 refugees have arrived from Asia Minor, while the moral of the Greek troops is poor and is threatened by a quarrel between Constantinists and Venizelists.

It is not expected that the Bulgarian Government will intervene in Thracian affairs. They will remain neutral and will do their best to prevent frontier incidents. But the forces at the disposal of the Government are too small and the Thracian element is too strong to prevent a certain amount of guerilla warfare taking place. In addition to this, the Kemalists are fully alive to the possibilities of the situation, and a special mission sent by the Bolshevists to Sofia last week includes three Turkish officers.

Great Britain and Bulgaria.

Inquiries in official Serbian quarters have failed to elicit what the attitude of the latter country will be in the event of Bulgaria's aiding the Kemalists. The British semi-official *communiqué* stated that Bulgaria's intervention would be considered by Yugoslavia as disastrous. It is thought here that "disastrous" is far too strong a word. The Serbians would probably take military action if any signs of a "Red" rising were visible in Bulgaria, but it is not at all certain that a Turkish-Bulgarian alliance would create in Yugoslavia the awful effects predicted by the British Cabinet.

In any case, M. Stambolisky's Government does not deserve the insult offered it, and, as Sir Edwin Boyle remarked in his letter to *The Times*, "the surest way of overthrowing the Government

is to make such insinuations." These insinuations, besides being ill-timed, are, in the writer's opinion, incorrect. They do not reflect the truth, and are harmful to both Bulgaria and Yugoslavia.

M. Stambolisky's Proposal.

News has just been received here concerning M. Stambolisky's proposal for the future of Thrace. Providing as it does for the creation of a buffer autonomous State between Turkey and Bulgaria, it is bound to find some support in England. It is understood, however, that France does not view with favour the Bulgarian Prime Minister's suggestion. Italy also seems lukewarm, and it is thus probable that nothing more will be heard about the matter. Nevertheless, M. Stambolisky deserves credit for having put forward at a critical moment a proposal which is designed rather to render peace possible in the Balkans than to increase Bulgaria's territory.

PERSIA.

Teheran, August 31.

Irregular Attacks.

The attack by tribesmen on a Government force proceeding to the south through Bakhtiari territory, mentioned in my last letter, has led to a statement in the Press by the Ilkhani (chief) of the latter tribe, Samsam es Saltaneh, denying all knowledge of or participation in the attack, and he and Sardar Jang, another chief at present in Teheran, have promised the Government to trace and deal suitably with the perpetrators of the outrage.

Sardar Sipah, the Minister of War, gave a banquet the other day to celebrate the defeat of Simko, the Kurdish rebel, who is now stated to have crossed the frontier into Turkish Kurdistan. In the course of a speech the Commander-in-Chief thanked and congratulated his officers and men on their success, and exhorted them to put their faith in patriotism, without which no nation could stand. It was, he said, thanks to his patriotism, and with the intention of enforcing the right of the Persian nation to exist, that he had been able to resist foreign influence, and that he had taken into his own hands the power which was otherwise rapidly going to the dogs. We shall not permit, he continued, that anyone should profit from the fact of Persia having opened her doors to civilisation for the misuse of this sacred word, and should go against the interests of the country to realise illicit gains. We must respect the law and the Constitution, and accept as a sacred thing the decisions of the veritable Parliament of the nation. We must also rejoice that fresh elections will be held shortly, and we must hope that these will result in the representation of the real aspirations and welfare of the country.

Prohibition of Game-Shooting.

The Military Governor of Teheran has just issued a notice forbidding the shooting of any sort of game in or around Teheran, as the birds, he states, are useful in destroying locusts, which are very plentiful this year, and will undoubtedly do much damage to next year's crops. The present year's harvest, however, which has now been gathered in, has been an excellent one, and the price of cereals is expected to drop shortly.

Suspension of Newspapers.

The Government has to-day suspended no fewer than seven papers, and it is hoped that this drastic measure will tend to improve the tone of the local Press. It was part of the present Cabinet's programme to introduce a Press Act to the Mejliss to prevent slanderous attacks on the Persian or foreign Governments in the crop of scurrilous papers which have lately sprung up in the capital. The suspension would appear to be the outcome of the libellous articles which have been published nearly every day lately attacking British policy in this country, and laying the blame for all Persia's troubles at the door of British intrigue and diplomacy. The principal offender in this respect has been the *Eghtesadi Iran* (one of the suspended papers), obviously subsidised by the Russian Legation, and hardly a day has passed but it has contained a poisonous article denouncing everything British in the strongest terms, and tracing Britain's fingers in Persia's pie in every fresh misfortune, including the recent attack on the Government force in Bakhtiariland. Seyed Ziaeddin, after the *coup d'état* of February 21, 1921, suppressed all papers except the semi-official *Iran*, and nobody would be sorry to see the same thing happen again.

Moharram.

During the next few days everything in the country will be practically at a standstill; all business will be stopped, and all Government departments and shops closed as a sign of mourning in commemoration of the martyrdom of Hussein, the nephew of the Prophet, who was betrayed and treacherously slain at Kerbela, whither he had been enticed by the offer of the rulership. Religious processions commemorating the event are to be seen in every town and village, culminating next Sunday, the tenth day of the month of Moharram, in the head-cutting ceremony in the Sabzi Maidan, in which the participants often faint from loss of blood, and otherwise inflict serious injuries on themselves.

CYPRUS.

Nicosia, September 19.

Smyrna Refugees.

Many fugitives have arrived, chiefly at Larnaca, and others are expected daily. Over eighty British subjects have landed, and it is said that their total will amount to 1,500. The Government has directed the port authorities that all British subjects are to be allowed to land at once, but permission is required in the case of non-British nationals. Steps have been taken for their accommodation, mostly in hotels, which are much more numerous than formerly. The medical authorities are taking precautions as regards infectious disease, the introduction of which from neighbouring coasts is always feared. The Greek papers point out that Greek Cypriots have not done their duty as regards contributing to the needs of their compatriots in Asia Minor, and the Patriarch Meletios has addressed a telegram (dated September 7) to the Archbishop calling for more help, and stating that a committee, under his presidency, has been formed at Constantinople.

NEW GREEK CABINET.

The new Cabinet at Athens has been submitted for the King's approval as follows:—

M. Alexander Zaimis	Prime Minister
M. Nicolas Politis	Foreign Affairs
M. Krokidos	Interior
M. Kanellopoulos	National Economy
General Charalambis	War
Admiral Papachriston	Marine
Judge Vassition	Justice
Dr. Doxiadis	Public Assistance
Dr. Siotis	Education
M. Kalligas	Communications and (temporarily) Agriculture
M. Diomedes	Finance
M. George Embirikos	Supplies

BRITISH REFUGEES FROM SMYRNA.

(Contributed.)

"The Smyrna British Colony Committee" had just taken possession of their new premises in 27, Throgmorton Street, E.C.2, kindly lent to them by the Imperial Ottoman Bank, when a family of ten British refugees arrived from Smyrna. The British Vice-Consul in Marseilles had paid their fares to London, where they were handed over to the Committee. They were without money, and their hastily improvised underclothing was mainly made up of French newspapers. On leaving Smyrna they possessed £T350, and though this sum was paid to the French steamship officials, they were three days at sea before any food was given them. The head of the family is a widow, and there are four very young children in the party. The Committee were able to give them immediate assistance, after obtaining credit from the Imperial Ottoman Bank, and hope soon to be in a position to give effective aid to these and other unfortunate British refugees.

Very tangible help is being given to alleviate the sufferings of the thousands of Armenian and Greek refugees from Smyrna by the "Save the Children Fund," the "Imperial War Relief Fund," and the "Hon Mrs. Ethel Lindley Fund," all of which have the warm approval of the British Foreign Office, and the Archbishop of Canterbury bespeaks "for these efforts the active support of all who will even try to realise the gravity and the scale of the distress." When the Committee have opportunity to prove to those responsible for the above-named funds that many British refugees are also homeless, destitute, and in direct need, it is probable that they will be able to count upon support from the same sources.

The following letter has been sent to the Press:

To the Editor of THE NEAR EAST.

Sir,—Might we be allowed the hospitality of your columns to plead for help for the unfortunate Smyrna British colony scattered about the islands of the Mediterranean? For the second time in a decade they have lost everything. In the tragic evacuation of Smyrna the majority got away with only summer clothes, and, with very few exceptions, all are penniless. The once wealthy firms of Smyrna have had such heavy losses during the Great War and in this recent disaster that they are unable to help adequately their own dependents. We therefore hope that in the absorption of the political aspect of the Near Eastern question, with which this committee has no concern whatever, the claims of the British refugees from Smyrna to sympathy and practical help will not be overlooked. Subscriptions may be sent to the Imperial Ottoman Bank, Throgmorton Street, or any of its branches, for the "British Refugee from Smyrna Relief Fund."—We are, etc.,

E. H. FRESHFIELD, Chairman.
F. S. MCVITTIE, Secretary.

27, Throgmorton Street, London, E.C.2,
October 2, 1922.

The Committee has also obtained from the Foreign Office an assurance that all that is possible will be done to obtain a delay as regards the threatened confiscation by Nur-ed-Din Pasha of all movable property which has been abandoned by British subjects in Smyrna.

Smyrna Catastrophe

The worst fears fully confirmed by later reports.
Streets littered with dead.
Awful devastation of fire and sword.

200,000 Refugees,

many badly wounded, were rescued by warships and other vessels.

It is estimated that another 200,000 failed to escape. Orders have since been given to leave or return to the interior, which means

Deportation and Death

Latest cable says:
"Most refugees penniless; blankets and clothing needed."

Food distribution already in operation at Salonica, Athens, and on the Islands.

Your Help Urgently Needed To Save Life.

Gifts of clothing also acceptable.

PRESS ON THE NEAR EAST.

Russia and the Near East.

In the *Daily News* of September 15, Brigadier-General C. B. Thomson points out that Constantinople is now, owing to the vanishing of the antagonism between Russia and Turkey, no longer a key position, and that the strategic position is wholly transformed:—

> Soviet Russia and Nationalist Turkey are allies, and linked by land communications; the presence of an Allied fleet on the Bosphorus has not prevented Mustapha Kemal routing the Greeks in Asia Minor. This is a very different state of affairs from that in which the arrival of a British squadron in Besika Bay was sufficient to overawe the Sublime Porte. It is, of course, desirable and necessary that the Dardanelles and Bosphorus should be open waterways for trade with the Black Sea ports. These latter are, for all practical purposes, closed at present, and the resulting paralysis of trade is more injurious to the British than it is to the Turks, the Russians, or the Germans. Constantinople may die of inanition without materially affecting Turkey's intercourse with Russia or Russo-German trade. By their dallying, drifting Near Eastern policy, the Allies have side-tracked Constantinople. Both in a commercial and military sense, the main line now runs from Angora through Georgia or across the Caspian to Moscow, and thence to Berlin and maybe Essen. Behind that line lies Asia, containing three hundred million British subjects, a considerable proportion of whom are Mohammedans. A hundred Dreadnoughts and ten thousand aeroplanes cannot alter these hard facts. Great forces will invariably find an outlet or a way round.
>
> There are two keys to the Near Eastern problem, and neither is to be found at Constantinople. One is at Angora, and the other at Moscow. In negotiating with Mustapha Kemal Pasha, and we must negotiate unless we are prepared to make another war, all that is needed is a reversion to what may be called

Digitized by Google

Mr. Lloyd George's pre-Zaharoff period, when "the rich and renowned lands of Thrace and Asia Minor" were the theme. In regard to Moscow, does anyone who has studied the situation seriously really believe that without the co-operation of the *de facto* Russian Government there can be a settlement in the Near East?

In the *Manchester Guardian* of September 21 an attempt is made to discover the attitude of Russia towards the recent Turkish victories over the Greeks and towards Constantinople :—

> Russia's feelings are complex. First there is a natural feeling of rejoicing at the sight of one of the beaten nations triumphing over the victors—just as Turkey was overjoyed when Russia threw back the Poles. But, apart from the natural feelings of one of the company of the humiliated at the victory of another, the war in the Near East has also a real and very grim significance for Russia. The Turkish victory is, in fact, felt as a Russian victory. To Russia, at any rate, the war in Asia Minor appears to be somehow connected with the Caucasus and the question of oil. During the Hague Conference the Soviet Press sought for an explanation of the obvious hardening in British policy towards Russia, and found it in British ideas as to the strength of the Greek army and the possibilities of their advance. A victory over Angora would have been a real danger to the Caucasus. The Turkish success, it is believed, puts an end to all possibilities of adventures in that region. The other thing that is clear is that the Turkish victory gives Russia some anxieties as well. Apart from any Imperialist designs on the part of the Nationalists, the Turkish victory is increasing the prestige of the Turks as the natural leaders of Islam. The Russian leaders are aware of the Turkish dream of uniting the Mussulman world. The increased prestige of the Turks will be felt throughout all that world, not only in Irak and India. It may resound even more loudly among the Mussulman people of the Caucasus, and may even have effects in Central Asia. The fact that before this victory the Turks were continually becoming more intimately linked with these peoples, and that Turkish influence was to be felt as far as amongst the Tartars on the Lower Volga, disquieted the rulers in Moscow. It is in this light that we must view the reports that the Soviet Government is ready to send troops through the Caucasus to assist the Turks. Caution plays a great part in modern political friendships. "Assisting the Turks" may mean security from them.

The article proceeds to show how the Russian dream of possessing the capital of Turkey is not yet dead :—

> The thing which is not clear is the real attitude of Russia towards the question of Constantinople and the Straits. Only one thing can be said safely : The dream of possessing Constantinople is not now dead in Russia, as it seemed to be two years ago. The Nationalists in Russia (and Nationalism is on the advance there) frankly speak of the "Eastern mission" of their country, and the idea of this mission centres round Constantinople ; while the Communists, or, as they now proudly call themselves, "the realists," are beginning to look upon Constantinople as the necessary outlet for a Russia developing along capitalist lines. . . . . To-day, certainly, Russia is undecided. Should the Turks advance and take Constantinople, Russia will acclaim their success as they would any other victory over the Entente. But Russian sentiment could not be brought to the point of assisting Turkey in this. It is by no means certain that Russia would desire now to see the Turks unquestioned rulers of the city and the Straits ; one might venture a guess that they would prefer the position of Constantinople to remain unsettled. A Turkish Nationalist Constantinople would, for an historical period at least, put an end to the dream of Constantinople becoming Russian. The Allied occupation, on the contrary, cannot last for ever, and may lead to a settlement that will favour Russia.

In concluding his article, the writer appears to think that the participation of Russia in the forthcoming Near Eastern Conference is certain :—

> There can be no doubt that one of Angora's stipulations for a conference will be that an invitation should be given to Russia, and this will be something more than polite repayment for Russia's demand that Turkey should be invited to Genoa. Such a stipulation would reflect the real feeling of the Angora Government and of their people, for the feeling that Russia is a true friend of the Turkish people is widespread. Should the Allies desire Russia's participation? Europe has now learned from long experience that there can be no real settlement of Western affairs without Russia participating in it ; an attempt to settle the Eastern question without Russia would be fatal indeed. Russia will certainly appear and behave at the conference as the official champion of Turkey, but it would not be a very rash guess to say that Soviet Russia is not likely to overstress the implications of her position. It may be found that in some of the vital questions to be discussed at this conference Russia might follow the path of her traditional policy rather than that demanded by her new friendship. History has proved again and again that Russia, being the most Eastern Power in Europe, yet feels herself a Western Power when she, in concert with Europe, is called upon to decide on Eastern questions.

BRITISH PRISONERS AT TIFLIS.

The statement published some days ago that all the British prisoners at Tiflis had been released except one was premature. It is known that Messrs. Solly, Lawrence, Collas, and Dodge have been released, and that Mr. Edwardes is still detained and is to come up for trial in a day or two The case is now being investigated of a Mr. Odell, and also that of a Mr. Moeg, but the information as to how many people are detained and as to their present whereabouts is somewhat vague.

NEO-BUDDHISM.

"THE MESSAGE OF BUDDHISM." By Subhadra Bhikku, edited by J. E. Ellam, General Secretary Buddhist Society of Great Britain. (London: Kegan Paul, Trubner Trench and Co. 2s. 6d.)

The world has entered on an era of transition. Its organised creeds have lost much of their driving force; its social and economic structure is menaced by imminent ruin. Despair has supplanted the optimism of Victoria's spacious days, and all who are capable of thinking for themselves are seeking vainly for a ray of hope. Hence the growing vogue of Buddhism, which professes to offer a solution of the riddle of existence. Mr. J. E. Ellam's manual of Buddhistic doctrine appears at a propitious moment; it will bring comfort to many perplexed souls and widen the outlook of thinkers who are loth to quit the religion of their fathers. Very little is known of the Buddha's career. He appears to have flourished in that marvellous sixth century B.C., when the creeds of Judæa and Hellas assumed a definite form. By dint of pondering on things of the Spirit he evolved a system of belief based on the doctrine of Re-birth, which is common to all non-Semitic creeds. Existence he held to be an unmixed evil, because it involves the necessity of undergoing an endless succession of re-appearances in a universe of suffering; but salvation may be achieved by stifling the "wish to live," with all the unruly passions in its train. It is an oft-told tale that the Buddha abandoned the privileges of princely rank, and went forth as a mendicant to preach his gospel of deliverance. Like other teachers of genius, he gained many devoted followers, but, unlike the great majority, he was not persecuted by professors of an established cult. Brahmanism, which reigned supreme in Northern India, has always tolerated dissenters. After forty years of incessant toil, relaxed only during the four rainy months, he laid down the burden of existence. Mr. Ellam repudiates the libellous legend which attributes the great teacher's death to a surfeit of pork, maintaining that it was due to poisonous ingredients in a meal of mushrooms known as the "Wild Boar's Delight."

The Buddha's doctrines were not reduced to writing until the third century B.C., when King Asoka adopted them with a convert's fiery zeal, and despatched emissaries to preach them in Ceylon, where Buddhism still retains its pristine purity. Elsewhere it has been well-nigh strangled by an overgrowth of superstition; but it is professed in some form or another by a fourth of the human race; and is making progress in Europe and America. That such should be the case is surprising when one considers its ultra-revolutionary character. Buddhism, Mr. Ellam writes:—

> teaches perfect goodness and wisdom without a personal god; the highest knowledge without a revelation; a moral world-order and just retribution carried out of necessity, by reason of the laws of Nature and of our own being; continued existence without an immortal soul; eternal bliss without a local heaven; the possibility of redemption without a vicarious redeemer; a salvation in which everyone is his own saviour, and which can be attained in this life and on this earth by the exercise of one's own faculties, without prayer, sacrifice, penance, or ceremony, without the mediation of ordained priests and divine grace.

Mr. Ellam has not supplemented his lucid exposition of Buddhistic doctrines by any attempt to forecast the consequences which might flow from their acceptance by Western communities. Unprejudiced thinkers will, perhaps, arrive at the conclusion that quietism is quite incompatible with the co-existence of fiercely militant creeds. It is a significant fact that races which profess unadulterated Buddhism have invariably succumbed to foreign invasion. F. H. S.

AN IMAGINARY NATIVE STATE.

"HINDOO KHAN." By Max Joseph Pemberton. (London: Mills and Boon. 7s. 6d. net.)

Hindoo Khan—a strange mixture of names—was the powerful Chief Minister of the "Peshwa of Umbarra." It had been prophesied to him that Michael Hepburn should lead his people to glory. So Hindoo Khan had Michael drugged in order that he might disobey orders when serving on the Frontier; then, after he had been cashiered, the Indian persuaded him to come and lead the troops of Umbarra. Michael is able to prevent Umbarra from attacking a small English force, and is awarded the V.C. and reinstated in the Army. The chapters that tell how he led the White Horse of Umbarra to the help of his countrymen instead of against them are rather exciting, but the rest only succeeds in making an unconvincing plot seem farcically impossible. There is a fair heroine, who is prevented from remaining true to Michael by means of a letter forged by her father, the General, who at the end remarks cheerfully, "I am a soldier and stop at nothing to gain my ends. It was a cruel thing to do, perhaps, but it has turned out well in the end." There is also a rival for the heroine's hand, the Hon. Bertie Charters, about whom one of the other characters "muses": "The mark of the silver spoon. There are moments when I begin to have grave fears for my friend the Hon. Bertie." Michael has the conventional comic but faithful servant, and is loved by the conventional self-sacrificing Indian maiden. The book is so childishly written that its crudity is often relieved by unconscious humour.

PERSONAL AND GENERAL.

TO-DAY.

October 5 (New Style).
September 22 (Old Style).
Safar 14, 1341 A.H. of the Moslem Calendar.
Tishri 13, 5683 of the Jewish Calendar.

Sir Edwin Lutyens has left London for a visit of three months to India.

M. Diamandi, Minister in the Roumanian Diplomatic Service, has arrived in London from Paris.

The Earl and Countess of Bessborough have arrived in town from Lymington.

Sir Stanley and Lady Fisher left London last week by the P. and O. s.s. China for Port Said.

The Grand Duchess George of Russia has postponed her departure for Corfu.

Edih Bey, the Afghan Minister to Germany, is now on a visit to London from Berlin.

M. Pashitch, the Yugoslav Prime Minister, left Paris last week on his return to Belgrade.

The Hon. Mrs. Francis Lindley leaves London shortly to join the British Minister in Athens.

The Bishop of Gibraltar, who is on a short visit to Malta, was due to leave on October 2 for Constantinople.

Lord Eustace Percy, M.P., and Lady Eustace Percy, who have been paying visits in Scotland and Yorkshire, have returned to London.

Mr. Watanabe, of the Japanese Consulate-General, has left England to become Consul at Bombay.

M. Markovitch, Yugoslav Minister of Justice, is in Paris to confer with the French Government and the Reparations Commission.

General the Hon. C. G. Bruce, the leader of the Mount Everest Expedition, has returned by the s.s. Malwa.

Brigadier-General and Mrs. C. Cunliffe-Owen have left Lyndhurst, and their permanent address is now 4, Egerton Gardens, S.W.3.

Mme. Gavrilovitch, the wife of the Minister of the Kingdom of Serbs, Croats, and Slovenes, returned to London last week from Belgrade.

Major-General Sir W. S. Brancker, Director of Civil Aviation, has removed to the Royal Air Force Club, Piccadilly, where he is staying for the present.

A marriage will take place shortly between Brigadier-General A. E. Aitken, late Indian Army, and Mrs. John Spottiswoode, widow of Captain Spottiswoode, 60th Rifles, of 2, Sion Hill Place, Bath.

M. Vidosav Andjelkovitch, Secretary to the Legation of the Kingdom of Serbs, Croats, and Slovenes, accompanied by Mme. Andjelkovitch, returned to London last week from Belgrade.

M. Milan Stefanovitch, Secretary at the Yugoslav Legation, who, owing to ill-health, could not accept an appointment at Washington, has left London to be attached, temporarily, to the Foreign Office, Belgrade.

The marriage between Mr. Alastair R. Cooper, Royal Scots Greys, and the Hon. Dulsie Bailey will take place on Thursday, October 12, at Llangattock Church, Breconshire, owing to the early departure of the bridegroom for India.

The engagement is announced of Charles Elphinstone Fordyce, Seaforth Highlanders, only son of Mr. and Mrs. B. E. Fordyce, of Cambridge, and Violet Constance, youngest daughter of Colonel C. H. D. Ryder, C.B., C.I.E., D.S.O., late R.E., Surveyor-General of India, and Mrs. Ryder.

A marriage has been arranged, and will shortly take place, between Captain Hugh Charles Spencer Heath, 52nd Sikhs. F.F., son of Mr. and Mrs. F. W. Heath, Southampton, and Helen, daughter of Mr. and Mrs. Amos Vaughan, Ladywell, Bournemouth.

Among passengers by the P. and O. Bombay Express, who left London for Marseilles last week to join the s.s. Kashmir, bound for Bombay, was Major-General Sir Henry Freeland. The Hon. Mr. Justice and Mrs. Le Rossignol and Lady Maffey also embarked in the Kashmir at Marseilles.

It is understood that the Duke of York will leave London about October 10 for Roumania, where he will represent the King at the Coronation of King Ferdinand on October 15. He will be attended by Colonel R. Waterhouse (his private secretary) and possibly also by a member of the King's staff.

The following appointments to the Military Division of the Order of the British Empire for valuable services connected with military operations are announced in the *London Gazette*:—

Commander (C.B.E.).—Maj. (T. Lt.-Col.) W. A. K. Fraser, D.S.O., M.C., Ind. Army (operations by S. Persia Rifles).

Officer (O.B.E.).—Capt. J. W. Bream, I.A.R.O., and T. Lt. T. V. Brenan, New Armies, (attd. 11th Bn., Essex R., Afghan War, 1919); Lt. (T. Capt.) J. H. Davies, I.A.R.O. (N. and N.E. Persia).

SCHOOL OF ORIENTAL STUDIES.
London Institution. Finsbury Circus, E.C.2.
ORIENTAL LANGUAGES AND RELIGIONS.
Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.
For particulars, apply to Sir E. DENISON ROSS, Director.

THE PERSIA SOCIETY.
President: Lord Lamington, G.C.M.G., G.C.I.E.
Founded in 1911 to study all questions of common interest to Great Britain and Persia.
Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1

Digitized by Google

The engagement is announced between Captain Owen Davis, Indian Army, second son of Mr. Lancelot Davis, of Derby, and Ursula Lee Priscilla, daughter of Mr. and Mrs. Lionel Green, late of 10, Cleveland Gardens, Hyde Park.

Major Arthur Moore will lecture on "Britain and Islamic Asia" to the members of the Central Asian Society at the Royal Society of Arts' Room, Burlington House, on Tuesday, October 10, at 5 p.m. Those wishing to attend should apply for tickets to the C.A.S., 74, Grosvenor Street, W.1.

The engagement is announced between Edward J. E. Hubbard, son of the late William Egerton Hubbard, and Muriel Frances, daughter of Louis Marshall, Indian Civil Service (retired), and Mrs. Marshall, of Beechleigh, Bishops Down Park Road, Tunbridge Wells.

The engagement is announced of Ross Lowis, late Indian Army, elder son of Dr. and Mrs. H. L. Lowis, and Joan, elder daughter of the late Major A. H. Baillie, Norfolk Regiment, and Mrs. Baillie, Coombe Lodge, East Liss, Hampshire, and late of Weeping Cross, Stafford.

The engagement is announced between Captain Francis Sinclair Corke, Indian Army, son of Dr. and Mrs. Corke, late of Retford, Nottinghamshire, and Joyce, younger daughter of the late Mr. and Mrs. E. W. Lake, of Westgate House, Bury St. Edmunds.

Mr. Theodore Lumley, J.P., of Upper Grosvenor Street, W., solicitor, of Messrs. Lumley and Lumley, of Conduit Street, W., and of Old Jewry Chambers, E.C., solicitor to the Persian Legation, who died on July 2, aged 74, left estate of the gross value of £53,809, with net personalty £52,410.

The engagement is announced between Geoffry M. Beville, Allicutty Estate, Coorg, S. India, elder son of Lieutenant-Colonel C. H. Beville, C.B., late Indian Army, and Mrs. Beville, and Viola Thérèse, only child of Dr. and Mrs. Ronaldson Russell, of Winterton, Westerham.

The engagement is announced of Edward Lionel Young (Captain, I.A.R.O., formerly attached 34th Sikh Pioneers), only surviving son of the Rev. Vincent Young, Rector of Charleton, Kingsbridge, and Rose Mary, youngest child of the Rev. Everard Owen, St. James' Vicarage, Curtain Road, E.C., formerly assistant master in Harrow School.

APPOINTMENTS, Etc.

Sardari Aata Mahmud Tazzi, a former Afghan Foreign Minister, has been appointed Minister in Paris in the place of Mohammed Aziz Khan, now recalled to Kabul.

Mr. Cecil Fforde, K.C., has been appointed an Additional Judge of the Lahore High Court, and sails for India on October 20.

OBITUARY.

The death is announced from Rome of General Senatore Caneva. General Carlo Caneva was 77 years of age. He served through the African campaign of 1897, received an independent command in 1910, and was afterwards placed in charge of the Expeditionary Force sent to Tripoli against the Turks. He returned home in 1912, not long before the annexation of Tripoli and Cyrenaica by Italy was recognised by most of the Great Powers.

The death is announced of Colonel Sir Henry Oldham. It was in 1858 that he obtained an ensigncy in the Indian Army. He was posted to the 67th Bengal Native Infantry, a regiment which had already mutinied the year before at Agra, and in September, 1859, he became lieutenant in the Indian Army while doing temporary duty with the 6th Foot. Transferred then to the 8th Punjab Infantry, he served with that corps in the China War of 1860. On the return of the Expeditionary Force to India, Lieutenant Oldham proceeded to England on furlough, and on arrival again in India was appointed a Political Officer, First Class, in the Khasiah Hills district, and in this capacity took part in the operations conducted in 1862-3 in the Khasiah and Jaintiah Hills by a small force composed of the 21st, 28th, 23rd, 44th, and 45th Native Infantry Regiments. In June, 1868, he married Ella, daughter of the late Arthur Pigou, of the Bengal Civil Service, and leaves two sons and two daughters.

THE WAR MENACE AND THE WAY OUT

If the British Government had been anxious to commit the country to war it could hardly have set about its task in a more effective way. Confronted with a Turkish army, not merely victorious, but fresh from an overwhelming victory over the traditional enemy, and possibly imagining in its enthusiasm that it had also settled thereby its scores with the Allied Powers, Great Britain had good reason to allow the Kemalists ample time for their exuberance of spirits to subside. Between them and Europe lay the Dardanelles and the Bosphorus; even if that waterway had not been patrolled by the British Fleet, it would have taken some time to transport a sufficient number of troops from the Asiatic to the European shore. With the passage barred by British ships, the crossing could never have been effected. The desire to reach their objective in Thrace, with a view to completing their business with the Greeks, would have inclined the Turks to reason, and a peace conference to arrange a fresh settlement for the Near East might have been held within a short time. The British Government, however, knowing, or having opportunity to know, that for the moment Great Britain was a red rag to the Kemalist bull, assumed a bellicose attitude against the Turks, worked itself up into a state of panic over the freedom of the Straits, which Mustapha Kemal had declared his readiness to accept, and decided that this freedom—which can only materialise as a result of passive acceptance by all concerned, and would be meaningless if it had to be maintained by force—must be secured through the retention of Chanak by British troops. A British fleet patrolling the Straits and the Bosphorus would have appeared to the Kemalist army as to all intents and purposes inaccessible. By this we do not mean that shots could not have been fired at the ships. Experts have been mobilised to tell us, in justification of the Cabinet's policy, that ships' guns are at a disadvantage in the narrow waterway against land howitzers. The point is immaterial. If the Kemalists want war with Great Britain, they must have it, and the Empire on that understanding will rise to a man and see the struggle through; but the duty of the British Cabinet was to see that war is not precipitated by misunderstanding without a tangible issue.

The freedom of the Straits is not a tangible issue to-day as between Great Britain and the Kemalists, for the reason that the latter have no *locus standi*. An arrangement affecting the waterway between the Mediterranean and the Black Sea must be agreed to by Turkey, and until there is once more a State answering to that name it is idle to talk of, still more to fight for, a permanent rule of the Straits. Their freedom for the moment is guaranteed by the presence of Allied fleets. To render its bogey more formidable to public opinion the British Cabinet declared that this freedom could be maintained only by the retention in Allied hands of Chanak, the occupation of which by the Kemalists would endanger the traffic of the waterway. Accordingly, in spite of a French and Italian withdrawal, and in spite of the fact that the freedom of the Straits must rest on an international basis and not on a purely British guarantee, British troops were kept at Chanak, and the Kemalists were warned off the so-called neutral zone. Now, the least acquaintance with the Turks or with the history of the last three years would have convinced the Cabinet that the Kemalists might be persuaded, but are not likely to be bluffed. The Chanak garrison was quite inadequate to defend the neutral zone, which has been invaded by the Kemalist army, not unnaturally in their present state of mind and in view of the British Cabinet's obvious inability to substantiate its warning. The actual position, therefore, is that Kemalist troops walk up and down outside the Chanak defences, with white flags and reversed arms, and a situation approximating comic opera has been created, with the momentary imminence of war. But, we are assured, the retention of Chanak was indispensable to the freedom of the Straits. The Kemalist reply to that is to occupy two places on the Dardanelles, one above and the other below the British post. Chanak, it is true, is situated at the narrowest part of the Dardanelles, but for all practical purposes the occupation of any other point on the Asiatic shore of the Straits would be equally effective for a hostile force having designs on the "freedom" of the waterway. If Great Britain cannot prevent the Kemalists from occupying Erenkeui or Lapsaki, there can be no point in holding Chanak, at least none that could be regarded as an offset to the danger that its retention entails of precipitating a conflict which might be avoided. There is a real risk of war when two forces face one another from either side of wire entanglements. Moreover, if the Kemalists are strong enough, and sufficiently well equipped to threaten seriously the freedom of the Straits, they will be in a position to take Chanak and administer a reverse to British arms. If this outcome is not anticipated, the Government's confidence suggests that there was no foundation for its bogey of the danger to the Straits.

Is there, then, any way out of the present impossible position? Rifles may go off at any moment in front of Chanak, and Great Britain may be involved in a war in regard to which no real principle is at stake, and, worse still, there is little chance of the British being able to force a decision except at the price of prolonged hostilities. Mustapha Kemal, being acquainted with the British Government's semi-official statement of September 16, since officially endorsed, reads Ministers a lesson in diplomatic phraseology and shows no sign of playing the British game by hurrying to terminate the *impasse*. He and his followers are not unnaturally suspicious of everything that the present British Government does. They have been denounced by Mr. Lloyd George in unmeasured terms, even when the necessity of negotiations was recognised; they have the British official "statement" as evidence of the Government's determined hostility to them. When the same Ministers merely undertake to "favour" their claims in regard to Thrace, they look for treatment on a par with the "favour" meted out to Greece. As it is impossible that the present Government should ever command the trust of the Kemalists, the question arises whether the country is to run the risk of drifting into war rather than face the obvious alternative of a change of Government. All that is needed for the moment is a temporary reconstruction of the Coalition Cabinet for the express purpose of extricating the country from the menace of a needless war. This could be done with a minimum upheaval if the Prime Minister were to hand in his resignation and the King were to call upon Lord Curzon to reconstitute

Digitized by Google

the Ministry. Mr. Lloyd George, who is hopelessly compromised as far as both Greeks and Turks are concerned, and for this reason can never be relied upon for a satisfactory Near Eastern settlement, and Mr. Churchill, his dangerous henchman, would drop out. While the fate of the Coalition was being settled by elections and questions of party leadership were being decided, Lord Curzon, at the head of an *interim* Government, could call a Near Eastern Conference and devote all his attention to a settlement of the Turkish question. There might be no need to modify any of the present undertakings or even military dispositions. Confidence in Great Britain, in her word, her honesty, and her capacity, would be restored in the East by the mere Ministerial change.

THE ABDICATION OF KING CONSTANTINE

Never during the century of her existence as an independent State has Greece merited more the sympathy of the world than at this moment. She has been caught in the vortex of an international whirlpool, and though making a brave show of seeming to direct her own destinies, has found herself being drawn deeper and deeper down to her destruction. Even now, when she imagines that she has broken free and is of set purpose carving out afresh her own destinies, she is seen to be floundering as helplessly as ever. Only a miracle, in the form of a self-restraint that was not to be looked for in the Greek people, could have prevented the defeated army from Asia Minor from seeking to divert unpleasant attention from its own shortcomings by fastening upon others the blame for its disasters. It was, however, a very small section that actually kicked over the traces—although large enough in the present state of the country's mind to effect its purpose. The bloodless revolution argues not so much a nation united with one clear object in view as a nation dismayed and benumbed, accepting without question the ministrations of any who claim to be acting for it.

How far still from realities the Greek people are is seen from the demands of the revolutionaries. Greece is not urged to stand true to herself, but to fix her eyes on the Entente Powers. King Constantine has to abdicate because he is not *persona grata* to those Powers, and a Government is to be formed agreeable to the Entente. All this in the vain hope that the Powers, having in effect pledged themselves to give Eastern Thrace to Turkey, may be persuaded to break their word and confirm Greece in her possession of it. Could anything be more pathetic?

In the meantime King Constantine has had to abdicate. A king who does not fight for his throne is liable to be accused of having a craven spirit; but in the face of any determined action on the part of a section of the army there is no alternative to abdication other than civil war. In his farewell message to the Greek people King Constantine justifies the step that he is taking:—"Wishing not to leave any doubt in the mind of anybody that by my presence on the throne I would place the slightest obstacle to the 'sacred union' of the Hellenes and to aid from our friends, I have abdicated the Royal authority. . . . I am glad that a fresh occasion is given me to sacrifice myself once more for our Greece."

King Constantine has been anathematised by the British Press with wonderful unanimity. In arriving at its judgment, however, that Press has had to rely upon such flagrant violence to facts that history is not likely to accept its condemnation as an impartial verdict. The passions engendered by the War were too potent to admit of a dispassionate inquiry into the actions of others, and it was conveniently assumed that those who were not with us were against us. When once this stage was reached, rumour and report were not slow in trying to clinch the matter.

It is not necessary to make a hero of King Constantine in order not to subscribe to the prejudiced judgments passed upon him. He has two qualities which differentiated him from his contemporaries, the Emperor William and King Ferdinand of Bulgaria, and which should commend him to most Englishmen—a sense of humour and an absence of pose. His social predilections, moreover, were entirely British. But because he did not immediately bring Greece in on the Allied side in the War it became at once the fashion in most quarters to vilify him without restraint, and to pervert every possible incident or action connected with Greece to his prejudice. It is quite certain that King Constantine did not feel called upon to subscribe to all the altruistic principles that the Allies proclaimed so loudly as their war aims. Possibly he was gifted unwittingly with second sight and foresaw in spirit how the self-same Allies would interpret and act upon those self-same principles in the years between 1918 and 1922. Be that as it may, he looked upon the War from the Greek point of view, and he refused to sacrifice Greece as Serbia and Roumania had been sacrificed. He may even have satisfied himself for a long time that Germany was going to win the War. If he did, he certainly did not shrink from compromising himself by showing favour to the Allies. King Constantine had, presumably, made up his mind that Greece, if she entered the War, should do it in her own good time, as both Roumania and Italy did. But there was no Venizelos in the other two countries. Left alone, the King could, no doubt, have satisfied the Allies of the soundness of his intentions; but pitted against the fiery enthusiasm of his masterful Prime Minister, he was represented to the Allied peoples as a cowardly, treacherous monster, intent on compassing the defeat of the Allies. Early in 1915 the conflict between the King and M. Venizelos began over the latter's eagerness to commit Greece to an Asia Minor policy. In the light of subsequent events, can there be the least doubt as to who of the two was right and who was wrong? It would indeed be symptomatic of Greece's bewildered state of mind to-day if, as a result of the mistaken Asia Minor policy, she exiled King Constantine, who consistently opposed that policy, to make room for the man primarily responsible for her undoing. In the quarrel between the King and M. Venizelos it was always the latter's version that reached the outside world. It is safe to say that every episode that concerned Greece at that time in connection with the War, culminating in the tragic affair of December 1, 1916, was distorted to King Constantine's prejudice. Prior to that date the Allies had maintained official touch with Greece through the French representative at Athens, and possibly a few Britons will grudgingly admit to-day that there may have been another side to the question when they realise that France's representative had made such a fetish of the Republican principle that he could hardly bring himself to have official intercourse with a crowned head.

The attitude of the Greek people towards King Constantine throughout his exile was sufficiently shown by the circumstances of his recall. Greeks may deserve the title of fickle after this second departure of the King into exile, but all impartial observers on the spot could testify to the loyalty of the nation as a whole during the Venizelist régime. The statement that King Constantine believed in and acted upon his belief in his Divine Right as King rests, it is understood, on the state-

Digitized by Google

ment of his personal enemy. Certain it is that, for the greater part of his reign, the attitude of his people was summed up in the mediæval conception that the King can do no wrong. This unswerving loyalty that stood Greece in good stead for a time has now gone by the board, and King Constantine is an exile. The scales have been unfairly weighted against him by the Governments of Great Britain, France, and Italy, which have pursued towards unhappy Greece a policy that can never be justified, and which, in private life, would have caused the perpetrators to be hounded from the society of decent people. The cause of the country, however, is higher than that of any individual. For Greece's sake, therefore, it is to be hoped that she will find, under King George II., the unity and steadfastness without which she can never expect to tread the path of peace and prosperity.

MUSICAL NOTES.

THE NATURE OF MELODY.

The valuable nature of the educational work which "His Master's Voice" Company are performing is well exemplified by the series of records that they have recently issued containing Dr. Walford Davies' lectures upon Melody. It is unnecessary to praise the reproduction of these records —that is admirable in every way, for every word spoken and every note played can be clearly heard; but the extreme usefulness of these records in the musical education of this country must be emphasised.

Dr. Walford Davies' services in the cause of music are well enough known; when he speaks he speaks with authority. And it may be said that his utterances gain added weight through their beautiful illustration by Miss Marjorie Hayward, whose fiddling is here faultless. His lectures upon Melody number twelve, with six long musical illustrations in addition. They are at once so simple as to be followed easily by the most untutored listener, and so apt and enthusiastic as consistently to hold the interest of the advanced student of music. But it is mainly to the common music lover as opposed to the cultured musician that I recommend them, for their main content is rather information than suggestion.

The lectures are respectively on Musical Outline, in which Melody is defined as an outline in the world of Sound, on Definitions (Note, Interval, Chord, Rhythm, and so on), on the Pentatonic Scale, in which is emphasised the fact that it is the Melody that makes the Scale, and on Melodic Meanings, wherein the lecturer advises that always meanings should be given to heard melodies, though to me there does not seem much depth in this remark. Having travelled so far, Dr. Davies is enabled to get at the real nature of Melody, the A B C of which he describes as Adventure, Balance, and Completion. In his two lectures on Melodic Adventure he lays down certain just rules, which are surely useful, though often and splendidly broken. He says, for instance, that to rise and fall by steps is safer than by leaps, and that when a big leap is made one should return within it rather than go beyond it. To Balance he again devotes two lectures, enumerating and illustrating the ways of gaining it as Exact Repetition, Development, and Repartee. He proceeds to the Completion of a melody, saying that one must either return to the chief note, or use a perfect cadence, or return to the first thought in the melody. This brings him to Cadence, which, as he rightly states, also belongs to Harmony, but which here gives him the fortunate opportunity of explaining the "musical rainbow," the colours of chords, and so forth. So lucidly has this preliminary work been done that the last two lectures, on Simple Tune Building and on Movement Building, will be followed with easy and eager delight. It is no extravagant claim to make that anyone who has followed the thought of the lectures and listened attentively to the musical illustrations will himself be able to construct a melody; and this will give him the keenest pleasure, not perhaps through creative ability, but through the fact that such practice will make his listening to the world's tunes appreciative in the highest sense.

These records will, I have no doubt, be gratefully used by true music-lovers. Is it too much to ask, I wonder, that someone should perform a similar, though much more difficult, service by explaining Harmony?

ANDANTE.

A PROTEST FROM EGYPT.

We have received the following telegram from Tantah. It is signed Dr. Hassan Kamel:—

"Egyptians renew vehement protest against policy of repression which keeps in dark and painful loneliness our mandatory Zaghloul Pasha, in remote exile a number of our national heroes, who are left victims in that hellish island to dangerous diseases; and another group of our leaders in gloomy cells, where their health has been undermined. This intimidatory policy, which suppresses all forms of liberty in Egypt, and is meant to stifle nationalist movement, has only lent it new vigour and zeal. Such a policy only embitters relations beyond reconciliation. It is time to realise, as the rest of the world has, that the ill-starred policy of February 28 has remarkably failed. You have tried every way leading to failure, and it remains for you to fall back on the only right way—the way of honest and sincere policy, which solves the question on basis of acknowledgment of our natural right to complete independence. At the same time we do not decline reasonable guarantees to foreign interests. Thus a precarious situation would be saved."

NOTES AND NEWS.

1, Devonshire Square,
London, E.C.2.

The Crisis Over.

After a very anxious week the City is able to breathe again in the certainty that it has seen the worst of the Near Eastern crisis. On more than one occasion things began to look very ominous, and it seemed at least possible that the extremely inept handling of the situation would entail another struggle of uncertain extent and duration. It is scarcely necessary to labour what that would have meant. The consequences are too obvious, and one would have thought that the economic factor alone would have induced the greatest caution on the part of the authorities. Perhaps it did at the eleventh hour. Clearly in addition to putting a trade revival out of the question for years, war would have had economic results for Great Britain and every country in Europe of the very gravest character.

More Taxation.

As it is, this country will not come out of the crisis unscathed. It is unfortunately impossible to move troops, etc., without incurring considerable expenditure, and the British bill for what has been done during the past few weeks and for the expenditure that will be incurred before things are as they were will amount to no insignificant sum. Estimates are proverbially unreliable, and I do not propose to enter into competition with the Government and Opposition Press as to the actual figures. But it would seem obvious that the cost of the adventure from first to last, will at least offset the reduction in the income-tax, and it will not be surprising if when the next Budget comes round, there is not an increase in the tax instead of a further reduction, which taxpayers would have been justified in expecting.

Turkey and the Trade Position.

The effect of developments in Asia Minor on trade is, of course, bound to be considerable. It is not merely that the Turkish market is inaccessible for trade; it was so in the main before the Turkish offensive. What matters is the effect on the surrounding regions and on world trade generally of the prevailing uncertainty. Developments during the year make it evident that no very extensive trade revival could be looked for immediately, but for months, as I have pointed out, signs have been increasing that it was not far off. It could not be otherwise with markets so depleted of stocks. So from many regions, not least from the Near East, orders have been forthcoming, though on a small scale, and only equable conditions were required for a moderate development of trade. For the time being hopes in this direction will not be realised, and as far as the Near East is concerned, trade will naturally be at a standstill, until there is a final settlement.

Importance of a Real Settlement.

Provided, however, the peace that is arranged is one which traders can regard as a real settlement—one which leaves no possibility in the immediate future for any further crises—and there seems every reason for believing that this will now be the outcome—then the compensations that commerce will derive will far outweigh the consequences of the temporary set-back to trade. It is simply impossible to over-estimate the effect of the *impasse* in Asia Minor in retarding the world's trade recovery, and it would certainly not be going too far in anticipating that peace will have literally a volcanic effect on the economic situation in the Near East generally. It will mean freedom for commerce to go ahead unperturbed by fears of wars, and as the general situation in Russia seems to be improving—another factor which will have an enormous influence throughout the Levant—it is not difficult to foresee that before long the trade of the Near East should be approaching its pre-war dimensions. In view of the extreme importance of a settlement, it can only be hoped that the authorities will lose no time over the negotiations, for if there is one thing the world requires, it is to settle down to solid work.

Lord St. Davids on the Position.

At the half-yearly meeting of the Smyrna-Aidin Railway last week the chairman, Lord St. Davids, strongly criticised British policy in the Near East since the Armistice. He pointed out that he had always maintained that the attempt to hand Smyrna over to the Greeks was an absurd action. "It was perfectly absurd, even from the point of view of the Greeks themselves, to think that you could go and take one of the great ports of a great country," he added, "hand it over to another people, and think that it would be of any benefit to the people to whom you handed it over." His lordship is strongly of the opinion that in any peace that is made there must be ample provision for financial assistance to Turkey, so that the ruined districts may be restored. He further emphasised the necessity of provision for the reorganisation of the railway system of Turkey, point-

ing out that unless the Smyrna-Aidin Railway and the other railways are restored it is impossible that trade and commerce and civil life can be restored.

Financial Help for Turkey.

Lord St. Davids concluded a very important address with an appeal to the Powers to help Turkey to recover as soon as possible. He laid stress, as I have done again and again, on the importance of Turkey in Asia as a market for British goods. "The district, for instance, that our railway served," he said, "is one of the richest in the world . . . why, even before the war itself the district was under-populated. Now the whole thing will want resettlement from the very beginning." He went on to point out that it would only be when the resettlement had taken place, "when the population is able to go back, when they are able to rebuild their houses and start producing and start trade . . . that the position of the world as a whole can improve."

Sudan Irrigation.

The decision to proceed at once with the vast irrigation project in the Sudan (the award of the contract for which to Messrs. S. Pearson and Son, Ltd., the famous firm of contractors, was recorded in these columns last week) marks a further and very important stage in the process of making the Empire self-sufficing as regards supplies of cotton. As already stated, the present enterprise includes the construction of a dam nearly two miles in length across the Blue Nile, as well as some 650 miles of canal and drainage, and the effect of it will be to irrigate between three and four hundred thousand acres. It is expected that the work will be completed within three years, and it will then not be long before the Sudan is in a position to add enormously to its gradually growing output of cotton. It is an undertaking in which the Empire as a whole and Great Britain in particular have a vital concern, while for the Sudan itself it is of outstanding significance, meaning as it does an addition to its economic resources of the first importance.

Great Achievements.

It is, I fear, a fact that in this country as a whole there is far too little appreciation of what is going on in the Sudan, of the painstaking work of our administrators there, which in a few years has done much to change the face of the country. The average man hears much of regions where there is, what I might call, a "political atmosphere," but of those where quiet, steady progress is being made he hears next to nothing, except he be numbered among the ranks of readers of The Near East or one or two other journals. The British Empire Exhibition should afford an excellent opportunity to change that state of things, and I hope that when that event comes round it will find the Sudan represented in a way which will bring home to everyone the wonderful development of this region and its great potentialities.

The Indian Fiscal Commission.

The aspect of the recommendation of the Indian Fiscal Commission that India should adopt protection with which this country is mainly concerned is, of course, the effect that would be produced on trade. While it is difficult to express a definite view on this question at this juncture there would seem to be little justification for apprehension on the part of our traders as a whole. Lancashire, I am afraid, will feel the effects to an increasing extent; but, apart from the cotton trade and possibly one or two other lines, I do not suppose that any great difference will be felt—at any rate, for a long time. It must be borne in mind that the development of industry cannot be carried out in a moment. It is a matter of years, and where the conditions cannot be described as being altogether suitable, as is the case in India, it is obvious that serious competition need not be expected in the near future.

Commerce and Industry.

GREECE.

Athens, September 18.

The Import of Alcohol.

The Ministry of Finance announces certain modifications concerning the import of alcohol from abroad, to be used in conjunction with wines or glucose. A local tax of 4.80 drachmæ per 100 kilogrammes for every degree over 12 will in future be levied on all wines imported from abroad, irrespective of quality. Alcohol mixed with wine or glucose to be used for consumption will be liable to a principal tax, and a supplementary "consumption" tax, as well as to import duty, as from July 31, 1922. In respect of losses incurred owing to leakage during shipment or whilst in warehouse, the general allowances will be applied—*i.e.*, on pure alcohol up to 1 per cent., and on distilled or other alcohol up to 2 per cent.

Miscellaneous.

No meeting of the Consortium of Banks to approve of grants of exchange was held during the last week. The pound sterling is now bought at 218 drachmæ in the free market.

The Italian boat Adamello arrived last week in Piraeus with 7,250 tons of wheat from Galveston. This consignment is part of the amount purchased by the Government for the needs of the State.

Athens, September 28.

The Financial Situation.

The new Minister of Finance, M. Eftaxias, has made the following statement to the representatives of the Press with regard to the financial situation of the country :—

"It is evident that the financial condition of the country is a precarious one, but it is by no means a desperate situation. In order to relieve the economic pressure, the first essential is that the country remains perfectly calm, and it will be the first duty of the new Government to see that public order is maintained. Meanwhile, with the reduction of war cost there must be a strict curtailment of expenditure in the internal administration. We must all help by exercising the strictest economy possible.

"In order to relieve the financial situation it is not necessary to impose further taxation. It will be sufficient if the taxes at present in force are rigorously collected. With the lessening of our war expenses and the thorough application of the fiscal system, we may be sure that the country will rapidly succeed in extricating itself from the very difficult situation in which we now find ourselves."

PERSIA.

Teheran, August 31.

German and Russian Trade.

The ship which is bringing German goods all the way from Hamburg via the Volga is said to be due at Enzeli in a week's time, and it will be interesting to see what class of merchandise it will unload, at what price it will be sold, and how it will affect the market. The Commission, headed by M. Taghizadeh, recently sent to Moscow by the Persian Government to draw up a commercial convention between the two countries, has so far not been able to arrange satisfactory terms owing to the uncompromising attitude of the Soviet authorities, who do not appear to wish to abide by the terms of the Russo-Persian Agreement of 1921 in this respect. M. Shumyatski, the Russian Chargé d'Affaires since M. Rothstein's departure, has just returned from Baku, where he went a short time ago with a view to arriving at a *modus operandi* with the Persian Commissioners in this connection, but the result of his visit is not yet known. The Russians are very anxious to get Persian goods into their country; in fact, so much so that they have notified merchants here that if they have not sufficient funds to pay for the transport of their merchandise from the Russian frontier or port to the Nijni Novgorod Fair, they need not pay in advance, but after arrival at the fair from the proceeds of the sale of the goods. But the export of goods into Persia is quite another matter, and all merchandise imported from Russia is in the hands of the Veneshtorg, the Soviet commercial agents, who control the price of such commodities as paraffin, petroleum, sugar, etc., and by their competition with the Persian merchants and their ability to undersell them they are doing a great deal of harm to Persian trade. The price of sugar has come down so much these last few weeks that bankruptcies are feared among the merchants dealing in this commodity owing to their having to unload their stock at a dead loss.

ROUMANIA.

Bucharest, September 21.

Prohibition of Export of Pigs.

Owing to the scarcity of pork and lard throughout the country arising from the very tempting prices obtained for export, the Government has stopped the export of pigs as from September 20.

Kemalist Enquiry for Barley.

The Chamber of Commerce of Constantza has received from the Town Council of Constantinople a request for a shipment of a very large quantity of barley. It is assumed that this feeding stuff is destined for the Kemalist army.

CYPRUS.

Cyprus, September 19.

The Outlook.

Trade returns show that during the three months ended June 30 imports were valued at £330,711, as against £309,750 for the corresponding period in 1921. Exports were valued at £242,429, as against £174,816. Imports thus exceeded exports by £88,282, which indicates a continuance of falling trade. The prospects for the coming months is discouraging, and some papers go so far as to assert, very erroneously, that Cyprus has never been faced by such a situation. The fact is that

the present depression has followed closely upon years of abundance, and it was the great wave of prosperity, during which so many fortunes were made in the island, that has created the great demand for imported luxuries of all kinds. Should next year's harvests be prosperous, the island's power of recovery will be rapidly manifested, as in many much worse crises of the past. It is still hoped that the High Commissioner may bring with him some favourable announcement, either as regards relief of the island treasury from the burden still borne in respect of the Turkish loan of 1855, or otherwise. Mr. Stevenson, it is said, may not return till November, or perhaps January next. The papers look round, as usual, for a stick with which to belabour the Government, instead of being devoutly thankful that the island is no longer a rather miserable annex of Turkish Asia Minor. The administration is blamed, for example, for not spending surplus revenue on roads and public works, the fact being that—to take only one branch of expenditure—many thousands are now spent annually on public works, whereas in Turkish times not a piastre was expended on them.

CZECHO-SLOVAK-RUSSIAN COMMERCIAL RELATIONS.

Before the war the Czecho-Slovak industry had extensive connections with the Russian market, and is now trying hard to regain, at least to a partial extent, its pre-war position. This has been facilitated by the recently concluded commercial treaty between the two countries. The Czecho-Slovaks have already succeeded in establishing friendly relations with the Russian Border States, through which considerable quantities of manufactured products have been sent to Russia. The progress made in the commercial relations of the two countries is being further facilitated by mutual participation in the industrial fairs and exhibitions. Thus the Czecho-Slovak industry has been represented at the industrial fair at Riga, while Russia, Ukraine, and Latvia exhibited their goods, chiefly raw material of which the industrial Czecho-Slovakia is in need, at the recently held fair at Prague. At present the Czecho-Slovak industrial and commercial organisations are making preparations for a special exhibition of Czecho-Slovak industrial products at Charkov, for which purpose a delegation of manufacturers and traders is visiting Ukraine. During its stay in Ukraine the delegation, which is leaving Prague on October 15, will open several commercial agencies, of which the most important will be at Charkov (the seat of the Ukrainian Government), at Kijev and Odessa. In addition to this, a Czecho-Slovak-Ukrainian Co-operative Society is being formed in Prague for the purpose of exploiting large tracts of land, offered to it by the Ukrainian Government and the Ukrainian Red Cross Society.

From Egypt to Syria.

Through Booking.

As a result of a new working agreement between the Egyptian State Railways, the Wagons-Lits Company, and the Nairn Transport Company of Haifa and Beyrout, it is now possible to travel from Cairo to Beyrout in twenty-four hours. A first-class through ticket costs less than £E12 (actually P.T.1,161.5), and in this sum are included the charges for a sleeping-car berth and for dinner, breakfast, and lunch on the trains. The second-class fare, including the use of a sleeping-car berth up to 9 a.m., is P.T.810.

Passengers leave Cairo by train at 6.15 p.m. for Kantara, where they cross the Suez Canal and entrain on the Palestine Railways. Haifa is reached at 12.45 p.m. the next day, and here they are transferred to motor-cars, which are timed to leave at 1.30 p.m. and arrive at Beyrout at 6.30 p.m. The motor service is carried out by a fleet of luxurious Stanley Steam 6-seater cars, driven by European drivers, the 96 miles between the two terminals being accomplished in five hours. Luggage to the extent of two portmanteaux per passenger is carried free.

The journey lies for the most part along the coast, by the sands of the Bay of Acre, past the mouth of the Brook Kishon with its quicksands. In Acre the citadel stands very much as Saladin left it, save that in its vaults are piles of the cannon-balls and grape-shot left behind by Napoleon. Thence on to Tyre, the road at first running alongside the old Roman road which witnessed the passage of the armies under Pompey and Antony. Thanks to the efforts of Lord Allenby's army—the work was actually done by the 7th (Meerut) Division under General Fane in forty-eight hours during the advance in 1918—it is now possible for cars to pass over the famous Ladders of Tyre along a road hewn in the rock, where before only pack transport could negotiate the steps along the cliff edge. Beyond Tyre the road crosses the River Litany by a fine stone bridge, and thence hugs the coast past Sidon, standing, like most of the Phœnician towns, on a promontory. As the guide-books inform us, on the landward side, particularly to the north, the town is surrounded by luxuriant orchards and gardens, in which grow oranges, lemons, almonds, apricots, bananas, and palms. Beyond the green plain, above the lower spurs, tower the snowy peaks of the Lebanon. Some fifteen miles from Beirut the motor-cars, for a small additional sum, are prepared to make a detour up the Nahr Safa valley to the spurs of Lebanon.

The plain between Mount Lebanon and the sea, as a writer in The Near East recently reminded us, is one great carpet of olive groves and vineyards, mulberry trees, and cornfields. Here is a finer type of man, he added, and a better cultivator than in Palestine. Here is better farming; and here are fine oil mills and oil presses and silk mills all over the countryside.

There can be little doubt that the facilities now offered by the Egyptian State Railways will induce a far larger number of people to include Syria as well as Palestine in their Egyptian tour.

The traffic receipts of the Egyptian Delta Light Railways for the week ended August 31 amounted to £E8,676; total for the year, £E119,280. For the corresponding period of last year receipts amounted to £E3,476; total for the year, £E139,261.

RUSSIAN OILFIELDS CRISIS.

Labour and Paper Money Shortage.

The Soviet Government is on the verge of an acute petroleum shortage. The current output of petroleum in the Baku and Grozny oilfields cannot meet even the modest requirement of Soviet Russia. So far the Bolshevists have not felt the shortage of petroleum, because at Baku they found large stocks of it, which they used freely.

On February 1, 1921, there were 3,600,000 tons of oil at Baku. By February 1, 1922, the stock was reduced to 1,600,000 tons, and by August 1, 1922, it was only 1,050,000 tons. By November 1—*i.e.*, by the end of the navigation period—the stock of oil at Baku had fallen to 340,000 tons. During the winter, when oil is exported from Baku only by rail, and when the current output exceeds the exports, a certain accumulation of stocks takes place.

The *Ekonomicheskaya Zhizn* (September 3) thinks that by April 1 next the stocks of petroleum will reach 960,000 tons, "which is only 30 per cent. of the estimated exports from Baku during the navigation season of 1923." This refers only to the exports of petroleum through the Caspian and the river Volga to Central Russia. If all the amount of petroleum to be exported from Baku be taken into consideration—*i.e.*, if the exports to Turkestan, the Caucasus, and abroad be included—then the amount of oil left in Baku in the spring of 1923 will not be as much as 30 per cent. of the estimated figure.

The consumption of petroleum in Soviet Russia is far below the normal. For instance, the Bolshevists propose to export about 2,900,000 tons of petroleum from Baku to Central Russia by water, whereas in normal times over 6,500,000 tons per annum was transported up the Volga.

The Bolshevists are very much alarmed at the prospect of a petroleum famine. Until recently petroleum was the only one of the three kinds of fuel—wood, coal, and oil—of which there was no lack. The shortage of wood and coal has become a constant factor in Soviet economics. In spite of all their efforts, the Bolshevists were, and are, unable to organise the production of coal and wood-fuel in sufficient quantities. They therefore adapted many furnaces (especially in locomotives) to burn liquid fuel, reckoning that there would always be plenty of petroleum. But when such calculations were made, apparently it was not taken into account that the only reason why there was no shortage of petroleum was that there were old stocks of petroleum at Baku accumulated before the nationalisation of the industry, and, by the way, belonging to private persons. When these stocks are exhausted there will be a petroleum famine in Soviet Russia, similar to the coal and wood-fuel famine. The only way in which the Bolshevists can avoid this famine is to increase the output of petroleum in the Baku oilfields.

The Grozny oilfields, which normally yielded about one-sixth of Russia's total output of petroleum, are now strained to their utmost capacity, and the Bolshevists cannot even dream of being able to increase the output of Grozny petroleum. All their hopes are based on Baku. In pre-revolutionary days the output of petroleum at Baku reached 630,000 tons per month. The highest output of the nationalised Baku petroleum industry did not exceed 264,000 tons per month. In order to fulfil the proposed programme of exports from Baku, the monthly output should reach 350,000 tons.

The Bolshevists themselves do not believe in the possibility of such a high level of production. There are no grounds whatever for hoping for such an increase in the output of Baku petroleum. The number of working wells, which showed a tendency to increase during the current year, has again been reduced. In pre-revolutionary times the average number of working wells was usually over 2,900. In May only 1,212 wells were working, in June 1,170, and in July 1,137.

Before the revolution the borings reached from 4,000 to 5,000 sazhens* per month. The record figure attained by the nationalised Baku oilfields was 1,274 sazhens in March last. In June, however, the borings had fallen to 816 sazhens, and in July to 499 sazhens (*Ekonomicheskaya Zhizn*, September 2). With such a low rate of boring, of course there can be no question of increasing the output. It is an ominous indication of a further reduction of the output in the near future.

As usual, one of the principal hindrances to the extension of operations in the Baku oilfields is the shortage of labour. In summer there is a particularly great exodus of workmen from the oilfields, as they prefer to work on farms and market gardens. The lack of technical materials is likewise a serious obstacle. For instance, owing to the want of sulphuric acid the work of the oil refineries is greatly retarded.

The cause of this shortage of labour and lack of technical materials is that the managing boards of the nationalised oilfields have no money or other resources. Seventy-five per cent. of the petroleum raised is used by so-called "State consumers," who do their utmost to avoid paying for it, while the Soviet Government subsidies to the petroleum industry are, at best, paid very late, and more frequently never reach Baku. The shortage of paper money is especially acute in the outlying districts of Russia. The absence of paper money places the Petroleum Board in a very critical position, as the arrears of workers' wages are increasing, and there is no money to buy materials, etc.

"The state of the Baku petroleum industry," says the official report, "will continue to be alarming, unless at least 3,000,000,000,000 roubles are received from the central authorities in August." This shortage of paper money places the Bolshevists in a very awkward position. The more roubles are printed, the more roubles are wanted, and the printing press cannot keep pace with the demand for paper money. The Baku petroleum industry cannot pay for itself, because even if it is not being actually worked at a loss by the Soviet (which is very doubtful) in any case three-quarters of its customers are unable to pay in full for the petroleum they consume, as, even according to official Soviet information, in most cases they have been working at a loss after nationalisation, and if they have been able to exist so far, it is only thanks to the aforesaid printing press.

The whole petroleum industry, both at Baku and elsewhere in Soviet Russia, is on the eve of a peculiar financial crisis: its present owners are without even paper money to meet current expenses. It is difficult to say how the Bolshevists will manage to extricate themselves out of this tangle. They are already aware that the printing press will not save the situation. At present, as we know, all their efforts are directed towards the attraction of foreign capital to their nationalised industries. It is very doubtful, however, whether they will find any foreigners willing to invest their money in a country where there is no stable civil order, and where the Government does not acknowledge private property.

BRITISH INDUSTRIES FAIR · 1923

LONDON & BIRMINGHAM
February 19th to March 2nd 1923

Organised by H.M. Department of Overseas Trade

The ninth British Industries Fair will be held on the above dates, and again the London Section will be housed at the White City and the Birmingham Section at Exhibition Buildings, Castle Bromwich. The Fair will embody all that is best in British Industrial effort. Manufacturers, Storekeepers and Merchants the world over are invited to attend personally, to send their Buyers, or to instruct their British or European Factor to represent them at this National Exhibit of British Industries.

SCHEDULES:

LONDON
White City,
:: W. ::

Musical Instruments. Furniture and Basketware. Sports Goods, Toys, etc. Jewellery, Silverware, Cutlery, etc. Scientific and Photographic Goods. Chemicals and Drugs. Stationery and Printing. Fancy Goods, Travelling Requisites, etc. Brushware. China, Earthenware, Stoneware and Glassware. Foodstuffs and Beverages. Fancy Leather Goods, Leather, etc.

BIRMINGHAM
Exhibition Buildings,
:: Castle Bromwich ::

Brassfoundry, Hardware and Ironmongery. Metals. Construction, Building and Decoration. Power, Lighting, Heating, Cooking and Ventilating. Engineering in all Branches. Agricultural Machinery. Mining Appliances. Motors, Motor Cycles, Cycle Accessories. Perambulators. Guns, Saddlery and Harness, Fishing Tackle. Brewing and Distilling Appliances.

The finest display of Quality Goods in the World

Descriptive Booklets and Invitation Tickets may be obtained from nearest British Legation, Consulate, or on request to the Secretary, British Industries Fair, 35, Old Queen Street, Westminster, London, or the General Manager, Chamber of Commerce, Birmingham, England.

INDIA'S FISCAL POLICY.

Effort to Develop Industries.

The recommendation of the Indian Fiscal Commission that a policy of protection should be adopted will come as no surprise to those who have followed the course of events in India during the past few years. It has been obvious in a variety of ways whither events were tending. As a matter of fact, as a result of the step taken to meet successive Budget deficits, India has already gone far on the road to becoming a protectionist country. But the introduction of isolated measures from time to time, whatever their cumulative effect, would not have satisfied many Indian politicians who are eager to try the effects of protection on a grand scale. They are now to have their wish, though whether the results will be quite as felicitous for India as they obviously expect must remain to be seen. Protection is apt to prove a double-edged weapon, and in the case of India it is not difficult to foresee disadvantages which may outweigh the positive advantages that may accrue in the immediate future.

From the summary of the Commission's report, it is evident that what is in view is a system of protection operated on the most scientific lines as a means of furthering India's industrial development, which, it is pointed out, is not commensurate with the country's size, population, and natural resources. The view is taken that the conditions for a rapid industrial advance are suitable, but that the advance will not be sufficiently rapid without the stimulus to be derived from protective duties. It is also maintained that the necessity for continuing to derive a high revenue from the tariff, which the financial situation makes evident, leads inevitably towards protection. On the other hand, as everyone knows, protection must result in a higher level of prices. Most of the unrest in the country is to be attributed to the economic consequences of the war, and it is obviously possible that any general system of protection may have at least as adverse effects. The Commission recognises the dangers in this direction, and maintains that the exercise of discrimination in the selection of industries for protection, and in the degree of protection afforded, will ensure that the inevitable burden on the community is kept as light as is consistent with the due development of industries. The final conclusion of the Commission is that, apart from the strong Indian sentiment in favour of the measure, the balance of advantage on economic grounds is heavily on the side of the policy recommended. This seems a rather sweeping judgment and it is at least open to doubt whether the Commission has attached adequate weight to all the considerations that can fairly be urged against the policy.

The Commission very truly points out that the justification of the policy will depend largely on the manner in which it is worked. It is one thing to set forth on paper the utility of a scientific tariff, and quite another to ensure that in a country like India, whose politicians are as yet unskilled in statecraft and far too liable to allow themselves to be swayed by considerations entirely alien to the case, the policy will be carried out on the lines that are set down. That this difficulty is fully recognised is clear from the great importance which the Commission attaches to the Tariff Board which it is proposed should be established for the discriminating application of the policy. Some such safeguard was clearly essential, for it can well be imagined what might happen were the application of protection to be left to the Legislature. It might then become a question not of policy but of the amount of pressure that individual industries were able to exert. The principles laid down for the guidance of the Board are very interesting. The three main conditions that must be satisfied in the case of an industry claiming protection are that it possesses natural advantages, that it is not likely to develop at all or not so rapidly as is desirable without protection, and that ultimately it will be able to face world competition without protection. Whether many Indian industries will be able to satisfy all three conditions must be a very moot point, and the last is likely to be a very serious stumbling-block in nearly every case.

It must not be overlooked that without the adventitious aid of protection Indian industry has accomplished wonders, and it may well be asked whether the forcing-house system will bring any better results, will, indeed, in the end not prove a retrograde step. For what has been accomplished British industry has in the main been responsible, and it remains to be proved whether India is as yet capable of following the path that has been laid out. In a number of instances Indians have been responsible for important industrial ventures, but it is safe to say that there is so far no indication of the development in India of the class that in Great Britain automatically assumes the directorship of industry. That is not a thing that can be brought about at short notice; it is, on the contrary, the result of generations of training, and until that is remedied any vast industrial expansion in India would seem to be out of the question. A further problem is, of course, the question of labour. There is at present no great reserve on which India can draw for the recruitment of new industries. That, too, will take time, though it is more amenable to remedy than is the lack of the directing class. Granted that these difficulties are overcome, one fact stands out pre-eminently, and that is that India is, and so far as can be seen always will be, pre-eminently an agricultural country.

This year's cotton crop in Southern Serbia is estimated at 140 metric tons.

In Czecho-Slovakia wheat is estimated to yield 3,800,000 quarters, rye 5,300,000 quarters, barley 5,100,000 quarters, and oats 6,600,000 quarters, or decreases varying between 11 and 21 per cent. as compared with 1921.

Reuter's New York correspondent, in a message dated September 27, states that the steamer Themistocles, from the Piræus, has brought 25,000,000 gold francs from the Greek National Bank for delivery to the Federal Reserve Bank in New York. There is no explanation forthcoming at present as to the purpose of the shipment. It is stated that when the steamer was half a day out from the Piræus a wireless message was received ordering her return for Government service under requisition. She returned and remained at the Piræus for two days, when the gold was taken aboard.

Stock and Share Markets.

AN IMPROVING TENDENCY.

Industrials Steady.

(From Our Own Correspondent.)

London, Tuesday morning.

All things considered, it will, I think, be admitted that the markets held up very well during a most trying period last week. Though the news was very bad, there was no suggestion of a "slump." Here and there offerings increased, but there was no real pressure to sell in any quarter, and it is evident that holders of shares are too wise to be ready to dispose of their shares because of a temporary crisis. It was only after the markets closed for the week that the crisis reached its gravest point, and developments on Saturday suggested that conditions would obtain by Monday which would inevitably depress markets. But, to the general relief, the crisis passed, and instead of lower prices yesterday saw markets which might almost be described as buoyant. Of course, we are not yet out of the wood as far as the Stock Exchange is concerned, for there will almost certainly be difficult periods before peace is signed; but as it is evident that the gravest possibilities no longer threaten nothing that happens now is likely to have any pronounced effect, and I expect that we shall have very quiet markets until the settlement.

Once there is peace, I must say that I anticipate developments in the markets. Outside gilt-edged descriptions there are few stocks that do not offer scope for appreciation, and no doubt when the outlook is serene investors will show that they are perfectly cognisant of this fact. Gilt-edged stocks, in my opinion, are destined to see lower levels eventually, since the gradual revival of trade will entail realisations to provide working capital. I still hold the view that the Oil group affords the best prospects in the immediate future for those who look for a quick return, and of the whole group I would as soon take Phœnix as any. This share, by the way, fell during the week to 24s., apparently as a result of the belief that, after all, no dividend will be declared this year; but subsequently recovered. My view is that there will be a dividend, and, what is more, I consider this share good for a very substantial rise, provided, of course, that there are no unfavourable political developments. Outside Oils, Industrials offer considerable attractions. Some of them stand at absurdly low prices, in view of the prospects; but others, notably Tobaccos, have risen too far for a purchase to be advisable. Marconis I regard as quite a promising investment; while the leading Iron and Steel descriptions are sufficiently low to be bought. Rubbers are at the present time enjoying a mild revival, as they have done on several occasions when all the other markets were depressed. This time there would appear to be fairly solid grounds for optimism, but I must emphasise the point that most of the stocks are already quite high enough in view of the immediate prospects, for a long time will probably elapse before there can be any question of substantial dividends. But for those who are prepared to wait, the market certainly holds forth opportunities.

Gilt-Edged Lower.

Gilt-edged have naturally been considerably affected by the crisis, and prices are again lower on balance, despite the recovery yesterday. Consols are $\frac{3}{8}$ down at 56½, while the Conversion Loan at 72⅝ is ¼ down. War Loan Fives are, however, ⅛ up at 99¾, while Fundings at 83⅝ xd are about the same. Indian stocks are slightly lower. The 7 per Cent. stock at 111 is ½ down, the 3½ per Cent. stock at 66 is ¼, while the 3 per Cent. stock at 55¼ is unchanged.

Needless to say, the Foreign group has displayed a very uncertain tone during the week, and even yesterday the weak tone continued in this market. French stocks have shown little change. War Loan Fives at 35⅜ are ¼ lower, while the 4 per Cents. are unchanged at 29. German 3 per Cents. at 1 3-16 are 9-16 lower. Italian Rentes are 21. In Near Eastern securities Turkish Unified close ½ down at 31, while Greek Monopolies are a point lower at 31½. Russians are about the same. The 4 per Cent. remain at 6, the 4½ per Cent. are unchanged at 7½, while the 5 per Cent. are the same at 11. Czecho-Slovak 8 per Cent. are 89 xd. Brazilians have been a weak spot among South American securities, and stocks are down all along the line. In Far Eastern securities Chinese stocks have shown a rather weak tendency, while Japanese have eased off somewhat.

Industrials Quiet.

Comparatively cheerful conditions prevailed in the Industrial group yesterday. Business remained, however, on a most restricted scale, and it would be hopeless to look for anything else until more settled conditions obtain. Naturally, prices are in most cases below last week's levels.

Tobaccos, after displaying weakness, have rallied sharply. Bats close at 85s. 6d., at which they are 1s. 6d. down, while Imperial Tobaccos at 68s. 6d. are 3d. lower. Textiles have been rather unsteady. Courtaulds at 53s. 9d. are 6d. down, Coats are 1s. lower at 65s., while Listers at 26s. 3d. are 6d. lower. There has not been much doing in Iron and Steel securities. Vickers at 12s. are 3d. down, Armstrongs at 15s. 6d. are unchanged, while Guest Keens at 34s. 3d. are 9d. lower. Indian Railways are still weak. Bengal and North-Western are 2 lower at 133, Bombay Baroda are ½ up at 94, while Madras and Southern Mahrattas are 101½.

Shipping securities are about the same. P. and O. Deferred are unchanged at 295, Cunards remain at 19s. 6d., Khedivial Mails are the same at 3¼, but Furness Withys at 32s. are 1s. 9d. up.

Oils Featureless.

As usual, the Oil group has been affected by the political situation, and a certain amount of Continental selling was in evidence at one time. The depression was not prolonged, however, and the market yesterday showed signs of recovery, though, generally speaking, somewhat inactive conditions prevailed.

Anglo-Persian Oil have been a fairly firm spot, and at 5⅞ are 3-16 lower on the week. Burmahs are 5⅝, at which they are 1-16 lower. Mexican Eagles are 5-32 down at 3, while Shell Transport at 4½ are 3-32 lower. Trinidad issues have been rather dull. Apex are 1-16 down at 2, Centrals at 1 13-16 are ⅛ lower, while Leaseholds at 1 1-16 are 5-16 down.

Russian stocks have been somewhat affected by the situation. Spies at 6s. are 9d. down, Anglo-Maikop are 6d. lower at 3s. 6d., North Caucasians at 13-16 are unchanged, Ural Caspians remain at ¾, while Uroz are 1s. down at 9s.

Among Egyptians, Anglo-Egyptian B are 1 7-16, at which they are 1-16 down, while Oilfields of Egypt are 3d. lower at 2s. 6d. In the Roumanian group, Phœnix are 25s. 9d., at which they are 1s. 9d. down. Roumanian Consolidated are 3d. lower at 13s. 6d., Steaua Romanos are 9d. down at 10s., Dacia Romanos at 13-16 are unchanged, while Hamilton's Concessions are 3d. up at 2s.

Banks Steady.

A fairly steady tone has ruled in banking descriptions. Chartered are unchanged at 17⅜, National of India are 41¼ xd, at which they are ¼ lower. P. and O. Banks are ⅛ down at 14, while Bank of British West Africa are ¼ down at 4½.

In Egyptians, Aboukirs are unchanged at 21s., Beheras remain at 7¾, Egyptian Markets are the same at 21s. 6d., Gharbieh Lands at 1 7-16 are unchanged, while New Egyptians are 23s.

Messrs. Allen Bros. and Co. (India), Ltd., announce that their Calcutta address is now Allen House, 7, Hare Street, Post Box 77, Calcutta.

† Nominal.

MONEY AND FOREIGN EXCHANGE AFTER 1914

By **GUSTAV CASSEL.** 10s. 6d. net.

Dr. Cassel, described by Mr. Lloyd George as "one of the most brilliant economists in the world," presents in this important volume a detailed analysis of the fortune of the world's monetary system from the outbreak of war to the present day.

Glasgow Herald: "A piece of first-class workmanship; . . . To few other economists has it been given to unravel the tangle of recent events with such deftness, or to present the problems at issue in so intelligible a fashion."

CONSTABLE 10-12 Orange St. London W.C.2

Engineering Topics.

A New Printing Telegraph.

The recent developments in connection with wireless transmission have attracted attention from the work being done in increasing the scope and value of the printing telegraph. The teletype is one of the most perfect forms of the latter yet produced, and it appears to be in many respects an improvement on the multiplex, which has hitherto been regarded by many as the most commercial form of the instrument possible.

It does, in effect, for small telegraph transmission stations and for private business installations, amongst which can be numbered newspaper undertakings, what the multiplex is doing for lines carrying heavy traffic. It is quite a recent introduction, and has only been tested in commercial use since the end of last year. Naturally its behaviour has been watched with extreme interest, and it is significant that the British Post Office has now placed an order for several machines.

Technically, the teletype employs the five-unit alphabet, prefixed with a starting and a stopping signal. Normally, the instrument operates on the closed circuit system, the breaking of which starts the machine in operation. It may consequently be regarded as a seven-unit system, as against the Morse eight-unit system. This gives it a slight advantage over the latter, but a great deal of weight must not be placed on that, as it is not so advantageous, compared with the Morse, as is the five-unit multiplex. On the other hand, the speed of operation is only about forty to fifty words per minute, so that the limiting speed seldom arises as the operating margin on almost all telegraph lines is greater than that.

Resembles a Typewriter.

In appearance the sending instrument resembles a typewriter, and the message is ticked off on a keyboard of thirty-one keys exactly as in typing. On the right of the keyboard to the back of the instrument is a small transmitting mechanism, and on the left a small driving motor. The speed is kept reasonably uniform by a small centrifugal governor, and a printer is fitted at the back. This printer is, in effect, a Baudot printer combined with a mechanical distributor, and might, I think, be described as a very ingenious combination of the old Hughes and the Baudot printing machines.

Beneath the keyboard are five notched selector bars, and depression of any key lever moves one or more of these bars either to the right or the left. Each bar is linked to a latch, and these locking latches restrain or release, as the case may be, one or more of five contact levers which normally hold the transmitting contacts open. A group of five contact cams, arranged spirally on a single-revolution cam spindle, as they revolve permit the transmitting contacts to open and close successively, but any contact lever held back by a locking latch will prevent a contact from closing. It is interesting to note that there is a check device which prevents a key from being depressed until the succession of impulses sent by the preceding key has been completed.

Duplicate Messages.

The receiving instrument is too technical to describe in full, but it is said that the year's experience of its working shows that it is thoroughly reliable, and requires but little maintenance attention. By using copying ink on the type wheel as many as six good copies of the message may be made by a wet press copier, but, with regard to this, the opinion may be hazarded that some other method, such as the use of "flimsy" and carbon paper, might be found practicable.

One point in connection with the instrument that will strike the business man is that, without the use of a duplicate receiving instrument, it would be impossible to "tap" the messages sent.

Railway Roller Bearings.

The statement recently made and commented upon in these columns that a leading British railway was contemplating the use of roller bearings on locomotives and wagons has excited a good deal of interest. Inquiries made amongst railway engineers show that some doubt exists as to whether bearings of this type can stand up to the shocks experienced when crossing points, or even when passing rail bonds, and the question of side-sway of the carriages is also one on which some different views have been expressed. It would seem that this latter difficulty could only be overcome by the use of end-plates to the roller-bearing cages, and this would mean, in effect, a reversion to the use of sliding friction.

Attention was drawn some little time ago to a new form of roller bearing which could deal with both carriage-sway and deadweight without the use of any sliding-friction plates, and this form of bearing possessed, in addition, several advantages of a secondary character. The development of this bearing may throw an altogether different light on the question as to the suitability of this type for railway use. The opinion has been hazarded by an expert, that some of the claims made for roller bearings for use on goods wagons are too extravagant to need comment.

Excavators for the Sudan.

One of the main items for plant required by Messrs. Pearson and Sons, Ltd., the well-known contractors, in connection with the irrigation scheme for the extension of cotton-growing in the Sudan will be steam excavators, and an order for thirteen large dragline excavators has now been placed with Ruston and Hornsby, Ltd., of Lincoln, who are the largest British manufacturers of machinery of this class. The Lincoln firm is naturally satisfied at having booked this large order in face of very severe competition from abroad. The machines, some of which will weigh over seventy tons, will all be mounted on caterpillar tracks, and will be engaged on excavating the aqueduct and depositing the material on canal banks. The machines will be of such capacity that when all are working at full pressure they will remove upwards of 18,000 tons per day.

COMMERCIAL BANK OF GREECE, LTD.

(Limited Liability Registered in Athens.)

CAPITAL PAID UP - Drs. 20,000,000.

RESERVE FUNDS - Drs. 11,360,832.45.

Head Office: ATHENS.

Branches: Piraeus, Argos, Pyrgos, Patras, Corfu, Cephalonia, Nauplia, Vostitza (Aegion), Calamata, Syra, Chio, Candia, Volo, Salonica, Larrissa, Triccala, Mitylene, Canea, CONSTANTINOPLE

AGENTS IN ALL PARTS OF GREECE, THE LEVANT AND ABROAD.

The Bank conducts every kind of Banking, Commercial and Stock Exchange business and extends special facilities to traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts.

MERCHANDISE DEPARTMENT.

The Bank undertakes the warehousing and sale of goods consigned.

Cotton and Cotton Goods.

THE EGYPTIAN MARKET.

More Business Passing.

The Commercial Company of Egypt, in their report for the week ended September 15 state:—

The market during the past week has been fairly steady, with rather more business doing.

The prevailing feeling in our market continues to be bearish, and no opportunity is lost to depress prices. Bullish points are for the time being ignored. As a result of the rumour that Sakellaridis cotton is proposed for the "free" list by the American Conference Committee, the difference between Sakellaridis and Uppers has widened slightly. This proposal, if finally passed, will mean that Sakellaridis cotton, which up to now has been paying an import tax of 7 cents per lb., will enter America duty free. There has been a rather better demand from abroad this week; the business put through has been at cheap prices, but spinners appear rather more disposed to buy than for some time past. The strike of Press labourers, referred to in last week's report, was settled on Tuesday last.

Spot.—The Minet-el-Bassal market has this week shown an improved demand, and sales amount to about 11,000 bales, of which we estimate 6,050 bales Sakellaridis, 4,800 bales Uppers, 100 bales Brown, and 50 bales White. Upper Egypt cotton is arriving fairly freely. Some lots of new crop Sakellaridis have appeared and have been fairly readily sold, but not at fancy prices. The Sakellaridis cotton is from the North-Western districts, which do not as a rule give very good staple, and is quite good cotton of its kind, but we should not like to base an opinion of this year's staple on a few early lots. Upper Egypt cotton has experienced a distinct revival, probably owing to its premium over American being so small and therefore attractive.

Sakellaridis.—The demand has been general for all grades, and, with the exception of Fully Good, which is rather cheaper, there is no change in basis from last week. Holders of medium grades are not, however, ready sellers at present and low grades are almost non-existent.

Uppers.—All styles have been dealt in, and more attention has been paid to high grades, which have sold fairly well this week. The basis is without quotable change, but medium grades Fair to Fully Good Fair are well held and inclined to stiffen.

Brown.—A small business has been done without change in basis.

Crop.—Reports received during the week are not good. There is a fair amount of boll shedding noticeable in nearly all districts. Pink boll worm attack has increased considerably; however, it is satisfactory to see that the disease mentioned in our previous reports is causing fairly heavy mortality amongst this pest, and so restricting its ravages. Temperature continues to be above normal and humidity high.

MANCHESTER COTTON TRADE.

Curtailment in American Yarn.

(*From Our Own Correspondent.*)

Manchester, Saturday.

No feature of importance has presented itself in the market during the past week. The tone has continued slow, and buyers have displayed no inclination to operate on a freer scale. There is no doubt that the industry in both the spinning and weaving sections is losing ground, and there is not much probability of any revival of demand being experienced until the political situation abroad is much more settled. Curtailment in the American yarn section to the extent of two days a week has already commenced, but certain spinners representing large interests outside the Federation are convinced that more drastic short-time working is necessary if the position of the industry is to be improved. With regard to cloth, shippers to Egypt have only taken up small lines at cut rates. On account of the trouble in the Near East, more difficulty has been experienced in financing contracts. Users of Egyptian yarns have purchased sparingly, and prices have been irregular. Cloth demand has been about for India, but no transactions of any weight have taken place. Light cloths have been in most request for Madras. Shippers to China are very slow in raising rates. Buyers for the remaining minor outlets have not been altogether idle. More machinery is being stopped in Preston, Blackburn, and Burnley districts. American yarn quotations have fluctuated in sympathy with the ups and downs in raw cotton values. The offtake has been negligible.

LIVERPOOL REPORT.

Fair Inquiry for Egyptians.

Messrs. Reynolds and Gibson report as follows for the week ended September 27:—

Quite a fair inquiry has been witnessed in Egyptian spot during the past week, and it is, therefore, all the more regrettable that we have to state that the volume of actual business, instead of showing an increase, has decreased in extent. This is attributable to the political crisis which still overshadows the Near East, and has caused a feeling of depression throughout all branches of the cotton trade. Prices have displayed a downward tendency, and the selling competition met with is of the keenest description. Rather a feature of the weekly sales has been the large proportion of Sudan cotton sold, as compared with other qualities. Low cotton is gradually usurping the place of Sakel as the leading quality in demand, and this in itself is a lamentable state of affairs, and a somewhat ominous index as to the state of trade here.

More interest has again been shown in Upper Egyptian cotton, which is offered, both here and in Alexandria, on a very tempting basis as compared with American cotton. It would appear, indeed, as if there were some good opportunities awaiting speculative interests in this quarter. The usual inquiry for Sakellaridis, 15d. to 17d., has persisted, and a slightly increased interest in the better styles of Sakellaridis at about 20d. to 21d. has also been shown. Very good cotton indeed can be purchased at the latter prices. Official reports on cotton for forward delivery speak of business as being "quiet" to "very quiet"; nevertheless, a good deal of testing of c.i.f. prices by spinners has been noticeable lately, and we are inclined to the opinion that some improvement on this side of the trade has latterly taken place. Certainly, there is plenty of room for improvement, but until a more settled state of affairs exists in the Near East we fail to see how any marked increase in c.i.f. business can materialise. It is well to be prepared for any eventuality, however, and reports from various quarters indicate that there is quite a volume of potential business waiting. Should the war clouds dissipate themselves as quickly as they have gathered, the trade might easily exhibit remarkable recuperative powers. Judging by Manchester reports, however, nothing would seem to be more unlikely at the moment. True, the tone varies slightly from day to day, according to whichever way the political weathercock is pointing; but, taken altogether, the markets there may be characterised as sluggish and inactive, and both spinners and manufacturers appear to have lost ground during the past week. Turkey holds the key to the situation at the moment, and until she has turned it, for good or evil, we fear that trade will continue on the present depressing lines. Total estimated sales 1,900 (includes 800 Sudan). Quotations of Sakellaridis are reduced 25 points, those of Upper and Brown 75 points. Fully Good Fair Sakellaridis 17.25d.

COTTON TRADE REVIEW.

Business Extremely Quiet.

The Manchester cotton trade review of the Imperial Ottoman Bank for the week ended September 30 states:—

General.—The state of things in this market is little changed from last week, but, if anything, business is even quieter. The political situation in the Near East remains very obscure, and in view of possible repercussions in India and Egypt it is not surprising that merchants lack confidence and decline to commit themselves. Both spinners and manufacturers are losing ground, and more pessimistic views are expressed than for some time back.

Yarn.—Spinners of American yarn have now decided to close their mills on Saturdays and Mondays during the next four weeks, but no effect has been produced on the yarn market. Whilst, of course, this will prevent in some measure, at any rate, the accumulation of surplus stocks, doubt is expressed in some quarters as to whether it is not attacking the problem in the wrong direction. The fundamental question is not one of reducing production, but of increasing consumption.

Cloth.—Weavers of cloth have experienced one of the worst weeks for some time back, and there has passed practically no business worth reporting on. India has done very little, China is stagnant, and, of course, for the Near East there is nothing mentioned.

Raw Cotton.—There has been a fall in prices in this section, but, in view of the extreme quietude in yarn and cloth, it has not been so pronounced as might have been expected. Spot demand has been very small. The news regarding the new American crop is not good, reports generally agreeing that it has deteriorated lately. Closing prices are as follows:—American Fully Middling, 12.40; Egyptian Fully good Fair, 17.00.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.)

Bulgaria.

Telephone Material.—The Bulgarian Directorate of Posts, Telegraphs, and Telephones at Sofia invites tenders for:—(1) The supply of cables and other material, and the transference of the existing underground cables to the new telephone exchange. (2) The supply of the material and the work involved in the extension of the network of underground cables. (3) The supply of the underground and armoured cables, including the runnings of the cables through the tubes as well as effecting their connection to the boxes and the ends of the cables to the exchange, etc. This section also deals with the supply of lightning conductors with aerial cables, and other material. (4) The supply of iron terminal standards with cable racks (main distribution poles). Tenders must be presented in Sofia by October 16 (D.O.T.).

India.

Railway Wagons.—The High Commissioner for India invites tenders for the supply of 3,000 railway wagons. Forms of tender may be obtained from the Director-General, India Store Department, Belvedere Road, Lambeth, S.E.1.—October 17.

Steel Sheet Piling.—The Calcutta Corporation invites tenders for the supply of 80,000 lineal feet of light section steel sheet piling of various lengths; also for the supply, delivery, and erection of a steel screw pile jetty on the river bank at Pulta, near Calcutta. Tenders for the former close on October 9, and for the latter on October 10.

Locomotives.—The South Indian Railway Company invites tenders for the supply of: 1. 46 metre gauge locomotives and six locomotive boilers. 2. 108 metre gauge wagons. 3. Bridgework.—October 8.

Shovels, Point Rodding, etc.—The High Commissioner for India invites tenders for the supply of:—1. Shovels, round nose, with handles, number—8,004; and shovels, stoking, with handles, number—3,000. 2. Cocks, bib, galvanised, ½-in. and ¾-in., number—2,500; and cocks, stop, galvanised, ¾-in. to 4½-in., number—1,634. 3. Point rodding, 1¼-in., solid, complete with bolts and nuts, feet—45,000. Forms of tender may be obtained from the Director-General, India Store Department, Belvedere Road, Lambeth, S.E.1.—October 6.

Wheels and Axles.—The Bengal-Nagpur Railway Company invites tenders for wheels and axles. October 16.

Steel Tyres.—The Madras and Southern Mahratta Railway Company invites tenders for 1,200 steel tyres for carriage and wagon wheels. October 17.

Egypt.

Cycles.—The Mechanical Transport Department, 21, Sharia Soliman Pasha, Cairo, invite tenders for the supply of 50 pedal cycles, complete with all accessories.

Uniforms and Stores.—The Postmaster-General, G.P.O., Alexandria, invites tenders for the supply of uniforms and general stores for the financial year 1923-4. Specification can be seen at and in some instances obtained from the Central Stores, G.P.O., Alexandria, or at the Local Directorate of Posts, Secretariat, Cairo, and also in England at the office of the Egyptian Government Representative, Queen Anne's Chambers, Broadway, Westminster, London, S.W.—November 15.

Canvas Money Bags.—The Central Stationery Stores Department of the Egyptian Ministry of Finance invites tenders for the supply of canvas money bags as follows:—3,500 large size 11 in. by 15¼ in., stamped "Egyptian Government" in black; 6,000 medium size 11 in. by 14¼ in., stamped "Egyptian Government" in black. Sealed tenders, on the proper forms, to be addressed to the Director, Central Stores, Ministry of Finance, Cairo. Tenderers must submit with their offers sealed samples in duplicate of the goods which they propose to supply.—November 4 (D.O.T.).

Electric Cranes and Lifts.—The Administration of Ports and Lighthouses, Alexandria, invites tenders for the following fixed and movable lifting apparatus for service at the Port of Alexandria:—

Eight travelling electric portico quay cranes, six of which are to be of 2,500 kilogs., the other two being double-power cranes of 2,500-5,000 kilogs.

Eight travelling balcony cranes of 500 kilogs.

Eight electric lifts; maximum carrying power, 1,500 kilogs.; speed per second, 0.50 metre.

Supply and laying 320 metres of rails for the running of the quay cranes.

Supply and laying of 280 metres of rails for the running of the balcony cranes.

(The electric power will be furnished by the Railways Administration's Power Station, as three-phase current at 220 volts. 40 cycles.)

Sealed tenders are to be addressed to the Directeur-Général, Administration des Ports et Phares, Alexandria, Egypt, and will be received up to noon on December 20. The conditions of tender require the contractor to be resident in Egypt or to be represented in that country. British firms who are desirous of tendering, but are not represented in Egypt, can be placed in touch with United Kingdom merchants who have branches in Egypt and are suitable to handle tenders on behalf of third parties. Every tender must be accompanied by a provisional deposit of £E500. (D.O.T.)

Direct-coupled Steam Engine and Alternator and Switchboard.—Tenders are invited by the General Manager, Egyptian State Railways, Telegraphs and Telephones, Cairo, for the supply of a direct-coupled steam engine and alternator and switchboard for the Electric Power House, Gabbary, Alexandria. The salient features of the plant to be furnished are as follows:—

Engine.—One high-speed, enclosed, vertical, double-acting, two-crank, compound steam engine, arranged for direct coupling to alternator and for mounting on combination base plate. The engine is to be capable of a normal output of 390 b.h.p. and 25 per cent. overload for two hours when running at 343 r.p.m., and working condensing with a steam pressure of 150 lb. per square inch at engine stop valve.

Alternator.—One three-phase alternator of the revolving field type, with direct connected exciter. The normal output of the alternator is to be 260 kilowatts at a voltage of from 3,000 to 3,200, 40 cycles, and a power factor of .8—*i.e.*, 325 k.v.a.—but it must be capable of sustaining an overload of 25 per cent. for two hours.

Switchboard.—To comprise panels for the alternator and the exciter and to conform as closely as possible with the existing switchboard at the power-house.

A copy of the specification and drawings can be inspected by United Kingdom firms in Room 49 of the Department of Overseas Trade, 35, Old Queen Street, Westminster, S.W.1. Copies, price 10s., may also be obtained on application to the Inspecting Engineer, Egyptian State Railways, etc. Administration, Queen Anne's Chambers, Broadway, Westminster, London, S.W.1. October 30.

Iraq.

Ordnance Stores.—The Ministry of Defence in Baghdad invites tenders for the supply of annual stores required by the Iraq Army Ordnance Department. The stores are divided into three sections, as follows:—

Section 5a.—Packsaddlery, harness, and miscellaneous stable requirements, such as nose-bags, brushes, curry combs, horse-rubbers, etc.

Section 6a and 6b.—Officers' saddlery, universal saddlery, and various articles for repair, including buckles, curb chains, etc.

Section 11b.—Pickaxes, crowbars, intrenching implements, brass and copper sheet, mild steel flat and bars, brass and copper wire, etc.

Endeavours are being made to secure an extension of time for the presentation of tenders, and in the event of a postponement of the date fixed for the receipt of tenders being secured a further notice will be given. Any communication with the Ministry of Defence, Baghdad, should be made by Air Mail.—October 31.

COMPANY NOTES AND REPORTS.

Barsi Light Railway.

The net earnings of the Barsi Light Railway for the year to March 31, less Indian income-tax and super-tax, were £42,114, or, adding exchange and Indian taxation adjustments (£6,087), £48,201. After providing interest on debenture stock, £5,600, and interest and sinking fund instalment, etc., on the Latur Extension debentures, £5,649, there was left £36,952, making with £10,608 brought in £47,560 at the credit of net revenue. Transferred to reserve for the equalisation of dividends, etc., £1,310, making £145,000, and to taxation reserve £4,000. The directors recommend a final dividend of 3 per cent., with a bonus of 4 per cent. (14s. per share in all), making a total distribution of 12 per cent. for the year, leaving £10,649 to be carried forward. Approximate traffic receipts from April 1 to August 26, 1922, amount to Rs. 8,04,400, equal to Rs. 322.42 per mile per week, as compared with Rs. 5,46,300 (Rs. 217.50 per mile per week) during the corresponding period of last year.

It is reported that representatives of the German Orient Line have arrived at Odessa for negotiations in reference to the establishment of a regular steamship service between Hamburg and Odessa.

Near East Markets.

LONDON PRODUCE REPORT.

South African Oranges Disappointing.

(From Our Own Correspondent.)

London, Monday Night.

Sugar.—Home refined has been in good demand at lower prices. Tate's cubes have shed 6d. at 56s., and mineral water sugar has declined 9d. at 49s. 9d. London granulated is 6d. lower at 49s. 3d., while Lyle's granulated has lost 1s. at 48s. 9d. Foreign descriptions have been unsteady. West Indian crystallised has been dull at 42s. 6d., and white Mauritius has shed 3d. at 46s. 6d. White sugar quotations are:—October, 20s. 6d.; November, 20s. 6d.; December, 20s. 7½d.; January, 20s. 9d.; March, 20s. 10½d.; and May, 20s. 10½d.

Coffee.—There has been no change in quotations. East Indian remains at 116s., as also Costa Rica at 112s. Nairobi is steady at 100-102s. The futures market has been quiet. Quotations are:—December, 61s.; March and May, 60s.

Desiccated Coconut.—Stocks on the market have declined, while the home trade demand has shown an all-round improvement. Prices have steadied during the week.

Rice.—The new crop of Spanish Japan rice has arrived and has met with a ready market. Prices are likely to advance shortly owing to Spanish shippers being unwilling to offer. The demand for American Java rices is very poor, and the market continues under a depressing cloud.

Green Fruit.—The position of the market with regard to South African oranges has changed during the past week. Stocks have decreased, while the quality of arrivals is below that of any previous consignments this season. The position in the lemon market is acute. With the Naples season closing, and the irregular arrivals, quotations are still advancing, and higher levels are likely to be reached as Messina fruit will not arrive here until the middle of November. Quotations for Valencia onions have appreciated while the demand is poor.

Dried Fruit.—The position in the dried fruit market is still doubtful. Sultanas are exceedingly scarce, while unreasonable prices are being demanded for new arrivals of currants. A large business has been passing for Spanish figs, which have come into public favour owing to the absence of Smyrna figs.

Oilseeds.—There has been a slight rise in quotations in many cases. Indian linseed has gained 3d. at 19s. 4½d., and La Plata is 1½d. up at 17s. 10½d. Rapeseed is steady, with Toria 1½d. up at 17s. 1½d., while bold Ferozepore remains unchanged at 16s. 6d. Cottonseed has been barely steady. Egyptian black has gained 6d. at 10s., while Sakellarides has shed 3d. at 9s. Indian is firm at 8s.

Oils.—A higher tendency prevails. Linseed oil shows an advance on the week of 2s. 6d. at 38s. 6d. Crude rape oil and refined are firm at 41s. and 43s. respectively. Cotton oil has risen with Egyptian 2s. up at 34s., and technical 1s. up at 37s. Refined and deodorized are both unaltered at 41s. and 46s. respectively.

Oilcakes.—An irregular tone has been in evidence. Coconut cake and linseed cake are both 10s. down at 200s. and 240s. respectively, as also cottonmeal cake at 240s. Cottonseed cake has advanced 10s. at 150s.

According to *Narodni Listy*, Czecho-Slovakia's yield of sugar from the forthcoming harvest will, it is estimated, amount to something between 700,000 to 750,000 tons, an increase on last year's figures.

GREEK CURRANTS.

The question of the supply of currants and dried fruit in general naturally begins to be of special interest about this time. The political situation in the Near East has caused doubt in many minds as to whether there will be any Christmas delicacies. However, so far as present indications show, there need be no reason for alarm, for although prices for dried fruit will undoubtedly be high, there will not be an acute shortage.

In an interview with a representative of The Near East, Mr. G. A. Burlumi, of Messrs. Burlumi and Co., briefly reviewed the general position. Dealing with the supply of currants for the past year, Mr. Burlumi said:—"Shipments throughout the year have been on a small scale, and prices as a consequence have remained at a fairly high altitude. The reason for small arrivals must be attributed to the reluctance on the part of the growers to part with their crops, owing to the continual exchange depreciation."

Referring to the exports of currants, Mr. Burlumi said:—"While last year's crop sold well and in large quantities, the market has been handicapped this year with the small arrivals. The total export amounts to 4,800 tons for the year, as compared with 16,800 tons for pre-war shipments." In conclusion, Mr. Burlumi referred to the Smyrna fruit position and said:—"Up to the present no official information has reached me, but I learn that the major portion of the sultana and fig crops has been saved; beyond that there is no definite information at the moment."

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated September 25:—

Season.—September 18—Monsoon active in North India and Burma. September 19—Vigorous in Gangetic Plain and Gujerat. September 20—Moderately heavy rains in United Provinces. September 21—Moderately heavy rains in United Provinces with extension to Bihar; increase of rain also in Hyderabad and North Madras Coast. September 22—Rainfall extended in Central Provinces and Assam. September 23—Monsoon active in Upper Burma and North-East India, but weakened elsewhere. September 24—Locally heavy rain in Bengal and Bihar.

Condition of Crops.—September 22—In Bengal, weather continues favourable to crops. In Bombay excessive rains in Gujerat have done damage to most of the Kharif crops. In East Khandesh excessive rains have been unfavourable to crops, particularly to cotton. Elsewhere in Bombay, Deccan and Karnatak rain is urgently required for Rabi sowing.

Markets.—September 21—Bombay cotton market steady. Fine M.G. Oomras Rs. 482 September, Rs. 413. 8 December—January. Bombay cotton arrivals from September 1 to 15, 1922, were 17,000 bales, as compared with 42,000 bales during the same period of the last year. Bombay imported piece-goods market unchanged. Local goods quieter. September 23—Jute and heavies quiet. Hessians very dull. Ready, 9 porters Rs. 18. 6 and 11 porters Rs. 24. 8. At tea sale on September 19 qualities offered were rather inferior to those of the former week, but still there was good competition, and market was stronger for practically all grades. Leaf tea was steady. All good liquorings were dearer and medium liquorings with colours advanced one anna in many cases. Common fannings—now the cheapest tea—were weak. This sale's average price was 11 annas 4 pies per lb. The last week's average price was 11 annas 3 pies per lb. 310,732 packages were sold to date at an average price of 11 annas 1 pie per lb. Crop returns for first half of September show very slight increase on last year. September 23—Rangoon rice market very dull. Nominal price of large mills—Special Straits quality—Rs. 440. Small mills sold at Rs. 485 immediate delivery. Boat Paddy Rs. 198. Shellac.—September 19—Market steady, with fair business reported. T.N. Rs. 150.

No change in Bank Rates.

A company has been formed in Bucharest for the purchase and sale of metals.

The Bombay Legislative Council has adopted a Bill to provide for the regulation and control of cotton transactions in the Bombay Presidency, says Reuter. The Bill gives the East India Cotton Association statutory recognition by the Government, while the latter is empowered to see that the cotton trade is not mismanaged.

CURRENT PRICES.

General Produce.—Bacon (Continental), 141s. 6d. per cwt.; (Canadian), 130s. cwt.; (American), 101s. cwt.; butter (Danish), 221s. cwt.; (Australian), 198s. cwt.; (New Zealand), 213s. 6d. cwt.; cheese (Canadian), 92s. cwt.; (New Zealand), 93s. cwt.; lard, 74s. cwt.; eggs (Danish), 23s. per 120; (Styrian), 15s. per 120; chillies, 140s. cwt.; cloves (Zanzibar), 1s. 3½d. lb.; cocoa (Ceylon good to fine), 81s. 6d. cwt.; coffee (Costa Rica), 117s. 6d. cwt.; (East Indian), 115s. cwt.; (Central American), 95s. cwt.; (Jamaica), 72s. 6d. cwt. (Mocha Longberry), 100s. cwt.; (Santos superior), 73s. 9d. cwt.; (Nairobi), 101s. cwt.; ginger (washed Cochin), 52s. 6d. cwt.; nutmegs (110's to 80's), 1s. lb.; pepper (Singapore black), 3¾d. lb.; (Muntok white), 6¾d. lb.; pimento, 2d. lb.; raisins (Cape), 55s. cwt.; currants (Vostizza), 75s. 6d. cwt.; currants (Amalias), 73s. 6d. cwt.; sultanas (Smyrna), 157s. 6d. cwt.; sugar (Tate's cubes), 56s. cwt.; (Lyle's granulated), 49s. 9d. cwt.; (Mauritius crystals), 46s. 3d. cwt.; (West Indian crystallised), 43s. 6d. cwt.; (centrifugal), 15s. 6d. cwt.; tapioca (fair Singapore), 2½d. lb.; rice (Rangoon No. 2), 15s. 4½d. cwt.; (bran Rangoon), £6 8s. 9d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 1s. 11d. lb.; tea (Indian common to good common), 1s. lb.; (medium to good), 1s. 5d. lb.; (fine to finest), 2s. 8d. lb.; Ceylon (common to good common), 1s. lb.; (medium to good), 1s. 5d. lb.; (fine to finest), 2s. 5d. lb.; Java (common to good common), 10d. lb.; wheat (English white). 47s. qr.; wheat (Australian), 51s. 3d. qr.; oats (English), 26s. 3d. qr.; oats (La Plata. ex-ship), 26s. 4½d. qr.; maize (La Plata), 40s. 3d. qr.; flour, 37s. sack.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 9½d. lb.; 80 to 89 lb., 9½d. lb.; 70 to 79 lb., 9½d. lb.; 60 to 69 lb., 8⅝d. lb.; 59 lb. and under, 7⅛d. lb.; (second), 90 lb. and up, 8⅜d. lb.; 80 to 89 lb., 8⅜d. lb.; 70 to 79 lb., 8d. lb.; 60 to 69 lb., 6⅞d. lb.; 59 lb. and under, 5½d. lb.; cows (first), 60 lb. and up, 7½d. lb.; 59 lb. and under, 7d. lb.; (second), 60 lb. and up, 6d. lb.; 59 lb. and under, 5½d. lb.; bulls (first), 5d. lb.; (second), 3½d. lb.; kips (first), 6d. lb.; (second), 5½d. lb.; (third), 4d. lb. Calcutta Market (prices in rupees per 20 lb.):—Arsenic hides (cows): Agras, 7.8 to 12.8; Durbhangas, 5.8 to 7.8; Patnas, 5.8 to 7.8. Salted cows: 6 to 8.8. Arsenic hides (buffalo): 2.8 to 4.8. Skins: Calf, 8 to 10 per 20 lb.; goat, 220 to 265 per 100 pieces.

Chemicals.—Acids: Boric, 61s. cwt.; oxalic, 7½d. lb.; citric, 2s. 2½d. lb.; tartaric, 1s. 3d. lb.; ammonia (sulphate), £15 16s. 6d. ton; arsenic (white powdered), £46 ton; benzole (standard), 2s. 5½d. gallon; bleaching powder (35 per cent.), £12 ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 108s. 6d. cwt. Potassium: Bichromate, 6½d. lb.; chlorate, 4½d. lb.; caustic, £30 5s. ton; nitrate, £37 10s. ton; permanganate, 8½d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £13 5s. ton. Sodium: Crystals, 110s. ton; bi-carbonate, £10 5s. ton; bichromate, 5½d. lb.; alkali (58 per cent.), £8 1s. 3d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £20 2s. 6d. ton; hyposulphite, £15 10s. ton; prussiate, 11d. lb.; nitrate, £13 7s. 6d. ton; glycerine (crude, 80 per cent.), £48 ton; (industrial, 1260 per cent.), £87 10s. ton; lemon oil, 2s. 9½d. lb.; quinine, 2s. 2d. oz.; red lead, £37 17s. 6d. ton; white lead, £40 10s. ton; white ground lead, £49 2s. 6d. ton; sulphate of copper, £26 5s. ton; sulphate of iron, 55s. ton.

Metals.—Aluminium, £100 ton; antimony (English Regulus), £27 12s. 6d. ton; bismuth, 10s. lb.; copper (standard), £62 18s. 9d. ton; copper (electro), £71 2s. 6d. ton; gold bars, £93 2d. oz.; iron (No. 3 Cleveland), 93s. 9d. ton; hematite (mixed number), 90s. 6d. ton; galvanised sheets (25 G), £16 10s. ton; lead (soft foreign), £23 17s. 6d. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 40s. unit; nickel, £145 ton; platinum, 500s. oz.; graphite (80-90), £13 10s. ton; quicksilver, £13 7s. 6d. bottle; spelter (G.O.B.), £32 6s. 9d. ton; tin (standard), £161 1s. 3d. ton; wolfram, 14s. unit; zinc sheets, £37 10s. ton; tin plates (20 by 14), 18s. 10½d. box; silver bars, 35¼d. oz.

Miscellaneous.—Cotton (American), 12.99d. lb.; Egyptian (Sakel), 16.90d. lb.; jute (first grade), c.i.f., £33 5s. ton; jute (lightnings), £30 15s. ton. Oilseeds: Linseed (La Plata), £17 5s. ton; palm kernels, £16 6s. 9d. ton; castor seed (Bombay), £16 16s. 3d. ton; sesame seed (China), £22 17s. 6d. ton; soya beans, £11 15s. ton. Oils: Linseed, £35 15s. ton; olive (Spanish), £75 10s. ton; rape (crude), £40 10s. ton; soya, £34 5s. ton; petroleum, 1s. 4½d. gallon; petrol, 2s. 1d. gallon; fuel oil (ex-tank). 65s. ton; coconut (Ceylon), £36 17s. 6d. ton; cotton (crude), £32 10s. ton; ground nut, £46 10s. ton. Rubber: Plantation (No. 1 crepe), 7½d. lb.; smoked sheet, 7½d. lb.; fine hard Para, 10¼d. lb.

The oil production at Gemsah of the Anglo-Egyptian Oilfields for the week ended September 15 was 27 tons (against 34 tons the previous week) and at Hurghada 4,617 tons (against 4,800 tons).

TURKEY'S FOREIGN TRADE.

Fall in Imports.

The Department of Overseas Trade has received from the Commercial Secretary at Constantinople the following summary of the Customs returns of Constantinople for the first six months of 1922:—

Compared with the statistics for the corresponding period of 1921, some improvement has to be recorded in Turkey's trade balance for the first six months of the present year. Imports over this period amount to £T39,173,876, compared with £T58,523,999 for the first six months of 1921. Total exports, including re-exports, have increased slightly from £T12,360,403 to £T13,177.856 and some improvement has taken place in the export of native produce, amounting to £T8,355,073, as against £T5,310,956 in 1921, but it is probable that the depreciation of the Turkish lira accounts for most of the margin of difference.

The position is, of course, still very unsatisfactory, and must continue to be so while Turkey, a country which normally pays for its imports of manufactured goods by its agricultural produce, remains obliged to import a large percentage of its foodstuffs.

Imports.

Imports from the United Kingdom for the period under review show a marked decline compared with the corresponding period last year, having dropped from £T12,389,668 to £T6.667,972. Imports from America have dropped from £T8,263,191 to £T6,170,989, while Italy's imports have declined from £T6,118,466 to £T3,574,851, and France's from £T7,121,656 to £T3,189,061.

A sharp fall has taken place in the import of textiles, the value of cotton goods imported having fallen from £T14,257,670 to £T6,263,407, and woollen goods from £T5,233,273 to £T2,081,879. Some decrease has also taken place in the import of cereals, dried skins, and leather and colonial goods.

Exports.

Exports of native produce to France have increased from £T,226,727 during the first six months of 1921 to £T1,306,863 during the corresponding period this year. Exports to Great Britain have increased from £T448,558 to £T1,238,212, and to Holland from £T565,789 to £T848,378.

The figures for the principal articles of export for the period January to June, 1922, are as follows, the figures in parentheses being for the corresponding period of last year:—Tobacco, £T1,644,988 (£T1,157,892); fruit and vegetables, £T1,514.042 (£T447.904) silk, £T1,087,620 (£T103,096); wool, £T912,197 (£T377,231).

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on September 22 were as follows:—Agricultural Bank of Egypt, £5⅛; Alexandria Water Company, Ltd., £8¾; Anglo-American Nile Steam, £3¼; Associated Cotton Ginners, 15-16; Banque d'Orient, 46 fr.; Behera Ord., £E7 13-16; Brasseries d'Egypte, 70 fr.; Building Lands of Egypt, 31-32; Cassi di Sconto Priv., 97 fr.; Comptoir Fin et Com. d'Egypte, £1 5-32; Consolidated Lands, Pt. 7; Credit Foncier Fondateur, 1045 fr.; Credit Foncier Act, 705½ fr.; Credit Foncier 1886 Oblig., 317¼ fr.; Eaux du Caire, Capital, 87½ fr.; Eaux du Caire Jouissance, 116½ fr.; Egypt and Levant, S.S. Ord., 31s. 3d.; Egyptian Delta Light Railways, £4 13-16; Filature National d'Egypt, £10 1-16; Immeubles d'Egypte Soc. an des., £6 15-16; Khedivial Mail S.S. Ord., 100s.; Khedivial Mail S.S. Company Pref., £3½; Kom Ombo Ste an de Wadi, £4 3-16; Kom Ombo Ste An Fondateur, £32; Land Bank of Egypt, Parts de Fond., £47; Lots Turc., £44; Menzaleh Canal Navigation, Pt. 262; Grand Hotels d'Egypte, £8⅜; Ramleh Railways, £3 15-16; Urbaines et Rurales, £3¾; Union Fonciere Fond., £½.

ENQUIRY BUREAU.

Merchants, etc., may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau, 'The Near East,' 1, Devonshire Square, London, E.C.2." It must be understood that "The Near East" accepts no responsibility in connection with such replies.

129.—Principal of old established textile manufacturing and import firm in Aleppo (Syria) now in Switzerland wishes to get in touch with cotton and woollen yarn manufacturers or exporters in Lancashire and Yorkshire.

130.—Import and export merchants in Beirut (Syria) in a position to export dried carobs in any desired quantity wish to be connected with interested British firms.

SPECIAL MARKET REPORTS.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:

Constantinople, September 11.

Sugar.—The market is firm. During the week there have been no arrivals, and the demand for export has been met from the warehouses. Consequently prices here have risen somewhat. Quotations per 100 kilos: Java, £T28; American, £T28½; Dutch, £T31; Cubes, £T31.

Coffee.—The market is quiet. 2,150 sacks have arrived from Rio.

Flour.—Here a quiet tone prevails, but in centres of production the market is weak. 220 tons have arrived from Bulgaria. Quotations per sack of 63 kilos: Nelson, Ps.910; Goldstar, Ps.810; Durun, Ps.730. Native flour is quoted at Ps.625-650 per sack of 72 kilos.

Wheat.—2,200 tons have arrived from Bulgaria. *Zahle.*

The report for July states:—The cereal harvest which has ended is estimated at from 30 to 40 per cent. below that of the previous year, which was excellent. The forecasts of the new crop of raisins are most promising.

The prices of the principal commodities have been affected by the instability of the franc, which has caused a rise of 5 to 10 per cent, but this increase has not been maintained as a result of the recovery of the exchange and the desire of merchants to dispose of their goods as far as possible.

Remittances from emigrants in America are below those of the corresponding period of the previous year. It is hoped that with the recovery of the Brazilian exchange they will be increased a little.

Homs, September 7.

There is no alteration in the crop position. The cereal crops are not satisfactory as regards quantity and quality, and sell at prices below those that obtained before the war.

Business has not changed since the last month. There has not been much activity as regards imports. Colonial produce is arriving in average quantities through Tripoli. Although the prices are so low and are no longer subject to fluctuations, the situation of the market does not permit merchants to have large stocks of goods; the limited profits accruing to them from transactions for one thing, and for another the facilities that all merchants, even the smallest, possess of obtaining supplies at any moment from Tripoli, have the effect of restricting arrivals to the needs of the month. Imports of cotton thread for the weaving industry amount to 50 bales. The position with regard to other imports is unchanged. It is out of the question to look for an improvement as regards clothing for two months, for the peasant and even the townsman do not make their purchases for the winter before November. If stock be taken of the general economic situation of the country, the result can only be a very unfavourable view as to the capacity that this region will develop for the consumption of goods.

The export of cotton textiles for Palestine has undergone a rapid increase following the rise of the Egyptian pound, which will leave a much greater profit to exporters. Exports for Cilicia and Anatolia, on the other hand, have not improved, the situation in Turkey not enabling that country to take a greater quantity of textiles.

Basrah, September 2.

The market is dull. The first steamers are due to load dates for New York. All packing stations are in full activity. Owing to special circumstances, the date growers have been able to force high prices for the American consignments, but considerable reductions will have to be made for the London boats as London merchants are unable to operate at present high prices.

Shipping Intelligence.

SHIPPING AT THE PIRÆUS.

(From Our Own Correspondent.)

Athens, September 23.

During the month of August (o.s.) 444 steamers entered the port of Piræus, of which 350 were Greek, 43 Italian 29 British, 6 French, 4 Norwegian, 3 German, 3 Swedish, 1 Japanese, 1 Belgian, 1 Russian, 1 Egyptian, and 1 from Dantzig.

The Customs receipts at the port of the Piræus for the month of August (o.s.) amounted to 14,105,245.35 drachmæ, showing an increase over the corresponding month of last year of 5,400,002.85 drs.

THE MODERN TANKER.

Oil a Difficult Cargo.

The latest type of oil-carrying vessel represents a marked advance over pre-war practice, and one of these vessels, recently launched from the yards of a famous firm, presents many features of interest. A few years ago it appeared as if the geared turbine, driven by high pressure, superheated steam, was the last word in methods of propulsion for vessels of this type. But it was quickly recognised that a great deal of valuable space was taken up by coal bunkers, boilers, and condensing and other plant in addition to the space occupied by the actual propelling machinery, and engineers began to pay considerably more attention to the merits of the Diesel engine.

The latest type of tanker fitted with engines of this description is between 325 and 350 feet in overall length, has a beam of from 45 to 55 feet and an overall depth of from 24 to 33 feet. Her dead weight capacity, of course, varies with her size, but a boat of 4,000 tons is not regarded as being specially large.

It will be readily realised that oil is a difficult cargo to handle. Tanks must be absolutely leakage proof, and to prevent rolling, must be fitted with longitudinal and transverse bulkheads, as otherwise the oil would act more or less as a battering ram during the rolling or pitching of the vessel. Provision has also to be made for expansion of the cargo due to changes in temperature, and the allowance to be made for this is a matter which can only be decided after careful calculation and experiment.

It is the usual practice, further, to fit extra tanks on deck for carrying lighter oils and benzine so that the vessel may be utilised to the fullest possible advantage in summer weather.

In the most modern example of this class of cargo-carrier there are six main oil tanks divided by a central longitudinal bulkhead, and on each side of the deck there are four of these summer tanks. The method adopted during construction imparts extra strength where it is likely to be required, gives tanks of the most improved design for charging and discharging, and admits of greater carrying capacity for the size of the vessel. A drainage system is also provided whereby any leakage may be collected.

The main engine in a vessel just launched is a Diesel capable of giving over 1,500 horse power at the propellers, of which there are two in accordance with usual practice. This engine runs at about 130 r.p.m., and enables a speed of just under ten knots to be maintained. Apart from the main engine there is a smaller Diesel engine for driving an electric generator for lighting, hoisting, and other purposes, and also an oil engine of the hot-bulb type. It is curious, however, to note that part of the vessel's mechanical equipment is a large boiler in which steam is raised by oil burners. This steam is used for driving the cargo-pumps and for heating the tanks, and in another part of the vessel a smaller oil-fired boiler is fitted for heating the engine room and the crew's quarters. It would be interesting to hear why this duplication of plant was considered to be advisable; the majority of engineers would have considered that a better plan would have been to have installed a larger electric generator and to have driven the pumps by motors and heated the tanks and quarters electrically. It may be mentioned here that the oil pumps on a modern tanker are each capable of handling some hundreds of tons of oil per hour. These pumps can draw oil from the shore pipes at the port of loading or from any of the dock tanks, or can deliver from all or any of the ships' tanks to tank barges or dock tanks. It is also possible to pump cargo from one vessel to another at sea, a provision which might be particularly useful in the case of any breakdown of the propelling plant. This transference is carried out, of course, by means of flexible pipes slung on wire hawsers.

From an engineering point of view one of the most interesting features of the new type of tanker is the electric steering gear which is fitted with what is known as "remote" control. The rudder is moved as desired by an electric motor by means of a worm and quadrant gear, and in the steering engine house is also an electric motor driving a dynamo. The power for operating this set, which is kept continually running at a constant speed, is obtained from the lighting circuit bus-bars on the switchboard.

This interesting gear operates in the following manner: when the steering wheel is moved in either direction on the bridge a boss, mounted centrally, moves a contact over a series of studs, arranged equi-distant, and the contact is thus made to cut-in or cut-out resistance in the electric circuit in much the same way as in an ordinary electric motor starting switch. These contacts are, of course, connected electrically with the rudder controller, which is connected mechanically to the rudder. The movable system of this controller actuated by the rudder consists of two contact plates provided with four resistance steps at one end. The contact plates of the rudder controller are connected with the differential winding of a special exciter which feeds the field of the starting dynamo. There is no need to go further into the technicalities of this, as sufficient has been said to show how the movements of the steering wheel are electrically reproduced in those of the rudder. The intensity and direction of the field of the starting dynamo naturally varies when one or other of the windings receives more current, and naturally the speed of direction of the steering motor varies accordingly. When the rudder is brought to the exact position required as indicated by the steering wheel, there is no excitation, and no further power is transmitted to the rudder until the wheel is again moved.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:-

Anchor Line.—S.s. Vindelia for Bombay (Liverpool, October 5); s.s. Circassia for Bombay (Liverpool, October 17).

Anchor Brocklebank Line. S.s. Makalla for Port Said, Colombo, Madras, and Calcutta (London, October 7); s.s. Macharda for Calcutta (Birkenhead, October 11); s.s Masirah for Calcutta (Birkenhead, October 18); s.s. Holywell for Port Said, Colombo, Madras, and Calcutta (London, October 21); s.s. Magdapur for Calcutta (Birkenhead, October 30); s.s. Maidan for Port Said, Colombo, Madras, and Calcutta (London, November 7).

Bibby Line.—S.s. Herefordshire for Rangoon (London, October 5); s.s. Leicestershire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, October 11); s.s. Dorsetshire for Rangoon (Middlesbrough, October 27).

British India Line.—S.s. Nevasa for Bombay and Karachi (London, October 6); s.s. Mandala for Colombo, Madras and Calcutta (London, October 13); s.s. Matiana for Bombay and Karachi (London, October 20); s.s. Mantola for Colombo, Madras, and Calcutta (London, October 27); s.s. Mulbera for Bombay and Karachi (London, November 3).

Clan Line.—S.s. Clan MacNaughton for Colombo, Madras and Calcutta (Birkenhead, October 5); s.s. Clan Mackinlay for Bombay and Persian Gulf (Birkenhead, October 9); s.s. Clan Morrison for Malabar Coast and Tuticorin (Birkenhead, October 26).

Cunard Line.—S.s. Brescia for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Swansea, October 3); s.s. Pavia for Gibraltar, Ceuta, Melilla, Algiers Malta, Patras, Piræus, Syra, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Poti and Batoum (Swansea October 27).

Ellerman Line.—S.s. Gulf of Suez for Patras, Syra, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, October 7); s.s. Cavallo for Genoa, Leghorn, Naples, Palermo, Messina, etc. (Liverpool, October 12); s.s Destro for Gibraltar, Malta, and Alexandria (Liverpool, October 14).

Ellerman, Bucknall, and Strick Line.—S.s. Frankenfels for the Persian Gulf (London, October 20).

Ellerman "City" Line.—S.s. City of Nagpur for Calcutta (Birkenhead, October 5); s.s. City of Marseilles for Calcutta (Birkenhead, October 14); s.s. City of Exeter for Bombay and Karachi (Birkenhead, October 21).

SULZER BROTHERS, ALEXANDRIA.
SPECIAL BRANCH.
CLEARING, FORWARDING and TRANSIT
4 Rue de la Gare du Caire, 4

Ellerman's "Hall" Line.—S.s. City of London for Karachi and the Punjab (Liverpool, October 2); s.s. Karroo for Bombay, Karachi, and the Punjab (Liverpool, October 12).

Ellerman's Westcott and Laurance Line.—S.s. Mardinian for Gibraltar, Malta, and Alexandria (London, October 11); s.s. Orlando for Gibraltar, Malta, and Alexandria (London, November 1).

Glen and Shire Line.—S.s. Gleniffer for Port Said, Port Swettenham, Singapore, etc. (London, October 5); s.s. Carnarvonshire for Port Said, Port Swettenham, Singapore, etc. (London, October 19); s.s. Glenbeg for Port Said, Port Swettenham, Singapore, etc. (London, November 2).

Harrison Line.—S.s. Defender for Calcutta (Liverpool, October 5); s.s. Matador for Calcutta (Liverpool, October 19); s.s. Director for Port Said, Port Sudan, Aden, Mombasa, Djibouti, etc. (Birkenhead, October 26).

Henderson Line.—S.s. Arracan (cargo only) for Port Said and Rangoon (Birkenhead, October 18).

Holt Line.—S.s. Meriones for Port Said, Port Swettenham, Singapore, etc. (Glasgow, October 5); s.s. Oanfa for Port Said, Port Swettenham, Singapore, etc. (Glasgow, October 5); s.s. Calchas for Port Said, Port Swettenham, Singapore, etc. (Swansea, October 12); s.s. Glaucas for Port Said, Port Swettenham, Singapore, etc. (Glasgow, October 19).

Johnston Line.—S.s. Incemore for Piræus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, October 21).

Papayanni Line.—S.s. Fabian for Melilla, Malta, and Alexandria (Liverpool, October 7); s.s. Falernian for Algiers, Malta, Syra, Smyrna, and Constantinople (Liverpool, October 21).

P. and O. Line.—S.s. Kashgar for Bombay (London, October 6); s.s. Nagoya for Colombo, Madras, and Calcutta (London, October 10); s.s. Morea for Bombay (London, October 13); s.s. Nore for Colombo, Madras, and Calcutta (London, October 20); s.s. Malwa for Bombay (London, October 20); s.s. Nyanza for Colombo, Madras, and Calcutta (London, November 3).

Prince Line.—S.s. Cyprian Prince for Tunis, Malta, Alexandria, Syria, and Cyprus (Manchester, October 14); s.s. Italian Prince for Malta, Alexandria, Syria, and Cyprus (London, October 21); s.s. Algerian Prince for Tunis, Malta, Alexandria, Syria, and Cyprus (Manchester, October 25).

CZECHO-SLOVAKIAN SERICULTURE.

A Growing Industry.

The recently formed Czecho-Slovakian Association for Silkworm Culture has done its best to extend sericulture in this country, and has received the support of one of the great landed proprietors, who has had mulberry trees planted in his extensive gardens, says an American Consular report. From these trees young plants have been distributed by the Association to the cultivators. During the autumn of 1921 10,000 plants and in 1922 about 1,000,000 were thus distributed. There are at present in Czecho-Slovakia more than 3,000 silkworm cultivators, and the number of silkworms is estimated at 20,000,000.

The Association, which has been operating for only two years, and is a non-profit-making body, has established a silk-spinning mill further to facilitate development of sericulture. The cocoons are bought from the cultivators (at 70 crowns per kilo), spun into yarn, and the yarn sold to the weaving mills, of which there are several in Czecho-Slovakia.

The weaving mills have been buying their raw silk from abroad. In 1920 the Czecho-Slovak Republic imported 595,000 kilos of raw silk. The harvest this year has been estimated at 8 metric tons of cocoons for Bohemia, Moravia, and Silesia, and 20 metric tons for Slovakia and Ruthenia. The silk produced in Czecho-Slovakia is very strong, and the cocoons are often unusually large. A French scientist has declared that the fibre is stronger than that of the Italian silk, and explains this by the fact that the mulberry leaves in Czecho-Slovakia develop more slowly, and consequently possess a larger quantity of nutritive substance on which the silkworms feed.

'BALKAN' NATIONAL INSURANCE COMPANY
FOUNDED 1895.
Capital paid up - - - - - - 5,000,000
Total reserves as per December 31st, 1920 53,200,000
Premium Income during 1920 - - - 28,300,000
Amounts insured of Life Branch exceed 150,000,000
Branches maintained: Fire, Life, Marine, Casualty and Re-insurance of all branches.
HEAD OFFICE: SOFIA, BULGARIA.

COMMERCIAL BREVITIES.

The Imperial Ottoman Bank has reopened at Smyrna in temporary premises.

The Government of India announces the removal of restrictions on exports of wheat and other food grains, pulses and flour.

The Bombay Gas Company announces a dividend at 8 per cent. per annum, less tax, for the half-year ended June 30, payable November 1.

The directors of the Eastern Bank have declared an interim dividend of 4s. a share, less tax, on account of profits for the current year.

The output of the Anglo-Egyptian Oilfields for the week ended September 22 amount to: Gemsah, 31 tons (previous week 27 tons); Hurghada, 3,835 tons (previous week 4,617 tons).

According to the *Gazette de Prague*, Mr. Ford has purchased a site near Kolin, in Czecho-Slovakia, on which he will build works on the American model for the mass production of motor-cars.

The annual return of shipping, cargo, and passenger traffic in the ports of Egypt and Suez Canal transits for 1921 has just been issued by the Ports and Lighthouses Administration, Cairo, Egypt.

At a recent meeting of the Administrative Council of the Empire Cotton Growing Corporation, Mr. R. H. Jackson, of Primrose Bank Mill, Oldham, was elected Chairman of the Council in place of the late Mr. J. W. McConnel.

The Czecho-Slovak export duty on porcelain and porcelain goods has been reduced from 1 per cent. to ¼ per cent. as from September 1, and that on jute yarns from ½ per cent. of the invoice price and 40 heller per kilo. to ½ per cent. of the invoice price, as from September 15.

The negotiations for a commercial treaty between Czecho-Slovakia and Hungary are now in process. There will be two special commissions, one dealing with legal and financial matters and sitting at Prague, and one for purely commercial and transport questions sitting at Budapest.

NOTES OF THE WEEK.

The Mudania Conference.

After some alarms on the part of the Allies and a few excursions on the part of the Kemalists, the Mudania Conference between Allied Generals and a Turkish General comes to grips with the real business before it on the day that these pages go to press. There was the inevitable attempt on the part of Angora's representative to test the solidarity of the three Allied Powers, while local commanders of the Turkish troops sought to improve the occasion by turning the Ismid neutral zone into a Tom Tiddler's ground. Their encroachments were explained away as due to ignorance of the boundaries, and the trespassing troops have been withdrawn. A Cabinet meeting on Friday found things at such a critical pass that Lord Curzon had to go hurriedly to Paris the same afternoon to bring once more the views of the three Allies into line. He succeeded, adding to the laurels that his handling of this Near Eastern crisis has gained for him, and the communication by General Harington to Ismet Pasha of proposals backed by Great Britain, France, and Italy without reserve or qualification is the result. There is some ground for hoping that Kemalist tactics have increased rather than weakened Allied solidarity.

The Allies' Terms.

If the Kemalists accept the Allies' proposals, the basis of the Mudania agreement will be that the Greek troops in Thrace will be asked to withdraw as soon as possible west of the Maritza. This process is expected to take about ten days. In the territories thus evacuated the Allied Governments, by means of a provisional inter-Allied occupation, will make themselves responsible for the maintenance of order and security until the establishment of Turkish civil administration and Turkish gendarmerie, which should be completed within a month after the Greek evacuation. On the expiry of this period the Allied troops will occupy, during the Peace Conference, only certain points of the right bank of the Maritza and the Chatalja Lines, where they are at present. Kemalist troops will not cross over to Europe until the conclusion of the Peace Conference, and in the meantime they will respect the neutral zones, which are to be subjected to further rectification by agreement between the Allied and Turkish military authorities. These terms, it is obvious, will supply the acid test of Mustapha Kemal's intentions. They entail nothing derogatory to either side. On the one hand they round off the military successes gained by the Angora Government in Asia Minor by liberating Eastern Thrace from Greek occupation, and in such a way that there should be no risk of further excesses to sully afresh the Kemalist Army: on the other hand, they distinguish, as far as the Entente Powers are concerned, between a settlement of the Greco-Turkish question and outstanding matters between the Allies and Turkey.

Greece's Acquiescence.

It is officially announced that Greece will make no difficulty in regard to the evacuation of Eastern Thrace by her troops. The decision does credit to the good sense of the new régime, and it may not be wide of the mark to suppose that the influence of M. Venizelos has in no small measure contributed to the result. Whatever hopes he may have entertained at first of being able to save Eastern Thrace for the Greeks, he must have quickly realised that the Allies' promise to the Turks, made on September 23, was irrevocable. Any attempt to challenge the Allies' verdict could only have led to a further sacrifice of Greek nationals. As things are, Greece is at peace with the world to-day, and, we may hope, with herself. If she can disband her army without further incident, the country will have the first opportunity that it has had for practically ten years of settling down in its full strength to the nation's real business. If the mistake of persecuting political opponents merely for errors of judgment is avoided, the revolution will have been accomplished with a minimum of bad blood. Public opinion should be relied upon to banish into the political wilderness any politicians who have merited the country's censure, whereas the policy of making martyrs of them may only perpetuate their influence. It is not to be supposed that the Allies can leave Greece just as she is. Whatever her mistakes, they have incurred a heavy responsibility towards her, and the first step towards meet-

Digitized by Google

ing their moral obligations should be adequate financial help.

The Roumanian Coronation.

The Duke of York left London on Monday to represent the King at the Coronation of King Ferdinand and Queen Marie of Roumania. His Royal Highness will take with him the unaffected good wishes of the people of this island for the Royal pair and for the people of the new United Roumania. For it is a fact that while Britons, as a rule, trouble themselves but little about the countries of South-Eastern Europe, they always show warm regard for Roumania and the Roumanians. They have not forgotten what the country had to suffer at the hands of the enemy during the War, or the dignified and worthy part played by King Ferdinand and Queen Marie in the hour of misfortune as now in the hour of restored fortune and happiness, and in their own quiet way they will join in the rejoicings of next Sunday.

The Egyptian Penal Code.

For some time past the Egyptian Government has been working on a series of amendments to the Egyptian Penal Code, and last week the text of the amendments was published. Fifteen articles of the Code are amended, and the general effect of the changes is to make the punishment of the offences dealt with very much more severe. The introduction of the amendments was regarded as being necessary before the removal of martial law; and as another step towards that measure, which they so ardently desire, the Egyptians will probably look not unfavourably on the changes. As far as they go, they appear to be good, but what Egypt still wants most urgently is the growth of a public spirit that will not only condemn crimes, but prompt all who experience it to do their best to bring the criminals to book. When that spirit takes hold of the Egyptian people there will be at once an end to outrages of the kind that have so sadly disgraced it lately in the eyes of the world.

The Treaty with Iraq.

The announcement that King Faisal and his Government have at last overcome their objections to signing the Treaty with Great Britain is highly satisfactory. The lion in the path was not very large or formidable-looking, according to Western notions at any rate, but at times it really seemed as if, goaded to activity by interested parties, it would be allowed to bar the way permanently. The word Mandate, to which the Arabs take such strong exception, was carefully avoided in the Treaty. But that did not suffice: King Faisal and his advisers in this matter sought to have included a clause specifically abandoning the British Mandate. In view of Britain's engagements with the League of Nations it was held that it would be impossible to follow such a course; and hence the hitch. Now, happily, the trouble is surmounted; King Faisal has shown that he appreciates substance more highly than shadow, and though he and his Government express the hope that in return for their yielding the British Government will deal liberally with Arab aspirations in Mesopotamia, such a hope—which amounts after all, to a wish that Great Britain may continue her present policy—is probably addressed chiefly to the King's own subjects.

New Cabinet at Baghdad.

The Nakeeb of Baghdad has given fresh proof of his self-sacrificing patriotism by accepting the Premiership of Iraq again, and thus rendering possible the formation of a new Cabinet—which has proved a ticklish and difficult business. The new Cabinet bears a very strong family likeness to that which resigned nearly two months ago, but the Ministry of Commerce disappears, and one or two Ministers have exchanged portfolios. It is understood that King Faisal has expressed the intention of leaving his Ministers a freer hand in future, and that a General Election is promised at an early date; so that the Government should ere long be in a position to know the country's views—at least, on the chief questions of the day.

Sir Percy Cox.

Almost simultaneously with the news referred to in the preceding two Notes, comes the report that Sir Percy Cox is to leave Iraq, where he has worked so hard and shown himself such a true friend to the Arabs. At the time of writing the report has not been officially confirmed, but we have good reason to believe it true, as we have for accepting the statement that Sir Percy will be succeeded by Sir Henry Dobbs, of Anglo-Afghan Treaty fame. In that case one good man succeeds another, and whatever the people of Iraq may accuse Great Britain of, they cannot say that she sends them representatives who are likely to forget their point of view or to fail to treat it sympathetically.

The Indian Legislative Assembly.

We have had to criticise the Indian Legislative Assembly adversely for some of its recent achievements, such as its censure of the British Prime Minister, or its refusal to carry out agreements declared to be binding on the Government. It is all the more pleasant, therefore, to notice such a debate as that which took place last mail-week on the Civil Marriage Bill, introduced by Dr. Gaur in order to legalise unions entered into without the ceremonial so strictly enforced by the different religions. Educated opinion in India is evenly divided on this question, and in this respect at least the Assembly is representative, for early this year it rejected a similar measure by a single vote, while on this occasion it passed the first stage by a majority of two. The debate seems to us to have been maintained at a very high level, and it should go a long way to restore confidence in the future of a body which, beginning remarkably well, has of late suffered a distinct loss of reputation. The Assembly, in fact, is capable of bad blunders, but when it settles down to discuss seriously a fundamental question affecting the future of India, the result may fairly be said to justify the hopes on which the new Constitution is based.

The Letter and the Spirit.

The question really raised by the Civil Marriage Bill is larger than the title suggests, and is one which has to be faced by all progressive communities. Is the population of India to be bound for all time by formularies and ritual which crystallised many centuries ago, or can these be allowed to alter gradually in the wake of moral and intellectual advance? All the great religions of the country are feeling the influence of efforts towards reform from within, and in each of them the orthodox reaction is at present very powerful. The decision must obviously rest with the communities directly concerned, but among Englishmen there will, we think, be a large measure of sympathy for the plea put forward so forcibly by Mr. A. C. Chatterjee that a reasonable liberty of dissent should be possible without incurring the reproach of apostasy. We do not expect that this position will be attained all at once, but, as the younger men come forward,

Digitized by Google

we anticipate a gradual movement which will eventually settle the question for each community in turn. In any case it is a definite step forward that Indians should be able to discuss such acute difficulties in the spirit shown on this occasion by the Assembly.

THE WEEK AT HOME.

London, Monday Evening.

Alarms and Excursions.

It has been a disturbed and disturbing week. The concordat arrived at with France did not work with Turkey, and on Friday Lord Curzon's sudden departure for Paris seemed to indicate that war was again imminent. Apparently some form of agreement has again been arrived at between Britain and France for the settlement of the affairs of Turkey and Greece—I leave the exposition of the details to my more instructed colleagues—and this may work "according to plan" for a time. But I have not yet met anybody sufficiently optimistic to suggest that this forms a permanent solution, or even that a permanent solution is possible. Perhaps, as Lord Morley once remarked in his devastating way, politics is a study of the second-best, and the wise man does not look for permanent solutions in matters of State. However that may be, there is a pretty general feeling that even if a temporary arrangement has been devised, the Turko-Russian problem is still unplumbed, and may again inconvenience us gravely in future years.

The Position of the Government.

There is still a month before Parliament meets, but the position of the Government has been badly shaken. The tame Coalition Press, of course, still dances to the Downing Street tune, but the independent organs have nothing good to say of the Cabinet. Not one of the weekly reviews supports the Government. The *Spectator* names several members of the Cabinet whom it thinks impossible to keep; the *Outlook* would apparently be satisfied with the deposition of Mr. Lloyd George; the *Nation*, of course, which has still to live down its pro-German reputation, would "sack the lot." But it would have done that all along.

But probably the most disturbing thing for the Government is the sudden re-emergence of Mr. Bonar Law. His declaration of policy in *The Times* of Saturday has evoked very significant support: its leading *motif* is contained in the words: "The course of action seems to me clear. We cannot alone act as the policeman of the world. The financial and social condition of the country makes that impossible. It seems to me, therefore, that our duty is to say plainly to our French Allies that the position in Constantinople and the Straits is as essential a part of the peace settlement as the arrangement with Germany, and that if they are not prepared to support us there, we shall not be able to bear the burden alone, but shall have no alternative except to imitate the Government of the United States, and to restrict our attention to the safeguarding of the more immediate interests of the Empire." This has at once, and naturally, been interpreted as a declaration in favour of breaking the Entente and reverting to the old policy of "splendid isolation." This is the historic Conservative policy, only departed from reluctantly under the pressure of German armaments twenty years ago, and there is no doubt that it would be generally popular. For the past year, as I have pointed out from time to time in these notes, there have been indications of the increasing desire to return to this attitude.

One other thing remains to be said. Politicians are a suspicious race, and they are not disinclined to see in this sudden re-emergence of Mr. Bonar Law an indication that he is not disposed to let his claims to the reversion of the Premiership go by default. If Mr. Lloyd George is, as the Tories swear, to be compelled to go this autumn, there have been whispers from Charing Cross to Knightsbridge that Mr. Chamberlain was not altogether unwilling to see the sceptre transferred from Criccieth to Birmingham; and Mr. Bonar Law's manifesto is thought to have some bearing on these calculations. It is, in fact, a personal *caveat*. If the next Government is to be a Conservative Government, he seems to have the prior claim to lead it, if health permits; and nobody could suggest that in his case this is ambition overleaping itself, for he refused the Premiership in December, 1916, and practically elevated Mr. Lloyd George into the chair.

A month ago the Welsh wizard seemed immortal. Now all men are speculating openly on the prospect of his fall. *Sic transit gloria mundi;* but the transit may yet be delayed some considerable time, if the Prime Minister does not want to go. But we are evidently in for a busy winter, and Tweedledum and Tweedledee are portentously busy in the clubs and places where they gossip.

"Marie."

Marie Lloyd, the greatest music-hall comedienne of this or of any other age, died suddenly on Saturday. She was only fifty-two (somehow one fancied she was years older, for she had been famous as long as one could remember). Her songs were of the *risqué* variety, and her wit, which was by no means austere, left nothing to the imagination; she had nothing of what the Americans, I believe, call "uplift." But in her own way she was a very great artist. She must have owed much to her abounding vitality, which never flagged for a moment while on the stage; even Puritans were sometimes reduced to laughter before they resumed the mask of vinegar. There is a fund of her songs and sayings; some at least of which will long outlive her, for there was real genius in her repartee; but some of the better known would make the linotype blush. She was a merry pagan and a kindly generous soul.

Revival of the Theatre.

The theatre, by the way, has shown a vast increase in popularity lately. These things seem to depend on the climate rather than the play. The fine summer of 1921 nearly killed it; this year's cold wet summer has again sent the crowds to the

box-office, and most of the houses are full every night, with the promise of a prosperous autumn and winter. The plays seem to be pretty much the same. One good one—"Secrets"—and the rest the same old stage devices and situations, and the usual conventions and gags. By universal admission of the critics, we are living in a dramatic desert with a very occasional oasis, but a lot of people seem to want nothing better. With improved takings, the agitation against the entertainment tax, which was always an absurd cry, seems to have died down.

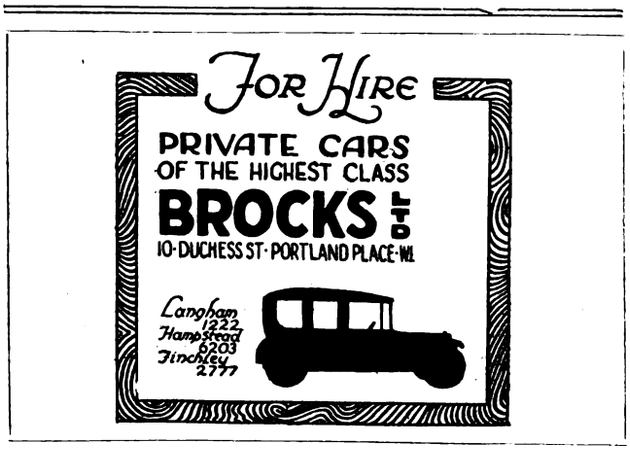
Railway Changes.

Sir Henry Thornton, the manager of the Great Eastern Railway, has been appointed manager of the Canadian National Railways—the ill-fated Grand Trunk and Canadian Northern lines—with the result that a change will have to be made in the management of the new railway group of eastern railways at home. At the close of this year the old railway companies disappear, and the Western, Eastern, and Southern groups take their place; only the Great Western survives as a unit. The three southern lines are amalgamated; the western group consists of the North-Western, Midland, Lancashire and Yorkshire, and Caledonian: the eastern contains the Great Eastern, Great Northern, Great Central, North-Eastern, North British, Highland, and several minor lines. It is expected that this will make great economies in management and provide better public services. But the only thing that really interests the travelling public at the moment is the question of reduced fares, and on that no decision has yet been announced. "In matters of commerce" the fault of the railways seems to resemble that of the Dutch.

Club Bedrooms.

In the general rebuilding and repairing of London which seems to be going on everywhere, and which has transformed Regent Street, in particular, into one vast pitfall for the unwary, it gives one rather a shock to see one or two respected clubs wearing a nightcap of scaffolding, and adding an upper story to their austere dignity. The explanation is simple—it is bedrooms.

When they were founded sixty or seventy years ago, the town member lived close at hand, and the country member was supposed to have a country house. In these days the town member lives in the suburbs and the country member cannot afford a town house, but as both occasionally want to sleep in the West End, there has been a migration to the newer type of club which provides bed and breakfast. Some of the older clubs have been so seriously affected that they are now adding sleeping accommodation—in the real sense of the word, I mean, for most of the members seem to sleep steadily in the library and smoking-rooms—and it is said that an immediate increase of membership has resulted.



The Week's Books.

"The Adventure of Living: A Subjective Autobiography" (Hodder and Stoughton) is Mr. St. Loe Strachey's *apologia pro vita sua*. It gives one almost a shock that the editor of the *Spectator* does not write about the living, that he reveals no intimate secrets, and commits no indiscretion; he rates his public as something more than the dogs which eat of the scraps that fall from the dinner-tables of the great. For this relief much thanks. But he takes us from boyhood days in Somerset to Oxford and Jowett, the old Liberal circle of the 'eighties, and Lord Cromer, the Duke of Devonshire, and other friends of that day. He is, however, no mere *laudator temporis acti*, for he can still look forward to the future: "I, who have always been an explorer at heart, am getting near the greatest exploration of all. There are only two or three more bends of the stream, and I shall shoot out into that new lake or new reach, whichever it may be. I may have a pleasant thrill of dread of what is there, but not of fear. The tremendous nature of that splendid unknown may send a shiver through my limbs, but it is stimulating, not paralysing." A delightful book.

"Cannibal Land" (Constable), by Martin Johnson, is an account of a cinema man's visit to the New Hebrides. He actually filmed a cannibal feast, and his book contains many interesting pictures.

"The Advancement of Science: 1922" (John Murray) contains the presidential addresses delivered at the recent meeting of the British Association. They are, perhaps, not quite so interesting as usual, and Professor Hardy on the "Theory of Numbers" must have made rather large demands on a popular audience; but Dr. Allen's "Progression of Life in the Sea" is an excellent account of a disputed biological territory, and Sir C. S. Sherrington's address on "Animal Magnetism" deserves to be read in full.

In this connection I may advise readers to get "The Psychic Life of Insects" (Fisher Unwin), by Professor E. L. Bouvier.

Any contribution of Professor Gregory to geology is authoritative, and his present visit to China is likely to be as productive of results as his recent investigation of the Rift valleys and lanes of Central Africa and Asia Minor. In the meantime, he has published a wonderful little book on "The Evolution of the Essex Rivers and the Lower Thames" (Benham and Co., Colchester). The Essex rivers are peculiar in that they do not flow in the course one would expect them to follow, and the indented coast contains estuaries without rivers to feed them. As one who knows the ground pretty thoroughly, and has often puzzled over this strange phenomenon, I must admit that the author offers a reasonable explanation that may have its bearing on similar problems elsewhere.

"Princes of Wales" (H. F. W. Deane), by Mr. F. M. Bridge, is an excellent little study in biography. It gives an account of each of the Princes of Wales in history, with their portraits. Most of the information comes from the Royal Library of Windsor Castle, and it is rather curious that nobody has carried out the idea before.

"With the Prince in the East" (Methuen), by Sir Herbert Russell, on the other hand, is an account of our own Prince's recent tour. Luckily, it is not written in the inflated fashion usual in this type of courtly volume; it is an honest record, and it does not gloss over the difficulties that occurred in India.

The Near and Middle East.

From Our Own Correspondents.

EGYPT

Cairo, September 28.

The Position of the Cabinet.

There have again been rumours of a Ministerial crisis owing to tension between the Cabinet and the Palace, but as the Prime Minister had an interview with the King earlier in the week, and a Council of Ministers has been now definitely fixed for next week, the trouble seems to have blown over. In many well-informed circles, however, it is asserted that there will without a doubt be a crisis when the time comes for the promulgation of the new Constitution. As yet the Committee which is preparing the latter, together with the new Electoral Law, has not handed in its report.

Zaghloul Pasha.

There is considerable discussion again in the vernacular Press with regard to Zaghloul Pasha, particularly on the matter of his health. The news that a *habeas corpus* writ has been applied for has aroused considerable comment, and the result of the subsequent proceedings is being anxiously awaited. Meanwhile Madame Zaghloul Pasha, having received a letter from her husband asking her to join him, has applied to the High Commissioner for the necessary passports, and arrangements have been made for her to leave on October 9.

The Turkish Successes.

Considerable excitement has not unnaturally been caused by the news from Asia Minor and Turkey. The greatest sympathy is felt for Kemal, and assistance is actively forthcoming in the form of subscriptions to the Red Crescent, which are being sent him from all parts. So far there have been no untoward incidents between the Greeks and the Moslem population such as often happened in the past in similar circumstances. It is instructive to note that the vernacular Press freely refers to France as the true friend of Islam and to Great Britain as its enemy and the backer of the Greeks, and this has consequently had its effect on the feeling in the country.

A Wahabi "Scare."

About a fortnight ago a large force of Wahabis was located by aeroplanes 80 miles south of Maan, and as it appeared to be proceeding in a north-westerly direction, it was feared that it might raid the Egyptian frontier. Precautions were accordingly taken; the Camel Corps, which protects the eastern frontier of Egypt, was reinforced, and all arrangements were made to push up troops to its support at a moment's notice. Reconnaissance in the area bordering the frontier has now shown that this force has withdrawn to the east, and that it has, in fact, disappeared. This scare has, however, proved useful since it has enabled the authorities to test and reinforce their scheme of defence.

Another Statue for Cairo.

Nine years ago the late Lord Kitchener conceived the idea of transferring to Cairo the great statue of Rameses, which lies broken by the lake side at Memphis, and of having it erected on the Station Square, which he had widened for the purpose. Unfortunately, the war intervened and prevented the execution of the scheme—which will now not be carried out, as the Egyptian Government has decided to erect another monument on the site chosen. This monument, which is to be entitled the "Awakening of Egypt," is the work of a young Egyptian named Mahmud Mukhtar, who studied sculpture in Paris and obtained as a foreign exhibitor a diploma at the "Salon des Artistes Français" in 1920.

When the project was first conceived, a little over a year ago, a public subscription was opened, but, owing to the economic condition of the country, together with the suspicious attitude which the public, through bitter past experience, to-day adopts towards all appeals for funds, sufficient money could not be raised, and the Government has had to come to the rescue with a credit of £E4,500 to cover the cost of transport of the stone and the wages of the artisans. The statue will be made entirely of granite brought from Aswan, and although work is actively being proceeded with on the Station Square, it will take another two years to complete.

The Indemnities Commission.

The Commission which was appointed after the troubles of 1919 to assess the compensation to be awarded to those who had suffered damage has published its report. A sum of £E1,000,000 was set aside by the Government to meet these claims, and up to the date on which the report was written —the Commission is still sitting to deal with claims arising out of the 1920 and 1921 disturbances—approximately £E875,000 had been awarded. The Commission points out that the original

amount of the claims that have thus been settled came to no less than £E3,400,000. Some of the claims were most preposterous, and were strangely reminiscent of what took place when the Special Commission sat to assess the damage done during the bombardment of Alexandria in 1882, and was simply inundated with claims, a large number of which had to be rejected, and the majority of which had to be very considerably reduced owing to their exorbitant nature.

The Farghal Case.

The sentences in the Farghal case, the trial of which by a military court was reported in my letter of the 15th, have now been promulgated. Of the three men found guilty two have been condemned to death and one to fifteen years'—commuted to ten years'—penal servitude. The sentences have given general satisfaction, for it has been increasingly felt that the leniency shown in recent cases was entirely misplaced, and that the time had come to inflict the full penalty in all cases where a conviction could be obtained.

PALESTINE.

Jerusalem, September 24.

The Wahabite Bogey.

A circumstantial account is abroad of an important meeting of Transjordanian sheikhs and notables, held at Imkis—a village just on the British side of the border between the French and British territories. The question was how to stave off the Wahabi invasion. The bulk of the sheikhs belonged to British Transjordania, but a few were from the French side, including Sulman el-Atrash, who had taken refuge in English Transjordania owing to his part in the disturbances in the Druze mountains recently. More remarkable was the presence of several Nablus Effendis, fresh from their own congress. In organising the resistance of the tribes, the Nablus representatives recommended, so it is said, that the forces be divided—one-half to hold off Ibn Saud, and the other to concentrate on the border of Palestine and be ready to carry out hostilities there. This suggestion is said to have been accepted in principle, subject to the needs of the Wahabi "front." The resolutions adopted after three days' argument are stated to have been —that all the inhabitants of Transjordania unite against the common enemy, the Wahabis, and despatch their entire strength of mounted men to meet them. Should they not succeed in checking them, but be forced back, the larger part of the mounted men and the tribes were to seek refuge in French Transjordania and Palestine, together with their families. But if they should succeed in repelling the Wahabis, then the united mobilised forces of Transjordania were to make a double onslaught on Palestine—the south wing advancing through the Dead Sea region, and the north wing concentrating against Rosh Pinnah and Safed, and then making for the towns, villages, and colonies of Upper and Lower Galilee. The purpose was to upset the British Government, destroy the populous centres of Palestine, and then, having played the rôle of saviours, take over the country and hand it into the possession of its inhabitants, to rule it as they wish! . . . This War Council was, it is likewise stated, to have been held at Irbid—the chief centre of North British Transjordania (Ajlun), but the other place was chosen to keep the decisions secret from the British agents in Irbid.

This account is submitted here, not as fact, but simply as local colour. An expert statistician was engaged temporarily by the Palestine Government last summer, and, according to private report, he succeeded in ascertaining that just 93 per cent. of Palestinian reports are lies.

The Public Health Department.

The Public Health Department has recently issued its first annual report, in which it gives a brief history of its labours since O.E.T.A. days. It has been one of the most expensive of the Government Departments, but since it can rightly claim to be Great Britain's chiefest contribution to Palestinian civilisation, no one has a right to grumble. The success of the department against malaria affords the best means of estimating the value of this contribution. In the course of its report the department gives the following details: From April 1 to December 31, 1918, there were, in Jerusalem alone, 113 deaths from malaria; during the whole of the year 1919 there were 35 deaths; in 1920, 30 deaths; in 1921, 17 deaths. "In all the large towns persons suffering from malaria have ample facilities for treatment from the local medical practitioners and hospitals and dispensaries. Thus there were 10,829 attendances of malaria patients at Government dispensaries and 18,514 at voluntary dispensaries during 1921. Quinine tablets for prophylactic use have been on sale at cost price in all post offices throughout the country since 1919." Owing to heavy rains and snow which fell in the spring of 1920, an unusual number of mosquito breeding-places remained late into the year, and in the autumn malaria assumed epidemic form in many districts. The villages situated on the *wadis* west of Hebron, running from the Beit Jibrin region, in the Judæan hills, to the plain of Philistia, were particularly affected. Few persons in this region escaped the disease, and round a number of villages the late crops were left standing, as the people were too sick and debilitated to gather them. The death rate in this region during

the latter part of 1920 was 68 per 1,000, and the mortality was particularly high among infants and young children. In the village of Beit Jibrin itself one-sixth of the population died in three months. There had been no such epidemic for over fifty years. The epidemic equipment of the department was utilised, and treatment centres, with medical officers and orderlies, established in the largest of the infected villages. Many thousands of cases were treated and much minor drainage work was carried out, but the epidemic did not subside until February, 1921. Drainage work and the clearance of streams and quinine distribution were continued in this region, and the death rate for the last ten months of 1921 was only 15 per 1,000, while in Beit Jibrin itself, from July to September, there were no deaths at all.

Bedouin Law and Custom.

In Southern Palestine old-standing Bedouin law is still the final appeal in cases of dispute. Last March a serious and long-standing blood-feud came to a head between the two villages Dura and Dhahariyeh, south of Hebron. A pitched battle was fought, and both villages suffered comparatively heavy losses, Dura having seven killed and Dhahariyeh four. As is well known, these feuds continue automatically till the two sides are "all square." In this case the Government interposed and attempted to settle the trouble by "law" and to charge the offenders with murder and violence; only it was found quite impossible to raise the necessary witnesses and produce any evidence against private individuals. So recourse was had to Bedouin law and custom. On September 9 a "Blood-ransom Council" was appointed by Mr. Abramson, the Governor of South Palestine, consisting of the most important of the district Bedouin sheikhs and heads of villages; these met in the neutral village Yutta in the presence of the British Governor and a large local audience. The Council gave its rulings, which were submitted to the Governor, and accepted by him and the two sides involved. The compensation to the relatives of the three men of Dura who were killed in excess of the Dhahariyeh losses was fixed at 200 Egyptian pounds each. The wounded were also awarded gifts in proportion to their injuries. Since the fight took place in the dark, no particular individuals could be held responsible for particular deaths, and the villages as a whole had to pay the ransom price.

Internal Conditions.

At the moment internal conditions in Palestine are very quiet. There have been a few cases of highway robbery between Ludd and Jaffa. A police expedition a fortnight ago caught the leaders of one gang, and the rest of the gang, touched in their professional pride, a week later retaliated by making a big haul, waylaying a large company of villagers on their way to the Ludd market, relieving them of two thousand pounds' worth of donkeys and camels and five hundred pounds in cash.

The returned Arab Delegation is touring the country, moving the Arabs of the towns and villages with the recital of their wrongs, and urging them to boycott Jews and Constitutions and Legislative Councils. The boycott has not yet made itself felt. The Jews express no fear as to the economic effects of such a boycott; on the other hand, they state that they would welcome it as compelling them to make themselves self-supporting in those commodities for which they have been hitherto dependent on Arabs—vegetables, eggs, market produce generally, and labour—and this, they assert, with their sixty odd agricultural centres up and down the country, they are well able to do. What they do fear, however, is the danger of the innocent Arab imagining that the boycott is not solely an economic weapon, but a licence for less innocent lawlessness, and they instance recent cases of clandestine knifing and shooting.

There have been various pro-Kemalist demonstrations in various places—Nablus and Gaza especially—and it is said that last week thanksgiving prayers were offered in the "Mosque of Omar."

The Executive Council of the Moslem-Christian Association is still sitting over the problem of how to carry the resolutions of the "Nablus Congress" into effect. The recent edicts of the Government pointing out the legal stumbling-blocks in the way of carrying out those resolutions have made the matter less simple.

Jewish immigration is no longer "severe." The restrictive measures adopted by the Government have so reduced it that at present unemployment is non-existent. The vintage season and the hectic building activity are responsible for absorbing all available labour, though it is just possible that the present good conditions will not survive the winter, since it will not be possible to begin with new buildings until next spring. However, the first consignment of machinery for the Rutenberg scheme is to arrive in Haifa to-morrow, and so unlimited labour may soon be called for. The electrification of the Jaffa district is promised by the spring.

IRAQ.

Baghdad, September 14.

Turks and Kurds.

The Turk has been the principal topic of conversation in this country during the past ten days, and the interest aroused in his operations in Kurdistan and Anatolia has stifled interest in the internal affairs of Iraq.

Reference may first be made to the Kurdistan episode as having a more direct bearing on the affairs of this country. As a result of his propaganda, he was able to persuade many of the Kurdish tribes in Rania and Rowanduz districts to join him as soon as he made even a feeble show of force, and though aeroplanes, by intensive bombing, were able to bring to a halt the two small bands which moved down from Rowanduz in the direction of Rania, they were unable to force a withdrawal, and the threatening attitude of the tribes made it appear advisable to evacuate Rania and withdraw all the available forces to the Arbil Kirkuk line, where it would be possible to check any further aggressive movement, and the holding of which would make it possible to dispense with small outposts liable at any time to be isolated. This withdrawal was carried out with but few casualties.

With the evacuation of Rania, however, the way was open to Sulaimaniyah, and therefore, though the town was in no immediate danger, it was decided to withdraw temporarily the British and Indian officials and leave the Kurds to carry on the administration themselves until the situation gave rise to less anxiety. This withdrawal was carried out by air without any casualties, and Sheikh Qadir, a prominent local sheikh, and the Divisional Administrative Council were left in charge. To support them they had Kurdish levies, plenty of arms and ammunition, and such money as was in the Treasury at the time: and so far as can be gathered things are quiet in the town and district. When the British officials will be able to return to their posts is not yet known, but it is said that their withdrawal has caused consternation among

Digitized by Google

the tobacco merchants of Sulaimaniyah, who rely on Baghdad as a market for their tobacco, and fear that the withdrawal may cut them off from it.

Effect on the Arabs.

Late reports from the evacuated area are reassuring. Most of the Turks have, it appears, returned to Rowanduz, and several of the Kurdish tribes, having decided to take no action against Sulaimaniyah while Sheikh Qadir is in charge, have dispersed. This activity on the part of the Turks and the withdrawal of the British have aroused astonishingly little comment in Iraq. Even in Kirkuk, a large percentage of the inhabitants of which are of Turkish extraction, the situation remains normal, and no outward signs of pro-Turkish sympathies have been manifested.

Not so with regard to the Turkish successes in Anatolia. The Moslems do not attempt to conceal their satisfaction at the success of the Kemalists, and it has become almost the sole topic of conversation in the coffee-shops. The more enlightened section of the population see, however, a chance of a settlement of the Near Eastern question, and are now eagerly looking forward to the day when Turkey and the new States which have been formed from the Arab sections of the late Empire will be able to resume their relations with one another in a peaceful manner, and when commercial activity will be able to resume once again its accustomed routes.

Government Buildings Collapse.

King Faisal is well enough to be attending to his official duties once again. The Royal Diwan, however, is now housed in a farm building near the Palace, for a few days ago the building which had been previously used for this purpose, together with the Ministries of Defence and Communications and Works, fell into the river. Fortunately there were no casualties, as ominous cracks which had appeared in the buildings, and a sudden subsidence of the river wall, had given warning that all was not well, and the buildings had been evacuated a few days before the collapse occurred. The river wall slid into the river, and took with it the buildings immediately behind it.

Distinguished Visitors.

The Emir Zaid, the youngest brother of King Faisal, is due to arrive in this country in a day or two. Amin-al-Raihani, a distinguished Arab scholar and poet, is now paying a visit to Baghdad, and several receptions are being arranged in his honour.

BASRAH, MESOPOTAMIA.

BULGARIA.

Sofia, October 4.

Thrace.

Bulgarian eyes are now eagerly focussed on Thrace. A few days ago the Greek Government protested to Sofia concerning the attitude of the Bulgarian frontier guards in Thrace. Athens alleged that the frontier guards were not performing their duties in a proper manner, and that serious incidents might occur.

The Bulgarian Cabinet decided to send M. Yaneff, Minister of Justice, to the Thracian frontier, in order to make a personal investigation. M. Yaneff returned to Sofia yesterday. He states that, although the Bulgarian frontier posts are very weak, everything possible has been done to guard the frontier. Every day Armenians, Turks, and Greeks try to cross into Bulgaria, but orders have been given to admit no one. The Greek frontier posts have been decreased in size and withdrawn several kilometres. M. Yaneff said that, although he had not received it from an official source, he understood that large concentrations of Greek troops in the neighbourhood of Rodosto and Chatalja were being carried out. He also heard that requisitioning of cereals was taking place everywhere. The civil population will thus be in danger of starvation during the coming winter, whilst even to-day food is scarce and living is becoming very dear. It is also reported that Thrace is in a troublesome state, and that robber bands are in course of formation.

News received from Greek sources confirms the concentration of troops, but denies that Thrace is becoming dangerous. The Greeks consider that Bulgaria will not remain neutral in the event of war breaking out in Thrace. They believe that M. Stambolisky's Government will do its best to avoid hostilities, but that the Thracian element, aided and abetted by the Kemalists, will prove too strong for the Government. It is said that the Kemalists have sent more than eighty officers into Bulgaria during the last month, and that trouble on the frontier is being actively encouraged. This news is not confirmed, and is even categorically denied by the Government.

The same old difficulty is, however, confronting the Sofia Government. They do not possess a sufficiently powerful army or gendarmerie to patrol the frontiers or to arrest suspicious characters in the interior. The Bulgarian Press is still very guarded in its references to Thrace, but extreme discontent is naturally felt at the absence of a Bulgarian representative at the coming Near East Conference. Used to isolation, Bulgaria did not ever believe that the Little Entente would consent to her admittance to a Near East Conference, but the refusal has none the less still further embittered the public mind. Soviet Russia and Turkey are the only countries who have supported Bulgaria's claim to be admitted, and it is, therefore, natural that these two countries will gain a certain amount of sympathy in Bulgaria.

Bulgaria and the New Greece.

It cannot be said that the news of King Constantine's abdication has been received with satisfaction in Bulgaria. Fears are entertained that if M. Venizelos returns to power he will succeed in influencing opinion abroad in favour of Greece. Bulgarians want the Greeks out of Western Thrace. They consider that Greece without King Constantine is much more likely to hold this territory, and therefore the change of rulers is not popular.

The Sobranye Convoked.

On October 2 the Sobranye entered on yet another extraordinary session. The main object of its convocation is the bringing in of a Bill which provides for a referendum being taken regarding the

Digitized by Google

guilt of the 1912 and 1918 Cabinets. M. Daskaloff, Prime Minister *ad interim*, opened the debate with a short statement regarding the accused Cabinets. The Opposition were naturally very thinly represented, and were unable to take any prominent part in the debate.

Another important matter that awaits discussion is the law which provides for an increase in the payment of Government employees.

M. Stambolisky Returning.

M. Stambolisky left Geneva on October 1 for Sofia. He is travelling by way of Prague and Bucharest, where he wishes to see the Foreign Ministers.

By all accounts the Bulgarian Delegation to the League of Nations Assembly accomplished some very useful work. They may not have secured any definite concessions, but they have considerably enhanced Bulgarian prestige abroad. The speeches of M. Simeon Radeff, Bulgarian Minister at Vienna, were particularly well received.

Dr. Nansen.

To-day Dr. Nansen, the High Commissioner for Russian Refugees of the League of Nations, passed through Bulgaria on his way to Constantinople. He was met at the station by representatives of King Boris and the Government. Dr. Nansen's journey is in connection with the question of the Greek refugees of Asia Minor. He is buying flour from Bulgaria to send to the starving refugees, and is probably proceeding to Greece to investigate matters at first hand.

Accession Anniversary.

Yesterday King Boris celebrated the fourth anniversary of his accession to the throne. A "Te Deum" was celebrated in the old Cathedral, and all the leading foreigners in Bulgaria signed King Boris's book at the Palace.

ROUMANIA.

Bucharest, September 28.

Question of the Straits.

The freedom of the Straits is too vital a question for Roumania to look on idly, as will be easily seen when the military and economic strangulation she endured during the late war is remembered. The latest official declaration is that Roumania's attitude is to await the decisions of the Allies, and not to make a single move unless the country's interests are at stake.

During the past week all sorts of rumours were rampant, especially with regard to military preparations; these, however, were immediately contradicted by the Government in the semi-official Press, wherein it was explained that the military preparations now in progress are in connection with the manœuvres which will take place on the occasion of the Coronation festivities. The general feeling is that things will straighten out without the necessity for any armed intervention on Roumania's part, and that the recent naval and military demonstrations in the Dardanelles by Great Britain will have the effect of cooling the ardour of the more adventurous spirits of the Kemalist forces.

The Coronation.

The Ministers' Council has fixed the date of October 12 for the opening of the Extraordinary Parliamentary Session. Parliament will on that day be opened with the usual ceremonial, and then adjourned until after the Coronation festivities, that is to say, until October 18. This arrangement was made in order that the Senators and Deputies should have ample time to be present at Alba Julia on October 15, when the Coronation festivities begin. In this connection it is worth pointing out that, with the exception of the National Transylvanian Party and the Peasants Party, all other political groups and parties of the Opposition have now decided to attend the Coronation celebration, thus proving that they, despite their antagonism to the Government, regard the Coronation as a momentous national event—symbolising the union of all Roumanians—and to be held above party squabbles. The movement by the Transylvanian National Party to rally the whole Opposition in a demonstration against the carrying out of the Coronation under the régime of the present Government has therefore utterly failed.

Great preparations are being made to give the Coronation celebration a duly imposing character. Military displays on a large scale, which will be offered in honour of the distinguished foreign guests, will be a prominent feature.

Great Britain will be represented by the Duke of York, France by General Franchet d'Esperey, and Italy by the Duke of Genoa, in place of the Crown Prince, who is unwell. It was thought for a moment, according to the rumours spread by the Opposition Press, that the Coronation would have again to be postponed on account of the Near Eastern events, but the Government promptly contradicted the rumour.

Moscow Conference.

The semi-official Press denies the report that Roumania will participate at the Conference to be held in Moscow to discuss the reduction of armaments among the neighbouring countries of Russia. As Roumania's *sine qua non* condition for participation at the above-mentioned Conference is the definitive recognition by the Soviet of the Dniester boundary, her joining the Conference remains but a possibility. Nevertheless, in order to prove once more her peaceful sentiments, Roumania has consented—in compliance with the wishes expressed by Poland and the other States bordering on Russia—to be represented by General Petala at the preliminary military conference now sitting at Warsaw, which is attended by the representatives of the Baltic States, Poland, Roumania, Finland, Lithuania, and Esthonia, but not by Russia. The purpose of this preliminary conference is to determine the attitude to be taken at the forthcoming Moscow Conference.

TURKEY.

Constantinople, October 1.

Conditions in Constantinople.

The best news that Constantinople can give to the outer world with any degree of certainty as to its accuracy is that its fears for itself have become far less insistent since the arrival of additional British troops. This is not the place where final judgment can be passed on Allied policy or policies. On this side of the water we are moving about on a powder-mound, on the other side, to our way of thinking, is the torch that is waiting to fire the dump. Consequently everyone here—Briton, Greek, Armenian, Russian, American (as well as every Frenchman, Italian, and, if the truth were known, a great many Turks)—feels thankful to Great Britain for her interposition between the powder and the torch. The state of nervousness that has existed here cannot be exaggerated; but a distinct sense of relief followed the arrival of the first drafts of new British troops.

One of the principal reasons for the panic which has arisen is connected with the belief that there is a widespread secret Kemalist organisation in the

Digitized by Google

capital, and that at the right moment this organisation will set fire to the Christian quarters and massacre the inhabitants. Oddly enough, the Turks believe precisely the same thing of the Greeks and Armenians, and both sides are in a state of fear in consequence. That a Kemalist organisation exists is beyond doubt, and it is equally certain that if the Kemalist army were in a position to drive the British out of Constantinople at the point of the bayonet, the riff-raff, of which the "talumbajis" are the backbone, would gladly seize the opportunity to loot as much as possible. The extent and strength of this organisation is, however, undoubtedly exaggerated, and there is not the faintest doubt that the forces of occupation could with the greatest ease suppress any premature attempt to create disorder. The extent to which European prestige has declined may be measured by recalling the effect produced upon certain occasions prior to the Great War by the presence in the port of one or two warships of minor importance. To-day the entire Atlantic Squadron, including ships like the Malaya, is in the neighbourhood either of the Bosphorus or of the Dardanelles, and yet people are not satisfied!

Comings and Goings.

The departure of people threatened with Kemalist vengeance has continued through the past week. The outgoing trains are booked up for several days in advance, and it is exceedingly difficult to secure berths in steamers.

The families of military officers and men of H.M. Forces are due to leave for England to-morrow evening in the s.s. Glengorm Castle, much to the chagrin of most of the ladies, for life at home will be dull after the thrills of Constantinople.

Military and naval forces are still pouring into the city and Chanak. The Air Force is particularly conspicuous on account of the blue uniform, and the increased number of troops recalls the early days after the Armistice. The arrival of such numerous reinforcements has had a certain effect upon Turkish public opinion, and there is not quite so much talk in the Press about "valiant warriors" dictating peace at the point of the bayonet. The phalanx of Kemalist propagandists in the city has, therefore, been busily circulating rumours calculated to remove the hasty impression that the British Government is not bluffing this time.

Designs for a monument to be erected at Port Said, Egypt, to the memory of soldiers of the Australian and New Zealand Forces who fell in Egypt, Palestine, and Syria during 1916, 1917, and 1918, are invited by the Australian Department of Defence. Designs must be the work of sculptors and architects of British nationality permanently resident in Australia or New Zealand, or Australians and New Zealanders residing in other countries. A statue, or group of statuary, in marble or bronze, with granite or an approved hardstone for the pedestal, will form the main feature of the monument. It must include sculpture typifying both Australian and New Zealand horsemen. The cost of the monument is to be limited to £11,000. Designs must be delivered to the Secretary, Department of Defence, Melbourne, Victoria, by March 31 next. Premiums of 250 guineas, 100 guineas, and 50 guineas respectively will be paid for the designs placed first, second, and third. Further particulars may be had from the office of the High Commissioner for Australia, Australia House, Strand, W.C.

PRESS ON THE NEAR EAST.

The Future of Greece.

The *New Statesman* of September 30 thus depicts the unhappy situation of Greece:—

> The abdication of the unlucky King Constantine has been very generally welcomed throughout Europe, for he has managed to get himself into bad odour everywhere. But whether from the point of view of the Greek people there is any advantage in his withdrawal at this juncture is very doubtful. Had he never returned from his first exile, the course of recent history in the Near East might have been different and more favourable to the national aspirations of Greece. But his "sacrifice" comes too late and will change nothing. The Turco-Greek struggle has been decided; Greece has been beaten, and not even a Venizelos can now avert the consequences of the Turkish victory. Anatolia and Eastern Thrace must revert to their natural sovereignty—that of Turkey; there remain, indeed, in this quarter no undecided issues save the form which "the freedom of the Straits" is to take, the means by which a gratuitous and essentially meaningless conflict between the British and Turkish military forces may be avoided, and the question of whether Bulgaria's claim to an outlet on the Ægian (at the further expense of the Greeks) is to be admitted now or later on.
>
> King Constantine has been peculiarly unlucky; because, after all, it was not he but M. Venizelos who first led Greece into the Imperialist adventure which turned out so badly. Greece also has been unlucky, for she was first encouraged, and then abandoned, by the Western Powers—and particularly by Great Britain. But Greece and King Constantine alike have deserved their misfortunes. The King because he did not realise the ineptitude of his attempt to maintain a position which no one but a Venizelos could have gained or could possibly consolidate; and Greece because, as always, she was fickle. She had the luck—or, as it has happened, the bad luck—to possess a statesman of first-class rank; and at the critical moment she disowned him and recalled her foolish, though very likely well-meaning, King. For that error she has now to pay, and she should pay. A people which cannot recognise its natural leaders, and deposes the greatest man whom it has apparently produced for centuries, in favour of a possibly respectable but certainly very mediocre and seriously discredited monarch, is obviously incapable of assuming Imperial responsibilities. We hold no brief for M. Venizelos. We regret, indeed, that his remarkable personality should have led the Supreme Council to lay upon his fellow-countrymen tasks which they were incapable of fulfilling. His recall to Athens, if it should now come, is certainly the best step the Greeks can take, but it is impossible even for him to retrieve the position which three years ago he won, and which King Constantine and the Greek people have thrown away.

CORRESPONDENCE.

BRITISH SAILORS AT SMYRNA.

To the Editor of THE NEAR EAST.

Sir,—May I ask you, on behalf of my sister, Miss A. Williamson, and of myself, of the "English Nursing Home, Smyrna," to publish the following letter?

We wish, through your paper, to make known the extremely brave conduct of the officers and men of H.M.S. Iron Duke in rescuing the nurses, patients, and staff of our home on the awful night of the great fire in Smyrna.

The men landed and came to our rescue at 3 a.m. in the midst of a mad and terror-stricken mob, with Turkish soldiers at every turn ready to open fire. We know exactly how great a risk they ran, and words cannot express the gratitude we feel to those brave fellows. Altogether fifty of us were saved—nine women patients and their babies, Dr. Chaliopoulis and family of eight, all our staff, and about twenty refugees who had come to us for protection during the last dreadful three days.

After all the English had left Smyrna we felt a great loneliness, and tried hard to bury ourselves in work—finding room for the refugees and seeing to the household management. Towards evening about six we noticed the smoke of fire. We went up to the top of the house, and there saw flames in two or three parts of the town towards the Armenian quarter. Gradually, as the night came on, the fire got worse and worse, bombs kept exploding, and it seemed as if ammunition dumps were going off. The crash of timber falling was terrifying. Hundreds of horses and donkeys were making dreadful cries. Things got very bad by midnight, and it was all we could do to prevent a panic starting in the "Home." I tried my best to calm them all, and insisted on their keeping to their beds. One Armenian and his wife could not stand it, so he made us dress the wife, and he took her away. Heaven knows where they are now! It would have been better, as it turned out, had they stayed with us. Dr. Murphy, who was dying, fortunately passed away at 11.30. A little after 1.30 we had a message from the railway station to say that we must dress and be ready, as the wind had turned and the fire was getting too close, and we might have to run for our lives. A great horror came upon us, for how could we, with women confined only the day before, run amongst all that fearful crowd?

Dr. Murphy had been brought to us by Sir Harry Lamb the day before in a terrible condition—beaten on the head, with great wounds on the forehead, and a bullet wound through the shoulder and chest. His wife was with him, suffering from a cut on the head. They had both been attacked by soldiers, and their house was completely looted. The old man fought for the honour of the women in the house, and fortunately they got off from the back of the house.

Well, to return to our own trouble. All the staff and patients and next-door people had a panic, and started shrieking; most of them came into our rooms, begging us to save them, but how could we dress or pack or do anything? In the midst of this inferno we heard the steady commanding voices of Englishmen. Ah! what wonders they are! Calmness at once settled on all. We were told what to do, and we did it promptly. In fifteen minutes all were ready and into the street, with the door of the "Home" banged to, and no one but the body of Dr. Murphy (ex-Lieut.-Colonel of the Indian Army) to guard the place.

During the walk down to Rice's pier we were inside a strong picket of Marines, and the sailors held us up and guided us over dead bodies and horrors of all kinds—with a cheerful "Put your best foot forward, mother!" We got into a barge and were taken to the Iron Duke, and when once on board some of us, I am afraid, gave way to our feelings. The kindness of the admiral and officers is beyond words. Everything was done for our comfort, and a good breakfast was given to all. We found several friends on board—Sir Harry Lamb amongst them. After breakfast we were transferred to different ships, according to our destination. We came on the Antioch to Cyprus, and are all now living in my brother's mountain hut on Mount Troödos. Here are the Charnaud girls and Mrs. Harold Charnaud and family, Miss Edith Lawson and the Pengelleys, Stephensons, Walkers, and Mrs. Lewis. William Lewis was left behind in the English church. What has become of him?—I am, etc.,

GRACE WILLIAMSON.

Platres, Cyprus.

RUSSIA AND THE LEAGUE.

To the Editor of THE NEAR EAST.

Sir,—I do not know whether THE NEAR EAST keeps a political barometer. If so, the record for the past week must show some very deep curves, what with the Prime Minister's anti-Turkish manifestoes and Lord Curzon's Paris agreement to register. You, sir, must be fairly puzzled what next to foretell as likely to happen. It is, perhaps, a presumption on my part to endeavour to assist you, but I, nevertheless, think that you may safely predict the approach of a cyclone from Russia which may cause considerable further trouble in the neighbourhood of the Black Sea. But an anti-cyclone is also approaching Constantinople from the West in the shape of the League of Nations, which indicates that there is still some chance of your barometer rising and eventually even reaching "Set fair," provided that Mr. Lloyd George is muzzled and prevented from issuing any more provocative manifestoes to the Turks in particular and the Moslem world in general, no matter whether such speeches do or do not represent the Nonconformist conscience, of which our Prime Minister is such a leading light. The peace of the world is of as much importance as the views of Little Bethel. It is heartrending to state, but it is nevertheless true, that the prestige which we once possessed in the Mohammedan world has been entirely dissipated by Mr. Lloyd George during the past four years. It is still more heartrending when we realise that we have no statesman capable of turning Mr. Lloyd George out of office, if only to demonstrate to the Eastern world that the Lloyd Georgian policy is not the British policy. But as no such statesman is apparently to be found, and as Turkey, after Mr. Lloyd George's treatment, can no longer have the slightest confidence in our idea of justice, we can only hope that, for the peace of the world, the League of Nations will undertake the task which for generations has been looked on as our special job.

With the League of Nations at Constantinople exercising on lease from Turkey much the same rights over the Straits as the Suez Canal Company exercise on the Suez Canal, there should be no great difficulty in providing Turkey with the necessary means of repairing her devastated areas and of setting her house generally in order. The question would, therefore, appear to resolve itself into whether the anti-cyclonic force of the League of Nations is sufficiently strong to overcome the cyclonic force of the Russian Soviet. Russia is now going to play the cards she did not show at Genoa!—I am, etc.,

REFUGEES FROM SMYRNA.

Owing to the hour at which we go to press on Tuesdays it is utterly impossible for us to include any account of the great meeting announced to be held at the Mansion House on Tuesday afternoon, "to call attention to the distress amongst the refugees of Smyrna and Asia Minor," etc. But it is sure of success. The Lord Mayor is to preside, Princess Christian has promised to attend, and some very distinguished men are expected to speak. If we may make a small criticism, it is that it is in some ways a pity that the appeal is combined with one for continued support for relief of sufferers from the Russian famine. Even so, there are advantages for the Smyrna refugees from the combination. Mr. Algernon Maudsley, chairman of the "All-British Appeal for the Famine in Russia and Distress in Near East," last week told a representative of the *Daily Telegraph* that telegraphic information had been received on October 4 from the Acting Governor of Malta saying that the number of British subjects, refugees from Smyrna, in the island was 389 men, 478 women, and 375 children. For these financial assistance was immediately required. The appeal was transmitting by telegraph £500 as the first instalment of relief, and a detailed investigation had been undertaken to discover the exact number of British refugees in places other than Malta. A sub-committee had been formed of prominent members of the Smyrna colony who had arrived in England, so that a just and adequate distribution of the funds contributed was guaranteed.

In order to cope with the distress among the Greek refugees from Asia Minor, Mr. Maudsley is rushing through from Calais a complete train of large, closed cars of the American type with several hundred tons of foodstuffs, medical comforts, blankets, etc. This train is being run straight through France, Switzerland, Czecho-Slovakia, and Serbia to Salonika and Athens, where a local committee working in contact with the Hon. Francis Lindley, the British Diplomatic Representative, will regulate the distribution of the stores.

On October 6 36 refugees from Smyrna arrived at Plymouth. All were in good health despite the sufferings which they underwent when they were forced to leave their homes at the shortest possible notice. Practically all they possess are the clothes they are wearing, and they complained bitterly that they were given no time to save their money and effects.

The arrivals at Plymouth included Mrs. Florence Ashe, of Wimbledon; Mrs. H. and Miss Apostate, of Highgate; Miss E. M. Cox, of Westbourne Park, London; Mrs. and Miss Daniel, of Neath; Mrs. Alice Dobson, of Hull; Miss Alice Keyser, of Kensington; Mrs. Elizabeth Marty, of Kensington; Mr. and Mrs. S. Maltezo, of London; Miss E. Vallery, of Highgate; Mr. and Mrs. A. J. Whittall and children, of Eastbourne; Mr. and Mrs. L. R. Whittall and children, of Chalfont St. Peter; Miss M. Whittall, of St. Peter (Bucks); and Mr. E. A. Warren, of Middlesbrough-on-Tees.

The first warning they received of the seriousness of the situation was a notice issued by the British Vice-Consul on September 4, stating that an opportunity had been provided for those who wished to leave Smyrna.

Reuter's Agency understands that a telegram received from Constantinople gives some interesting figures of the work done by the British in the evacuation of Smyrna. The complete removal of refugees was finished by last Sunday, the total number of all nationalities evacuated being 180,000. Of these British and American efforts were successful in removing 150,000 between September 26 and October 1. The control of the shipping and embarkation at Smyrna was taken over by His Majesty's ship Curacoa, which supervised the embarkation of 30,000 to 40,000 refugees daily, together with their personal effects and luggage. The Americans gave great assistance at the harbour, and were also responsible for the movements of Greek shipping and of food relief organisation. Of the grand total removed from Smyrna no less than 35,000 were taken by British steamers. Vessels of American charter removed approximately 10,000, whilst the French ship Nova took away nearly 6,000. Altogether 2,000 of the refugees were of British nationality.

The following are the temporary addresses of some of the British refugees from Smyrna:—

The Hon. Mr. R. J. Wilkinson, Poste Restante, Mitylene, Greece; Mr. R. A. Pengelley, c.o. Imperial Ottoman Bank, Limassol, Cyprus; Miss Emily Cairns, c.o. Miss Boyd, Gairneyfield, Corstorphine, N.B.; Mr. and Mrs. F. Hatton, Savoy Hotel, Famagusta, Cyprus.

Smyrna

The country of "The Seven Churches of Asia" is desolate. The Churches of Thyatira, Ephesus and Magnesia are burned down. All the country south and west of Angora is wholly cleared of Christian population.

Latest Cables:

"Thousands of Asia Minor refugees utterly destitute. Money and Winter Clothing urgently needed."

"Most refugees penniless. Blankets and underclothing needed."

"Twenty died on steamer from starvation."

Our Relief Fund.

Administered by the Missionaries and Native Pastors associated with our Society for many years. They know the language and the people, and are best able to *distribute relief irrespective of creed or race.*

Near East Bookshelf.

EASTERN WAR DISEASES.

"OFFICIAL HISTORY OF THE WAR: MEDICAL DISEASES OF THE WAR." Vol. I. (London: H.M. Stationery Office. £1 2s.)

The first volume of the medical section of the official history of the war deals mainly with the diseases prevalent in the Eastern areas of operation, and but for the fact that East and West Africa come into the picture, the book might quite appropriately have been given the title of The Medical War in the Near East. It is a record of a series of fierce campaigns waged by the R.A.M.C. against the mobilised microbes of Serbia, Macedonia, Thrace, Egypt, Palestine, and Mesopotamia, in which, had the latter been victorious, the success of our armies would have been impossible, and brings home very forcibly to the reader the important part played by modern hygiene in the operations of war in the present day. The public is apt to regard the symbol of the Red Cross as the badge of the military surgeon, associating it exclusively with wounds and operations, and forgetting that in wars waged in unhealthy climes the number of men put out of action by disease greatly exceeds that of the soldiers killed and wounded in the field. Considering the climatic conditions under which the campaigns on the Eastern fronts were carried out, the number and variety of the deadly diseases endemic in the areas occupied by our troops and the difficulties encountered in providing medical services commensurate with the needs of the forces engaged, the statistical records published in this official history of the war leave one in no doubt as to the efficiency of the military medical machine. Disease was never once allowed to interfere with the plans of the military commanders; the sick were evacuated to the bases as quickly as the wounded, and in the hospitals where they were treated they had at their service all the resources of up-to-date scientific medicine. This may perhaps sound rather exaggerated language to employ in connection with a subject still associated to some extent in the public mind with "scandals," questions in Parliament, and Royal Commissions, to say nothing of journalistic "stunts," but the fact remains that, even after taking into account every regrettable incident reported from Mesopotamia and Gallipoli in connection with the sufferings of the sick and wounded during the war, modern medicine scored one of its most conspicuous triumphs in its fight against disease on the Eastern fronts. Unrivalled opportunities were there afforded to the doctors, many of whom in civil life long before the war had been recognised as in the front rank of their profession, for studying "tropical diseases" under ideal conditions from the scientific point of view, and how well they utilised these opportunities will be learnt from this work, officially a medical history, but in reality a series of up-to-date treatises by some of our most distinguished physicians, and destined to be used as a text-book by a whole generation of students of medicine.

Dysentery and malaria are very fully dealt with, the article treating of the former epitomising all the recent work done in the investigation of this ancient scourge of armies, while that in which the latter is discussed with special reference to its œtiology, incidence, and distribution, contains a most interesting section on Macedonia, which suggests that the war has given birth to yet another new science—medical geography. Perhaps it already exists under another name, but even if such is the case, one cannot help feeling that it deserves to be raised to a more prominent position in the public eye. These malarial chapters constitute a regular "Who's Who" for the mosquito world, whole pages being occupied with lists of the different varieties met with and identified in the various war areas, while it would seem that a host of others present at the time never succeeded in getting themselves officially introduced into any medical society. The admirable first chapter dealing with the general aspects of disease during the war will be found of great interest. It is full of suggestive little paragraphs which, put together as a calendar, might well furnish some of our warlike statesmen with a daily "great thought" to remind them that armies in the Near East have to meet the attacks of disease-carrying insect enemies infinitely more formidable than any human foes they may be pitted against. It is worth remembering at the present juncture that "in considering the possibility of a long campaign in an area such as Macedonia, it must be realised that the medical services cannot control the outbreaks of malaria which are bound to occur, and that to occupy a malarial district for long will be as serious a drain on the strength of an army as to hold a shell-swept front such as that of the Ypres sector in France."

The book is well printed and adequately illustrated; it contains an excellent index, while, what is hardly less important, to every chapter is added a full bibliography. The editors are to be congratulated on this first volume of the medical history of the great war, not the least of its merits being the excellent quality of the writing, for a group of scientific experts each writing on his special subject to succeed in producing anything one could fairly describe as readable is in itself a great achievement, and this ponderous medical bark, launched by the Stationery Office, will be found to sail wonderfully well in spite of its very heavy cargo.

UNDER THE ACROCERAUNIAN MOUNTAINS. *By Henry Baerlein* **6/- net.**

There is an interesting region in the Balkans—some call it Southern Albania, others call it Northern Epirus—the fate of which is hanging in the balance. Shall it belong to Albania or to Greece? The question has been debated with something less than calmness by the supporters of each party. The writer of this book has lately travelled there and now sets before us the views of the long-suffering population.

PERSONAL AND GENERAL.

TO-DAY.

October 12 (New Style).
September 29 (Old Style).
Safar 21, 1341 A.H. of the Moslem Calendar.
Tishri 20, 5683 of the Jewish Calendar.

The Shah of Persia has left Paris for Spain.

Field-Marshal Viscount Allenby has been elected a Fellow of the Royal Colonial Institute.

The Aga Khan returned to London last week from the Continent.

Lord Inchcape will leave London for India on October 19.

Lady Lamington has left London to join Lord Lamington at Salsomaggiore.

The Queen of Yugoslavia, travelling incognito, left Paris for Belgrade on October 3.

Viscount and Viscountess Erleigh have returned to London from India.

Nasir ul-Molk, ex-Regent of Persia, has taken his departure from town for Paris.

M. N. Misu, Secretary at the Roumanian Legation, has returned to London from Paris.

Lord Newton arrived at Sofia from Constantinople on Saturday.

Prince Paul of Serbia, who is to represent the King of Serbia at the King of Roumania's Coronation, has left London for Bucharest.

Lord and Lady Sydenham will return to London towards the end of the month from the Priory, Lamberhurst, Kent.

The marriage of Captain Basil Randall and Miss Rena Heslop will take place to-day (October 12) at Sialkot, India.

The Minister of the Kingdom of Serbs, Croats, and Slovenes has returned to London from Geneva.

M. Smodlaka, specially attached at the Yugoslav Legation, has come back to town from Belgrade.

M. D. Subotitch, the representative of the Serbian Board of Education, is back in London from Paris.

Lord Allenby, the British High Commissioner, called on the Emir Abdullah, who arrived at Alexandria last Thursday from Transjordania, on his way to London.

On October 4, the anniversary of his accession to the Throne, King Boris of Bulgaria attended a special service at Sofia Cathedral. The city was profusely decorated for the occasion.

Mr. A. T. Waugh, C.M.G., His Majesty's Consul-General, arrived in Constantinople on October 1 from England, where he had been on leave.

The offices of the Sudan Agency and of the Financial Secretary, Sudan Government, Cairo, were moved from the War Office, Egyptian Army, Cairo, to No. 6, Midan Tewfik, Cairo, on October 1.

Dr. Nansen, High Commissioner of the League of Nations, reached Constantinople from Geneva last Thursday to study the refugee problem in the Near East, and formulate a scheme for the relief of Moslem and Christian refugees.

The engagement is announced between Dennis, younger son of Captain and Mrs. J. Lees, of The Knowle, Brenchley, Kent, and Enid, younger daughter of Mr. and Mrs. L. Hartley, of Dalbhumgarh, B.N.R., India.

The engagement is announced of Mr. James S. Wilkins, M.C., Royal Field Artillery, only son of Lieutenant-Colonel E. G. R. Wilkins, Indian Army (retired), and Mrs. Wilkins, of South Farnborough, Hants, and Joan, elder daughter of Mr. and Mrs. John Leigh, of Westleigh, Lea, near Preston.

A marriage has been arranged between Mr. P. P. C. Zaphiro, C.M.G., of the Diplomatic Service, British Legation, Adis Ababa, Abyssinia, and Miss Ida M. M. Bonfadini, of London. The wedding will take place this month at St. James's Church, Piccadilly.

Admiral H. H. Campbell, C.B., C.V.O., Groom-in-Waiting to the King, attends the Duke of York as aide-de-camp on his Highness' visit to Roumania for the coronation of King Ferdinand. His Royal Highness will also be attended by his private secretary, Colonel R. Waterhouse.

The engagement is announced, and the marriage will take place next month in Simla, between Brevet-Major L. B. Grant, eldest son of Mr. W. Leonard Grant, of Sittingbourne, and Eileen Staveley Shackle, daughter of Mr. and Mrs. E. Neild Shackle, 31, Gilston Road, The Boltons, S.W., late of Botwell House, Hayes.

Brigadier-General R. B. D. and Mrs. Blakeney, the Hon. Sir John and Lady Bucknill, the Hon. Sir Dawson and Miss Miller, Lord and Lady Porchester, Sir B. K. and Lady Mullick, and Mr. Justice and Mrs. Piggott left London last week by the P. and O. Bombay express to join the s.s. China at Marseilles for Egypt or Bombay.

The marriage of Major R. W. Hornsby, Indian Army, elder son of the late Colonel Hornsby, Royal Artillery, and of Mrs. Hornsby, of Bedford, and Beryl Kathleen, third daughter of Mr. and Mrs. Richard Tracey, of Wetherby Mansions, S.W., will take place very quietly at the Chapel Royal, Savoy, at half-past two o'clock on Monday, the 16th instant.

SCHOOL OF ORIENTAL STUDIES.
London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

THE PERSIA SOCIETY.

President: Lord Lamington, G.C.M.G., G.C.I.E.

Founded in 1911 to study all questions of common interest to Great Britain and Persia.

Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1

Digitized by Google

A marriage has been arranged, and will take place at Birnie, Morayshire, on November 7, between James Birnie Gordon, Major, 52nd Sikhs (F.F.), son of the late Captain J. L. J. Gordon, 58th Foot, and grandson of the late Lieutenant-General John Irwin Willes, Bengal Staff Corps, and Oohna, daughter of the late Mr. Hugh Stewart Elgin.

A marriage has been arranged, and will take place on December 9, at St. Peter's Church, Harrogate, between Philip Theodore Mansfield, Indian Civil Service, second son of Mr. and Mrs. G. J. Mansfield, Priory Lodge, Blackheath, and Helen Rosamund (Queenie), youngest daughter of Mr. and Mrs. Henry Aked, Mablethorpe, Harrogate.

A marriage has been arranged, and will shortly take place at Gibraltar, between Lieutenant-Colonel Leger Livingstone-Learmonth, C.M.G., of Southover, Dorchester, second surviving son of the late A. J. Livingstone-Learmonth and of Frances Viscountess Portman, and Gabrielle, daughter of the late General Sir Power Palmer, G.C.B., G.C.S.I., and niece of General Sir Horace and Lady Smith-Dorrien.

The engagement is announced between Major-General Herbert Fothergill Cooke, C.B., C.S.I., D.S.O., Military Secretary, Army Headquarters, India, eldest surviving son of Colonel W. S. Cooke, formerly of the 4th Hussars and 22nd (Cheshire) Regiment, of Heatherside, Crookham, Hants, and Harriet Mary, youngest daughter of the late Colonel J. F. Hornby, 12th Lancers, of Sandhoe, Hexham, and of Mrs. Hornby, of 5, Orme Square, London, W.2.

APPOINTMENTS, Etc.

The appointment of Air Vice-Marshal Sir John Maitland Salmond, Royal Air Force, to be Major-General whilst commanding the Forces in Iraq, has now been gazetted.

Colonel Macwatt, now Inspector-General of Civil Hospitals in the Punjab, will (states a Simla message) succeed Major-General Sir William Edwards, who retires shortly from the post of Director-General of the Indian Medical Service.

General Nadir Khan has been reappointed Afghan Minister of War, Abdul Aziz Khan has been appointed Minister of the Interior, and Sarwar Khan and Amir ud-Din Khan have been appointed Governors of Kandahar and Matun respectively.

OBITUARY.

The death is announced of Nawab Sir Syed Shams-ul-Huda, who was President of the Bengal Legislature in 1921. Sir Syed Shams-ul-Huda was one of the most prominent men in Bengal, and a leader in all Mohammedan movements. Sir Syed was formerly a member of the Legislative Council of Eastern Bengal, represented the Mohammedans of Eastern Bengal on the Imperial Legislative Council, and had served first as a member, and later as Vice-President of the Bengal Executive Council. He was given the title of Nawab as a personal distinction in 1913, and three years later was created a K.C.I.E.

The death occurred last week, at the age of 71, of Sir Lancelot Hare, K.C.S.I., C.I.E., who was Lieutenant-Governor of Eastern Bengal and Assam from 1906-1911.

INDIA AND THE CHURCH.

The Bishop of St. Albans presided over a great meeting, held last week, in Church House, Westminster, to wish God-speed to the twenty-four clergymen and six women missioners, who are going to India as a Mission of Help, representing the Church of England. Most of them have already left this country. Among them are the Bishop of Peterborough, accompanied by Mrs. Woods, the Dean of Manchester, Father Waggett, Lady Fletcher, Mrs. G. H. Bell, Miss Thornton, of Winchester, and Miss Higson, of Liverpool. It was stated that the object of the present mission was to strengthen and stimulate the Church's life among Anglo-Indians—a responsibility which the Archbishop of Canterbury described in a letter to the promoters of the mission as a matter belonging not to India only, but to the well-being of the Empire as a whole. The Bishop of Peterborough described the mission as an illustration of the solidarity of the Church of England and as a movement to encourage Churchmen and Churchwomen in India to realise afresh that only in the Christian faith lay the hope of India. It was stated that the cost of the missioners going out and returning would be about six thousand pounds.

THE BRITISH SALONIKA ARMY.

Members of the British Salonika Army, says *The Times*, marched to the Cenotaph from the War Office on September 29 in commemoration of the fourth anniversary of the request for an armistice by the Bulgarians, and at 3 o'clock placed on the memorial a wreath to the memory of their comrades who lost their lives in Salonika. The wreath, which was composed of evergreens and red flowers, with the name "Salonika" also in red, was borne by General Milne, late G.O.C., Salonika Army.

MUDANIA, AND AFTER.

As the first days of the Near Eastern crisis recede into the background, it is evident that, in the event of a peace conference being held without recourse to hostilities, a strenuous attempt will be made in certain quarters to maintain that only the successful handling of the situation by the British Government, in particular its bold and bellicose stand, averted war. Already Mr. Bonar Law, in a manifesto which has been invested with considerable political significance, appears to justify the official statement of September 16 by declaring that, "unless a decisive warning had at once been issued, the Turkish forces, flushed with victory, would have attempted to enter Constantinople and cross into Thrace," and he adds that "our withdrawal" in such circumstances would have been regarded as the defeat of the British Empire, and as "British impotence in the face of a victorious Turkish army." In using such language Mr. Bonar Law shows that he has failed to grasp the situation in the Near East as signally as the Ministers responsible for the alarmist official statement. There was no warning in the document of September 16; its authors took for granted, quite gratuitously, "a violent and hostile Turkish aggression" which would entail the closing of the Straits, and sent out a panic appeal to the Dominions and to three Balkan Powers "with a view to their taking a part in the effective defence of the neutral zones." A warning to the Kemalists against any attempt to cross over to Europe would have been a proper and dignified course to adopt, because the Allied fleets in the waterway were in a position to prevent the passage of the Kemalist army. What was so particularly wrong-headed, apart from the general tenour of the statement, was, first, the reference to the neutral zones of the obsolete Sèvres Treaty, the "infraction" of which could not be prevented by the Allies, if the Turks were resolved to enter them, and, secondly, the decision to hold Chanak, the retention of which exposed Great Britain to war with the Kemalists, without offering an adequate safeguard for the freedom of the Straits or an effective defence of the neutral zones. Mr. Bonar Law would seem to be confusing in his own mind a withdrawal from Chanak—the obviously sound policy for any Government sincerely desirous of peace—and a withdrawal of the British Fleet from the Dardanelles and Bosphorus, which has never been suggested in any quarter. The latter withdrawal might possibly have been misinterpreted in India; the withdrawal from Chanak, *before* the issue of the official statement of September 16, would have attracted no attention or comment anywhere, for the good reason that the British Fleet barred the way to an attempt on the part of the Kemalist forces to invade areas which were in any sense vital to Allied interests. Certain military dispositions in the Ismid peninsula would have been necessary for the defence of Scutari, but they would have been taken *ad hoc*, not in virtue of the Treaty of Sèvres, and would presumably have been effective for their purpose.

Clear thinking on this point is essential if the country is to be extricated from the complex muddle in which the Government's Near Eastern policy—or the lack of one—has involved it, for the attempt is almost certain to be made to interpret co-operation in finding the right course of action to be taken now as implying approval of the various steps that have led up to the present situation. Stress has justly been laid on the need for agreement with France; but it does not seem to be realised that we have no right to require the French to take up the burden of Britain's mistakes. But for the retention of British troops in Chanak there would have been no threat of war, and it was inevitable that the Kemalists should try at Mudania to score a point by pressing for the withdrawal of these troops. What would have been possible and wise before September 16 would now involve a serious loss of prestige, if not to Great Britain, at least to the British Government. If, therefore, France has identified herself with the stipulation that British troops are to remain at Chanak over the period of the Peace Conference, she has at least one friendly act to her credit in the Near Eastern imbroglio; at the same time, it is worth while to note that, if there had been in fact the "violent and hostile Turkish aggression" that Ministers denounced, it would have been a simple matter for the Kemalists, having proved that they could reach the Straits at other places than Chanak, to have made the British occupation of that town a *casus belli*. We shall, no doubt, be told that it was only the hurried despatch of British troops to the Near East that cooled the ardour of the victorious Turks for further hostilities, and the Secretary of State for War has already declared that "the chances of averting war have been immensely improved by the firm and prompt action taken by His Majesty's Government." This, however, is pure assumption, and it suggests a lack of intelligence on the part of Mustapha Kemal to which his actions lend no support.

Nothing would be more prejudicial to the success of the forthcoming Peace Conference than that Great Britain should approach it under the conviction that her Near Eastern policy has left nothing to be desired. For this reason we urged last week that it was essential that there should be a sufficient change in the constitution of the Cabinet to ensure that no false attempt at face-saving should be made at the Conference. It will be well if the presence of Russian delegates can be restricted to sessions at which the freedom of the Straits is under discussion; but it will have to be remembered that, even when the Soviets are not represented at other sessions, their influence must leave its mark on the course of the deliberations. That this should be so will be due solely to British policy during the last three or four years, which has antagonised the Turks to no purpose, as far as British interests are concerned, and has thrown them into the arms of the Bolshevists. Although a Soviet-Turkish alliance is an unnatural one, it must be recognised that very real advantages have accrued to Angora from its understanding with Moscow. Mustapha Kemal must, indeed, realise that he owes to Bolshevist support the strong attitude that he is now able to adopt against the Allied Powers. He is probably under no illusions as to the ultimate trend of the alliance, if Turkey were to remain indefinitely beholden to Soviet Russia for the right to exist; but the Allies can hardly expect him to allow his sense of gratitude for past favours to diminish before he has satisfied himself that Turkey has secured a satisfactory status *vis-à-vis* the rest of the world, inde-

Digitized by Google

pendent of Bolshevist help. It requires little imagination to picture the effect on the Turks' attitude at the Conference if they find themselves confronted by Mr. Lloyd George himself, or even by representatives of a Government presided over by him. This time Great Britain and the whole world want a settlement that will bring peace to the Near East.

THE REVOLUTIONARY MOVEMENT IN GREECE.

(From Our Athens Correspondent.)

But four days ago the Athenian was the most pessimistic person in the world. The unexpected reverse in Ionia, the firing of beautiful Smyrna, the exodus of thousands of starving refugees, the Damoclean sword of a Kemalist occupation in Thrace, the persistent rumours of desertions of the troops who were entrusted with the defence of the Chatalja frontier, and, finally, the utter indifference with which the Triantafyllakos Government treated the whole situation, made the usually so optimistic Athenian believe that the gods of Greece had definitely withdrawn the favour they had so lavishly bestowed upon the country during the last ten years. The dream of a Greater Greece, embracing the city of Constantine, gradually faded away on the Asia Minor horizon, and the possibility of losing Western Thrace and part of Macedonia as well was seriously considered, while some ultra-pessimistic persons went even so far as to prophesy a Greek frontier running from Ekaterini, at the entrance of the Gulf of Salonika, to Arta, in Southern Epirus. This was the spirit prevailing in Athens four days ago—a spirit of despair, weariness, and resignation. To-day the transformation is complete. Two brave soldiers and great patriots, Colonel Plastiras and Colonel Gonatas, appeared suddenly from nowhere, like the "Deus ex machina," bringing with them new hopes, fresh enthusiasm, and, most important of all, the prospect of unity—that unity which had disappeared from this unhappy land since 1915.

It now transpires that certain Liberal circles in Athens knew of the intended *coup* and worked indefatigably to ensure its success on this side. The Government, on the other hand, receiving no news whatsoever from Chios for nearly a week, and no reply to its frantic wireless calls to the "Lemnos," naturally smelt a rat and began to exhibit every sign of nervousness. Armed patrols in Athens were doubled; a new Venizelist conspiracy, in which a well-known and perfectly harmless doctor figured as the leader, was very artfully staged, and martial law was to have been proclaimed in the principal towns of the country. Then came the bombshell in the shape of thousands of pamphlets dropped from an aeroplane in the neighbourhood of Omonia Square—the busiest quarter of the city. The prompt order issued by the authorities to the effect that every copy be confiscated and destroyed was, of course, ridiculous. By noon there was not a single person in Athens and the Piraus who did not know by heart the contents of the proclamation. This fact was soon realised by the authorities, who, in order to convey the impression that they were treating the whole thing as a huge joke, instructed the censor not to interfere with its publication. Thus the text appeared in full in all the evening papers.

But the revolutionists were in no mood for jokes, as the Council of Ministers found out to its chagrin, when, at seven o'clock in the evening, it received an ultimatum transmitted by wireless from Laurium, a small colliery town near Cape Sounium, only about thirty miles from Athens. This time the Ministers were really alarmed. The Council was abruptly broken up, and the Premier rushed to the Palace to communicate the bad news to King Constantine. Meanwhile, a second ultimatum arrived demanding a definite reply before midnight, and adding that, if the revolutionists' demands were ignored, these, numbering about 15,000 men, would advance on the capital to impose their terms. An hour later General Papoulas was motoring in all haste to Laurium. All the demands had been unconditionally accepted, and Greece was spared the horrors of a civil war.

Athenians were up early next morning. The cafés, which opened at their usual hour, were packed with people drinking Turkish coffee and devouring the contents of the morning papers. Nothing was known yet as to the result of the *pourparlers* of General Papoulas with the revolutionists, as the former had only returned from his mission at six o'clock, and the papers were then already on sale. At nine o'clock Dame Rumour became active. "The revolutionists have demanded the immediate abdication of the King," said to me a young infantry officer—a staunch supporter of the monarch; "but, of course, we are not going to allow that. If Plastiras and Gonatas take it into their heads to use force, there is going to be trouble." In a secluded corner inside the Café Zacharatos a party of well-known Venizelists were discussing the situation in a low voice. I knew two of the party, and went up to them, while the remainder at once interrupted their conversation, and eyed me suspiciously. "What do you know?" said the one. "We hear that the King has abdicated, and that the Royalists are going to massacre the Venizelists." I had no time to answer. A rifle shot, followed by a regular fusillade, came from the direction of Constitution Square. "There you are; I told you," added hastily my friend, making for the door. In less than a minute the big café was empty, while the dense crowds in the streets were scattering in all directions, the majority seeking safety in the shops in Stadium Street, which were hurriedly pulling down their heavy iron shutters. The writer, with many others, found himself in a large tobacconist shop, and from a window on the first floor was able to see the hotheads who were provoking the panic. They were about fifty soldiers and civilians, every one armed with a service rifle. They were firing in the air, and at the same time singing King Constantine's tune "The Son of the Eagle." Later I was told that these men were all members of the political syllogues, and that their object was to terrorise the populace and warn them what was

likely to happen if their beloved King was forced to abdicate. In this they were indeed successful. Soon after eleven, when it became known that the King had really abdicated in favour of the Crown Prince, the streets became rapidly deserted, and every shop, café and restaurant promptly closed its doors. Early in the afternoon strong guards were posted at all the Ministries, the National Bank, and the Post Office, while about fifty officers belonging to the Athens garrison endeavoured, in conjunction with the political syllogues, to organise a counter-revolution. This, however, failed completely, the men refusing to march against their comrades-in-arms who had already arrived at the Piræus, and were disembarking. Meanwhile, Venizelist officers, with the aid of Cretan gendarmes, occupied without serious opposition the offices of the Commandant de la Place and the Prefecture of Police, while another party of Venizelist officers and soldiers, who had adhered to the movement, after exchanging a few shots with the defenders of the Post Office and the National Bank, occupied the two buildings

By 5 o'clock the city was virtually in the hands of the Venizelists, who took upon themselves the responsibility of maintaining public order pending the arrival of the revolutionists. With the return of confidence the streets soon began to regain their normal aspect, and the cafés and restaurants in the vicinity of Omonia Square reopened. Shortly before dinner, over 5,000 demonstrators, carrying photographs of M. Venizelos, and singing the Greek National Anthem, marched past the British and French Legations cheering for Great Britain and France. At night many of the public buildings, Stadium Street, and Constitution Square, were brilliantly illuminated to celebrate the success of the revolutionary movement. And thus endeth one of the most bloodless revolutions in history.

THE PILGRIMAGE TO MECCA.

The following is an extract from a letter, dated Mecca Ka'aba Premises, August 8, 1922, written by an Indian Mohammedan who had served in Iraq, and who went this year on the pilgrimage to Mecca :—

"I performed the Haj, arriving at a place called Arafat—about ten or twelve miles away from Mecca on August 3. Arafat is a very vast plain, sandy, and with tufts of bushes here and there. It is surrounded by hills, on one side of which the priest from Egypt reads the "Khutba." In the plain people pitch tents or make other shelter, and have to remain there until in the afternoon guns are fired, and the priest, who can be neither heard nor seen, begins the "Khutba," and finishes just as the sun goes down. Immediately the Hajis start. The camels make a line for miles, and the Hajis ride in hanging cots on both sides of the camels. The plain stretches for miles round the hill, and the tents and shelters seem numberless. The day was hot in spite of the breeze, and the Badoos came to sell fuel and water. You could get a tinful for a rupee or so.

"After we left Arafat we came at about midnight to a place called Muzdalfa, and left it early in the morning, reaching Mina at about 9 a.m. This city is very large, but is inhabited for three days only during the whole year. There are big pacca mansions, big latticed stone houses, pacca and whitewashed, and with all comforts. The houses fetch rent for the whole year in three days, as the rent is 60 to 100 guineas for three days. People jointly rent the houses. Tents are spread for miles all round. There are shops in the bazaar containing every article of food or fruit, such as grapes, peaches, melons, water melons, lemons, dates, coco-nuts, and so on. The whole city remains occupied for three days, and it is so thronged that you can scarcely move. And, in addition, there are nicely saddled donkeys, ponies, camels, horses, and so forth.

"The estimate of the pilgrims—men, women and children from all parts of the world—this year comes to nearly one lakh. There were Arabs, Iraqis, Persians, Indians, Chinese, Pathans, Russians, Egyptians, Abyssinians, East, West, and South Africans, Bokhara men, Malaya people, and the Javanese, of whom (the last) there were about 30,000 alone. The Java man cannot ask for a woman's hand in marriage unless he has done the pilgrimage. They come here in thousands every year, and leave their children to learn Arabic in Mecca."

THE LONDON MOSLEM LEAGUE.

We have received from Mr. Ispahani, hon. secretary of the London Moslem League, the copy of a letter sent to the Prime Minister, of which the following are the chief points: (1) The official manifesto issued by the Premier on September 16 and his speech on September 23 have "created a most unfortunate impression on the Moslem world." (2) To make a war-cry of "the freedom of the Straits," which is fully guaranteed by the Kemalists, is an unwarrantable act. (3) The Greek association with British military and naval forces is likely to inflame Moslem anger. (4) Exception is taken to Mr. Lloyd George's charge that the Turks burned down Smyrna. (5) Care is advised lest overzeal in the maintenance of British prestige should cause "regrettable incidents." (6) The divergence is noted between the Government of India's attitude towards the Mohammedan world and that of His Majesty's Government. (7) Hopes were entertained, but are now deceived, that on the disappearance of the Greeks from Asia Minor England would resume her old friendly relations with Turkey. (8) A plea is made for the adoption of a new policy of reconciliation. (9) The claim is pressed that Mohammedans of India should be represented on the Conference which is to make peace with Turkey.

THE
EUPHRATES & TIGRIS
STEAM NAVIGATION CO., LTD.

Regular Service of Passenger and Cargo Steamers running at frequent intervals between BUSREH (Persian Gulf) and BAGHDAD on the River Tigris and between MOHAMMERAH (Persian Gulf) and AHWAZ on the river Karun.

Cargo booked on a Through Bill of Lading to BAGHDAD and/or AHWAZ by the chief liners sailing from the U.K., Continent and India.

The engagement of land transport for Cargo to towns in the interior of Mesopotamia and Persia undertaken on behalf of Shippers of Through Cargo to BAGHDAD and AHWAZ.

NOTES AND NEWS.

1, Devonshire Square,
London, E.C.2.

The End of the Crisis?

It may be taken for granted now that we have been permitted to escape the worst consequences of the Near Eastern situation. But the results have been serious enough. Hardly a trade but has been affected to a greater or lesser degree by the prevailing uncertainty, while commerce with the Near East, or, at any rate, with the greater part of it, is practically at a standstill for the time being. Until a definite settlement is arrived at this state of things is likely to continue.

The Soviet Oil Contract.

Rather too much seems to have been made of the contract that it is announced has been made between the Soviet Government and the International Barnsdall Corporation for the exploitation of the State oilfields in the Baku district. Taken at its face value, what does the contract mean? Merely that the American Corporation has been granted rights over the unexploited oil lands in that region. They may be of considerable value, probably they are, but there is nothing in the agreement to justify reference to it as an American "coup." I see that the president of the Corporation anticipates that the production of oil will be proceeding within five months. He may be right, but, personally, I doubt it, and it seems open to question whether the difficulties that will have to be faced in that region are adequately realised. As to the statement that as the result of the contract "America will dominate the exploitation of the vast Baku oil district for at least fifteen years," it would seem premature, to say the least of it.

Prospects of the Existing Oil Companies.

The really interesting feature of the contract is the possibility it obviously foreshadows of an arrangement between the existing oil companies and the Soviet organisation. Russia has tried in vain to work the oilfields herself, and there is no question that the Soviet Government is now heartily tired of the task, and will be by no means reluctant to restore them to the real owners, as it is impossible to dispose of them in any other quarter. We may expect to hear before long, therefore, that negotiations are in progress to this end. From the account published in these columns last week of conditions in the Baku field it would seem clear that the restoration will be a matter for rejoicing on the part of the workmen, who find difficulty in obtaining their pay under existing conditions, as it is impossible to print notes fast enough to keep pace with the depreciation of the rouble.

The British Industries Fair.

I hear very promising accounts of the prospects for the coming British Industries Fair. There was naturally a certain amount of apprehension that as a result of the crisis in the Near East applications for space would be below the average, but the experience of the last ten days suggests that firms have come to the conclusion that they need not alter their plans on that score. At the present time, indeed, I understand that the total number of firms who propose to exhibit is well in excess of last year's total. If that were not so, it would be surprising, for if one takes a broad view of the present position, it is obvious that conditions are improving, and that at no very distant date we ought to be in full enjoyment of a real trade revival. I only hope that Near Eastern buyers will be more in evidence at the Fair next February. On the last occasion they formed about 3 per cent. of the overseas buyers, and according to the information that reaches me, a different story will have to be told on this occasion.

The P. and O. Dividend.

As will be seen from the announcement in another column, the directors of the Peninsular and Oriental Steam Navigation Company recommend a final dividend on the deferred stock of 6 per cent., making 12 per cent. free of tax for the year. The dividend has been maintained at this figure since 1915-16, with occasional bonuses. This year's recommendation is entirely in accordance with expectation, as it was thought extremely unlikely that a bonus would be proposed in present conditions, since prudence obviously dictates a policy of conservation of resources.

Lake Copais.

Concerns like the Lake Copais Company are at a special disadvantage at the present time. The company obtained a considerably greater profit in drachmæ in 1921 than in the previous year, but owing to the depreciation of the Greek exchange the net profit earned in Greece only amounts in sterling to £17,568, as against £23,535 for 1920. The balance at the credit of the profit and loss account amounts to £14,417, and it is proposed to utilise this amount by transferring £9,900 to the credit of the interest account of the "A" debenture stockholders and £4,517 to that of the "B" debenture stockholders, and it is recommended that 5 per cent. be paid on the former stock and 2 per cent. on the latter, in both cases in fully-paid 5 per cent. "A" debenture stock at par. During the year £26,295 was expended on new work. Owing to unfavourable conditions, it is stated that disappointing results will be forthcoming for the current year, but it would seem clear that as soon as circumstances are more promising the company should prove a good dividend-paying concern.

Commerce and Industry.

ROUMANIA.

Bucharest, September 28.

Rumour of Increased Bank-Note Issue.

A great shortage of paper money has been felt for the last two months on the Roumanian market, which is greatly hampering all branches of trade, industry, housebuilding, and other construction work, despite the large support accorded by the National Bank through the medium of the local financial institutions. This financial stringency owes its origin not so much to the insufficiency of paper money, but rather to the fact that a very large portion of the currency is hoarded by the public and especially by the peasantry. Another cause is the enormous amount of capital which has been invested during the last few years in new industrial undertakings, which, owing to the depreciation of the national currency, have had to resort to considerable loans or increases of capital in order to be able to pay for imported machinery and raw materials.

The Government, the National Bank, and other bodies are now considering how to make currency revert to circulation. There seem to be two alternatives. One way would be to resort to the printing machine, as a temporary measure, which, it is argued, could easily be done without prejudicing the national currency, for the State could procure the necessary gold guarantee for a further issue of about one to one and a-half million lei, which amount would be sufficient to alleviate the present money crisis. As to the Treasury's gold resources, there is the gold received as its quota from the Austrian-Hungarian Bank, the output of the State's gold mines in Transylvania, and other sources. On the other hand, the Roumanian State is—for the first time since the war—in the fortunate position of having a large credit balance with the National Bank, arising from the revenue collections, wherewith the State could easily redeem part of its debts with the National Bank. The other alternative would be to make the peasants disgorge their hoarded capital in paper money—estimated at about two million lei—by compelling them to pay in cash for the land that was given to them under the new Agrarian Reform Bill.

Anyway, a solution will have to be found very soon, for the present money stringency cannot be allowed to continue too long without causing considerable damage to the country's industry and commerce.

Paris-Bucharest Air Service.

The Franco-Roumanian Air Navigation Company began its Paris-Bucharest air service for mail and passengers on September 19. The aeroplanes leave Bucharest for Paris at 9 a.m. every Tuesday and Saturday, and arrive here at 3.45 p.m. every Monday and Friday, and stop en route at Budapest, Vienna, Prague, and Strassburg. From September 30 onwards this air service will be extended to Constantinople. Next spring a daily service will be in operation between Constantinople, Bucharest, Belgrade, Budapest, Vienna, Prague, Strassburg, and Paris.

MESOPOTAMIA.

Baghdad, September 14.

Bumper Date Harvest.

The date harvest this year is heavy, and up to date good prices are being obtained for the kinds which are most in favour for export. It is anticipated, however, that prices will be unable to maintain their present high level for very long. Several boats loaded with grain have already left Basrah, and others are now in the port loading grain. Otherwise there is almost complete stagnation in the commercial world.

Baghdad, September 29.

Trade is at its best in Iraq at this time of the year, as grain and date exports are in progress. The price of dates in Basrah ruled high at the beginning of the season, but has fallen very considerably of late. Grain prices show little change, and barley is being exported in some quantities. The market for wheat is very stagnant, and both quality and prices are low.

COTTON TRADE REVIEW.

Tone a Little Better.

The Manchester cotton trade review of the Imperial Ottoman Bank for the week ended October 7 states:—

General.—Nothing of outstanding interest has taken place during the past week. The market remains in the lethargic state reported recently, although the feeling has, perhaps, been a little better following the brighter outlook, politically, in the Near East. This, however, has not yet made any appreciable difference to the amount of orders actually placed, and buyers both for the home trade and abroad continue to restrict their purchases to their immediate wants.

An agreement has been reached between the Manchester Chamber of Commerce and the Bombay Steam Trade Conference, under which freights for cotton goods and yarn to that port are reduced by 37½ per cent., the new rate being 50s. per ton. This is, of course, a very substantial reduction, and it is hoped that the resultant lower prices will stimulate buying in that country. If a similar reduction could be made in freights to other countries, it would be all to the good of the consumer and the Lancashire producer, and probably also of the shipping companies concerned.

Yarn and Cloth.—Under the conditions prevailing at present there is little to report under these headings. Demand remains on an exceedingly small scale, and the prices which spinners and manufacturers are obliged to accept, in order to do any business at all, are mostly unremunerative. India does little, although it is hoped that the favourable harvest there and the reduction in freight above mentioned will shortly stimulate demand from that quarter. China is practically out of the market, and so, of course, is the Near East. Demand for the home trade, South America, and other outlets continues to be on a very modest scale.

Raw Cotton.—Prices are little changed on the week, although there have been fluctuations, a fall of 32 points on Monday, for example, being followed by rises of 21 points on Tuesday, 17 points on Thursday, and eight on Friday. Sales continue to be small. The monthly report of the Washington Agricultural Bureau, which was published on Tuesday last, gave the condition of the crop as 50 per cent. against 57 per cent. a month ago and 42.2 per cent. at the same time last year. The crop is estimated at 10,135,000 bales. The report was received quite calmly, and appears to have been pretty much as expected. Closing prices are as follows:—American fully middling, 12.52; Egyptian fully good fair, 17.15.

COTTON-GROWING IN IRAQ.

Great Possibilities.

(This article is based on information courteously supplied to us by the Iraq Department of Agriculture.)

Cotton cultivation, as ascertained from written records, is known to have been practised in Iraq from very ancient times. And the word "muslin," which derives its origin from "Mosul," points to the fact that in late mediæval times cotton manufacture was also an established industry. Since then cotton cultivation in Mesopotamia has fallen on bad days. The Turk is known to have imported Egyptian and American cotton seed, but he never followed up the enterprise initiated by him. He distributed seed to the cultivators, and his enterprise ended at that. The cultivator sold the produce from this improved seed to the nearest bazaar. There was no discriminating market and no export trade. To the local consumer cotton is cotton; and no differentiation is made in the matter of length, strength, fineness, or of cleanliness. The cultivator received no more for his Egyptian cotton measuring one and a-half inches than he did for his indigenous cotton, whose length is less than an inch.

Before the war the largest area devoted to cotton in Iraq was that commanded by the canals taking off from the River Diala. The variety grown here was a short-staple type common to Asia Minor and Persia; and it is still grown for the Baghdad market to-day. Around Baghdad and near Hillah an American type was spasmodically grown. On the Upper Euphrates a dark khaki cotton was grown on small areas. Around Basrah what little crop that was grown was allowed to remain in the ground for three or four seasons, with the result that the imported Egyptian and American varieties mixed freely. There was no export trade in cotton from Iraq in pre-war days. The crop was all used locally for stuffing mattresses and cushions, and, in a small way, for home-made cotton fabrics.

About six years ago, when the Great War was at its height and the Turks were still in Baghdad, the Chief Political Officer in the Persian Gulf foresaw the possibility of cotton entering very largely into the development of Iraq. He made immediate arrangements to procure the services of an agriculturist who had received special training in cotton cultivation. This official arrived in the country in 1917 to investigate whether the local conditions of climate and soil were suited to cotton cultivation, and, if so, what variety of cotton would give the best returns to the local cultivator. The experimental work which was then immediately undertaken has now been continued for four seasons, and results of value have been obtained. Altogether some thirty varieties of cotton from most of the cotton-growing countries of the world have been studied. The variety that has given the best average returns is a long-stapled American, with a staple of 1¼ inches. In 1918 1½ lb. of this variety were imported. After four seasons' growth we now have enough seed to sow about 2,000 acres.

There is hardly a single cultivated crop, tropical or temperate, that will not grow in Iraq provided it is given kindly treatment. The country is a mine of untold wealth. Yet, at first hand, it does appear to be paradoxical that the public revenues derived from such a country should be inadequate to meet the normal expenses of administration even in times of peace. It would appear that there is something wrong, something fundamentally wrong, with the political economy of a country possessing such great potential sources of wealth. But the explanation is not far to seek.

Adam Smith—the father of political economy—has told us "that the great object of the political economy of every country should be to increase the riches and the power of that country." The wealth of a nation, like that of a man, is estimated by its surplus production. If a man possesses a million of rupees and consumes it all, he is not rich. He is not competent to embark on new ventures or new enterprises. He cannot build railways and construct canals; and neither can a nation. All the enterprises of peace and of war depend upon the surplus production of the people.

What is essential for Iraq is surplus production. How is the surplus production of the country to be increased? The factors that determine its surplus production are many and diverse. We will pass by the potential sources of mineral oils within the State, and also many other factors concerned, and confine ourselves to the purely agricultural aspect.

The chief exports of Iraq at present are dates, wool, horses, and hides. Before the war, wheat and barley were exported in fairly large quantities. During the war the demand of the local population, of the Army of Occupation, and of the neighbouring countries consumed the whole of the local supply of cereals. To-day the situation has materially changed and a resumed export trade of cereals is to be anticipated in the near future. This is all to the good. Despite the high price of labour, the present price of wheat and of barley has fallen very nearly to its pre-war level. The surplus production of these two cereals is likely to increase at an accelerated pace during the next few years. But there are two important factors that militate against the value of cereals exported from Iraq; and these are, firstly, the very high percentage of earth and other refuse mixed with the grain, and secondly, the lack of uniformity in the produce due to the practice of cultivating a congeries of mixed varieties. The earth mixed with the grain is to be attributed to the primitive practice of threshing the corn by trampling with bullocks; and not until threshing machines are commonly adopted will it be possible to overcome this difficulty.

In regard to the mixed varieties of grain which the Arab cultivates, the Department of Agriculture has separated distinct varieties of wheat and varieties of barley. These are now being grown side by side with a very large number of varieties from the chief wheat-growing countries of the world, on the experimental farms. When the variety best suited to the country has been discovered it will be propagated and distributed in a pure form to the cultivators.

Though, in regard to dates, there is a general tendency to plant fairly large new areas with date palms, the palm takes from six to ten years to bear fruit, and an early increase in the export of dates is not to be expected. The yield of the date crop each year is believed to be largely determined by the intensity of attack of various insect pests. Of these pests about five are really serious, though the incidence of disease varies from year to year. Should it be possible to discover economical means of controlling these pests it cannot be doubted that the total yield of dates would materially increase. An efficient remedy has already been discovered for one of these pests, and the remainder are under investigation.

Wool, horses, and hides offer no prospects of an early and an appreciable increase in exports. Of the produce of the soil, whether grain, fibre, or fruit, it will be noted that of the summer crops the country has at present a surplus production of dates only; and from the winter crops wheat and barley only.

It is an extraordinary fact in the agricultural economics of Iraq that, except for rice (nearly all of which is consumed in the country) and a little sesamum, the Arab does not make use of his canal water in the summer to grow any crop of commercial importance. And it is as well perhaps to emphasise the fact that the fault is not altogether his. Seed of the best crop suited to his requirements has not in the past been readily available; he had no means of learning how to grow crops new to him; there were no marketing facilities; and costs of transport were high.

Conditions have now changed. The Government, in his interests, has undertaken to discover what crops can be profitably introduced into his rotation; to supply him with seed of such crops; and to give him facilities for placing his produce on the world's markets where they will command their intrinsic value. There are signs that the cultivating class will not be slow in accepting the advice and the assistance that is now being proffered.

Though sesamum, tobacco, and sugar-cane may be grown with success as summer crops in Iraq, it would seem clear that none of these will be able to compete on a large commercial scale with cotton.

The belief that cotton cultivation will in the near future go far towards enabling Iraq to increase its surplus production, and to recover some of the glory, the splendour, and the wealth it is known to have possessed at the height of its Babylonian days, is based partly on the results of experiments that have already been conducted, but more so on the extraordinary recent development of cotton cultivation in such countries as Russian Turkestan, Nigeria, Uganda, and the Sudan.

It is as well to remember, however, that even when the Tigris and the Euphrates are completely harnessed, and the area estimated by Sir William Willcocks at six million acres is under cultivation, the maximum annual yield of cotton that may be grown in Iraq will probably not exceed one million bales of 500 lb.

That the cultivation of cotton for export has come to stay there is not the least doubt. It is as well to realise, however, that the problem is not so much that of Iraq being a considerable potential source of cotton as that of cotton holding out great possibilities for the early development of Iraq. Cotton is, *par excellence*, the key to the surplus production problem. And though the millennium is not just yet in sight, an improvement in the national finances of the country appears to be within measurable distance.

The directors of the Bengal-Nagpur Railway announce a further dividend of 15s. per cent. and a bonus of 10s. per cent. on capital stock in respect of the year to March 31 last, payable January 1, 1923, which, with the guaranteed interest of £1 15s. per cent. then due, makes £6 per cent. for the year.

THE DEPRECIATED EXCHANGES.

A Plea for a Policy.

It speaks volumes for the ineffectual way in which the world has grappled with the question of economic reconstruction that we have never been nearer solving the problem of the exchanges than during the past few weeks when inept diplomacy has brought us to the verge of war with Turkey. War, if it had broken out on the scale that was thought likely, would, in all probability, have rendered nugatory all hope of the restoration of the world's currency system as we knew it before the war. It would have meant commencing again from the beginning to rear up the fragile structure which enables the smooth exchange of commodities between the nations, and the world in its present state of civilisation is not so framed as to stand such a strain.

As it is, it seems clear that many of the exchanges cannot be rectified other than by indirect means. The rouble is unquoted on the London exchanges, and it is impossible to give its actual nominal rate, which is, however, somewhere in seven figures. The improvement of this currency until it reaches parity would be too long a process, while the internal consequences would be most serious. In such a case there is nothing for it but the establishment of a new currency bearing a certain ratio to the smaller, the process being repeated until the normal rate is reached. The Austrian exchange, too, is in a perilous state, and here, too, heroic measures will presumably be necessary, as also in the case of at least two other exchanges. Apart from the above, the exchanges are capable of rectification by direct methods, and ought indeed after four years of peace to show distinct signs of improvement. An examination shows that the contrary is unfortunately the case. In a few instances, notably sterling, the rate has improved, but in regard to only too many other exchanges it has been otherwise, and a comparison of the rates obtaining at the beginning of 1919 and at the present time reveals a startling depreciation. Leaving Germany out of consideration, as special factors operate in her case, it can be said emphatically that in 1919 there was no reason why this should have been so. There was, on the other hand, absolute justification for anticipating the gradual appreciation of the exchanges, and if things had gone "according to plan," world trade would not now be hampered in the way it is.

The explanation of the situation in which we now find ourselves is simply that the world has not settled down to work, and by that is meant that there has been little real effort on the part of the Governments concerned to carry out the only kind of policy that can be of any avail. Of course, in what has been happening there is room for ample excuses that the conditions have not been such as to permit the necessary measures. While what for want of a better phrase may be termed "the war atmosphere" continues to exist Governments naturally are reluctant to reduce armaments, though that is one of the essentials for economic reconstruction. But if the "atmosphere" has not been favourable, that is to a large measure the fault of the Allies, whose policy since 1919 has not been calculated to further the rapid restoration of normal conditions. It is high time that the realities of the situation were appreciated. For the welfare of the world it is essential that every effort should be made to enable the development of trade, and that is out of the question with the exchanges at their present levels. Provided, as we are justified in anticipating, the Near Eastern crisis results in a real settlement, conditions will be really promising for a great advance towards the normal, for Russia is at last showing signs of abandoning the course she has been pursuing and of being desirous of assistance from the Western nations in the re-establishment of her commercial and industrial life. Of course, the restoration of Russia will be a lengthy proceeding, but it is the effect of knowing that the position is changing there that matters, for uncertainty with regard to Bolshevist activities has had a great deal to do with the retardation of reconstruction, particularly in South-Eastern Europe. With that nightmare out of the way, and the Near East *impasse* ended, the Governments of Europe will have their opportunity, and if it is utilised as it should be as the result of the experience that has been gained through the mistakes of the past few years, by the time the next harvest comes to be gathered the exchanges ought to make a very different showing.

It must be emphasised, however, that nothing short of a Wentworthian policy will be of avail. In the first place there must be real economy on the part of all administrations. In short, Budgets must be made to balance, no matter how drastic the steps involved in the process. We have seen in this country something of what has been going on. Economies have been effected on a large scale, but apparently with the greatest reluctance, and only in response to the overwhelming pressure of public opinion. But if progress has been made slowly here, there has, until the last year or so, been little pretence of economy in other countries, and as a matter of fact new paper issues have not infrequently been made. It is true that the past year has witnessed an alteration of this kind of thing, and from many countries evidence has been forthcoming of a growing sense of realities, but so far only the fringe of the problem has been tackled, and very much more must be done if results are to be apparent within a reasonable interval. Gradual deflation is another essential of the situation, and while this must be carried out very carefully, evidence of the definite adoption of a policy of deflation would be calculated to have results quite disproportionate to anything accomplished in this direction. At least as important as deflation is the freedom of trade, and that, as anyone who has followed developments, particularly during the last year, will have realised, has been far from being the policy of governments. Obviously there must be cases in which protection is essential, but nothing can justify the obstacles to trade that now exist in all directions in the shape of prohibitive duties and restrictions on exports and imports. Conditions in South-East Europe are particularly bad in this respect, commercial barriers being set up in all directions. Now that America has followed the prevailing vogue, it will be more difficult to persuade countries to see the folly of the process, but this position must be altered, for in present circumstances a policy that has the effect of hampering trade can only be regarded as suicidal.

The Department of Colonisation and Development of the Canadian Pacific Railway now incorporate in their monthly journal, *Agricultural and Industrial Progress in Canada*, a supplement, entitled "The Investors' Index of Canadian Conditions." This consists of a series of charts showing Canada's financial position, foreign trade, railway, banking, currency, provincial and City conditions for the month.

'BALKAN' NATIONAL INSURANCE COMPANY
FOUNDED 1895.
Capital paid up - - - - - - 5,000,000
Total reserves as per December 31st, 1920 53,200,000
Premium Income during 1920 - - - 28,300,000
Amounts insured of Life Branch exceed 150,000,000
Branches maintained: Fire, Life, Marine, Casualty and Re-insurance of all branches.
HEAD OFFICE: SOFIA, BULGARIA.

THE FIRST WIRELESS EXHIBITION.

Possibilities of Broadcasting.

In this age we have grown so accustomed to the marvellous advances rendered possible by scientific discoveries that new inventions, however great their importance or their significance for the welfare of the human race, often fail to be appreciated at their true value. The position with regard to wireless telegraphy is different, for the rapid progress made in perfecting and in extending the utility of what is perhaps the greatest marvel of the period has aroused popular interest to a very marked degree, and the latest developments which have rendered possible the transmission and reception of news and music have met with an instantaneous response from a public eager to take advantage of this new means of interest and recreation.

We have had during the past week the first All-British Wireless Exhibition, the reception of which—there were 25,000 people present during the week—speaks for itself as to the popularity which wireless has attained. The exhibitors, it is understood, are more than satisfied with the orders that have been booked, many firms having sold almost all their exhibits after the first two or three days of the exhibition. It is obviously not difficult to foresee the time when the reception of telephony will be a great family diversion in this country, and no doubt the tendency will be the same in every other country.

In regions like the Near and Middle East, given the establishment of an adequate number of wireless stations, broadcasting should have a very definite vogue, for, apart from its utility in well-populated towns, it should serve a very important purpose as a medium for linking up people on the frontiers and other isolated regions with civilisation. It can well be realised that the life of British officials in, let us say, some of the districts in the Sudan, in Mesopotamia, and on the Indian frontiers is a very isolated existence, and for them the possibilities raised by broadcasting should mean a great deal. For an hour or two occasionally they will no longer be alone, but will be able to be in touch with the outside world.

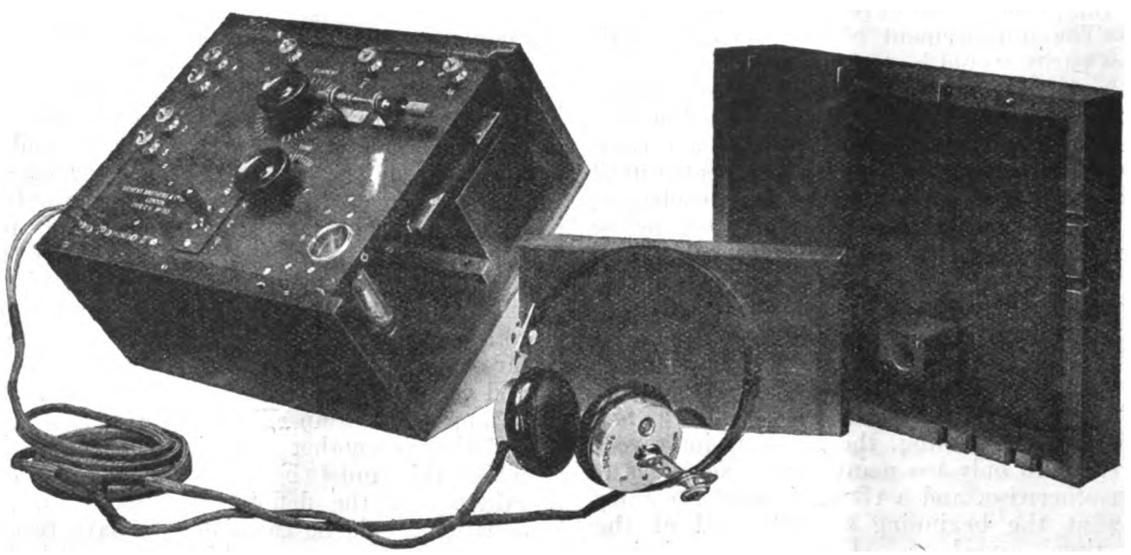
Notable Exhibits.

Turning to the exhibits, it would be a very difficult task to say which stand attracted most attention, as all were of more than passing interest. The Marconi Wireless Telegraph Company were showing wireless apparatus of the past twenty-five years, which marks the advance made in wireless telegraphy compared with the present-day apparatus. An aircraft wireless telephone transmitter and receiver such as are used on our commercial aeroplanes between England and the Continent was shown, and varied types of Marconiphones for the reception of broadcasting telephony were also on view. Another interesting stand was that of the Sterling Telephone and Electric Company, who exhibited their well-known Magnavox loud speakers, which receive telephony, etc., with exceptional clearness.

Special interest is attached to the stand of Messrs. Siemens Brothers and Co., Ltd, whose exhibits included the Siemens' Broadcasting Receiver, Type C.V., an illustration of which is given on this page. All the apparatus except the filament battery and telephone headgear is contained in a compact mahogany box, and one side of the box is made to slide to enable the replacing of the valve on high tension battery and changing the tuning coil if required. This receiver renders possible the following combinations, which are effected by a single change over switch: (1) Crystal reception only, (2) single valve reception only, (3) crystal reception with note magnifying valve. These combinations have many advantages, a few of which may be indicated. By the use of the crystal only signals can be obtained when the filament batteries are run down or unavailable. Further, the crystal gives perfectly satisfactory results when receiving strong signals or when listening in at short ranges, while considerable economy results from the use of the crystal. Should the crystal fail, reception is possible by the use of the valve only, and signals received on the valve are stronger. As regards the third combination, telephonic transmission can be heard which is inaudible in the other combinations.

Many interesting exhibits were shown at the stand of Messrs. Radio Instruments, Ltd., among which were crystal and valve sets and a complete wireless receiving installation which is equipped with a frame aerial which dispenses with the unsightly external aerials. The set is combined in one large cabinet together with batteries and loud speaker.

Another stand of interest was that of the Telephone Manufacturing Co., Ltd., who exhibited a comprehensive range of condensers, transformers, head telephones, amplifiers, and their famous De Luxe Cabinet receiving sets. The Metropolitan-Vickers Electrical Co., Ltd, were showing various "Cosmos" valve and crystal receiving sets, also loud speakers and note amplifiers. H.P.R. tuners, amplifiers and magnifiers, detectors, and Simplex wireless phones were on view at the stand of Messrs. H. P. R. Wireless Ltd. Messrs. W. R. H. Tingey had a particularly attractive stand on which were displayed a self-contained five-valve cabinet receiving set, and various "broadcast" valve receiving sets, also a large selection of wireless accessories. An extensive display of B.T.-H. portable wireless and crystal receivers, also loud speakers, morse buzzers, and head telephones were to be seen at the interesting stand of the British Thomson-Houston Co., Ltd.; while the exhibits of the Western Electric Co., Ltd., included crystal sets, loud-speaking receivers, cabinet sets in Jacobean and Sheraton styles, etc., accumulators, aerials, and accessories. Messrs. A. W. Gamage, Ltd., had an excellent display of valve and crystal sets, condensers, loud speakers, and tuning inductances. Their crystal set is certainly a masterpiece, and will receive telephony up to 30 miles and signals from spark stations at a distance of 150 to 200 miles. Other interesting exhibits were those of the Fellows Magneto Co., Ltd., "Fellocryst" crystal sets, head-phones, and magnifiers; Messrs. The Hart Accumulator Co., Ltd., wireless accumulators, low-tension batteries, etc.; Messrs. H. W. Sullivan, radio telephone transmitters, variable condensers, radio receiving sets, amplifiers, transmitting apparatus, wavemeters, etc.; Messrs. Burndept, Ltd., transmitting and receiving sets of one to four valves, and accessories; Messrs. The Automatic Telephone Manufacturing Co., Ltd., telephone headgears, loud-speaking receivers, buzzers, and all accessories; and Messrs. The Ever Ready Co. (Great Britain). Ltd., who were exhibiting dry cells, batteries, and accumulators.



A WIRELESS RECEIVING SET.

The transfer books of the British Burmah Petroleum Company's Eight and a-half per Cent. Second Mortgage Debenture stock will be closed from October 14 to October 31 for the purpose of preparing warrants for the interest payable on November 1.

Engineering Topics.

Motor Shipbuilding.

I have just been looking through last month's motor shipbuilding returns, and find that great activity prevailed in British yards. Seven important orders were placed for this class of vessels, one of them being for a 600-ft. passenger liner, equipped with oil engines of 12,000 indicated horse-power, the machinery power being more than double that in any existing motor ship. According to the *Motor Ship*, two of the other new vessels which have just been ordered are cargo-carrying craft, each of 20,000 tons deadweight capacity. These are figures which exceed the wildest dreams of the oil-engine builder of a few years ago, and represent another milestone in the history of the marine oil engine. I see that according to *Lloyd's Register* there is only one cargo vessel afloat of larger cargo-carrying capacity than the motor craft about to be laid down, and so we can now say that the oil engine is being produced, commercially, in sizes suitable for the propulsion of any type of cargo vessel, no matter how large. When it is added that some 95 per cent. of the 30,000 odd vessels afloat are of the cargo-carrying type, it will be agreed that the oil engine has now proved its value, as the only vessels to which it is as yet inapplicable are the few fast, high-powered ships designed primarily for passenger service.

The Force of Example.

These two huge vessels have been ordered as a result of the experience the shipowners concerned have gained in the running of both steamers and motor ships, and it is hoped that those others who have had under consideration the construction of large passenger-carrying boats of this type will arrive at a decision. An authority points out that it is not without significance that the most important order placed in the industry during the past two years, since the severe slump, has been for oil-engined ships. Incidentally, I hear that a 15,000-ton oil tanker has been laid down, in which Diesel engines of an aggregate of 4,000 h.p. are to be installed, and that orders for three 8,000-ton motor ships, which were cancelled when the slump set in, have been placed again. There is no doubt that a period of prosperity is assured for British motor shipbuilding, and as conditions are now normal there is no reason why this should be followed by any period of depression.

Peat Drying.

A new process for getting rid of the troublesome water content in peat has made its appearance, and although it is claimed as a great advance on any method yet introduced, it must not be forgotten that every peat-drying process has been heralded with similar claims, and none have proved in practice to be entirely satisfactory. It is said that in the new process a pressure of 5 atmospheres and a temperature of about 180 degrees Cent. are used, which dry the peat sufficiently to enable it to be made into briquettes. The heating and compression are carried out in a steaming tower, and the water is apparently blown or strained under pressure out of the peat. The treatment is said to take from half to three-quarters of an hour for a container full of raw peat, but from an engineering point of view it may be doubted whether even this treatment would result in more than about 30 per cent. of dry substance in the treated mass. It may be, however, that the inventor has succeeded in solving a problem which has taxed the brains of so many, and further particulars as to the cost of the process and the value of the peat obtained will no doubt be illuminating.

Steam Losses.

Discussing the subject of boiler-house efficiency the other day with one of the leading makers of power-house plant in the kingdom, we deplored the tendency of power users to neglect the insulation of steam pipes either by providing an altogether inadequate covering or by allowing the covering to fall into disrepair. Poor insulation is a fertile source of inefficiency and heat losses, and I believe it is generally admitted that 50 per cent. of the heat of superheated steam can be lost by allowing the steam to pass through a mere 6-in. length of uninsulated pipe. In my experience I have used a variety of substances for lagging pipes carrying superheated steam, but I am not at all sure that any one is vastly superior to any other. The pipes should be covered with a fine porous material of the lowest possible conductivity, the whole being well bound, with an even and highly polished surface. The secret of low heat losses lies in thorough and painstaking attention to every detail. Clean boilers, free from corrosion, attention to the feed water, thoroughly good and scientific stoking, clearing away soot and carbonaceous deposits from tubes and flues all play their part, and in connection with this latter I was reminded that experiments conducted under working conditions show that a film of sooty matter a mere quarter of an inch in thickness will reduce conductivity by about 50 per cent.

Of course, when one is dealing with superheated steam, by which we mean wet steam from the boilers passed through a series of tubes in which its temperature is raised either by means of heat from the boiler flues or from a separate furnace, there are a number of precautions which have to be taken, as not only high pressure but also high temperature have to be dealt with. It is consequently essential that suitable materials should be used, which means that, broadly speaking, steel piping should be used throughout, and the use of copper or cast-iron pipe avoided. No power user should risk making his own experiments in the way of superheating steam, but should get into touch with some of the engineering firms who make this work their speciality.

The consumption duty leviable in the French zone of Morocco on saccharine and other artificial sweetening substances is now fixed at 500 francs per kilog.

The following cable has been received by the Dacia Romano Petroleum Syndicate, Ltd., from Roumania:—"Moreni No. 1, swedging; No. 2, 682 metres. Chiciura No. 2, 371 since Saturday; no water. Baicoiu Nos. 1 and 2, bailing; No. 3: Hope commence drilling Thursday."

Stock and Share Markets.

TONE FAIRLY STEADY.

Gilt-Edged a Feature.

(From Our Own Correspondent.)

London, Tuesday morning.

Once again it has been a somewhat varied week. The markets commenced on a better tone on the improvement in the Near Eastern situation, and during the week quite a fair business was transacted, and prices tended upwards. But Friday saw a change. The development of a new crisis resulted in the return of dull markets, and the week-end saw prices down again. This time the rapid end of the crisis failed to have the usual recuperative effect, and while to a certain extent there was a revival yesterday, a rather uncertain tone prevailed, and the tendency was evidently to await developments. As I said last week, we must expect this kind of thing until a final settlement is arranged, and, as that is likely to be a matter of some months, we must be prepared to exercise patience. Certainly it would be quite hopeless to look for buoyant markets under present circumstances.

An absence of new issues is an invariable sign nowadays of adverse conditions. We were beginning to get quite a number when the Near East crisis developed, and the stream abruptly dried up. There are a large number on the tapes, including oil companies, but nothing will be seen of them at present. That there is plenty of money available for sound investments is evident from what happened in the case of the Daily Mail Trust, Limited, which was enormously over-subscribed, £1,600,000 being asked for and over £40,000,000 being offered. But then that was an exceptional opportunity.

It is interesting to note that while the other markets are marking time, the Rubber market continues to go ahead. The price of the raw commodity has now reached 9d., and almost buoyant conditions prevail in the market, rises being recorded all along the line. It is as yet uncertain whether the change will be permanent. We have had so many of these fleeting recoveries, and this may prove in the end to be merely another of them. On the other hand, it has to be borne in mind that the position with regard to the commodity is much more assured than was the case a few weeks back. Still, the certainty that substantial dividends cannot be paid for a very long time would seem to set a limit to the recovery in prices for the present at any rate. It is encouraging, however, to find one market that can rise superior to the crisis.

Gilt-Edged Improve.

Gilt-edged made a much better showing this week on the improved outlook. Yesterday, indeed, there were advances practically in every case. Consols at 57 are ½ up on the week. The Conversion Loan at 73⅜ is ¾ up, War Loan Fives at 100⅛ have gained ⅜, while Fundings at 84 are ⅜ better. Indian stocks have shared in the general improvement. The 7 per Cent. stock at 112 is a point up, the 3½ per Cent. stock at 66¼ has gained ¼, while the 3 per Cent. stock at 55½ is also ¼ harder.

The Foreign group has been rather variable. French stocks in particular have shown a tendency to fluctuate, while there have been a few weak spots in this market. Prices, however, are generally above the previous week's levels. In French stocks War Loan Fives are ⅜ up at 35¾, while the 4 per Cents. at 29½ are ½ up. German 3 per Cents. are again lower, and at 1 1-16 are ⅛ down. Italian Rentes are unchanged at 21. In Near Eastern securities Turkish Unified have improved ¼ to 31¼, while Greek Monopolies at 30½ are a point lower. Russians have been rather dull. The 5 per Cents. at 10½ are ½ down, the 4½ per Cents. at 7 are ½ lower, but the 4 per Cents. at 6½ are ½ up. Czecho-Slovak 8 per Cents. at 89½ x.d. have gained ½. In Far Eastern securities, Chinese stocks have rallied, the 4½ per Cents. of 1898 being 82, while the Hukuang Railway Bonds are 61. In South American securities Brazilians have been a weak spot.

Industrials Firm.

The Industrial group has not been slow in responding to the improved outlook, and yesterday quite a firm tone was in evidence. But, as usual, business was on the most restricted scale, and this, of course, is bound to continue for the present. It will encourage holders, however, to know that once conditions are settled it is evident that there will be a very general advance in quotations.

Tobaccos have been a fairly firm spot. Bats at 86s. 6d. are 1s. up, while Imperial Tobaccos are 3d. up at 68s. 9d. Textiles have been steady. Courtaulds at 54s. 6d. have gained 9d., Coats at 65s. 6d. are 6d. up, but Listers at 25s. 6d. are 1s. 3d. lower. In Iron and Steel securities Vickers are 6d. down at 11s. 6d., Armstrongs are 15s. 6d. x.d., while Guest Keens at 35s. are 9d. up. Indian railways are about the same. Bengal Nagpur are 94½, Delhi Umballa are 179¼, Madras and Southern Mahratta are 99, at which they are 2½ lower, while South Indian are 104.

Shipping securities have been featureless. P. and O. Deferred are unchanged at 295, Cunards remain at 19s. 6d., Khedivial Mails are 3¼, while Furness Withys are 6d. up at 32s. 6d.

Oils Quiet.

The Oil market has been less affected than other groups by the prevailing conditions, and a rather dull tone prevailed yesterday.

Anglo-Persian Oils have been fairly firm, and at 5⅞ are ⅛ up. Burmahs are 5½, at which they are ⅛ lower. Mexican Eagles are again lower at 2 27-32, a drop of 5-32; while Shell Transport at 4 11-32 are 5-32 down. Trinidad issues have been rather better. Apex, at 2 1-16, are 1-16 up; Centrals are 1-16 up at 1⅛, while Leaseholds have gained ⅛ at 1 3-16.

Russian stocks have been fairly steady. Spies, at 6s. 3d., are 3d. up; Anglo-Maikop are unchanged at 3s. 6d., North Caucasians are the same at 13-16, Ural Caspians remain at ¾, while Uroz are 3d. up at 9s. 3d.

Among Egyptians, Anglo-Egyptian B are unchanged at 1 7-16, while Oilfields of Egypt are again lower at 2s., a drop of 6d. In the Roumanian group, Phœnix are 3d. down at 25s. 6d., Roumanian Consolidated are 3d. lower at 13s. 3d., Steaua Romanas are 3d. up at 10s. 3d., Dacia Romanos are 1-16 down at ¾, while Hamilton's Oil Concessions are unchanged at 2s.

Banks Firm.

A fairly steady tone has ruled in banking descriptions. Chartereds, at 17 5-16, are 1-16 down, National of India, at 41⅜, are about the same, while P. and O. Banks are unchanged at 14.

There has been little change in Egyptian securities. Aboukirs remain at 21s., Beheras are ¼ down at 7½, Egyptian Markets are unchanged at 21s. 6d., Gharbieh Lands are 1-16 lower at 1⅜, New Egyptians are 23s., while Sudan Plantations are 5.

ROUMANIAN TREASURY BILLS.

The committee representing holders of Roumanian Treasury bills announce that the Commission appointed by the Roumanian Government for the purpose of verifying and admitting for conversion bills deposited, is sitting in London this week, under the presidency of M. Antoniade, who will be remembered as one of the chief Roumanian delegates to the Peace Conference. The Commission will only be called upon to decide as to the authenticity of the bills submitted, and their decision will be communicated to holders in due course. Holders will be entitled to have their provisional receipts stamped to this effect should they desire it. The committee, therefore, recommend holders to deposit their bills without delay in order that the validity of their position can be established without question.

Algerian Oilfields.—Advice has been received from the Societe Algerienne des Petroles de Tlouanet, in which the Algerian Oilfields is so largely interested, that well No. 9 at Medjillah has struck the oil sand at 90 metres.

LONDON PRODUCE REPORT.

Sugar Higher.

(From Our Own Correspondent.)

London, Monday Evening.

Sugar.—Home refined has been in moderate demand at higher rates. Tate's cubes are 6d. higher at 56s. 6d., and mineral water sugar is 6d. up at 50s. 3d. London granulated has advanced 6d. at 49s. 9d.. while Lyle's granulated shows a gain of 6d. at 50s. 3d. Foreign descriptions show no change. West Indian crystallised remains at 42s. 6d., as also white Mauritius at 46s. 6d. White sugar quotations are:—October, 20s. 6d.; November, 20s. 6d.; December, 20s. 7½d.; January, 20s. 9d.; March, 20s. 10½d.; and May, 20s. 10½d.

Coffee.—There has been no alteration in prices. East Indian remains at 116s., Costa Rica is 112s., and Nairobi 100s.-102s. The futures market has been quiet. Quotations are:—December, 61s.; March and May, 60s.

Desiccated Coconut.—The position shows no material alteration from last week. The market demand has improved.

Rice.—The market has declined, very few offers having been forthcoming during the week.

Green Fruit.—The South African orange season has almost terminated. Very few arrivals have come to hand this week. Taking the fruit as a whole the condition during the season has been much better than has been known for several years. The final shipments of Naples lemons are arriving. Attention has now been directed to Malayas, which have met with a firm market. The demand for onions has improved, while arrivals are dearer.

Dried Fruit.—Wholesale and retail prices for dried fruit are showing large advances, and retailers are buying very cautiously. It is impossible to foretell what quotations will be at Christmas time, but it is estimated that currants will be 11d. to 1s. a lb., as compared with 8d. to 9d. in normal times; raisins, 1s 2d. to 1s. 9d , as compared with 9d. lb., and sultanas, 1s. 8d. to 1s. 10d. a lb., as against 1s. 4d. lb., Turkish figs are at prohibitive prices, as also are Smyrna sultanas.

Oilseeds.—There has been a further advance in quotations. Indian linseed has gained 3d. at 19s. 7½d., and La Plata is 6d. up at 18s. 4½d. Rapeseed has been quiet, but steady. Toria is unaltered at 17s. 1½d., as also bold Ferozepore at 16s. 6d. Cottonseed has been firm. Egyptian black is 10s., Sakellarides has come to business at 9s., and Indian is firm at 8s.

Oils.—An unsteady tone prevails. Linseed oil has shed 6d. at 38s. Crude rape oil and refined are unchanged at 41s. and 43s. respectively. Cotton oil has been variable. Egyptian and technical are firm features at 34s. and 37s. respectively. Refined and deodorised have both advanced 2s. at 43s. and 48s. respectively.

Oilcakes.—A general downward tendency has been the feature of the week. Coconut cake and cottonseed cake have shed 20s. and 10s. at 180s. and 140s. respectively. Cottonmeal cake has dropped 20s. at 220s., while linseed cake has advanced 10s. to 250s.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated October 2:—

Season.—September 25 to 27.—Heavy rains in North Bengal. Heavy rains also in the adjoining district of Assam on September 25. Elsewhere rainfall was very scanty on these days. September 28 and 29.—Monsoon strengthened in the interior of Peninsula. September 30.—Increase of rain in Burma and Central and North Madras. October 1.—Rainfall extended in Upper Burma.

Condition of Crops.—September 29.—Bombay situation is now fairly satisfactory, except in East Deccan and Karnatak, where situation is slightly relieved by scattered rain; but rabi crops, including wheat, cannot be planted yet over very large areas in these tracts. In Central Provinces, rice and sesamum prospects are good to very good. In Bengal, good rains have assured satisfactory paddy crops. In Bihar and Orissa, paddy is normal and sugar-cane fair. In United Provinces, sugar-cane good to excellent, and rice good.

Markets.—September 28.—Bombay cotton market weak. Fine M.G. Ooomras Rs. 346 December-January. September 30.—Corner in Oomras section reported in cable of September 19 has terminated. Bombay cotton arrivals from September 1 to 22, 1922, were 28,000 bales, as compared with 105.000 bales during the same period of last year. Bombay imported piece-goods market unchanged. Local goods quieter, and prices are declining. September 26.—Calcutta jute market steady, with fair demands. Hessians and heavies quiet. Market subsequently closed on account of Puja Holidays. September 29.—Rangoon rice market continues very dull. Small mills qualities Rs. 485. Boat Paddy Rs. 190. September 25.—Shellac market very quiet. Closing price of T.N. Rs. 130 sellers. Tea sale took place on September 26, but details are not available yet. No change in bank-rate.

A further cable, dated October 3, states that at the tea sale on September 26 qualities showed slight improvement, particularly in Dooars. Tea market strong for all grades and generally dearer. Medium Brokens and Dooars half-anna dearer, Medium Fannings 1 to 2 pies, and common broken Pekoes and Souchongs, which were in strong demand, 6 to 9 pies dearer. Leaf tea and dusts steady. All markets interested and buying general. This sale's average price was 11 annas 6 pies per lb., against last week's price of 11 annas 4 pies. 335,887 packages sold to date, at an average price of 11 annas 1 pie per lb. Next sale will be on October 10.

DRIED FRUIT REPORT.

Political Handicap on Trade.

Messrs. J. C. Houghton and Co., of Liverpool, report as follows under date October 3:—

The Near East political disturbance, with the continued uncertainty of the position and the extremely meagre supplies coming forward, is seriously handicapping the trade, which at this season of the year should be in full swing.

Currants.—Since our last issue of September 15 we have experienced two very active weeks. The Gulf of Suez arrived on September 17, but only a very small proportion of her cargo was available for the market—the bulk having been disposed of afloat—and this met a ready sale at advancing prices. Patras, cleaned, ¼ cases, 80s. to 82s.; Vostizza, ¼ cases, 87s. to 92s. The quality of the fruit is excellent both as regards condition and colour. The Sitra followed on September 29, and as in the case of the previous steamer, her cargo had practically been disposed of before arrival at prices ranging from 80s. to 82s. for ¼ cases of Patras and Zante, the little remaining realising: Pyrgos, 83s.; Amalias, 85s., 86s. The next steamer Cavallo, due at the end of the week, has also been disposed of on a forward basis. The Malia left Patras on September 28 with 2,000 tons. Old fruit has been in active demand and prices have advanced rapidly, up to 84s. being paid for shade-dried Vostizza.

Valencia Raisins.—The reports from Spain of the excellence of the quality of the 1922 crop were fully borne out when the cargo per Torres y Bages, the first of the season, discharged. Opening prices were ½ boxes, 85s. to 90s., and ¼ boxes, 95s. to 115s. Menevian and Italia are discharging and parcels are changing hands at about late rates. Australian Lexias selling slowly, 80s.

Cape raisins are showing exceptional value, and have been in demand at improving prices. Faced, 65s. to 70s.; 1st grade, unfaced, 60s. to 65s.; 2nd grade, unfaced, 58s. to 60s.; 3rd grade, 55s. to 57s.

Sultanas.—The news of the destruction of Smyrna came as a thunderbolt to the trade. Until this event it was felt that some means would be found to ship the crop to England, but it then became obvious that further shipments were impossible, and that the Cavallo and Karnak, due this month, would be the last steamers. The necessity of securing the scanty supplies available which were considered altogether inadequate to meet the normal Christmas inquiry put prices up rapidly, and the demand has been extraordinary, the extreme price of 180s. being paid for sulphured variety afloat, old fruit changing hands up to 145s. Afghan sultanas have also benefited in the advance. Latest prices are 85s. to 90s. Reds; 95s. to 115s. Yellows.

Cape Sultanas.—Appreciating in values, sales were Sun-dried, 95s. to 110s.; and Sulphured, 125s. to 130s.

California soda bleached on the spot selling up to 120s., and for September/October shipment a very large business has been in evidence at 61s. to 78s. c.i.f.

Figs.—We are still without supplies, Cavallo bringing the one and only shipment from Smyrna. This steamer has called at Spain, and is not expected for a day or two. Very high prices are expected when her cargo is available. Valencias and Malaga are selling at 40s. to 50s.

CURRENT PRICES.

General Produce.—Bacon (Continental), 138s. 6d. per cwt.; (Canadian), 123s. cwt.; (American), 104s. cwt.; butter (Danish), 223s. cwt.; (Australian), 199s. cwt.; (New Zealand), 216s. cwt.; cheese (Canadian), 94s. cwt.; (New Zealand), 94s. cwt.; lard, 74s. cwt.; eggs (Danish), 24s. per 120 (Styrian), 18s. 6d. per 120; chillies, 140s. cwt.; cloves (Zanzibar), 1s. 3½d. lb.; cocoa (Ceylon good to fine), 81s. 6d. cwt.; coffee (Costa Rica), 117s. 6d. cwt.; (East Indian), 115s. cwt.; (Central American), 95s. cwt.; (Jamaica), 74s. cwt.; (Mocha Longberry), 100s. cwt.; (Santos superior), 73s. 9d. cwt.; (Nairobi), 101s. cwt.; ginger (washed Cochin), 50s. cwt.; nutmegs (110's to 80's), 1s. lb.; pepper (Singapore black), 3¾d. lb.; (Muntok white), 6¼d. lb.; pimento, 2⅛d. lb.; raisins (Valencias), 102s. 6d. cwt.; currants (Vostizza), 95s. cwt.; currants (Amalias), 84s. 6d. cwt.; sultanas (Smyrna), 160s. cwt.; sugar (Tate's cubes), 55s. cwt.; (Lyle's granulated), 48s. 10½d. cwt.; (Mauritius crystals), 45s. 9d. cwt.; (West Indian crystallised), 43s. 6d. cwt.; (centrifugal), 15s. 9d. cwt.; tapioca (Fair Singapore), 2½d. lb.; rice (Rangoon No. 2), 15s. 4½d. cwt.; bran (Rangoon), £6 8s. 9d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 1s. 11d. lb.; tea (Indian common to good common), 1s. 1½d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 10d. lb.; Ceylon (common to good common), 1s. 1¾d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 9½d. lb.; Java (common to good common), 1s. lb.; wheat (English white), 40s. qr.; wheat, (Australian), 52s. 4½d. qr.; oats (English), 27s. 6d. qr.; oats (La Plata, ex-ship), 27s. qr.; maize (La Plata), 40s. 1½d. qr.; flour, 37s. 6d. sack.

Chemicals.—Acids: Boric, 61s. cwt.; oxalic, 7½d. lb.; citric, 2s. 0½d. lb.; tartaric, 1s. 3d. lb.; ammonia (sulphate), £15 16s. 6d. ton; arsenic (white powdered), £46 10s. ton; benzole (standard), 1s. 9½d. gallon; bleaching powder (35 per cent.), £12 ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 107s. 6d. cwt. Potassium: Bichromate, 6¼d. lb.; chlorate, 4½ lb.; caustic, £30 5s. ton; nitrate, £37 10s. ton; permanganate, 8d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £13 5s. ton. Sodium: Crystals, 110s. ton; bi-carbonate, £10 5s. ton; bichromate, 5½d. lb.; alkali (58 per cent.), £8 1s. 3d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £20 2s. 6d. ton; hyposulphite, £15 10s. ton; prussiate, 11d. lb.; nitrate, £13 7s. 6d. ton; glycerine (crude, 80 per cent.), £48 ton; (industrial, 1260 per cent.), £87 10s. ton; lemon oil, 2s. 8½d. lb.; quinine, 2s. 2d. oz.; red lead, £37 17s. 6d. ton; white lead, £40 10s. ton; white ground lead, £49 2s. 6d. ton; sulphate of copper, £26 5s. ton; sulphate of iron, 55s. ton.

Metals.—Aluminium, £100 ton; antimony (English Regulus), £27 12s. 6d. ton; bismuth, 10s. lb.; copper (standard), £62 18s. 9d. ton; copper (electro), £72 ton; gold bars, 93s. 10d. oz.; iron (No. 3 Cleveland), 93s. 9d. ton; hematite (mixed number), 90s. 6d. ton; galvanised sheets (25 G), £16 10s. ton; lead (soft foreign), £24 18s. 9d. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 40s. unit; nickel, £145 ton; platinum, 500s. oz.; graphite (80-90), £13 2s. 6d. ton; quicksilver, £13 2s. 6d. bottle; spelter (G.O.B.), £32 8s. 9d. ton; tin (standard), £163 8s. 9d. ton; wolfram, 14s. 3d. unit; zinc sheets, £37 10s. ton; tin plates (20 by 14), 18s. 9d. box; silver bars, 35 5-16d. oz.

Miscellaneous.—Cotton (American), 12.45d. lb.; Egyptian (Sakel), 16.15d. lb.; jute (first grade), c.i.f., £33 17s. 6d. ton; jute (lightnings), £31 7s. 6d. ton. Oilseeds: Linseed (La Plata), £18 1s. 3d. ton; palm kernels, £16 11s. 3d. ton; castor seed (Bombay), £16 15s. ton; sesame seed (China), £21 17s. 6d. ton; olive (Spanish), £75 10s. ton; rape (crude), £40 10s. ton; soya, £34 5s. ton; petroleum, 1s. 2½d. gallon; petrol, 1s. 8d. gallon; fuel oil (ex-tank), 65s. ton; coconut (Ceylon), £36 12s. 6d. ton; cotton (crude), £32 10s. ton.

COMPANY NOTES AND REPORTS.

Lake Copais.

The report of the Lake Copais Company for 1921 shows the net profit in Greece was £17,568. The actual profit in drachmæ was again considerably in excess of that of the previous year, but the result in sterling was seriously reduced by the fall in exchange during the year. After adding London revenue and balance at credit of "A" debenture stockholders' interest account and providing for London expenses, etc., there remains a balance of £14,417. The financial scheme for the provision of funds required for essential capital works submitted at meetings in July last having been unanimously approved, the directors propose that the balance of £14,417 at the credit of profit and loss be appropriated by transferring £9,900 to credit of "A" debenture stockholders' interest account and £4,517 to credit of "B" debenture stockholders' interest account, and they recommend the distribution from these accounts of 5 per cent. (less tax) on "A" debenture stock and of 2 per cent. (less tax) on "B" debenture stock, both payable in fully-paid 5 per cent. "A" debenture stock of the company at par. There will remain a balance of £342 to be carried forward at the credit of "B" debenture stockholders' interest account.

The area of land cultivated was 29,516 acres, a decrease of 2,962 acres, due principally to the flooding of land in the centre of the estate. Flooding also caused the failure of the crops on 5,103 acres of area sown. Consequently the area from which crops were harvested was reduced to 24,413 acres, being 5,032 acres less than in 1920. Prices in drachmæ of agricultural produce were substantially higher than in the previous year, due chiefly to the fall in the exchange. The capital expenditure during the year on the flood prevention and irrigation works, threshing machinery, workshop plant and additional buildings, amounted to £26,294. Owing to the flooding during the winter months, followed by a spell of abnormally dry weather, the area of the crops harvested was again reduced, and the results of the current year will be disappointing. Higher prices in drachmæ are expected to compensate to some extent for the increasingly heavy fall in exchange.

Oilfields of Egypt.

The report of the Oilfields of Egypt, Ltd., for the year ended March 31 states that during the year under review drilling operations were continued on the Ras Dhib and Ras Bahar areas. The two boreholes which were being sunk at Ras Dhib in March, 1921, were carried to a depth of 577 and 786 feet respectively by March 31. A well was commenced at Ras Bahar in February, 1922, and at the end of March last had reached a depth of 483 feet. Progress during the year was necessarily very slow owing to the extremely hard formation encountered. Developments down to the date of balance-sheet had not proved the existence of oil in commercial quantity, although small shows of oil were encountered at various depths during drilling operations. Since the accounts were made up, field work has been pushed forward as rapidly as the nature of the ground permits, but the results achieved are not yet conclusive, and deeper drilling will be necessary to prove productiveness of the lower strata. In accordance with the usual practice the whole of the general expenditure in Egypt and in London, less interest, etc., has again been carried to development account. The meeting will be held at Winchester House, Old Broad Street, E.C.2, on Monday, October 16, at 12 o'clock noon.

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on September 29 were as follows:—Agricultural Bank of Egypt, £5 3-32; Alexandria Water Company, Ltd., £8¾; Anglo-American Nile Steam, £3⅛; Associated Cotton Ginners, £15-16; Banque d'Orient, 46 fr.; Behera Ord., £E7⅝; Brasseries d'Egypte, 70 fr.; Building Lands of Egypt, £31-32; Cassi di Sconto Priv., 94 fr.; Comptoir Fin et Com. d'Egypte, £1¼; Consolidated Lands, £T7; Credit Foncier Fondateur, 1025 fr.; Credit Foncier Act, 702 fr.; Credit Foncier 1886 Oblig., 314½ fr.; Eaux du Caire, Capital, 87½ fr.; Eaux du Caire Jouissance, 116 fr.; Egypt and Levant, S.S. Ord., 31s.; Egyptian Delta Light Railways, £4 13-16; Filature National d'Egypt, £10⅛; Immeubles d'Egypte Soc. an des., £6 15-16; Khedivial Mail S.S. Ord., 100s.; Khedivial Mail S.S. Company Pref., £3½; Kom Ombo Ste an de Wadi, £4⅛; Kom Ombo Ste An Fondateur, £32; Land Bank of Egypt, Parts de Fond, £46; Lots Turc., £42¾; Menzaleh Canal Navigation, £T267; Grand Hotels d'Egypte, £8 5-16; Ramleh Railways, £3 9-32; Urbaines et Rurales, £4; Union Fonciere Fond., £½.

Cotton and Cotton Goods.

MANCHESTER COTTON MARKET.

Trade at a Standstill

(*From Our Own Correspondent.*)

Manchester, Saturday.

A featureless state of affairs has continued to prevail in the market during the past week. There has been nothing to cause buyers to operate on a freer scale, and it is very evident that no developments of importance can be recorded until the political situation in the Near East is much more settled. Towards the latter end of the week the tone tended to grow better with the more favourable news from Turkey, but all talk of a possible war will have to cease before buyers have enough confidence to commit themselves to any lines of weight. There is no doubt that the industry at the moment is in a very bad condition, and it is significant to see a movement started by spinners outside the Masters' Federation to adopt means whereby the present depressing state of affairs can be overcome. During the week important statistics relating to the American cotton crop were published, but the figures were much as expected, and no important change in values has been recorded. With regard to the cloth section only small sales have taken place for Egypt. Trade with Constantinople and the Levant has naturally been at a standstill. American yarn quotations have been irregular, and home users have only purchased sparingly. Cloth buyers for India have not operated on any freer scale. The reduction in freight rates to Bombay and Karachi is welcomed. Small transactions have taken place for certain minor outlets. Spinners of American yarns have had a poor week, and no relief has been obtained. Buyers have had matters all their own way. The short-time movement is not having any effect on prices.

THE EGYPTIAN MARKET.

Distinctly Weaker Tendency.

The Commercial Company of Egypt, in their report for the week ended September 22, state:—

Since our last report the futures market has been distinctly weaker. What has principally contributed to this week's decline is the continued poor demand from abroad, the weakness of the American markets, and, finally, the unsatisfactory news about the political situation in the Near East. Spinners' orders continue very limited; in normal years September used to witness an extensive business for ahead deliveries, with November contracts in demand against exporters' sales to spinners, thereby counterbalancing selling of hedges by growers.

The long-expected trade revival does not yet appear to be coming; people are short of money, and the heavy fluctuations of the Continental exchanges impede business. The decline of American is due to the recent more favourable crop reports. The definite abolition in the United States of America of the import duty of 7 cents per lb. on all foreign unmanufactured cottons of 1⅛-in. staple and over has not had, so far, any effect on our market, but this must be attributed to the fact that the announcement of the abolition has not been followed by any orders, also because of the existing large stocks of cotton coming under this category. The uncertainty of future events in the Near East has induced certain of the speculative element to go short, and the rest keep aloof pending developments. The position, taken on the whole, does not present itself as bullish; however, we consider the actual level of prices fairly reasonable, and do not think a severe break probable for the time being.

Spot.—A fairly good business has been done at Minet-el-Bassal this week, and sales amount to about 12,900 B/s, of which we estimate 6,600 B/s Sakellaridis, 6,100 B/s Uppers, 100 B/s Brown and 100 B/s White. Arrivals are increasing rapidly; new Sakellaridis is appearing more freely, and is being fairly rapidly absorbed, and extra class Sakellaridis has been sold to-day at quite a high premium, though Good is offered very reasonably. A fair amount of Menoufieh (fine staple district) cotton has been shown, and we have seen Fully Good, Fair to Good, already at this early date, a fact which may point, in our opinion, to an eventual comparative scarcity of really high grades. The staple of present arrivals from the Menoufieh seems to us fairly good, as it was last year at this time, but it is early yet to hold a definite opinion.

Sakellaridis.—All styles have been dealt in, and a good deal of high-grade new crop has changed hands. In the medium styles the basis is a little dearer, otherwise it is without quotable change.

Uppers.—A good business has been done in all styles. The bulk of the business has been in good and medium grades, the scarcity of lower grades preventing an actual large turnover. Medium styles are rather dearer on basis, but good grades are cheaper.

Brown.—A small business has been done without change in basis.

White.—A small business has been done at a much dearer basis than last week. The high grades, Good, Fully Good, and Extra, have been sold at a considerably dearer basis than corresponding styles of Sakellaridis. The smallness of supply prevents a large turnover.

Crop.—Basing ourselves on information obtained and on the results of our personal inspections, we give as a preliminary estimate that the total production of the 1922 crop will amount to about four and a-half million cantars (4,500,000 cantars). Naturally this figure is liable to alteration dependent upon the climatic conditions during the next five weeks. With regard to stock held in the interior on August 31 last, it is very difficult to obtain accurate figures; we think, however, that an estimate of from one to two hundred thousand cantars is near the mark.

LIVERPOOL REPORT.

Improved Inquiry.

Messrs. Reynolds and Gibson report as follows for the week ended October 4:—

Quite a fair inquiry has again been witnessed during the past week. Spot sales, however, are still shrinking, and quotations again display a downward tendency. This is hardly surprising when one considers the parlous condition to which trade has sunk, and the many adverse influences at work which seem likely to prevent any immediate improvement. Although the political horizon has cleared considerably, the clouds overhanging the Near East are by no means dispelled, and the feelings of depression and uncertainty which they have caused are still being felt throughout the commercial world. The American Bureau report of a 50 per cent. condition crop, issued yesterday, was only mildly "bullish" and fell very flat, so that little support has been received from a quarter whence perhaps more was expected. A provisional estimate of 4,500,000 cantars for the Egyptian crop has been received from the Commercial Company, of Egypt. This implies a crop of approximately 625,000 bales, to which must be added a carry-over "up country" of about 25,000 bales, and a stock in Alexandria on August 30 of approximately 200,000 bales. In Liverpool and Manchester on the same date there were approximately 75,000 bales, the Continent housed yet another 10,000 bales, and the U.S.A. another (say) 40,000 bales. These figures are, if anything, on the conservative side, so that approximately 1,000,000 bales of Egyptian cotton are available for the current season. At the rate of consumption to which we have become accustomed during the past two seasons, this figure seems a very large one.

The one bright spot at the moment is the pronounced improvement which has been manifest during the past few days in the amount of c.i.f. business transacted. The official report to-day stated that a "good business" had been done in Egyptian cotton for forward delivery, and this is a somewhat remarkable admission, as, for various reasons, information on this subject is difficult to acquire from those immediately concerned. Certain it is that spinners are taking a considerable amount of interest in the c.i.f. basis at the moment. Receipts are pouring into Alexandria, and, possibly, the very weight of cotton, to which we have referred above, may eventually prove to be the salvation of the trade. The Alexandria market now stands at a discount as compared with Liverpool, and shippers' quotations are becoming increasingly attractive. Uppers still appear to be the cheapest proposition offering, and evidence of this is noticeable in the increased inquiry for this cotton which has been met with during the week. Sudan cotton has fallen somewhat from favour, but low cotton (6d. to 10d.) and Sakellaridis (15d. to 17d.) still bulk largely in the demand from day to day. Manchester reports have been singularly dull and lifeless, and little encouragement is to be gleaned from them. Total sales, 1,500 (includes 150 Sudan). Quotations of upper and brown show a decline of 10 points. In Sakellaridis, fair, good fair, and fully good fair are reduced 10 points. Good and fine are 35 points lower, and extra fine is exceptionally 60 lower on the week. Fully good fair Sakellaridis, 17.15d.

The traffic receipts of the Egyptian Delta Light Railways for the week ended September 10 amounted to £E7,629; total for the year £E126,909. For the corresponding period of last year receipts amounted to £E10,067. Total for the year, £E149,328.

The Cotton Trade Review of the Imperial Ottoman Bank will be found on page 431.

SPECIAL MARKET REPORTS.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Constantinople, September 25.

Sugar.—The market is quiet. There have been no arrivals this week. Prices in centres of origin and here are practically unchanged.

Coffee.—A firm tone prevails. Quotations (per oke in transit): Rio 1, Ps.65; Rio 2, Ps.62; Rio 3, Ps.60; Rio 4, Ps.58.

Flour.—The market is firm. 57 tons have arrived from Bulgaria and 30.642 tons from America. Quotations (per sack of 64 kilos.): Nelson, Ps.940; Durun, Ps.725. Native flour is Ps.640-650 per sack of 72 kilos.

Nablus, September 9.

The market is quiet at the moment, and will take on an aspect of increasing activity from November with the beginning of the arrivals of olive oil for the supply of the large soap factories. Soap is the special industry of this town. This commodity is exported to Palestine and Egypt, where it is in great request. The export will enable us to have considerable business with Egypt. The market in cereals is dull. Prices are low, and the prospective demand from abroad is not such as to give rise to hopes of an approaching improvement of the position. Nablus being the chief centre of the district of Samaria, it is the frequent rendezvous of the inhabitants of the seventy villages in the neighbourhood who come to obtain clothing and colonial products.

Jerusalem.

The report for September states :—The German and Austrian goods imported in July were as follows: — Jerusalem, £88. This represents a decrease of £609 on the total for the previous month; Jaffa, £27,421, a decrease of £13,398; Haifa, £13,547, a decrease of £3,660.

The total value of imports to Palestine from Egypt during 1921 was £944,181, as compared with £569,726 in 1920, an increase of £374,455, whilst the exports to Egypt from this country were £733,195, as compared with £784,125, a decrease of £50,930.

In August about 500 tourists from America arrived in Palestine. This is a new feature of the tourist traffic to Palestine, tourists seldom venturing in summer. It may be taken as a sign of the increasing popularity of Palestine as a tourist centre.

During June 294,080 kilos of barley were exported from Gaza to Syria at an average price of 8 mms. per kilo, whilst 68,000 kilos were exported in July at an average price of 7 mms. per kilo. 1,400 tons of last year's crop are still available for export. The crop this year is estimated at 3,300 tons.

The importation of cattle from Madagascar, Roumania, and the Sudan is now being organised on a permanent basis in recognition of the fact that the local supply must be necessarily inadequate for years to come. According to the Department of Commerce and Industry, 12,440 head of cattle were imported during August.

In spite of the dry weather during the early summer months, the tobacco crop seems to be very successful. The majority of the varieties of seeds distributed by the Department of Agriculture yielded a good result, and it is expected that much larger areas will be sown with tobacco next year. The Director of Agriculture states that an average yield of 40 okes per dunum is expected, which is at the rate of approximately 500 kilos per hectare, and parts of the crop have been already sown at £T30 per oke.

Shipping Intelligence.

THE P. AND O. MOLDAVIA.

To-morrow the new P. and O. mail steamer Moldavia leaves Tilbury Dock on her first voyage to Australia. The Moldavia was built by Messrs. Cammell Laird and Co., and has been given the name of a P. and O. steamer which was lost in the war. The vessel presents a variation from the type of ship hitherto designed for the company's Australian service. The Naldera and the Narkunda, the latest of the P. and O. liners, are both of approximately 16,000 tons gross, and have a length of 605 feet, accommodation being provided on four decks for 688 first and second saloon passengers. The Moldavia (and the Mongolia, a sister ship), while of the same tonnage and length, provides accommodation for only 222 first and 175 second class passengers, a total of 397, on three decks. The principal difference is that while in the Naldera class the main deck and the three decks above it are devoted to passengers' various uses, in the Moldavia class the passenger accommodation is carried above the upper deck, on the promenade, shade, and shelter decks respectively.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. Circassia for Bombay (Liverpool, October 17).

Anchor Brocklebank Line.—S.s. Masirah for Calcutta (Birkenhead, October 18); s.s. Holywell for Port Said, Colombo, Madras, and Calcutta (London, October 21); s.s. Magdapur for Calcutta (Birkenhead, October 30); s.s. Maidan for Port Said, Colombo, Madras, and Calcutta (London, November 7).

Bibby Line.—S.s. Herefordshire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, October 25); s.s. Dorsetshire for Rangoon (Middlesbrough, October 27).

British India Line.—S.s. Mandala for Colombo, Madras, and Calcutta (London, October 13); s.s. Matiana for Bombay and Karachi (London, October 20); s.s. Mantola for Colombo, Madras, and Calcutta (London, October 27); s.s. Mulbera for Bombay and Karachi (London, November 3); s.s. Morvada for Colombo, Madras, and Calcutta (London, November 10).

Byron Steamship Line.—S.s. Lord Harrington for Patras, Piræus, Constantinople, Sulina, Galatz, Braila, Volo, Salonika, Smyrna, Bourgas, and Varna (Liverpool, October 23).

Clan Line.—S.s. Clan Macgillivray for Colombo, Madras and Calcutta (Birkenhead, October 19); s.s. Clan Morrison for Malabar Coast and Tuticorin (Birkenhead, October 26).

Cunard Line.—S.s. Sea Serpent for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Manchester, October 24); s.s. Pavia for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piræus, Syra, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Poti and Batoum (Swansea, October 27).

Ellerman Line.—S.s. Destro for Gibraltar, Malta and Alexandria (Liverpool, October 14).

Ellerman, Bucknall, and Strick Line.—S.s. Frankenfels for the Persian Gulf (London, October 20).

Ellerman "City" Line.—S.s. City of Marseilles for Calcutta (Birkenhead, October 14); s.s. City of Exeter for Bombay and Karachi (Birkenhead, October 21); s.s. City of Cairo for Calcutta (Birkenhead, October 30).

Ellerman's "Hall" Line.—S.s. Karroo for Bombay, Karachi and the Punjab (Liverpool, October 12); s.s. City of Adelaide for Bombay, Karachi and the Punjab (Liverpool, October 31).

Ellerman's Westcott and Laurance Line.—S.s. Orlando for Gibraltar, Malta, and Alexandria (London, November 1).

Glen and Shire Line.—S.s. Carnarvonshire for Port Said, Port Swettenham, Singapore, etc. (London, October 19); s.s. Glenbeg for Port Said, Port Swettenham, Singapore, etc. (London, November 2); s.s. Glensada for Port Said, Port Swettenham, Singapore, etc. (London, November 16).

Harrison Line.—S.s. Matador for Calcutta (Liverpool, October 19); s.s. Director for Port Said, Port Sudan, Aden, Mombasa, Djibouti, etc. (Birkenhead, November 2).

Holt Line.—S.s. Glaucus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, October 19); s.s. Calchas for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, October 19); s.s. Mentor for Port Said, Port Swettenham, Singapore, etc. (Swansea, October 26); s.s. Myrmidon for Port Said, Port Swettenham, Singapore, etc. (Swansea, October 26).

Henderson Line.—S.s. Arracan (cargo only) for Port Said and Rangoon (Birkenhead, October 18).

Johnston Line.—S.s. Incemore for Piræus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, October 21); s.s. Peruviana for Piræus, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, November 4). (This steamer is the last sailing this season to the Danube.)

Moss Line.—S.s. Karnak for Gibraltar, Algiers, Malta, Piræus, Syra, Smyrna, Salonika, Constantinople, Bourgas, Varna, and Constantza (Liverpool, October 14).

Papayanni Line.—S.s. Falernian for Algiers, Malta, Syra, Smyrna, and Constantinople (Liverpool, October 21).

P. and O. Line.—S.s. Morea for Bombay (London, October 13); s.s. Nore for Colombo, Madras, and Calcutta (London, October 20); s.s. Malwa for Bombay (London, October 20); s.s. Kaisar-i-Hind for Bombay (London, October 27); s.s. Nyanza for Colombo, Madras, and Calcutta (London, November 3).

Prince Line.—S.s. Cyprian Prince for Tunis, Malta, Alexandria, Syria, and Cyprus (Manchester, October 14); s.s. Italian Prince for Malta, Alexandria, Syria, and Cyprus (London, October 21); s.s. Algerian Prince for Tunis, Malta, Alexandria, Syria, and Cyprus (Manchester, October 25)

[*Under the existing conditions it will be understood that these routes will not necessarily be followed in their entirety.*]

AGRICULTURAL SITUATION IN INDIA.

The India Office has issued the following communiqué:—

In September the monsoon gave good and very timely rains in Central and Northern India, and excessive rainfall in Bengal at the end of the month. Good wheat sowings are generally assured, but in the United Provinces of Agra and Oudh preparation of land for sowing has been hampered by excessive rain. Rainfall was below the average in the Peninsula, especially in Madras and Bombay Deccans and parts of Hyderabad. The agricultural situation is generally good, especially in the Central Provinces, Central India, North-West India, Rajputana, Bihar and Orissa, Assam and the west coast of Madras. Heavy rainfall has adversely affected prospects throughout the United Provinces of Agra and Oudh, and has caused considerable damage in parts of Bengal. In Madras and Bombay Presidencies the situation is generally satisfactory, except in the Deccan districts, where it is bad. Rain has, however, fallen in Madras Deccan since the report was received. Prospects are fair in Hyderabad, except in the south-west districts, which are suffering from drought. Burma reports are satisfactory, rain having fallen in the dry zone. Prices show a marked fall, especially in Northern India.

The offices of the Bank of Roumania are now at 64, Cornhill, E.C.

COMPANY MEETINGS.

Assam Railways and Trading.

The forty-second ordinary general meeting of the Assam Railways and Trading Co., Ltd., was held on October 4, at Winchester House, Old Broad Street, Mr. Sydney S. Hawkins, A.M.I.C.E., presiding.

The Secretary (Mr. S. Maclean Jack) having read the notice convening the meeting and the report of the auditors.

The Chairman, in moving the adoption of the report and accounts, said that the result of the year's working was not at all good, and for the first time for many years it was impossible to recommend a dividend on the "B" stock. For that result shareholders had been prepared by the remarks which he had made a year ago. Expenditure had greatly increased all round, the tea industry during the last season, 1921, had been suffering generally, and some of the company's large contracts for the supplies of coal were actually being filled at less than the bare cost price. The general revenue account showed that while they had been able to bring in a slightly increased income from the railway, the general trading revenue showed a very serious falling off, even compared with last year, which, in itself, had been a distinctly bad year. The result was that in the general revenue account they had a balance of £86,192, as compared with £87,045 last year. In order to pay the dividends on the "A" stock the board had brought into account a sum of £22,132, which represented various credit balances no longer required. He would make no forecast for the current year, but he hoped none would leave the meeting in an unduly pessimistic frame of mind. They had got increased railway rates commencing from April 1 last, the output of coal already showed healthy expansion, and there were now no coal contracts showing a balance on the wrong side of the ledger. Some people were inclined to be a little pessimistic about the whole future of India, but he certainly did not share that view. A short time ago he had heard of a rumour that the company's coal in those areas was becoming exhausted. There was no foundation whatever for any such statement. The company had turned out many tons of coal during the last forty odd years the old collieries had been working, but they still possessed more than twice as much coal as had been turned out since they had started, while the new colliery—the Burra Golai—had opened up an area of coal from two and a-half to three times greater than the total area developed from all the drivings in the old Tikak collieries. Though they might have temporary setbacks, no one need be at all pessimistic about the future, because, so far as material assets in the extent of its coal reserves could assure it, the future of the company was assured. The board had come to the conclusion, in view of the unfortunate results of the last two years, that one of its number should go out to Assam to go very carefully into all details of working and expenditure; he had undertaken the duty, and would leave for Assam the following day.

The report and accounts were unanimously adopted.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.)

Bulgaria.

Telephone Material.—The Bulgarian Directorate of Posts, Telegraphs, and Telephones at Sofia invites tenders for:—(1) The supply of cables and other material, and the transference of the existing underground cables to the new telephone exchange. (2) The supply of the material and the work involved in the extension of the network of underground cables. (3) The supply of the underground and armoured cables, including the runnings of the cables through the tubes as well as effecting their connection to the boxes and the ends of the cables to the exchange, etc. This section also deals with the supply of lightning conductors with aerial cables, and other material. (4) The supply of iron terminal standards with cable racks (main distribution poles). Tenders must be presented in Sofia by October 16 (D.O.T.).

India.

Railway Wagons.—The High Commissioner for India invites tenders for the supply of 3,000 railway wagons. Forms of tender may be obtained from the Director-General, India Store Department, Belvedere Road, Lambeth, S.E.1. October 17.

Wheels and Axles.—The Bengal-Nagpur Railway Company invites tenders for wheels and axles. October 16.

Steel Tyres.—The Madras and Southern Mahratta Railway Company invites tenders for 1,200 steel tyres for carriage and wagon wheels. October 17.

Bridges.—The Directors of the Bengal-Nagpur Railway Company, Limited, invite tenders for the supply of five-deck span girder bridges, 100-feet span. October 19.

Serge, etc.—The High Commissioner for India invites tenders for the supply of serge, navy blue, 54-in., and drills, twist, high speed. Forms of tender may be obtained from the Director-General, India Store Department, Branch No. 11, Belvedere Road, Lambeth, S.E.1. October 27.

Brass Boiler Tubes, etc.—The directors of the East Indian Railway invite tenders for the supply of: (1) Brass boiler tubes and copper pipes. (2) Copper firebox plates. (3) Locomotive boilers, etc. Nos. 1 and 2 on October 18, and No. 3 on October 25.

Engines.—The directors of the Burma Railways Company, Limited, invite tenders for the supply of: (a) Five engines and tenders (superheated "Mallet" type). (b) 262 steel tyres for engines and tenders. (c) 4,006 steel boiler tubes and pipes for engines. Tenders close: (a) Friday, November 3; (b) and (c) Tuesday, October 17.

Egypt.

Uniforms and Stores.—The Postmaster-General, G.P.O., Alexandria, invites tenders for the supply of uniforms and general stores for the financial year 1923-4. Specification can be obtained from the office of the Egyptian Government Representative, Queen Anne's Chambers, Broadway, Westminster, London, S.W. November 15.

Canvas Money Bags.—The Central Stationery Stores Department of the Egyptian Ministry of Finance invites tenders for the supply of canvas money bags as follows:—3,500 large size 11 in. by 15½ in., stamped "Egyptian Government" in black; 6,000 medium size 11 in. by 14¼ in., stamped "Egyptian Government" in black. Sealed tenders, on the proper forms, to be addressed to the Director, Central Stores, Ministry of Finance, Cairo. Tenderers must submit with their offers sealed samples in duplicate of the goods which they propose to supply. November 4 (D.O.T.).

Electric Cranes and Lifts.—The Administration of Ports and Lighthouses, Alexandria, invites tenders for the following fixed and movable lifting apparatus for service at the Port of Alexandria:—

Eight travelling electric portico quay cranes, six of which are to be of 2,500 kilogs., the other two being double-power cranes of 2,500-5,000 kilogs.

Eight travelling balcony cranes of 500 kilogs.

Eight electric lifts; maximum carrying power, 1,500 kilogs.; speed per second, 0.50 metre.

Supply and laying 320 metres of rails for the running of the quay cranes.

Supply and laying of 280 metres of rails for the running of the balcony cranes.

(The electric power will be furnished by the Railways Administration's Power Station, as three-phase current at 220 volts. 40 cycles.)

Sealed tenders are to be addressed to the Directeur-Général, Administration des Ports et Phares, Alexandria, Egypt, and will be received up to noon on December 20. (D.O.T.)

Clothing, etc.—The Lunacy Division, Abbâsîya, invites tenders for the supply of clothing, bedding, furniture, hardware, slippers, brushes, and other household necessaries required for Abbâsîya and Khanka Asylums for one year from April 1, 1923. November 21.

Iraq.

Ordnance Stores.—The Ministry of Defence in Baghdad invites tenders for the supply of annual stores required by the Iraq Army Ordnance Department. The stores are divided into three sections, as follows:—

Section 5a.—Packsaddlery, harness, and miscellaneous stable requirements, such as nose-bags, brushes, curry combs, horse-rubbers, etc.

Section 6a and 6b.—Officers' saddlery, universal saddlery, and various articles for repair, including buckles, curb chains, etc.

Section 11b.—Pickaxes, crowbars, intrenching implements, brass and copper sheet, mild steel flat and bars, brass and copper wire, etc. A telegram has been received from the Ministry of Defence, Baghdad, to the effect that, in view of the representations made by the Department of Overseas Trade in the matter, the closing date fixed for the receipt of the above tender has been postponed to November 20.

At the eighty-second ordinary general meeting of the Peninsular and Oriental Steam Navigation Company, to be held at the company's offices on October 18, at 11 a.m., the directors, after providing for the usual dividend at the rate of 5 per cent. per annum on the preferred stock (less income-tax), will recommend a dividend on the deferred stock of 6 per cent. for the six months (free of income-tax) making, with the interim dividend of 6 per cent. paid in May, a total distribution on the deferred stock of 12 per cent. for the year. Dividend warrants will be posted on November 14.

NOTES OF THE WEEK.

Agreement at Mudania.

After one or two tense moments, when Ismet Pasha declared that the revised protocol of the Armistice was not what he had been led by General Charpy to expect, and one final period of anxiety caused by delay in the receipt of the Turkish reply, an agreement was signed at Mudania on October 11 by the Allies and the Turkish Nationalist representative. The Greek representative declined to sign without positive instructions from Athens, but he was later instructed to do so, under protest in regard to certain points. The terms of the Convention came into force on Saturday at midnight, and already the evacuation of Thrace by the Greek troops has begun, under the supervision of Allied detachments. It is most desirable that no time should be lost in convening the Conference that is to draw up the treaty of peace. The position in Asia Minor is not ideal, for the Kemalist army is likely to chafe under inaction. Now that the Greeks have been eliminated from Turkish territory it may resent being kept under arms doing nothing; but Mustapha Kemal is obliged to keep his armed forces up to their maximum strength. Provided that the Mudania terms are scrupulously observed by the Angora Government, we should like to see the Allies, acting together, go a little way beyond the letter of the agreement in an attempt to facilitate a return to normal conditions in Turkey. In the first place, there is the position of the Sultan and Mustapha Kemal's relations with the Constantinople Government. It is as much in the interests of the Allies as in those of Turkey that the country should settle down as smoothly as possible immediately after the peace conditions become applicable. Allied mediation might prove invaluable in this respect.

The Transfer of Constantinople.

A special problem is presented in the Allied withdrawal from Constantinople when the time comes for that step. We are convinced that nothing could be more dangerous than that on one and the same day the whole of the administration should pass from Allied to Turkish hands. However correct the intentions of the Kemalists might be, there will be a considerable amount of excitable material in the city, and regrettable incidents might easily occur. The risk would be considerably reduced if the Allies could arrange to spread the transfer of the administration over a comparatively long period. The Turks may not be willing to agree to this, if the period is to begin after the Treaty comes into force. It may, therefore, be worth the Allies' while to consider whether they cannot almost at once set about establishing a complete understanding between the Angora authorities and the Porte with a view to the gradual handing over of the civil administration on lines that have some prospect of proving permanent. Much will depend on the manner in which the subject is approached, and in this connection the past achievements of General Harington and Sir Horace Rumbold are of the best possible augury.

The Iraq Treaty.

The signature of the Iraq Treaty is a matter for congratulation to both the contracting parties. It will be remembered that for a long time the question of the Mandate—the name rather than the substance—was the point at issue. Both the British and the Iraq Government were agreed that a Treaty should embody the relations between the two countries under the mandatory system; but while the British Government was prepared to omit any reference to the Mandate from the Treaty, King Faisal was anxious to have it stated in the preamble that the Treaty replaced the Mandate. The British Government considered itself prevented by its commitments to the League of Nations from agreeing to this proposal. A compromise has been found in an undertaking on the part of Great Britain to facilitate the admission of Iraq to the League of Nations as a preliminary step to the cancellation of the Mandate. As soon as the frontiers of the country are settled and a stable government set up in accordance with the Organic Law provided for in the Treaty, the good offices of the British Government will be used, "provided that effect is being given to the provisions of the Treaty, to secure the admission of Iraq to membership of the League, which affords,

Digitized by Google

in their opinion, the sole means by which the mandatory relation can be legally terminated." No time should now be lost in settling the frontiers of Iraq, in order that the charge of delaying the time for admission to the League of Nations may not be laid at Great Britain's door.

The Roumanian Coronation.

The Coronation of the King and Queen of Roumania took place on Sunday at Alba Julia, the ancient capital of Dacia, where four years ago was proclaimed the union of Transylvania with Roumania. The ceremony was extremely picturesque, and those who were privileged to witness it are not likely to forget it. Unfortunately the number so favoured was apparently very much smaller than it might have been, owing to extreme caution on the part of the Roumanian police. Doubtless this nervousness is attributable to the discovery of the Magyar plot to which our Bucharest Correspondent refers in his letter this week; but the result was unfortunate, inasmuch as it meant the exclusion of large numbers of peasants who, given the opportunity, would have shown themselves loyal subjects of King Ferdinand and Queen Marie. Their Majesties were, we suspect, not very wisely served in this respect; but they have the satisfaction of knowing that the mass of the peasants are loyal to the core; while their reception at Bucharest was hearty enough to make up for all shortcomings.

The Emir Abdullah.

The Emir Abdullah of Transjordania arrived in London last Saturday evening, accompanied by his Prime Minister and by Mr. St. John Philby, his chief British Adviser. The visit is in connection with Transjordanian affairs, which present certain problems that are likely to prove more easy to solve by personal discussion than by exchange of telegrams and dispatches; and to an interviewer the Emir has expressed himself as very hopeful regarding the future of his country. To the ordinary Englishman the Emir will be welcome as one of the first of the Arabs to throw in his lot with the Allies, and as one who at Taif and elsewhere distinguished himself in action against the Turks. It is to be hoped that his visit will prove pleasant to him, and that on the practical side, the settlement of outstanding questions, it will be rich in results.

The Dodecanese.

Italy has notified Greece that, in view of the forthcoming Peace Conference, the agreement relating to the cession to Greece of the islands of the Dodecanese must be regarded as invalid. This will, quite naturally, cause intense excitement among Greeks; but probably it does not denote that Italy has made up her mind to retain the islands permanently, but merely that she is thinking of a fresh bargain. It must be remembered that the Treaty of Sèvres recognised Italy's full sovereignty over the islands, and that at the same time a supplementary Greco-Italian Treaty transferred the islands, except Rhodes and Castellorizo, to Greece in return for her recognition of certain Italian claims in Asia Minor. Obviously, the course of events since then has materially altered the situation: Greece can do nothing for Italy in Asia Minor, and the Treaty of Sèvres is as dead as Queen Anne. Nevertheless, it is to be hoped that Italy and Greece between them will be able to reach a decision regarding the islands which shall satisfy Greek hopes and give content to the islanders. For to have had the prize promised, as it has been, and then to have it snatched away would be tantalising indeed. The case, it may be noted once more, is by no means on all fours with that of Cyprus, as is shown by the fact that the Turkish Government, which has never expressed any hope of recovering Cyprus, is already expressing a hope that it may recover the Dodecanesian islands.

The Case of Major Neate.

The Bulgarian Government has apologised to the Inter-Allied Control Commission for the very unfortunate incident at Philippopolis on September 19, when Major Neate, a British officer, was arrested in circumstances which have been fully set out in our columns. Several officials have been dismissed for their share in the incident, the commander of the garrison at Philippopolis has been suspended for a month, and inquiries are still being conducted. Regarded as evidence of goodwill, these things are satisfactory, but it is still difficult to understand how subordinate officials can have ventured, on their own responsibility, to take such a serious step as to interfere with two Allied officers in the execution of their clear duty. It is reassuring to learn that the Bulgarian General Staff, acting on instructions from the Government, has issued stringent instructions that henceforth members of the Inter-Allied Commission are to be given any information they may desire.

Russian Refugees in Constantinople.

The twenty-five thousand Russian refugees in Constantinople are faced with the prospect of having to make choice, in the very near future, of acknowledging the authority of the Bolshevist Government of Moscow or of "moving on" once more in search of another resting-place. This has been made known to Dr. Nansen by M. Franklin-Bouillon, acting on behalf of Mustapha Kemal Pasha; and the explanation is that the Nationalist Turks some months ago signed a secret agreement to the effect noted with the Soviet Government. It was added that there is no prospect of any modification of the agreement, as the Nationalists had been supplied with munitions of war on the strength of it. The blow is, naturally, a very heavy one for the refugees concerned, many of whom have succeeded in working themselves on to a self-supporting basis. But it is better that they should have warning rather than that the blow should fall all unannounced, and M. Franklin-Bouillon's action in this case is more likely to be generally commended than many of his other actions have been of late.

A Strange Treaty.

From Moscow comes the report of a Perso-Soviet Treaty, of which only one clause appears to have been deemed of sufficient importance to pass on to the outer world—as a triumph, presumably, for Soviet diplomacy! This clause, however, it cannot be denied, is sufficiently startling in character; for by it Persia undertakes in case of war between Great Britain and the Bolshevist Government to allow Soviet forces to attack Iraq through Persia. If the report be true—as to which we have considerable doubt—it would be instructive to learn what the Teheran Government thinks would be the outcome of such action on the part of Persia, and with what feelings it would view the passage of Russian—or "Red"—troops through its territory. Perhaps its enthusiasm for its new friend will induce it to offer the domes of Meshed as a target for Russian artillery once more.

Malicious Inventions.

In his letter, which will be found on another page, our Albanian Correspondent protests once more against those false reports which are so often set afloat with the obvious hope of discrediting the

Digitized by Google

little country of the Shkypetars. At the same time, the Albanian Minister in London has been impelled to write to the Press to state that the whole of the alarmist reports regarding Albania, and recently emanating from Athens, Rome, and Belgrade, are entirely baseless. After mentioning some of the reports referred to, His Excellency declares specifically that no Albanian volunteers have been despatched to assist the Turks, and quotes an official telegram on the subject. It is, no doubt, quite in accordance with Balkan traditions that rumours of this kind should be launched with a reckless disregard of facts, and that they should find ready credence in some quarters. But it is very regrettable that a small country like Albania should be handicapped in such fashion, and we can only hope that it will soon be found not worth while to forward such false reports to Western Europe at all events.

India's Agency in London.

A formal notice from the High Commissioner for India regarding a change of address serves to remind us of the progress which has been made towards a reform we urged a few years ago—the transfer from the Secretary of State of all the agency business of the Government of India. The High Commissioner is now very much at home in the block of houses he has occupied in Grosvenor Gardens, and he is gathering his administrative staff about him in a workmanlike way. The Civil Leave, Pay, and Pensions Department moves there in the course of the next fortnight from the old quarters in the India Office, and the Treasury at No. 46 will in future be the rendezvous of those officers who transact their own business when on leave. Such changes are in our opinion all to the good, but they are not altogether easy to remember in detail, and Sir William Meyer would do the public some service by issuing a brief statement showing just what has been done, and how much more remains to do, before it can be said that the Government of India is master in its own house, subject, of course, to the statutory control of the Secretary of State, but relieved of his interference in the course of ordinary business.

THE WEEK AT HOME.

London, Monday Evening.

The Political Crisis.

It has been a week of political crisis, in which I am afraid the Near East proper has been practically forgotten by nine men out of ten, and the reactions of Chanak upon the Coalition have been the all-absorbing topic. All the accumulated sins of the Government, and these are many, have been dwelt upon; its occasional and spasmodic virtues—and modern theology admits that even the most abandoned sinners are not hopelessly lost—have been overlooked. Chanak has been the pretext for raking up the misdeeds of the past four years. Even Mr. Garvin has abandoned the Prime Minister—and has been rudely compared by the *Morning Post* to the charwoman who gives notice.

The Defence.

The Coalition, however, does not lack defenders in its own ranks. Mr. Chamberlain went down to Birmingham, preached loyalty to the Government, and drew a gloomy picture of the danger of a Labour victory. And Mr. Lloyd George invited himself to Manchester, where Coalition Liberalism is strong, and was given a rousing reception. His speech, however, was not a happy effort; it was too much of a personal attack upon his opponents, and an allusion to Lord Gladstone (one of the critics of the Government) as lacking in brains will give deep offence. Lord Gladstone is not a great man like his father, but the idea that one has to have brains to play a part in politics is, to put the thing bluntly, hardly borne out by the present House of Commons.

On its European side, as touching on the freedom of the Straits, the negotiations with the Turks, and the general Near Eastern policy of the Government, Mr. Lloyd George's speech hardly even pretended to be convincing. It was a mere string of statements, each of which could be easily torn to tatters. If this is the best defence the Government can put up, then they have little to say for themselves on that score. The speech, like most of the public utterances of the Prime Minister of late, was that of a tired man who needs rest.

The Attack.

At the beginning of last week it looked as though the dissolution would, after all, wait until next year; but events have moved fast, and feeling faster, and it is now generally accepted that the present House of Commons will not meet again, even for its short autumn session. Another year in Downing Street without an appeal to the country would only bring the Government into still further discredit, and Mr. Lloyd George is too wise a tactician to imitate the 1904-5 methods of Mr. Balfour. A General Election at once, before the Liberals and Labour men are ready, and, above all, before the Tory autumn conferences, gives a fresh opportunity to the Conservative malcontents, is assumed to be the order of the day.

Politically, it is undoubtedly wise strategy not to wait; from the point of view of the country as a whole I am not so sure. The last few months have shown a slight improvement in trade, and there is a little more confidence about; and the upset of a General Election, with the possibility of a change of Government and a general alteration of policy, is not very welcome to business men. The ordinary merchant and manufacturer would rather postpone an election for another year, but when politicians disagree these considerations do not count.

A General Election.

A General Election would confessedly be a leap in the dark, for nobody knows precisely what the 21,000,000 odd voters are thinking. I am no prophet, but it does not need second sight to predict that the Coalition Liberals will lose a number of seats, while the Asquithians are not likely to gain any. That leaves the fight practically a straight one between Conservatives and Labour. As to its results, one estimate I have heard given is that in the next House the Conservatives (including the few Liberal Coalitionists that survive) will total some 350, and Labour (including the remaining Asquithians) will reach 250. There is a general consensus of opinion among politicians who are expert at electoral calculations that Labour cannot win fewer than 250 seats, including a good many in the rural districts, owing to the Government's abandonment of the minimum wage, which has been deeply resented by the agricultural labourer. In other words, Labour, hitherto strong only in the North and Midlands, may carry its banner into the South and West.

But it is not expected to win enough seats to attain an actual majority, and for that reason the betting is mostly on a Conservative Government, although the whole problem is complicated by the personality of Mr. Lloyd George, of whom the Conservatives desire to be rid, but whom they

Digitized by Google

cannot really replace as leader. A Conservative Government of second-raters, faced by a strong Labour Opposition, and criticised by Mr. Lloyd George and his fellow Liberals from the Coalition, would not be in too easy a position. Certainly, unless it could make people fear Labour more than they do in fact fear it, it would hardly survive its full five years, or anything like that time. The attempts to use Labour as a "bogey man" are really too silly; one supposes they are believed in a few drawing-rooms in country houses, but certainly nowhere else. My own impression is that a Labour Government would do very little to justify its name or the past speeches of its leaders; the trouble with Labour men in office is that they are altogether too Conservative. Their inexperience would put them very much in the hands of the permanent officials, for whom they have secretly a great respect; and, once they were in office, they would probably want as quiet a time as possible, like others before them. *J'y suis, j'y reste*, is usually the unconfessed motto of the politician *arrivé*.

The Coal Trouble.

There is trouble in the coal mines again. Although coal is very dear for domestic and industrial purposes, the coal miners declare that their wages are not enough to live on, and once again they are asking for a State subsidy, although they have dropped the ill-starred national pool. There is no prospect whatever of the subsidy being granted for what is, after all, a basic industry which should be able to maintain itself if any does: and while people are sorry for the miners, there is a general feeling that they have brought the trouble on themselves by their folly during the past few years. Incidentally, they refuse the suggestion that if they were to work an eight hours' day they would earn enough to support themselves.

Divorce Law Reform.

A very powerful plea for the reform of the divorce law has again been put forward by Lord Buckmaster. He cites several shocking cases from his own experience as a judge. "However brutal and repeated the cruelty," he remarks, ironically, "no divorce must be granted for it, or we shall Americanise our institutions and soil the sanctity of English homes"—homes in which a husband kicks his wife downstairs, or makes her sleep on a doormat in winter, to take two or three specimen cases which he quotes. On this matter the House of Lords is far in advance of the House of Commons, for the one has accepted, the other rejected, a divorce reform Bill. Lord Buckmaster asks that Parliament shall reconsider the question again; but there is not the slightest chance of the present Parliament's doing so. Also, I understand that the High Church party is entirely set against any change whatever, and apparently Lord Buckmaster's arguments in previous years have not affected that attitude.

A C.M.S. Split.

The trouble in the Church Missionary Society, to which I referred recently, has come to a head. Those who believe in the literal truth of the Bible—the old "verbal inspiration"—have seceded, and are to form a fresh Evangelical organisation, while the more modern views will be taught, at least in part, one gathers, by the official C.M.S. This division of effort, and the inevitable rivalry and ill-feeling it will cause, must considerably affect the power of the greatest missionary organisation in the world, but every means has been tried to avoid the conflict, and failed.

The Week's Books.

The second volume of "Outspoken Essays" by Dean Inge is in many ways a more notable volume even than the first. It contains the Dean's lectures on the Victorian Age and on Progress—in which he has no belief whatever—and, some penetrating addresses on "The State, Visible and Invisible." But by far the best pages are those which contain a noble confession of personal faith as a Christian Platonist. The Dean, as is well known, is an authority on mysticism; but "I am very far," he writes, "from claiming that I have had these rich experiences myself. It is only occasionally that I can 'pray with the spirit and pray with the understanding also,' a very different thing from merely 'saying one's prayers.' Nor have I found in the contemplation of nature anything like the inspiration which Wordsworth and others have described. . . . The sweet sanctities of home life, and especially the innocence and affection of young children, more often bring me near to the felt presence of God. But for the Testimony of the great cloud of witnesses who have mounted higher and seen more, I should not have ventured to build so much on this immediate revelation of God to the human soul. But the evidence of the saints seems to me absolutely trustworthy; and the dimness of my own vision would be disquieting only if I felt I had deserved better. The pearl of great price is not so easily found. But do we know of any who have sought after the knowledge of God as diligently as other men seek after wealth and honour, and have come away empty-handed?"

The first volume of "Social and Diplomatic Memories" (Arnold), by Sir Rennell Rodd, contains some delightful stories, of which I will only quote one: "There was a worthy and conscientious painter in water-colours who won the enthusiastic approval of Ruskin and achieved a certain mid-Victorian repute by spending years of his life on a camp-stool in front of St. Mark's at Venice, and elaborately reproducing with a telescopic sight every detail, crevice, and tessera of mosaic in that astoundingly harmonious whole. Jimmy (Whistler) stood one day behind him, affecting to take a deep interest in his miniature brushwork, while with a piece of white chalk he wrote on the back of his victim's coat, 'I am totally blind.'"

I am no authority on boxing, but "Knuckles and Gloves" (Collins), by Bohun Lynch, appeals to me as the work of one who is at once a literary man and a bruiser of University fame. It is an eminently readable critical history of the ring.

It would be impossible to notice "Secret Sects of Syria and the Lebanon" (George Allen), by B. H. Springett, adequately under two or three columns, so many curious bypaths of occult lore does the author traverse with knowledge and interest. I therefore confine myself to a bare mention of what I should imagine will become the standard work on a difficult subject.

The Near and Middle East.

EGYPT.

Cairo, October 5.

The Turkish Crisis.

As in most other Moslem countries, the Turkish crisis has absorbed public attention in Egypt. The vernacular Press has been full of articles on the subject, and those organs which have London correspondents have been receiving columns of telegrams giving the latest news and views, which have been read with avidity by the public. Amongst the more instructed Egyptians there is obvious relief that war has been averted, but there has been a great deal of wild talk in Egyptian circles generally as to Mustapha Kemal's future plans, and pictures have been conjured up of his regathering together the dismembered portions of the Ottoman Empire. It has, however, been instructive to note that Egypt is never included amongst the dominions which Kemal Pasha is expected to reunite. The truth is that, while the Egyptians throughout the country sympathise most strongly with the Kemalists, and would rejoice at the prospect of Syria, Palestine, and Mesopotamia being once again made subject to Constantinople, they have absolutely no desire to give up their present independent position and return into the Ottoman fold. In fact, it is very much a case of the Egyptians wishing the Kemalists well from afar.

Local Politics.

As regards local politics, matters are stagnant, and everyone is adopting a waiting attitude. The promised Council of Ministers, which should have taken place this week, has been indefinitely postponed, and so has once again given rise to rumours of a Ministerial crisis. The Constitution Commission still meanders on amending and re-amending decisions previously taken; and it does not look as if the Constitution Report, which was promised at the latest for the end of September, will now be presented till late this month.

The new Adly party, which has not yet been launched, has latterly acquired a certain amount of unpopularity owing to the manner in which subscriptions are being raised in the provinces; but there is reason to believe that the activities of which complaint is made are the work of secret opposition agents, who, while ostensibly working for the new party, are operating in a manner which they know will bring discredit upon it. Its new organ is to appear on the 15th, after which Adly Pasha will deliver a speech explaining the policy of his party.

Amin Bey Yusef.

A good deal of irritation is being expressed in local Zaghloulist, as well as non-Zaghloulist, Egyptian circles at the activities of Amin Bey Yusef. The latter, who is a nephew by marriage of Saad Pasha Zaghloul, whose eloquent champion he has always been, and is a lawyer by profession, left here in August for London bent, as he asserted, on a purely legal mission. He appears to have accomplished that mission with unexpected rapidity and to have launched himself almost immediately on his arrival into the political fray in support of the liberation of his uncle, for we have had not a few cables from London quoting letters on the subject which he has written to various English papers.

Amin Bey Yusef carries no political weight whatsoever in this country, and his propaganda campaign appears to have given considerable offence in Nationalist circles here, where he is disowned. There can be no doubt as to the honesty of his intentions and the sincerity of his motives, but it is to be feared that the worthy Bey will have to run the gauntlet of considerable heckling when he returns here.

Port Said, October 9.

Madame Zaghloul.

Excitement has been caused by the arrival of Mme. Zaghloul, who is on her way to join her husband in Gibraltar. She arrived last night by special train, which was filled, inside and out, by her supporters and by sympathisers with her husband. Those riding outside on the top of the carriages forgot, however, that just before the train gets to Port Said it has to go over Rassawa iron bridge, which has some tie-rods just above the level of the carriages. These tie-rods scraped some of the supporters off the roofs of the carriages, killing three and seriously injuring a fourth. Their names will, no doubt, be added to the roll of martyrs for *Istiklal*.

Mme. Zaghloul was accommodated at the Casino Palace Hotel, which was closely guarded to all except the Reception Committee. Although there was great enthusiasm in the town when she arrived, there were no incidents whatever, and the police appear to have handled matters with extreme tact and firmness.

Mme. Zaghloul is to embark on the s.s. Narkunda this evening, and it is believed that Mahmoud Bey Tarzi, of the Afghan Legation and Minister Plenipotentiary to Egypt and Ambassador to France, will also travel in the ship.

Bishop Gwynne.

Last Sunday Bishop Gwynne came down from Cairo to take the Sunday services at the church here, to relieve the chaplain, whose wife has been seriously ill. The Bishop purposes to come again next Sunday to take the services in connection with the Harvest Festival, and the day following will lay the foundation-stone of the Port Said Peace Memorial Hall and Church House, which is being built on ground adjoining the church.

ROUMANIA.

Bucharest, October 6.

The Near Eastern Crisis.

The Near Eastern crisis still monopolises the attention of the Government and the people of this country, despite the approaching Coronation festivities. Their anxiety is enhanced by the fact that their two big Allies, England and France, are not always "pulling together," the direct effect of which they see in the Greek disaster; and as England and France are equally liked in this country, Roumania's position in the present crisis is a very delicate one; for she does not wish to manifest any signs of favouring one side or the other. Nevertheless, as far as the Straits question is concerned, she cannot help preferring Great Britain's standpoint, which represents a greater guarantee for the freedom and internationalisation of the Bosphorus and the Dardanelles. There are, of course, more ways than one of applying the internationalisation of the Straits, as, for instance, the mandate system, or an international statute similar to the one applied for the Danube, of which the latter, under the control of the League of Nations, would be preferable to Roumania.

As to the question of Thrace, while sympathising with the Greeks in the adverse turn that their fortunes have taken, Roumania has no particular interests in this province so long as the settlement

Digitized by Google

of the question does not endanger the present equilibrium in the Balkan Peninsula.

Refugees from the Near East.

The influx into this country of Near Eastern fugitives—mostly Greeks and Armenians—has taken such proportions during the past week that the Government has thought it necessary to intervene to put a stop to the invasion. At first the refugees' entrance into this country was left unhindered, although its effect soon began to be felt in a further rise in the cost of living. Enormous rents are being paid by these unfortunate refugees for available apartments. The majority of them are of the well-to-do class.

The local Greek and Armenian colonies have made several appeals to the Roumanian authorities to allow their compatriots to seek shelter in this country, but have met with a courteous refusal. However, in order to meet them half way, the Government has now decided to allow only those refugees to enter the country who are in transit for other countries. As similar restrictions are in force also at the Bulgarian ports, many of the refugees will have to choose between the alternatives of returning to Constantinople or going on to Russia.

Coronation Guests.

It is now announced that Marshal Foch, and not General Franchet d'Esperey, as previously reported, will represent France at the Coronation celebrations. Marshal Foch will be accompanied by General Weigand. Owing to the present political situation, King Alexander of Yugoslavia will not be able to leave his country to attend the Coronation, and he will be represented by his cousin, Prince Paul, accompanied by MM. Nintchitch, Vasitch, and General Haditch. Queen Marie of Yugoslavia, however, is expected to arrive in Sinaia early next week. Spain will be represented by the Infante d'Orleans, Don Jose de Landechiu, and Don Uzuchiano, the Adjutant of the King of Spain. Belgium by Count de Broqueville, the former Prime Minister, General de Roy, de Bliqui, and Count Grunume. M. Samal will represent Czecho-Slovakia. America, Japan, Poland, Switzerland, Portugal, Greece, Germany, and Austria will be represented by their respective Ministers at Bucharest.

Plot against the Royal Family.

In connection with the outrage planned against the Royal family by a number of Magyars, which was discovered by the Secret Police a few weeks ago, the Ministry of Foreign Affairs has issued the following *communiqué* to the Press abroad:—"The Hungarian Press is endeavouring to make it appear that the outrage planned against the Royal Family is a simple invention of the Roumanian Secret Police. For the present, we will only state that with the proofs at hand there is no doubt that the attempt in question was organised by the well-known Magyar society, 'Magyar ebredö egyesület' (The Awakening Magyars), and that the proofs of guilt already secured throw an edifying light on what is going on in Hungary. Those in Budapest will not lose by waiting for further disclosures."

Born 1820——Still going Strong!

YE OLDE FIGHTING COCKS, ST. ALBANS: Claimed to be the oldest inhabited house in England.

HISTORICAL SPIRIT SERIES NO. 1.

Two minds with but a single thought . . . . . a cheery spirit.

JOHN WALKER & SONS, LTD., Scotch Whisky Distillers, Kilmarnock, Scotland.

ALBANIA.

Tirana, October 4.

Political Affairs.

It is obvious now that the Government commands a stable majority in the Chamber of Deputies. When, on September 14, the House passed a vote of confidence in the Government, out of the fifty nine members present (the total number of Deputies is seventy-nine), forty-six voted for the Government and thirteen against. Since then this fatal number has not increased, and the Government's position is secure, for the people are happy to show their trust in a Government that has surmounted difficulties and has been able to obtain peace and quiet in the country. It is, moreover, premature to speak of political parties in Albania. Parliamentary life here is hardly established, and the country is really too new for the formation in precise fashion of the people's hopes and needs. It is, therefore, natural to see the discontented Deputies grouping themselves rather round one leader (or several leaders) than on a programme or a principle.

During this stable situation the Government is endeavouring to get certain important Bills through. For instance, there is the elaboration—changes and additions—of the Statute of Lushnia (January, 1920). The new statute does not yet touch on the precise form of the Government—that duty will devolve upon the future Constituent Assembly—and in the meantime Albania will continue to be under a Republican régime (the members of the High Council now numbering two, and not four, as originally).

Another Bill is to determine the responsibility of Ministers—a question which had remained vague in the former statute.

Several other laws are being studied in committee, e.g., those dealing with public instruction and polygamy. Elementary instruction is compulsory and to be obtained in 523 schools, but there are measures to be taken to improve the methods of teaching, which will necessitate the drawing up of new credits. The law against polygamy has been in force for three months, and will be made permanent. It should be remembered that three-fifths of the Albanian people are Mohammedans,

Digitized by Google

and the law of Islam allows of polygamy. However, the practice of polygamy has been very rare among the Albanians. Still, the Government wished to make impossible this Oriental custom, and the application of the new law, which forbids the possession of more than one wife, has aroused no indignation among the Moslems, in spite of the fact that it is contrary to the precepts of the Koran.

The Autocephalous Church.

A Congress was recently held on the initiative of the Minister of the Interior at Berat. Forty-seven delegates, priests as well as lay members, representing the Orthodox Churches and communities, attended this meeting, which was to decide on the statute of the Orthodox Church. The organic statute of the Orthodox Patriarchate states that: "Any country which ceases to be part of the Ottoman Empire ceases *ipso facto* to be bound to the Œcumenical Patriarchate." In this way the Churches of Greece, of Serbia, and of Roumania, all three countries pre-eminently Orthodox, are under the authority of Synods, preserving only a spiritual attachment to the Patriarchate of the Phanar; their Churches are autocephalous—that is to say, independent of the Patriarchate.

The Orthodox Congress at Berat has decided to proclaim the Church of Albania autocephalous. An example had already been given by the Albanians residing in the United States, who proclaimed their Church autocephalous in 1919. This decision at Berat has been hailed with joy throughout Albania, as well as by the Albanian communities of Roumania.

The tendency of the three religions of Albania (Mohammedan, Catholic, and Orthodox) is towards the nationalising of their institutions, thus helping towards the realisation of national unity.

The New Foreign Minister.

Yesterday M. Pandeli Evangeli became Minister of Foreign Affairs. It will be recalled that M. Evangeli was President of Council when he was turned out by the *coup de main* last March. In the new Cabinet formed afterwards the President, M. Jafar Ypi, had reserved the portfolio of Foreign Affairs with the *ad interim* title. M. Evangeli is a broad-minded man, and supports a foreign policy based on good relations with all the Powers.

False Reports.

At the moment of writing, the Italian journals are publishing a dispatch, of Serbian origin—the *Pravda*, of Belgrade—to the effect that Tirana has been attacked by 2,000 rebels!

From time to time the Press agencies of Athens, Belgrade, and Rome amuse themselves with spreading, with the manifest purpose of doing harm to the country, false news against Albania, and the world Press, in quest of sensational news, welcomes these reports with enthusiasm. The Albanian Government takes measures to deny these tendencious reports, but the denials are published by only a hundredth part of the sheets that print the false rumours. And that is the way in which public opinion is enlightened!

IRAQ.

Baghdad, September 29.

The Political Situation.

There are indications that a new Cabinet is likely to be formed in the near future, and rumour is busy with the personnel. It is taken for granted that the late Prime Minister, the Nakeeb of Baghdad, will again be the head of the Government, but with that exception all is conjecture. There is much waiting for the new Ministers to do, and it is sincerely to be hoped that the present interregnum, which has now been in existence for nearly two months, will soon be replaced by a proper form of government.

The country is pleasingly quiet now, far quieter than it has been for a very long time. Even in the Middle Euphrates region, which is usually the centre of unrest in this country, only one small incident has occurred to mar the serenity of life; and that occurred some ten days ago, when a small tribe raided the police-station at Afaj, in the Diwaniyah division, and forcibly released some of their fellow tribesmen who were being detained there. They have now been punished, and it is hoped that the incident has ended.

Much of the present quietness in those parts is no doubt due to the complete reshuffling of Arab executive officials which has taken place there. The Mutasarrif has been dismissed, and most of the Kaimakams have been transferred to other districts and replaced by men who devote their attention to their work rather than to interference in politics. It is one of the misfortunes of this country that a non-party civil service seems to be beyond the imagination of most of the inhabitants, and there seems to be little or no realisation of the fact that civil servants should be the servants of Government *qua* Government, irrespective of the party which is in power for the time being. Until some such realisation can be instilled into the minds of those who enter the Civil Service, the path of the Government is likely always to be beset with difficulties arising from the partiality of the executive officials, with its consequent train of unrest and dissatisfaction.

The apprehensions which the earliest realisation of the extent of the Kemalists' successes aroused are now dying down, as it is seen that no demonstrations in force have yet been made against Iraq's frontiers, and confidence has now been restored that no move is to be made in this direction. On all sides is heard expression of the hope that the Near Eastern question will be seriously tackled and an early agreement reached. The restoration of commercial connection with Anatolia is of great importance to this country, especially to Mosul, and the people will be very disappointed if they are not enabled to resume their old connections as a result of the agreement which they confidently hope will soon be reached.

The Emir Zaid.

The Emir Zaid, King Faisal's youngest brother, arrived in Baghdad from Mecca on September 17, and was given a good reception. He was met at the station by the principal Arab and British officials, and a guard of honour received him. The streets were decorated, and part of the route from the station to the Palace was lined by Boy Scouts.

Sir John Salmond's Arrival.

Sir John Salmond has arrived in Baghdad to take over the duties of G.O.C.-in-C. from Sir Theodore Fraser. Much interest centres in Sir John Salmond's appointment, as he is the first Air G.O.C.-in-C., and the experiment of making the Air Force the principal fighting arm in the country, supported merely by a skeleton army, is one which is being tried for the first time, and much depends on the success or failure of the experiment.

Still Summer.

Most of us thought that the hot weather had come to an end by about September 10, but the third week of the month gave the optimists a severe reminder that September is to be regarded among the summer months in ordinary circumstances.

Digitized by Google

TURKEY.

Constantinople, October 9.

The Mudania Conference.

At the moment of writing the Mudania Conference is still proceeding, and it is difficult to obtain any very clear indication of the probable result. Public opinion, for no apparent reason, oscillates between optimism and pessimism, and the exodus continues. On the evening of the 8th, the s.s. Empress of India sailed with several British families for the United Kingdom, and it is as difficult as ever to obtain berths at short notice either in the Simplon Express or in the outgoing steamers. Wild rumours continue to circulate, and still find plenty of willing listeners, but on the whole there is a feeling that as neither the Allies nor the Turks can really want war, a peaceful settlement must ensue.

There are, in fact, just as good reasons for a desire for peace on the part of the Kemalists, as there are for a similar desire animating the Allied Governments. It must be remembered, in the first place, that the Kemalist army, prior to the collapse of the Greeks, was by no means free from war-weariness. Furthermore, the population of Anatolia, which numbers no more than that of Greater London alone, has been called upon to make unprecedented sacrifices in blood and treasure during the last twelve years. A considerable proportion of Anatolia has been devastated, and even when the Armistice of 1918 was concluded, the staple industries of Anatolia had been either completely ruined or very seriously damaged. If the issue involved were a matter of continuing the war against the Greeks, perhaps the chances of peace would not be very bright, but it is inconceivable that the Angora Government could lightly plunge into a war with Great Britain, when all the reasonable demands of Turkey have been accepted. Nevertheless, until the Conference of Mudania has produced a definite result, Constantinople will be a prey to suspense which is by no means confined to the non-Moslem population, foreign or other.

Relations with Bulgaria.

The recent action of the Bulgarian Government in making overtures to the Powers in favour of the establishment of an independent Thracian State comprising both sections of that province, has aroused considerable indignation in Turkish circles. The Press has made some very bitter comments on the subject, and it seems that, although the relations between M. Stambolisky's Government and the Angora Government have never been cordial—if, indeed, one may use the term "relations"—Turkish opinion has been genuinely surprised.

Penetration of the Neutral Zones.

The situation in the Dardanelles area is apparently stationary, but on the 7th inst. a force of Kemalist cavalry occupied Chile on the Black Sea coast of the neutral zone between Constantinople and Ismid. This force was subsequently reinforced by infantry. It is reported that the Kemalists assign as a reason for this action the continued arrival of British reinforcements and reconnaissances carried out by British aircraft. At the same time, the concentration of considerable forces is stated to be occurring in the Ismid area.

PERSIA.

(From an Occasional Correspondent.)

Ispahan, August 19.

Your readers may have already heard of recent events in this part of Persia, but, even so, the following may be of interest.

Inspired by the success of operations undertaken against those obstinate rebels, Kuchik Khan of Gilan and Ismail Agha of Azerbaijan, Sirdar Sipah Reza Khan, Minister of War, with a view to extending his hitherto successful efforts further afield, despatched a company of Cossacks, consisting of about 200 picked officers and men, with machine guns, to Arabistan. The route via Burujird and Shuster being, as usual, closed by the tribes, arrangements were made with the Bakhtiaris for the safe conduct of this small force by the Bakhtiari road to Ahwaz. The Cossacks were encamped at Shelil when they were ambushed by an overpowering party of Kuhgeloos, and about one-third were killed and the rest scattered; the camp was thoroughly looted, and valuable material and arms fell into the hands of the raiders.

The greatest indignation is felt in Government circles in Teheran, whilst consternation prevails at Ispahan. It does not appear credible that a raid on this scale could have been made by the Kuhgeloos into Bakhtiari territory without the connivance of the Bakhtiaris themselves; but the latter can always, and no doubt will in this case, point to the fact that the Kuhgeloos have from time immemorial raided their country, and have taken advantage of this occasion to benefit themselves at the expense of the Government forces and of their hereditary enemies the Bakhtiaris.

Wild rumours are current about the affair: amongst others, one to the effect that the British Government are at the bottom of the business. This view has already found expression in one of the Teheran newspapers. Any set-back to the Government in Teheran in respect of affairs in Southern Persia is invariably placed to the debit of the British Government, and political capital, wherewith to discredit all things British, will certainly be manufactured from this incident.

The immediate result of the disaster has led to the dismissal of several of the sons of Bakhtiari chiefs from the Persian Army, and these officers have sought refuge in Ispahan. The public, with its inquiring turn of mind, has been asking why the Minister of War is turning his attention to South Persia, where the conditions are comparatively peaceful. The Sirdar Sipah has let it be known that he has in view the location of trained troops in Southern Persia for the maintenance of order and the consolidation of the power of the central authorities. The public, however, reads into his activities the intention of enforcing the law in so far as the collection of taxes and dues are in question. So far, tentative measures to give effect to this policy have had no success, and the failure, as, in short, the failure of all official measures tending to the greater influence of the Teheran Government in the South, is accounted for in the eyes of

the anti-British party in the capital by the underlying opposition in British political circles to any direct and efficient control from the North. The argument serves its purpose, for it covers up the deficiencies of the administration and diverts criticism to a quarter which is well able to bear it. The British Government has an exceedingly hostile Press in Persia at the present moment, which represents very accurately the anti-British feeling of the capital, to which so many of the officials and nobles find it in their interests to bow.

The Financial Mission.

The American Financial Mission, under the leadership of Mr. Milspaul, will arrive in this country shortly. The need for good financial advice has been urgent for many years past, and it is fairly clear to those who have had any intimate knowledge of the country that the task of restoring order to the finances would present no difficulties provided that the Cabinet and the Majlis had reform at heart and gave honest assistance. The experiences of Mr. Armitage Smith and his staff as Financial Advisers to the Government do not afford much hope of assistance from those quarters, and it is on them that Mr. Milspaul will have to rely. Sceptics give him three months to get to know his work, three months in getting his work into motion, three months in collecting his salary before leaving Persia in despair. The experiment will, however, be an interesting one, and will be followed with sympathy by the foreign community, with, of course, obvious exceptions.

CORRESPONDENCE.

The columns of The Near East *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* The Near East.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper.

THE NEAR AND MIDDLE EAST ASSOCIATION.

To the Editor of The Near East.

Sir,—*The Times* of July 27 last announced the formation of the above association, and set out the objects it has in view. Your issue of September 28 contains a letter from the acting chairman, Lord Edward Gleichen, appealing for support.

The association, however, will not receive the sympathy it would otherwise have from British residents in Turkey as long as it introduces the Moslem question. Those who live in contact with the Turks never speak of them as Mohammedans. They do not speak of their methods of government as those of Moslems. It is Turkish methods that are criticised. The question is not a religious question, but one of proper or improper government.

A plank in the platform of the association is the opening up of internal and external trade by practical economic methods. Here the association will come into active opposition with the ideas of the Nationalist Turks. During the Great War monopolies were created giving transport and other rights to purely Turkish groups, who were nothing more nor less than the nominees of individuals who had the power to grant these privileges. Their methods were simple. When the oil and olive crop, for example, was ready they sent buyers to the districts producing, and made ridiculous offers for the produce. These were naturally refused. The holders found, however, that there were no other buyers. The organised robbery prevented these from appearing on the scene. Those who know Turkey will know how, with the necessary authority, this is accomplished. Other produce or merchandise is treated in the same way. Organised robbery is going on in Broussa and Smyrna to-day by the Nationalist Government. Notices are being published that stocks of goods left by refugees must be claimed within a certain time, usually a very few days. Failing the appearance of the owner, the Government will sell the goods by auction and hold the cash at his disposal. This looks equitable enough, particularly as mention is made that this is done to prevent the goods from being destroyed by time or fire, etc., etc. But, in fact, what happens is that the goods are sold to agreed buyers at auctions which are carried out with all show of correctness, at 10 per cent. or 20 per cent. of their value. This was the method employed from 1914 until the Armistice. Many Turks became very wealthy by these practices.

The abrogation of the Capitulations will give every opportunity to the Turkish Government to stop and interfere in a thousand ways with the freedom to trade which we now enjoy.

The Chambers of Commerce of France, Italy, and England have recently met in conference on this subject, and have sent identical notes to their respective Foreign Offices in which they point out the dangers ahead if the old rights, obtained with much difficulty and held to for so long, are surrendered. If the Near and Middle East Association, to whom the British Chamber of Commerce of Turkey has written on the subject, has sincerely the interest of British trade at heart, and is not using the "economic tack" as a stick with which to beat the Government, then it must support whole-heartedly, and with every influence it has, the views expressed by a body of business men who can speak on the subject with knowledge and authority.

It is to be noticed that the policy of the Association, as set out in Lord Edward Gleichen's letter (of Sept. 28) published by you, does not contain any reference to the Capitulations, nor does it contain any mention of "the right of the Ottoman people to exercise complete sovereignty within its frontiers" (I quote *The Times* report of July 27 last) nor "full sovereignty of the Sultan" (I quote the memorandum to the Prime Minister). It now speaks of "the possession of Anatolia and Constantinople by the Turks." The two former quotations mean no Capitulations in any form; the last quotation may mean anything.

The time for another Peace Conference is drawing near. British business men must get busy over this question and make their views heard in Downing Street before it is too late.—I am, etc.,

"Observer."

Constantinople, October 9, 1922.

THE MANDATE FOR SMYRNA.

To the Editor of The Near East.

Sir,—In the interview which Mr. Lloyd George allowed to the Labour deputation, a verbatim report of which appeared in *The Times* of the 10th inst., he assured the members of the deputation that the Greeks were acting entirely on their own initiative in going to Smyrna. At least, he stated: "We never paid a sixpence to the Greeks, we never gave them support either in money or arms." Again he says: "You go there at your own expense. We cannot support you, you take the responsibility."

Digitized by Google

But from a reference to the Note drawn up in Paris by the Allies in March last we learn : "Under these circumstances the Ministers were unable to assume the responsibility of requiring from Greece not merely the complete evacuation of Anatolia, to which, it must be remembered in passing, that Greece was invited in 1917 by the Powers," etc. Also that : "They desire to compensate the Greek nation for the great sacrifices which they had accepted during the war in the cause of the Allies." It is difficult to reconcile these conflicting statements, and it is easy to understand why the Turks refuse to have any confidence in the word of a statesman who can be guilty of such quibbling.—I am, etc.,

Coles Pasha.

The British Club, Biarritz.

BRITAIN AND ISLAMIC ASIA.

On October 10, before the Central Asian Society, Major Arthur Moore lectured at Burlington House, London, W., on "Britain and Islamic Asia." He said that the East had changed out of knowledge. It was now definitely awake, and awake against the West, and unless the British Commonwealth of Nations could in some way act as mediators he did not see how a clash was to be avoided. For about one hundred and fifty years the Eastern question had painted itself to Islam as the balance of forces between England and Russia. When Russia and England began to act together this fact dominated the whole situation for Turkey, and it was perfectly idle to talk of her being treacherous because she had come into the war against Russia and England. He did not suggest that Sir Edward Grey should have sought insurance against Germany in the form of Turkey rather than Russia, but we had insured with Russia at the expense of our friendship with Turkey.

The lecturer dealt with the whole story of the Young Turk revolution, and the events that had followed it. At the time of that revolution, he said, the Young Turks had been strongly Germanophobe and enthusiastically in favour of us. That position had changed, the outstanding ability of the German Ambassador at Constantinople and our own mistakes being among the causes that had brought about a change. One of the worst of our mistakes had been our endeavour to dissuade the Young Turk army from entering Constantinople at the time of the attempted counter-revolution. This was regarded as siding with Abdul Hamid. Another very grave misfortune had been our seizing, at the outbreak of the Great War, the two Dreadnoughts that were being built for Turkey in British shipyards. Other mistakes had been the using of the sufferings of the Armenians as a stick to beat the Turk with when the Allies were utterly incapable of doing anything whatever for Armenia, and our underrating the reality of the Kemalist movement. In Arabia we had been unfortunate in selecting for our support the Shereefian family, which had for long been unpopular in Islam because of the exactions which took place at Mecca from pilgrims.

Speaking of the Turkish alliance with the Bolshevists, the lecturer said that with the disappearance of Imperial Russia the Turks saw they had no counterpoise if we became restless ; and at that very time we decided to be extremely restless, and went into Palestine, Syria, Mesopotamia, Kurdistan, Persia, and the Caucasus at Tiflis and Baku. We also embarked on a policy in the approved Russian style of using our political officers to settle tribal affairs. The result had been to raise against us throughout Islam an enormous wave of distrust. Consequently, when the Bolshevists renounced all concessions and privileges, instead of the old position in which Russia was the great advancing land-grabbing power, while England, on the whole, might be looked upon as a support, we had a position in which the Bolshevists were looked upon by the Turks as the last word in liberalism and advanced thought—in fact, as fools—whereas England had become the dangerous Power. The whole question of our various adventures in Arabia, Constantinople, and the East should be liquidated at a conference at Constantinople. In that way we should get a national policy, whatever Government came into power.

A discussion followed, in which Sir Alfred Hamilton Grant, Sir Wilfrid Mallison, Sir Michael O'Dwyer, and Sir Valentine Chirol took part, and a vote of thanks to the lecturer ended the meeting.

PRESS ON THE NEAR EAST.

Mesopotamia.

To the *Asiatic Review* of October Sir Arnold T. Wilson contributes an article on "Mesopotamia : The Parting of the Ways." He begins by examining the reasons for withdrawal given by the opponents of our remaining in Mesopotamia, and finds them all inadequate, though he freely admits "errors of policy, of direction, and of execution." He continues :—

> But politicians and business men, who jointly carry on their shoulders the heavy responsibility of deciding in what channels abroad the nation's commercial activities can most wisely be directed, in order that our export trade—without which we must perish—may again be restored to its former volume, recognise that an unwise restriction of our liabilities abroad may be as calamitous in its results to British commerce as would be a decision on the part of a progressive wholesale export firm to close all foreign agencies which did not show an immediate cash profit.
>
> The question at issue is, it is submitted, not whether we can afford to stay in Mesopotamia, but whether we can afford to go. What would be involved as far as can be seen by our departure from the Iraq? This has not, as far as I know, been publicly discussed by any of the advocates of immediate evacuation.
>
> It is not probable that the present Arab Government, consisting of King Faisal and a Grand Council, would long survive the withdrawal of British assistance ; and it is improbable that it would be succeeded by a stable central Government at Baghdad. At first a number of unstable organisations would be evolved, with centres perhaps at Basrah, Baghdad, and Mosul, with varying boundaries, and mutually hostile, but not really under the control of any single chief or organised council. Like Ishmael, his prototype, the desert Arab would remain, as always, with his hand against every man ; the Kurds would obey none and plunder all.
>
> Commerce, the life-blood of the East not less than of the West, would languish still further ; and the people who within ten years have spurned the Turks and acclaimed the English, whom in turn they have been induced by a political gang to spurn in favour of an Arab Government, of whom it seems they are now tiring, would demand, in the absence of any practicable alternative, the return of the Turks.
>
> And the Turks would return, for they have a traditional ability to rule alien races of their own faith, which is excelled—and has, indeed, been attempted—by no other race ; and though their methods are the antithesis of all that we hold right, they continued until 1914 to hold together an Asiatic Empire second in size only to that of Great Britain, in face of the organised competition and the vast resources of all the Great Powers, with only occasional secessions, such as Cyprus, Egypt, and Tripoli, and continued to govern with the consent of the majority of their subjects, where these were Muhammadans.
>
> Is there any practicable alternative to their return? It is conceivable, of course, that were His Majesty King Faisal forced by sickness or by his own inclinations to abandon the rôle which has been imposed on him (and which he has filled so creditably), that Mesopotamia

Digitized by Google

could for some years be governed by a High Commissioner with the assistance of a Grand Council. This solution, which was favoured soon after the Armistice by large sections of responsible Arab opinion in Mesopotamia, was then regarded by His Majesty's Government as being inconsistent with the terms of the Mandate; and it was, moreover, rejected in 1920 by the politically-minded classes in the large towns—Basrah always excepted—as involving a degree of foreign control which was inconsistent with the due attainment of Arab aims.

It might have acted for a limited period of years had it been adopted in 1919. It would not succeed now; we cannot retrace our steps. In any case, it would require more troops than this country is able or willing to supply. Another member of the Sharifian dynasty might possibly accept office, and would doubtless be asked to do so by His Majesty's Government: but it is unlikely that he would for long endure the climatic severities and cultural peculiarities of Baghdad, which are dissimilar to those of Syria or the Hejaz; and unless His Majesty's Government are prepared to administer the country directly, as they did for a period before and after the Armistice, they must, I think, be prepared to see the Turks return.

What would be the effect of their return? Mesopotamia is a country of minorities. There are more Jews in Baghdad than in the whole of Palestine. There are more Christians in Baghdad and Mosul than in Syria; and the French Government, which has so long interested itself in the welfare of Christian communities in Turkey (other than Greeks), would scarcely be entirely indifferent to their fate, whilst it can scarcely be supposed that they will prosper in the event of the return of the Turk triumphant from the defeat of Christian Powers on the Mediterranean coast of Turkey in Asia. The return of the Turk to Mesopotamia would probably synchronise roughly with his return to Syria, in which case the abandonment of the Mandate of Palestine would only be a matter of time, and the position of Great Britain on the Suez Canal gravely imperilled. This is no mere flight of fancy; it is the universal testimony of experienced travellers in Trans-Jordania and Palestine during the past few months that public opinion in both areas, but especially the former, is deeply moved by the grant of the Rutenberg Concession, which covers parts of Trans-Jordania as well as of Palestine, and by misapprehensions as to the extent of the Mandate. Bloodshed seems inevitable if any attempt is made to give effect to the schemes of Mr. Rutenberg so far as they affect Trans-Jordania.

He then points out how "the greater work of developing the natural resources of the Iraq would come to a standstill immediately we abandoned our political responsibilities there." These resources, he goes on, are mainly agricultural, and, "as far ahead as it is possible to look, agriculture must be the main source of wealth."

But "British interests" and "British commercial interests" are not synonymous terms, though the former includes the latter. His Majesty's Government have to consider the effect of their policy upon other nations, signatories to the Treaty of Versailles and to the unratified Treaty of Sèvres. To abandon our Mandate in Mesopotamia will mean that the French must abandon theirs in Syria. It will probably mean the disappearance of the kingdom of the Hejaz. We have in the past prided ourselves—not, perhaps, with very good reason—on having kept our word as a nation, although in international political circles the spirit of compromise and of readiness to bow to force, whether exercised by majorities or minorities, which informs our Press, our Parliament, and our political leaders, has given us the reputation abroad embodied in the phrase "Perfide Albion."

The word "prestige" has been much misused in the past, but it exists nevertheless. Our prestige is the good name and reputation of Great Britain, and, by an association of ideas, of Britons all over the world. It is our greatest asset, the priceless inheritance of every subject of His Majesty King George V. who travels abroad. Let us not lightly endanger it. "A good life hath few days," said Ecclesiasticus, "but a good name endureth for ever."

It is not within the scope of this paper to discuss the bearing on current events of our past or present actions in Mesopotamia, nor is it intended to discuss possible alternative forms of government. But on the general question it may be remarked that in the writer's view the real issue under the Mandatory system is the nature of the sovereign powers to be exercised by the ruler in Mandated territory. The fact is that the Treaty of Versailles involves a fresh conception of sovereignty. Either a country must be independent, in which case there is no question of a Mandate, although it may voluntarily accept assistance (*cf.* Persia), or it is not independent, although it may enjoy a high degree of autonomy. The very word sovereignty is in these days somewhat out of date, as it connotes so many grades of autonomy within the British Empire. Under Article 22 of the League of Nations the Mandatory Power undertakes responsibility for the well-being and development of the people in respect of which it accepts a Mandate, and the people in this state are described as under tutelage. This involves the ultimate exercise of authority by the Mandatory Power. The requirements of the Mandatory system are thus inconsistent with the Anglo-French Declaration of November, 1918, and with our previous undertakings to the Arabs, and involve us in diplomatic insincerities which it is not possible for us to explain away. The tribes and cultivators in Mesopotamia are still our friends in that they trust us rather than the rulers of their own race, and desire that we should remain and exercise some degree of supervision over them. . . .

We have not yet discovered any means of enabling the tribes and cultivators in Mesopotamia to make their voices heard in an orderly manner. The Electoral law which was promised some years ago has not yet seen the light. If a system could be devised which would make it possible for the population outside the towns to exercise that influence in public affairs to which they are entitled by their enormous numerical preponderance and by the great proportion of revenue they contribute, there would be great hopes for the future prosperity of the country; but the sooner the Mandate disappears and is replaced by a treaty assigning for a period of years the relations which are to exist between the British and the people of that country the better it will be for all concerned.

ISLAM IN THEORY AND PRACTICE.

"THE SPIRIT OF ISLAM." By Syed Ameer Ali, P.C., LL.D., C.I.E. (London: Christophers. 30s.)

The rapid triumph of Mohammedanism is one of the outstanding facts in history. Within a century of its Founder's death the Crescent—meet symbol of his aspirations—reigned supreme in Hither Asia, and was carried far into Western Europe. The fate of Christendom, indeed, hung on the issue of a battle. Gibbon opines that if the Saracens had defeated Charles Martel near Tours in A.C. 732,

the interpretation of the Koran might now be taught in the schools of Oxford, and her pupils might demonstrate to a circumcised people the sanctity and truth of the religion of Mohammed.

The abortive Crusades (1095-1291) were another phase in the struggle between Cross and Crescent. Their failure left the Byzantine Empire at the mercy of the Seljuk Turks, whose capture of Constantinople in 1453 gave them a coign of vantage which Napoleon styled "the Key of the World." Then arose the Eastern Question, which has kept Europe in a constant turmoil and exercised a sinister influence on the fortunes of the Great War. It has now reached an acute stage, involving the vital interests of Great Britain and France, whose empires include more Moslems than ever owed allegiance to the Turkish sultans. At such a crisis it is essential that Westerners should learn the nature of the driving force which accomplished such marvels in the past and may change the whole current of civilisation.

Mr. Ameer Ali has brought consummate learning to bear on a subject of great complexity. After sketching the religious beliefs which prevailed in that fateful seventh century, he describes Mohammed's meteoric career; treats the creed which then took root from an historical and a doctrinal standpoint; traces its profound influence on the world's social organisation, literature and art. In theory at least Islam is

a religion of right-doing, right-thinking, and right-speaking, founded on divine love, universal charity, and the equality of men in the sight of the Lord.

In all organised religions a wide gulf yawns between theory and practice. Mohammed's lofty ideals have never materialised. The political edifice which he founded was rent in twain by tribal jealousies and dynastic ambition. Ferocity, greed, and fanaticism attended the spread of Islamic doctrine; and their professors have always been kept at daggers drawn by theological hatred. The Sunni, or orthodox sect, of which Mr. Ameer Ali is a foremost champion, predominate in India, Africa, and Turkey. Its adherents hold that the Caliphate, *i.e.*, supreme spiritual and temporal authority, passed by assignment in 631 A.C. from Hasan, the son of Ali, who was the Prophet's son-in-law, to Mu'awi-yah. The Shiah sect, inhabiting Persia and parts of Turkestan, believe that the Caliphate was inherited by Hasan's descendants. But every Christian schism has its counterpart in Islam. There are Catholics and Protestants; High, Low, and Broad Churchmen; Calvinists and mystics of every conceivable shade.

Mr. Ameer Ali discusses this burning question from the Sunni point of view. He admits that Mohammed restricted the Caliphate to Successors belonging by birth to the Koreish tribe. He records the fact that the Prophet's injunction was strictly obeyed for 885 years, the Caliphs who governed Islam from Baghdad, Cairo, and Cordova having all been members of the favoured stock. Our author, however, agrees with a fifteenth century jurist in holding that

The Prophet was thinking of the immediate future rather than of laying down a hard-and-fast rule of succession. At that time a qualified and capable ruler could only be found among the Koreish; hence the recommendation that the Caliph should be chosen from them.

In the sixteenth century Egypt was the seat of a highly attenuated Caliphate, which wielded no temporal power whatever. Sultan Selim II. added that country to the Turkish Empire in 1517, and obtained an assignment of his functions from the last Abbaside Caliph. Although the House of Othman had no connection with the Koreish tribe, Selim's successors arrogated to themselves the proud title of Khalif-ul-Islam, and were Guardians of its Holy Places. Until the 'eighties of last century their claim to succeed the Prophet received scanty recognition from non-Turkish Sunnis, and is, of course, ignored by Shiahs. The "Khilafat" movement, which has rallied Indian Moslems to the Turkish cause, was the fruit of a vigorous pan-Islamic propaganda fomented by Sultan Abdul Hamid II. For European statesmen, however, the legal aspect of the Caliphate has purely academic interests. It behoves them to base their policy in the Near East on accomplished facts, and to eschew the vacillations which have lowered their countries' prestige in the world of Islam.

BOOKLETS IN COLLOQUIAL ARABIC.

"SAYINGS AND ACTS OF JESUS CHRIST." Sir William Willcocks and Mansour Effendi Bakhit. (Cairo: The Nile Press.)

During the 40 years that Sir William Willcocks has spent in Egypt, including those marked by the valuable engineering works which will always be associated with his name, he has always interested himself keenly in the welfare of the Egyptian people. He is not one of those Europeans who, in leisure time, have no thought to spare for the hard-working population among whom their lot is cast. Few indeed can have given more earnest consideration to means that may tend to raise their condition to a higher level. The present volume, issued by Sir William and Mansour Effendi Bakhit, in the popular dialect, will be counted among the practical proofs of untiring interest that he devotes to the subject. Sir William has convinced himself that the development of character, as we conceive it, can hardly be brought about in the atmosphere of present-day Egypt, unless there is a wider application to education of the living, spoken language, instead of the exclusive language of the schools.

In a volume of about 100 pages, the translators give a selection of the sayings and acts of Christ from the Gospels and Acts in colloquial Arabic. Christ, as is known, spoke in Aramaic, which was "the direct parent of the modern colloquial Arabic as spoken in Egypt, Syria, and Palestine."

Digitized by Google

The Greek of the New Testament was the vulgar Greek dialect of the day, and thus reached the poor of the Greek-speaking world, not only those who spoke the classical language. Thus it changed the character of the world. If, then, Divine teaching were similarly accessible, it would reach millions who would never otherwise receive the message. "There is no publication," says Sir William, "in the whole of the Near East which gives even the Psalms in the everyday language of the people."

Professor Sayce contributes an introduction, in which he observes that "the outlook of the Galilean peasant upon the world in the age of Christ did not differ much from that of the Egyptian fellah to-day"; and he clearly concurs with Sir William Willcocks in considering that if the substance of the Divine teaching can be put into the language of the modern peasant it will assuredly have a far wider influence than if it remains in its present literary form. Probably not a few may question the view that the outlook of the *fellahin* at present resembles that of the Palestinian peasantry 2,000 years ago; and some may doubt whether the form of Arabic adopted is on the whole to be commended. Be that as it may, the launching of the new enterprise must be, as Professor Sayce says, "of profound interest to every theologian," and, it may be added, to many others. A great stimulus has lately been given to the reading by natives of Egypt of books outside the rather circumscribed curriculum hitherto available. Perhaps a good beginning may be made within the Coptic Christian community, for a recent correspondent of *The Times*, who has been travelling among the Copts of the provinces, has been struck by their gross ignorance, and was, moreover, informed by a well-known Coptic layman that at least one thousand of his co-religionists were converted annually to Islam.

Two other well-printed booklets are issued by Sir William with the same object: one devoted to selections from the New Testament witnesses to Gospel teachings; the other giving an interesting account of experiences in the life of a Hindu convert to Christianity, Elsadhu Sender Singh, whose portrait appears on the cover. All three should appeal to large classes of readers.

POEMS OF THE PROMISED LAND.

"LA PROMESSE ACCOMPLIE." By Heli-Georges Cattaui. (Paris: Camille Bloch, 366, Rue St. Honore.)

A volume of poems written by a Jewish pen by the waters of the Mediterranean, coming from a heart fired by the vision of the Promised Land realised, would of itself attract the imaginative reader, but when the poet is an Oriental "*Sephardi*"—a Jew, if not racy of the actual soil (M. Cattaui is a member of a distinguished Egyptian Jewish family), racy of the waters which wash the shores of the National Homeland of his people—one nurtured under the skies of the East and yet blent with French culture, and blent to a high degree, attraction is transcended to fascination.

The poems are dedicated "à Maurice Barrès par qui je retrouve l'unité en moi-même, en ma race, et dans le genre humain." The dedication is an overture full of the leading themes of the work to which it is the prelude. Self-discovery, national recovery, and prophetic universalism expressed in terms of French "fraternité," these are the keys which colour the tonality of the whole music.

M. Cattaui does not close the canon of his poetical sources with the last book of the Hebrew Scriptures. He claims as within his "sortes hebraicæ" the symbolism and figures of speech of the Hebrew protagonists in the Gospels, of the Evangelists, of the makers of the great Judæo-Christian tradition. Four of the poems grouped together under the title "La double face, de Janus" are inscribed "à la mémoire de Charles Peguy mort à la Marne pour la France et d'Armedée Rothstein mort à Verdun pour la France et pour la Judée," and to his poem "Messie" there are prefixed, among others, lines from Péguy and Paul Claudel. Péguy and Claudel were both students of Bergson at the Ecole Normale, and the discipleship to their Hebraic Master may possibly throw light on their appeal to the mentality of M. Cattaui. But just as Anglo-Jewish writers tend to envisage their expression of spiritual ideas in terms of environing thought, M. Cattaui affords an interesting illustration of the workings of the Jewish mind amid the cultural setting of the more emotional and mystical spirituality of the French devotional symbolism. Most inspiriting is the matched intensity of his sense of human fraternity and Jewish patriotism—cast in a very French mode of thought. The blend of nationalism and universalism in solution which Zionism presents is an idea particularly appealing to the French mind, and already the Jewish movement has to its credit some admirable prose and translations from Hebrew poetry, which testify to the glamour of reinterpretation the language lends to the eternal ideals of the seers and singers of Israel. French Zionism has a typical lustre and clarity of its own, which M. Cattaui's verses well illustrate. Two poems are inspired by Debussy, to whose memory they are dedicated, and in their music and flow of utterance they show the writer possessed of a rare, appreciative faculty and a delicate, classic sense of allusiveness. Perhaps the most stirring of all the poems is "Aux Morts de Tell-Haï":—

> "Pionniers d'Israel pleurez sur Trumpeldor!
> Sur sa tombe portez les lauriers et l'yeuse.
> Que le luth, le nebel, la flute et le kinnor
> Accompagnent les gémissements des pleureuses."

These verses represent M. Cattaui at his most Hebraic moments, for Trumpeldor, who won his spurs in the Russian Army fighting against Japan, and fell a victim to a Bedouin sniper in Palestine recently, is a modern Jewish hero, and his name has all the symbolism of the heroic present of the national revival, while "nebel" is the Hebrew for a form of lute and "kinnor" is the Hebrew for the harp. In another poem there is a reference to the "schofar," at once the "Last Trumpet" and the fanfare of freedom. A glossarial note in a future edition would help those unacquainted with Hebrew. The Jewish reader will probably detect a fulness of Christian allusion, and the non-Jewish will emphasise the verve and *élan vital* of the flaming Hebraism. Perhaps that is the best testimony to the writer's humanism. He prefixes his poem "Unité" with Terence's well-known lines, "Homo sum; nihil humani a me alienum puto." (This is as he quotes it.) The views of Jewish and non-Jewish readers will confirm the quotation as the motto of the poet's heart.

The Shah of Persia has returned to Paris.

M. Stambolisky, the Bulgarian Premier, has arrived in Prague from Geneva.

Mr. C. T. Allen, C.I.E., left England on October 12 for India.

The Czecho-Slovak Minister and Mme. Mastny have returned to London from Rio de Janeiro.

Lord and Lady Islington have left London for Rushbrooke Park Suffolk.

Fatollah Khan Noury, Secretary at the Persian Legation, has returned from the Continent.

Lady Helen Brocklehurst is leaving England this week to join Captain Brocklehurst in the Sudan.

The marriage arranged between Mr. Frederick B. Geidt, M.C., and Miss Audrey Willmer White will take place in Calcutta in December.

M. K. Fotitch, First Secretary at the Yugoslav Legation, has left London for Vienna, where he will be married to Mlle. Tatjana Zurunitch.

The Marchioness Curzon of Kedleston has returned to Carlton House Terrace from Hackwood, Basingstoke.

The engagement is announced between Captain J. R. Brookes, Indian Cavalry, son of the Rev. Canon J. R. Brookes, of Cyprus, and Leonora Dowler, daughter of Dr. Dowler, Mussoorie, India.

Dr. Rechad Bey, representative of the Angora Government, concluded his mission to this country on Sunday, and left for Paris on his way to Angora. He hopes to return in five weeks' time.

The King has created Sir John Henry Kerr, Governor of Assam, a Knight Commander of the Star of India, on his appointment to be Governor of Assam.

The engagement is announced between Captain Francis Leslie Philpott, Indian Army, elder son of Mr. and Mrs. F. S. Philpott, of Clifton, Bristol, and Doreen Kathleen Marjorie, younger daughter of Mr. and Mrs. G. Warren, of Redland, Bristol.

In celebration of the fourth anniversary of the Republic of Czecho-Slovakia an Anglo-Czech service will be held on Sunday afternoon, October 29, at 3.15, in Christ Church, Westminster Bridge Road, London, S.E.1.

Sir Oswald Bosanquet, Sir Gordon and Lady Fraser, Sir Logie Watson, Lady Roberts, Mrs. Capel-Cure, and Sir Ludovic Porter left London last week by the P. and O. "Bombay" express for Marseilles, where they joined the s.s "Kashgar" for Bombay.

Under the auspices of the East India Association a paper will be read by Mr. P. Padmanabha Pillai on "The Indian Labour Problem," at the Caxton Hall, Westminster, on October 23, at 3.30 p.m. Sir William S. Meyer, High Commissioner for India, will preside.

The engagement is announced between Brevet-Major Richard J. P. Wyatt, M.C., of the Sudan Political Service, eldest surviving son of Mr. and Mrs. Wyatt, of Cissbury, near Worthing, and Celia, elder daughter of Mr. and Mrs. Hubert Brinton, of Eton College.

A marriage has been arranged, and will take place shortly, between Major David Guy Porteous, 90 Punjabis, second son of David Scott Porteous, of Lauriston Castle, Montrose, and Beatrice Cecilia Sibbald, third daughter of the late Sir F. D. Sibbald Scott, Bt., R.N., and Jane Lady Sibbald Scott and sister of the present baronet.

The engagement is announced between Charles Leslie Rougier, M.C., 2nd Lancashire Fusiliers, Nowshera, India, elder son of Mr. and Mrs. C. I. Rougier, late of Odessa, Russia, and Marjorie Alice, only daughter of Mr. and Mrs. Percival Tanner, Oakhill Grove, Surbiton, late of Valparaiso, Chile.

A marriage has been arranged and will take place on January 3, in London, between Leonard Vyvyan Heathcote, of Calcutta, elder son of the late Rev. Gilbert Vyvyan Heathcote and of Mrs. Gourlay, Dorrington, Camberley, and Joyce Kathleen, only child of Mr. B. P. Willis, of the Imperial Bank of India, and of Mrs. Willis.

A marriage is arranged, and will shortly take place, between Major T. C. Fowle, I.A., Foreign and Political Department, Government of India, only surviving son of the late Colonel F. T. Fowle, C.B., R.A., and Mrs. Fowle, Summer Cove, Kinsale, Co. Cork, and Honor, younger daughter of the late Harry Williams and Mrs. Williams, of Beckbury, Shrewsbury.

The marriage between Mr. Rudolph Milner-White, I.C.S., second son of the late Sir Henry Milner-White, of The Deepdene, Southampton, and Geraldine Eveline, daughter of the late Hon. John Donohoe FitzGerald, K.C., and of the Hon. Mrs. FitzGerald, of 33, Harrington Gardens, took place last week at St. Jude's Church, Harrington Gardens.

Among those entertained at luncheon by his Highness the Emir Abdullah of Transjordania on October 15, at the Carlton Hotel, were Lieutenant-Colonel and Mrs. A. T. McGrath and General Haddad Pasha, the representative of Iraq in London. After luncheon, the Emir Emin Arslan

called upon Ali Riza Pasha er Rikabi, the Chief Adviser, who is in attendance upon his Highness.

Our Port Said Correspondent writes (October 9) :—Among those who have recently returned to the town are El Miralai Archer Bey, Commandant of the Suez Canal Police, with Mrs. Archer and children; also Mr. Roberts, of the Ports and Lights Administration, with Mrs. and Miss Roberts. Yesterday Mr. Woolley, who, with Colonel Lawrance, was engaged in surveying the Palestine-Sinai frontier when the War broke out, passed through on his way out to Mesopotamia. He is going out for archæological research.

Princess Christian, a godmother of the bride, and Princess Helena Victoria honoured with their presence the marriage of Lieutenant Geoffry Congreve, R.N., son of Lieut.-General Sir Walter Congreve, V.C., and Lady Congreve, to Madeleine, daughter of Mr. and Mrs. Henry Allhusen, of Stoke Court, Stoke Poges, Bucks, and granddaughter of Lady St. Helier, the ceremony taking place on Saturday in St. James's Church, Piccadilly, with the Bishop of London officiating.

THE ROUMANIAN CORONATION.

In honour of the coronation of the King and Queen of Roumania the Roumanian Minister and Mme. Titulesco were at home on Monday, October 16, at 50, Grosvenor Street, W. There was a large attendance of members of the Government and the Diplomatic Corps, as well as of the Roumanian colony and their friends. Among those present were :—The Lord Mayor and the Lady Mayoress of London, the Marchioness of Donegal, the Marquis and Marchioness of Sligo, the Earl and Countess of Shaftesbury, Lady Doreen Knatchbull, Lady Ponsonby, Lord and Lady Swaythling, Lord and Lady Inchcape, Sir Maurice and Lady de Bunsen, Sir Edward and Lady Boyle, Viscount and Viscountess Gort, Viscount and Viscountess Curzon, Lady Strachie, Lady Lawrence, Sir Henry and Lady Bax-Ironside, Sir Glyn and Lady West, Sir Sydney Lee, Sir John and Lady Stavridi, Sir Robert and Lady Hadfield, Sir John and Lady Horner, Sir John and Lady Hanbury-Williams and Miss Hanbury-Williams, Wing-Commander Louis Greig, and Mr. P. G. Vansittart.

THE MISSIONERS FOR INDIA.

Following is a complete list of the twenty-four clergy and six lady Missioners of Help who are visiting India in order to stimulate and strengthen the life of the Church among Anglo-Indians :—

Bishop of Peterborough and Mrs. Woods; Dean of Manchester; Rev. Father Waggett, the Mission House, Oxford; Rev. Basil Phillips, St. Mark's Lodge, South Farnborough; Rev. E. N. Mellish, V.C., St. Mark's Vicarage, Clarendon Road, Lewisham; Rev. J. C. Pringle, Cannon Street Road, E.; Rev. J. J. G. Stockley, the Rectory, Wolverhampton; Rev. M. S. Evers, C.M.S.; Rev. T. H. Masters, Vicarage, Petersfield, Hants; Rev. D. G. Macpherson, Clergy House, Redcliffe, Bristol; Rev. Spencer Elliott, St. Paul's Vicarage, Sheffield; Rev. Guy Vernon Smith, M.C., Rectory, Hackney; Rev. E. L. A. Hertslet, Vicarage, Ramsgate; Rev. Eric Southam, St. Paul's Vicarage, Haggerston; Rev. J. H. Peabody, St. James's Vicarage, Clacton-on-Sea; Rev. C. Pepys, Compton Beauchamp Rectory, Shrivenham, Berks; Rev. Canon Greaves, Finedon Vicarage, Wellingborough; Rev. C. R. Pattison Muir, Victoria Park, Manchester; Rev. R. Palmer, D.S.O., St. Martin's Place, Trafalgar Square; Rev. E. P. Swain, Vicarage, Birchfield, Birmingham; Rev. S. E. Swann, Trinity Hall, Cambridge; Rev. R. J. Wood, Holbeck Vicarage, Leeds; Rev. J. Baghot-De La Bere, Vicarage, Prestbury, Glos.; Rev. C. J. Morton, St. Saviour's Vicarage, Denmark Park, S.E.; Miss Thornton, Places, Compton, Winchester; Miss Higson, Josephine Butler Memorial House, Princes Avenue, Liverpool; Miss Cowlin, Rodborough House, Sneyd Park, Bristol; Lady Fletcher, Campden Hill Gardens, W.; and Mrs. G. H. Bell, Mansion Place, S.W.

MESOPOTAMIA-PERSIA DINNER.

A successful gathering took place on the evening of October 14, when a large number of those interested in Mesopotamia and Persia met at a dinner in the Imperial Restaurant, Regent Street, London, under the presidency of Lieut.-Colonel Sir Wolseley Haig, K.C.I.E. The gathering was of a social nature, and speeches were limited to the health of the President and a special tribute to Mr. C. M. Pickthall, who had worked so indefatigably for the success of the dinner. The desire that the dinner should become an annual function was cordially supported, and it is to be hoped that steps will be taken to carry this scheme into effect. Among those present were:—Colonel Sir William H. Willcox, K.C.I.E., Sir C. W. Baxter, Lieut.-Colonel S. H. Bridcut, Mr. N. D. Calder, Mr. W. E. C. Greenwood, Colonel W. Haywood Hamilton, Mr. E. H. Keeling, Captain J. M. Mackenzie, Mr. Victor Mallet, Lieut.-Colonel L. Nalder, Colonel F. W. Pirrie, Commander S. Rawson, Colonel H. S. Slater, Major E. B. Soane, Colonel J. H. Stanley, Colonel C. B. Stokes, Major B. Temple, Mr. C. A. Walpole, and Mr. H. Warburton.

THURSDAY, OCTOBER 19, 1922.

BRITAIN AND TURKEY.

In his speech at Manchester on Saturday Mr. Lloyd George replied to his critics, but not to their criticisms. He showed himself, indeed, more exercised over the circumstance that exception should be taken to his policy during "negotiations, delicate and difficult and dangerous," than concerned to inquire whether the criticisms were justified and at the same time constructive. The speech was essentially of the fighting political type, and one in which it may have seemed to the speaker incongruous to include any reasoned statement of British policy in the Near and Middle East. It is, however, precisely in regard to that policy that his critics and Mr. Lloyd George part company, and the fact that he should consider at this time of grave crisis that the situation can be met by the bandying of personal polemics only serves to substantiate the contention that he has lost the grip on world affairs which it is essential that the Prime Minister of Great Britain should always have. With party politics we are not here concerned; but British policy in the Near and Middle East is of such vital importance to the whole Empire and to the peace of the world that it must not be subordinated to personal considerations. It is an axiom that in international affairs Britons should invariably try to exhibit a united political front at home; but if the conditions under which the Government has been called upon to conduct the Mudania negotiations are, according to Mr. Lloyd George, "without precedent," he must also admit the unprecedented nature of the position in which the Empire finds itself to-day. Everywhere there is profound distrust of Great Britain, as well as the utmost reluctance to co-operate with her. If she has impressed the world at all, it is with the conviction that the present Government is ready to do the one thing that the country wishes most of all to avoid—that is, to run the risk of war. No doubt, the action which the Prime Minister summed up in the words "it is because not merely we threatened, but we meant it," serves its purpose, but it can hardly be said to fit in with the world's present requirements. The country is convinced that peace can be maintained on far less expensive lines, and when the Prime Minister refuses to explore the alternative methods suggested, he can hardly complain if the country considers that for once the golden rule of a united home front must be broken, for fear that Great Britain may drift into still graver peril.

Two or three times in the course of his speech the Prime Minister purported to meet the criticisms of those who have challenged his policy; but in no single instance did he refer to any of the real points at issue. It is not true, for example, that in any responsible or knowledgeable quarter the Government was asked to allow the Kemalists to cross the Straits, or was urged to refrain from the use of force in the event of their attempting to do so. The critics have fastened upon certain definite points, and it was noticeable that Mr. Lloyd George did not allude to one of these. No reference was made—most significant of all omissions—to the official manifesto of September 16, the "terrible mistake" of an utterly mistaken policy; emphasis was laid on the indispensability of the freedom of the Straits, but no evidence was produced that their freedom was in any way threatened, or that Mustapha Kemal intended to allow his quarrel with the Greeks to involve his weak forces in a war with the Allies or with the British. Again, Mr. Lloyd George made no attempt to explain who was responsible for rejecting from 1919 to 1922 a settlement which was urged in 1918 and would have settled then the Turkish question, and which now has been embodied in the Mudania terms. He made the flesh of his audience creep with allusions to the horrors that would have followed if the Kemalists had crossed over to Europe; but he did not state how they could cross in the face of an Allied warning, if the British fleet had maintained the watch and ward on the waterway that it has kept for the last four years. There can be no question that the immediate crossing over to Europe of the Kemalist army might have been attended with the horrors so graphically described by the Prime Minister; but in the case of most people, any satisfaction over the escape of the potential victims "who were trusting to the plighted word of France, Italy, and Britain as their shield and their defence, and who are thanking God at this hour that Britain has kept faith," is tempered by the thought that only a mistaken policy, for which Great Britain was mainly responsible, brought them to such a danger, and has led to the destruction of thousands of others in Asia Minor. Moreover, the Kemalists will have crossed over to Constantinople and Thrace within a few weeks' time, and presumably they will still find there the fifteen thousand or twenty thousand Turks, who were ominously described by Mr. Lloyd George as "ready." Would it not have been better to have evolved a policy which would not have created Kemalists "flushed with victory" and waiting with their Constantinople compatriots for vengeance on those with whom they were on friendly terms in 1918?

However absorbing the political situation at home may be during the next few weeks, it is to be hoped that neither the Government nor the electorate will overlook the fact that a Near Eastern settlement has to be devised which must counteract as far as possible the mistakes of the past. To Mr. Lloyd George and Mr. Chamberlain apparently the Turkish question is little more than an inconvenient episode which provides a certain amount of capital for political opponents. To others it is the pivot on which the future safety and prosperity of the British Empire turn. Apart from considerations of the solidarity of the Mohammedan world, which render a reconsideration of Anglo-Turkish relations imperative, Russia remains a dubious factor in Asia. Whether she recovers her former strength or not, there can be no justification for throwing the new Turkey into her arms and keeping it there. If, then, Great Britain has good reason to avoid a permanent estrangement of the Turks, she must take definite steps to re-establish more satisfactory relations with them than is possible through the agency of those who cannot avoid harping on Turkish atrocities. Some of those atrocities, it may be opportune to remember, were deliberately prompted by a Great Power which had ousted British influence from Constantinople. Possibly—the attempt, at least, is worth while—the revival of British goodwill for the Turks, which has been lacking under Mr. Lloyd George's Government, can be used for more constructive

Digitized by Google

purposes. Let there be no illusions regarding foreign prestige in Turkey. Echoes of Angora days will, no doubt, be heard from time to time in a Kemalist Constantinople; they will not imply any permanent shifting of international values. For some time to come all the Allied Powers may be confronted with a somewhat aggressive insistence upon the strict letter of Turkish independence. Given the right spirit in Whitehall, patience and tact on the part of the right man on the spot in Constantinople will gradually make of Anglo-Turkish relations what they ought to be, to the lasting advantage of both Turkey and Great Britain.

JAMES ELROY FLECKER.

The Influence of the East.

"HASSAN." By James Elroy Flecker. (Heinemann. 6s.)
"COLLECTED PROSE OF JAMES ELROY FLECKER." (Heinemann. 6s.)
"JAMES ELROY FLECKER." By Douglas Goldring. (Chapman and Hall. 7s. 6d.)

I.

Of all the poets who died during the War Flecker stands in higher rank than any other. The importance of the work of some young men was exaggerated owing to the sad untimeliness of their end, and time has since bedimmed their names. But the fame of Flecker has certainly grown since his death, and the publication of the three books, the titles of which are given at the head of this article, might indicate almost a public interest in his work. Flecker did not in his lifetime attain any wide fame (though his merits were quickly and generously recognised by such diverse judges as Professor Quiller-Couch and Mr. G. B. Shaw); the tardiness with which his reputation has been built up merely denotes, therefore, its solidity.

But we do not propose to discuss the position of Flecker in English Literature; nor do we wish merely to review the two new books—two only, because the "Collected Prose" was reviewed in THE NEAR EAST when first it was published by Messrs. Bell two years ago. What we want to suggest is the vital influence that the East had upon Flecker and upon his work. For it was the East that realised and made communicable his life-long dreams; it was the East that turned his craftsmanship into art. Not that he ever wholly gave himself up to the East, from the numbing power of which, indeed, he ofttimes recoiled; but it was the theatre, so to speak, in which his ideas of versification and his ideals of poetry could best be tested and proved. Flecker, who was a Parnassian, and, therefore, worshipped clarity and precision, abhorred the misty and mystical in Eastern thought. It was the magic, not the mystery, of the East that drew him; and he was enabled, by coming into contact with its wealth and colours, to describe exactly what he had hitherto loosely imagined, and finally to inform his ever-fluid lines of thought. Yet it must not be inferred from this fact, of inestimable importance to his art, that he came to love the East better than the West; he ever remained an Occidental, and it was rather through the exercise of his intellectual imagination than through the adoption of any Oriental convictions or attitude towards life that he could create so genuinely an Eastern atmosphere for his work as for all artistic purposes to immerse his reader in exoticism (so genuinely, lamentable to state, as to start a series of pseudo-Oriental stuff by inferior imitators). Primarily, therefore, it was the physical East that attracted and reacted upon him; its psychological and spiritual nature he surely understood, but he never identified himself with it or became dependent upon it for the impulse of his art. Rather, as we shall later show, he was repelled by the inward significance of the East.

It may be well here briefly to trace the steps of Flecker's career in so far as it bears on our subject; and for this purpose we shall rely mainly on Mr. Goldring's little book and on the Introduction which Mr. J. C. Squire wrote for the "Collected Poems." (It may be said in passing that Mr. Goldring's book is rather thin and carelessly amassed; that it adds little to our knowledge of the poet, and, worse than that, that its reproduction of some of the hasty utterances of a dying man cannot possibly increase the object Mr. Goldring had in view—that of demonstrating the genius of Flecker. Were such an act wise or even fair, we might, by means of our own correspondence from Flecker, tell of the intensity with which he held certain views on the Eastern Question.) Flecker always admired the Greek and Latin literatures and histories, saturating himself so much in them that his endless poetical images were as often as not of classical origin. And his admiration was not, as so frequently it is with Englishmen, a sterile, inconsequent thing; it developed into an enthusiastic love for modern Greek and Italian. Sometimes the classical scholar is amazed and dumbed when he encounters the living representatives of the dead languages he has learned; but not so Flecker. He was able in his own mind, or, rather, it came to him naturally and without effort, to conceive of the modern Greeks and Italians as not unworthy descendants of the ancient Greeks and Romans; he loved, after he had come to know the people and their land, to talk of "the glory that *is* Greece." But, parallel with this classical tendency, or perhaps fused with it, came a bent towards definitely Oriental things. Even when a boy he had copied out the while of Sir Richard Burton's "Kasidah"; and in his teens Mecca was as real to him as Athens, Samarkand as Rome. What kindled and nourished these Eastern longings is unknown—conceivably it may have been his Jewish strain—but, in any case, they were constant, and ultimately realised. In 1908 he went up to Cambridge (making the unhappy choice of Caius) to study Oriental languages, having already decided to enter the British Consular Service. In June, 1910, he was sent to Constantinople, but, owing to an attack of the disease that was later to cause his death, soon had to return to England. In March of the following year he was back at Constantinople; in April he was transferred to Smyrna,

and afterwards spent a few months in Greece. He was posted to Beyrout in September, and remained there continuously (with the exception of one leave to England) until March, 1913. Then he again fell ill. He travelled to Switzerland, and was doomed never to see England again. For he died, but thirty-one years of age, in January, 1915; and is buried at Cheltenham.

When poets die young there always arises a discussion upon whether or not they had reached maturity. Now of Flecker's work as a whole we are not here judging; but we do doubt whether the vitalising power of the East upon it was not complete at the time of his death. In some ways Flecker loved the East; but he also dreaded it. He liked and was always proud, we are told, of his conduct as Consul, and when actively engaged in his duties was probably happy enough in his exile. But infinite longing for home sometimes came over him—the lanes of Gloucester and the lights of London kept stabbing him when free from his routine at Beyrout—and it was as much in moments like these, we suppose, as through his intercourse with Mohammedans that "led him to find more good in Christianity than he had previously suspected." For if the East sometimes fired his finest poems, it sometimes staggered his soul. It was the love of the poet that was felt for this East; the love of the poet and the man remained indissolubly steadfast in England. The East called him, and he went; England called him thence, and he could not go. Always this desire for home was coming over him, almost as much, perhaps, as an escape from the overpowering East as for its own sake. It is easily found in his poems; it is also present in his prose. Listen to this, for instance, from "Candilli," which is a sketch in the "Collected Prose": he is filled by the brightness, splendour, and loveliness of Candilli with but sorrow and unrest, and longs "for a slagheap or gaswork, or any strong, bold, ugly thing to break the spell of this terrible and malignant beauty that saps body and soul"—for here it was that he began to understand what he feared and shunned—"why men of the East will sit by a fountain from noon to night and let the world roll onward." Again, he says somewhere in the same book that Cricklewood is worth all the golden East, the beauty of which is "unearthly." The East to him was a flame that gave colour and shape to his fancies, but his imagination would not in his maturity have needed it.

The one thing that would perhaps have developed from all his Eastern experiences was his phil-Hellenism, which throve for its own pure sake, as part, indeed, of the poet and artist, and never as a mere auxiliary to his art. His Coronation Ode to King Constantine, "with a forty-page preface of the most violent kind, full of abuse and invective of pro-Turks, pro-Bulgars, the Liberal Press, with history of the Eastern Question," he was never able to publish; it would surely, as he anticipated, have created "a bit of a stir." But this fervent and increasing love of Greece really needed no fortification, as it generally does need, from hatred of rival nations. Flecker understood the East too well, as everyone who saw him at work admitted, to hate it expensively. Here, for example, is an extract, on the Turks, from a letter which Mr. Goldring quotes in his book: "I hate them because I am a modern civilised man. Catholics should and do love them. Why is Turkey rotten? Why is the Turk an inefficient gentleman? Islam? Nonsense: not entirely. Simply because he thinks middle-age and is middle-age. Saladin and Richard were both very near each other. They talked the same language. They both believed in Aristotle. But Saladin is still Saladin—arguing with a twist—because his 'Aristotle' was translated for him and he never learnt Latin at the Renaissance. Richard is now King George V. . . ."

But Flecker's opinions on such things do not greatly matter: they are more interesting than considerable. It is by his work and not by his life that he will be remembered, and we have nowhere pretended that a knowledge of his life is essential to an appreciation of his work. Varying opinions on the Turks and the Greeks there will always be, but there will never be another "Hassan," a play that may possibly survive the disruption of the Turkish and Greek States, so magnificent as to deserve an article to itself.

In this article we have loosely sketched a few of Flecker's opinions; we could, had we chosen, have amplified them so as to round the picture. But even were we to set down in full, with illustration from poem and prose, the passionate intensity of his love for the Greek Seas and for the high splendour of the East, it would in no fit way prepare us for this masterpiece, "Hassan." For here, suddenly and perfectly, is the sudden flowering of his choicest imagination, through which he has pierced the magic of the East and thrilled us with its secrets.

MUSICAL NOTES.

Chaliapin.

The fact that Chaliapin is the greatest male singer of his age is, I suppose, beyond dispute, for to his extraordinary magnetism and power critics and audiences of all lands have bowed. Certainly if there ever has been a finer dramatic artist I have never heard him. But, while acknowledging his greatness, it would be dishonest not to point out that this Russian, so typical of his country, has limitations; he is too magnificent to be perfect, too masterful ever to serve, too great an artist, in short, ever to be content with being a musician.

At the Royal Albert Hall recently he thoroughly moved a huge audience, a great part of which, however, was made up of non-musical people. And, indeed, in his Russian songs he was able to touch the depths of the most critical. From what deep caverns of thought and art, from what fiery furnaces of love and suffering he shaped his interpretations of such things as Rimsky Korsakoff's "The Prophet," Glinka's "Midnight Review," Dargomizhsky's "We Parted Haughtily," or Sakhnovsky's "The Wind is Moaning," it is impossible to describe; they were as profound, inexplicable, and yet as real as Russia herself. All these songs were bent and transformed under Chaliapin's mighty will, and they came out of the process stronger and truer to themselves than in print they stand. Other things, too, like the Volga Boat Song, which, in spite of great artifice (a pianoforte seemed singularly out of place) was, with its terrific rise and fall, made compelling, or Rubinstein's "Persian Song," which, in spite of its facile, amorous refrain, was made to seem the very dream of love—stamped alike the genius and he man. But there is something in Russian that distorts the line of perfect architecture; and the intensity which Chaliapin put into his Schubert and Brahms and Schumann was very notably out of place. Not even all the dramatic splendour which he imposed upon "The Two Grenadiers," for instance, could compensate for lack of form, and it was the quick, impetuous grief of the Slav that from first to last informed "The Ode of Sappho." Such songs as these in any case come out badly when sung in Russian, but when their outline is disregarded one's regret is doubled.

But this recital, had only Glinka's "Midnight Review" been sung, would have been memorable. Chaliapin has reserve upon reserve of strength, and to suggest that he emotionalises everything is ridiculous. His voice is of cold, magical beauty, one which I hold to be the greatest possible kind of voice; and were it allied to a temperament that could sometimes desist from Russianising, it would for me be the highest imaginable. But with it even as it is he can discover to us the peaks of Moussorgsky, Glinka, and the rest, for of these his vision is supreme and his illumination superb.

British Country Dance Tunes.

To the ordinary, unsophisticated Englishmen the publication by "His Master's Voice" Company of six records con-

Digitized by Google

taining arrangements made by Cecil Sharp of some Country Dance Tunes will be very welcome. Our country tunes literally smell of the English country; hay and apple-blossom, shadow and sunlight on green grass, the laughter of youth are in them; they are truly representative, and everyone should know them. That they are either great or profoundly suggestive is not claimed, but they certainly are extremely jolly, healthy, and clean. The object of these records is primarily to benefit dancers, for the tunes are many times repeated, without change of harmony. Their practical purpose will surely be attained, but perhaps more might have been made of them as music pure and simple. They might have been harmonised more freely and with more variety, so that those (though they must be very few when they hear these tunes) who cannot dance, but perforce merely listen, could be better entertained.

The very titles of the dances bring visions of freshness and of a content almost lost in this modern time. Here are some of them:—"Oranges and Lemons," "Broom, the Bonny, Bonny Broom," "Picking up Sticks," "The Lady in the Dark," "Chelsea Reach," "Haste to the Wedding," "Bonnets so Blue." Now these tunes are not all equal, but they all have points which make them worthy of survival, and the debt that music-lovers owe to Mr. Cecil Sharp for assiduously collecting them and making them known is very great. He himself conducts the Black Diamonds Band, which has made all these records, and though more fire and snap might have been put into some of the tunes, it is not for me to quibble at what so loving and reverent a musician has done. The tunes that I personally like best will not be everybody's choice, but here they are:—"Argeers," a chortling thing, very cheerfully decked out; "Broom, the Bonny Bonny Broom," of the most engaging frankness; "Picking up Sticks," a charming dance, though here carelessly played; "Haste to the Wedding," one of the jolliest English tunes there is, which wanders, hops, and jumps with eager contentment; "Brighton Camp," which has a military straightforwardness; and "Bonnets so Blue," of which the impulse is absolutely spontaneous. There are other tunes, too, which do appeal to many, like "Scotch Cap," with its saucy wisps of melody; "The Boatman," with its intriguing leaps; and others will prefer the urgent movement of "My Lady Cullen," or the winding little "Chelsea Reach," which climbs up and down until it reaches its self-complacent and satisfying end. All these dances, I repeat, have their several points of fascination. They are interesting, not because they are archaic or curious, but because they are essentially English. And everyone who performs them or who has seen them performed knows how pleasing they are and how superior to the characterless movements that go under the name of dance to-day. It may, indeed, be true that the modern dance reflects the modern time—so much the worse for the modern time. In point of beauty between the modern city and the old country dances there is no comparison; and now that the folk-dance movement has removed from itself the reproach of "crankiness," we may look for a revival and development of English country dancing, a prospect which is considerably increased by the publication of these records.

ANDANTE.

Cases of plague have been registered at Batoum, and the Soviet Government have sent the well-known epidemiologist Professor Zabolotny to organise means to prevent the plague from spreading to the other Black Sea ports.

It is stated from Athens that twelve Turkish political prisoners, who were expelled during the Greek occupation in Asia Minor, and also the former Mayor of Smyrna, have been handed over to the captain of an Italian steamer and are proceeding to Smyrna.

THE IRAQ TREATY.

The following is the text of the Treaty signed at Baghdad on October 10 between the British and Iraq Governments:—

His Britannic Majesty of the one part: and His Majesty the King of Iraq of the other part:

Whereas His Britannic Majesty has recognised Faisal Ibn Hussein as constitutional King of Iraq: and Whereas His Majesty the King of Iraq considers that it is to the interests of Iraq and will conduce to its rapid advancement that he should conclude a Treaty with His Britannic Majesty on the basis of alliance: and Whereas His Britannic Majesty is satisfied that the relations between himself and His Majesty the King of Iraq can now be better defined by such a Treaty of Alliance than by any other means:

For this purpose the High Contracting Parties have appointed as their Plenipotentiaries:

His Majesty the King of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, Emperor of India; Sir Percy Zachariah Cox, G.C.M.G., G.C.I.E., K.C.S.I., High Commissioner and Consul-General of His Britannic Majesty in Iraq:

His Majesty the King of Iraq: His Highness Sir Saiyid 'Abdur-ur-Rahman, G.B.E., Prime Minister and Naqib-al-Ashraf, Baghdad:

Who, having communicated their full powers, found in good and due order, have agreed as follows:—

ARTICLE I.—At the request of His Majesty the King of Iraq, His Britannic Majesty undertakes subject to the provisions of this Treaty to provide the State of Iraq with such advice and assistance as may be required during the period of the present Treaty, without prejudice to her national sovereignty. His Britannic Majesty shall be represented in Iraq by a High Commissioner and Consul-General assisted by the necessary staff.

ARTICLE II.—His Majesty the King of Iraq undertakes that for the period of the present Treaty no gazetted official of other than Iraq nationality shall be appointed in Iraq without the concurrence of His Britannic Majesty. A separate agreement shall regulate the numbers and conditions of employment of British officials so appointed in the Iraq Government.

ARTICLE III.—His Majesty the King of Iraq agrees to frame an Organic Law for presentation to the Constituent Assembly of Iraq and to give effect to the said law, which shall contain nothing contrary to the provisions of the present Treaty and shall take account of the rights, wishes and interests of all populations inhabiting Iraq. This Organic Law shall ensure to all complete freedom of conscience and the free exercise of all forms of worship, subject only to the maintenance of public order and morals. It shall provide that no discrimination of any kind shall be made between the inhabitants of Iraq on the ground of race, religion, or language, and shall secure that the right of each community to maintain its own schools for the education of its own members in its own language, while conforming to such educational requirements of a general nature as the Government of Iraq may impose, shall not be denied or impaired. It shall prescribe the constitutional procedure, whether legislative or executive, by which decisions will be taken on all matters of importance, including those involving questions of fiscal, financial, and military policy.

ARTICLE IV.—Without prejudice to the provisions of Articles XVII. and XVIII. of this Treaty, His Majesty the King of Iraq agrees to be guided by the advice of His Britannic Majesty tendered through the High Commissioner on all important matters affecting the international and financial obligations and interests of His Britannic Majesty for the whole period of this Treaty. His Majesty the King of Iraq will fully consult the High Commissioner

on what is conducive to a sound financial and fiscal policy and will ensure the stability and good organisation of the finances of the Iraq Government so long as that Government is under financial obligations to the Government of His Britannic Majesty.

Article V.—His Majesty the King of Iraq shall have the right of representation in London and in such other capitals and places as may be agreed upon by the High Contracting Parties. Where His Majesty the King of Iraq is not represented he agrees to entrust the protection of Iraq nationals to His Britannic Majesty. His Majesty the King of Iraq shall himself issue exequaturs to representatives of Foreign Powers in Iraq after His Britannic Majesty has agreed to their appointment.

Article VI.—His Britannic Majesty undertakes to use his good offices to secure the admission of Iraq to membership of the League of Nations as soon as possible.

Article VII.—His Britannic Majesty undertakes to provide such support and assistance to the armed forces of His Majesty the King of Iraq as may from time to time be agreed by the High Contracting Parties. A separate agreement regulating the extent and conditions of such support and assistance shall be concluded between the High Contracting Parties and communicated to the Council of the League of Nations.

Article VIII.—No territory in Iraq shall be ceded or leased or in any way placed under the control of any Foreign Power; this shall not prevent His Majesty the King of Iraq from making such arrangements as may be necessary for the accommodation of foreign representatives and for the fulfilment of the provisions of the preceding Article.

Article IX.—His Majesty the King of Iraq undertakes that he will accept and give effect to such reasonable provisions as His Britannic Majesty may consider necessary in judicial matters to safeguard the interests of foreigners in consequence of the non-application of the immunities and privileges enjoyed by them under capitulation or usage. These provisions shall be embodied in a separate agreement, which shall be communicated to the Council of the League of Nations.

Article X.—The High Contracting Parties agree to conclude separate agreements to secure the execution of any treaties, agreements, or undertakings which His Britannic Majesty is under obligation to see carried out in respect of Iraq. His Majesty the King of Iraq undertakes to bring in any legislation necessary to ensure the execution of these agreements. Such agreements shall be communicated to the Council of the League of Nations.

Article XI.—There shall be no discrimination in Iraq against the nationals of any State, member of the League of Nations, or of any State to which His Britannic Majesty has agreed by treaty that the same rights should be ensured as it would enjoy if it were a member of the said League (including companies incorporated under the laws of such State), as compared with British nationals or those of any foreign State in matters concerning taxation, commerce or navigation, the exercise of industries or professions, or in the treatment of merchant vessels or civil aircraft. Nor shall there be any discrimination in Iraq against goods originating in or destined for any of the said States. There shall be freedom of transit under equitable conditions across Iraq territory.

Article XII.—No measure shall be taken in Iraq to obstruct or interfere with missionary enterprise or to discriminate against any missionary on the ground of his religious belief or nationality, provided that such enterprise is not prejudicial to public order and good government.

Article XIII.—His Majesty the King of Iraq undertakes to co-operate, in so far as social, religious, and other conditions may permit, in the execution of any common policy adopted by the League of Nations for preventing and combating disease, including diseases of plants and animals.

Article XIV.—His Majesty the King of Iraq undertakes to secure the enactment, within twelve months of the coming into force of this Treaty, and to ensure the execution of a Law of Antiquities based on the rules annexed to Article 421 of the Treaty of Peace signed at Sèvres on August 10, 1920. This Law shall replace the former Ottoman Law of Antiquities, and shall ensure equality of treatment in the matter of archæological research to the nationals of all States members of the League of Nations, and of any State to which His Britannic Majesty has agreed by treaty that the same rights should be ensured as it would enjoy if it were a member of the said League.

Article XV.—A separate agreement shall regulate the financial relations between the High Contracting Parties. It shall provide, on the one hand, for the transfer by His Britannic Majesty's Government to the Government of Iraq of such works of public utility as may be agreed upon and for the rendering by His Britannic Majesty's Government of such financial assistance as may from time to time be considered necessary for Iraq, and, on the other hand, for the progressive liquidation by the Government of Iraq of all liabilities thus incurred. Such agreement shall be communicated to the Council of the League of Nations.

Article XVI.—So far as is consistent with his international obligations His Britannic Majesty undertakes to place no obstacle in the way of the association of the State of Iraq for customs or other purposes with such neighbouring Arab States as may desire it.

Article XVII.—Any difference that may arise between the High Contracting Parties as to the interpretation of the provisons of this Treaty shall be referred to the Permanent Court of International Justice provided for by Article 14 of the Covenant of the League of Nations. In such case, should there be any discrepancy between the English and Arabic texts of this Treaty, the English shall be taken as the authoritative version.

Article XVIII.—This Treaty shall come into force as soon as it has been ratified by the High Contracting Parties after its acceptance by the Constituent Assembly, and shall remain in force for twenty years, at the end of which period the situation shall be examined, and if the High Contracting Parties are of opinion that the Treaty is no longer required it shall be terminated. Termination shall be subject to confirmation by the League of Nations unless before that date Article VI. of this Treaty has come into effect, in which case notice of termination shall be communicated to the Council of the League of Nations. Nothing shall prevent the High Contracting Parties from reviewing from time to time the provisions of this Treaty, and those of the separate Agreements arising out of Articles VII., X., and XV., with a view to any revision which may seem desirable in the circumstances then existing, and any modification which may be agreed upon by the High Contracting Parties shall be communicated to the Council of the League of Nations.

The ratifications shall be exchanged at Baghdad.

The present Treaty has been drawn up in English and Arabic. One copy in each language will remain deposited in the archives of the Iraq Government, and one copy in each language in those of the Government of His Britannic Majesty.

In witness of which the respective Plenipotentiaries have signed the present Treaty and have affixed thereto their seals. Done at Baghdad in duplicate this 10th day of October One thousand nine hundred and twenty-two of the Christian Era, corresponding with the 19th day of Safar, One thousand three hundred and forty Hijrah.

NOTES AND NEWS.

1, Devonshire Square,
London, E.C.2.

After Mudania.

It is quite a refreshing change in these times to have a week without a foreign crisis. But it does not need any prevision to see that this state of things is not likely to endure. Granted that the Peace Conference passes off smoothly, it will not be long before the Reparations problem confronts us again. The Near Eastern crisis has monopolised the field to the exclusion of all else, and most people have probably forgotten that all that happened a little time ago was that the problem was postponed in effect. The present chaotic movements of the German exchange, which now stands, by the way, at above the level reached during the previous crisis, is an indication of what is to be looked for. It is difficult to believe that anyone now holds the conviction that Germany can be made to pay all that is demanded. One can only trust that the time for a settlement when it comes will find the Allies at one as to a reasonable and permanent arrangement with regard to the whole Reparations question. With the Near Eastern difficulty about to disappear, the Reparations question is the one great remaining obstacle in the way of the smooth progress of reconstruction.

Turkish Loan Arrears.

It was expected that a further offer would shortly be forthcoming with regard to the arrears of interest and drawings on the Turkish Loans, and this has now been made. I will only briefly refer to the details here. The loans affected are the Four per Cent. 1890 (Osmanié), the Five per Cent. 1896, the Four per Cent. 1901-5, the Four per Cent. 1902 (Douanes), the Four per Cent. 1908, and the Five per Cent. 1914. Holders of these loans are offered a settlement in respect of the coupons and drawn bonds due from July, 1920, to September, 1922, in French francs on and after October 31. As regards the coupons, the offers range from 1.875 francs per coupon to 10 francs. Only two loans are affected as regards drawn bonds, the Four per Cent. 1890 and the Five per Cent. 1896. In respect of the former, the offer is 375 francs for each £20 bond, and in the case of the latter 400 francs.

The Future of Smyrna.

Later reports only serve to emphasise the extent of the damage that has been done in Smyrna by the fire, and it will evidently be a stupendous undertaking to restore the port to a condition of activity. Indeed, it is very unlikely that Smyrna will regain its pre-war prosperity in this generation. Were it not for its ideal position, the view might well be entertained of developing the port's activities at some other centre, but there is no neighbouring place with the facilities that Smyrna can offer, and none that can serve so well the rich districts that lie beyond Smyrna. How quickly the port will recover depends mainly on two factors. The position attained by Smyrna, as I have often emphasised in these columns, was due mainly to British activities, and how far the traders who helped to make Smyrna can assist in restoring her will naturally hinge on the question of compensation. It is not the first time since the war, it must be remembered, that British traders at Smyrna have suffered, and their financial position has naturally been seriously affected. The other factor, and a very important one, is the position in the interior, which has gradually grown worse ever since the war. Until the regions in question are again populated and flourishing it is obvious that the trade of Smyrna must be circumscribed.

Egypt's Finances.

The figures for the past financial year, which are now available, show that Egypt is in a much more satisfactory position than had been anticipated would be the case. The revenue was £E5,000,000 above the estimate, while the expenditure was £E900,000 below it, and instead of there being a deficit of £E2,000,000, there was a surplus of rather over double that amount. Egypt thus has at her disposal a very useful sum with which to meet future contingencies, though, with the general improvement in the situation, it is far from likely that it will be needed in the near future. Still, in the case of a country dependent, like Egypt, on a few very variable factors for prosperity, there can never be absolute certainty, and there is every incentive to build up a strong reserve fund.

The Nizam's State Railways.

There was a substantial increase in the net earnings on the broad-gauge system of the Nizam's Guaranteed State Railways for the year ended March 31, but this was offset by a decrease in the net earnings on the metre-gauge system. The earnings on the broad-gauge system amounted to £325,829, as compared with £292,110, and were, as a matter of fact, the second highest in the company's history. On the metre-gauge system, the Hyderabad-Godavery Valley line, the earnings amounted to £229,860, as compared with £275,544.

Irregularity of Mails.

Once again it becomes necessary for me to criticise the overseas mail services. For some time now the Eastern mails have been arriving with bewildering inconsequence, sometimes on one day in the week, sometimes on another. It need scarcely be pointed out that this irregularity is most unsatisfactory from the commercial point of view, and if trade were pursuing its normal course would be a serious handicap to business enterprise. I cannot believe that four years after the war it is necessary, though I have no doubt that that is the reply we shall get from official quarters.

EGYPT.

Cairo, October 5.

The Economic Situation.

Matters economically are very critical, and the slump in cotton has been hitting the cultivators very heavily. The Government has felt constrained to come to the assistance of the agricultural element in general and the smallholder in particular, and a series of measures destined to relieve the situation have been decided upon or are under contemplation. In the first place, an important amendment has been made in the Bourse regulations to protect cotton growers from the Alexandria speculators, who, under the previous regulations, were frequently able to rig the market against the cultivator.

Next, an arrangement has been come to with the Agricultural Bank of Egypt for advances to be made to landowners of fifty feddans and under, no individual loan to exceed three times the land tax paid by the borrower. These loans are to be repaid at periods varying with the amount, but not exceeding one year. The arrangement is intended to assist cotton owners and relieve them from having to put all their cotton on the market at the same time; but it is laid down that, while no loan will be made to any landowner who has already sold his cotton, a borrower who disposes of his crop before repayment of his loan is due must reimburse the bank out of the proceeds of the sale. The rate of interest charged will be 6 per cent., and the Government guarantees repayment, and undertakes to carry out all the collection operations by means of its administrative machinery.

A further measure under consideration is a law forbidding the sale of agricultural products deposited as a pledge without an order from the Courts. Existing legislation does in a way provide for this, but the various banks have been in the habit of making applicants for advances against cotton and cereals sign an authority permitting them to sell whenever they liked the products which had been deposited as a pledge. Very often this power was very unfairly used, and the new measure contemplated by the Government is intended to afford the agricultural element some greater protection than it enjoys at present.

Finally, the Government proposes to introduce without any further delay a law for the control and encouragement of agricultural syndicates. This law will be based on the draft approved by the Legislative Assembly in June, 1914, in which certain amendments rendered necessary by subsequent experience have been introduced. This measure is a most welcome one, for Egypt is just the country where co-operation is most necessary and most likely to succeed. Already there are several successful syndicates in the country, and recently a new departure was made by the creation of a co-operative society at Damietta. It is to be hoped that these syndicates and societies will be closely controlled so as to prevent them from becoming political organisations, for otherwise, owing to the close contact they maintain with the masses, these syndicates might become a very formidable weapon in the hands of any political party which manages to gain control.

ROUMANIA.

Bucharest, October 6.

The Financial Crisis.

As I reported in my last letter, the Minister of Finance, together with the Governor of the National Bank and the directors of the principal local banks, are deliberating on the ways and means of solving the present money stringency, which is so keenly felt by the local market. Although so far nothing definite has been decided upon, it appears that both the Minister of Finance and the Governor of the National Bank are entirely against a new issue of banknotes. M. Vintila Bratianu bases his standpoint on the following considerations. The State owes 13 milliard lei to the National Bank, whereas the entire banknote issue hardly reaches 15 milliard lei. And as the State has now a budgetary surplus, it will start redeeming its debt to the National Bank, so that the latter in turn will be enabled to assist agriculture, industry, and trade without having to resort to the printing machine. Thus, the public and private credit will improve along with the State's finances.

In other words, in proportion to the diminution of the State's debt with the National Bank, the corresponding portion of available banknotes will be employed to satisfy the economic needs of the country; or, what the bank will be giving to trade and industry with one hand, she will receive from the State with the other. This procedure will gradually decrease the State's debt without producing a sudden deflation—generally disastrous to the national economy—and will continue until the National Bank will be placed in the position of reconstituting the legal gold reserve of one-third in gold and high currency foreign bills.

From the above it is thus evident that the State, by the fact that from the commencement of this year it has not appealed to the National Bank for a fresh loan nor issued a single Treasury bond, is determined to bring about deflation by redeeming its debt with the National Bank.

A Roumanian Commission is now on the way to Vienna to take delivery of 20,900,000 gold crowns as Roumania's second quota from the liquidation of the Austro-Hungarian Bank. The first quota of 14 million gold crowns were received some time back. Roumania's total quota from the Austro-Hungarian Bank will be 72 to 80 million gold crowns; the remaining balance will be cashed by and by as the liquidation work progresses. This gold stock will not be used as a basis for fresh issues of banknotes, but, on the contrary, to withdraw the equivalent amount of lei notes according to the current value of gold. Thus with the forthcoming 21 million gold crowns about 600 million lei will be withdrawn.

Digitized by Google

Encouragement of Home Industries.

In order to encourage certain home industries as well as the sale of their products in the country, the Ministry of Industry and Commerce has decreed that no exemption or reduction of Customs duty should be granted to those imported articles that can be manufactured also in the country. Thus, it was decided at the last sitting of the Industrial Commission that this new regulation should be applied to camelhair belting and Manila fibre ropes. Exception will not be made even if these articles are imported by industrial undertakings which enjoy the benefits of the law for the encouragement of national industry.

ALBANIA.

Tirana, October 4.

The Budget Deficit.

At the beginning of the current year the approximate forecasts of the Budget showed an enormous deficit, but, owing to the measures of economy that have been carried out, it has been possible to draw up a Budget in which the deficit is much reduced. The total expenditure for the current year is estimated at 22,195,552 gold francs, while the receipts stand at 19,747,210 gold francs, there being thus a deficit of 2,448,342, which has been occasioned by the maintenance of an army and of a mobile gendarmerie. The expenditure is allocated as follows (in gold francs):—Ministry of War, 7,310,632; Public Works, 3,815,832; Interior, 2,454,343; Public Instruction, 2,365,813; Finance, 3,800,888; Justice, 891,596; Posts and Telegraphs, 884,648; Foreign Affairs, 732,000.

Trouble with Italy.

The economic crisis, to which I have often referred in my letters, tends to lessen. For the past two months Albania's exports have been on the up-grade, and goods of which there are abundant stocks, such as skins, wools, oils, etc., are somewhat more in demand than before. The general situation would show an improvement were it not for the handicaps imposed on Albania from without. I have already dealt with the prohibition imposed by Italy on the importation of Albanian horses. Now, and without the excuse of the danger of infection—which has never existed—Italy is creating difficulties in regard to the importation of skins, wools, poultry, and eggs coming from Albania, and on the passage in transit of these commodities. The reports of the veterinary surgeons in Albania state that there are no illnesses among the cattle.

INDIAN TREASURY BILLS.

Tenders for Rs.1,50,00,000 six months' bills and for Rs.50,00,000 nine and twelve months' bills were opened on October 13. The total amount applied for was Rs.4,39,00,000 six months' bills, Rs.5,00,000 nine months' bills, and Rs.50,00,000 twelve months' bills. Tenders for six months' bills at Rs.97.14a. received about 17 per cent., and above in full. Tenders for nine months' bills were accepted in full, the rate being Rs.96.10a. Tenders for twelve months' bills were rejected. The average accepted rate for six months' bills was Rs.97.14a. 10p. per cent., equivalent to a discount rate of 4.2336 per cent. per annum. The accepted rate for nine months' bills, Rs.96.10a., is equivalent to a discount rate of 4.6572 per cent. per annum.

It is announced that Mr. M. M. S. Gubbay has joined the board of the P. and O. Banking Corporation, of which he is general manager.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

India.

Serge, etc.—The High Commissioner for India invites tenders for the supply of serge, navy blue, 54-in., and drills, twist, high speed. Forms of tender may be obtained from the Director-General, India Store Department, Branch No. 11, Belvedere Road, Lambeth, S.E.1. October 27.

Egypt.

Uniform Clothing.—The Egyptian Postal Administration, Alexandria, invites tenders for the supply of uniform clothing during one year, 1923-4.

The principal items of clothing required are as follows:—Jumpers, blue serge and khaki drill; neckties, black silk; overcoats and capes, waterproof; overcoats, khaki serge; riding breeches, khaki and Bedford corded cloth; tarbrushes; tarbrush covers, khaki drill; trousers, khaki drill, khaki serge and blue serge; tunics, blue serge, khaki drill and khaki serge; uniforms, white duck, blue serge and blue jean, etc.; gaiters for cyclists, khaki drill (in four sizes). Tenders on the proper forms, and accompanied by a provisional deposit of 2 per cent. of the total value of the offer for the year's supply, should be addressed to the Postmaster-General, Alexandria.

Samples of the greater part of the uniforms required can be inspected by United Kingdom firms at the London office of the Egyptian Government, Queen Anne's Chambers, Broadway, Westminster, London, S.W.1. The tenderer must, however, submit samples of not less than one square yard, duly sealed by him, of the quality of cloth he offers. November 15. (D.O.T.)

Canvas Money Bags.—The Central Stationery Stores Department of the Egyptian Ministry of Finance invites tenders for the supply of canvas money bags as follows:—3,500 large size 11 in. by 15¼ in., stamped "Egyptian Government" in black; 6,000 medium size 11 in. by 14¼ in., stamped "Egyptian Government" in black. Sealed tenders, on the proper forms, to be addressed to the Director, Central Stores, Ministry of Finance, Cairo. Tenderers must submit with their offers sealed samples in duplicate of the goods which they propose to supply. November 4 (D.O.T.).

Electric Cranes and Lifts.—The Administration of Ports and Lighthouses, Alexandria, invites tenders for the following fixed and movable lifting apparatus for service at the Port of Alexandria:—

Eight travelling electric portico quay cranes, six of which are to be of 2,500 kilogs., the other two being double-power cranes of 2,500-5,000 kilogs.

Eight travelling balcony cranes of 500 kilogs.

Eight electric lifts; maximum carrying power, 1,500 kilogs.; speed per second, 0.50 metre.

Supply and laying 320 metres of rails for the running of the quay cranes.

Supply and laying of 280 metres of rails for the running of the balcony cranes.

(The electric power will be furnished by the Railways Administration's Power Station, as three-phase current at 220 volts, 40 cycles.)

Sealed tenders are to be addressed to the Directeur-Général, Administration des Ports et Phares, Alexandria, Egypt. December 20. (D.O.T.)

Clothing, etc.—The Lunacy Division, Abbâsîya, invites tenders for the supply of clothing, bedding, furniture, hardware, slippers, brushes, and other household necessaries required for Abbâsîya and Khanka Asylums for one year from April 1, 1923. November 21.

Iraq.

Ordnance Stores.—The Ministry of Defence in Baghdad invites tenders for the supply of annual stores required by the Iraq Army Ordnance Department. The stores are divided into three sections, as follows:—

Section 5a.—Packsaddlery, harness, and miscellaneous stable requirements, such as nose-bags, brushes, curry combs, horse-rubbers, etc.

Section 6a and 6b.—Officers' saddlery, universal saddlery, and various articles for repair, including buckles, curb chains, etc.

Section 11b.—Pickaxes, crowbars, intrenching implements, brass and copper sheet, mild steel flat and bars, brass and copper wire, etc. A telegram has been received from the Ministry of Defence, Baghdad, to the effect that, in view of the representations made by the Department of Overseas Trade in the matter, the closing date fixed for the receipt of the above tender has been postponed to November 20.

According to the *Gazette de Prague*, the Ministry of Commerce will henceforth permit the import of photographic plates from Germany only when the importer can show that he has purchased an equal quantity of plates of home manufacture.

Stock and Share Markets.

AN UNCERTAIN CLOSE.

Home Politics an Unsettling Factor.

(From Our Own Correspondent.)

London, Tuesday morning.

Very cheerful conditions have obtained on the Stock Exchange during most of the past week as a result of the belief that the Near East trouble is settled. In general—there have been exceptions—the markets have been quite buoyant, and in certain directions there has been a most refreshing tendency for business to broaden out. But at the week-end home politics began to check business, and it is at least possible that until the election is over, and, what is even more important, the Reparations question, which comes up for settlement shortly, is arranged, there may be a return to something approaching the stagnant conditions with which we have become only too familiar during many months. But what has happened during the past week is enough in itself to indicate plainly what is to be expected once the trade horizon is unclouded, as it will be with the solution of the Reparations problem. There will be a general rise in shares; in fact, the House, as a whole, should enjoy a miniature "boom."

The long-anticipated development in regard to Rubber has taken place, and it seems probable that the difficulties with which the industry has been confronted will now disappear. It is estimated that the effect of the arrangement will be to raise the price of rubber to the region of 1s. 6d. lb., at which level any company can, of course, make good profits. The raw commodity has already reached 10½d., and the share market has cheerfully responded each day to its gradual progress. Almost every share has already had quite a sharp rise, while the "floriners"—some of them, at any rate—have been going up at the rate of 1½d. or 3d. a day. People who have not interested themselves in this market might think that these movements spelt large profits; on the contrary, it is so far merely a matter of the reduction of losses, and there is a very long way to go before holders, who are keeping more firmly to their shares than ever, will be able to sell at a profit.

Gilt-Edged Higher.

Gilt-edged have naturally been very favourably affected by Near Eastern developments; but yesterday a dull tendency set in as a result of the extremely uncertain political situation. Nothing unsettles the markets more than the changes and chances of an election, and politics are likely to have a great influence until the election in November, if that is when it is to take place. On balance, however, prices are considerably up on the week.

Consols at 57⅝ are ⅝ up, the Conversion Loan at 74 5-16 is 1 15-16 up, War Loan Fives at 100½ have gained ⅜, while Fundings at 85⅝ are 1⅝ up. Indian stocks have also improved. The 7 per Cent. stock at 113 is a point up, the 3½ per Cent. stock at 56¼ is unchanged, while the 3 per Cent. stock at 56⅜ is 1⅞ up.

The Foreign group has, on the whole, been firm. French stocks have been an exception, War Loan Fives at 35½ being ¼ lower, while the 4 per Cents. are 29 xd. German 3 per Cents. are unchanged at 1 1-16, but Italian Rentes are a point up at 22. In Near Eastern securities Turkish Unified have firmed up to 32, at which they are ¾ better, while Greek Monopolies are a point better at 31½. Russians have improved. The 5 per Cents. are ½ up at 11, the 4½ per Cents. have gained ½ at 7½, while the 4 per Cents. are a point up at 7½. Czecho-Slovak 8 per Cents. are 92¼. In Far Eastern securities Chinese bonds have been a good spot, while in South Americans Argentine Loans have been a feature, and Peruvian Corporation issues have again been in some request.

Industrials Firm.

A firm tone has ruled in the Industrial group, and prices are higher almost all along the line. Yesterday, however, a tendency to restrict business was in evidence on the political outlook, which is likely to have a very unsettling effect in this market.

Tobaccos have been a firm spot, with Bats 6d. up at 87s. and Imperial Tobaccos 9d. up at 69s. 6d. Textiles are harder. Courtaulds at 54s. 9d. are 3d. up, Coats have gained 3d. at 65s. 9d., while Listers at 28s. 3d. are 2s. 9d. better. In Iron and Steel securities there has been a tendency to harden. Vickers are unchanged at 11s. 6d., Armstrongs are 6d. up at 16s., while Guest Keens are the same at 35s. In Indian Railways Bengal Nagpur are ½ down at 94, Delhi Umballa are 2½ up at 181¾, Madras and Southern Mahratta have gained 3¾ at 102¾, while South Indian are ⅛ down at 103½.

In Shipping securities P. and O. Deferred have been a good spot on the report, and at 315 are 20 up. Cunards are unchanged at 19s. 6d., Khedivial Mails remain at 3¼, while Furness Withys are 6d. down at 32s.

Oils Better.

On the whole, a better tone has ruled in the Oil group, but weakness was in evidence in various directions yesterday.

Anglo-Persians have been fairly firm, and at 5 15-16 are 1-16 up. Burmahs are 5½, at which they are unchanged. Mexican Eagles at 2 31-32 are ⅛ up, while Shell Transport are 4 15-32, at which they show a gain of ⅛. Trinidad issues have been rather weak. Apex at 2 are 1-16 lower, Centrals at 1¾ are ⅛ down, while Leaseholds are 1 3-32, a drop of 3-32.

Russian stocks are about the same. Spies are unchanged at 6s. 3d., Anglo-Maikop are 6d. lower at 3s., North Caucasians are unchanged at 13-16, Ural Caspians are 21-32, while Uroz are 6d. lower at 8s. 9d.

Among Egyptians Anglo-Egyptian B are 1 15-32, at which they are 1-32 up, while Oilfields of Egypt are again lower on the report, and at 1s. are 1s. down on the week. In the Roumanian group Phœnix are 26s. 9d., at which they are 1s. 3d. up. Roumanian Consolidated are 6d. down at 12s. 9d., Steaua Romanas are 3d. up at 10s. 6d.. Dacia Romanos are unchanged at ¾, while Hamilton's Oil Concessions are unchanged at 2s.

Banks Firm.

A firm tone has ruled in Banking descriptions. Chartereds at 17 7-16 are ⅛ up, National of India are ⅝ up at 42, P. and O. Banks have gained ⅛ at 14⅛, Bank of British West Africas are 4¾, while British Trade Corporations are 2¾.

In Egyptian securities Aboukirs are unchanged at 21s., Beheras remain at 7½, Egyptian Markets are 21s. 6d., Gharbieh Lands remain at 1⅞, New Egyptians are unchanged at 23s., while Sudan Plantations are 9-16 up at 5 9-16.

The Czecho-Slovakian Government, in pursuance of their electrification scheme, have established a company for the development of the central power station at Seestadtl.

The Oriental Telephone and Electric Company has declared interim dividends of 3 per cent. on cumulative preference shares, less tax, and 4 per cent. on ordinary shares, free of tax, payable to shareholders registered October 10.

The traffic receipts of the Egyptian Delta Light Railway for the week ended September 20 amounted to £E8,352; total for the year £E135,261. For the corresponding period of last year, receipts amounted to £E10,069; total for the year, £E159,397.

Messrs. Helbert, Wagg, and Company announce to holders of scrip certificates of the City of Greater Prague 7½ p.c. mortgage loan of 1922 that the coupon thereto attached, due November 1, 1922, will be payable on or after that date at the National Provincial and Union Bank of England, Ltd., 15, Bishopsgate, London, E.C.

Engineering Topics.

The R.-R. Revolution.

From an engineering point of view there are several features of interest in the new and revolutionary departure of the Rolls-Royce Company. For more years than I care to remember this firm have had a one-chassis policy: *i.e.*, they have turned out one model, and one alone, with 40-50 h.p. six-cylinder engine of 114 by 121 mm. bore and stroke, giving a Treasury rating of 48.6 h.p.

They have now announced that, in addition to continuing the production of this, they will be marketing a 20 h.p. model, also with a six-cylinder engine, but with cylinders of 76 by 114 mm. bore and stroke. This is a notable departure from standard, and engineers have already considered several points connected with it, one of which is that it is evident that a smaller power engine will do all that it is likely to be called upon to do in the way of giving out power. Obviously the makers of this car would not offer the public a 20 h.p. engine unless they were convinced that any hill, road, or traffic difficulty likely to be met with could be successfully overcome. This supports the view so frequently pressed in these columns, that, except so far as the luxury car is concerned, the day of the high-powered car is over. We to-day do not want big engines either for speed or hill-climbing work. The comparatively small engine will do all that is required in that direction, provided the other mechanical details are all as they should be.

Need for More Research.

The progress made is so far satisfactory, but much remains to be found out in connection with oil-engine design, particularly in regard to engines of the Diesel and semi-Diesel types. As the president of the Institution of Marine Engineers said recently, oil engines for propelling and auxiliary purposes will compel profound consideration for many a long day. Of course, in this as in most other branches of engineering, the more one learns the more one has to learn, and, as Sir George Goodwin said, before development can proceed much further we shall have to ascertain the nature of the physical and chemical changes which occur during the several stages of the cycle, the conditions affecting penetration and dispersal of the fuel during the period of the combustion, the causes and effects of detonation, the nature of the combustion of the oil itself, and the changes of temperature in the gases throughout the cycle. Much more than is known at present must be elucidated.

All this and more must at the proper stage be regarded from the engineering standpoint, especially in connection with the effect these occurrences and changes have on the suitability and reliability of the machinery designed for prolonged service at sea. In this exploration there is probably much preliminary work for the physicist and chemist, but the experience of the marine engineer, either as manufacturer or user, will always be most valuable and, in many respects, indispensable, and it will be incumbent upon him to equip himself in due measure with scientific knowledge.

A Portable Producer Plant.

Apropos of the question of producer gas, it may be of interest to my readers to describe the producer of the British firm to which I have referred, which proved successful in the French trials. The producer is roughly 16 ins. square and 2 ft. deep, and is placed on the near side of the motor on the driver's left hand. It has a grate 11½ ins. in diameter, providing for a fire about 12 ins. deep. Above the producer is a hopper, whose depth varies according to the fuel. The gases generated in the producer pass down a water-jacketed pipe with a dust collector below it, and so on through various processes to the engine. The steam for the producer is derived from the water-cooled pipe and also from a detachable waste-heat boiler, which is fitted on the exhaust pipe, while what is normally the petrol tank is used to carry the water supply. One of the problems in connection with producers has been the maintenance of an adequate supply of gas while the vessel is stationary. This difficulty has been overcome by the provision of an exhauster which is placed vertically over the flywheel. The engine at its slowest keeps the fire going, and the gas escapes through the exhaust pipe until the time for starting comes, when the driver finds he has ample power at his disposal.

A DRAGLINE EXCAVATOR FOR THE SUDAN.

A Dragline Excavator.

On this page will be found an illustration of one of the dragline excavators that Messrs. Ruston and Hornsby are constructing in connection with the Sudan irrigation scheme. They have obtained a contract for thirteen of these excavators, and it is worth recalling that the contract was obtained in the face of keen competition.

COMPANY NOTES AND REPORTS.

P. and O.

The report of the Peninsular and Oriental Steam Navigation Company for the year ended September 30 states that the accounts show that, after providing for depreciation, also the expense and discount on the issue of £3,500,000 debenture stock amounting to £191,853 10s. 1d., there is a credit balance on the year's accounts, including £100,305 9s. 6d. brought forward from last year, of £744,901 5s. 9d. The directors propose to deal with this balance as follows:—5 per cent. dividend on the preferred stock (of which 2½ per cent. was paid as an interim dividend), £152,000; 12 per cent. dividend on the deferred stock, free of income-tax (of which 6 per cent. was paid as an interim dividend), £431,102 3s. 2d.; sinking fund for redemption of 5½ per cent. debenture stock, £60,000; to carry forward to next year £101,799 2s. 7d.—£744,901 5s. 9d. Warrants for the dividend now recommended will be posted on November 14.

All the five steamers of the "B" class for the company's Australian emigrant and cargo business via the Cape have been delivered and are in service. There are now nine of these vessels of an aggregate tonnage of 100,000 tons, and they are proving in every way suitable for the cargo and emigrant service. The Osiris has been sold. Three steamers, the Assaye, Somali, and Syria, have been chartered for the conveyance of troops to and from India. The Mongolia, under construction at Messrs. Armstrong, Whitworth, and Co.'s yard at Newcastle-on-Tyne, was launched on August 24, and is expected to be delivered in the early spring. Good progress has been made with the Maloja and Mooltan, and the latter should be ready for service in June next, and the Maloja in August. Great delay has occurred in the builders' yards owing to labour troubles. The insurance fund has suffered through the loss of the Federal liner Wiltshire, but notwithstanding this the credit balance is increased by £94,242 7s. 11d., bringing it up to £3,094,242 7s. 11d.

The directors are preparing plans for several new mail steamers, and tenders for these will be called for as soon as the time appears favourable. There has been some slight improvement in the outward trade, but it is still very poor. The homeward trade naturally, to a great extent, is bound up with the outward, and current rates are to a great extent unremunerative. The company's passenger trade is satisfactory, every outward vessel being fully booked at this season. Meeting, company's offices, 122, Leadenhall Street, October 18, 11 a.m.

Eastern Telegraph.

The revenue of the Eastern Telegraph Company for 1921 totalled £4,124,976, from which are deducted £1,773,757 for ordinary expenses and £664,344 for maintenance of cables, income, and war taxes payable abroad, share of contribution to the pension and superannuation funds towards depreciation of investments, payments to staff and other expenses incidental to the war, leaving £1,686,875. After providing for income-tax and corporation tax payable in England, interest on mortgage debenture stock and dividends on preference stock, there remains £1,251,529 plus £316,478 brought in, making £1,568,008. The directors have placed £500,000 to general reserve. The dividends have been paid on ordinary stock amounting to £500,000, making 10 per cent., free of tax, leaving £568,008 to be carried forward.

Eastern Extension Telegraph.

The report of the Eastern Extension Australasia and China Telegraph Company states that the gross revenue for 1921 was £2,394,324, from which is deducted £708,990 for ordinary expenses and £342,694 for maintenance of cables and special expenditure, leaving £1,342,639. After providing £184,853 for income-tax and corporation tax payable in England, £30,096 for interest on mortgage debenture stock, and £590 on account of expenses of issue of new capital, there remains £1,127,100, plus £80,779 brought forward, making £1,207,880. The directors have transferred £500,000 to the general reserve. Dividends have been paid amounting to £400,000, making 10 per cent., free of tax, leaving £307,880 to be carried forward. The new cable between Madras and Singapore has been successfully laid and opened for traffic.

Harrisons and Crosfield.

The report of Harrisons and Crosfield for the year ended June 30 states that owing to the continuation of the general trade depression, the crisis in the rubber industry, and the disorganised condition of many of the foreign exchanges, the past year has again been one of great difficulty. Further considerable sums have had to be provided for depreciation, and the stocks stand in the balance-sheet at replacement values or cost, whichever is the lower. Having regard to all the adverse factors they have had to contend with, the directors consider the result of the year's trading not unsatisfactory. As compared with their cost to the company, the investments continue to show considerable depreciation, although somewhat less than a year ago; but the directors believe the depreciation will disappear whenever there is any real recovery in the position of the rubber industry. The net profit amounted to £149,138, to which is added £44,525 brought forward. The directors have paid the full dividends of 6 per cent. on the cumulative preference shares and 10 per cent. on the preferred ordinary shares, and they propose a dividend of 5 per cent. on 189,986 deferred ordinary shares and of 5 per cent. on 500,000 management shares, leaving to be carried forward £45,114.

Tata Iron and Steel.

The directors of the Tata Iron and Steel Company have issued the amended accounts for the year ended March 31, which were adopted at the general meeting held on August 24. The accounts for nine months to March 31 show that the net profit amounted to Rs.64,87,572, from which Rs.22,00,000 has been placed to depreciation fund account, and Rs. 3,50,000 is provided for taxes. It is proposed, after paying the Preference dividends, to pay a dividend on the old and new Ordinary shares for the nine months at the rate of Rs.2 4a. per share, being at the rate of 4 per cent. per annum, free of tax. The sum carried forward is Rs.1,44,702.

Madras and Southern Mahratta Railway.

The directors of the Madras and Southern Mahratta Railway propose a distribution on January 1 next of £2 15s. per cent. out of the stockholders' revenue account, in addition to the guaranteed interest, which will make a total of 7½ per cent. for the year (as compared with 7 per cent.). Income-tax will be deducted on the £4 10s. dividend at the rate of 3s. 10.55d. in the £, being 5s. in the £ on the guaranteed interest and 3s. 2d. in the £ on the surplus profits.

South Indian Railway.

The directors of the South Indian Railway Company, Ltd., recommend a final dividend for the year 1922 of 2½ per cent., less income-tax, to be paid from surplus profits on January 1, 1923, making, with the guaranteed interest of 1¾ per cent., payable on the same date, a total payment of 4¼ per cent. for the half-year ending December 31, 1922, and together with the payment that was made on July 1, 1922, a total payment of 8 per cent. for the year, being the same as the dividend paid for the previous year.

Furness, Withy and Co.

Warrants for the dividend on the ordinary shares at the rate of 5 per cent. per annum for the half-year to October 31, being 6d. per share, free of tax, will be posted on October 31 to holders registered October 12. Warrants for the usual dividend on the preference shares at the rate of 5 per cent. per annum for the half-year, being 5s. per share, less tax, will be posted same date.

DINNER TO LORD INCHCAPE.

Lord Inchcape, who is leaving for India to-day to preside over the Indian Retrenchment Committee, was entertained to dinner at Claridge's Hotel on October 16, when the company included Sir Thomas W. Holderness, who presided, Lord Cable, Sir John F. Beale, Sir Thomas B. Robinson, Sir Alan Anderson, Sir Kenneth S. Anderson, Sir A. Cory-Wright, Lord Ernest Hamilton, Sir Clement B. Simpson, Sir Frank Notley, the Hon. A. Shaw, M.P., Sir Montagu Turner, Sir Duncan Carmichael, Mr. H. C. Robbins, Mr. T. Marlowe, Mr. Wickham Steed, Mr. Archibald Hurd, Mr. H A. Gwynne, Sir Howard D'Egville, Mr. C. Maughan, Mr. J. Milne, the Hon. Kenneth Mackay, Mr. James Beveridge, Lieut.-Col. E. V. Gabriel, and Mr. R. Leslie.

Replying to the toast of his health, proposed by Sir Thomas Holderness, Lord Inchcape said:—"I am leaving for India in a few days' time to endeavour to help the finances of that country by reducing expenditure. I do not like the job. But, pressed by the Secretary of State and the Viceroy, I have undertaken it, and will do what I can. I have two men going out with me who are here to-night—Mr. Howard and Mr. Milne. If I may judge by the assistance they have already rendered to me in the last two months in preparing the ground for our work in India, I am not without hope that with their help my colleagues and I on the Retrenchment Committee will be able to produce a report which will be acceptable to His Excellency the Viceroy, the Government, and the people of India, and may enable our great Indian Empire to carry on till it gets back to sound economic conditions, which have been entirely submerged by the war. I trust, too, our labours may result in some reduction in the present rapacious demands of the tax-collector."

Sir Ganga Ram, Lahore, has given a contract to Messrs. Vickers for water turbines and electrical plant for the purposes of power development on the Bari Doab Canal in the Punjab.

Near East Markets.

LONDON PRODUCE REPORT.

Advance in Oilseeds.

(From Our Own Correspondent.)

London, Monday Night.

Sugar.—Home refined has been in good request at advanced prices. Tate's cubes are steady at 56s. 6d. Mineral water sugar has gained 9d. at 51s., and London granulated has risen 9½d. at 51s. 7½d. Lyle's granulated is 7½d. up at 50s. 10½d. Foreign varieties have been a firm feature. West Indian crystallised is unchanged at 42s. 6d., as also white Mauritius at 46s. 6d. Quotations are:—October, 21s. 4½d.; November, 21s. 3d.; December, 21s. 3d.; January, 21s. 4½d.; March, 21s. 6d.; and May, 21s. 7½d.

Coffee.—Prices remain firm. East Indian is 116s., Costa Rica is 112s., and Nairobi 100s.-102s. The futures market has been inactive. Quotations are:—December, 60s. 9d.; March and May, 59s. 9d.

Desiccated Coconut.—The market has shown signs of increased activity, while supplies have decreased.

Rice.—The new crop Spanish-Japan rices have been in good favour, while "Two Star" rices are being neglected owing to the latest arrivals showing signs of stain.

Green Fruit.—The small arrivals of South African oranges during the week have not been sufficient to cope with the demand, with the result that prices have hardened. Malaga lemons are drawing buyers' attention, although arrivals at present are in the green stage. The demand remains good for Valencia onions.

Dried Fruit.—The general position with regard to fruit for Christmas still remains under a depressing cloud. Quotations for sultanas are still soaring, but currants have remained at a fairly firm level. Valencia raisins are showing a ready market, while prices have remained steady.

Oilseeds.— All quotations are higher. Indian linseed at 20s. 1½d. is 6d. up, while La Plata has advanced 9d. at 19s. 1½d. Rapeseed has hardened. Toria is 1½d. up at 17s. 3d., as also bold Ferozepore at 16s. 7½d. Cottonseed has risen, with the exception of Egyptian black, which has shed 1½d. at 9s. 10½d. Sakellarides has gained 4½d. at 9s. 4½d., and Indian is 3d. up at 8s. 3d.

Oils.—Unsteadiness prevails throughout. Linseed oil has advanced 1s. at 39s. Crude rape oil and refined have both shed 1s. at 40s. and 42s. respectively. Cotton oil has been fairly steady. Egyptian has advanced 2s. at 36s. Technical, refined, and deodorised have all remained unchanged at 37s., 43s., and 48s. respectively.

Oilcakes.—A variable tone prevails. Linseed cake and cottonseed cake are both firm at 250s. and 140s. respectively. Coconut cake has shed 10s. at 170s., and cotton-meal at 230s. is 10s. down.

THE JAFFA ORANGE SEASON.

Promising Outlook.

It is not yet possible to forecast with any certainty the prospects of the coming Jaffa orange season (says a report received by the Imperial Ottoman Bank from Jerusalem), for, apart from the fact that it is as yet early to gauge the conditions of the home crop, the Spanish orange season prospects are still undefined, and the quantity available from Spain is an important factor, affecting as it does sales of the Jaffa fruit in the United Kingdom. Nevertheless, it may be said that the Jaffa outlook is promising, and, provided there is an absence of hail, home growers are anticipating another good season. An encouraging feature of the situation is that there is every possibility of the orange growers and shippers functioning again through a combined Executive Committee.

The Committee last year was largely instrumental in securing the reduction in the cost of shipping, the charge on a case of oranges to England being 2s. 6d. net, as against 4s. 6d. net charged in 1920. The number of cases exported during last season was approximately 1,115,000, of which 700,000 were shipped to the United Kingdom, 135,000 were shipped to other countries, and 280,000 were railed to Egypt. An interesting feature of last year's shipments was the despatch of 10,000 cases to Holland direct, resulting in the securing of a new market which promises good results in the future. The timber for packing the oranges for the coming season is being supplied for the most part by firms in Czecho-Slovakia, at prices from PT. 4.5 to PT. 5 per box c.i.f. Jaffa. A quantity of slightly better quality timber has been ordered from Germany at PT. 5 per box. In all timber for about 12,000,000 boxes has been ordered.

AGRICULTURAL SITUATION IN IRAQ.

The following extracts are taken from the "Agricultural Bulletin" of Iraq for the month ended August 15:—

Perennial irrigation canals generally have been satisfactory. The rice crop on the Saklawia is said to have suffered from an insufficient supply, otherwise no shortage is reported.

Elsewhere rice and sesamum prospects are favourable. In the Baquba area the cotton prospects are not good. This, in most cases, is due to indifference of cultivators, who do not yet realise the importance of the crop. Reports from the Saklawia for the period under review are more favourable than formerly. The small areas on the Yusufich continue to be satisfactory. Picking commenced about the beginning of August, and appreciable quantities of seed-cotton are already coming in.

Condition of Stock.

Although grazing is now scanty, there is a plentiful supply of cheap "tibbin," which, in conjunction with the cheapness of barley, probably accounts for stock looking as well as it does.

The Director of Civil Veterinary Department reports outbreaks of rinderpest in the Baghdad, Diayalah, Hilla, and Masariyah areas. Altogether, 2,361 head of cattle were inoculated; 12 were treated for the disease. Eighty-three animals died before veterinary aid could be given.

Two outbreaks of foot-and-mouth disease were reported in the Hilla Liwa. Stringent measures are being taken for the complete eradication of the disease. Eight cases were successfully treated.

Experimental Farms.

Baquba.—The cotton crop is expected to give satisfactory results.

Kut.—The area under cotton is small, but a good yield is anticipated.

General.

The assembling of the silk-reeling machine has been completed, and reeling is now in progress at Baquba. The best reelings so far appear to have come from the Bulgarian and Chinese varieties, which were reared at Baquba this year. Samples of these may be seen at the silk billet in Baquba, or at the office of the Director of Agriculture, Serai.

The retting of flax is an operation which requires expert knowledge, which, unfortunately, is not available in this country. It is being overcome so far as possible by steeping bundles of flax straw for varying periods in water of known temperature. After the process of "scutching" has been completed it should be possible, from a comparison of the samples, to see which have been properly retted.

A demonstration was held at Basrah to show how to prepare and spray with kerosene emulsion as a means of combatting this disease. The emulsion is easily prepared, and the sprays are not expensive, so it is hoped the remedy will be taken up by progressive garden owners. If not, it may in time be necessary to introduce such legislation as will ensure that all infected areas will be systematically sprayed.

The all-steel threshing machine, which has been expected for so long, has arrived at last. It is too late to be of much use in the Baghdad area this year. After trial it will be sent to Mosul, where there is said to be a demand for threshing machinery, and where much wheat and barley yet remains to be threshed.

ASSAM TEA CULTURE IN 1921.

The Director of Land Records and Agriculture in Assam, in his annual report on tea culture in Assam, states that the number of gardens rose from 876 in 1920 to 900 during the year under review. The area under tea fell from 420,155 acres in the previous year to 417,800 acres. The Surma Valley was mainly responsible for the decrease, the chief cause of which was the depressed condition of the tea market. Eleven thousand one hundred and ninety-one acres were abandoned during the year, while the new extensions amounted to 8,836 acres; thus there was a net decrease of 2,355 acres. The area plucked decreased from 392,611 acres to 383,648 acres, which is nearly 92 per cent. of the total area under tea, against 93 in the previous year and 94, the average of the preceding five years. The total area of land included in tea estates is reported to be 1,498,784 acres, against 1,479,239 of 1920, of which over 27 per cent. was actually under tea, against 28 per cent. in 1920.

The year was not generally favourable for the growth of tea. The rainfall was unevenly distributed, and long spells of wet, dull weather, with little sun in July and August,

Digitized by Google

checked the growth in many districts. The temperature was generally low, and the early setting in of the cold weather, particularly in the upper Assam Valley districts, meant a short season. Mosquito blight was also reported from Cachar and Lakhimpur. The out-turn during the year was 180,332,192 lb. of black tea and 1,170,582 lb. of green tea, compared with 233,040,835 lb. and 1,273,226 lb. respectively in 1920. The decrease, amounting to over 50,000,000 lb., or about 23 per cent., occurred in all plains districts of the Province, and is attributed to the bad weather and finer plucking necessitated by the poor prices and surplus stocks.

The general condition of the industry improved during the year. Better prices were obtained, and on account of the shortage in out-turn some of the surplus stocks in the Calcutta and London markets have been used up, and there is thus a greater demand for all grades of tea. The chief difficulty ahead, if prosperous times return, will be the shortage of labour owing to the marked decrease in the permanent labour force during the past two years.

CURRENT PRICES.

General Produce.—Bacon (Continental), 133s. per cwt.; (Canadian), 118s. cwt.; (American), 99s. cwt.; butter (Danish), 229s. cwt.; (Australian), 202s. cwt.; (New Zealand), 218s. cwt.; cheese (Canadian), 98s. cwt.; (New Zealand), 97s. cwt.; lard, 75s. cwt.; eggs (Danish), 24s. per 120; (Styrian), 18s. 6d. per 120; chillies, 140s. cwt.; cloves (Zanzibar), 1s. 3½d. lb.; cocoa (Ceylon good to fine), 81s. 6d. cwt.; coffee (Costa Rica), 117s. 6d. cwt.; (East Indian), 115s. cwt.; (Central American), 97s. 6d. cwt.; (Jamaica), 74s. cwt.; (Mocha Longberry), 98s. 6d. cwt.; (Santos superior), 73s. 9d. cwt.; (Nairobi), 101s. cwt.; ginger (washed Cochin), 50s. cwt.; nutmegs (110's to 80's), 1s. lb.; pepper (Singapore black), 3⅜d. lb.; (Muntok white), 6¼d. lb.; pimento, 2⅛d. lb.; raisins (Valencias), 112s. 6d. cwt.; currants (Vostizza), 95s. cwt.; currants (Amalias), 79s. cwt.; sultanas (Smyrna), 160s. cwt.; sugar (Tate's cubes), 56s. cwt.; (Lyle's granulated), 49s. 10½d. cwt.; (Mauritius crystals), 46s. 3d. cwt.; (West Indian crystallised), 43s. 10½d. cwt.; (centrifugal), 17s. 3d. cwt.; tapioca (fair Singapore), 2½d. lb.; rice (Rangoon No. 2), 15s. 4½d. cwt.; bran (Rangoon), £6 6s. 9d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 1s. 11d. lb.; tea (Indian common to good common), 1s. 1½d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 10d. lb.; Ceylon (common to good common), 1s. 1¾d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 9½d. lb.; Java (common to good common), 1s. lb.; wheat (English white), 39s. 6d. qr.; wheat, (Australian), 52s. 3d. qr.; oats (English), 27s. 6d. qr.; oats (La Plata, ex-ship), 27s. qr.; maize (La Plata), 40s. 1½d. qr.; flour, 37s. sack.

Chemicals.—Acids: Boric, 61s. cwt.; oxalic, 7½d. lb.; citric, 2s. 0½d. lb.; tartaric, 1s. 3d. lb.; ammonia (sulphate), £15 16s. 6d. ton; arsenic (white powdered), £46 10s. ton; benzole (standard), 1s. 9½d. gallon; bleaching powder (35 per cent.), £12 ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 107s. 6d. cwt. Potassium: Bichromate, 6¼d. lb.; chlorate, 4½d. lb.; caustic, £30 5s. ton; nitrate, £37 10s. ton; permanganate, 8d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £13 5s. ton. Sodium: Crystals, 110s. ton; bi-carbonate, £10 5s. ton; bichromate, 5¼d. lb.; alkali (58 per cent.), £8 1s. 3d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £20 2s. 6d. per ton; hyposulphite, £15 10s. ton; prussiate, 11d. lb.; nitrate, £13 7s. 6d. ton; glycerine (crude, 80 per cent.), £48 ton; (industrial, 1260 per cent.), £87 10s. ton; lemon oil, 2s. 7½d. lb.; quinine, 2s. 2d. oz.; red lead, £37 17s. 6d. ton; white lead, £40 10s. ton: white ground lead, £49 2s. 6d. ton; suphate of copper, £26 5s. ton; sulphate of iron, 55s. ton.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 10d. lb.; 80 to 89 lb., 10d. lb.; 70 to 79 lb., 9¾d. lb.; 60 to 69 lb., 9½d. lb.; 59 lb. and under, 7¾d. lb.; (second), 90 lb. and up, 8¾d. lb.; 80 to 89 lb., 8¾d. lb.; 70 to 79 lb., 8d. lb.; 60 to 69 lb., 7⅝d. lb.; 59 lb. and under, 5¾d. lb.; cows (first), 60 lb. and up, 7½d. lb.; 59 lb. and under, 7d. lb.; (second), 60 lb. and up, 6d. lb.; 59 lb. and under, 5¼d. lb.; bulls (first), 5d. lb.; (second), 3½d. lb.; kips (first), 6d. lb.; (second), 5½d. lb.; (third), 4d. lb. Calcutta Market (prices in rupees per 20 lb):—Arsenic hides (cows): Agras, 7 to 12; Durbhangas, 5 to 7.8: Patnas, 4.12 to 6. Salted cows, 6.8 to 9.4. Arsenic hides (buffalo), 3.8. to 6.8. Skins: Calf, 8 to 10 per 20 lb.; goat, 230 to 270 per 100 pieces.

Metals:—Aluminium, £100 ton; antimony (English Regulus), £32 2s. 6d. ton; bismuth, 10s. lb.; copper (standard), £62 11s. 3d. ton; copper (electro), £71 12s. 6d. ton; gold bars, 93s. 4d. oz.; iron (No. 3 Cleveland), 93s. 9d. ton; hematite (mixed number), 90s. ton; galvanised sheets (25 G), £16 10s. ton: lead (soft foreign), £24 11s. 3d. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 41s. 3d. unit; nickel, £145 ton; platinum, 500s. oz.; graphite (80-90), £12 10s. ton; quicksilver, £12 10s. bottle; spelter (G.O.B.), £32 12s. 6d. ton; tin (standard), £163 12s. 6d. ton; wolfram, 13s. 9d. unit; zinc sheets, £38 ton; tin, plates (20 x 14), 18s. 9d. box; silver bars, 35 5-16d. oz.

Miscellaneous.—Cotton (American), 12.52d. lb.; Egyptian (Sakel), 16.05d. lb.; jute (first grade), c.i.f., £34 ton; jute (lightnings), £31 15s. ton. Oilseeds: Linseed (La Plata), £18 8s. 9d. ton; palm kernels, £16 4s. 6d. ton; castor seed (Bombay), £16 10s. ton; sesame seed (China), £21 17s. 6d. ton; olive (Spanish), £75 10s. ton; rape (crude), £40 10s. ton; soya, £35 15s. ton; petroleum, 1s. 2½d. gallon; petrol, 1s. 8d. gallon; fuel oil (ex-tank), 65s. ton; coconut (Ceylon), £36 2s. 6d. ton; cotton (crude), £32 10s. ton.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated October 9:—

During the week ended October 8 there was widespread rain in North-East India, and nearly general rainfall in Bengal, Assam, and Chota Nagpur, and local rain in West Punjab. October 7: Fairly widespread rain in Central and South Peninsula. Condition of crops—October 6:—Bengal: Heavy rain and flood have done great damage to paddy in North Bengal; prospects otherwise satisfactory. In Central Provinces cotton, rice, and sesamum prospects are good to very good.

Markets.—Bombay cotton market was closed during last week owing to Dassera Holiday (a Hindu festival), and also owing to settlement consequent upon September corner in Oomras. Bombay cotton arrivals from September 1 to 29 were 33,000 bales, as compared with 136,000 bales during the same period of the last year. Bombay imported piece-goods market continues dull. Local goods moving quietly. October 7: Calcutta jute market steady, but little business passing. Gunnies quiet. Ready 9 porters Rs.17.8; 11 porters Rs.22.10. October 7: Rangoon rice market unchanged. Sellers quoted large mills special Straits quality rice Rs.465, small mills Rs.485. Outside price: Large mills, October, Rs.423. Paddy, boat Rs.195, rails Rs.185. Shellac—October 6: T.N. Rs.140. At tea sale on September 26 qualities showed slight improvement, particularly in Dooars. Tea market strong for all grades and generally dearer. Medium Brokens and Dooars ½ anna dearer, Medium Fannings 1 to 2 pies, and Common Broken Pekoes and Souchongs, which were in strong demand, 6 to 9 pies dearer. Leaf tea and dusts steady. All markets interested and buying general. This sale's average price was 11 annas 6 pies per lb., against last week's price of 11 annas 4 pies. 335,887 packages sold to date at an average price of 11 annas 1 pie per lb. Next sale will be on October 10. No change in Bank rate.

PHŒNIX OIL AND TRANSPORT.

Output for September.

The progress report of the Phœnix Oil and Transport and allied companies for September shows that the month's total crude oil production was 3,050 tons. The reason for the decrease in production is that Well No. 5 in the Moreni-Stavropoleos district only recommenced flowing on September 18. After an eruption of 46 hours, during which 1,000 tons were produced, the well again plugged owing to the increased force of the flow, but after cleaning again recommenced flowing.

Well No. 1 in the Runcu district has been in cleaning, and the bottom of the casing (damaged by the force of production) straightened. The plug which rose in the casing of Well No. 5 in the Baicoi district, which has reached the oil sands, is being flushed out preparatory to production. Throughput of the refinery for the month was 3,565 tons.

The position of the wells in drilling at the end of September was as under:—

Moreni-Stavropoleos, Well No. 6—Rigging up completed; ready to commence drilling. Well No. 8—Depth, 2,926 ft. Well No. 16—Boiler erected. Tuicani, Well No. 2—Depth, 1,026 ft. Reaming hole preparatory to lowering casing. Chiciura, Well No. 1—Depth, 1,618 ft. Well No. 2—Depth, 1,521 ft.; rigging completed; drilling commenced. Well No. 3—Depth, 2,124 ft.; making water test preparatory to drilling in. Runcu, Well No. 2—Depth, 1,685 ft. Well No. 3—Depth, 729 ft.; preparing to install rotary rig. Well No. 4—Depth, 455 ft. Well No. 5—Rigging up. Bordeni, Well No. 27—Depth, 1,128 ft. Since the above report telegraphic advice was received on October 9 that work had been completed at Well No. 1, Runcu, and that it was producing at the rate of 250 tons per day.

The foreign trade of Hungary for the first six months of the present year (says Reuter in a recent message) was as follows: Imports 35,400,000,000 crowns, exceeding exports by 7,700,000,000 crowns. British imports to Hungary amounted to 665,000,000 crowns, exceeding Hungarian exports to Great Britain by 277,000,000 crowns.

Shipping Intelligence.

RHINE-DANUBE CANAL.

Discussing the progress of the Rhine - Main - Danube Canal, a correspondent in last week's *Manchester Guardian Commercial* says: "The total length of the canal, including the canalised part of the Danube, will be about 400 miles. It runs through some of the industrial parts of Middle Germany, and the forty or more electrical power-stations which at intervals will be flanking the canal will distribute their energy over districts where electric power has always been in great demand. It is very probable that all the electric energy produced at the power-stations of the canal will be taken up by the industries which are already established in this area, and by others which have planned to settle there. The canal company remains owner of the power-stations. Experience has shown that the demand for electrical power is increasing, not in leaps and bounds, but rather in a quiet, regular, and steady way. Therefore, it will be necessary to increase the number of power-stations gradually. The amount of traffic which will pass through the new waterway has been estimated at about five million tons a year, and it has been calculated that this traffic will probably be almost equal in both directions. The sphere of interest of the new Rhine-Danube Canal is greater and of more importance than that of any waterway in Europe, because it adds to its own capacity the attraction of the Rhine and the Danube by linking these two great waterways together. In a westward direction the canal will carry the staple goods which go from the Danube provinces to France, Belgium, Holland, and England. Eastward the canal will carry from England and the Western countries goods down the Danube as far as Bulgaria and Roumania. Only in the coast districts on the Black Sea of Bulgaria and Roumania may sea-going ships be expected to compete successfully with the canal tonnage, but as far as Belgrade the freight rates from the Channel ports or Rotterdam will most likely be far cheaper by way of the overland canal than by sea."

PILOTS AT CONSTANTINOPLE.

The Commercial Secretary to the British High Commission, Constantinople, in a recent report, states that captains of merchant vessels are warned against the employment of unlicensed pilots for the passage of the Bosphorus and for entering and leaving the port of Constantinople. The only authorised pilots are those in possession of a certificate from the Inter-Allied Captains of the Port. Anyone employing an unlicensed pilot is liable to be fined.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. Olympia for Bombay (Liverpool, November 4).

Anchor Brocklebank Line.—S.s. Holywell for Port Said, Colombo, Madras, and Calcutta (London, October 21); s.s. Magdapur for Calcutta (Birkenhead, October 30); s.s. Maidan for Port Said, Colombo, Madras, and Calcutta (London, November 7); s.s. Maihar for Calcutta (Birkenhead, November 8); s.s. Malakuta for Calcutta (Birkenhead, November 18); s.s. Manaar for Port Said, Colombo, Madras, and Calcutta (London, November 25); s.s. Maimyo for Port Said, Colombo, Madras, and Calcutta (London, December 9).

Bibby Line.—S.s. Herefordshire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, October 25); s.s. Dorsetshire for Rangoon (Middlesbrough, October 27); s.s. Gloucestershire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, November 8).

British India Line.—S.s. Matiana for Bombay and Karachi (London, October 20); s.s. Mantola for Colombo, Madras, and Calcutta (London, October 27); s.s. Mulbera for Bombay and Karachi (London, November 3); s.s. Morvada for Colombo, Madras, and Calcutta (London, November 10); s.s. Mashobra for Bombay and Karachi (London, November 17).

Byron Steamship Line.—S.s. Lord Harrington for Patras, Piræus, Constantinople, Sulina, Galatz, Braila, Volo, Salonika, Smyrna, Bourgas, and Varna (Liverpool, October 23).

Clan Line.—S.s. Clan Macgillivray for Colombo, Madras, and Calcutta (Birkenhead, October 19); s.s. Clan Morrison for Malabar Coast and Tuticorin (Birkenhead, October 26); s.s. Clan Macintyre for Colombo, Madras, and Calcutta (Birkenhead, November 2).

Cunard Line.—S.s. Sea Serpent for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Manchester, October 24); s.s. Malia for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piræus, Syra, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Poti, and Batoum (Swansea, October 27).

Ellerman, Bucknall, and Strick Line.—S.s. Frankenfels for the Persian Gulf (London, October 20).

Ellerman "City" Line.—S.s. City of Exeter for Bombay and Karachi (Birkenhead, October 21); s.s. City of Cairo for Calcutta (Birkenhead, November 2); s.s. City of Calcutta for Calcutta (Birkenhead, November 13).

Ellerman's "Hall" Line.—S.s. City of Adelaide for Bombay, Karachi, and the Punjab (Liverpool, October 31).

Harrison Line.—S.s. Matador for Calcutta (Liverpool, October 25); s.s. Director for Port Said, Port Sudan, Aden, Mombasa, Djibouti, etc. (Birkenhead, November 2); s.s. Diplomat for Calcutta (Liverpool, November 6).

Holt Line.—S.s. Glaucus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, October 19); s.s. Calchas for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, October 19); s.s. Mentor for Port Said, Port Swettenham, Singapore, etc. (Swansea, October 26); s.s. Myrmidon for Port Said, Port Swettenham, Singapore, etc. (Swansea, October 26).

Henderson Line.—S.s. Chindwin for Port Said and Rangoon (Birkenhead, November 1).

Johnston Line.—S.s. Incemore for Piræus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, October 21); s.s. Peruviana for Piræus, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, November 4). (This steamer is the last sailing this season to the Danube.)

Ellerman's Westcott and Laurance Line.—S.s. Gourko for Gibraltar, Malta, and Alexandria (London, November 1).

Glen and Shire Line.—S.s. Carnarvonshire for Port Said, Port Swettenham, Singapore, etc. (London, October 19); s.s. Glenbeg for Port Said, Port Swettenham, Singapore, etc. (London, November 2); s.s. Glensada for Port Said, Port Swettenham, Singapore, etc. (London, November 16).

Papayanni Line.—A steamer will leave Liverpool on October 21 for Algiers, Malta, Syra, Smyrna, and Constantinople.

P. and O. Line.—S.s. Nore for Colombo, Madras, and Calcutta (London, October 20); s.s. Malwa for Bombay (London, October 20); s.s. Kaisar-i-Hind for Bombay (London, October 27); s.s. Nyanza for Colombo, Madras, and Calcutta (London, November 3); s.s. Caledonia for Bombay (London, November 10).

Prince Line.—S.s. Italian Prince for Malta, Alexandria, Syria, and Cyprus (London, October 21); s.s. Algerian Prince for Tunis, Malta, Alexandria, Syria, and Cyprus (Manchester, October 25).

[*Under the existing conditions it will be understood that these routes will not necessarily be followed in their entirety.*]

SPECIAL MARKET REPORTS.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

Haifa, September 23.

The market for cereals has been animated by some orders for Algeria. Sellers have made progressive concessions in prices during the past week. The market in general remains firm.

Jaffa, September 23.

The markets are quiet. There has been a small rise in the price of flour.

Constantinople, October 3.

The rapidity with which recent events in the East have developed has not permitted even the more foreseeing to take steps to prepare for the new state of things. Commercial transactions have come to a standstill, and the arrivals, although of a relative importance by reason of the slackening of the demand for the markets of the Littoral and the Black Sea, have heavily decreased.

Manufactures.—Instead of giving new orders merchants are trying by all means to dispose of their stocks.

Cabot.—Some purchases of small importance have been concluded, but, owing to the uncertainty of the time, the arrivals have been sold afloat for Roumania at prices below those of centres of origin.

Colonial Produce.—Despite the maintenance of prices of crystallised sugar in the American markets, importers show themselves reserved. On the other hand, all the other markets for sugar show a tendency to fall, which is a source of disquiet to our merchants, who are encumbered with recent arrivals from Java.

Coffee.—There has been a marked setback in prices in centres of origin. The fall has been particularly felt here, as the demand is nil. Quotations (in transit): 57s.-60s. per cwt.

Flour.—Almost all the stock here has been exported in haste to Smyrna and the Piræus. Arrivals of American are sold afloat and despatched to the same ports. Although the demand is so active, merchants show themselves reserved.

Tobacco.—The arrivals amount to 797,000 kg., of which 647,000 kg. represent Turkish tobacco and 150,000 kg. Russian. On the other hand, the exports amount to 3,581,000 kg., of which 1,869,000 kg. are Turkish tobacco and 1,712,000 kg. are Russian. Quotations per kilo: Samsoun (Gheurmez), Ps.60; Baffra (Bitchak), Ps. 180-220; Trebizonde, Ps.100-125; Ismid, Ps.55-60. Stocks consist of 5,300,000 kg. of Turkish tobacco and 940,000 kg. of Russian.

Mohair.—Stocks at August 31 consisted of 18,927 bales, and arrivals in September amounted to 1,717 bales, giving a total of 20,644 bales. Sales amounted to 2,860 bales, and the present stock amounts to 17,784 bales. Quotations: Ps.67-100 per kilo.

Gum Adraganth.—Stocks at August 31 amounted to 2,123 sacks, and arrivals in September were 12 sacks, giving a total of 2,135 sacks. The sales were 98 sacks, and stocks at present amount to 2,038 sacks. Quotations: White, 1st quality, Ps.290 per kilo; yellow, Ps.130 per kilo.

Opium.—Stocks at August 31 amounted to 430 cases, and 120 cases arrived in September, giving a total of 550 cases. Sales total 182 cases, and stocks at present total 368 cases. Sales have been as follows:—36 cases Druggist (old crop), Ps.1,100-1,150 per oke; 23 cases Druggist I. (old crop), Ps.1,175-1,180 per oke; 46 cases Druggist I. (new crop), Ps.1,200-1,360 per oke; 42 cases Druggist I. (new crop), Ps.950-1,150 per oke; 33 cases soft (Malatia, Zileh), Ps.1,250-1,500 per oke.

Cotton and Cotton Goods.

THE EGYPTIAN MARKET.

Foreign Trade Improving.

The Commercial Company of Egypt, in their report for the week ended September 29, state:—

Since our last report the futures market has continued to show a bearish tendency, although the volume of business has been rather larger than the previous week.

This week's decline must be attributed to the poor tone of the American markets, to the heavier daily arrivals from up-country, and the consequent hedges put out against same, and, finally, to a certain amount of speculative selling caused by the unfavourable turn of political events in the Near East. The demand from abroad has been slightly better, this being the case especially for Upper Egyptian cotton; the demand for the latter is explained by the fact that its price at present compares favourably with the price of competitive growths. Undoubtedly these new political complications impede business, and may further aggravate the present English and Continental financial trade difficulties. The financial position of our market is considered to be, at present, sound, and one comforting point worth mentioning is that the open positions in "futures" are comparatively small, speculators having taken up to now but little interest in the market. We do not expect for the time being much change either side, but should trade continue poor and our market in consequence be deprived of real support, a continuance of weak markets is probable by reason of the heavy new crop cotton arrivals.

Spot.—An improved business has been done this week at Minet-el-Bassal, and sales amount to about 17,500 bales, of which we estimate 8,800 bales Sakellaridis, 8,500 bales Uppers, 100 bales brown, and 100 bales white. Arrivals have been heavy. Growers have been obviously desirous of selling at the present level of prices, and have sent their cotton down quickly; they are probably influenced to some extent by the uncertain political outlook in the Near East.

Sakellaridis.—All styles have been dealt in. The basis is distinctly dearer all round except for fully good fair, which is without quotable change; this is due to an improved demand and to the fact that spot prices have not fully followed the drop in contracts.

Uppers.—A very good business has been done, mainly in medium qualities for American account, though all styles have been dealt in. The basis is unchanged for good qualities, but it is rather dearer for medium and low grades.

Brown.—A small business has been done at a rather dearer basis than last week.

White.—A small business has been done at last week's basis.

Crop 1922.—Picking is general and well advanced, and all ginning factories in the Delta and in Upper Egypt are now working. Many cultivators are anxious to rush their cotton to market, and this leads to the belief that the actual level of prices is remunerative to them. The latest reports received from the interior confirm the severity of the attack of the pink boll worm; however, as the crop is, in general, earlier by ten to fifteen days, according to districts, the damage caused by this pest is not as big as it was last year. The forced growth of the plants and the consequent deficient bolling and bad opening of bolls are characteristics of this year's crop, both facts being due to the excessive heat during July and August, coupled with the limited supply of water available during the summer months.

MANCHESTER COTTON MARKET.

Business Still Restricted.

(From Our Own Correspondent.)

Manchester, Saturday.

Partly as a result of the brighter outlook with regard to Near Eastern affairs, the tone of the market during the past week has been a little better, but at the same time business has been done on an exceedingly restricted scale. The trouble in the Near East is gradually passing away, but what is wanted are sound economic and financial conditions throughout the whole world. On the whole, manufacturers as a body rather tend to lose ground, and some producers of cloths are getting desperate for orders. The depressing state of the industry is reflected in the decision of the Master Spinners' Federation to curtail production to the extent of two days a week for another month. With regard to cloth, only a small inquiry has been met with for Egypt, and no sales of any importance have taken place. The bulk of the piece-goods demand has been for India, and some scattered transactions have taken place in light cloths and shirtings. The majority of the bids have been on too low a basis. We are still waiting for a revival of activity for China. Rather a better home trade demand has been met with. Fancies have been in small request for the small markets of South America. In the yarn section spinners have had a quiet week. It has not been possible to obtain advances adequate to the rise in the price of the raw material. The short-time movement has not affected prices in the least. Rather more interest has been taken in shipping numbers for India and the Continent.

LIVERPOOL REPORT.

Tone Brighter.

Messrs. Reynolds and Gibson report as follows for the week ended October 11:—

Following on the better news from Constantinople, sentiment has been a little brighter in this department during the past week, and some slight improvement in the estimated spot sales has been registered. Prices have displayed a hardening tendency and, as we write, stand at the best of the week. The actual inquiry has been more extensive, but, generally speaking, the ground covered has remained as heretofore—i.e., Low cotton (of any description) 5d. to 10d.; Sakellaridis about fully good fair 16¼d.—17½d.; and Uppers 12½d.—13½d. Sudan has moved off on a small scale only, whilst white, pilion, and brown have been practically neglected. Slightly more notice has been taken of "good" Sakellaridis, but it is seldom that one hears of any quantity changing hands, and the fine and extra fine cottons are still a drug in the market. Quotations of the last two have narrowed, as compared with "good," by another 25 points during the week. C.i.f. business still maintains the improvement noted in our last two reports, and the official description of Egyptian cotton for forward delivery is again given as "good business" in to-day's report here. It was somewhat unfortunate, however, that to-day, in response to an active rising market in Alexandria, all offers from that quarter were raised considerably. Spinners do not take kindly to sudden jumps these days, and we fear that the effect of to-day's rise will be to check what looked like becoming an improving trade, temporarily at any rate. Manchester reports have made uncommonly dull reading again, although there is a slightly better tone about the last one or two. Apparently a good deal of "offering" and bidding is going on, both for India and China, but prices quoted and offered are too far apart to result in much business. Private advices vary a lot as usual, but, reading between the lines, and allowing for the Lancashire spinner's inbred policy of outward pessimism, we are inclined to think that conditions have mended somewhat in the yarn trade during the past few weeks.

Crop reports from Egypt are very satisfactory again, particularly from Upper Egypt. The weather during September was favourable, and the Commercial Co. of Egypt have now raised their previous estimate from 4½ to 4¾ million kantars. Total sales, 1,800 bales (includes 300 Sudan). Quotations are raised 25 points all round, with the exception of fine and extra fine Sakellaridis, which are unchanged on the week. Fully good fair Sakellaridis to-day 17.40d.

COTTON TRADE REVIEW.

Yarn Inquiry Improving.

The Manchester Cotton Trade Review of the Imperial Ottoman Bank for the week ended October 14 states:—

General.—Although there has been during the past week a more hopeful feeling, it cannot be said that business actually negotiated shows much increase on the recent very dull period. Affairs in the Near East appear to be settling down satisfactorily, but, of course, it is useless to expect demand of any importance from that quarter for the time being. India and China—on which, more than any other countries, Manchester's prosperity depends—still appear to distrust current quotations. The Board of Trade Returns for last month are not, on the surface, unsatisfactory, but it is to be remembered that they always represent business booked in Manchester many weeks ago, the various finishing processes accounting for the delay in shipment. Once more it is interesting to note the very much larger shipments of cloth which are being made to Switzerland and Germany, as the following figures, in square yards, show:—Germany, 1,120,000 (1920), 2,234,000 (1921), 19,352,000 (1922): Switzerland, 2,813,000 (1920), 3,106,000 (1921), 26,811,000 (1922). The bulk of these goods is being shipped in the "grey," and there is no doubt that they are being sent

Digitized by Google

principally that the finishing processes may be applied there rather than here where the charges are too high.

Yarn.—There has, perhaps, been slightly more inquiry in this section of the market, but conditions generally remain very unsatisfactory for spinners. The committee of the Cotton Spinners' Federation yesterday decided that the Saturday and Monday closing of mills spinning American cotton should be continued until the end of next month. This decision in itself reveals that the general state of affairs is little improved, if any, since the decision to work short time was taken. Shipments last month amounted to 16,714,000 lbs., against 15,408,000 lbs. in August, and 15,697,000 lbs. in September last year.

Cloth.—As in the case of yarn, inquiry has been brisker without greatly affecting the quantity of business actually brought to book. It is possible that a better turnover could be done if manufacturers were prepared to book larger orders on present prices. At the unremunerative rates now ruling, however, they are naturally unwilling to do this, preferring to book only moderate lines, which will keep their machinery going for a short time, pending the hoped-for improvement. Shipments last month amounted to 395,824,000 square yards, against 377,985,000 square yards in August and 265,386,000 square yards in September, 1921.

Raw Cotton.—There has been an advance in the price of American raw cotton every day this week, and at the close of business yesterday quotations were over ¾d. per lb. higher than a week ago. This is attributed to better conditions and freer consumption in the United States, and also to the resumption of speculative operations in view of the improved outlook in the Near East. There is no news of special interest with regard to the new crop. Sales in Liverpool remain on a small scale. Closing prices are as follows:—American fully middling, 13.30; Egyptian fully good fair, 17.40.

THE COTTON INDUSTRY.

Demand for Better Organisation.

By SIR CHARLES W. MACARA, Bart.

The question exercising the minds of all who are engaged in the cotton trade is whether this autumn is to bring about the revival in the industry which has been so long promised and so long deferred. Personally, I have great hopes in the near future, but, first of all, it will be necessary to put our house in order before we can expect that steady trade from abroad which we must have if we are to keep our workpeople fully employed and get a reasonable return on our capital. It must never be forgotten that we are dependent for four-fifths of our employment upon foreign trade. As we are still suffering from the aftermath of the war, the Cotton Control Board ought to have been continued.

The present position is a curious one. We are all aware that the world wants cotton goods; we are all aware that our greatest customers in the Far East, who have not felt the effects of the war as we in Europe have, can pay the prices at present being asked for these goods; and yet we are painfully aware of the fact that business is not prospering as it should. Both India and China, to whom we look chiefly, have had excellent seasons. They have not only had bountiful crops, but they have garnered them cheaply, and ought by this time to be placing orders freely for the goods that Lancashire makes and which they cannot procure elsewhere. Statistics show that for a population of 800,000,000 India, China, and Japan have, combined only about 12,000,000 spindles, and these are engaged on goods which, generally speaking, do not compete with Lancashire. What is hindering this trade from coming forward?

It is owing largely, I believe, to our lack of business organisation. It is the usual thing, I know, to blame the merchants abroad for refusing to place orders for new goods while the high-priced stock left over from the boom is not yet fully disposed of; to trace our troubles to the bad blunders of our politicians in the Near East; or to see in the weak and procrastinating policy of the Allies in dealing with Germany, the cause of all our afflictions. I do not for a moment wish to minimise any one of these reasons. They are no doubt all contributory, but I contend that none of them is sufficient to account for a state of things such as we have at present, when we are allowing a large section of the trade to make to stock, thus playing into the hands of merchants who will only buy from the weakest sellers, and are slowly draining the life-blood from the industry.

For something like eighteen months this has been going on. Buyers have been on the watch for forced liquidations, and the consequence has been that producers of yarn have been several pence out on every pound they have sold, and manufacturers, also, have been losing heavily. This, of course, cannot go on much longer. In the absence of sufficient competition in the markets to put prices on a paying level, it is clear that supply will have to be kept down to the level of demand. Weak sellers will have to be eliminated, and those who require yarn or cloth will have to be made to pay, at the least, sufficient to cover expenses.

The remedy, I consider, is to be found in controlling the industry as we did in war time. Then, it will be remembered, we had a Cotton Control Board, equally representative of Capital and Labour, whose regulations were backed up by the State. The Control Board so arranged things that those mills which were working were levied upon for the good of those which were not, the compensation being extended to both employers and employed.

It was by organising short time throughout the trade in 1903-4 that we got the better of the attempt to corner the American cotton crop, and it is by a compulsory levy on all the trade that we are seeking now to augment the Government fund to be devoted to the promotion of cotton growing within the Empire. If concerted action be good in these cases, and if it has been beneficial to the bleaching, calico printing and dyeing sections to have their trade agreements, why cannot we go a step further and put an end to the suicidal policy we have at present in the spinning and manufacturing sections of keeping machinery engaged in making for stock, only to sell the goods later on at under cost price?

I contend that it is a policy which will benefit no one in the long run, not even the distributors; but it is simply weakening the financial position of the industry. To go on dissipating our capital throughout the world is sheer madness, and the only way to stop the leakage is for us to arrange for the industry to be run as a whole, until such times, at all events, as the trade of the world can get back to the normal again.

There is nothing of the evils of the "trust" in what I am suggesting—I am not asking for the cotton trade a monopoly position which will lead to extortion and inordinate profits, but the establishment of a system of organisation which will prevent buyers taking advantage of the producers at a time like the present. I have never been in favour of big profits, for the simple reason that they destroy steady trade in an industry like that of cotton, which ministers to the necessities of the poorest people on the earth, but profits we must have for the cotton-grower, the spinner, and the manufacturer, and be in a position to remunerate the workers adequately, if we are to keep going at all.

If we should regulate supply to demand, I feel sure that we should soon be on full-time working again, for once it was seen that it was of no use waiting to catch the unfortunate ones who are obliged to clear their stocks at under cost, orders would be placed with more freedom, and we should get on a healthy level of working again.

I cannot imagine that Control Board management would have any other than a stimulating influence, for India, China, and our other foreign markets are greatly in want of cotton goods, and in face of the short American crop, and the possibility of raw cotton being much dearer before the next six months have passed over us, buyers simply cannot afford to wait much longer.

The home trade is good already, and we are doing a fair amount for some of the foreign markets; but there can, of course, be no revival until the Far Eastern demand commences in earnest. That this will come, and come speedily, I have no doubt whatever, if only we can place the trade on a basis which will compensate those engaged in it, and lift it out of the bargain-snatching rut that it has fallen into during the past twelve or eighteen months.

It is announced that owing to certain negotiations now proceeding, the issue of the accounts for the year ended March 31 of the Egyptian Delta Light Railways is deferred.

The Steaua Romana (British), Ltd., are advised that the crude production of the Steaua Romana, Bucharest, during September was 21,630 tons.

The Anglo-Egyptian Oilfields, Ltd., announce that the production for the week ended October 13 was as follows: Gemsah, 37 tons; Hurghada, 3,609 tons.

It is announced that the passenger and mail air service between Casablanca and Oran was inaugurated on October 6. The flight to Oran takes eight hours, including a stop at Fez.

According to a telegram from Athens the Greek Government has signed a convention with the Greek National Bank for a loan of 200,000,000 gold francs (£8,000,000) to meet its most urgent needs.

It is announced that the first batch of Welsh tinplate workmen left Swansea and Neath on October 5 for Clonmuri Works, India. The works are situated a few miles from the Tata Steel Works, where British steelworkers are already employed.

NOTES OF THE WEEK.

A Change for the Better.

With British party politics we are here ordinarily not concerned; but the mischief that Mr. Lloyd George's personal policy wrought in the Near East makes the termination of his Ministry an event of the most hopeful augury. His contradictory treatment of Greece, based on ill-informed and unreasoning likes or dislikes, and his intemperate abuse of Turkey, persisted in up to the eve of a peace conference, reflected the spirit of the post-war settlement, in which national hatreds and imperialist passion were allowed to trample on the lofty principles repeatedly enunciated by the Allies during the war. A fresh orientation for British policy in the Near East based on British Imperial interests is long overdue. There is reason to suppose that it will be introduced with the change of Prime Ministers, and that already the Turks know that the obstacle to friendly co-operation for the future between Turkey and Great Britain has been overcome. Greece, too, stands to benefit in the long run from a policy which, while less flattering for the moment to her *amour propre*, offers the prospect of peace in the Near East, and affords her the opportunity of rehabilitating herself by her own efforts.

An Early Conference.

It is to be hoped that there will be no postponement of the Near Eastern peace conference as a result of the political crisis in Great Britain. The importance of imposing no undue strain on the good behaviour of the Kemalist forces should be recognised. They have been led by the terms of the Mudania Convention to expect that their long war service is to secure its reward by a certain date, and there can be no justification for disappointing them merely on account of British Ministerial changes. The sooner that a settlement can be arranged the better it will be for British interests. It is one of the anomalies of a complicated situation that the very narrow margin separating Great Britain and Turkey from war has been, thanks to the sound common sense of General Harington and Mustapha Kemal, the means of readjusting the international equation in the Near East in Great Britain's favour. The best amend that can be made to the various peoples who have passed under the harrow of the late Government's vacillating policy is that Great Britain should resume without delay her true rôle in the Near East. While conditions remain unsettled wider scope is given to intrigue, which, though reacting mainly to the prejudice of those indulging in it, serves to render more difficult the restoration of a normal state of affairs.

The Freedom of the Straits.

On page 541 in this issue we publish an article dealing with the question of the freedom of the Straits. From this article it will be seen that the following facts are established:—

1. The freedom of the Straits was not in jeopardy from the Kemalists.
2. If it had been, war could not have secured the freedom.
3. The expression "the freedom of the Straits" has no fixed meaning. The interpretation placed on it by the Treaty of Sèvres is by no means an unmixed advantage to Great Britain; and to-day the country might be glad, if it could, to get away from that interpretation and to revert to the old rule, restricting the "freedom" to the commercial flag.
4. At the time of the September 16 manifesto the only possible way of securing the freedom of the Straits (whatever view of Great Britain's interests he held) was by *agreement* with Turkey.

But the British public has been assured that the first object of the then Government's action in those September days was the freedom of the Straits.

The Refugee Problem.

All reports agree that the situation in Thrace is actually desperate. The capacity of the railways is taxed to the uttermost in the transporting of troops, and the roads are described as alive with refugees of all ages and all classes, who have in most cases abandoned their worldly goods and are concentrating every effort in reaching a place of safety. And afterwards, what? The problem of relief is far too great and complicated for any one

Digitized by Google

nation to tackle unaided; and if effective aid is to be given, Great Britain, France, and Italy must take the work in hand, in co-operation, of course, with the Greek Government. Obviously, the best course for them to follow would be to make a joint loan to the Greek Government, to be used for public works, on which refugees—and only refugees -- should be employed. In order to disarm any hostile criticism, the application and disbursement of the money loaned might be put under the supervision of an international committee. There would be no difficulty whatever in finding suitable work to be done—the Struma valley irrigation works, for instance, could be put in hand at once, and other tasks are plentiful. The plans already prepared by Sir John Jackson's firm should be immediately available for the purposes of refugee relief. But if the problem is to be grappled with successfully it can only be by such a combination as we have suggested.

Constantinople and the Nationalists.

Constantinople has had an opportunity to demonstrate its feelings towards the Nationalists and their successes, and it has taken it eagerly. An attempt to land some 200 picked gendarmes for Thrace was vetoed by the Allies. However, the transport on which they had arrived was anchored in mid-Bosphorus, and there she was made the object of popular demonstrations by every passing ferryboat, while "100 Nationalists resembling gendarmes" were allowed to land and to take part in a Nationalist demonstration, being "officially described," says *The Times* correspondent, "as Rafet Pasha's soldier servants and bodyguard." It was the latter demonstration which gave Constantinople the chance to show what it felt, and the citizens made the most of it. Triumphal arches were erected, bearing enthusiastic salutations; flags and laurel wreaths were everywhere; and the crowds, reinforced from the outlying villages, were full of enthusiasm. In a word, the Governor-designate of Thrace had a remarkable and most fervent reception.

Rafet Pasha's Hint.

That Constantinople should be in exultant mood is quite natural, but it is, perhaps, permissible to doubt whether the exultation was felt in all Turkish circles. Rafet Pasha's attitude towards the representative of the Sultan, who greeted him on behalf of the monarch, was not cordial. He requested the delegate to express his "religious devotion to the Seat of the Caliphate." Later, in replying to greetings sent him by the Crown Prince, the Pasha was more cordial, declaring that the Crown Prince is heir to the Seat of the Caliphate, and that the Nationalists had taken an oath to save the Caliphate. The significance of such conduct will not have been lost upon Constantinople. But to foreigners it is possible that the oration delivered by Rafet Bey at the tomb of Mohammed the Conqueror was the most interesting feature of the day's proceedings. For in this speech the Pasha declared that Turkish hearts are filled to-day with the divine inspiration of patriotism; and it would be futile to deny the truth of his statement. Twenty years ago "patriotism" was a word unknown, a thing utterly unfamiliar to the Turks: to-day it is a driving force that no foreign Power can afford to ignore. Turned into proper channels, it may enable the Turks to do even better than their best friends had ventured to hope. It may prove the tonic that will set the "Sick Man" on his feet quite firmly; in fact, the symptoms all point in the direction of that being the case.

Bucharest Rejoicings.

Reports of the concluding celebrations in connection with the Roumanian Coronation show that, in spite of unfavourable weather, Bucharest rose to the occasion, and by the warmth of its demonstrations of loyalty crowned the celebrations with success. The city was crowded; ten thousand provincial mayors are reported to have been assembled, and many thousands of other visitors had flocked into the capital for the festival; and these enjoyed the reviews and the historical pageant in spite of the rain, and left no possible doubt of their loyalty to King Ferdinand and Queen Marie. It is pleasing to note that the Duke of York is reported to have been "an undoubted success" as the British representative at these ceremonies. His Royal Highness shares his elder brother's gift of winning friends, but we hope that the cordial reception given him by the Roumanian crowds, as well as by the Roumanian Royal Family, was inspired partly by friendship for Great Britain. The decorations bestowed upon him and the members of his suite by King Ferdinand will afford satisfaction to Britons as tangible evidence of that friendship.

Bernard Pasha.

A Reuter message from Khartoum recently announced that "the negotiations relating to the Makwar Dam (Sudan) Loan having been completed, Sir Edgar Bernard has resigned the Financial Secretaryship, and is to be succeeded by Colonel George Schuster, late of the Trade Facilities Board." The conclusion of this loan, so long a subject of strong interest, if not of anxiety, in the Sudan, marks a definite stage in the history of that country; and one at which Bernard Pasha, who has been so long associated with the development of the Sudan, felt able to withdraw. He has worked hard, and at times his work had to be done in difficult circumstances. The fact that his successor is a Treasury expert may be regarded as recognition of a new importance attaching to the Sudan in the scheme of the British Empire.

Arab Claims.

As was to be expected, the Arabs are taking considerable interest in the forthcoming Near Eastern Conference. King Hussein of the Hejaz, claiming to speak as the leader of the Arabs, is understood to have notified the Allies that, in view of promises made, peace must not be concluded without providing for the complete freedom of the Arab peoples. For their part, the Arabs of Palestine have pointed out to Sir Herbert Samuel that the Sèvres Treaty has been practically abolished by the Mudania Agreement, and that therefore the Mandate (for Palestine) and the Balfour Agreement go by the board. Sir Herbert is informed that the Arab Executive is sending delegates to the Conference to represent the Arab view, and he is asked to suspend certain Government measures until the future is made clearer. The second argument is not without ingenuity and some force, but the Arabs of Palestine would surely be wiser to accept accomplished facts and bend their undoubted energy to making the best of them. As to King Hussein, his claim to speak for all the Arabs would be hard to prove, and the Allies are not likely to pay very much heed to the protest of one who has done so little to help them of late.

Persia and the Bolshevists.

As far as it is possible to judge from the somewhat cryptic telegrams that reach this country by roundabout routes, Persia appears to have been having yet another small crisis of its own. The

Digitized by Google

Minister for War, it seems, has been getting into hot water in the Mejliss, where his methods of "forcibly appropriating" all taxes and revenues for the benefit of his own Ministry have met with strong disapproval. Moreover, he has been sending military governors to various places, and presumably this has led to unfortunate clashes of authority. Now, however, he has made his peace with the Mejliss, undertaking to defer to the control of the Finance Minister in regard to supplies, and recalling the military governors, except the one at Tabriz. Behind all this, it would not be surprising to find, the real struggle is one between the Sardar Sipah on the one hand and the Bolshevists and their adherents in Persia on the other hand. For, with all his faults, the Minister for War is a strong man, and as he is not on their side the Bolshevists view him with disfavour.

The Prince at the Guildhall.

At the Guildhall last Friday the Prince of Wales wound up his Indian adventure in the traditional way, and the only unusual feature of the occasion—the absence of a Prime Minister—was sufficiently accounted for by the resignation of the Ministry on the previous day. Mr. Lloyd George, however, filled the vacancy successfully, and the Prince's speech was of the type we have learned to expect—a frank and sane review of his experiences, with here and there a glimpse of the national ideals which he is destined to represent. India, in particular, will note two statements: the Prince is an optimist regarding her, and he hopes to visit her again. The latter hope will be widely shared, while we are inclined to think that at the present juncture a course of optimism is what the country most needs. Long ages of unhappiness have left so deep a mark on the minds of the people that they are inclined to assume that any change must be for the worse. Many of their difficulties just now are products of their own imagination, and the long road before them would lose half its anxieties if they could be led to face it with a cheerful heart.

Lord Inchcape's Mission.

Lord Inchcape's departure last week was made the occasion for a somewhat extensive variety of comment, much of it distinguished by that lack of a sense of proportion which seems to be becoming endemic in this country. From one source, indeed, it was possible to infer that most of the details of an Indian millennium are already worked out; but, speaking for ourselves, we prefer to accept Lord Inchcape's more modest anticipation that it might be possible to produce a report which might enable India to carry on until sound economic conditions are restored and incidentally to effect some reduction in taxation. We shall be pleasantly surprised if the latter result is actually achieved, but the main point is to insist on the essential fact that, though India is very seriously embarrassed, practically no permanent harm has yet been done. An old-established and not very progressive concern, being in temporary difficulties, aggravated, perhaps, by some divergence of views among the partners, has called in representatives of modern "big business" to advise it how to turn the corner, and it is possible to wish the advisers every success without expecting them to reconstruct the entire plant.

The Passage Question.

It is significant of the variety of Lord Inchcape's interests that he is to be welcomed in India by a monster petition relating, not to his official mission, but to the cost of passages between England and India, a matter in which he presumably has the deciding voice. The petitioners' case has our entire sympathy, for there is no doubt that fares and incomes are at present very imperfectly co-ordinated, but we confess we are not very hopeful of immediate results. From the report of the P. and O. meeting we gather that the company can at present fill its cabins more easily than its holds, and, so long as these conditions prevail, the commercial case for reducing fares is somewhat weak; but, however that may be, we think the promoters of the petition have made a tactical mistake in confining the movement to Europeans. The number of Indians who travel by sea is increasing steadily, and may soon be an important factor in the question; many of them, especially students, are hit as hard as any Europeans by the cost of travel, and we are inclined to think they are more effective agitators than the merchants and officials who have taken the matter in hand. A really national movement might possibly accomplish more.

Sir William Meyer.

We have to record with sincere regret the sudden death of Sir William Meyer, G.C.I.E., K.C.S.I., the High Commissioner in London for the Government of India. Only last week we wrote of the rapid development of his office in the short time which had elapsed since its constitution; on the day our words appeared in print, Sir William was taken suddenly ill, and died almost immediately. The outstanding feature of his long Indian career was his tenure of the office of Financial Member of Council from 1913 to 1918, a time of stress during which he had to face a large volume of criticism, much of it ill-informed and misdirected. His experience as High Commissioner was very different; we can recall no serious criticism of his activities, while we have heard frequent praise of the energy and ability with which, somewhat late in life, he undertook the organisation of an office for which no exact precedents were available. If he has left it in some respects incomplete, it can, at any rate, be said that the work accomplished is likely to stand the test of time.

THE WEEK AT HOME.

London, Monday Evening.

The Change of Government.

The Coalition is dead, and Conservatism reigns in its stead. Whether it, too, will have to turn itself into a Coalition remains to be seen; for the time being the events of last week, and still more the prospects of the next two or three weeks, are all-engrossing.

The Near Eastern question was the fuse which detonated the mass of explosives that had been accumulating at home since 1918. The Turco-Greek question had not, to all appearance, moved the country very deeply; and not all Mr. Lloyd George's eloquence over "the freedom of the Straits" made Chanak and the Dardanelles a living issue to the masses. But there was a sudden outburst of Press criticism of the Government from all quarters which encouraged the movement towards rebellion in the Conservative camp; and a fortnight ago Mr. Bonar Law wrote a letter which, as I pointed out in this column at the time, was in effect a bid for the Premiership. A political friend of mine, whose heart is perhaps a little stronger than his head, rebuked me for taking too sardonic a view of statecraft; he read the letter as an attempt to give outside support to the Government. I am afraid the event proved my interpre-

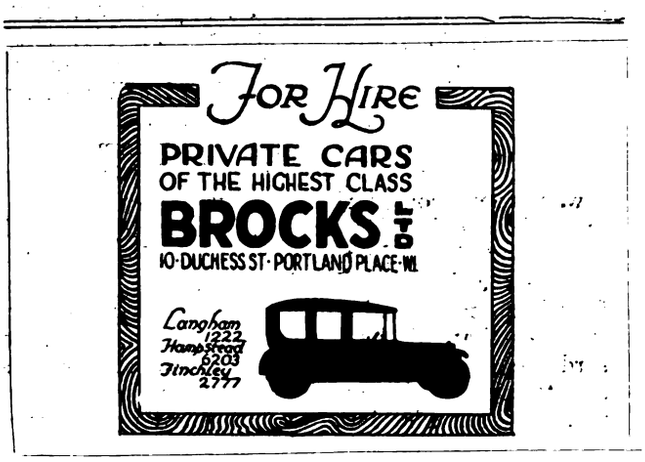
Digitized by Google

tation to be right; for Mr. Lloyd George is politically no more, and Mr. Bonar Law, who refused office in the dark days of 1916, has not said "no" a second time in these quieter days.

At the decisive Carlton Club meeting on Thursday Mr. Chamberlain argued in favour of the Coalition. It was not known whether Mr. Law intended to speak, or in what sense he would speak; but when Mr. Chamberlain sat down, the old Unionist leader rose, and spoke very quietly but very emphatically in favour of ending the Coalition at once. That was what the meeting wanted to hear—particularly after the Conservative victory at the Newport by-election the day before—and by a majority of two to one the Conservative members in the House of Commons resolved that they would no longer support the Coalition. As soon as the news was conveyed to Mr. Lloyd George he saw that his position was impossible. The Carlton Club vote was at half-past one; by four o'clock the Prime Minister's resignation was in the hands of the King, and by six o'clock Mr. Law was at Buckingham Palace. There was a slight technical difficulty, owing to the fact that Mr. Bonar Law is not actually the leader of the Unionist Party—he resigned that office on his illness a year ago—and, theoretically, he could do nothing until he was re-elected. A meeting of the party was at once called, and his unanimous election followed. Meanwhile the work of Cabinet-making, with its intrigues, jealousies, and disappointments, has been going on during the week-end.

The New Cabinet.

It has not been an easy business; it never is. But it has been complicated in this case by the fact that, after all, it was impossible to avoid a party split. Immediately on Mr. Lloyd George's resignation, thirteen Conservative members of the late Government issued a protest against the methods by which it had been brought about. Some of the small fry of Under-Secretaries who signed it did not matter very much, but the manifesto was also signed by Mr. Chamberlain, Sir L. Worthington-Evans, and Sir Robert Horne—three of the most distinguished members of the Government. The fact that they will not take office under Mr. Bonar Law will be a source of grave weakness to him. In the first place, their abstention weakens Mr. Law in the Commons. Up to a point he may be able to redress the balance by including younger men, such as Lord Wolmer and Mr. Ormsby-Gore, which is not a bad thing in itself; but he will have to get some of the heavy-weights from the House of Lords, which will be a source of difficulty in debate against a strong Opposition in the Commons. And in the second place, and of much more importance, the abstention of these leading Coalition Unionists throws Mr. Bonar Law back on the Die-Hard section of the party. These are good fighting men, but they are intolerant and reactionary, and their constructive ability has not hitherto been conspicuous. They have carried little weight in political argument, their abilities are obviously limited, and they are entirely out of touch with large sections of the community. Indeed, a phrase in Mr. Bonar Law's speech at the Carlton Club shows that he himself is more than a little dubious of their influence. If they succeed in controlling the new Government with the dead-weight of outworn tradition, they will merely give an impetus to the Labour movement to which they are bitterly opposed.



The New Opposition.

In the last Parliament the Opposition was impotent and hopeless; in the next it will obviously be forcible and effective. The dissentient Conservatives have announced that they will not oppose the Government, but the situation will obviously force upon them the position of candid friend, which is sometimes still more annoying to the party criticised. (Moreover, they can hardly be placated by office, as some candid friends can be, for they have already given proofs of their disinterestedness and entire independence. They may not have flung away ambition, but they can let ambition wait.)

But the real strength of the Opposition will be Mr. Lloyd George, whom the country still recognises as a giant among the pigmies. He is a little tired now—he has been in office continuously since 1905—and he badly needs a rest. But he is already rejoicing in his freedom, and, after a holiday, he will be certain to use it effectively. His single personality is more dynamic than that of the whole of the new Government, which is bound to be rather colourless—efficient and strong in administration, but unimaginative—and if he succeeds in reuniting the Liberals under his banner, or in forming a Centre Party, it will be only a question of time before he is in power again. It must always be remembered that he has been brought down by the politicians, not by the people, and the masses are with him and regard him with even more reverence than our fathers regarded Gladstone. They recognise, of course, that he has made grave mistakes, but the mistakes are likely to be forgotten and only the services remembered in a few months' time.

The General Election.

The new Government, of course, cannot carry on without a General Election; it would be simply inviting disaster to do so. At first there was some question whether the election would be held in November or postponed till January—there would have been no difficulty in holding a short session of Parliament to wind up business—but as the new Ministers cannot take their seats without individual re-election, and they are likely to be opposed, that would merely mean trouble and expense for nothing. Moreover, there is something in the argument that it is wise to appeal to the country before the novelty has worn off, and before any mistakes have been made—many things may happen in three months. Besides, the Liberal and Labour Parties are not quite ready with their candidates and organisation, and that in itself gives "the man in possession" an advantage.

It is understood that Mr. Bonar Law's first executive act will be to advise the King to dissolve Parliament: there will be a short three-weeks' campaign, and on November 18 the elections will be held—all on one day, as in 1918. The new Parliament would assemble almost immediately afterwards in order to ratify the Irish Free State

Digitized by Google

Bill, which must be given legislative effect by the first week in December. After that, Parliament will probably adjourn till February, 1923, when the real tug-of-war will begin.

The present House contains 707 members, of whom 73 Sinn Feiners have never taken their seats. The formation of the Free State will operate to reduce the size of Parliament—the thirteen Ulster members will still attend—and the new House will contain 615 members—England 492, Wales 36, Scotland 74, and Ireland 13. Of the English seats London alone accounts for 62. At present there are 315 Coalition Unionists, 121 Coalition Liberals, 60 Independent Unionists, 34 Independent Liberals, 75 Labour members, and 12 National Democrats—a hybrid Coalition Labour group which will probably disappear, and whose disappearance will make no difference.

The Unionists, therefore, have a majority over all parties, but they will find it difficult to retain that position. It must be remembered that the 1918 election was abnormal, and that the Coalition coupon gave Unionists thousands of Liberal votes which in many cases they will now lose. Moreover, Labour was in a difficulty, owing to the pro-German and pacifist attitude of some of its candidates. The Unionists are quite certain to lose a large number of seats, although they may make good the loss to a certain extent at the expense of the Coalition Liberals, whose position is quite extraordinarily difficult. There is no time to arrange a reunion of the old Liberal Party, which is to the advantage of the Unionists. The Coalition Liberals will not desert Mr. Lloyd George; the stalwart Wee Frees will not have him at any price. Officially and personally, the Asquith group still pursue their vendetta against him. As a writer in the *Outlook* puts it this week, their song is always :—

"Morning, evening, noon, and night,
Hang L. G., sang the Asquithite."

But, for all that, a good many Wee Frees in the North would be glad to have the Welsh wizard and his banners of the dawn back again, particularly in the North. (One notices that London politicians and journalists are always apt to forget the North, and to quote the clubs and Whitehall as if they were England, but they are not. The real decisions of England are made where people work hard and think hard, which is the North. Some foolish people still further North suggest that the decisions of England are made in Scotland, where people work and think still harder; but that is not true, for all the Scotsmen who really matter have long since come to London.)

In any event, the Wee Frees and Coalition Liberals are expected to win a good many seats in the North, and, more particularly, in Scotland—unless they are upset by Labour and triangular contests, which may let anybody in. Labour is, of course, the real dark horse.

The official Labour Party has 400 candidates for the 615 seats. At present it has seventy-five members, but it expects to assemble 250 in the next Parliament. Curiously enough, the Labour prediction coincides pretty accurately with the reports from the Unionist organisations; but, personally, I rather doubt their getting quite so many, and from various accounts I should be disposed to forecast 200 Labour members—some of whom will come from the agricultural districts of the South, where the repeal of the Minimum Wage Act by the Government last year, and the excessive reductions in wages by the farmers ever since, have turned every labourer into a certain voter for the Labour candidate wherever he can get a chance. In a good many of the towns I doubt whether Labour stands so good a chance. It is true that Mr. Arthur Henderson has done a great deal of good organising work, and some of his candidates are better than the rather obvious poofsticks he had to rely on in 1918; but Mr. Henderson himself has just made an unwise speech, saying that the Labour Party will be against all private enterprise that will make a difference; the strikes of the past three years will further alienate the middle-class vote, without which Labour is helpless; and the recollection of direct action and other matters will hamper them.

The Tories are relying a great deal on the bogey-man theory—the "fear of Socialism," and so on. But that will probably cancel out against the Labour promises of a better England and the attraction of the unknown, and, above all, the desire to "give the other fellow a chance," which is always to the fore at an election.

Therefore, although I recognise that I may have to hide my head with shame in a month's time, I prophesy that Labour will have 200 seats in the next Parliament, the Liberals of both brands 100, and the Conservatives 300. After that anything may happen, but if these figures are anywhere near the actual total the next Parliament will not be a very long one.

Mr. Churchill's Illness.

The Colonial Secretary, by the way, has had cruel luck. The night before the Cabinet resigned he was operated on for appendicitis. One cannot help being sorry that a man of so energetic and ambitious a temperament should be confined to a sick-room at a time like this. But perhaps one is even more sorry for his doctors. Mr. Churchill has done some very good work at the Colonial Office, but he is still on the right side of fifty, and he may some day be Prime Minister.

OCELLUS.

It is understood that at the instance of the Rajah of Pudukotah the Madras Government has decided to institute a regency with the present Prime Minister, the Rajah's brother, as Regent. The Rajah, who lives chiefly abroad, has neither abdicated nor ceased to be the ruling chief, but has temporarily delegated his powers to his eldest brother.

The Toronto *Globe* argues that there is plenty of room in Canada for tens of thousands of Armenian settlers, and urges a general effort on the part of the Government and religious and benevolent organisations to settle Armenians on the unused land of the Western Provinces.

M. Sterghiades, formerly Greek High Commissioner in Smyrna, has been summoned by the Greek Revolutionary Committee to come to Athens and render an account of his administration in Asia-Minor.

The Near and Middle East.

EGYPT.

Cairo, October 12.

Accession Anniversary.

The past week, which in consequence of local events and the feeling aroused by the Turkish crisis had been expected to give rise to some trouble in the form of demonstrations, has passed off without any regrettable incidents. Monday was a public holiday in celebration of the anniversary of the accession of King Fuad. The usual reception was held at Ras El Tin Palace, and was very well attended. Sarwat Pasha, the Prime Minister, gave a big tea-party at San Stefano Casino in the afternoon, and Heddaya Pasha, the Governor of Alexandria, gave a banquet in the evening, but beyond this there was no popular manifestation of any description.

Madame Zaghloul Pasha.

On Sunday Madame Zaghloul Pasha left for Gibraltar in order to join Saad Pasha. As may be recollected, when her husband was transferred from the Seychelles, the High Commissioner offered to facilitate Madame Zaghloul's journey to Gibraltar in the event of her wishing to join him. At first Madame Zaghloul Pasha declined the offer, but subsequently Saad Pasha telegraphed her to come, and in accordance with his promise Lord Allenby made the necessary arrangements for her passage.

As soon as her decision was known the most elaborate preparations were made by the "Wafd" to give her a good send-off, and the assistance of the students was enlisted. A special train was chartered to convey Madame Zaghloul, certain Egyptian ladies, and the leading Zaghloulists to Port Said. A reception was organised at Cairo Station, and the duty of keeping the route was entrusted to the students. Everything passed off very satisfactorily. The horses were detached from Madame Zaghloul's carriage, which was drawn by students to the station; and a very large crowd, quite as large as that which welcomed Zaghloul Pasha in April last year, was in the streets and gave Madame Zaghloul an ovation as she passed. But although the greatest enthusiasm prevailed in the streets and at the station, there were no untoward incidents, and the great demonstrations which the authorities had expected to result never materialised.

In Egyptian circles there is a very strong feeling that Madame Zaghloul will not be absent long, and that she will return, probably before the end of the year, with Saad Pasha. There is, however, nothing definite to justify this impression, although as affairs go nowadays one should be surprised at nothing. One of the facts on which this impression is based is, I find, the recent reform in the penal code, which lays down heavy penalties for attacks against the King or his immediate family, attempts to overthrow or change the form of government, the making use of bombs for such purposes, the entering into criminal agreements and attempts to intimidate the King. Ministers, or members of Parliament, and so on. These amendments to the penal code are intended to fill certain serious *lacunæ* in existing legislation. These *lacunæ* have during the past eight years been covered, it is true, by various proclamations, but while the introduction of these amendments may legitimately be regarded as paving the way for the abolition of martial law, it does not necessarily follow that Zaghloul Pasha will as a consequence be allowed to return, although in view of the elections such a step might conceivably under certain conditions be taken by the authorities.

Meanwhile, the members of the Wafd who were recently arrested are still interned at Kasr El Nil Barracks, but it is expected that three of them will shortly be released and that proceedings will be started against some of the others in whose case incriminating evidence is understood to have come to light. The members of the Wafd Committee who replaced the Seychelles deputies and who were condemned to seven years' penal servitude are in the hospital ward of one of the prisons pending the preparation of suitable premises for their accommodation.

The Emir Abdulla.

During the past week the Emir Abdulla passed through Alexandria on his way to England. It is understood that he is paying this, his first, visit to England at the express invitation of the British Government, with whom he will discuss the future of Transjordania, his relations with Palestine, Mesopotamia, and Syria, and the situation created by the Wahabi movement.

There was quite a scare on the Eastern frontier the other day owing to information brought in by an aerial reconnaissance that a large force of Wahabis had been sighted 80 miles south of Maan, moving in a north-westerly direction. What added to the apprehensions felt on the Egyptian side was that this force suddenly disappeared—which led the authorities to expect that raiding parties would appear in Sinai. The Frontier Districts Administration, which is responsible for the protection of the land frontiers, was quickly on the alert, and extensive preparations were made for the Army and the Air Force to co-operate in coping with any parties which might cross the frontier. These fears in the end proved to be groundless; at any rate no raids took place; but the scare served a useful purpose, in that it enabled the authorities to test the local organisation for protecting the frontier.

The Egyptian Freemasons.

The Freemasons of Egypt—or rather the Grand Lodge of Egypt—are in trouble, the cause being the election of a Grand Master. It appears that at the annual election of officers held last month His Highness Prince Mohamed Aly, nephew of King Fuad and brother of the ex-Khedive, was proposed as a candidate in place of Idris Bey Ragheb, who had held the post for a great number of years. Idris Bey objected to the Prince's candidature, on the score that he did not comply with the qualifications laid down in the statutes of the Grand Lodge, and he withdrew from the meeting. The election, however, proceeded and in due course Prince Mohamed Aly was elected by an overwhelming majority. Idris Bey refused to accept this decision, and brought an action against Prince Mohamed Aly and the Executive before the Native Courts. The latter, in view of the fact that the lodge has a large number of foreign members, declared itself incompetent, and the case is expected to come very shortly before the Mixed Courts. Meanwhile a notice has been issued to all lodges and Freemasons under the authority of the Grand Lodge of Egypt to the effect that Idris Bey Ragheb, having failed to retire from his office after the election of his successor and not having handed over the Grand Seal, is deposed from all his Masonic powers and authority.

There the matter remains for the time being. A certain amount of mystery surrounds the whole affair, since Idris Bey Ragheb himself during the summer offered the Grand Mastership to Prince Mohamed Aly. There would therefore appear to

Digitized by Google

be a good deal more in this dispute than meets the eye, and it is alleged by those professing to be in the know that while the origin may be the appeal issued earlier in the year by Idris Bey Ragheb to the Arabs of Palestine to put an end to their disputes with the Jews, the real question at issue is whether the Grand Lodge of Egypt, which has nothing to do with the other English lodges in Egypt, is to become a political organisation like the various Continental lodges.

PALESTINE.

Jerusalem, October 8.

A Period of Quiet.

The past fortnight has gone by with nothing of great importance to record. Palestine is really a sleepy, peaceful little country; the drawback is that it is always under a microscope—or rather several microscopes, each with its own particular set of more or less distorting lenses. It seems to be given to very few to gaze at things here through the unexciting medium of plain window-pane glass. It is supposed that something is happening or about to happen in Transjordania. The last we heard was that the tribes had mobilised and gone forth east to rout out the Wahabis from their newly established centre in the Jôf oasis, midway between Amman and Baghdad. That was quite a fortnight ago. But so far we have heard no news, and not even rumours. The Emir Abdullah does not appear to regard the Wahabi peril as worth bothering about, and both he and the British Representative, Mr. Philby, passed through here last week on their way to England. It may be worth pointing out that Great Britain's hold on "British Transjordania" is of the most feathery lightness; it is even news to many a Transjordanian that Great Britain has any sort of authority out there. At the moment, I believe it is quite true to say that we have only two British permanent officials there all told.

Quietness also reigns for the moment in the ranks of the Arab malcontents. Soon after the Government issued its warnings explaining just how the "Nablus Congress" resolutions about interfering with Government orders and boycotting one thing or another might fall foul of the laws of the land, the President of the Moslem-Christian Association launched a proclamation to the people explaining how no human-made law could take away from them their divinely-given freedom; and, at the same time, sent a long note to the High Commissioner, the gist of which seems to have been that some particular point in the Government's warnings was invalid, since they failed to quote the Ottoman Code correctly!

The Palestine Delegation.

The returned Palestine Delegation did some touring up and down the country, and had their photographs hawked in the streets, but they seem to have had no success in raising funds to continue their campaigns inside or outside the country. Their press organ, *es-Sabah*, has been defunct these many weeks past; nothing more has been heard of the boycott to be organised against Jewish trade; no progress seems to have been made towards sending a delegation to America, and it is even said the landlord wishes to evict the local Jerusalem branch of the Moslem-Christian Association from its premises for failure to raise the necessary rent.

The Naturalisation of Jews.

In local Jewish politics, naturalisation, or rather the amazing lethargy of the Jews in getting themselves naturalised, is the principal topic of interest. In view of the greatness of the issues involved, this slackness requires a good deal of explanation. The Jewish community leaders are doing their utmost by persuading the Immigration Department to open special registration offices on the very doorsteps of almost every single Jewish quarter, to reduce certain fees, to extend their office hours, and generally make smooth the path of the Jew seeking citizenship in his national home.

This hesitation on the part of foreign Jews to become naturalised Palestinians is attributed to many reasons, mainly to ordinary ingrained Jewish dilatoriness, but also to poverty or to busy-ness, or, in the case of present or one-time well-to-do Jews, to the fear of sacrificing claims to property in their former country. Even Jews dispossessed by the Bolshevist régime still cherish hopes that, with a swing of the pendulum, they may once more recover their possessions.

Side by side with naturalisation goes the name-changing campaign. Caution is demanded even in this. Awkward incidents are constantly arising. One who had enthusiastically changed his name and passport found that he had, *eo ipso*, legally forfeited all rights to recover his wife and family whom he wished to bring out from Europe; while a certain well-known Jewish writer, whose name was much too important a professional asset to suffer change, indulged a vicarious patriotism by changing his wife's first name—from something manifestly Russian to that of one of the mothers in Israel; but he only succeeded in scandalising a wide circle of readers by having dedicated two consecutive books to his "life companion"—with a different name in each.

A good deal of ingenuity has to be exercised in choosing a new name which shall have the requisite Hebrew colour and atmosphere. First names are

Digitized by Google

simple enough. It is family names that cause the difficulty. As is well known, it was the intolerably confusing sameness of these which compelled some Central European Government, some two hundred years or so ago, to insist on all Jews assuming a more discriminating type of family name; and so, instead of the incessantly repeated Ben Abrahams, Ben Isaacs, and Ben Jacobs, we got the Goldmans, the Silbermans, the Kupfermans, the Perlmans (some preferred it in the form of Margolis or Margoliouth), the Goldsteins, and even Goldbergs, down to the Erdmans, according, so it is said, to the *bakhshish* pocketed by the public registrar under the threat of making the name something worse. So far, in this new name-revising epoch, the record for courage is acknowledged to be held by one who has adopted the surname of "Libbavtini," which is to say, being interpreted: "Thou (fem.) hast ravished my heart."

The Winter Season.

There are signs that the winter Jerusalem season is coming round on us again. The British School of Archæology has opened what is Jerusalem's social speciality, the orgy of lectures, with a course on the "Neighbours of Ancient Palestine and Syria," delivered by Professor Garstang, the head of the British School and Director of the Government Department of Antiquities; the Sports Club wound up the summer with a widely patronised tennis tournament; a performance of "A Midsummer Night's Dream" is to be given in a few weeks by the Jerusalem Dramatic Society in honour of the High Commissioner's and Lady Samuel's "silver wedding": a proposal is on foot to combine the Dramatic Society and the Jerusalem Musical Society and produce "The Mikado"; a scheme is also being put before the Palestine public for providing a spring season of grand opera, for which, so we are given to understand, the only thing now lacking is a little loose capital to start off with; we had an exhibition of paintings last week, and we are to have yet another this week, both under the patronage of the "Pro-Jerusalem Society." The first exhibition was of pictures by a Russian-Jewish portrait artist of some distinction, Mr. Joseph Tepper, who has come to settle in Palestine (and already Hebraised his name to Kaddar). Among his pictures was a large symbolic portrait of the High Commissioner, gazing over renascent Palestine with the Dead Sea in the background; the *mise en scène* was curiously reminiscent of the setting of Holman Hunt's "Scapegoat."

Principle and Expediency.

Students of Jewish history interested in the persistence of the type may find the following of interest:—

"The Grand Rabbinate of the Land of Israel received on Thursday morning the following telegram from Semakh: 'Seventeen Jewish soldiers [*i.e.*, members of the Higher Gendarmerie] were to-day dismissed for refusing to work on the Day of Atonement. In our National Home we cannot endure such a national insult. We require your immediate intervention. Complain to the Government.'

"The Grand Rabbinate immediately sent a letter of complaint to the High Commissioner against this treatment by their officers of Jewish soldiers who observed their religion and wished to cease from work on Israel's most holy day."

IRAQ.

Baghdad, October 13.

The New Cabinet.

At last a new Cabinet has been formed and the Anglo-Iraq Treaty signed. After nearly two months of interregnum without a Cabinet, and with the King sick and unable to attend to his duties, most of the old Ministers have been persuaded to return to their old posts. The only new face in the Cabinet is that of Haji Muhsin ash Shallash, a prominent merchant and banker of Nejef, who comes in as Minister of Education. His appointment was not expected, and it is understood that he was not anxious to take any official position, but being as he is, a level-headed business man of moderate views, he should be a very useful addition to the Cabinet. The only other change is that the Ministers of Interior and Justice have changed places. The Cabinet is sound and generally of very moderate views, and hopes are everywhere expressed that it will remain in office long enough to see through the elections to the National Assembly and be in a position to adopt and pursue a constructive policy which shall produce some tangible results in the way of progress. As an earnest of their good intentions and their desire to end the state of obstinate procrastination which has been so much in evidence hitherto, they have already approved of the Anglo-Iraq Treaty, and this document was signed on October 10 by the Prime Minister and the High Commissioner on behalf of their respective Governments. It is understood that every effort will now be made to hold the elections to the National Assembly at an early date, and submit the Treaty to that body for ratification. The details of the Treaty are to be published to-morrow in Baghdad and London simultaneously. Interest in the Treaty is well-nigh drowned in the great attention which is being paid to the Turkish situation, and most people have refrained from any comment pending the publication of the text of the Treaty.

The Internal Situation.

Internally things remain quiet, and the effervescence which was so much in evidence a month or two ago has completely died down. Energetic action in the Middle Euphrates has restored the Government's authority there, and some revenue is now being paid, while other parts of the country are also orderly.

In the Amadia district of Kurdistan an affray occurred a few days ago which may well result in an increase in the Government's prestige. Haji Abdul Latif, the principal personage in Amadia town, who had for some time in the past been to all practical purposes the ruler of the place, and so resented the appointment of a kaimakam, hoping, apparently, to take advantage of the unrest

occasioned in Kurdistan by the Turkish move in the direction of Rania, gathered a small band and attacked the town. Kurds and Assyrians from the neighbouring villages rallied to the support of the Government, and beat off the attackers, and the situation is once again normal.

Flying Accidents.

Two fatal flying accidents have occurred in the neighbourhood of Kerkuk during the past few days. In the first case, when one of the big Vickers Vernon machines crashed, the passenger was killed and the pilot very severely injured, while in the second case a smaller machine crashed and the machine and the pilot were burned. The occurrence of these fatal accidents from time to time serves to keep before us the expense, both in men and machines, of keeping a large air force in this country.

The Shiah Ulama.

Reports from Persia indicate that much capital is being made by interested persons out of the departure from this country for Persia of the two Shiah Ulama—S. Muhammad Sadr ud Din and Sh. Muhammad Mahdi al Khalisi—which event was referred to in a previous letter. It is being represented that they were deported, and that in this way a direct insult was levelled at the Shiah Ulama. As a matter of fact, this is not so. These two persons had deserted their spiritual sphere and taken a prominent part in politics, and had been first in arousing agitations against the Government. The High Commisssioner, therefore, gave a hint to their fathers that he did not approve of their sons' behaviour, and that it would be well if they absented themselves for a time from this country. They acted upon this hint, and every consideration was shown to them when they went, a fact which has been testified to in their own letters.

A Visiting Journalist.

Sir Percival Phillips, of the *Daily Express*, is on a short visit to Baghdad.

GREECE.

Athens, October 14.

Serbo-Greek Relations.

Following a long interview with the Yugoslav Minister in Athens, M. Balougdchitch, the Revolutionary Committee published the following statement:—

The Minister of Serbia to-day visited the members of the Committee of the Revolution at their offices. The Minister congratulated the Committee and expressed his sympathy towards the new movement, which, he said, would dissipate all suspicions, and serve to bind more closely the ties between Greece and Serbia. He then went on to say that Greece could rely upon the diplomatic support of Serbia, and that the latter would oppose any aggressive movement of the Bulgarian *Komitajis*. He emphatically denied the rumours to the effect that Serbia had aspirations to territorial acquisitions on the Ægean Sea. The sole desire of Serbia, declared M. Balougdchitch, is to ensure an economic outlet to the Ægean, and all that is looked for is the settlement of the question of the free zone at Salonika, which has been pending for some time now.

The President of the Revolutionary Committee, Colonel Gonatas, assured the Serbian Minister that he would use his influence with the new Government in order that the question may be speedily and satisfactorily settled, and also to effect a reciprocal agreement between the two countries, to give free liberty of action to Serbian schools and churches in Greece and Greek schools and churches in Serbia.

The Refugees.

In addition to the Asia Minor refugees who continue to arrive at the Piræus, many Greeks from Constantinople are abandoning their homes and emigrating to this country. A number of British families have also arrived here from Constantinople.

According to official statistics the number of refugees now in Greece exceeds 350,000, and a further 150,000 are expected. Never before has Athens been so full as to-day. The main streets are so crowded that it is almost impossible to walk, and unless one books in advance a table at a restaurant one runs the danger of going without a meal. Normally, the population of Athens and Piræus together is about 500,000; to-day, however, it could be safely said that the inhabitants of the capital alone exceed half a million.

Many of the refugees have been lodged in warehouses, factories, theatres, also in a number of empty houses in Phaleron and Kiphissia, which were requisitioned by the Ministry of Public Assistance. But these measures did not prove efficacious, as only a limited number of refugees could be accommodated, and the Government is now contemplating the introduction of a law by which every family residing in a town with a population exceeding 5,000 be compelled to afford free lodging to one or two refugees. It is understood that the working of a similar law which was recently in force in Bulgaria proved very successful.

Last week the British Legation informed the Ministry of Public Assistance that the British Government had dispatched ten wagons full of pharmaceutical necessities and clothing for the relief of the refugees, and requested the Government to allow these goods to enter Greece free of Customs duty.

The Recognition of the King.

The Hon. F. O. Lindley, Minister of Great Britain; M. le Baron Guillaume, Minister of Belgium; as well as the Ministers of Roumania, Russia, Spain, Bulgaria, Serbia, and France, have signed the visitors' book at the Royal Palace.

Whilst it is understood that the signing of the book does not in itself mean that the Allied Powers have recognised King George II., it is a happy augury of the trend of diplomatic relations between the Powers and Greece.

General News.

The Revolutionary Committee has addressed a circular to the Ministries and other Government offices, requesting them to remove the photographs of ex-King Constantine and ex Queen Sophie. These should be replaced by the photographs of King George II. and Queen Elisabeth.

M. Demetrius Calapothakis has been reappointed Director of the Press Bureau.

General Danglis has returned to Athens from Paris.

BULGARIA.

Sofia, October 18.

The Mudania Armistice.

It is most interesting to note the changed outlook of Bulgaria now that an Armistice has been declared between Turkey and Greece. Before the Mudania Conference Turkey was popular in Bulgaria, Greece was not. Now that the Armistice

Digitized by Google

terms have been made public, a gradual but none the less serious revulsion of opinion has taken place. Bulgaria realises that with the Turks up to the River Maritza Ottoman influence in South-east Europe may shortly become a dangerous thing.

It is said that Turkey claims the port of Dedeagatch, and that the Allies do not regard her claim unfavourably. Bulgarians assume that in order to dispel the much-talked-of "Bulgarian-Turkish" friendship the Great Powers would be glad to use Dedeagatch as a bone of contention between Turks and Bulgars. In any case, nothing more has been heard about Bulgaria's outlet to the Ægean Sea, and it is feared that Turkey may adopt the same position *vis-à-vis* Bulgaria that Greece has hitherto occupied. In other words, instead of Greece's preventing Bulgaria from communicating freely with the Ægean, it may be Turkey.

Another decision much commented upon is that of the cession of Demotika to the Turks. The Bulgarians fought against Turkey ten years ago in order that she might be driven out of Europe. Now they see Turkey regaining her lost territories, and even increasing them.

Hate towards Greece has given way to distrust, or perhaps only pity. Rightly or wrongly, Bulgaria considers Greece as "down and out." At the same time the Thracian element in Bulgaria still cavils at the Greek occupation of Western Thrace, and demands that Bulgaria shall have a hand in the administration thereof. The almost universal cry is, however, autonomy. Bulgarians know that their minorities will not receive good treatment at the hands of the Greeks, but they also know that the Turks in Eastern Thrace will be quite as ruthless, if not more so, towards all Christian inhabitants.

The above facts indicate how rapidly opinion here has changed. They also indicate that the much flaunted bogey of "Bulgarian-Turkish friendship" is not, after all, such a fearsome thing.

The Defence of the State.

At the beginning of the month M. Nedelko Athanassoff, President of the Sobranye, visited M. Stambolisky at Geneva. In conjunction with the Prime Minister, a Bill providing for "The Defence of the State" was drafted. The text of this Bill is as follows:—

Art. 1. Everyone who participates in secret assemblies or conspiracies directed against the members of the Government will, in the event of the plot failing, be punished by a five years' exile and a fine ranging from 20,000 to 1,000,000 levas. If the conspiracy results in the death or wounding of a member of the Government the punishment is death.

Art. 2. Everyone who writes or orally incites to revolt, to commit murder, or to use armed resistance against the authorities, providing no actual violence takes place, will be liable to five years' exile and a fine ranging from 100,000 to 1,000,000 levas. If violence actually takes place the punishment is death.

Art. 3. Everyone who is a member of a secret or non-secret society which possesses arms and which aims at forcibly overthrowing the Government, is liable to five years' exile and a fine ranging from 20,000 to 1,000,000 levas.

Art. 4. Everyone taking part in a conspiracy who warns the authorities of what is going on receives a free pardon.

Art. 5. Everyone who is aware of a crime, either committed or to be committed, and who fails to warn the authorities, is punished by three years' hard labour and a fine ranging from 10,000 to 300,000 levas.

Art. 6. Trials which may be rendered necessary by the present law are to be instituted by the Cabinet. These trials will be conducted by a Special Section of the Sofia Law Courts.

Art. 7. The present law remains in vigour until the end of the 19th National Assembly—that is to say, until March, 1924.

It is understood that certain other clauses will be added to this Bill, and it is thought that the "Control Bureau" may be restored. This Bureau will be charged with the task of pursuing the profiteers.

Dr. Nansen.

This morning Dr. Nansen arrived in Sofia. He motored from Constantinople to Adrianople in order that he might personally investigate refugee conditions in Thrace. He considers that the situation is exceedingly serious. Every Christian in Thrace is leaving, or has left, his or her home. The railway is occupied with the evacuation of the Greek army, but the roads are thick with refugees. The latter have left at such short notice that they have not been able to take away all their belongings with them; they are leaving big stores of grain behind them, which Dr. Nansen proposes to buy up and utilise on behalf of the League of Nations.

Dr. Nansen leaves Sofia to-morrow for Athens en route for Broussa, where he will see Mustapha Kemal Pasha. He hopes to be able to arrange with Kemal a *modus operandi* by which the Turks living in Macedonia and Western Thrace may be allowed to transport themselves, with their belongings, into Eastern Thrace, whilst Greeks from Eastern Thrace similarly move into Western Thrace.

Dr. Nansen will be entertained to dinner by M. Stambolisky and the Cabinet to-night, and tomorrow he will have an audience with King Boris.

TURKEY.

Constantinople, October 16.

The Second Armistice.

The conclusion of the Mudania Agreement has resulted in a relaxation of the tension, which had reached the point of hysteria as the days went by without the production of any definite result. Nevertheless, the exodus from the capital has not ceased. Even after the announcement of the signature of the agreement a number of British families left for Europe, and the presumably accidental violation of the neutral zone of the Ismid Peninsula during the earlier part of the week gave rise to alarming rumours and a momentary recrudescence of the recent anxiety. Fortunately, both fears and rumours proved to be without foundation. To those who regard the conclusion of the Mudania Agreement as marking the termination of the crisis it may appear strange that the exodus of non-Moslems, both native and foreign, should continue, and the circumstance may be interpreted as evidence of cowardice. In reality, however, it is evidence of something more discreditable, but not to the people concerned, for the underlying reason for the continuance of the exodus is a complete want of confidence in the honesty of Europe.

The Œcumenical Patriarchate.

The Mixed Assembly of the Patriarchate held a meeting this week under the presidency of H. H. Meletios, but in the absence of a quorum the assembly merely exchanged views with regard to the proposal of the Patriarch for the transfer of the Patriarchate to Mount Athos. This proposal is generally regarded as opportune, and it is also considered advisable that M. Venizelos should be consulted on the subject. The proposed step, it is understood, is subject to the establishment of

Digitized by Google

conditions which would render it impossible for the Patriarchate to function in Turkey.

French Policy.

The following is a translation of a paragraph published in the organ of the French High Commission in Constantinople, the *Stamboul*, on October 14 : -

It has come to our knowledge that a report, under the heading of the French Chamber of Commerce in Constantinople, is being circulated in the city, in which the Council of that institution is said to express in improper terms their feelings concerning the economic future of the country. The Council of the Chamber of Commerce requests us to announce that they are unconcerned in the composition of that document, the publication of which they disapprove, and the terms in which it is couched they consider very regrettable.

The document in question has been circulated privately, but copies have been sent, not only to the French High Commission, but also to the French Government and certain members of the French Parliament. Thus it is not, as the above paragraph might lead one to believe, a document emanating from irresponsible individuals who had made improper use of the stationery of the French Chamber of Commerce. On the contrary, the individuals responsible for the circular in question had every right to use that paper, and, what is more, whether the views therein expressed were couched in terms inconvenient to French political wirepullers or not, those views certainly do represent the convictions of the majority of French business men of account in Turkey.

The substance of the document concerned the Capitulations, which the French Government is prepared to cancel at the desire of the Angora Government, largely for the benefit of those who are interested in securing oil and mining concessions promised to M. Franklin-Bouillon by Yusuf Kemal last year. The argument brought forward was that the abolition of the Capitulations would mean the ruin of practically the entire commercial interests of French business men now established in Turkey, because not only would there be no reasonable security for life, liberty, or property, but because there would be no safeguard against unfair taxation. The heavy Customs dues which the Angora Government is already levying were mentioned as an example of what is to be expected, and the application of Prohibition throughout Anatolia was cited as the shadow of coming events in Constantinople. As Turkey is a considerable market for the French wine-growers, the application of this law of the Angora Government to the rest of Turkey would involve very heavy losses to one of France's most important industries.

Strenuous efforts have been made to induce the withdrawal of this awkward circular; and although the views expressed are logical enough there is a comic side to the matter, in that the French Chamber of Commerce has apparently only just discovered the logical results of French policy in the Near East. Yet it was but a little while ago that those who have been most enthusiastic in forwarding that policy were the honoured guests of the French Chamber of Commerce. Can it be that the sudden realisation of ugly facts has been brought about by British declarations regarding the impossibility of Britain's undertaking to police the entire world for other people's benefit?

A public notice issued in Palestine states that in accordance with one of the provisions of the Ottoman Penal Code any person who promotes a lottery is liable to imprisonment up to six months and to a fine, together with the confiscation of the lottery prizes. Under the Turkish régime permission in certain cases was given to communities to hold lotteries for charitable purposes, but the Government of Palestine will not grant permission except in the most exceptional cases.

PRESS ON THE NEAR EAST.

Egypt.

The *Glasgow Herald* of October 13 contains an article upon "Egypt's Progress," in which the outlook for that country is regarded as fairly satisfactory. After commenting upon the demonstration witnessed on the occasion of Madame Zaghloul's departure, it proceeds :—

> Putting aside this episode, the general condition of affairs in Egypt appears to be rather more satisfactory than it has been for a long time past, although it is very imprudent to take any but a short view about a country and a public in which the unstable elements are so conspicuously preponderant. A keen observer of Egyptian politics recently communicated to Sir Malcolm M'Ilwraith, late Judicial Adviser to the Egyptian Government, his considered opinion that apart from her low standard of common honesty, due largely to the overwhelming Levantine influx, Egypt at the moment is suffering more from a "moral drunkenness" than from any other political or social complaint. This inebriety is attributable to the effects of the flood of heady political talk with which demagogues and charlatans have now for some years been deluging the Egyptian public to the exclusion of sound and temperate views, the blunting of moral sense, and the weakening of the national character. Unfortunately, these primary results tend strongly to produce secondary ones, such as oppression of one class by another and accentuated Xenophobia, derangements in their way equally deplorable, and any estimate of the progress which Egypt is now making along the path of political independence must, therefore, be subject to some reservations. The immediate outlook is, we repeat, not unfavourable, and a satisfactory aspect of it is revealed in the resolutions just passed by the Egyptian Provincial Councils denouncing recent outrages against British residents in Cairo and calling upon the public to aid the authorities in discovering and bringing to justice the offenders. Correspondence between Sarwat Pasha, the Egyptian Premier, and Lord Allenby has accentuated the friendliness to this country which, whether "inspired" or not, must have in some way been at the back of resolutions differing so much in tenor from the vast majority of latter-day Egyptian political utterances.
>
> For the rest the two outstanding features of the political situation in Egypt just now are the postponement by Lord Allenby of his holiday in order to be present at Cairo during the discussion of the recommendations about to be presented by the Constitution Commission and the formation of the new Liberal Constitutional Party under the probable leadership of Adly Pasha, the advent of which we foreshadowed at the end of August. The absence of Lord Allenby during the ensuing critical two or three months might have proved a misfortune of the first magnitude, for it may be taken for granted that the susceptibilities not only of the framers of the new constitution, but also of Egyptian politicians in general, will have to be tenderly and skilfully handled in regard to certain points, in dealing with which the Commission has gone beyond what the British Government probably considers to be its proper province. Of the new party such accounts as are available give the impression that it is likely to be not only a progressive but also a distinctly beneficial development. It

Digitized by Google

is specifically stated that the party is in no way pledged to support the Sarwat Cabinet, but will act quite independently of the latter, although it contains many personal friends of the present Ministry. The Sarwat administration, as a matter of fact, is far from popular in the country, partly, no doubt, owing to the drastic character of some of the measures it has taken to counteract extremism. On the other hand, the Extremists, although they have suffered loss of influence and power, are still sufficiently strong to justify them in hoping for a considerable measure of success at the elections. Their chances, however, of securing a majority have been greatly diminished by the formation under a popular leader of the new Moderate Party, upon the success of which, accordingly, the future welfare of Egypt as a constitutional nation may be said largely to depend.

The Return of the Turk.

Under the above heading the *Manchester Guardian* of October 20 puts the points of view of those States more nearly concerned in the Turkish settlement. It says:—

> It is one of the defects of the proposed Near Eastern settlement that so far we have heard only of what three Great Powers, none of them in a territorial sense Near Eastern Powers, propose to do and to allow. Russia, the greatest of the Black Sea States, is not even, according to present arrangements, to be represented at the Conference. Roumania and Bulgaria have no outlet to the open waters except through the Black Sea and the Dardanelles, but no one would gather that their views about the freedom of the Straits are likely to receive attention; Bulgaria has not even, like Soviet Russia, a friendly Turkey to claim admission for her to the Conference. But the messages which we are printing show sufficiently the suspicion and the danger that are brewing in the Near East. Russia, which . . . would be willing to agree to a naval holiday in the Black Sea if warships were forbidden passage through the Straits either way, is fostering a navy movement with a view to meeting the supposed menace from the Western world. That will not please Roumania, which does not want the Black Sea to become a Russian lake. On land . . . Roumania is alarmed by the common frontier which we are setting up between Turkey and Bulgaria, foreseeing a combination between the two, and suggests the establishment of a neutral zone, which one would have thought a poor and ineffectual mitigation of whatever danger there may be. A Sofia correspondent, on the other hand, reports that Bulgaria, weak and disarmed, is alarmed by the hostility of Turkish references to her, and wonders what the outcome will be when Turkey has regained Eastern Thrace and is looking over the Maritza into Western Thrace, which Greece won from Bulgaria as part of her prize in the war. Bulgaria's immediate need, which is also her due, is to secure the effective access to the Ægean which was promised her by the Treaty of Neuilly. An opportunity has now arisen to concede what is her right, and it can scarcely be supposed that Greece will not accept it. The return of Turkey to the Bulgarian and Greek frontiers means the reopening of unrest and dangerous intrigue unless the Balkan States deprive her of the opportunity to the best of their ability by removing the chief causes of friction among themselves.

MUSICAL NOTES.

"The Immortal Hour."

"The Immortal Hour," the music drama by Rutland Boughton, which musicians of various sympathies have long recognised as a work possessing genius, has at last been adequately presented in London. It will be remembered that two years ago, during the Glastonbury week at the "Old Vic.," Mr. Boughton produced his work in a rather tentative manner, a manner in which the enthusiasm of the performers far exceeded their skill. Now, owing to the visit by the Birmingham Repertory Company to the Regent Theatre, most of that has been changed.

It is not a perfect performance by any means that we get at the Regent Theatre (though no doubt things are better when Mr. Appleby Matthews conducts: I happened to be present on a night when his understudy, Mr. Leighton Lucas, was in charge), but the beauty of the music drama, or, rather, of the music, can escape no one. Of Fiona Macleod's words I never thought much: they are too nebulous and imitative ever to have vitality or even significance. But what Mr. Boughton can do with inferior words is marvellous. His music flows with continuous loveliness, simple and original, daring, yet always certain. It is an extraordinary mind, his, that can be prompted by the inanities of Macleod's unmeaning gibberish about "dreams and visions"; a remarkable thing that his music can so far transcend the words. With fine sense and keener sight he has penetrated through the stumbling perceptions, the half-glimpses, of Macleod, and has set down unerringly what he makes of all this talk about Shadow Gods, Intangible Princes, and malevolent fairies, in masterful neglect of the poverty of his libretto.

Whether the work will now become popular I do not know; popularity is just as likely to come through its commonplaces as through its passages of genius. That it does contain commonplaces can scarcely be denied—some of its melodies are even now wearing thin, and can be preserved only by the most perfect performance; but equally certain, and easily outbalancing them, are the passages of genius, both for the voice and for the orchestra. It is perhaps in moments of remotest beauty, of visions dimly perceived but clearly recounted, that Boughton's individuality is most surely felt; in the liquid sound of water, for example, or the eerie sound of the wind in the trees, or the half-heard sounds of the fairies. There is also individual writing in some of the unaccompanied chorus stuff.

Of the performance itself little need be said. The two artists who themselves conceived and shaped their parts were Miss Gwen Ffrangçon-Davies, as Etain (a lost Princess, afterwards Eochaidh's Queen), and Mr. W. Johnstone-Douglas, as Eochaidh (High King of Ireland). Miss Ffrangçon-Davies has a charming, fairy-like voice, which enables her to give a most delicate interpretation; Mr. Johnstone-Douglas is a good musician—for, in spite of a cold, he sang certain phrases to perfection—but he is a poor actor. Of the rest, Mr. William Heseltine, as Midir (a Prince of the Hidden People), sang as if there were not a jot of musical feeling in him—his performance was a distinct blot on the whole; Mr. Arthur Cranmer, as Dalua (the Shadow God), had most ungrateful stuff to sing, and could not, with a rather inflexible voice, make much of his part; and Mr. Leighton Lucas was possibly not wholly to blame for the occasional (and in the last Act, serious) differences he had with the singers. One generally growls at the chorus in an opera, but this particular chorus really tried hard, and did not often become mechanical, or lose their pitch or balance, or assume to themselves a conceited importance.

One word must be said of the staging, which has been done by Mr. Paul Shelving with distinction. The first scene, with the dim light in the wood, is beautiful; the second, the interior of an Irish peasant's cabin, is, I think, marred by the extravagant costume of the owner, Manus, but otherwise is imaginative enough; and the last act contains a grouping (the second grouping) of the King's Court, which is of rare splendour. This music-drama, which is probably next to the "Beggar's Opera" the most artistic thing in London at the moment, should certainly be visited.

ANDANTE.

Numbers of British students are expected in Rome this winter. They will investigate the zoology of Central Italy, and then proceed to Libya and Egypt.

The Braemar Castle, which was temporarily diverted to Constantinople, is proceeding on her voyage to Iraq with Royal Air Force reinforcements on board.

The Greek Government has now decided to recognise the appointment of Mgr. Meletios, the Œcumenical Patriarch, and has given instructions accordingly to the Greek High Commissioner in Constantinople.

Near East Bookshelf.

PERSIAN HISTORY IN A NUTSHELL.

"PERSIA." By Brigadier-General Sir Percy Sykes, K.C.I.E., C.M.G. (Oxford: The Clarendon Press. 7s. 6d.)

The average summary is a jejune catalogue of facts and legends, unrelieved by the niceties of light and shade or the subtler tints of colouring. Sir Percy Sykes' latest work is an exception to the rule. He has compressed the contents of his monumental "History of Persia" into a manual of 179 pages, without sacrificing the sustained interest which his *magnum opus* evoked. "In war," said Napoleon, "men are nothing, a MAN is everything." The great captain's dictum applies with equal force to civil government. For foreign conquest presents few difficulties to an energetic despot who is free from the checks of public opinion and subject to no administrative control. But his successors in the purple are never able to weld their inheritance into a homogeneous whole. It suffers disruption, and an era of glory is succeeded by one of decadence. The world's history, from the days of Cyrus to those of the ex-Kaiser, proves conclusively that genius is not transmitted from sire to son; and that an Empire which ignores the right of subject peoples is of its very nature ephemeral. Sir Percy Sykes' peroration shows that Persia has not escaped the fate which awaits despotisms of the Asiatic type:—

She has turned her back on her old friend Great Britain, who, for the time being, at any rate, must leave her to seek her own salvation unaided. The Financial Adviser and his staff have left Teheran. The South Persia Rifles, which alone stood between security and anarchy in the Province of Fars, have been disbanded, and European women and children are leaving Shiraz. Elsewhere conditions are deteriorating, the Ministers at Teheran having very little control over the provinces.

The city of Paris has justified its proud motto, "*Fluctuat nec mergitur.*" Is poor, worn-out Iran capable of rising from her prostration? Her people retain the impress of an ancient civilisation, and their land exercises a charm which no foreign sojourner can resist. But these gifts are nullified by the weakness and corruption of the Central Government. Two facts are clear as noonday to all who have followed recent developments in Hither Asia. A strong and progressive Persia is essential to our interests; and—with due deference to Sir Percy Sykes' opinion—the task of regenerating her must devolve on ourselves. Unless we abandon the vacillation which marks our policy in the Middle East, America may undertake responsibilities which should long since have been shouldered by Great Britain. Failing intervention from that quarter, Persia will fall an easy prey to upstart neighbours, who are avowedly hostile to British predominance.

F. H. S.

HAPPY INDIA.

"HAPPY INDIA: As It Might Be if Guided by Modern Science." By Arnold Lupton. (London: George Allen and Unwin. 6s. net)

Mr. Lupton has been attracted by an old problem—the poverty of India—and his studies have led him to the conclusion that if the country were guided by men of science there would be abundance for everybody; the people would be prosperous, and, therefore, happy. Some critics might perhaps question this identification of happiness with material prosperity, but since so large a proportion of unhappiness is in India due directly to poverty, the practical man will not press that point too hard; a richer India would certainly be a less unhappy India, though it might not be altogether happy. There is an ambiguity, too, in the word "guided." Most of the book assumes that the Government can do everything, though in the last chapter the people are urged to help; and Mr. Lupton is apt to assume that, if the Government acted, there would be no appreciable interval between effort and result. To take as an example the point he urges most strongly, the waste of manure for fuel, he assumes that if wood or coal is provided in the villages, the manure will not be burnt. That is perhaps the most violent assumption which has ever been made on any economic question: surely the history of countries like England, where the same problem has been successfully tackled, should have warned Mr. Lupton that the change-over is likely to take generations, if not centuries. In the same way most of his financial propositions are vitiated by the neglect of economic friction. We may agree that India would become rich very rapidly if the people would consent to be guided by men of science, and so eliminate that friction, but so far they have shown no signs of such an attitude, and to impose scientific guidance from above would mean more broken heads than full pockets. We cannot, then, accept Mr. Lupton's book as a final solution of the great problem; but, nevertheless, we are glad it has been published, and we trust it will be widely read in India, for it puts some aspects of the problem in a very clear light, and should stimulate a study which is still too much neglected.

Major Maitland Kersey has left for India with Lord Inchcape.

Lord and Lady Barrymore will return to London next month from Marbury Hall.

Mrs. Arthur McGrath (Mrs. Rosita Forbes) has left England for six months. No letters can be forwarded.

Sir Herbert and Lady Cohen have left for Palestine on a visit to Mr. Storrs, the Governor of Jerusalem.

M. A. Rizo Rangabé, formerly Greek Chargé d'Affaires, and Mme. Rangabé have moved to 129, Cromwell Road, South Kensington.

Mr. Srinivasa Sastri is being entertained to luncheon to-day by the Royal Colonial Institute at the Hotel Victoria

Lord and Lady Lamington, who recently returned to London from Italy, have gone to Lamington, Lanark.

Fathollah Khan Noury Monazam-es-Saltaneh, First Secretary of the Persian Legation, has returned from Paris.

At Buckingham Palace, on October 20, the Right Hon. V. S. Srinivasa Sastri (Member of the Council of State of the Viceroy and Governor-General of India) had an audience of His Majesty.

Earl Winterton, the retiring Under-Secretary for India, who had arranged to sail from India for England on October 28, left by Saturday's homeward mail boat on account of the political crisis.

The marriage arranged between Mr. Leslie J. C. Wood, of Bombay, and Miss Vera M. Kells, of Gerrard's Cross, will take place in Bombay early in December.

Under the auspices of the Persia Society, Major Arthur Moore will lecture on October 31, at 5.15 p.m., on "The Outlook for Persia." The meeting will be held at 74, Grosvenor Street.

The marriage was arranged to take place yesterday (Wednesday), at St. Mary's Church, Hendon, between Miss Doris Spence and Mr. David Lorimer, jun.

The engagement is announced between Brevet Major A. W. Pulverman, 128th Pioneers, Indian Army, son of the late Martin Pulverman and Mrs. Pulverman, and Gladys, elder daughter of Mr. and Mrs. Charles A. Park, of Elmhurst, Eastbourne.

The engagement is announced, and the marriage will shortly take place, between Captain Herbert Selway, Indian Army, and Poppy, second daughter of the late Mr. and Mrs. Thomas Lonsdale Cummins, of Bishop Auckland, and of Hermitage, Berkshire.

A marriage has been arranged between Mr. Harry Boyd, C.B.E., Assistant Private Secretary to Mr. E. Shortt, late Home Secretary, and Lady Ada Fitzwilliam, sister of the Duke of Leeds, and widow of the Hon. William Wentworth Fitzwilliam, who died in 1917.

Mr. C. R. Ashbee has resigned his position as Civic Adviser to the City of Jerusalem under the Palestine Administration, and is spending the winter in the South of France with his family, preparatory to making a lecturing tour in the United States after Christmas.

The Emir Abdullah of Transjordania gave a luncheon on October 19, at which the guests included Major-General Sir Foster Newland, Colonel J. R. Bassett, Colonel Charles Vickery, Colonel C. E. Wilson, Mr. and Mrs. Arthur Moore, Dr. Harold Williams, Mr. H. St. John B. Philby, and Mr. H. T. Montague Bell.

The first lecture of the season under the auspices of the Egyptian Exploration Society will be delivered by Professor Percy E. Newberry to-day, the 26th inst., at 8.30 p.m., at the Royal Society, Burlington House. The subject will be "The Archaic Period (Dynasties I.-II.): the Earliest Chapter in Egyptian History."

The marriage arranged between Edward Lancelot Granville Beville, N. Stafford Regiment and W.A.F.F., elder son of Lieutenant-Colonel F. G. Beville, C.S.I., C.I.E., of Bicknoller, Somerset, and Florence (Heather) MacLagan Brown, daughter of the late Neil MacAlister Brown, of Edinburgh, will take place in London to-day.

It is stated from Simla that last week Mr. Ernest Burdon, officiating Army Secretary, was married to Miss Mary Fairweather, sister-in-law of Mr. Frederick Whyte, President of the Legislative Assembly. The bridesmaids were the Misses Anne and Joan Whyte and Miss Margaret Carey Evans, Mr. Lloyd George's granddaughter.

A marriage is arranged, and will shortly take place in India, between Claude Ernest Pert, Captain, 15th Lancers, I.A., third son of Mr. F. J. Pert, I.C.S., Commissioner, United Provinces, India, and Mrs. Pert, and Lilian Katharine, third daughter of the late Francis Gustavus Nicolls and Mrs. Nicolls, 11, Callow Street, Chelsea.

King Ferdinand of Roumania has decorated the Duke of York with the Grand Cross of the Order

THE PERSIA SOCIETY.

President: Lord Lamington, G.C.M.G., G.C.I.E.
Founded in 1911 to study all questions of common interest to Great Britain and Persia.

of Carol I. His Majesty also conferred on Sir Herbert Dering, British Minister in Bucharest, and Admiral Henry Campbell the Grand Cross of the Order of the Star of Roumania, and on Lieut-Col. Ronald Waterhouse the insignia of Grand Officer of the Order of the Crown of Roumania.

On October 21, at Buckingham Palace, the King received the Emir Abdullah of Trans-Jordania, who was accompanied by Ali Riza Pasha el Rikabi, Chief Adviser to the Trans-Jordanian Administration, Brigadier-General Sir Gilbert Clayton, representing the Colonial Office, and Mr. H. St. J. Philby, Chief British Representative in Trans-Jordania.

The Hon. Lady Lloyd, the Hon. Angela Manners, Sir Stephen and Lady Finney, and Sir Norman Macleod left on October 19 by the P. and O. special for Marseilles, where they joined the P. and O. steamer Morea for Bombay. Also travelling by this special train were Sir Howard and Lady Frank, bound for Port Said. Sir Thomas and Lady Strangman, Sir Jamsetjee and Lady Jejeebhoy, and Sir A. Chaudhauri, who are also proceeding to Bombay, joined the Morea at Marseilles.

APPOINTMENTS, Etc.

It is officially announced that Brigadier-General Sir Gilbert Clayton, late Adviser to the Ministry of Interior, Egypt, who has been discussing Trans-jordanian affairs with the Emir Abdullah in London, has accepted the post of Chief Secretary, Palestine Government, in succession to Sir Wyndham Deedes, D.S.O., who is retiring shortly. Sir Gilbert Clayton will assume his new functions next Easter.

M. George Melas, the newly-appointed Secretary to the Greek Legation, has arrived in London and entered upon his duties.

OBITUARY.

DEATH OF THE IDRISI.

The Jeddah correspondent of *Al Ahram* reports the death of Mohammed ibn Ali el-Idrisi, Emir of Asir, which took place on October 16. The Emir's family came originally from the Sudan, and in his young days he travelled considerably in North Africa and in Turkey. In the Turco-Arab fighting in 1910 he was worsted by the Emir Faisal (now King of Iraq), whose family then assisted the Turks. In the Italo-Turkish war he was in close relations with the Italians, and in the late war he took advantage of the general disturbance to assert his complete independence, and to resume the old feud between Asir and Sanaa. After the British evacuation of Hodeida he seized the place and reduced its merchants to a state of despair by his experiments in taxation. The *Ahram's* correspondent states, rather quaintly, that Great Britain had of late endeavoured to "persuade" the Emir to forego his subsidy, "but without success." He posed as the possessor of supernatural powers, and, it is said, impressed notable visitors by means of beams of light which proceeded from behind his glasses, produced by a small concealed electric battery. If further effect were desirable, the visitor was permitted to touch the great man's hand, when he received an electric shock, provided by the same means. Such tricks merely raise a smile in the West, but in unsophisticated Asir they had their value in the realm of politics, and the Emir was not the man to neglect any measure that would work to his own advantage.

The death has occurred of Sir William Stevenson Meyer, G.C.I.E., K.C.S.I., the first holder of the office of High Commissioner for India. Sir William first arrived in India in 1881, serving in Madras. In India he lived a laborious life for nearly forty years, and during that time he served as Secretary to the Madras Board of Revenue, Chief Secretary to the Government of Madras, and Finance Member of the Viceroy's Executive Council, an appointment given him in 1913, in succession to Sir Fleetwood Wilson. To that office he took a high reputation, as well as a great knowledge of financial affairs and general administration. In earlier years he had edited the "Imperial Gazetteer for India" (1902-5), and had also done much work as a member of the Royal Commission on Decentralisation in India, as a delegate at the Hague Opium Conference, and as a member of the Committee on Indian Army Administration. Sir William Meyer was President of the Central Recruiting Board of India from 1917 to 1918. He was created C.I.E. in 1901, K.C.I.E. in 1909, K.C.S.I. in 1915, and G.C.I.E. in 1918.

Where to stay in the East

CAIRO

THE
CONTINENTAL - SAVOY
THE MOST UP-TO-DATE AND BEST SITUATED HOTEL IN CAIRO.

THE SUPPLY OF INDIAN STATESMEN.

Among the questions raised from time to time by detached observers of the working of the new Indian constitution, that which goes nearest to the foundation of the whole structure is the doubt whether men of the requisite calibre will be forthcoming in sufficient numbers to bear the heavy burden now imposed on India by Parliament. The extent of the anxiety felt on this point is probably little realised by Indians, whose new-born national self-confidence assumes an ample supply of statesmen and administrators fully equipped from the outset for even greater tasks; but critics belonging to other nations do not always share this confidence, and India would be well advised to take their hesitation into serious account. For ourselves, we believe the Indian attitude to be so far justified that there is no lack of men possessed of the natural gifts required, but there are, unfortunately, some grounds for questioning the adequacy of the means provided for training and developing those gifts so that they may come to their full fruition, and the interests of the future call for concentration on this aspect of the matter. The world in general seems to be agreed that, while statesmen may on occasion be found in almost any walk of life, the normal source of supply should be the political field; set an adequate number of keen and expert politicians to contend for mastery, and the struggle will usually result in the emergence of competent leaders of the people as a whole. Accepting this doctrine, it is obvious that the quality of the leaders must depend very largely on the quality of the ranks from which they emerge, and a high level of statesmanship can be expected only when politicians in the mass are reasonably competent and possess the requisite mental and moral qualities in some measure developed. In India the struggle of the politicians is now joined, and already there are signs that the usual results will follow; a few men of apparent eminence are emerging from the rank and file; there is a tendency to crystallise round actual or potential leaders; and we are justified in hoping that the statesmen will in due course come forward. The question, then, is whether Indian politicians in the mass can be relied on for the possession of the requisite qualities, and that is merely another way of asking whether the University system is satisfactory, since it is from the Universities that the main supply of politicians must in any case be drawn. The present tendency in India is to lay such stress on the need for vocational training that there is some risk that this primary function of the Universities may for the moment be overlooked. It is true that India wants skilful lawyers and doctors, industrialists and engineers; but it is equally important that these men should have enjoyed the benefit of a liberal education, and should be competent to form an independent opinion of real value on the political questions of the day; and in our judgment it is of particular importance that this aspect of the University question should receive prominence at the present juncture.

This view is supported by the obvious fact that many of the weaknesses of the present generation of Indian politicians can be traced directly to defects in the Indian Universities of the past. Those defects are too well known to require description in detail. The original institutions were founded on a model which, promising though it seemed at the time, is now universally discredited; like some other exotics, they produced a rank and poisonous growth in the country where they were so successfully acclimatised; and they have struck root so deeply that their reform is now beset with great difficulties. In the last twenty years, however, so much definite progress has been made towards the much-needed change that the new model, known as the centralised unitary University, is now definitely accepted as the ideal, and is beginning slowly to be realised in practice. Not very long ago the whole extent of Northern India was dominated by three Universities, each of which, to quote the latest official description, pursued merely a phantom existence as an examining and consulting body: to-day there are six additional Universities in this region, approaching more or less nearly to the new type: the establishment of others is only a question of time and money; some of the old Universities are in process of reconstruction; and, while we must recognise that India is suffering for the mistakes of the past, our business is rather to look ahead, and to ask whether the institutions now coming into being can be relied on to produce such a progressive improvement in the mental and moral development of the educated classes as shall meet the progressive demands of the new constitution. There is no doubt that Universities of the new type are capable of supplying adequate numbers of educated men competent to function effectively as politicians, whether they actually enter one of the legislatures, or confine themselves to influencing the constituencies as journalists or practical workers; but, unfortunately, there are some grounds for anxiety lest realisation should fall short of capacity, and the output be less valuable in point of quality than is anticipated by the designers of the new model. Such a result would be disastrous for the whole of India.

In our view, the present cause for anxiety is almost entirely a matter of men. There is an obvious risk that, when the number of Universities is doubled or trebled at short notice, there may not be enough men on the spot qualified to staff the new institution, whether as teachers or administrators; and in the present case the danger is enhanced by the strong racial and local prejudices which find a resting-place in some of the existing academical bodies. The effect of this artificial limitation of supply is already becoming apparent. Young men of, at most, mediocre attainments step straight into high positions, and are concerned mainly to entrench themselves therein; the natural tendency to form mutual admiration societies and ignore outside influences is strongly reinforced. The immediate result may be seen in eccentric courses of study, almost divorced, in some cases, from recent scholarship; and the ultimate effects of such a false start can scarcely be measured in advance. The only adequate remedy is to widen the field of selection. We have no intention of pressing the claims of Englishmen in particular to a larger share in the movement. If the academical bodies dislike Englishmen, let them draw on America or Japan, or any country where the level

Digitized by Google

of scholarship is higher than in India; but let them at all costs avoid the fatal mistake of starting on too low a level, and, if funds are wanting, let them concentrate on a few well-staffed faculties at the outset, instead of dissipating their resources on a crowd of mediocrities. It is no pleasure to us to put forward such criticisms as these. The accepted ideal of University reform has our entire support, and it is for that very reason that we are disposed to be critical in regard to the steps taken towards its realisation. Universities on the new model have an opportunity such as seldom comes, for it rests mainly with them to determine whether India shall progress steadily towards the attainment of her national aims, and at the present juncture it is the duty of all good Indians to see that the opportunity is not thrown away. The older Universities of India have hitherto been but little inclined to welcome public criticism; let us hope that, in this matter, as in others, the newer bodies may choose a wiser course.

THE FREEDOM OF THE STRAITS.

On September 16 a sudden tocsin was sounded to the British Empire calling upon it to rally to the defence of "the freedom of the Straits." The British Government, so ran the message, "regard the effective and permanent freedom of the Straits as a vital necessity, for the sake of which they are prepared to make exertions," and a little further on in the same manifesto, "adequate force must be available to guard the freedom of the Straits and defend the deep-water line between Europe and Asia against a violent and hostile Turkish aggression." A week later Mr. Lloyd George, in the presence of three other Ministers, elaborated the subject in a statement to newspaper representatives. He said: "It is an essential condition of world peace that there should be an effective guarantee for the freedom of those seas in the future. . . . We regard the freedom of those seas as a vital British interest and a vital European interest." And later on, speaking of the appeal to Australia and New Zealand, he added: "They made great sacrifices of thousands of their most heroic sons in order to achieve that freedom of the Straits, and we felt that, when the freedom was challenged, they had a right to associate themselves with us in any action we took to maintain what it has cost them so much to achieve." The late Prime Minister was even more emphatic in his Manchester speech on October 14: "Vital to us, vital to humanity, we could not have those Straits barred without giving away the biggest and the most important prize which we won by our victory over Turkey in the Great War."

In the face of these declarations the British public was left to infer that the freedom of the Straits, their "effective and permanent" freedom, was something that Mustapha Kemal's victorious army had it in its power to deny, and was actually resolved to deny, to the world. There was no apparent connection, it is true, between the Kemalists' main purpose of ejecting the Greek Army from Turkish territory and the freedom of the Straits. Moreover, the principle of the freedom had been specifically recognised in the National Pact—the Kemalist Charter—in Article 4, which stated:—

> The security of Constantinople . . . and of the Sea of Marmora must be protected from every danger. Provided that this principle is maintained, whatever decision may be arrived at jointly by us and all other Governments concerned regarding the opening of the Bosphorus to the commerce and traffic of the world is valid.

Reference had also been made to the subject in the Treaty of March, 1921, between Angora and Moscow, Article V. of which was as follows:—

> In order to guarantee the freedom of the Straits and the free passage through them for trade relations of all peoples, both contracting parties agree to hand over the final drawing-up of an international statute governing the Black Sea and the Straits to a special conference of delegates from the littoral States, subject to the condition that the decisions of the conference shall not infringe the full sovereignty of Turkey nor the security of Turkey and of her capital, Constantinople.

In these circumstances, therefore, it was to be concluded that the freedom of the Straits in the declarations of the Kemalists and their Bolshevist Allies meant something different from what it did to the British Government, and clearly the difference must be important, if it was a matter for the sake of which the Empire might have to be involved in war.

Unfortunately, no attempt was made by the late Government to take the public into its confidence as to what it understood by the freedom of the Straits, in regard to which Mustapha Kemal's small and indifferently-equipped force assumed the proportions of such a formidable menace. The danger of his soldiery, in the flush of victory, being let loose in Constantinople or Thrace was obvious; but the freedom of the Straits, it has been repeatedly declared, was the first object of the Government in the action that it took. In a matter of this nature, involving possibly technical details, the public would be tempted to accept the Government's estimate without question. As, however, the subject was vital enough to have based upon it a challenge to war, it must needs prove a crucial point in the peace negotiations, and it may be as well to examine it in some detail with a view to arriving at a decision whether Mr. Lloyd George's insistence upon the principle of the freedom of the Straits was justified by its importance and by the nature of the menace with which it was supposed to be threatened.

The problem of the Straits, so long as it has existed, has been a European question and has been regulated by the Powers and not by Turkey. At the outbreak of the Great War the position was as follows: The waterway was subject to the sovereignty of the Sultan; navigation for the commercial flag was free, but was prohibited to the military flag, although Turkey was empowered to admit warships of friendly and allied Powers if necessary for the purpose of enforcing the stipulations of the Treaty of Paris, 1856. This rule of the Straits, it may be repeated, was made for and not by Turkey, and we shall not be far wrong in supposing that it was prompted by, as much as anything, Great Britain's desire to keep the Russian Black Sea fleet out of the Mediterranean. The questions that arose in regard to this rule turned mainly on the attempts of various States, in particular Russia, to

evade the veto upon warships. It would seem to be commonly supposed that Turkey frequently abused her authority in regard to the Straits. In "The Question of the Bosphorus and the Dardanelles," the authors, Messrs. Phillipson and Buxton, state that "mercantile shipping has frequently been interfered with"; but, as far as the present writer can discover, no instances—apart from war incidents—are given, or, if they are, they do not appear to have been numerous enough to be mentioned in the index. In 1912, during the Turco-Italian War, the Turks laid mines in the Dardanelles to prevent the approach of the Italian fleet. On the remonstrance of neutral States, however, the mines were removed, and the Dardanelles were opened again to neutral commerce. Special stress, again, is laid on the enormity of Turkey's action in regard to the 'Goeben' and 'Breslau' at the beginning of the Great War, and Mr. Lloyd George has emphasised "the importance of securing the Straits against the repetition of what happened in 1914." It is not clear, however, with Europe more or less equally divided into two groups of belligerents, how any specific region, whether land or waterway, is to be prevented from being coerced by one or other of the groups, if so minded, into playing a part, willing or unwilling, in the struggle. Turkey, no doubt, broke the convention of the Straits in taking no action against the German men-of-war; but it remains to be shown that any rules or arrangements would have been proof against the combined pull of Germany, geography, and Allied gaucherie.

The still-born Treaty of Sèvres stipulated that "the navigation of the Straits, including the Dardanelles, the Sea of Marmora, and the Bosphorus, shall in future be open, both in peace and war, to every vessel of commerce or of war, and to military and commercial aircraft, without distinction of flag. These waters shall not be subject to blockade, nor shall any belligerent right be exercised nor any act of hostility be committed within them, unless in pursuance of a decision of the Council of the League of Nations." For the purpose of guaranteeing the freedom of the Straits all works, fortifications, and batteries in the neutral zones were to be demolished, and the reconstruction of such works was forbidden. The whole waterway was to be under the control of an Inter-Allied Commission of the Straits.

If this new rule of the Straits constitutes "the biggest and the most important prize" which Great Britain won by her victory over Turkey in the Great War, it is worth while examining its probable effect in different circumstances.

(1) If Britain and Russia were Allies in a war against other Powers, the Straits would remain open, unless the enemy found means, with or despite Turkey, to close them. Belgium in the Great War was an analogous case.

(2) If Britain and Russia should be at war with one one another, the Russian fleet would have the right to enter the Mediterranean, and Russia would have an advantage in being nearer her naval base for preventing egress from the Bosphorus than Britain would be in regard to the Dardanelles. In this connection it is important to remember that the Treaty of Sèvres specifically included in the neutralised and unfortified zone the Island of Lemnos, which in the Great War had been indispensable to Great Britain in her operations against Turkey.

(3) If Turkey should be engaged in war, with Great Britain and Russia neutral, the freedom of the Straits for neutral shipping would be unaffected.

Under the first set of conditions mentioned above, the position evolved by the Sèvres rule of the Straits would be identical with that in existence in 1914. In the second instance, Great Britain would be at a grave disadvantage as compared with the position that her diplomacy had achieved and maintained up to the outbreak of the war. In the third set of conditions the Sèvres rule left things as they were in the Turko-Italian War of 1912.

In the absence, therefore, of any explicit explanation on the part of Mr. Lloyd George or of those responsible for the Manifesto of September 16, it would seem as if "the biggest and most important prize" carried with it, from the point of view of British interests, very modest advantages at best, and in certain circumstances very grave disadvantages. It is true that under the conditions prevailing at the time of the Treaty of Sèvres the disadvantages could be regarded as eliminated. With Russia no longer a naval Power, it would be of material advantage to Great Britain, on a declaration of war, to be able to send a fleet into the Black Sea. To-day probably there is less confidence regarding the non-revival of Russia than there was two or three years ago, quite apart from the fact that it is now recognised that Russia must be a party to any practical agreement determining the future rule of the Straits.

To those responsible for the Treaty of Sèvres the situation in regard to the Straits appeared, no doubt, quite simple. Russia had ceased to count, and Turkey, restricted to Asia, except for Constantinople and a small hinterland, could have neutral zones and any other terms imposed upon her as required. By September of this year, however, these comfortable conditions no longer prevailed. A moment's consideration would have shown that the Allies' conception of the freedom of the Straits, as embodied in the Sèvres Treaty, could only be carried into effect and maintained by the permanent employment of force. The Sèvres regulations presupposed a quiescent and acquiescent Turkey, or the enforcement of the authority of the League of Nations at the cost of a small effort. Both these conditions had ceased to exist before September 16. The possibility of the permanent use of force against a protesting Turkey for the regulation of the Straits was out of the question.

It was, therefore, obvious to the meanest intelligence that the so-called freedom of the Straits, however that phrase might be interpreted, could only be maintained *in agreement with Turkey*. Any Power, such as Great Britain, setting special store on the maintenance of that freedom would, it might be thought, have gone out of its way to obtain agreement with Turkey, if only for this one object. Mr. Lloyd George's Government, by a process of reasoning that has not yet been divulged, decided that the freedom of the Straits was only to be secured by war with Turkey; as to how it was thereafter to be maintained in the face of French and Italian unwillingness to use force, no attempt at an explanation was made.

Whether in the light of all possible eventualities the waterway between the Mediterranean and the Black Sea should be free to the military flag as well as to the commercial flag is a matter which the experts may be left to settle. Turkey is as interested as any other Power in the freedom of the waterway for the commercial flag; but she is also concerned in providing for the adequate defence of Constantinople. The more substantial and effective the safeguards for the capital, the more ready are the Turks likely to be to meet the Allies in regard to precautions for the freedom of the Straits. Only by means of good-will all round will it be possible to arrive at a satisfactory arrangement securing the aims in view. The solution, however, may not necessarily follow the lines of the Treaty of Sèvres or the proposals made by the Allied Foreign Ministers in Paris last March.

It will not escape notice that a working agreement between Great Britain and Turkey offers the most practical method of securing an open waterway and the protection of Constantinople.

NOTES AND NEWS.

1, Devonshire Square,
London, E.C.2.

The City and the Coalition.

There is no doubt as to the attitude of the City to the political developments. The feeling generally is one of heartfelt relief that the Lloyd George Coalition has gone. Essential as an instrument of war, it has proved more and more of a failure with each month that has passed since the Armistice. The business community supported it until it was seen beyond a peradventure that it was unequal to tackling the problems of reconstruction. The keynote of sound policy after the Great War was bound to be the establishment of normal conditions and economy, but the Coalition followed a policy which did little to promote the former, and economised only under compulsion, and then only in the most half-hearted manner. To still the popular clamour an "Axe" Committee was appointed, but its recommendations were watered down until they were almost as harmless as the very mild beverage that went into consumption as Government ale during the war. The real cause of the failure of the Coalition in this, as in other matters, was its constitution, which made it certain that compromise would be the guiding principle—a fatal condition in the circumstances.

Stability Required.

Now that the Coalition has gone, the City looks forward to the return of stability in administration—which it is felt can only be obtained now under a purely Conservative administration. That this will result from the election is taken for granted, it being felt that whatever else the Coalition has or has not done, it has made the average elector want, above all things, to know where he stands in regard to taxation and commitments abroad, and that should mean an overwhelming Conservative vote. Any fear of Labour has gone, of course, since the issue of the priceless announcement of policy, which can best be summed up as one of "take all." Two things the City looks for from the new Government, a policy which will promote settled conditions abroad and thus enable the development of trade and the strict pursuit of economy. Provided the Government realises its responsibilities in these directions, and as to this there is little or no room for doubt, when the time comes again to face the electors there need be no fear as to the response.

The P. and O. Meeting.

On another page will be found a report of the P. and O. Company's annual meeting, which has been held earlier than usual owing to Lord Inchcape having to leave for India to preside over the Indian Retrenchment Committee. For shipping companies generally the year has been anything but a good one, but the P. and O. has more than maintained the previous results, and stockholders have every reason for satisfaction in the circumstances. The unfavourable conditions that have been encountered were dealt with by Lord Inchcape, who pointed out that many of the voyages had shown an adverse result. Outward freight had been scarce, while homeward rates of freight had been to a great extent unremunerative, and in addition operating expenses had continued far in excess of the pre-war level.

The Outlook.

As to the future for shipping, Lord Inchcape said that although there were signs of a break in the clouds they had apparently a poor year or two ahead. He emphasised the point that operating costs must come down to secure an equilibrium, or disaster must follow. As regards the P. and O. and associated companies, he pointed out that provision had been made for bad years, and they could carry on, but in the meantime they had to try to get back to something more than making both ends meet. Lord Inchcape went on to state that five large new vessels for the Branch Service were now in commission, and that an early revival was hoped for in the Australian trade. An agreement had been made as regards the wages of dock workers, but Lord Inchcape fears that there must soon be further considerable reductions if the ships are to be kept running. His Lordship paid a tribute to the work done by Mr. F. C. Allen as chairman of the employers' committee in these negotiations.

The Position in Smyrna District.

Were there any tendency to under-estimate the economic damage sustained in Smyrna district during the late war it would be corrected by a perusal of the comprehensive report of Messrs. C. J. Giraud and Co. on present conditions in that region, which is given on page 547. The report deals in the main with the effect on produce, but the brief details that are given of the general damage that has been done will enable people to obtain a vivid picture of the extent of the desolation. "The economic consequences of all this destruction of property and loss of population are incalculable," says the report, "and will for years tell on the progress and prosperity of the whole country. . . . The principal towns in the interior—Afion Karahissar, Oushak, Alascheir, Cassaba, Salihli, Magnesia, Aidin, Nazli—and all the surrounding villages were razed to the ground. . . . Losses run into millions." Happily, the position is not without hope. The agricultural and other resources of the region are very great, and if the authorities apply themselves as they should to the restoration of confidence and the reconstruction of the country there is no reason why there should not be a rapid recovery, though, as Messrs. Giraud point out, this cannot take place without foreign assistance and foreign capital.

EGYPT.

Cairo, October 12.

Improved Financial Position.

At its last sitting the Council of Ministers passed the final account for the financial year 1921-22. The result of the year's working reveals a marked change in the situation as compared with that anticipated when the Budget was prepared, as the following figures show (the estimates being given in parentheses) :—

Revenue	£E41,803,166	(£E36,701,000)
Expenditure	37,747,112	(38,682,000)
Balance	4,056,054	(1,981,000)

Thus the actual revenue has exceeded the forecast by £E5,102,166, and the actual expenditure has been kept £E934,888 below the estimates, with the result that a surplus of £E4,056,054 has been secured instead of an anticipated deficit of £E1,981,000. This surplus has been transferred to the general reserve, which on April 1, 1921, stood at £E1,513,605, and a year later had been raised to £E5,569,659.

Increased Revenue.

The main heads under which revenue improved during 1921-22 were: Customs, £E2,064,471, due as to £E1,095,609 to the increase in imports, as to £E229,716 to the increase in quay dues, as to £E172,473 to the new alcohol excise duty, and as to £E592,828 to the raising of the tobacco tariff; judicial fees, £E174,140, mainly from the Native Courts (although the registration fees in the Mixed Courts were raised the increased receipts have not been so great as was anticipated owing to the economic crisis); railways, £E902,734; telephones, £E65,264; State domains, £E170,588; military exemption fees, £E56,840; extraordinary receipts, £E1,057,752, due as to £E960,603 from the Cotton Control Commission, representing the British share of the profit on the cotton control in 1918, and as to £E221,766 to the profit made on the State purchase of cotton during the year, minus £E141,231 less receipts from sale of land owing to the economic crisis; appreciation in value of reserve securities, £E587,783 (£E816,973 had been written off in 1920 for depreciation).

On the other hand, a decrease of £E558,000 took place in the proceeds of investments. This was due as to £E168,000 to interest paid to the National Bank of Egypt on overdrafts, £E222,000 to certain share conversions, and £E168,000 to reduction on profit on bank-note issue owing to contraction.

Decreased Expenditure.

No less than £E500,455 extra credits were granted during the year for special and unforeseen works, but notwithstanding, thanks to the rigid economy effected by departments, the total expenditure was, as mentioned, less than the original figure budgetted by no less than £E934,888. The main increases were: War Office, £E66,810; cost of living indemnities, £E702,457, due to extension of payments to end of year; £E100,000 to start the Egyptian Labour and Camel Transport Corps Pension Fund, for which the British Government grant of £E960,603 was intended, and £E48,000 to cover the cost for the official Egyptian Delegation to London in 1921. In the circumstance the maintenance of the total expenditure so much within the limits of the original estimate reflects the greatest credit on the Minister of Finance and on the heads of the spending departments concerned.

GREECE.

Athens, October 14.

Miscellaneous.

According to statistics published by the International Economic Commission for the period January 1 to July 31, the total receipts encashed during the first seven months of 1922 amounted to 227,358,408 drachmæ, as against 123,971,668 drachmæ encashed during the corresponding period of the year 1921, there being thus an increase of 103,386,740 drachmæ.

The receipts of the Salonika and Kavalla Customs during the first seven months of 1922 amounted to 46,122,614 drachmæ, showing an increase of 28,419,575 drachmæ over the corresponding period of last year.

The Consortium of Banks has been abolished. The drachma is, however, remaining fairly steady. Last night's quotation was 185 drachmæ for sterling.

The Ministry of Finance has received 350,000 ten lepta notes, of which 200,000 have already been put into circulation in Athens and the Piræus. The remainder will be forwarded to the provinces.

MESOPOTAMIA.

Baghdad, October 13.

Large Grain Exports.

Grain, principally barley, continues to be exported in considerable quantities, but it seems probable that the export business has almost come to an end, as prices are hardening and supplies are beginning to grow scarce.

CYPRUS.

Cyprus, October 10.

Sale of Government Tithe Grain.

The Government has disposed of considerable quantities of cereals, as paid in kind for tithe, in different districts. From the stores at Nicosia 66,000 bushels of wheat have been sold at 58 piastres (6s. 5d.) the bushel. Of barley, 72,000 bushels have been sold at 22½ piastres (2s. 6d.); vetches at 73 piastres (8s. 1d.); oats at 20 piastres (2s. 3d.). At Famagusta, Larnaca, and other places considerable quantities of wheat have been bought at prices ranging from 40 piastres (4s. 6d.) and upwards. The market prices at Nicosia are as follows: Wheat of the new harvest, 6s. 6d. and 7s. the bushel, barley 3s. 1d. to 3s. 4d., potatoes 2½ piastres the oke (about 1d. a lb.), onions ¾ piastre the oke, sugar 3d. to 4d. a lb., coffee about 9d. lb., olive oil 1s. 1d. the litre, rice 1¼ lb. Prices differ considerably in different parts of the island, being in many places higher than in Nicosia.

The Economic Outlook.

The prospect for agriculturists is still gloomy. The moneylenders, who are no less rapacious a tribe than in other parts of the Levant, are taking full advantage of the situation, and if the Greek papers are to be credited, many properties of villagers are being sold up for half, a third, and in some cases a tenth of what should be their value in normal times, owing to the prevailing want of money, as there are but few persons who can bid against the usurers themselves. The establishment of an agricultural bank, under Government auspices, which would advance money to needy and honest agriculturists at 4 to 6 per cent. according to circumstances, is advocated as a burning necessity. It is urged that the required capital can be largely drawn from the fund derived from surplus revenues. Very little, however, is said of the difficulties that stand in the way.

NEW NEAR EAST BANK.

The Commercial Bank of the Near East, Ltd., has been registered with a nominal capital of £200,000 in £5 shares. The objects are: To carry on the business of bankers in all its branches. The first directors are:—G. Empedocles, 34, Academy Street, Athens, D. S. Petrocochino, 32, Scoufa Street, Athens, C. S. Merlin, 19, Spetzon Street, Athens. The registered office is at 1, Broad Street Place, E.C.

The ordinary general meeting of the Regie Cie. Intéressée des Tabacs de l'Empire Ottoman will be held at the offices of the company at Constantinople on November 8.

The Royal Exchange Assurance announce an interim dividend of 7 per cent., less tax, on capital stock on account of year to December 31 next, payable November 6.

COTTON TRADE REVIEW.

Increased Inquiry for Cloth.

The Manchester Cotton Trade Review of the Imperial Ottoman Bank for the week ended October 21 states:—

General.—Business during the past week cannot be said to have given much real satisfaction in any direction, but there is nevertheless a feeling that it might have been worse having regard to political and other disturbances, both at home and abroad. In sympathy with raw cotton there has been a certain hardening of quotations all round, and although the gap between the ideas of buyers and sellers on the question of price remains a bar to most transactions, nevertheless more actual business has been done than in the preceding week. It is questionable whether increased values will be altogether in Lancashire's interests in the long run, particularly as the charges for the various finishing processes, and for packing, are still above those of our competitors abroad and thus place us at a disadvantage.

Yarn.—Spinners have met with great difficulty in inducing buyers to follow the rise in the raw material, and, so long as there are needy sellers, who must turn stock into cash, this difficulty will remain. According to all accounts, the tone has nevertheless been firmer, and taking a general average prices are between ½d. and 1d. per lb. higher than those ruling a week ago.

Cloth.—Increased inquiry is reported for cloth in general, but on this occasion the Home trade, South America, and some of the smaller markets abroad have supplied the bulk of the business. Neither India nor China, normally the two most important outlets, have responded to the increase in prices, and orders from both these countries have been few in number and inadequate in price. Egypt has placed more business than for some time past, and, in spite of the strained political situation, improved trade reports are being received from Turkey and the Levant.

Raw Cotton.—The Liverpool cotton market has been busier than for some time past, and the higher level of prices has been fully maintained. Reports from America continue to predict higher prices, amongst other reasons for which is the fact that their textile trade is brisk and their own consumption of the raw staple correspondingly increasing. This view is gaining ground in Lancashire, and spinners are beginning to buy ahead. Egyptian quotations have also hardened slightly. Closing prices are as follows:—American fully middling, 13.65; Egyptian fully good fair, 17.50.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.)

Egypt.

Clothing, etc.—The Lunacy Division, Abbâsiya, invites tenders for the supply of clothing, bedding, furniture, hardware, slippers, brushes, and other household necessaries required for Abbâsiya and Khanka Asylums for one year from April 1, 1923. November 21.

Saddlery.—The Egyptian Ministry of War invites tenders for the supply of saddlery. Particulars can be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W.1. November 1.

Hides.—The Egyptian Ministry of War invites tenders for the supply of hides. Particulars can be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W.1. November 6.

Rations.—The headquarters of the Ministry of Education, Sharia El Turka el Gharbi, El Insha, Cairo, invites tenders for the supply of rations required for certain Government schools, for a period beginning from January 1, 1923, and ending December 31, 1923: November 21.

Tugs.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of two tugs. General Government conditions and specifications are obtainable from the Inspecting Engineer Egypt and the Sudan Governments' Office, London: January 2.

Roumania.

Spare Parts for Grease Boxes and Couplings.—The Roumanian Railroad Administration invites tenders for the supply of spare parts for grease boxes and couplings. Tenders should be addressed "La Direction Générale des Chemins de fer Roumains," Service P. (Calea Victoriei No. 124), Bucharest. November 3.

The Earl of Selborne, a director of Lloyds Bank, has been appointed to a seat on the board of the P. and O. Banking Corporation, in the place of the late Sir Richard Vassar Vassar Smith.

CONDITIONS IN SMYRNA DISTRICT.

The Damage to Crops.

We are indebted to Messrs. C. J. Giraud and Co., Smyrna, for the following report, dated October 10, on the present position in the Smyrna district :—

The Turkish Nationalist forces entered Smyrna on September 9. Four days later the greater portion of the commercial and residential quarters—mainly European property—was destroyed by fire. Simultaneously with the rout of the Greek armies, which, in their retreat, had laid waste everything in their way and burnt almost every town and village in the Hermes and Meander valleys, the Christian population evacuated the country. The economic consequences of all this destruction of property and loss of population are incalculable, and will for years tell on the progress and prosperity of the whole country. But these are matters outside the scope of the present report, which will be dealt with on another occasion. The season had just entered upon its first stage of normal activity when it received a complete setback by military developments. On September 6 the danger threatening Smyrna could no longer be concealed. All business was suspended the following day. Labour was unobtainable at any price. The panic increased hourly as news came filtering in of the rapid advance of the Nationalist forces. By September 9 chaos prevailed.

After the Nationalist forces had occupied the town, every effort was made to revive commercial activity, and by proclamation shops were ordered to open and bankers and merchants were enjoined to resume work. The panic had lessened on September 13, and the situation appeared more hopeful. But the disastrous fire which started that same day has brought ruin everywhere, and has entirely dislocated the commercial existence of the town and the whole province.

Sultanas.—The yield of sultanas this season was estimated at about 37,000/38,000 tons. Shipments to September 5 amounted to about 7,000/7,500 tons to all ports. From reports coming in it is doubtful whether 10,000/12,000 tons more remain available for export. Some estimates are as low as 8,000/9,000 tons. A large proportion of the yield, more especially in the higher districts, was still on the drying sheds. Large stocks existed in Magnesia, Cassaba, Salihli, and other towns. All this fruit has perished. Supplies coming forward are exceedingly limited. There are barely 300 tons stock on Smyrna dealers' hands. Business is paralysed, and the shipments making by the s.s. Worsley Hall represent fruit packed for the most part before the fire, and which shippers, with considerable difficulty, have managed to clear out of their stores and lighters.

The Turkish authorities have confiscated all stocks belonging to Greeks and Armenians, and these will be eventually offered for sale, but it will require some time to concentrate this fruit and transport it to market. Meanwhile these stocks are not available for export. This is the position at present. Until peace is signed and civil government is introduced, conditions will remain very unsettled and business on an organised basis will be out of question.

Figs.—It is calculated that about 80,000 bags, or, say, some 8,000 tons, remain in the Meander valley. With the dislocation of railway communications supplies are trifling, and will continue so for some time. Layer packing has ceased. Business henceforward will be limited to shipments of naturals in bags.

Tobacco.—Sixty to 70 per cent. of the country's stocks have been destroyed. According to statements made by the leading American companies who have agencies in Smyrna, and who buy direct from farmers all over the country, 71 per cent. of their purchases were effected from Greek farmers and 29 per cent. from Turkish farmers. But even in the latter case, Turkish farmers largely employed Greek labour for the cultivation of their tobacco fields. In the sorting, grading, and packing of leaf Greek labour was almost entirely employed. The outlook for tobacco over the next few years, on this showing, would appear most discouraging. From 10,000,000/12,000,000 kilos annually produced before 1914 the annual production in recent years in our province had varied between 6,000,000/8,000,000 kilos, the estimated yield this season being about 6,000,000 kilos. There will be a very heavy falling-off in production in the future.

Valonea.—The yield of valonea prior to 1914 averaged about 55,000/60,000 tons per annum. During the war there was little inducement to gather the cup and acorn. The annual yield since 1919 had steadily increased, and it was anticipated that about 30,000 tons would have been gathered this autumn. With the change in the situation very little of this quantity will come in.

Cereal Produce.—With the devastation all over the country, loss of agricultural implements, live stock and population, it will be years before the country can produce a sufficient surplus of wheat, barley, beans, and other cereal produce to permit of exports on a large scale. For the next year or two it will be indeed fortunate if there is enough for local wants.

Olive Oil.—Prospects were exceedingly favourable to the yield of olives, and in the districts of Aivaly, Adramyt, Aidin, and Meless forecasts were based on a probable yield of 40,000/45,000 tons for the coming winter. Under existing conditions and with the destruction of mills, stores, etc., in most of the above districts, it can be assumed that but a fraction of the yield will be taken in and milled into oil.

General Outlook.—Smyrna, the centre of the trade of the whole country, up to Afion Karahissar, has been destroyed. The country itself has been devastated, and some 200,000/250,000 of the Christian population has been expelled from our province alone. The principal towns in the interior—Afion Karahissar, Oushak, Alascheir, Cassaba, Salihli, Magnesia, Aidin, Nazli—and all the surrounding villages were razed to the ground by the retreating Greek forces. Losses run into millions. A reduced and houseless population, insecurity and chaos everywhere, no organised system of civil government, a state of war still prevailing and keeping all able-bodied men under arms, the continued drain on the country's resources—all these are factors which cannot but delay the recovery of the country. Asia Minor is rich in both agricultural and mineral resources—all in a most primitive stage of development. With security, law and order, a progressive Government, and the establishment of confidence, its recovery will be speedy, but after the terrible strain the country and its population have undergone since 1908, its impoverishment and loss of hands, its depreciated credit, and destruction of material resources, its rulers will have to realise that no early recovery can be hoped for without the co-operation of foreign assistance and the introduction of foreign capital. The Turks can be proud of their military achievements, but now that their aims have been achieved and their national unity assured, they will have to face the more serious task of the reorganisation and reconstruction of their devastated territories.

Stock and Share Markets.

BUSINESS RESTRICTED BY POLITICS.

Oil Shares Weak.

(*From Our Own Correspondent.*)

London, Tuesday Morning.

Home politics have been the ruling factor in a week of considerable vicissitudes. Early in the week possible developments were not fully realised, and, as a matter of fact, the tone of the markets was fairly buoyant. Then came the historic Carlton Club meeting, and stocks began to move downwards. But this was only a passing phase, and confidence soon returned and the week-end found quite a cheerful tone in evidence, as well it might be, for the Coalition had outlived its day, and it had long been obvious that the hope of trade—and, it may be added, of the taxpayer—lay in a change of Government.

Political crises, however promising, are, unfortunately, very unsettling, and the markets are bound to be in a very uncertain condition until the election has come and gone and we know once more exactly where we are. I might point out that the reason why the Stock Exchange is taking developments so calmly is because it is certain that the outcome will be a Conservative Administration. That way, it is realised, safety lies in present conditions. If there were any prospect of any other outcome stocks would make a very different showing to what they do, and I commend this consideration to the faint-hearted who visualise all kinds of painful possibilities in the situation.

Once the election is over and a Conservative Government is in being I shall be very surprised if the markets do not make an immediate response, for if anything should be a bull point that should be. The knowledge that there will be a real and persistent economy at home, and that abroad every effort will be made to develop more satisfactory conditions, and thus smooth the path for trade endeavour, should be worth points all round the markets.

I dealt at some length with the Rubber position last week. The first few days of the current week saw the general rise of prices continued, but subsequently the process was reversed, and at the time of writing the market is again rather dull. The reason for the decline is simply and solely that a number of holders thought the time had come to realise, and the rise, be it noted, had gone quite far enough to yield fair profits to those who were fortunate enough to get in at low levels. It is merely a setback, and before long I anticipate that the market, helped by the gradual advance of the quotation for the raw commodity, will be on the up grade again. It must be anticipated, however, that there will be frequent pauses as holders think it desirable to realise.

Gilt-Edged Variable.

Taking the week as a whole, a very uncertain tone has ruled in Gilt-edged descriptions. At the commencement firmness prevailed, but subsequently the political crisis brought about a relapse, and while later developments led to an improvement the markets were again inclined to dullness yesterday.

Consols at 57⅜ are ¼ lower, the Conversion loan at 74 3-16 is ⅛ down, Fundings at 85⅜ are unchanged, but War Loan Fives at 101¼ again show a considerable improvement, being ⅜ up on the week. Indian stocks have tended to weaken. The 7 per cent. stock at 113½ is ½ up, the 3½ per cent. stock is ¼ down at 66, while the 3 per cent. stock at 56¼ is ⅛ lower.

The Foreign group has been affected to a considerable degree by the fluctuations in the exchanges, and in a number of cases stocks are down on the week. French stocks have been exceptionally weak. War Loan Fives at 33½ are 2 down, while the 4 per cent. at 26¼ are also a good deal lower. German 3 per cents. have, of course, weakened, and at 15-16 have shed ⅛. Italian Rentes are unchanged at 22. In Near Eastern securities Turkish Unified have been a dull spot, closing 2 down at 30. Greek Monopolies, however, have remained firm, and at 31½ are unchanged. Russians have hardened slightly. The 5 per cents. are a point up at 12, the 4½ per cents. are also a point up at 8½, while the 4 per cents. are ½ up at 8. Czecho-Slovak 8 per cents. have hardened, and at 94 are 1¾ up on the week. In South American securities weakness has developed in Brazilians. In Far Eastern securities there has been nothing doing of any interest.

Industrials Steady.

It is a noteworthy fact that the Industrial group has been affected far less by the political situation than any other group. Practically the only effect it has had has been further to restrict business. The reason why this should be so is that the business community sees in a change of Government a prospect of much better things.

Tobaccos have been variable, Bats being 6d. down at 86s. 6d., but Imperial Tobaccos at 69s. 9d. are 3d. up. Textiles have been weak. Coats at 64s. 9d. are 1s. lower, Courtaulds are 3d. down at 54s. 6d., while Listers are 9d. lower at 27s. 6d. There has not been much change in Iron and Steel securities. Vickers remain at 11s. 6d., Armstrongs are 6d. up at 16s. 6d., while Guest Keens are unchanged at 35s. In Indian railways, Bengal Nagpur are 2½ up at 96½, Bombay Baroda are 94, Delhi Umballa are ¾ down at 180½, Madras and Southern Mahratta at 104½ are 1¾ up, while Southern Punjab are 148.

In Shipping securities P. and O. deferred at 307 are 8 down. Cunards have gained 9d. at 20s. 3d., Khedivial Mails are unchanged at 3¼, while Furness Withys are 31s. 6d. x.d.

Oils Depressed.

It has been a thoroughly bad week in the Oil market, and as the result of foreign liquidation most of the leading descriptions have moved downwards.

Anglo-Persian at 5 9-16 are ⅜ lower, while Burmahs at 5 7-32 are 9-32 down. Mexican Eagles are slightly lower at 2⅞, a decline of 3-16, while Shell Transport at 4¼ are 7-32 lower. Trinidad issues have been rather variable. Apex at 2⅛ are ⅛ up, Centrals at 1⅝ are ⅛ lower, while Leaseholds are 1¼ at which they are 5-32 up.

Russian stocks are about the same. Spies at 6s. are 3d. down, Anglo-Maikop are unchanged at 3s., North Caucasians remain at 13-16, Ural Caspians are 23-32, at which they are 1-16 up, while Uroz are 3d. down at 8s. 6d.

Among Egyptians, Anglo-Egyptian B are 1 7-16, at which they are 1-32 down, while Oilfields of Egypt are unchanged at 1s. In the Roumanian group, Phœnix are 3d. down at 26s. 6d., Roumanian Consolidated are unchanged at 12s. 6d., Steaua Romanas remain at 10s. 6d., Dacia Romanos are unchanged at ¾, while Hamilton's Oil Concessions are 2s.

The Duke of Devonshire has been appointed to the chairmanship of the Executive Council of the British Empire Exhibition.

The next Zagreb samples fair will be held in March, 1923, and it is reported that the number of applicants for space is already large.

The P. and O. Banking Corporation announce, with reference to Port of Calcutta 6 per Cent. Debentures, that fully-paid scrip certificates may, during banking hours, be exchanged for debentures to bearer at the corporation's head office, 122, Leadenhall Street, E.C.3.

The *Berliner Tageblatt* announces that arrangements have now been concluded between the German and Yugoslavian Governments, according to which 3,000 railway waggons are to be delivered by Germany to Yugoslavia, representing the whole sum due to the latter country as reparations.

Engineering Topics.

(By Our Engineering Representative.)

Electrical Development.

In view of the steady improvement now taking place in the electrical trade in certain directions, it is interesting to recall the remarks of Mr. S. T. Allen, at the last Municipal Electrical Association meeting. He pointed out that in almost every case increased output means lower production costs, and also in itself means more electrical plant and apparatus being sold, and thus, as a result, cheaper appliances and accessories. Cheaper supplies in themselves lead to yet greater demands, and to, consequently, more installations being wired and equipped. Thus the effects of an increased output are very far-reaching, and tend to increase our prosperity and to improve every industrial condition. All this is very true, and shows how, once started with a sound financial basis, increased production leads to a further increase and to enhanced prosperity. We have seen the evil effects of the vicious circle of price increase without production increase, and it is to be hoped that the new circle of prosperity now commencing will continue until all the evils of under-production and ill-balanced and ill-conceived over-production have been rectified.

A New Type of "Dis-Board."

An interesting innovation in the way of distribution board design has been made by a well-known British electrical engineering company, in connection with an Eastern order. The boards form distribution points in a ring main system, the cables of which are 0.15 in. three-core paper insulated, lead covered and armoured. Each cable is brought to a gland, and then through a sealing chamber from which each core is taken to a terminal coupled to a bus-bar by means of a copper link which is readily removable. This link is made with a slot at the lower end, and as it is fixed with wing nuts, no difficulty is found in moving it aside so as to disconnect and isolate any core. The bus-bars are taken from the link chamber, by means of a tube, to the fuse chamber, and are sheathed in mica before passing through the tubes. The whole of the insulation is of mica and china, and terminals, links, and bus-bars are carried on mica-insulated steel rods, bolted in place. The fuses are supported on rectangular steel rods which fit into grooves in the china bases, and the boards withstood an insulation test of a 3,000 volts alternating current for thirty minutes, with a flash test of 7,000 volts alternating current. Every part of the board is readily accessible.

The New Rolls-Royce.

I noticed at the Paris Salon that three of the latest Rolls Royce 40/50 h.p. six-cylinder chassis were exhibited with representative French and English coachwork, and I take it that some, if not all of these, will be exhibited at Olympia. The models shown all had the extra long wheel base, which can now be supplied at a small additional cost. One had a special Barker body, similar to that recently supplied to H.R.H. the Prince of Wales, and in this a partition window is fitted behind the front seats, which can be raised or lowered when required, so that the car can be used either as an owner—or chauffeur—driven car. This body seats two on the main seat, two on the front seat, and has two extra seats which fold up flush with the upholstery. It is luxuriously upholstered with fawn suede calf-skin, the main seat being built very low and provided with two soft down cushions covered with similar leather, and a folding arm-rest. All the windows are fitted with mechanical window-lifts and the interior woodwork, including the instrument-board and the cupboard and shelves between the flap-up seats, is of polished walnut. A special toolbox is provided under the step, with separate accommodation for each tool, and headlights of the latest dipping type are fitted.

Price Reduction.

I am informed that as a result of further economies in manufacture recently carried out at the Milan works that Messrs. Bianchi Motors, Ltd., have been enabled to reduce the price of their 12-20 h.p. model to £450. The Bianchi is a well-made and well-known Italian car, which enjoys a deservedly high reputation.

Ruston-Hornsby Cars.

The prices of the 1923 Ruston-Hornsby models will be as follows:—16-20 h.p., five and two-seater models, £475; all-weather, £715; and landaulette, £775. In the 20-25 h.p. model the five and the two-three seater will be £525, the all-weather £760, and the landaulette £865. The 1923 Ruston-Hornsby is a very fine proposition, well made, well finished, well upholstered, and beautifully sprung.

ALGERIAN MARKET FOR ELECTRICAL GOODS.

The market in Algeria for electrical goods is largely controlled by French manufacturers, some of whom maintain local branches supplied with stocks, and include in their organisation travelling salesmen as well as agents in the interior of the colony, says the Chamber of Commerce *Journal*. Business is also transacted through agents working on a commission basis, usually with an allowance for advertising. English firms, however, have a small share of the electrical goods business, working usually through a commission agent whom they supply with a small stock of goods on consignment to enable him to fill orders readily. The principal factor in the Algerian market is price, which should be the minimum consistent with good quality. There is, however, at present one factor militating against the development of the electrical goods trade, and that is the retail price of electric lighting, which is proportionate to the high cost of coal. Only an insignificant amount of current is used in manufacturing, and of the European residents in Algeria only 10,000, of a total of 150,000, use electricity in their houses.

At a recent meeting of the Grand Council of the Federation of British Industries, Sir Eric Geddes was unanimously nominated for the post of President of the Federation during the coming year.

Cotton and Cotton Goods.

THE EGYPTIAN MARKET.

The Commercial Company of Egypt, in their report for the week ended September 29, state:—

Since our last report the futures market has been poor in tone, this being especially the case for Sakellaridis futures.

The tone has been heavy, as the hedges put out against the arrivals from up-country were in excess of the buying orders against sales to spinners or for speculative account. The demand from abroad has been but moderate, almost half of it being for Upper Egyptian cotton, the price of which still compares favourably with the price of competitive growths. There is not much change to report on the political situation in the Near East; everything is very uncertain, to the great detriment of trade and finance.

Spot.—We have had a more active Minet-el-Bassal this week, and sales amount to about 24,400 bales, of which we estimate 14,000 bales Sakellaridis, 10,200 bales Uppers, 100 bales brown, and 100 bales white. Receipts are heavy and continue to increase, as is natural, and cotton is moving freely in the interior. Demand has improved, and holders are meeting the demand quite well. The feature of the week has been the large and eager demand for Upper Egypt, especially the medium grades.

Sakellaridis.—All styles have been dealt in, with the medium and lower qualities in most request. The basis is generally a little dearer, especially for good fair and fully good fair, which have hardened appreciably.

Uppers.—A very good business has been done in all styles, with good fair and fully good fair in large demand. The basis is firm and generally a little dearer, except for good, which is a little easier. The grades good fair and below are practically non-existent, as there are no new crop arrivals yet of these qualities, and consequently they are very dear.

Brown.—A small business has been done at last week's basis.

White.—A small business has been done without change in basis. This cotton is very scarce.

Crop 1922.—The climatic conditions during September have been, in general, favourable to the crop, and in many districts the top bolls have matured satisfactorily and will produce a larger yield than was anticipated. In view of the above we are now of the opinion that this year's final production will amount to about 4,750,000 kantars—i.e., it will be about a quarter of a million kantars more than the preliminary estimate we gave some time ago. Taking the Government estimate of the outturn per feddan 3.02 kantars and its estimate of 1,465,146 feddans planted, the result should be a crop of 4,424,750 kantars, but we consider this to be too low.

MANCHESTER MARKET.

Levant Trade Improving.

(From Our Own Correspondent.)

Manchester, Saturday.

The tone of the market during the past week has continued firmer, and although there has been a lot of grumbling amongst traders, the hardening tendency in raw cotton values has brought out an increased inquiry in yarn and cloth. The general conditions in the market at the moment, however, can only be described as unsatisfactory. Operations have been patchy and some deplorable rates have been accepted by sellers. Buyers have had matters practically all their own way. Traders hope that no crisis will result from the present political situation. Rather a feature of the week has been the increased piece goods inquiry which has been met with for Egypt, and certain shippers have reported a broadening demand with every sign of much more business being done in the near future. Improved trade advices have come through from Turkey and the Levant, and deliveries against old contracts are now being taken on a freer scale. With regard to Egyptian spinnings rather more interest has been taken in prices, and although buying has been irregular the general demand is more promising. There has been a fair cloth inquiry for India, and some encouraging transactions have been recorded in staple makes, chiefly for Calcutta. Low printers have received a fair amount of attention. Fancies and finishing descriptions have been in request for the United States and South America respectively. American yarn quotations on the week are roughly ½d. a lb. dearer, but great difficulty has been experienced by spinners in obtaining the advance. The turnover has shown some improvement. It is believed that the short-time movement is having some effect upon the situation.

LIVERPOOL REPORT.

Position Improving.

Messrs. Reynolds and Gibson report as follows for the week ended October 18:—

It is pleasant to be able to record that a distinct improvement has at last taken place. A better tone has been in evidence throughout the week, prices have hardened all round, and as we write the tendency is still upwards. The attention of the trade seems to have become focussed for the time being upon the possibilities latent in Egyptian cotton, and a good business has been done, chiefly in Uppers for forward delivery. There is no doubt that on the Egyptian side, at all events, there has been considerably more doing of late in Manchester and district. It has also become increasingly evident that many spinners are running with very little margin in hand in the way of stocks of raw material, and therefore that it would need but a slight improvement in overseas trade to launch a steady flow of buying orders on the market. Whether or not this improvement has really commenced it is difficult to say, but certain it is that more than one spinner during the past week or two has received sufficient encouragement to induce him to enter into fairly substantial commitments. In our opinion these spinners are the wise ones, and with the majority it looks as if, once again, it was to be a case of "too late." Three weeks ago Upper Egyptian cotton stood at a most attractive price as compared with American staple cotton. Since then, however, America has bought big blocks of cotton direct from Alexandria, and a good deal of speculative buying has taken place all over the world. The feature of the past seven days has been the rapid stiffening of the Upper basis in Egypt, and although it is still attractive to those who can look ahead, it behoves those who wish to secure their requirements to act now before the price is pushed up beyond their reach. At the moment circumstances rather induce a "bullish" attitude towards this question. The political atmosphere has cleared in a most remarkable manner; the markets in New York and Alexandria are both strong, with the natural result in Liverpool, and Manchester reports display a quiet but steady improvement from day to day. Add to this the fact that last week's takings of Egyptian cotton by English spinners were just double the previous week's total, and a very healthy shrinkage is noticeable in our stock here. No doubt we shall have reactions and setbacks, and it is then that we should advise those interested to buy.

A steady business has taken place in Sudan cotton, and the customary inquiry for Sakellaridis 16.00d.-17.50d. has been more in evidence than ever. Brown and pillion have been neglected, but an intermittent inquiry for white cotton has persisted. Generally the would-be buyer finds the price of the genuine article too much for him, and contents himself with white Sudan, or switches off on to some other "outsider." A slight falling off in the demand for very low cotton has been noticeable. Very little has been done in the better grades of Sakellaridis, but when tested sellers have been found to be reasonable, and for those who are prepared to carry their holdings for a few months there is some cheap cotton to be picked up in Egypt to-day, which later in the season should bear a greatly enhanced value. Total sales, 3,100 bales (including 1,000 bales Sudan). Quotations are raised 35 points all round. Fully good fair Sakellaridis, 17.75d.

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on October 13 were as follows: Agricultural Bank of Egypt, £5 9-32; Alexandria Water Company, Ltd., £9; Anglo-American Nile Steam, £38⅛; Associated Cotton Ginners, £15-16; Banque d'Orient, 46 fr.; Behera Ord., £E7 7-16; Brasseries d'Egypte, 58 fr.; Building Lands of Egypt, £15-16; Cassi di Sconto Priv., 76½ fr.; Comptoir Fin et Com. d'Egypte, £1¼; Consolidated Lands, £T7; Credit Foncier Fondateur, 1025 fr.; Credit Foncier Act, 712 fr.; Credit Foncier 1886 Oblig., 315 fr.; Eaux du Caire, Capital, 86½ fr., Eaux du Caire Jouissance, 116 fr.; Egypt and Levant, S.S. Ord., 31s.; Egyptian Delta Light Railways, £4½; Filature National d'Egypt, £10⅛; Immeubles d'Egypt Soc. an des., £6¾; Khedivial Mail S.S. Ord., 80s.; Khedivial Mail S.S. Company Pref., £3½; Kom Ombo Ste an de Wadi, £4 1-16; Kom Ombo Ste An Fondateur, £32; Land Bank of Egypt, Parts de Fond, £46; Lots Turc., £44¾; Menzaleh Canal Navigation, £T291; Grand Hotels d'Egypte, £8¼; Ramleh Railways, £3⅜; Urbaines et Rurales, £4; Union Fonciere Fond., £½.

Near East Markets.

LONDON PRODUCE REPORT.

South African Oranges Advanced.

(From Our Own Correspondent.)

London, Monday Night.

Sugar.—Home refined has been in marked request at unchanged rates. Tate's cubes are steady at 56s. 6d., as also mineral water sugar at 51s. London and Lyle's granulated are firm features at 51s. 7½d. and 50s. 10½d. respectively. Foreign descriptions are unsteady. West Indian crystallised has advanced 1s. at 43s. 6d., while white Mauritius shows an increase of 1s. 3d. at 47s. 9d. Quotations are:—October, 21s. 4½d.; November, 21s. 3d.; December, 21s. 3d.; January, 21s. 4½d.; March, 21s. 6d.; and May, 21s. 7½d.

Coffee.—Prices remain firm. East Indian at 116s. remains unchanged. Costa Rica has shed 10s. at 110s., and Nairobi shows no change at 100s.-102s. The futures market has been quiet. Quotations are:—December, 60s. 9d.; March and May, 59s. 9d.

Desiccated Coconut.—The demand has been maintained throughout the week, while stocks are again declining.

Rice.—The market remains firm throughout. The new crop of Spanish-Japan rice has met with an excellent demand, while prices have remained at a fairly low level.

Green Fruit.—Prices of South African oranges have advanced again. A slightly heavier consignment has reached here during the week, but there is little hope of prices easing off until more supplies arrive. Quotations are:—Bold fruit, 27s. 6d. box (96 and 112's); medium size, 27s. 6d. box (252's), and the Popular Counts 30s. box (200's to 216's). A small consignment of Naples lemons were disposed of this week at excessive prices. Malaga lemons are attracting most attention at the present time, while quotations remain steady. Prices range from 25s. to 30s. case (420's). Naples lemons have been done at 50s. to 55s. a large box (300's). Valencia onions are in good request at harder rates.

Dried Fruit.—The outlook for sultanas is still doubtful, while there is an all-round scarcity of figs. Special interest is attached to the report of Messrs. C. J. Giraud and Co., Smyrna, which will be found on page 547, and which gives a comprehensive account of the dried fruit position. The market for Valencia raisins is poor, while stocks are accumulating rapidly. Quotations have risen 5s. on the week.

Oilseeds.—A steady tone has been in evidence. Indian linseed is 1½d. up on the week at 20s. 3s., while La Plata remains unaltered at 17s. 1½d. Rapeseed is variable. Toria has advanced 9d. at 18s., while bold Ferozepore shows no change at 16s. 7½d. Cottonseed has been a firm feature. Egyptian black is 1½d. up at 10s., while Sakellarides and Indian are unchanged at 9s. 4½d. and 8s. 3d. respectively.

Oils.—A fairly steady tone has prevailed. Linseed oil has gained 6d. at 39s. 6d., as also crude rape oil at 40s. 6d. Refined has advanced eighteenpence at 43s. 6d. Cotton oil, with the exception of Egyptian, has remained unchanged throughout. Egyptian has shed 2s. at 34s. 6d. Technical, refined, and deodorised are all unaltered at 37s., 43s., and 48s. respectively.

Oilcakes.—All quotations remain the same as last week. Linseed cake is 250s. Cottonseed and coconut cake are 140s. and 170s. respectively, and cottonmeal cake has come to business at 230s.

YUGO-SLAV SUGAR-BEET CROP.

According to recent reports, the sugar-beet crop of the Serb-Croat-Slovene Kingdom, although a very fair one, will not be quite so good as had been anticipated. The September rains have had the effect, it is said, of reducing the sugar-content of the roots. It is estimated that the production of sugar, which this year has been considerably increased, will amount to 3,000 wagons (30,000 tons). The Ministry of Communications has made special efforts to ensure that sufficient wagons are available for the transportation of the beet to the factories.

EGYPTIAN CROPS.

The bulletin of the Egyptian Ministry of Agriculture gives the followng particulars of crop conditions during September:—

Cotton.—The weather, though occasionally somewhat damp in the northern districts, was on the whole favourable to ripening of late bolls. First picking, which began a few days earlier than last year, progressed slowly during the month, but is now general. It is to be noted that in many districts heavy irrigations have produced unfavourable crop results, especially in localities situated at tail ends of canals, which could not be easily watered during summer rotations. Several observers report that the influences of insufficiency of water supply were less severely reflected on yields in the retentive soils of the northern zones, especially where drainage is good. This accounts for the many cases of comparatively good prospects in these zones. On free soils bordering the branches of the Nile and some of the older irrigation channels the outlook is relatively less satisfactory. The development of the pink boll worm attack has been very considerable, causing much loss in yield and quality.

Millet (Sêfi).—Harvesting is almost finished. No losses from flooding are reported. The yield is expected to be slightly below the average.

Millet (Nili).—Sowing has come to an end. Germination is satisfactory, and the crop is growing well.

Maize (Nili).—Weather was, on the whole, favourable, and water supply sufficient. Watering, manuring, and thinning late-sown crop are in progress. Early-sown crop is looking well, while the prospects in late-sown areas, although better than perhaps could have been expected, depend on continuance of very favourable weather conditions.

Rice (Sêfi).—The crop has improved considerably, owing to sufficiency of water. It is approaching maturity.

Bersim.—Weather was favourable and water supply sufficient. Sowing started towards the end of August. Preparation of land, sowing, and watering are in progress. Germination is good.

Sugar-cane.—Weather and water supply have been favourable. Stalk-borer and mealy bug have been reported. The attack is slight and causing no serious damage. The general condition of the crop is satisfactory.

SUDAN PRODUCE.

The following extracts are taken from the C.E.B. report for August:—

Gum.

The exports of gum, via Port Sudan, were as follows:—790 kilos of Hashab, of the value of £E35,380; 32,971 kilos of bleached, of the value of £E1,750; and 88,512 kilos of talh, of the value of £E1,898.

Kassala Province (July).—82 kantars of Hashab gum were exported from Gedaref during the month. Average price per kantar of 100 rottles (45 kilos) 610 m/ms.

Kordofan Province.—916 kantars were sold in El Obeid Market during August as against 4,401 during the same month last year, at an average price of £E1.576 per kantar. The arrivals at El Obeid from Nahud were 4,347 kantars as against 4,097 kantars last year. 1,322 kantars were sold in Nahud Market during the month as against 1,493 kantars last year, the average price being £E1.450. No gum was sold in Um Ruaba Market during August 1921 or 1922.

Cotton.

Berber Province.— Cotton sowing finished on August 22. A torrent did considerable damage, breaking a canal and flooding about 20 feddans of cotton. Some of this has been resown. The land is very clean and the crop has every chance of a good start.

Dura and Dukhn.

Berber Province.—Dura is stated to be a fair crop.

Darfur Province (July).—Dura was sold for 635 m/ms per ardeb of 300 rottles (135 from Sennar River kilos) in El Fasher Suk.

Fung Province.—333 tons of dura and 29 tons of dukhn were exported from Sennar River Siding.

Kordofan Province.—Quantity of grain sold in El Obeid Market and average prices, in ardebs of 420 rottles (189 kilos), 29 ardebs Dura Zinari at 910 m/ms per ardeb, 113 ardebs Dukhn at 850 m/ms per ardeb.

White Nile Province.—It is reported that, on the whole, the feterita crop throughout the province will be below the average except in Geteina District.

Dongola Provice.—The Seifi dura crop, which is now being harvested, is good on the whole.

Sesame.

Fung Province.—212 tons of sesame were exported from Sennar River Siding during the month.

Kassala Province.—274 ardebs of simsim were exported from Gedaref during July and 2 ardebs during August.

Kordofan Province.—14 ardebs of 330 rottles (148 kilos) of simsim were sold during the month at an average price of £E1.450 per ardeb.

White Nile Province.—Average market prices for the month, per ardeb of 330 rottles (148 kilos), were as follows:—Dueim, £E2.200; Tendelti, £E1.700.

Digitized by Google

Dates.

Dongola Province.—In certain parts, a large proportion of the late crop has been spoilt by rain. The dates are now being harvested.

Livestock, Hides and Skins.

Berber Province.—268 sheep and goats and 33 head of cattle were sold in Damar Market during the month, of which 71 and 6 respectively were exported. Average prices, sheep £E1.090 and cattle £E4.605.

Darfur Province.—150 head of cattle and 256 sheep were exported from Wadai during July. The Wadai cattle trade is now in full swing. 1,086 head of cattle passed through Geneina Quarantine Station during July as compared with 279 in July 1921.

Kassala Province.—328 head of cattle were exported from Gedaref during July and 606 during August.

Rainfall and Cultivation.

Berber Province.—The rains throughout the month have continued to be plentiful. The Sudan Plantation Syndicate's gauge at Zeidab shows a total rainfall of 10 in. to date. This is a record rainfall for Zeidab as far as the Syndicate's records go. Rain cultivation prospects continue to be excellent. From information received to date it appears that important wadis (except Wadi el Muhit) have been well watered. In some cases early cultivation has been swamped by subsequent floods, but the areas affected have been replanted and crop cultivation generally is reported to be looking well.

Halfa Province.—The river rose rapidly during the month and on the 31st was 56 cms. above the normal average of the last 14 years. Rain fell at No. 1 station, but there was no rain actually in Halfa. Slight rain fell in Delgo, but no damage has been done to buildings.

Kassala Province.—The rainfall during the month was as follows:—Kassala 185.6, Kashm el Girba 104.6, Gedaref 347.9, Gallabat 284.2, Mefaza 121.3. Rain cultivation throughout the province is reported to be uniformly good. Up to August 31 the Gash discharge for 1922 is about 70 per cent. of that of 1920, which was a bumper year, but it is interesting to note that the total discharge for August 1922 exceeded that of August 1920. Lands at the head of the delta are being sown, but on the lands further down the delta sowing is delayed owing to heavy flooding. A fairly large area on the Eastern Gash has been flooded this year; last year it received no water. The watering of the Feddadin and Halonga is proceeding satisfactorily. The main canal was blocked with silt on August 5, and it could not be cleared until the 23rd, when the canal was reopened. Since that date watering has been continuous. Heavy rain on August 16 took the place of one watering, and crops are well forward and healthy. The lands on Gharb Gash have all been watered twice and in many cases three times and crops are satisfactory. The demand for cotton seed is good, and 150 ardeb of seed have been issued. The Khors in Tamerein district are reported to have come down heavily, Khor Adi being said to be a vast lake. In anticipation of heavy crops, the price of dura at Kassala has fallen sharply.

Red Sea Province.—There have been four flushes in the Baraka during August, the last being the only one due to the Baraka, all the previous flushes coming from its branch Khor Langeb. The last on August 26 was large, but went straight through by the Eastern channel to the sea. An approximate area of 25,000 feddans has been watered, and in certain areas sowing has been started. It is to be feared that some of the Eastern area watered will not be productive as the soil is unsuitable. There have been some heavy rain storms during August and in Upper Langeb and Warriba districts there is every prospect of good cultivation. 24 mills fell at Erkowit on the 8th.

White Nile Province.—The rainfall has been good, but uncertain. In some places constant rain has made weeding of cultivations difficult, in others the rains have been sufficient only for crops on the sandy and lighter soils. As in 1921, the rains have been above the average, but the low price of grain has held out no inducements to the cultivator. Moreover, money is scarce, and comparatively few are willing or able to hire labour to any extent, the result being first of all that the area sown is much smaller than would be the case in a year of high prices, and, secondly, a certain amount of the crops have never been properly weeded, and the yield of these will therefore be small. The Goz land crops, dukhn and simsim, should be above the average.

Upper Nile Province.—The crops in the province are well reported on, except in the immediate vicinity of Kodok, rainfall being only 15½ in. for the whole season up to 31-8-1922 as compared with 23 in. during the same period of 1921.

Roads and Communications.

Bahr el Ghazal Province.—The Jur road from Rumbek to River Naan along the telegraph line has been cleared of rocks and work has been carried on as far as Old M'Volo. This is in connection with the opening up and administration of this hitherto little-known district. Rest houses have been erected at Khor Kuome., Mow Quok, and Aluk (Chief Banga on the map) on the Northern Portion of the Wau-Aweil road. At present the road runs from Wau to Badari on the Ponge and thence North. It is proposed to cut a new road direct from Wau to Long on the Pongo which will shorten the distance considerably.

Nuba Mountains Province.—The Khor Affin bridge work has stopped. A temporary flooring has been laid down which makes traffic possible during the rains. The Tonga-Talodi road was closed for Government and Army pack transport towards the end of the month, but it is not yet so bad as is usual at this season.

CURRENT PRICES.

General Produce.—Bacon (Continental), 126s. per cwt.; (Canadian), 111s. cwt.; (American), 95s. cwt.; butter (Danish), 224s. 6d. cwt.; (Australian), 200s. cwt.; (New Zealand), 218s. cwt.; cheese (Canadian), 102s. cwt.; (New Zealand), 102s. cwt.; lard, 76s. cwt.; eggs (Danish), 24s. per 120; (Styrian), 18s. 6d. per 120; chillies, 140s. cwt.; cloves (Zanzibar), 1s. 3½d. lb.; cocoa (Ceylon good to fine), 77s. 6d. cwt.; coffee (Costa Rica), 117s. 6d. cwt.; (East Indian), 115s. cwt.; (Central American), 96s. 6d. cwt.; (Jamaica), 74s. cwt.; (Mocha Longberry), 97s. 6d. cwt.; (Santos superior), 73s. 9d. cwt.; (Nairobi), 101s. cwt.; ginger (washed Cochin), 50s. cwt.; nutmegs (110's to 80's), 1s. lb.; pepper (Singapore black), 3⅞d.; (Muntok white), 6¼d. lb.; pimento, 2⅛d. lb.; raisins (Valencias), 112s. 6d. cwt.; currants (Vostizza), 95s. cwt.; currants (Amalias), 79s. cwt.; sultanas (Smyrna), 150s. cwt.; sugar (Tate's cubes), 56s. cwt.; (Lyle's granulated), 50s. 4½d. cwt.; (Mauritius crystals), 46s. 3d. cwt.; (West Indian crystallised), 43s. 10½d. cwt.; (centrifugal), 17s. 3d. cwt.; tapioca (fair Singapore), 2½d. lb.; rice (Rangoon No. 2), 15s. 4½d. cwt.; bran (Rangoon), £6 6s. 9d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 1s. 11d. lb.; tea (Indian common to good common), 1s. 1½d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 10d. lb.; Ceylon (common to good common), 1s. 1⅞d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 9½d. lb.; Java (common to good common), 1s. lb.; wheat (English white), 41s. 9½d. qr.; wheat (Australian), 52s. 3d. qr.; oats (English), 27s. 6d. qr.; oats (La Plata, ex-ship), 27s. qr.; maize (La Plata), 39s. 9d. qr.; flour, 37s. 6d. sack.

Chemicals.—Acids: Boric, 61s. cwt.; oxalic, 7½d. lb.; citric, 2s. 0½d. lb.; tartaric, 1s. 3d. lb.; ammonia (sulphate), £16 1s. 6d. ton; arsenic (white powdered), £46 10s. ton; benzole (standard), 1s. 9½d. gallon; bleaching powder (35 per cent.), £12 ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 107s. 6d. cwt. Potassium: Bichromate, 6¼d. lb.; chlorate, 4½d. lb.; caustic, £19 15s. ton; nitrate, £37 10s. ton; permanganate, 8d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £13 5s. ton. Sodium: Crystals, 110s. ton; bi-carbonate, £10 5s. ton; bichromate, 5¼d. lb.; alkali (58 per cent.), £8 1s. 3d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £20 2s. 6d. per ton; hyposulphite, £15 10s. ton; prussiate, 11d. lb.; nitrate, £13 7s. 6d. ton; glycerine (crude, 80 per cent.), £48 ton; (industrial, 1,260 per cent.), £85 ton; lemon oil, 2s. 7½d. lb.; quinine, 2s. 2d. oz.; red lead, £37 17s. 6d. ton; white lead, £40 10s. ton; white ground lead, £49 2s. 6d. ton; sulphate of copper, £26 5s. ton; sulphate of iron, 55s. ton.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 10d. lb.; 80 to 89 lb., 10d. lb.; 70 to 79 lb., 9⅞d. lb.; 60 to 69 lb., 9⅛d. lb.; 59 lb. and under, 7⅞d. lb.; (second), 90 lb. and up, 9d. lb.; 80 to 89 lb., 9d. lb.; 70 to 79 lb., 8d. lb.; 60 to 69 lb., 7⅝d. lb.; 59 lb. and under, 5⅞d. lb.; cows (first), 60 lb. and up, 7½d. lb.; 59 lb. and under, 6d. lb.; (second), 60 lb. and up, 6d. lb.; 59 lb. and under, 5½d. lb.; bulls (first), 5d. lb.; (second), 3½d. lb.; kips (first), 6d. lb.; (second), 5½d. lb.; (third), 4d. lb. Calcutta Market (prices in rupees per 20 lb):—Arsenic hides (cows): Agras, 7.8 to 12.8; Durbhangas, 7 to 8; Patnas, 5.8 to 6.8. Salted cows: 6.8 to 9.4. Arsenic hides (buffalo): 3.8 to 6. Skins: Calf, 8 to 10; goat (per 100 pieces), 250 to 290.

Metals.—Aluminium, £90 ton; antimony (English Regulus), £32 2s. 6d. ton; bismuth, 10s. lb.; copper (standard), £62 13. 9d. ton; copper (electro), £71 5s. ton; gold bars, 93s. oz.; iron (No. 3 Cleveland), 92s. 6d. ton; hematite (mixed number), 90s. ton; galvanised sheets (25 G), £16 10s. ton; lead (soft foreign), £25 ton; manganese Poti, 1s. 1½d. unit; molybdenite, 42s. 6d. unit; nickel, £140 ton; platinum, 440s. oz.; graphite (80-90), £13 10s. ton; quicksilver, £12 12s. 6d. bottle; spelter (G.O.B.), £32 16s. 3d. ton; tin (standard), £167 13s. 9d. ton; wolfram, 13s. 9d. unit; zinc sheets, £39 ton; tin plates (20 x 14), 18s. 9d. box; silver bars, 34⅜d. oz.

Miscellaneous.—Cotton (American), 13s. 25d. lb.; Egyptian (Sakel), 16.45d. lb.; jute (first grade), c.i.f., £32 5s. ton; jute (lightnings), £30 5s. ton. Oilseeds: Linseed (La Plata), £18 12s. 6d. ton; palm kernels, £16 8s. 9d. ton; castor seed (Bombay), £16 5s. ton; sesame seed (China), £21 ton; olive (Spanish), £74 ton; rape (crude), £40 10s. ton; soya, £34 12s. 6d. ton; petroleum, 1s. 2½d. gallon; petrol, 1s. 8d. gallon; fuel oil (ex-tank), 65s. ton; coconut (Ceylon), £36 2s. 6d. ton; cotton (crude), £34 5s. ton.

Shipping Intelligence.

TRADE OF THE PIRÆUS.

(From Our Own Correspondent.)

Athens, October 14.

The Chamber of Commerce at the Piræus has published a table of statistics showing the principal goods imported from abroad during the first six months of the current year, which have passed through the Piræus Custom House. These statistics show that, in spite of the very difficult economic period through which the country has been passing, trade has remained fairly brisk.

The following is a résumé of the statistics (the figures where not otherwise stated representing drachmæ):—Cattle products dutiable, 638,743,200; free of duty, 1,481,342; sundry fish, 615,585,100, free of duty; 171,131; agricultural products, 30,507,780,111, free of duty, 343,142; oils and substances of a fatty nature, 841,146, free of duty, 798,156; various forests products, 304,061,200, free of duty, 388,124; natural colours and tanning substances, 12,714, free of duty, 136,734; metal ores, 872,000, free of duty, 7,119,762 (99,422 tons); pharmaceutical products and chemicals, 1,671,849,298; undressed skins, etc., 125,674 tons; household furniture (wood), 17,077 tons; clothing, 4,204,689,200; wines and spirits, 21,126,200; cloth and cotton-pieces, 932,933,260; jute, 245,202; glass and earthenware, 392,696.30; mineral and metal work, 2,240,370; musical instruments and scientific apparatus, 20,400,350, free of duty, 18,733; stationery, 105,099,276, free of duty, 1,868,755,200; sundries, 740,922.5, free of duty, 32,650.

NEW ELLERMAN-HALL LINER.

The finely modelled steamer City of Evansville, built by Messrs. William Gray and Co., Ltd., West Hartlepool, for the Ellerman-Hall Line, Ltd., Liverpool, successfully passed her sea trials on October 14. The main dimensions of the vessel are:—Length overall, 451 ft.; breadth extreme, 57 ft. 3 in.; and depth moulded, 32 ft. 10 ins. The propelling machinery, built at the Central Engine Works of the builders, consists of triple expansion engines, with cylinders 24½ ins., 42½ ins., 74 ins. diameter, by 51 ins. stroke, and three boilers 16 ft. 4½ ins. diameter by 12 ft. 6 ins. in length, adapted for working pressure of 225 lbs. per square inch. An oil-fuel installation, suitable for quick conversion to either coal or oil burning, is fitted, working in conjunction with Howden's system of forced draught.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. Olympia for Bombay (Liverpool, November 4).

Anchor Brocklebank Line.—S.s. Magdapur for Calcutta (Birkenhead, October 30); s.s. Maidan for Port Said, Colombo, Madras, and Calcutta (London, November 7); s.s. Maihar for Calcutta (Birkenhead, November 8); s.s. Malakuta for Calcutta (Birkenhead, November 18); s.s. Manaar for Port Said, Colombo, Madras, and Calcutta (London, November 25); s.s. Maimyo for Port Said, Colombo, Madras, and Calcutta (London, December 9).

British India Line.—S.s. Manitola for Colombo, Madras, and Calcutta (London, October 27); s.s. Mulbera for Bombay and Karachi (London, November 3); s.s. Morvada for Colombo, Madras, and Calcutta (London, November 10); s.s. Mashobra for Bombay and Karachi (London, November 17); s.s. Merkara for Colombo, Madras, and Calcutta (London, November 24).

Cunard Line.—S.s. Malia for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piræus, Syra, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Poti, and Batoum (Swansea, October 27); s.s. Sea Serpent for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Swansea, October 31).

Ellerman Line.—S.s. Amatonga for Gibraltar, Malta, Patras, Piræus, Syra, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, November 11).

Ellerman "City" Line.—S.s. City of Cairo for Calcutta (Birkenhead, November 2); s.s. City of Calcutta for Calcutta (Birkenhead, November 13).

Ellerman's "Hall" Line.—S.s. City of Adelaide for Bombay, Karachi, and the Punjab (Liverpool, October 31).

Ellerman's Westcott and Laurance Line.—S.s. Gourko for Gibraltar, Malta, and Alexandria (London, November 1); s.s. Orlando for Gibraltar, Malta, and Alexandria (London, November 22).

Harrison Line.—S.s. Director for Port Said, Port Sudan, Aden, Mombasa, Djibouti, etc. (Birkenhead, November 2); s.s. Diplomat for Calcutta (Liverpool, November 6).

Henderson Line.—S.s. Chindwin for Port Said and Rangoon (Birkenhead, November 1).

Holt Line.—S.s. Mentor for Port Said, Port Swettenham, Singapore, etc. (Swansea, October 26); s.s. Myrmidon for Port Said, Port Swettenham, Singapore, etc. (Swansea, October 26); s.s. Keemun for Port Said, Port Swettenham, Singapore, etc. (Glasgow, November 2); s.s. Machaon for Port Said, Port Swettenham, Singapore, etc. (Glasgow, November 16).

Johnston Line.—S.s. Peruviana for Piræus, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, November 4). (This steamer is the last sailing this season to the Danube.)

Glen and Shire Line.—S.s. Glenbeg for Port Said, Port Swettenham, Singapore, etc. (London, November 2); s.s. Glensanda for Port Said, Port Swettenham, Singapore, etc. (London, November 16); s.s. Radnorshire for Port Said, Port Swettenham, Singapore, etc. (London, November 30); s.s. Glenshane for Port Said, Port Swettenham, Singapore, etc. (London, December 14).

Papayanni Line.—S.s. Bavarian for Melilla, Malta, and Alexandria (Liverpool, October 28).

P. and O. Line.—S.s. Kaisar-i-Hind for Bombay (London, October 27); s.s. Nyanza for Colombo, Madras, and Calcutta (London, November 3); s.s. Caledonia for Bombay (London, November 10); s.s. Khiva for Bombay (London, November 17).

BRITISH ORION OIL.

Production in September.

The British Orion Oil Co., Ltd., have issued a progress report of the Orion Societate Anonima Romana de Petrol for September, which shows that the total crude oil production for the month was 3,200 tons, the refinery throughout being 7,300 tons. The position of the wells in drilling at the end of September was as under:—Tintea Wells: No. 45, depth 1,079 ft., No. 71, depth 1,633 ft.; No. 79, depth 843 ft.; No. 94, depth 1,259 ft.; No. 95, depth 3,184 ft.; Nos. 105 and 106, rigging up; No. 108, levelling site. Runcu Wells: No. 602, depth 1,141 ft.; No. 605, depth 1,846 ft. (this well reached an oil sand at 1,843 ft. and made a powerful flow of oil and sand); No. 607, depth 1,144 ft.; No. 608, depth 1,059 ft.; No. 621, depth 1,292 ft; No. 612, rigging up; No. 623, levelling site for derrick. Moreni Wells: No. 550, depth 2,748 ft.; No. 555, rigging up. Gropi: Well No. 302, depth 1,368 ft.; rigging up. Satuc: Well No. 701, depth 1,879 ft.

SPECIAL MARKET REPORTS.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Jaffa, September 30.

The export of oranges will commence towards the end of the month. The freight to the United Kingdom has not yet been settled, but it will very likely be the same as last year, i.e , 3s. per case with a rebate of 6d. The events at Smyrna have put a stop to the import of oil from that town. This will severely affect the local manufacture of soap. Manufacturers will have to rely on local supplies and on oil from Italy.

Hamah.

The report for September states :—

Wheat and Barley.—During the month the price of these products has fallen considerably, but the strong demand for the Lebanon and various villages of the Littoral, notably Beyrout and Tripoli, has raised the price towards the end of the month to the level ruling at August 31. At the present time wheat is Ps. 350—400 per kantar, while barley is Ps. 215—240. The export of these products during the month has been much larger than in the previous month.

Wool.—Transactions in this article have almost come to an end, and there are no longer any disposable stocks on this market. The export of this product to Tripoli has amounted to only 90 tons.

Adana.

The report for July and August states : The great heat which prevailed during July and August has been, generally speaking, favourable for agriculture. The flower of the cotton plant has opened quickly, which has hastened the appearance of the cotton. The picking has been delayed, however, by the mobilisation. Work in the fields has thus been partly brought to a standstill ; it has been left to the women and children. It is hoped that the gathering of the cotton known as American will be completed about the first half of September, but that of the native cotton will not be finished until towards the end of October. The production of American cotton is estimated at about 4,000 bales, as compared with 1,500 for the previous year, and that of native cotton at 30,000 bales, as against 18,000 in 1921.

The stagnation of business which oppressed the market in July has continued during the past month. On the one hand, the Kemalist authorities have prohibited the exportation of cereals with a view to assuring the supplying of the army at low prices, and on the other hand, the stock of cotton of the old crop is markedly reduced. Any commercial transaction of importance has, therefore, been out of the question. Business has been limited to purchases of wheat by the flour trade to meet an order of 10,000 sacks of flour required for the army and 1,500 tons of barley bought direct from the farmers by the military administration.

The price of wheat rose from Ps.11 per oke to Ps.12 and Ps.12½ about the middle of August, subsequently falling to Ps.11½. The tendency is for the price of this commodity to fall as a result of the good yield of the crop in Konia vilayet. The crop of sesame has been negligible.

Company Meetings.

P. AND O.

Lord Inchcape on the Trade Outlook.

The Indian Economy Committee.

Presiding on October 18 at the eighty-second annual meeting of the Peninsular and Oriental Steam Navigation Company, Lord Inchcape said the meeting had been called a few weeks earlier than usual, as he had been commandeered by the Secretary of State and the Viceroy to be chairman of an Indian Economy Committee, and he was leaving next day for Delhi. Incidentally, stockholders would get their dividend earlier. He felt he had acted rightly in obeying the summons of the Government to take up a duty which he hoped might lead to economy and an arrest of increased taxation in India.

Safety at Sea.

Referring to the loss of their steamship Egypt by collision during fog, his lordship remarked that the board had lieutenants and experienced technical advisers to guide them, and the regulations laid down by the directors were, as the court stated, very complete. The record of the P. and O. and associated companies spoke for itself. During the past year the ships of the combined companies had traversed over 16 million miles and carried 2½ million passengers and crew. Nothing had been or would be wanting to ensure the carrying out of every possible precaution to protect the lives of those entrusted to them. He had travelled on a great many P. and O. steamers and ships of other lines, and could safely say that the organisation and discipline in the P. and O. were second to none; but no matter what the regulations or instructions might be, the human element had always to be reckoned with. The Egypt, expensively reconditioned after four years' Government service, was commanded by a man who had an unblemished record of thirty-four years' service in the P. and O.; she was well manned and well found, and a slight variation in speed of either of the vessels would have averted the disaster; but nothing was more dangerous at sea than fog, which came down suddenly and in patches.

Adverse Trade Conditions.

Many of their voyages had shown an adverse result. Outward freights had been scarce; homeward rates of freight to a great extent unremunerative; operating expenses had continued far in excess of the pre-war level. The strike of ship repairers, ended by an acceptance of the masters' terms, had involved them in serious difficulties, and ships had consequently had to go to sea with dirty hulls or, in some cases, to be docked and overhauled at Continental ports, where money was spent in labour and material instead of in London.

They had raised three and a-half millions by debenture issue on favourable terms for new construction. These debentures, chiefly taken up by their own stockholders, had considerably increased in value. The new debentures were redeemable not later than 1940, and they had set aside an initial sum of £60,000 towards the sinking fund; they had, besides, written off the discount and expense of issue, about £192,000. They had obtained authority under a supplementary charter for a further three and a-half millions of debentures, but had no immediate intention of making the issue. Although the insurance account had not gone so well as in the last year, they had increased the amount at credit by £94,242 7s. 11d., bringing it to £3,094,242 7s. 11d.

Recently, in reply to a question by Sir Eric Geddes, he had said that shipping was doing badly. Sir Eric's caustic reply was, "Oh, I suppose you will be paying your dividend out of your losses?" It had not come to that; their associated companies had helped materially; their conservative policy had assured a handsome sum from their investments; and the directors felt justified in proposing dividends of 5 per cent. on the preference stock, less tax, and 12 per cent. on the deferred stock, tax free.

Although there were signs of a break in the clouds, they had apparently a poor year or two ahead. Operating costs must come down to secure an equilibrium, or disaster must follow. Fortunately the P. and O. and associated companies had provided for bad years, and could carry on; but meantime they must try to get back to something more than making both ends meet. The Chancellor of the Exchequer was, he continued, manfully grappling to reduce public expenditure, and the country looked to him to bring down taxation. The community wanted to be permitted, by saving again, to build up the wealth of the country for reproductive enterprise.

The P. and O. Branch Line.

Five large new vessels for the branch service were now all in commission, and for their special service were second to none. Last year this service was able to fill only 30 per cent. of its outward cargo space, and although things were now no better, they hoped for an early revival in the Australian trade.

Of the enormous stock of Government wool in Australasia, the last of the New Zealand wool had, under a contract made soon after the Armistice by their lines and others, been transported; the last of the Australian wool would not be shipped before the spring. He mentioned this because in the report of the Government Controlling Committee, just issued, the following passage occurred:—"As shipping companies generally have the reputation of enforcing the highest rates, the present is an opportune occasion to state that the treatment received by the British Australian Wool Realisation Association, Ltd., from the contractors has been most considerate in respect of freight rates, and particularly in respect of the extension of the period for the shipment of wool stored in Australia." He would like in return to say that in all the negotiation there had been that policy of give and take essential to the conduct of large operations.

Need for an Economic Wage.

Dockers' wages had been brought down to 11s. a day, with a further agreed reduction of 1s. as from June next. It had been agreed that where necessary piece rates should be reviewed by the special committee, and it was hoped that consequently peace in dockland all over the country was assured for some time to come. Under the National Maritime Board reductions in sea pay had been agreed, £2 a month for seamen, firemen, and stewards, and more in the higher-paid grades. Distasteful as it was, he feared there must soon be further considerable reductions if the ships were to be kept running. They were greatly indebted to their colleague, Mr. Allen, for the work he had done as chairman of the Employers' Committee in these negotiations, and for the patience he had exercised in bringing about these amicable arrangements.

The Accounts.

They would observe that on the assets side the accounts were now given in more detail, but it was not in the stockholders' interest to disclose for the benefit of competitors the whole of their working.

New Directors.

He regretted that Mr. Ernest Cunard had had to retire from the board owing to ill-health. Lord Chalmers had also retired, and they had co-opted Mr. G. F. Hotblack, Mr. F. C. Allen, and Sir John Pender, all business men of large experience, who would be invaluable on the board, and whose appointment he hoped the stockholders would confirm.

In reply to some points regarding passenger arrangements, the Chairman thanked Mr. Hastie, the speaker, adding that suggestions from passengers were always welcomed by the board. Recently some improvement had been made regarding special trains from Plymouth for the service of homeward passengers disembarking there.

Dealing with questions on the accounts raised by Mr. Grennell Milne, his lordship remarked that the sum shown in the accounts as the value of the fleet did not include any steamers owned by the associated companies; it did include the cost, some £900,000 apiece, of the five new steamers built during the war for the Branch Line, and the cost of the Moldavia, about £1,200,000, and payments on account of their new 16,000 and 20,000 ton steamers. They hoped soon to reduce the book value of their new ships—he would not say how. As he had told them last year, of the total of £12,000,000 cash and securities no less than £7,500,000 were represented by Government securities, which had cost £6,893,784. Their investments were all very much under market value, but it would not be in the interests of the shareholders to disclose the figures. The credit balance was arrived at by the profit they had earned on running their ships and dividends on investments. As to the effect on the insurance fund of the losses of the Egypt and Wiltshire, P and O. steamers were not included in the fund—they never had been—but the loss of the Wiltshire was charged to that account. Cash in hand varied from day to day, and it was now in the neighbourhood of a quarter of a million. The average valuation of the fleet was considerably under the figure of £20 a ton mentioned by Mr. Milne, even taking the new ships into consideration.

Sir Fortescue Flannery, in moving a vote of thanks to the chairman and the board, said the results attained in a difficult year must be a source of satisfaction to the shareholders. The resolution was carried unanimously.

The proposed dividends were adopted, the appointments of Mr. F. C. Allen, Mr. G. F. Hotblack, and Sir John Denison-Pender were confirmed, the auditors were reappointed, the acceptance of the Tenth Supplemental Charter was approved, and, after a vote of thanks to the chairman, directors, and

Digitized by Google

staff, proposed by Sir J. Fortescue Flannery, Bt., M.P., and seconded by Mr. Grinell Milne, which was carried unanimously, and which was briefly acknowledged by the chairman, the meeting terminated.

COMPANY NOTES AND REPORTS.

Sudan Plantations.

The report of the Sudan Plantations Syndicate, Ltd., for the year ended June 30 states that the cotton which passed through their ginning factories during the last season was:—Zeidab, 2,124 bales, as against 1,684 bales for 1921; Tayiba, 1,398 bales, as against 1,237 bales; Barakat, 1,937 bales, as against 1,646 bales; and Hosh (Hag-Abdullah), 5,927 bales. The sale of this season's cotton at satisfactory prices was rendered difficult by market conditions, and during the time covered by this report only a comparatively small quantity was disposed of.

Under arrangements made with the Sudan Government for the more rapid development of the Gezira a pumping station is being erected at Wad el Nau. It is anticipated that this station will produce a crop in 1923-24. The temporary difficulties which stood in the way of the completion of the Blue Nile dam at Sennar have been overcome by the Sudan Government, and the directors believe that every effort will be made to complete within the next three years this great work, which has an important bearing on the activities of the syndicate.

The profit and loss account for the twelve months, after deduction of all outgoings, shows a net profit of £131,627 4s., which, added to the balance brought forward from last year, viz., £170,780 1s. 7d., less payment on account of taxation, £30,000, brings the total credit to £272,407 5s. 7d. The interim dividend of 3s. per share (equal to 15 per cent.) paid in July last (less income-tax) absorbed the sum of £45,000. The directors now recommend the declaration of a final dividend of 2s. per share, equal to 10 per cent., together with a bonus of 2s. per share, equal to 10 per cent. (both less income tax), £60,000, leaving a balance to be carried forward of £167,407 5s. 7d. Meeting, Winchester House, Old Broad Street, E.C.2., November 2, at 12 noon.

British India Steam Navigation.

The report of the directors of the British India Steam Navigation Co., Ltd., for the year to September 30 last states that the accounts show, after transfer from reserve funds and providing for depreciation, an available balance of £135,978. The directors recommend a dividend of 5 per cent. on preference stock (of which 2½ per cent. was paid in May last), £35,000, and a dividend of 8 per cent., free of tax, on shares (of which 4 per cent. interim was paid in May last), £76,576; balance to be carried forward, £24,402.

Owing to declining freights and scarcity of cargo, the results of the year's working of the steamers, as forecast in the last report, have not been satisfactory, and it has been necessary to lay up a number of the steamers which could not be run at a profit. No improvement has yet set in, but the worst may now have been reached, and with further reductions in working expenses in prospect better results may be achieved in the current year. The mail services have been maintained with regularity.

Bengal-Nagpur Railway.

The report of the Bengal-Nagpur Railway Co., Ltd., for the year ended March 31 states that the total number of passengers carried increased by 1,198,909, or about 6 per cent., but the amount received was less by Rs. 2,79,659, or about 1½ per cent. As compared with the previous year the tonnage of goods carried, exclusive of company's material, shows a decrease of 106,507 tons, or about 1½ per cent., while the freight received shows an increase of Rs. 16,13,218, or 4½ per cent. This falling-off in the volume of goods traffic is the net result, principally, of a heavy decline in metallic ores due to the absence of the demand from abroad for manganese, a falling-off in coal due to large imports of foreign coal to Karachi and Bombay, and to the embargo on coal exports from India to foreign ports, coupled with a substantial increase in general merchandise, notably cotton and rice, due to the favourable monsoon. Though the increased tonnage in the latter case was less than the decrease in the former, it was carried at higher rates producing the net increase in freight of Rs. 16,13,218. The increase in the working expenses as compared with the figures of the preceding year was Rs. 60.21 lakhs, or 14.20 per cent., and the ratio of expenses to gross earnings has risen from 65.98 to 71.53 per cent. The increase in expenses is due partly to the continued rise in wages paid and the comparatively high cost of materials, and, principally, to more broad gauge engines and wagons having been repaired, to a large proportion of engines and wagons requiring extensive repairs, and to the adjustment against revenue of the cost of 155 American wagons in replacement of a similar number of wagons unfit for traffic service.

Under the contract with the Secretary of State, surplus profits depend on the net earnings for a whole financial year exceeding the interest charges for the same period. The accounts now presented are those for the financial year year 1921-22. The results of working for the year are: Net earnings, Rs. 1,92,71,087; interest on open line capital, Rs. 2,00,74,715; surplus profits *deficit*, Rs. 8,03,628. This decline in surplus profits, amounting to Rs. 64.91 lakhs, as compared with the previous year, is the result of a decrease of Rs. 25.89 lakhs in net earnings, as explained above, and a heavy increase of Rs. 39.04 lakhs in interest charges. The latter has been brought about, apart from the additional interest payable in respect of the capital expenditure of the year, by the high rates of interest and discount at which debenture bonds falling due were renewed, coupled with the heavy decline from approximately 25 pence to approximately 16 pence in the rates of exchange at which sterling interest charges were converted into rupees for adjustment in the accounts. There are no surplus profits for division between Government and the company; but the company have obtained a refund of Indian income-tax and super-tax paid to Government in advance on *estimated* surplus profits, amounting to Rs. 98,100 or approximately £6,000, which has been temporarily invested in Government Securities in India.

The shareholders have received as guaranteed interest for the first half of the year under report £1 15s. 0d. and an interim dividend of 15s. per cent., together with a bonus of 10s. per cent., less tax, both paid from reserve. In addition to the second half of the guaranteed interest at £1 15s., less income-tax at 5s. in the £, the directors, in view of the favourable prospects of the year now in progress, feel fully justified in recommending an additional payment from the reserve of: (1) A further dividend of ¾ per cent., less income-tax at 3s. 9d. in the £; (2) a bonus of 10s. per cent. for the year ending March 31, 1922, less income-tax at 3s. 9d. in the £. With these payments the whole return for the year on each £100 stock will be 6 per cent. less income-tax. After providing for these payments and for income-tax and corporation tax, the balance at credit of the reserve at the end of 1922, if securities are taken at their present market price, will be about £135,000, as against £190,576, the balance at credit at the end of the previous year calculated on the basis of the market prices of securities then existing. In addition, Rs. 98,100, or approximately £6,000, are invested in Government securities in India which stand practically at par at the present time. The existing difference between the market value (£182,552) and book value (£199,881) of the sterling securities held is fully covered by the amount (£25,000) set aside in previous years as a provision against depreciation of investments. Meeting, Thursday, November 2, at 12 noon.

It is announced that the Smyrna branch of the Banco di Roma, which was recently destroyed by fire, has resumed business there in temporary premises.

The Bank of England are prepared to receive the coupons due November 1 on Egyptian Unified bonds; the necessary lists can be procured on application at the dividend pay office, 5-6, Lombard Street, E.C.

The court of directors of the Royal Mail Steam Packet Company have resolved to pay an interim dividend of 2 per cent. (less income-tax) on the ordinary stock. The dividend warrants will be posted to the proprietors on November 3.

The directors of the Bombay, Baroda, and Central India Railway propose payment, in January next, in addition to the half-year's guaranteed interest of 1½ per cent., of an interim dividend of 1½ per cent. in respect of profits for the year 1922-23.

NOTES OF THE WEEK.

The Conference.

The Swiss Government having readily consented to afford it hospitality, the Near East Conference will—unless the unforeseen happens—be held at Lausanne. Angora is supposed to have indicated a preference for an Italian venue, and Italy also would have liked it to be at Florence; but the doings of the Fascisti went far to render this impossible, and the resignation of the Italian Government probably dealt the death-blow to the proposal. At any rate, in the invitations issued last week, Lausanne was given as the place of meeting. The Conference will be divided into two parts: one dealing finally with the terms of peace between Turkey and the Allies, and one with the future of the Straits. Besides the Governments of Constantinople and Angora, Japan, Roumania, Yugoslavia, and Greece are invited to be present throughout the Conference; while Bulgaria and Russia have been invited to attend those sittings of the Conference at which the question of the Straits will be discussed. The Government of the United States has also been invited to be represented at the Conference; and though it is averse from taking any active part in the proceedings, it is expected that it will be represented by an observer, as it was at Genoa by the American Ambassador to Italy. From the purely British point of view it would be satisfactory if America could see her way to more active co-operation, but the difficulties in the way of such a course are well understood: and in any case her moral support will probably make itself felt. A good deal of solid work has been done in the way of clearing the ground for the Conference, and everything points to its holding its first sitting on November 13.

Moscow and Angora.

Moscow has been in a pet ever since the signing of the Mudania Convention, and early last week Constantinople telegrams announced that considerable alarm was felt in that city owing to reports of Bolshevist military concentrations in the Caucasus. As to the trustworthiness of the latter reports we are not in a position to write, but it is easy enough to account for Moscow's temper—Angora has acted without direct permission from its "ally." That is, of course, Angora's affair; though it is inconceivable that in the case of an attack by the Bolshevists on Turkey for coming to terms with the Western Powers the latter would stand idly by. Russian comments on the forthcoming Conference have been extremely insolent, as was to be expected from that quarter; and it remains to be seen what reply will be given to the invitation to attend. Meanwhile, it is highly significant that Yusuf Kemal Bey, Nationalist Commissary for Foreign Affairs, has resigned, and though the reason given is the usual "ill-health," there is no doubt at all that the step was in fact due to friction with the Bolshevist Government. Ismet Pasha has been elected to fill the vacancy, and he is expected to represent Angora at Lausanne. The fact that he acted at Mudania for the Nationalists will be regarded in some quarters as a good omen for the Conference.

Politics in Yugoslavia.

Our Correspondent in Yugoslavia sends us this week an account of the recent manœuvring of political parties in that country. The situation has been confused for some weeks, but it looks now as if the Coalition, under M. Pashitch, will be able to carry on long enough to put through measures which are absolutely necessary for the country's well-being. Since our Correspondent wrote, Dr. Lukinitch, a Croatian, said to have distinct Radical leanings, has been elected as M. Ribar's successor as President of the Skupshtina; and this is expected to have a steadying influence on the situation. Although M. Pashitch has had such a long spell of power, and although his policy has not invariably earned undiluted praise in the West, it is probably all to the good that he should retain office until next year. For Yugoslavia has many problems to face in the next few months, and until the Near Eastern Conference has—let us hope—settled the questions it has to solve it would be a great pity if Yugoslavia were disturbed by any internal upheaval.

Prince An rew of Greece.

A rather unpleasant sensation was caused last week by the announcement that Prince Andrew of Greece, a younger brother of King Constantine,

Digitized by Google

had been arrested by the Revolutionary Committee. The arrest took place at Corfu, and at first no satisfactory explanation of it was forthcoming. Later it was announced that it was in connection with operations on the Sakaria river last year. A representative of the Revolutionary Committee went to Corfu to take the Prince's evidence on this subject, and, finding his Highness an unsatisfactory witness, carried him off to Athens for further examination. The Prince is said to have disregarded the orders of General Papoulas at the time referred to, and to have followed out his own plans, with disastrous results for the Greek Army. If that be proved, it will explain the action now taken. But whether such action will help the Greek cause in any way to-day is quite another question.

Egypt and the Conference.

Egypt has applied for representation at the Near East Conference, and Great Britain, through whom the request was made, has asked the other Powers to agree. At the time of writing it seems tolerably certain that the request will be granted, and that Sarwat Pasha will be Egypt's representative at Lausanne. Unfortunately, the extremists show no inclination to accept this as another proof of Egyptian progress and independence, but clamour for Zaghloul Pasha to be the Egyptian representative. Their agitation is not likely to effect anything in the direction of their wishes, and Sarwat Pasha may be trusted to look after Egyptian interests in a manner entirely satisfactory to all reasonable Egyptians. It is natural enough that Egypt should wish to be represented at the Conference, for a number of questions affecting her more or less closely are sure to arise, such as the standing of Ottoman subjects in Egypt, Egyptian nationality, and so forth. Moreover, it may be no bad thing, for reasons less easy to state, to have an Egyptian representative at the conference table.

Egyptian "Bluff."

The Committee appointed to study the question of a Constitution for Egypt has presented its recommendations to Sarwat Pasha. Upon the whole they follow closely the lines that might have been expected. The design for the machine looks well enough in the main, and it is to be hoped that when it is constructed the engine will do all that is anticipated from it; but we must bear in mind that, however perfect in design and construction, any machine in regard to efficient working must depend largely upon the intelligence of those in charge of it. It is unfortunate that, in spite of the Sudan having been set aside as a reserved subject, the Constitution Commission has persisted in referring to the subject in its recommendations, which state: "The King is to be entitled 'King of Egypt and the Sudan'"; and later: "Although the Sudan belongs to the Egyptian kingdom, the Constitution does not apply to it, and a special administration will be provided." In view of the enormous importance attached by Egyptians to mere words—and, in fairness to them, it must be added, of the success that has attended their copious use of words recently—it is possible that the Committee believe that they have secured the sole control of Sudan for Egypt by the insertion of these statements. The sooner they are disillusioned the better.

General Gouraud and Syria.

Rumours were current last week in Paris that General Gouraud, High Commissioner in Syria, had tendered his resignation as a protest against the reduction of the military estimates. The particular reason given has been denied, although the General was reported to have written last August to the War Minister, stating that he would be obliged to resign if the credits were reduced to a certain point—which is understood to have been reached. It is now officially announced that he has requested to be recalled to France and to succeed General Maistre as a member of the Supreme War Council, and this request, it is added, has been granted. According to one report, his successor in Syria will probably be M. Franklin-Bouillon. General Gouraud has had, especially in the early days of his Commissionership, a difficult rôle to play in Syria, which he has invariably attributed to intrigue emanating from the countries over which Britain has a mandate. His successor, whoever he may be, may not find the post a very easy one to hold with credit.

"Liberty" in Persia.

The Persian Government has had further trouble with the Persian Press, and this has led up to a scrimmage in Teheran between the police and a crowd that wished to rush the Government buildings. The police apparently behaved well again, and dispersed the crowd by firing over the heads of those who formed it. It seems that the Premier had been nettled by comments passed in some of the more advanced journals on certain religious matters, and that he sought to expedite the passage through the Mejliss of the Press Act. His efforts, however, met with strong opposition, and finally a motion, proposed by the leader of the Democrats, for full discussion of the measure was carried. Whereupon the Government supporters withdrew from the House. It is impossible to withhold sympathy from the Premier in this matter, for the Persian Press has displayed no self-restraint at all, and, as our readers will remember, it has shown most violent anti-British feeling, and has gone to lengths in expressing it that pass all bounds of decency. It affords, in fact, a vivid object-lesson of the confusion that can arise in some minds between liberty and licence, and the sooner a readjustment of ideas is forced upon it the better it will be both for itself and for Persia.

Rising in the Caucasus.

The Caucasus has never taken whole-heartedly to Sovietism. In spite of the brutal repressive measures taken by the "Reds" against all who dare raise a hand for liberty, risings have been numerous; and now we are told that one of these, in the Georgievsk region, is causing considerable anxiety in Moscow. The "Red" forces dispatched to carry out the usual "punitive measures" of Bolshevism are reported to have met with reverses, and the forces of freedom appear to be gaining strength steadily. Moreover, the season is in favour of the latter, who are able to take refuge in the mountains with tribes hostile to the Bolshevists, and the Red forces show no strong desire to follow them there. Probably the rising will be put down presently, with similar horrors to those that have attended the suppression of other efforts to shake off the tyranny of Bolshevism; but, even so, it will not have been utterly in vain. It will have shown the world once more how Soviet rule is resented by free peoples.

India and the New Government.

So far as India is concerned, the new Government looks very like the old, for Lord Peel remains Secretary of State, with Lord Curzon's experience behind him, while the language used by Mr. Bonar Law in his election address might, as far as we can see, have come from the pen of Mr. Montagu. Indian critics, who use very high powered microscopes, will probably claim to have detected some minute difference, but they may at any rate be sure that "the quiet and orderly development of India under the Constitution of 1919" remains the

Digitized by Google

policy not merely of the new Prime Minister, but of the great mass of British opinion, which, after a little natural surprise, accepted Mr. Montagu's announcement of it as furnishing a principle to be placed outside the sphere of ordinary party warfare. It is true that the new Constitution may break down, but, if it does, the blame will be attributable to those classes of Indians who, from a great variety of motives, have conspired to wreck it; wherever they may be, the wreckers need not be looked for in Whitehall.

Stability and Progress.

We must, however, enter a protest against Mr. Bonar Law's aspiration that the result of this policy may be to "give increased stability" to the economic structure of India. No doubt he was thinking of the familiar administrative bugbears, the monsoon and the exchange, the Budget and—we must now add—the tariff, but, in reality, these form no part of the main structure. Inefficient methods of production, unduly low standards of life, exploitation of workers by parasites, the gambling propensities of middlemen, the wasteful hoarding of the precious metals—such are the present foundations of Indian economic life, and their stability is shown only too clearly by their survival for so long after the disappearance of most of the causes which brought them into existence. They have been of late attacked from all sides by economists, philanthropists, and experts in a dozen branches of science; they have withstood the trumpet-blasts of a generation of politicians in congress assembled: and if they are yielding to more effective methods, the change is so slow as to escape the notice of ordinary observers. India might well spare some portion of this stability in exchange for help to climb the ladder rather faster.

The Sikh Trouble.

The cables continue to inform us that the trouble over the Sikh shrines is the greatest present danger to the peace of India. If we have not recently referred to the subject, the reason is certainly not failure to appreciate the anxieties of the position, but we have been warned almost every day that serious developments were to be expected immediately, and a weekly review is not favourably placed to intervene between such prophecies and their fulfilment. Up to the time of writing, however, the actual position shows little change. The Government is stolidly enforcing the ordinary law by ordinary methods against the well-meaning but slow-witted men who have been induced by agitators to infringe it. In Madras, or Bengal, or even in Oudh, the people would probably by this time have found the agitators out; but Punjab brains work more slowly, and the possibilities appear to be either a more violent outburst of lawlessness, or the intervention of the public opinion of the rest of India. Neither Hindus nor Moslems in the mass have yet accepted the idea of religious reform, and it appears to be possible that a halt may be enforced by their unostentatious pressure, but otherwise there is very little prospect that the passions already roused will subside without some spectacular development.

First lists of foreign place-names the spelling of which has been settled by the Permanent Committee on Geographical Names have lately been issued in three separate pamphlets, one containing European, one African, and one Asiatic names. The Committee, of which Major-General Lord Edward Gleichen is Chairman, and consists of representatives of practically all Government Departments, working under the Royal Geographical Society, is laying down the correct spelling of foreign place-names for British official use.

THE WEEK AT HOME.

London, Monday Evening.

The New Cabinet.

Mr. Bonar Law's Cabinet has been received with respect, but hardly with wild enthusiasm. Lord Curzon remains at the Foreign Office, which is a guarantee of continuity in foreign policy, devoid of the excursions and alarums and excitements of his late chief. (Mr. Lloyd George's fatal habit of unrolling the map of Europe and taking a lesson in elementary geography was responsible for much.) Lord Derby goes to the War Office; Mr. Amery achieves his ambition, and the "mutineer" succeeds the late First Lord of the Admiralty. Mr. Bridgeman, whose native charm has been enhanced rather than spoilt by politics, is at the Home Office; he is one of the few men whom all men wish well. Mr. Stanley Baldwin is expected to make as good a Chancellor of the Exchequer as his predecessor, Sir Robert Horne, which is saying a good deal.

There is more criticism of Mr. Wood as head of the Board of Education—not that there is any objection to Mr. Wood *per se*, but he is the son of his father, and his father is Lord Halifax, who, as all the world knows, is a High Churchman, and on rather good terms with the Pope. Hence a certain stirring of the dead bones of the Nonconformist conscience; but, after all, Mr. Bonar Law is a Presbyterian, so the new Government is not likely to flirt overmuch with the Scarlet Woman.

Sir A. Griffith-Boscawen, who was quite good as Minister for Agriculture in the late Government, has, unfortunately, been transferred from a post in which he did well to the Ministry of Health, where he will be mostly concerned with babies instead of piglets.

The Duke of Devonshire is Colonial Secretary. He has the solid sense of the Cavendishes, but nothing more. He is not such a big man as Mr. Winston Churchill, who lost his appendix and his post on the same day, but who seems, from his election address to Dundee, to have lost none of his spirit under the surgical and political knives.

Lord Salisbury gets one of the decorative and dignified posts; he is a Die-Hard, and his appointment symbolises much. It suggests the resurrection of the "Hotel Cecil," and Mr. Lloyd George has unkindly remarked that the rest of the Die-Hards "will join the board after allotment." There has been a delay in announcing the minor appointments, and this has given colour to the rumour that the Die-Hards are to be disguised as Under-Secretaries, and smuggled in at the back door.

Election Speeches.

There has, of course, been a flood of oratory during the week, and it is increasing daily. Mr. Bonar Law has described himself modestly as "a commonplace individual," and has stated that his Government stands for "tranquillity and economy"; in other words, it will do as little as possible, and let us off as cheaply as it can. There is more than a rumour that some of the Departments are to be reduced, and one or two—like the Cabinet Secretariat and the Labour Exchanges—are to go altogether. They will be no loss, and they will knock a few millions off the annual expenditure. For the rest, Mr. Law has no particular programme, and the *Daily Mail* is getting quite cross about it. The new Prime

Digitized by Google

Minister has not even pledged himself to evacuate Palestine and Mesopotamia—in spite of the curses of Fleet Street, which always denounces these two countries when it can think of nothing else to denounce—and I doubt very much whether the electors want him to evacuate those territories. But Carmelite House, like a rebellious cook, has practically given the Government a month's notice if it doesn't do as it is told; and the leader-writers there are showing obvious signs of regretting the departure of Mr. Lloyd George, and wanting him back again. All of which, if it does not make statesmen tremble, at least makes the public smile.

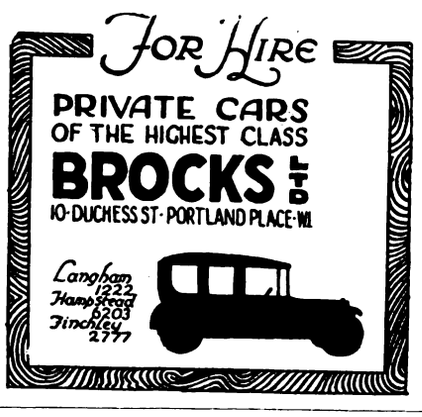
Meanwhile Mr. George has himself been engaged in a tornado of eloquence. He has been to Leeds, to the Colchester Oyster Feast, and to Glasgow. In each case he has delivered very much the same speech—amusing banter of his successor on the lines of "I was good enough for war-time, but when peace comes I am too expensive, and must be put into cold storage." It makes very good hearing and reading, and Mr. Lloyd George's popularity must be seen to be believed. It looks as though people only knew what they had lost when they found they had lost it, and it is already quite clear that the ex-Premier will hold the balance of power in the next Parliament.

Arrangements have been made in some constituencies for Unionists and Coalition-Liberals not to fight each other, so the Coalition, although officially dead, has unofficially a good deal of life. This is particularly the case in Scotland, where the *Glasgow Herald* has ranged its immense prestige whole-heartedly on the side of the Coalition—an awkwardish fact for Mr. Bonar Law, who sits for a Glasgow seat.

It is quite clear from the election speeches, however, that neither of the old historic parties wants to hurt the other too much. Both are afraid of Labour. If Labour does little in the election, as some sturdy folks anticipate, then it will be quite safe for the ancient feud of Liberal and Conservative to break out again; but if Labour gets the 200 or more seats that have been predicted, that will be in effect the end of Liberalism, and the rump that is left of the old Whigs will gravitate towards Toryism.

Labour Policy.

The Labour Party has issued its manifesto. Apart from saying that it believes in the League of Nations and "the independence of India and Egypt," the document is frankly an appeal to class prejudice. It promises "the free breakfast table," which is a bid for the woman's vote—cheaper tea and sugar help the housekeeping money, and no mention is made of cheaper beer, which comes out of the trousers pocket. That means, of course, that Labour insists on the public-house and the working man's club remaining a Tory centre.



Apart from that, the main feature is that there is to be no income-tax on incomes of less than £5 a week, and death duties are to be sharply raised on estates of over £5,000. This means, obviously, that Labour hardly expects anybody earning over £5 a week or likely to leave more than £5,000 to vote for it. On that basis it will hardly get a majority.

It also advocates a capital levy—here, as in other portions of the document, it shows some cloudiness as to the distinction between capital and interest—and it pledges itself to practically immediate nationalisation of mines and railways. In the case of the former industry we know, and in the case of the latter we may suspect, that that means a subsidy to be paid from Imperial funds.

This Labour manifesto is disappointing. I thought the party would produce something more courageous and idealistic. It gives the opponents of Labour the opportunity they have been longing for; and, in conjunction with Mr. Henderson's anathema of individual enterprise—which was hastily explained away by Mr. Clynes—it is certain to lose Labour a number of votes. A week ago I gave them 200, but two men whose judgment and knowledge I respect have since told me that, in their opinion, 150 will be the minimum and 175 the maximum Labour representation.

The Election Day.

The actual election day has been put forward from Saturday, November 18, to Wednesday, the 15th. On the whole, it is a good thing to get an election over as quickly as possible, and it will give more time for Parliament to pass the Irish Free State Bill. But Labour has attempted to make a grievance out of the day, on the ground that anything but a Saturday poll deprives the working man of his vote. This is all bunkum. Thousands of shops close early on Wednesday and keep open late on Saturdays; women prefer a mid-week poll to Saturday, which is shopping day; and the working man, after all, does not toil from dawn till dewy eve in these days. Where there's a will there's a way, and if he wants to vote he will find his way there on the day.

All the polling is on one day, and we shall know the best—and the worst—by the afternoon of the day following. But it is an indication of public opinion that nobody expects an outright victory for any party, and I hear of even bets that the next Parliament will not last longer than a twelvemonth.

Another Fall of Prices.

Railway fares are to fall at last. On January 1 a farthing a mile is to be knocked off the ordinary tickets—which will make a difference of 3s. in every guinea. Roughly speaking, this will cancel the increase of the summer of 1920, but railway fares will still be 50 per cent. above the 1914 level. There is no reduction in season tickets, and there probably will not be until an agitation has convinced the companies of the error of their ways.

Ocellus.

FREEMASONRY APPEAL.

The United Service Lodge, No. 198 on the roll of the Grand Lodge of Egypt, has issued an appeal for support for a scheme to build a Masonic temple at Port Said. The lodge was formed during the War by Australians and New Zealanders, supported by naval officers, and the temple is projected as a memorial to Freemasons who died in action in Egypt and Palestine. The estimated cost of the building as originally contemplated is £4,000; but a design has been issued for a cheaper building, costing between £2,500 and £3,000. Contributions should be sent to the Master, Senior Warden, or Treasurer of the Lodge, Port Said, Egypt.

EGYPT.

Cairo, October 20.

The Turkish Peace Conference.

Great interest is not unnaturally being taken in the Turkish Peace Conference, and the application made by the Egyptian Government for the admission of its representatives is arousing considerable discussion here. The application has been made through the Residency, as Egypt has for the time being no diplomatic agents abroad, and the British Government has been requested to transmit this demand to the various Allied Powers. The Egyptian Ministry of Foreign Affairs is understood to hold the view that as Egypt is now an independent sovereign State, and her new status has been recognised by the Allied Powers, she has the right to be represented by her own representatives at a Conference, which, since it is to remodel the Treaty of Sèvres, will deal with various questions of direct interest to Egypt that were settled by that Treaty.

The reply of the Powers is awaited with great interest, and in Egyptian circles it is considered that the change in Egypt's political status precludes that answer from being anything but in the affirmative. The only point on which the various parties appear to differ is the designation of the Egyptian representative. The Extremist Press clamours for the nomination of Zaghloul Pasha or for the matter to be submitted to the nation, but the more reasonable element considers that it should be left to the Cabinet to select the most suitable representative, but that the Peace Treaty should be submitted for ratification to the coming Egyptian Parliament.

It would certainly appear but reasonable that, now that her independence has been recognised, Egypt should be permitted to participate in a Conference where some of the questions to be discussed so intimately concern her; and it is to be hoped that the Egyptian Government's demand will be acquiesced in, for such acquiescence would constitute a further and tangible proof that the new status is real.

The Mixed Court Judges.

At its last sitting the Council of Ministers passed the scheme for the all-round increase in the salaries of the Mixed Court Judges. These increases had been agreed to last spring as a result of very considerable pressure brought to bear by the Courts. The delay in putting the agreement into operation had given rise to a good deal of feeling amongst the judges, but, fortunately, the Cabinet has officially approved the increased scale before the end of the vacation, so that when the judges return they will find the question definitely settled and a substantial cheque for arrears awaiting them. Meanwhile the judges of the Native Courts are clamouring for an increase in their scale of pay, so as to bring them up to the level of their Mixed Court colleagues. As far as can be seen, while the junior judges of the former Courts are perhaps paid on the low side, the more senior members have no just cause for complaint. They certainly cannot reasonably claim to be paid on the same scale as the members of the Mixed Courts bench, for the very good reason that the latter are specially selected for their legal experience and learning from amongst the leading experts in their own countries, and thus can lay claim to qualifications which the Native Bench cannot possibly possess, while they are also called upon to assume judicial responsibilities which at present do not fall to the lot of their Native Court colleagues.

It should, moreover, be obvious to all who examine the question that in a country like Egypt, where hierarchical prestige is directly dependent on salary, the members of the Mixed Courts, which, from the very nature of their functions, enjoy a predominant position in the judicature of the country, must receive a scale of remuneration that establishes without doubt their precedence over their colleagues of the Native Courts; and in view of the radical changes that are being made in the personnel of the latter, and of the increased responsibilities that will, as a natural consequence, fall to the Mixed Courts, the necessity for this distinctive treatment in the matter of remuneration becomes more imperative than ever.

The Manchester Speech.

Mr. Lloyd George's speech, which was eagerly awaited, was avidly read on arrival, and has been one of the main topics ever since. As a fighting speech in defence of his policy, it has generally excited admiration. In British circles there is, however, division of opinion as to the expediency of his actual references to the Turks, and there is a feeling that he might have attained the same object *vis-à-vis* the latter by a more careful choice of his words. In Moslem circles, of course, he has given the greatest offence, but that was to be expected. At the same time, one good effect of his speech may be that it will give the Egyptians a more accurate idea of the respective sincerity of the three Great Powers who have figured in the recent Turkish crisis. Latterly the opinion has been freely voiced that France was the true friend of Islam and Turkey, and that Great Britain was the determined enemy. The revelation made by Mr. Lloyd George that France and Italy were already agreed with Great Britain in 1916 on the partition of the Turkish Empire should go a long way to modify this view, though it is to be feared that in certain Egyptian circles nothing will ever shake the conviction that British policy is always perfidious.

SUDAN.

Khartoum, October 13.

Rain—and More Rain.

That universal topic, the weather, is unusually to the fore in Khartoum. The rains this year have amounted to 16 ins., which is double the normal. Not only so, but 13 ins. fell in about three weeks towards the end of July and the earlier part of August, and now in October, when an occasional shower has been known to occur, there are nearly every day showers of slight duration, but enough to count as rain.

The unusual rain is apparent to any traveller from the North, who finds, instead of the rather arid plains of Berber, a continuity of green trees and grass all the way; and the rain cultivation over this area should be far above the average, which will compensate for lesser production in cases where excessive rain has choked the cultivation.

One result of the rains has been the temporary closing of the Khartoum golf course, but through the efforts of the committee it has been cleared and repaired, and was opened again on October 6.

Amusements.

Khartoum has not many forms of amusement to offer in the way of theatres or concerts. Indeed,

apart from occasional efforts by "amateur" companies in the interest of charity, it had only one cinematograph show, which appeared twice a week. Latterly, however, the proprietor has added a third evening weekly to the cinematograph performances, and on "off" nights the old skating rink, where the films are shown, is used for roller-skating, and an innovation is being made of a weekly "ball," the first of which is to take place on October 14. The difficulties of managing any public amusements in the face of dust-storms or rain are many, and the public owes a debt of gratitude to the proprietor of the cinema for his efforts in the direction of providing some form of entertainment.

A general meeting of the Khartoum Racing Club was held on October 10. This club is an offshoot of the Sudan Club, and only members of the latter club could be members of the Racing Club. Under a new arrangement similar to that widely used elsewhere the public is now eligible to become "stand members," which gives them all the privileges of membership except voting at the general meeting or being officers of the club.

The Housing Problem.

The housing question in Khartoum continues to present a difficult problem. The increase in the European population has not been accompanied by a parallel increase in houses, with the result that it is extremely difficult for a new arrival to find a suitable house. The matter became so acute that the Government had to build a considerable number of dwelling-houses for officials, but notwithstanding this, there is still a shortage of houses, and rents are correspondingly high. It is to be hoped that now that prices of material are falling more building will be undertaken by private enterprise.

PALESTINE.

Jerusalem, October 16.

The Census: Some Difficulties.

Undeterred by that unfortunate precedent when "Satan stood up and moved David to number Israel," the Government is to take a census of the population of Palestine as a necessary preliminary to drawing up the list of voters—all male Palestinians of 25 years and over—for the Legislative Council. October 22 was the date appointed. If this date can be adhered to, it will be an unexpected triumph of speedy organisation. The arrangements are in the hands of the head of the Department of Customs and Revenue, Mr. J. B. Barron. A circular was sent out about a fortnight ago informing the public of the coming event, its importance and its advantages. Census-taking here is not the same simple procedure that we know in England. In the first place, there is a certain deeply rooted prejudice to overcome, and the circular finds it necessary to point out that "the Governments of all civilised countries take a census of the population at fixed intervals, and the Ottoman Government took a census every ten years. The object of the Ottoman census was principally to obtain particulars for calling up persons for military service, but the Government of Palestine has no intention whatsoever of re-establishing military service, nor has it any intention of utilising the information obtained for imposing fresh taxation."

The particulars required in the schedule of returns are of the simplest character. There are, however, one or two points of interest in the instructions; thus, "in the case of Mohammedan families the names of the female relatives need not be given, except in the case of the Head of the House"; the varied religious complexion of the country is well illustrated: "State religion of each person, whether Mohammedan or Jew or Christian or other religion. Christians should also state whether they belong to one of the following Churches: Greek Orthodox, Syrian Orthodox, Armenian Church, Coptic Church, Abyssinian Church, Roman Catholic, Greek Catholic, Syrian Catholic, Armenian Catholic, Church of England, or Other Christian Denomination." Column 9 is for "Occupation," but here, apparently, the census suspects that it is treading on delicate ground, and that "For ways that are dark, and for tricks that are vain, the Palestinian is peculiar"; anyhow, the "language is plain"—that "the filling up of this column is optional. Persons may state the precise nature of their occupation if they so desire."

The Moslem-Christian Association in its last *ex cathedrâ* utterance, while banning utterly all Arab participation in the elections to the Legislative Council, gave its consent to the taking of the census. But the circular sent out by the Superintendent of Census failed to meet with its approval, so a lengthy memorandum was sent by the Association to the High Commissioner, complaining that the circular was not signed by the High Commissioner nor approved by the Palestine Advisory Council; that the Census, if carried out along the lines described in the circular, would damage the rights of the Arabs, since it would leave out of account: (a) All Palestinians who had left the country, (b) all Palestinian students studying abroad, (c) all Palestinians who were temporarily absent from Palestine or from their homes, (d) all business people who chanced to be away from their homes at the moment of the census-taking, together with artisans and villagers whose work kept them out in the fields all night and out of sight of the *mukhtar* of the village when he was counting his people; that this meant "scores of thousands" of Arabs being left out of account, to the disadvantage of the Arab population. Furthermore, the returns as to age would have no statistical value, "since (a) every man wants to pretend that he is younger than he really is, (b) a large number of the villagers do not know their age, and (c) the census scheme gives every man the chance of fixing his age to suit his own convenience." Yet, again, "it makes it easy for the father of a family to return the number of his family as large or small, just as he thinks fit, or as it best suits his private affairs."

The Moslem-Christian Association is, therefore, of the opinion that it is preferable to adopt a scheme whereby "experienced residents should carry out the census, accurately and slowly; and if the Government wishes to hasten matters, it could set up a number of committees. But if the Government has in mind, rather, economising of expense, it should bear in mind that the increase of revenue resulting from the census would outbalance the expenses incurred by these committees."

Influence of American Jewry.

It is almost inevitable that the few sections of the English Press interested in the Palestine Question and the claims and ideals of Zionism, tend

JUST PUBLISHED.
THE HANDBOOK OF PALESTINE
Edited by HARRY CHARLES LUKE, B.Litt., M.A., and EDWARD KEITH-ROACH. With an Introduction by the Rt. Hon. SIR HERBERT SAMUEL, P.C., G.B.E. With Frontispiece and Map. Crown 8vo. 12s. net

to present or oppose maximum interpretations or misinterpretations of the "Balfour Declaration." In this they follow a considerable body of Jewish opinion such as is represented, for example, by the London *Jewish Chronicle* or the equally extreme but more enthusiastic and sometimes fantastic idealism of Zionist programmes from East Europe. But, however vociferous this section may be, a solid fact should always be borne in mind: although present-day Zionist aspirations had their origin in Eastern Jewry, their fulfilment or non-fulfilment rests in the hands of American Jewry. There, ambitions for the future of Palestine are far saner, far more possible of attainment and far less likely to estrange the sympathy of the rest of the world interested in the Holy Land; and, what is more, with the financial wreckage of Central and Eastern Europe, the "American Zionist" policy must be the one to have any tangible effect on large-scale Jewish activities here. A certain well-known and wealthy American Zionist recently left Palestine after many months spent in gauging the possibilities of the country on behalf of the principal American Zionist organisation. He left behind him a statement to the Jews of Palestine which deserves more than a local publicity. Those who remember the concluding article of the series contributed to *The Times* by Mr. Philip Graves will be interested to see how closely his ideas as to the future of the Jews in Palestine conform to those of the effective force in Zionism. It is an attitude familiar enough to those who have studied the inner workings of the Zionist movement, but it is of some value to realise that it is the attitude characteristic of those Zionists who are now the masters of the situation. The following extracts from the above-mentioned statement may, therefore, be of interest:—
